Class materials examine how state socialism shaped gender roles and women's and men's lives differently as well as how gays and lesbians struggled against social taboo and state repression. Students analyze the impact of modernization, industrialization, war and other conflicts on concepts of femininity and masculinity as well as on the regulation of sexuality and family relations in several Eastern European countries. We will place these dynamics within the context of broader political and cultural developments, ending with an analysis of the breakdown of socialism in the early 1990s and its impact on gender relations and the freedom of expression. The course provides students with a basic knowledge of the history of Eastern Europe and of left-wing movements active in the area, emphasizing the effects of communist ideas on women, gender equality, and non-normative sexual orientations.

**L97 GS 3554 Political Economy of Democracy**

In the last few years a number of important books have appeared that combine elements of economics reasoning and political science, in an effort to understand the wide variation in economic development in the world. This course will deal with the logic apparatus underpinning these books. In addition, the course will introduce the student to the theoretical apparatus that can be used to examine democratic institutions in the developed world, and the success or otherwise of moves to democratization in the less developed world.

**L97 GS 3556 Exile in Global French & Francophone Cultures: Senegal, Algeria, & the Caribbean**

French is the fifth most spoken language in the world, with an estimated 300 million speakers in 106 countries and territories. It is the only language aside from English to be spoken on five continents, according to the OIF. In the wake of decolonization and the rapid spread of globalization, the French language has been adopted, adapted and transformed in various locales and with widespread cultural implications. This course will aim to explore French culture through the specific case studies of Senegal, Algeria, the Caribbean and Francophone exiles worldwide. We will explore the history, literature, poetry and film of these regions and, in doing so, gain a more nuanced and complex understanding of global French cultures. In this course, we will study a range of works that will provide a window onto the issues

of French cultural and national identity in the modern world. We will delve into the role of race, ethnicity, belonging and identity in global French and Francophone societies. Students will gain an understanding of French (post)colonial history and current French politics and culture through novels, poetry and film. Knowledge of French is not required for this class.

**L97 GS 3559 Socialist and Secular? A Social History of the Soviet Union**

This class explores daily life and cultural developments in the Soviet Union, 1917 to 1999. Focusing on the everyday experience of Soviet citizens during these years, students learn about the effects of large-scale social and political transformation on the private lives of people.

To explore daily life in the Soviet Union, this class uses a variety of sources and media, including scholarly analysis, contemporaneous portrayals, literary representations, and films. Students will receive a foundation in Soviet political, social, and cultural history with deeper insights into select aspects of life in Soviet society.

**L97 GS 356 Andean History: Culture and Politics**

Since pre-Columbian times, the central Andean mountain system, combining highlands, coastal and jungle areas, has been the locus of multiethnic polities. Within this highly variegated geographical and cultural-historical space, emerged the Inca Empire, the Viceroyalty of Peru - Spain's core South American colony, and the central Andean republics of Ecuador, Peru, and Bolivia. Taking a chronological and thematic approach, this course will examine pre-Columbian Andean societies, Inca rule, Andean transformations under Spanish colonialism, post-independence nation-state formation, state-Indian relations, reform and revolutionary movements, and neoliberal policies and the rise of new social movements and ethnic politics. This course focuses primarily on the development of popular and elite political cultures, and the nature and complexity of local, regional, and national power relations.

---

**L97 GS 3570 All Measures Short of War**

This course focuses on the return of great power competition in the 21st century. In particular, it examines the security challenges facing the United States in the form of strategic competition from revisionist states (Russia and China) and hostile threats from rogue regimes (Iran and North Korea). Through a consideration of the strategic, military, political, economic, and intelligence dynamics germane to foreign policy and national security, it will examine the hypothesis that the United States is not likely to go to hot war with any of these four nations but instead resort to what President Roosevelt in another context and time famously called "all measures short of war" -- in other words, engaging one another through new technologies such as cyber, artificial intelligence, robotics, big data, hypersonics, biotechnology, and other means that have come to demarcate a hybrid battlefield in an age of hostile competition. As such, the course will assess the recent past, current state, and likely future of American power in the new global security environment.

**L97 GS 3594 The Wheels of Commerce: From the Industrial Revolution to Global Capitalism**

This course introduces the methods, issues, and debates that shape our understanding of economic change and development from the Industrial Revolution to the post-industrial age. Engaging economic theorists from Marx to Smith, to Weber and Wallerstein, this course problematizes the notion of rational economic actors and interrogates notions of free trade in an attempt to understand the impact of capitalism on the world. We start the course with a discussion of the "exceptionalism" of Great Britain as the first industrial nation and reconsider the impact of new trade, production, property and monetary/financial regimes that resulted in the so-called "Great Divergence" between China and the West. We then turn to the "late industrializers" of China, Japan, and Mexico in order to investigate the varieties of development, specifically focusing on monetary integration, legal integration and the global impact of the great depression. Continuing into the Bretton Woods Conference and the post-war international monetary systems, we bring the course to a close with the advent of the "post-industrial age." This course is designed both for students specializing in economic history and students in all disciplines interested in historical approaches to political/economic development. **L97 GS 3598 The First World War and the Making of Modern Europe**

The First World War ushered our age into existence. Its memories still haunt us and its aftershocks shaped the course of the twentieth century. The Russian Revolution, the emergence of new national states, Fascism, Nazism, the Second World War, and the Cold War are all its products. Today, many of the ethnic and national conflicts that triggered war in 1914 have resurfaced. Understanding the First World War, in short, is crucial to understanding our own era. **L97 GS 3602 Borders, Checkpoints, and the Frontiers of Literature**

Borders are some of the most strange, dangerous, and changeable places in the world. They help define not only where we are, but also who we are. This course will read literature from and about border regions around the world: the Mexican-American frontera, the Indian and Pakistani Partition line, the German Iron Curtain, the African colonial borders, and the Israeli-Palestinian divisions. Even if we live far from any international boundary, the notion of the border shapes our thinking about the world. Literature is a place where borders are vividly imagined, marked, and debated in ways that both affect preexisting frontiers and help draw new ones on the ground. We will read all texts in English.

**L97 GS 3604 Environmental Inequality: Toxicity, Health, and Justice**

How are the problems of environmental stress, pollution, and degradation unevenly borne? Adopting cross-cultural, biosocial, intersectional, and posthumanist approaches, this course explores how exposures to environmental toxicities and dangers result in and exacerbate health harms, social disparities, and structural violences. A range of historical and contemporary case studies will include plagues, weather, fire, water, waste, minerals, air, etc. Students will not only gain an understanding of these problems and burdens, but also explore the transformative potential in intertwining environmental justice, critical global health, and social justice movements to seek solutions to these vital issues.

**L97 GS 365 Theatre Culture Studies III: Melodrama to Modernism**

The third in the department's three-course history sequence, TCS III surveys the dramatic literature and cultural history of the modern theater. Beginning with Romanticism's self-conscious break with the past, we'll study the rise of bourgeois melodrama with its intensely emotional rendering of character and spectacular effects. We'll consider how those effects were made possible by advances in industrial stage technology which reproduced the everyday world with unprecedented verisimilitude, and how playwrights responded to those technologies by calling for the theatre to become either a "total work of art"--plunging its spectators into a mythical realm--or a petri dish--analyzing the struggles of the modern individual within his or her modern milieu. Exploring a range of aesthetic modes--including Realism, Naturalism, Symbolism, Expressionism, the Epic Theatre, and the Theatre of the Absurd--we will read classic plays by modern playwrights to consider how the modern theatre helped its audiences understand as well as adapt to the rapidly changing conditions of the modern world.

**L97 GS 3650 Topics in Modern Korean Literature**

Korean popular culture has received attention from across the globe for more than 20 years through K-drama, K-cinema, K-pop, K-beauty, webtoon, video games, mukbang (a live-streamed eating show), and so on. This course examines the global popularity of Korean popular culture, known as the Korean Wave (Hallyu). In addition to providing a comprehensive understanding of contemporary Korean culture, society, and politics through popular cultural products, the course will teach a variety of critical tools to interpret them. For example, how would you interpret the inclusion of traditional Korean games for children in Squid Game and its relevance to contemporary Korean society? How would you interpret the scene with the bomb under the bridge in Psy's "Gangnam Style" music video in relation to Korean history? Why is mukbang popular among younger generation in Korea? Through readings, screenings, listening, and discussions, students will learn why and how popular culture is inevitably tied to history, culture, and society. The class will also look at the role of media in understanding how South Korea comes to create a vibrant pop culture scene and why global audiences from diverse racial and generational backgrounds relish Hallyu. Successful students will gain the skills to critically interpret Korea through popular culture and understand the impact of media on cultural globalization. No background in Korean language, history, or culture is required. Modern course; fulfills modern elective for EALC major.

**L97 GS 3660 Caste: Sexuality, Race and Globalization**

Be it sati or enforced widowhood, arranged or love marriage, the rise of national leaders like Indira Gandhi and Kamala Harris, or the obsession with "fair" skin, caste shapes possibilities and perceptions for billions. In this class we combine a historical understanding of the social caste structure with the insights made by those who have worked to annihilate caste. We will re-visit history with the analytic tools provided by the concepts of compulsory endogamy, "surplus woman," and "brahmanical patriarchy," and we will build an understanding of the enduring yet invisible "sexual-caste" complex. As we will see, caste has always relied on sexual difference, its ever-mutating power enabled by the intersectionalities of race, gender and class. We'll learn how caste adapts to every twist in world history, increasingly taking root outside India and South Asia. We will delve into film and memoir, sources that document the incessant injustices of caste and how they have compounded under globalization. The class will research the exchange of concepts between anti-race and anti-caste activists: how caste has shaped the work of prominent anti-racist intellectuals and activists in the United States such as W.E.B. DuBois and Isabel Wilkerson

and in turn, the agenda and creativity of groups such as the Dalit Panthers. Finally, the course will build a practical guide to engaging with and interrupting caste in the context of the contemporary global world today. Waitlists controlled by Department; priority given to WGSS majors. Enrollment cap 15.

---

**L97 GS 3662 Experts, Administrators, and Soldiers: Governance and Development in Post-Colonial Africa**

Between 1957 and 1975, one African territory after another made the transition from European colony to independent nation state. Widespread optimism that these "transfers of power" would bring a new era of prosperity and dignity dissipated quickly as the new nations struggled with political instability, military coups, social unrest, and persistent poverty. Consequently many western observers and development specialists are certain that they have become "failed states" requiring foreign assistance to develop properly.

This course challenges these assumptions by tracing the origins of African governance and economic development from their imperial origins into the independence era. By exploring nation-building, economic planning, and public administration from the perspective of political elites, foreign experts, and ordinary people the class takes an intimate look at how colonies became nation states. These new perspectives offer students a historical grounding in international public administration and development by exploring how imperial ideas and concepts continue to influence contemporary social planning and development policy in both Africa and the wider world.

**L97 GS 3670 Gurus, Saints, and Scientists: Religion in Modern South Asia**

Many long-standing South Asian traditions have been subject to radical reinterpretation, and many new religious movements have arisen, as South Asians have grappled with how to accommodate their traditions of learning and practice to what they have perceived to be the conditions of modern life. In this course we consider some of the factors that have contributed to religious change in South Asia, including British colonialism, sedentarization and globalization, and new discourses of democracy and equality. We consider how new religious organizations were part and parcel with movements for social equality and political recognition; examine the intellectual contributions of major thinkers like Swami Vivekananda, Sayyid Ahmad Khan, and Mohandas Gandhi; and explore how Hindu, Islamic, and other South Asian traditions were recast in the molds of natural science, social science, and world religion.

**L97 GS 3672 Medicine, Healing and Experimentation in the Contours of Black History**

Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, this course examines the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the

focus will be extended towards the underpinnings of race and gender in the medical treatment allocated across time and space--the U.S., Caribbean, and Latin America--to give further insight into the roots of contemporary practice of medicine.

---

### L97 GS 3740 Of Dishes, Taste, and Class: History of Food in the Middle East

This course will cover the history of food and drink in the Middle East to help us understand our complex relation with food and look at our lives from perspectives we intuitively feel or by implication know, but rarely critically and explicitly reflect on. Food plays a fundamental role in how humans organize themselves in societies, differentiate socially, culturally, and economically, establish values and norms for religious, cultural, and communal practices, and define identities of race, gender, and class. This course does not intend to spoil, so to speak, this undeniably one of the most pleasurable human needs and activities, but rather to make you aware of the social meaning of food and reflect on how food shapes who we are as individuals and societies. We will study the history of food and drink in the Middle East across the centuries until the present time, but be selective in choosing themes, geographic regions, and historical periods to focus on. Please consult the instructor if you have not taken any course in the humanities. Enrollment priority given to seniors and juniors.

**L97 GS 3750 Topics in Russian Literature and Culture (WI)**

The words "Russian Literature" might conjure up long, sprawling, "loose and baggy monsters." However, the short story is arguably the most significant genre in the Russian literary tradition. In this course we do close readings of some of the greatest Russian short stories, mostly from the 19th and 20th centuries. Authors might include Pushkin, Lermontov, Gogol, Dostoevsky, Tolstoy, Turgenev, Chekhov, Gippius, Teffi, Tsvetaeva, Platonov, Bunin, Nabokov, and others. Some of the questions we explore: Is a short story (rasskaz) just a shorter piece of fiction or does it aim to do something very different from a novel? How did the Russians develop—and maybe change—the genre? In what ways are these stories connected to the place and time in which they were written? We will read one or two short stories a week. This is a Writing Intensive course. No knowledge of Russian is required. All readings are in English translation.

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM BU: IS EN: H

---

**L97 GS 3762 Cinema and Society**

Did you know that the inventor of narrative fiction film, and perhaps the only female filmmaker from 1896-1906, was a French woman? This course introduces students to French and Francophone cinema through the lens of the feminine. In this "her" story of French-language film, we will explore works by female directors as well as representations of women and girls on the silver screen from cinema's silent origins to the empowered voices of the #MeToo era. In tandem, we will engage with key ideas from feminist critics like Simone de Beauvoir and Françoise d'Eaubonne. Class discussions will take an intersectional approach, addressing feminism's connections with the following topics: girlhood and adolescence; race and ethnicity; post-colonial cultures; gendered spaces/places and the environment; LGBTQ+ identities; motherhood and domesticity. Our corpus includes classics from the French tradition as well as understudied films, running the spectrum from drama to documentary, to coming-of-age narratives and cult favorites, including works by Chantal Akerman, Yamina Benguigui, Alice Guy, Céline Sciamma, and Agnès Varda, among others. Prereq: In-Perspective or Fr 308.

**L97 GS 3764 Reading Across the Disciplines: Introduction to the Theoretical Humanities**

What does theory look like in an age like ours so sharply marked by interdisciplinarity and in which most humanities scholarship crosses disciplines—for instance, combining literature or history with philosophy or critical race studies? In this way all (or almost all) humanities scholars are comparatists in practice if not always in name. The course is designed to introduce this complex and exciting state of affairs to CompLit and English majors, yet any students in a humanities program, or with an interest in the humanities, will fit right in. Our main text is *Futures of Comparative Literature*, ed. Heise (2017), which contains short essays on topics like Queer Reading; Human Rights; Fundamentalism; Untranslatability; Big Data; Environmental Humanities. We will supplement this material with relevant short texts from a variety of fields, including some that cross over into the social sciences.

---

**L97 GS 3770 History of Slavery in the Middle East**

This course examines slavery and its abolition in the Middle East and North Africa from 600 C.E. to the 20th Century. It addresses slavery as a discourse and a question of political economy. We begin with an overview of slavery in late antiquity to contextualize the evolution of this practice after the rise of Islam in the region. We then examine how it was practiced, imagined, and studied under major empires, such as the Umayyads, the Abbasids, the Fatimids, the Mamluks, the Ottomans, and the Safavids. In addition to examining the Qur'anic discourse and early Islamic practices of slavery, to monitor change over time we address various forms of household, field, and military slavery as well as the remarkable phenomenon of "slave dynasties" following a chronological order. We discuss, through primary sources, theoretical, religious, and moral debates and positions on slavery, including religious scriptures, prophetic traditions, religious law, and a plethora of narratives from a range of genres. We highlight a distinct theme each week to focus on until we conclude our discussion with the abolition of slavery in the 19th and 20th centuries. Topics of discussion include various forms of male and female slavery, Qur'anic and prophetic discourse on slavery, legal and moral views on slavery, slavery as represented in religious literature, political, military, and economic structures of slavery, issues of race and gender as well as slave writings to reflect on the experiences of slavery from within. The goal is to enable students to understand the histories of slavery in the Middle East and eventually compare it to that of other regions and cultures, such as European and Atlantic slavery. No second language required.

**L97 GS 3775 Ancient Eurasia and the New Silk Roads**

This course will explore the rise of civilization in the broad region of Eurasia, spanning from the eastern edges of Europe to the western edges of China. The focus of the course is the unique trajectory of civilization that is made evident in the region of Central Eurasia from roughly 6000 BC to the historical era (ca. AD 250). In addition to this ancient focus, the course aims to relate many of the most historically durable characteristics of the region to contemporary developments of the past two or three centuries. Fundamentally, this course asks us to reconceptualize the notion of "civilization" from the perspective of societies whose dominant forms of organization defied typical classifications such as "states" or "empires" and, instead, shaped a wholly different social order over the past 5000 years or more. This class provides a well-rounded experience of the geography, social organization, and social interconnections of one of the most essential and pivotal regions in world history and contemporary political discourse.

**L97 GS 3784 The Modernist Project: Art in Europe and the United States, 1905-1980**

This course surveys major tendencies in painting and sculpture, from Fauvism in France and Expressionism in Germany to the beginnings of Postmodernism in photo-based work in the United States. About two thirds of the course will treat European art, and about one third will treat American art. Photography, architecture, and work in other forms will be considered selectively when pertinent to the individual class topics. Within the lecture topics, emphasis is on avant-garde innovation; the tension in modernist art between idealism and critique; reaction by artists to current events; the relationship between art and linguistics, philosophy, literature, economics, and science; the role of geopolitics in art production; the intersections of art and society; the role of mass culture; issues of race and gender in the production and reception of art; and the challenge to the concept of authorship and creativity posed by Postmodernism at the end of this period. Prerequisite: One course in Art History at the 100 or 200 level.

**L97 GS 379 Nabokov in Europe and America**

This course begins with our close reading of Vladimir Nabokov's autobiography *Invitation of a Memory*. We then study some of the author's first works originally written in Russian and published in émigré presses. In the second half of the course, we move to a selection of his short stories and novels originally written in English, including *Lolita*, *Invitation of a Memory*, and *Pale Fire*. Discussion topics will include memory, multilingualism, migration, authorial identity, narrative personae, and literature as enchantment. Requirements include three short papers, weekly Canvas and in-class participation, and an oral presentation. All assignments are in English. Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

---

**L97 GS 3800 Topics in Hispanic Cultures**

This course surveys cultures in specific contexts (Latin America and Spain) and in different historical periods, from the Middle Ages to the present. The course provides students with critical and methodological tools in order to carry out an articulate and informed cultural analysis. Prereq: Span 308E or concurrent enrollment in 303. In Spanish. Topics vary from semester to semester. See section description for current offering.

**L97 GS 381 Mexican Visual Culture**

This course will explore the ways in which different aspects of visual culture were used to construct national, regional, political, social and cultural identities in Mexico. The omnipresence of the visual in the everyday life of Mexicans -including state-sponsored muralism, cinema, photography, graphic press, wide-circulating comic books and nationalist architecture- allows for the study of different ways in which citizens become embedded both in official national projects and in projects of political dissidence. The class will thus use the Mexico in the 20th and 21st centuries to introduce students to the study of the visual as a social practice, through theoretical discussions that will run parallel to the study of different visual manifestations. The course will discuss the changing social and political role of art, the influence that Mexican visual culture exerts in other parts of the world and the way in which visual culture allows Mexicans to think about their identity.

**L97 GS 3810 Between Sand and Sea: History, Environment, and Politics in the Arabian Peninsula**

Although it is today primarily associated with oil, the Arabian peninsula was for most of its history defined by water: its surrounding seas, its monsoon-driven winds, and its lack of water in its vast and forbidding interior deserts. As home to the major holy cities of Islam and a key source of global oil, the region has played an important role in the Western European and North American imagination. Despite being relatively sparsely populated, the peninsula hosts millions of believers each year on the annual Muslim pilgrimage, and it has been the site of major wars and military occupations by European, American, and other Middle Eastern countries for much of the 20th and 21st centuries. It has been an outpost of the Ottoman Empire, a center of British colonialism and (at Aden) an axis of its global empire, the location of Egypt's "Vietnam" (its long war in Yemen in the 1960s), the Gulf Wars I and II, and the recent wars in Yemen, to name just a few of the major conflicts. Often depicted as unchanging until caught up by the influx of massive oil wealth, this region is frequently characterized as a place of contradictions: home to some of the world's largest skyscrapers and also the most inhospitable and largest sand desert in the world, known as "the Empty Quarter"; the location of crucial American allies and the home of al-Qaeda founder Usama Bin Laden. In this course, we will examine the development of the peninsula historically to understand these contradictory images. We will investigate changes in the following arenas: environment and society; colonial occupation; newly independent states; the demise and development of key economic sectors (pearling; shipping; agriculture; oil; finance; piracy); political regimes; resources such as water, oil, and date palms; the growth of oil extraction infrastructure and its effects on the political regimes and societies in the region; the emergence of new Gulf cities; Islamic law; women's rights; human rights debates; and religious and ethnic minorities.

**L97 GS 3822 From McDonald's to K-pop: New Movements in East Asia**

This course introduces contemporary East Asian cultures and societies from transregional and transnational perspectives through the lens of consumer and popular cultures. We employ McDonald's as the first case study to look into East Asian responses to Western cultural products and ideas. For K-pop, we examine its emergence and transregional receptions and impact across different regions in East Asia as well as in the US. Beginning with these two subjects, our investigation extends to other examples of transregional cultural phenomena such as J-pop, Hello Kitty, e-commerce, and western holidays in East Asia. While focusing on transnational cultural movements originating in or being adapted to the East Asian context, our discussions also reflect on key topics in the study of East Asian cultures such as "face," filial piety, and social networks. Attendance on the first day of class is mandatory to reserve class enrollment.

**L97 GS 3824 Film and Revolution in Latin America**

This class is a Writing Intensive course focused on the study of the way in which four landmark Latin American revolutions (The Independence Wars, The Mexican Revolution, The Cuban Revolution and The Bolivarian Revolution) are represented in cinema. Each one of these revolutions will constitute a unit of study, and students will be expected to work with historical texts, films and works of film theory and criticism for each one of them. The course will engage in subjects such as the difference between fiction and nonfiction films when representing history; the politics that underlie specific representations; the way in

which cinema questions and revises ideas developed by historians; and the uses of film in creating popular views of history in Latin America. Students will develop a research project comparing two revolutionary processes over the semester. Prereq. L45 165D (Latin America: Nation, Ethnicity and Social Conflict) for LAS majors. Otherwise none. Same as L45 LatAm 3824  
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: IS EN: H

**L97 GS 3826 Contemporary Latin American Cinema: Market Economy, Social Injustice, New Technologies**

This class studies the relationship between cinema and society in Latin America between 1988 and the present. Latin American cinema in this period has gone to a period of deep crisis to the consolidation of industries and production with significant global recognition and impact. In this, cinema has strong correlations with neoliberalism, the political doctrine tied to free-market reform, democratization and privatization, among other ideas. The class will be based on the study and discussion of key films of the period to develop two themes. First, we will study the way in which cinema has become a cultural practice central to the discussion of the effects of neoliberalism in the region, as well as the opposition to neoliberalism. Topics in this regard will include: the social impact of free market reforms, growing economic and social inequality, the emergence of working class, Black and indigenous communities, the rise and fall of the New Left, the creation of new elites and other related themes. Second, we will study the way in which films are made and distributed and the changes on film production over the past decades. Topics will include the privatization of production and exhibition, the role of home video and streaming, the importance of film festivals and the move from national to translational scenes of production. Prereq: L45 165D or L53 220 or other coursework in Latin American Studies, or Film and Media Studies, desirable but not required. Students without this background are encouraged to contact the instructor.

**L97 GS 3830 Global Tibet: Culture and Society on the Roof of the World**

Far from the imagined "land of snows" closed off to the rest of the world, Tibet always had dynamic interactions with Inner Asia, South Asia, and China. With an expansive view on Tibetan history, this course traces these interactions from the sixteenth to the twenty-first century through a variety of topics, ranging from the power of the Dalai Lamas to the spread of Tibetan Buddhism across the world, to the effects of global warming on the "third pole." Students will be exposed to religious texts, memoirs, and novels to trace the lives of women saints and Tibetan communists as well as exiled nationalists, and watch documentaries and films to interrogate Tibet's place in China and the Tibetan diaspora's experience in India and the United States. Using Tibet as a lens, students will learn to question larger problems of religion versus secularism, cultural preservation versus globalization, and national identity versus colonization, subjects that continue to matter to Tibet and the world today.

---

**L97 GS 3838 Modern Art in Fin-de-Siecle Europe, 1880-1907**

This course examines artistic production at the turn of the century in France, Belgium, England, and Scandinavia. Beginning with the reevaluation of impressionism and naturalism in France, we examine Neo-Impressionism (Seurat and Signac) and Symbolism (Moreau, Van Gogh, Gauguin, the Nabis, Rodin, and Munch), as well as later careers of Impressionists (Cassatt, Monet, Degas, and Renoir). We will consider cross-national currents of Symbolism in Belgium and Scandinavia;

the Aesthetic Movement in Britain; the rise of expressionist painting in French art (particularly with the Fauvism of Matisse and Derain), and the juncture of modernist primitivism and abstraction in early Cubism (Picasso). Prerequisite: L01 113 or permission of instructor.  
Same as L01 Art-Arch 3838

**L97 GS 384 Migration and Modernity in Russia and the (Former) Soviet Union**

This course introduces students to a broad history of 19th- and 20th-century Russia and the Soviet Union alongside problems of migration. In this course, students will be introduced to the historical, social, and political dimensions of migration within, to, and from the Russian Empire, the Soviet Union, and its successor states. We will look at the intersection of the movement of people with long-term economic, social and political transformations, but we will also pay attention to crucial events and phenomena of Soviet history that set large-scale migrations in motion. Course materials will, for instance, address mass movements related to modernization and internal colonization, analyze the role of revolutionary change and warfare for forced displacement, and study the implications of geopolitical changes in the aftermath of the breakdown of the USSR for human rights discourses. Alongside this historically grounded overview, the course explores concepts of citizenship, diaspora, nationality policy, gender-specific experiences of migration, and the ethics and political economy of migration politics, thereby highlighting how current trends in Russian society are indicative of broader discourses on difference and social transformation.

---

**L97 GS 386 Empire in East Asia: Theory and History (WI)**

An introduction to how historians and anthropologists incorporate theoretical insights into their work, this course first "reverse engineers" the main arguments in several insightful books and articles on empire in Asia, arguments which are informed by a range of theorists. Retaining our theoretical knowledge, we then focus on the more empirical aspects of the Japanese empire in Asia, including settler colonialism, the colonial economy, representations of colonialism and the long-term ramifications of empire. We conclude with a general assessment of the history of empire. In these ways, this course seeks to equip students with a knowledge of empire in East Asia in the late 19th and 20th centuries while simultaneously investigating the nature of that knowledge.

---

**L97 GS 3866 Interrogating "Crime and Punishment"**

Whether read as psychological thriller, spiritual journey, or social polemic, Dostoevsky's 1866 novel CRIME AND PUNISHMENT has inspired diverse artistic responses around the world. From the nineteenth century to the present day, writers and filmmakers have revisited (and often subverted) questions that Dostoevsky's novel poses: What internal and external forces cause someone to "step over" into crime? What are the implications of a confession? To what extent can the legal system provide a just punishment? Are forgiveness and redemption possible, or even relevant? What role does grace-- or luck--play in the entire process? This course begins with our close reading of Dostoevsky's novel and then moves on to short stories, novels, literary essays, and movies that engage in dialogue with the Russian predecessor. A central concern of our intertextual approach is to explore the interplay between specific socio-historical contexts and universal questions. All readings are in English. No prerequisites.

**L97 GS 3875 Rejecting Reason: Dada and Surrealism in Europe and the United States**

In this multimedia interdisciplinary course, we will consider the history, theory, and practice of Dada and Surrealism, from its Symbolist and Expressionist roots at the end of the 19th century and the beginning of the 20th century through its late expressions in the beat culture and pop art of the 1950s and 1960s. Dada's emergence in Zürich and New York in the midst of World War I set the tone for its stress on irrationality as an oppositional strategy. Surrealist research into the domain of the unconscious continued this extreme challenge to dominant culture but in a revolutionary spirit that proposed new possibilities for personal and collective liberation. The international character of the movements -- with substantial cross-transmission between Europe and the United States -- will be emphasized. Prerequisites: L01 113, Intro to Western Art; L01 215, Intro to Modern Art; or permission of instructor.

---

**L97 GS 389 Furies and Die-Hards: Women in Rebellion and War**

Furies and Die-Hards: Women in Rebellion and War juxtaposes contemporary social science perspectives on women and war with the history and testimonies of Irish women during the Irish revolutionary period (1898-1922), the Irish Civil War (1922-1923), and the Free State. Under English rule from the 12th-century Norman invasions to the establishment of the Irish Free State and the partition of Northern Ireland in 1922, Ireland presents a compelling historical laboratory to deliberate on the relationship between gender and political conflict. Intentionally transdisciplinary, the course draws from across disciplinary discourses and highlights perspectives across race, gender, class, ethnicity, religion, and sexuality. Topics include political organizing, nationalism, rebellion, radicalization, militarism, terrorism, pacifism, and peacebuilding. Rooted in Cynthia Enloe's enduring question of "Where are the women?" and drawing on sociologist Louise Ryan's landmark essay by the same name, we inquire how and why Irish nationalist women, who were integral to building the revolutionary movement, became "Furies" and "Die-hards" in the eyes of their compatriots when the Free State was established (Bishop Doorley, 1925; President Cosgrave, 1923). Taking advantage of the plethora of archival resources now available through the Irish Decade of Centenaries program, the course incorporates the voices of Irish women through their diaries, military records, letters, interviews, speeches, newspapers, and memoirs.

**L97 GS 3891 East Asia Since 1945: From Empire to Cold War**

This course examines the historical forces behind the transformation of East Asia from war-torn territory under Japanese military and colonial control into distinct nations ordered by Cold War politics. We begin with the 1945 dismantling of the Japanese empire and continue with the emergence of the People's Republic of China, the Republic of China (Taiwan), the two Koreas, and Vietnam, all of which resulted from major conflicts in "post-war" Asia. We will conclude with a look at East Asia in the post-Cold War era.

**L97 GS 3892 Modern Sculpture: Canova to Koons**

This course will survey sculpture in Europe and the United States from about 1800 to the present, with an emphasis on the period from 1890 to 1980. A rapid traverse of Neoclassicism, Realism, and the rage for statuary during the later 19th century will take us to the work of Rodin and to a more systematic exploration of developments in the sculpture of the 20th century. Particular emphasis will also be placed upon the work of Brancusi, Picasso, Matisse, Duchamp, Giacometti, Oppenheim, David Smith, Serra, Morris, Judd, Hesse, and Bourgeois. An important theme running through the course as a whole -- from an age of nationalism and manufacturing to our own time of networks and information -- is the changing definition of sculpture itself within its social and political context. We will also explore various new artistic practices (e.g., video, performance, installations, body art) and interrogate their relationship to sculptural tradition and innovation.

Prerequisite: L01 113, L01 215, or permission of instructor.

**L97 GS 390 Topics in Migration and Identity**

The course examines migration movements that are related to the Nazi genocide in Europe. Grounded in a study of the Nazi project to reshape the European geopolitical map, students explore how the mass movement of people is impacted by geopolitics, political violence, and economical considerations. Class materials address the relationship between identity formation and social exclusion, thus opening up a critical investigation of concepts of citizenship, human rights, and their institutional frameworks (states, international organizations etc.) more generally. Students will work with a variety of sources, including primary sources, scholarly analyses, podcasts, literary works, and film to study migrations related to the prehistory, policies, and aftermath of the Nazi regime. The class provides insights into issues of expulsion, refuge, forced migration, settlement projects, ethnic cleansing and others, but also demonstrates the global impact and long-term repercussions of political and genocidal violence. Looking at the Nazi regime through the lens of migration shows that the Nazi genocide is embedded in a history of racism, colonialization, and mass violence.

**L97 GS 3941 Worldwide Translation: Language, Culture, Technology**

This course considers the crucial role played by translation across the world today: from new technologies and digital media, to the global demands of professionals working in fields as diverse as literature, law, business, anthropology, and health care. We will begin our exploration of the concept of translation as a key mechanism of transmission between different languages by looking at works of literature, and film. Students will then examine how different cultures have historically required translation in their encounter with each other, studying how translation constitutes a necessary transcultural bridge both from a colonial and postcolonial point of view in different historical moments and parts of the world. The course also analyzes from practical and real-world perspectives whether concepts such as war, human rights, democracy or various illnesses have the same meaning in different societies by considering the diverse frames of reference used by linguists, lawyers, anthropologists, and medical doctors across the world. Finally, we will focus on translation from a technological perspective by examining various modes of transfer of information required for the functioning of digital tools such as Google Translate, Twitter, Duolingo, or various iPhone applications. Throughout the semester we will also examine a range of creative artworks, and various forms of digital technology and computing (AI, machine translation) related to the theory and practice of translation. Readings will include works by Jorge Luis Borges, Walter Benjamin, Gayatri Spivak, Kwame Anthony Appiah, Susan Basnett, Lawrence Venuti, Emily Apter, Gideon Lewis-Krauss, and Karen Emmerich among others. Prerequisite: None. Same as L16 Comp Lit 394

**L97 GS 400 Independent Study**

Prerequisite: junior or senior standing. CONTACT MRS. TONI LOOMIS FOR APPROPRIATE SECTION NUMBER AND CORRESPONDING FACULTY. The student works directly with a Global Studies faculty member (mentor) to establish a research project and expectations for the outcome of the semester (readings; paper; etc.). Approvals of the mentor and the student's major advisor are required before enrolling in the course. Only one independent study can count as a 400 level elective towards the Global Studies major.

Credit variable, maximum 3 units.

---

**L97 GS 4001 Urban Education in Multiracial Societies**

This course offers students an analysis of the historical development and contemporary contexts of urban education in English-speaking, multiracial societies. It examines legal decisions, relevant policy decisions, and salient economic determinants that inform urban systems of education in Western societies including, but not limited to, the United States, Canada, Great Britain, and South Africa. The course draws on quantitative, qualitative, and comparative data as an empirical foundation to provide a basis for a cross-cultural understanding of the formalized and uniform system of public schooling characteristic of education in urban settings. Given the social and material exigencies that shape urban school systems in contemporary societies, special attention is given in this course to the roles of migration, immigration urbanization, criminal justice, industrialism, de-industrialism, and globalization in shaping educational outcomes for diverse students in the aforementioned settings. Prerequisite: Junior standing or permission of instructor. Same as L18 URST 400

Credit 3 units. A&S IQ: SSC, WI EN: S

**L97 GS 4007 Global Studies Research Methods Proseminar and Assistantship**

Global Studies research explores thorny historical and contemporary questions around the world, such as the climate crisis, public health challenges, uneven development, the strife for racial justice, precarious labor, curtailed rights and liberties, and technological revolutions. In this course, students attend a weekly Proseminar and complete a Research Assistantship (around 5 hours per week). The Proseminar orients students to the practice of research, including the fundamentals of research design, methodologies, and methods. In addition, students are matched with a Faculty Mentor for a Research Assistantship. Ideally, students should apply for and enroll in this course in their sophomore or junior year. Apply at: <https://globalstudies.wustl.edu/research-team-application>.

**L97 GS 4034 Culture, Illness and Healing in Asia**

This course examines the place of health, illness, and healing in Asian societies. We will explore how people experience, narrate, and respond to illness and other forms of suffering - including political violence, extreme poverty, and health inequalities. In lectures and discussions we will discuss major changes that medicine and public health are undergoing and how those changes affect the training of practitioners, health care policy, clinical practice and ethics. The course will familiarize students with key concepts and approaches in medical anthropology by considering case studies from a number of social settings including China, India, Indonesia, Japan, Korea, Taiwan, Tibet, Thailand, Vietnam and Asian immigrants in the United States. We will also investigate the sociocultural dimensions of illness and the medicalization of social problems in Asia, examining how gender, ethnicity, socioeconomic status, disability and other forms of social difference affect medical knowledge and disease outcomes. This course

is intended for anthropology majors, students considering careers in medicine and public health, and others interested in learning how anthropology can help us understand human suffering and formulate more effective interventions.

**L97 GS 4036 Children of Immigrants: Identity and Acculturation**

This seminar takes an interdisciplinary approach to children of immigrants as an analytical subject. The course texts are in sociology, anthropology, and cultural studies, and a significant number of our case studies focus on 1.5- and second-generation Asian Americans and Latinx. Identity and identity politics are main topics; in addition, the course will critically examine theories on acculturation and assimilation. Our discussions cover a wide range of topics from culture, ethnicity, and race, to bilingualism, education, family, school, ethnic community, and youth culture. Students are required to conduct an individual research project among a selected group of children of immigrants. Attendance on the first day of class is mandatory to reserve class enrollment.

**L97 GS 4041 Islam and Politics**

Blending history and ethnography, this course covers politics in the Islamic world in historical and contemporary times. Topics include history of Islam, uniformity and diversity in belief and practice (global patterns, local realities), revolution and social change, women and veiling, and the international dimensions of resurgent Islam. Geographical focus extends from Morocco to Indonesia; discussion of other Muslim communities is included (Bosnia, Chechnya, sub-Saharan Africa, U.S.)

**L97 GS 4050 Diaspora in Jewish and Islamic Experience**

Tensions between center and periphery; migration and rest; power and powerlessness; and exile, home, and return are easily found in the historical record of both Jews and Muslims. For Muslims, it can be said that it was the very success of Islam as a world culture and the establishment of Muslim societies in all corners of the globe that lay at the root of this unease. However, the disruptions of the post-colonial era, the emergence of minority Muslim communities in Europe and North America, and the recent tragic flow of refugees following the Arab Spring have created a heightened sense of displacement and yearning for many. Of course, the very term "diaspora" -- from the ancient Greek, meaning "dispersion" or "scattering" -- has most often been used to describe the Jewish condition in the world. The themes of exile and return and of catastrophe and redemption are already woven into the Hebrew Bible, and they continued to be central motifs in Rabbinic Judaism in late antiquity and the Middle Ages. This occurred despite the fact that more Jews lived outside the borders of Judea than within the country many years before the destruction of Jewish sovereignty at the hands of the Romans. In the 20th century, European imperialism, nationalisms of various types, revolution, and war -- including the Israeli-Palestinian conflict -- have done much to underscore the continuing dilemmas of diaspora and home in

both Jewish and Islamic identity. The goal of this course is to offer a comparative historical perspective on the themes of migration and displacement, center and periphery, home and residence, and exile and return and to give students the opportunity to examine in depth some aspect of the experience of diaspora. Note: This course fulfills the capstone requirement for Jewish, Islamic, and Middle Eastern Studies. The course also counts as an Advanced Seminar for history. (Students wishing to receive history Advanced Seminar credit should also enroll in L22 491R section 19 for 1 unit.) The course is open to advanced undergraduate and graduate students.

---

### L97 GS 4070 Global Justice

This course examines contemporary debates and controversies regarding global justice. Seminar discussions will be arranged around significant issues in the current literature. For example: What (if anything) do we owe to the distantly needy? Do we have special obligations to our compatriots? Do political borders have normative significance? And so on. This course will be of interest not only to political theorists, but also students in other fields interested in social justice or international relations generally.

### L97 GS 4081 Disease, Madness, and Death Italian Style

Italian literary history teems with representations of illness, insanity, and death. From the ghastly 1348 plague that frames Boccaccio's Decameron to the midday madness of errant Renaissance knights, from 16th-century tales of poisoning and 19th-century Pirandellian madmen to the contemporary scourge of mafia killings, disease, madness and death are dominant facts of reality, points of view, symbols, and cultural characteristics of Italian poetry and prose. This course undertakes a pathology of these tropes in Italian literary history and seeks to understand their meaning for the changing Italian cultural identity across time and the Italian peninsula. We will read primary literary texts and view excerpts from films alongside articles focused on the cultural history of medicine, religion, and criminal justice. Taught in English. No Final.

### L97 GS 4092 Beyond Geography: The Meaning of Place in the Near East

This course considers the importance of place in the Middle East with particular reference to Jewish and Islamic traditions. Topics to cover include the creation of holy sites, the concept of sacred space, the practice of pilgrimages, and the tropes of exile and return. Texts will range from analytical essays to novels, memoirs, and films by authors such as Edward Said, Naguib Mahfouz, Taher Ben Jelloun, Elif Shafak, A. B. Yehoshua, Shulamit Hareven, and Hanan Al-Shaykh. Requirements include participation, short assignments, and a seminar paper. This course fulfills the capstone requirement for students majoring in Jewish, Islamic and Near Eastern Languages and Cultures, but is open to advanced undergraduates and graduate students. Prerequisites: coursework in JINES and senior standing or permission of instructor.

#### **L97 GS 4107 Latin America and the Rise of the Global South**

The rise of the global south - and the reordering of global geopolitics, economics and cultural imaginaries - is characterized by progressive change and intense conflict. Economic growth coincides with the impacts of global warming, the assault on natural resources, the rise of new consumers and the entrenchment of deep inequalities. We also see the emergence of cultural and political formations that range from the horrific to the inspiring. Latin America is a central node of the new global south. Here history takes unpredictable turns in the face of declining U.S. hegemony, the economic growth of Brazil, legacies of militarism and political violence, a feverish attack on nature, resurgent economic nationalism, and defiant "anti-globalization" movements. Through close reading of contemporary ethnographies of Latin America we explore emergent cultural and political-economic processes in the region, we consider south-south articulations (theoretical, cultural, political-economic) between Latin America, China, Africa, and India, and we reflect on the changing role, meaning, and relationships of the United States in the region.

#### **L97 GS 4113 Linguistics and Language Learning**

This course, taught in English, is a foundation for students who will work with linguistically and culturally diverse people in the USA and around the world, whether this work is in the courtroom, hospital, classroom, office and more. The class will help prepare students for the diverse range of twenty-first century occupations that have language and linguistics at their center, including machine learning and translation studies. The class utilizes a survey format and covers both internal and external factors related to language acquisition and language use, such as language and the brain, language aptitude, age, gender, memory, prior knowledge, etc. Theoretical and research dimensions of both linguistics and foreign / second language learning are treated. Corresponding implications of the readings focus on action- on making decisions for language policies and debates around the world that are informed by linguistic and language knowledge. The course is required for the minor in applied linguistics, the PhD in Applied Linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors such as Global Studies and Educational Studies. Prereq: Ling 170 is recommended but not required.

#### **L97 GS 4134 The AIDS Epidemic: Inequalities, Ethnography, and Ethics**

In the year 2000, HIV became the world's leading infectious cause of adult death. In the next 10 years, AIDS killed more people than all wars of the 20th century combined. As the global epidemic rages on, our greatest enemy in combating HIV/AIDS is not knowledge or resources but rather global inequalities and the conceptual frameworks with which we understand health, human interaction, and sexuality. This course emphasizes the ethnographic approach for the cultural analysis of responses to HIV/AIDS. Students will explore the relationships among local communities, wider historical and economic processes, and theoretical approaches to disease, the body, ethnicity/race, gender, sexuality, risk, addiction, power, and culture. Other topics covered include the cultural construction of AIDS and risk, government responses to HIV/AIDS, origin and transmission debates, ethics and responsibilities, drug testing and marketing, the making of the AIDS industry and "risk" categories, prevention and education strategies, interactions between biomedicine and alternative healing systems, and medical advances and hopes.

---

#### **L97 GS 4141 International Relations**

Globalization, the accelerating rate of interaction between people of different countries, creates a qualitative shift in the relationship between nation-states and national economies. Conflict and war is one form of international interaction. Movement of capital, goods, services, production, information, disease, environmental degradation, and people across national boundaries are other forms of international interactions. This course introduces major approaches, questions, and controversies in the study of international relations. We will explore seminal literature at the core of modern international relations theory. We will examine the building blocks of world politics, the sources of international conflict and cooperation, and the globalization of material and social relations.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S

---

#### **L97 GS 4150 The 19th Century French Novel: from Realism to Naturalism to Huysmans**

In this seminar we will read some of the great realist novels of the nineteenth century, by the four masters of the genre: Balzac, Stendhal, Flaubert, Zola. We will also examine Huysmans's *A REBOURS*, which was written in reaction to the excesses of Realism. We will determine what characterizes the realist novel and how it has evolved from Balzac to Zola. We will consider its theoretical orientation, but we will also focus on the major themes it addresses: the organization of French society throughout the nineteenth century, Paris vs. the province, love, money, ambition, dreams, material success, decadence, etc. Prereq: Fr 325 and 326 or one of these courses and the equivalent WU transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. 3 units.  
Same as L34 French 415  
Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

---

#### **L97 GS 4154 Decolonization to Globalization: How to End an Empire**

The conventional markers of the twentieth century - imperialism, decolonization and globalization - are acutely compromised if we mobilize gender and sexuality as modes of analysis. In this course we bring questions of sexual difference and gender to the wider stories of colonialism, nationalism, decolonization, neocolonialism, US imperialism, neoliberalism, globalization, WoT, and majoritarianism. We "engender" the contradiction between enormous turning points and the lived experiences of billions. We probe how the non-profit industrial

complex, development aid, and the normative family have shaped and given shape to the very idea of gender. Finally, we examine the capacious power of gender to interrupt the power of the state and to reorganize extractive relations of race and caste.

Same as L77 WGSS 4154

---

**L97 GS 4180 Sexuality and Gender in East Asian Religions**

In this course we will explore the role of women in the religious traditions of China, Japan and Korea, with a focus on Buddhism, Daoism, Shamanism, Shinto and the so-called "New Religions." We will begin by considering the images of women (whether mythical or historical) in traditional religious scriptures and historical or literary texts. We will then focus on what we know of the actual experience and practice of various types of religious women - nuns and abbesses, shamans and mediums, hermits and recluses, and ordinary laywomen - both historically and in more recent times. Class materials will include literary and religious texts, historical and ethnological studies, biographies and memoirs, and occasional videos and films. Prerequisites: This class will be conducted as a seminar, with minimal lectures, substantial reading and writing, and lots of class discussion. For this reason, students who are not either upper-level undergraduates or graduate students, or who have little or no background in East Asian religion or culture, will need to obtain the instructor's permission before enrolling.

---

**L97 GS 4191 The French Islands: From Code Noir to Conde**

The French have been dreaming about the tropics ever since transatlantic trade became possible in the sixteenth century, and literature in French has reflected these dreams ever since. Closer to our own period, writers from the French Caribbean have written themselves into the French canon, winning prestigious literary prizes. This course will link these two phenomena by studying literature from and about the tropics from the 18th century to the present. In our readings, we will attempt to see the ways in which the literature from and about France's island possessions has contributed to the forming of cultural and political relations between France and the islands, but also among the islands and within the Americas. Almost all texts available in English for students not majoring in French; main seminar session taught in English with weekly undergraduate preceptorial in French. Prereq: Fr 325 and Fr 326. One-hour preceptorial for required for undergraduates. Same as L34 French 4191

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

**L97 GS 4192 Tragedy and Farce in African Francophone Literature**

In 1960, most of the French colonies in Africa gained independence in a largely peaceful transfer of power. Since then, this development has been viewed alternatively as the triumph of self-determination, and as a hollow act undermined by neo-colonial French ministries, multinational companies, and corrupt governments. Media today commonly adopt a highly pessimistic tone when speaking of these phenomena, but literature from West Africa provides alternative ways of looking at the region, which today includes over 140 million French speakers. Reading authors such as Kourouma, Kane, Tansi, Tchicaya, and Lopes, we will consider the ways that literature enters into dialogue with political discourses represented both as tragedy and as farce. The main seminar (section 01) is taught in English; undergraduates also register for a weekly discussion (section A) conducted in French. Prereq: for undergraduates, Fr 325, 326, Thinking-It-Through, or In-Depth; for graduates not in French, reading knowledge of the language. Same as L34 French 4192

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

---

**L97 GS 4200 Nature, Technology, and Medicine in Korea**

This course examines the cultural history of modern Korea with a focus on science, technology, and medicine. From about 1500 to the present, a number of hugely consequential things happened in Korea that have been called revolutionary-or what historians dub "early modern" and "modern." Confucian kings planned large-scale projects that changed nature, rustic scholars made inventories of flora and fauna, colonial Koreans became biologists, nurses, and "Edisons," and in North and South Korea, new professionals created distinctive-and in some cases, globally-competitive-regimes of knowing, making, and healing. Students will interrogate these developments as an opportunity to revisit the history of modernity, which has been told predominantly from the perspective of the West. What does it mean to be "modern" in Korea? How did that modernity intersect with Korean science, technology, and medicine? Students will find and articulate their own answers by writing the final research paper. Recommended to have taken Korean Civilization or equivalent course that provides basic working knowledge of Korean history. Course also counts as an EALC capstone course. Prerequisite: junior level or above or permission of instructor.

Same as L81 EALC 420

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

---

**L97 GS 4201 International Relations of Latin America**

This course examines Latin American foreign relations in the world from the 1820s to the present with a primary emphasis on the period since 1945. Focusing on inter-state and transnational relations, it seeks to historically contextualize and analyze long term patterns and trends between Latin American states and between Latin America and the United States, Europe, and the global South. Given Latin America's shared experience with imperialism and more recently with neo-imperialism, special attention will be paid to the ways Latin America has sought to manage and/or resist foreign domination, especially U.S. hegemonic pretensions. To this end it will analyze patterns of inter-American conflict and cooperation. When, why, and under what conditions Latin America articulated an independent foreign policy, forged anti-imperialist blocs, embraced U.S. sponsored diplomatic efforts and military alliances, and pursued Latin American unity and solidarity will be closely examined. To better understand the continuities, discontinuities, contradictions, and complexities of Latin American foreign policy, this course will also assess the influence of changing regional and national political cultures from both a theoretical and a historical perspective. In doing so, it explores how elite culture, the balance of domestic social forces, ideological and economic development, and shared cultural identities and meanings informed national political cultures and how these in turn shaped Latin American foreign policies.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

---

**L97 GS 4204 International Relations of Latin America (WI)**

How should we understand Latin American international relations since the early republican era? Standard Western-centric IR studies emphasize Latin America's marginal position in the world system and its historical subordination to either European and/or U.S. hegemony. This course challenges this one-sided approach and reductionist characterization. Adopting a global historical perspective, one that privileges a Latin American-centric view, this course will examine the ways Latin America generated its own ideas, articulated its own concerns, and acted in its own interests in international affairs. Special attention will be paid to how Latin America sought to resist foreign domination and/or hegemony and maintain its relative autonomy. It will also analyze when, why, and under what conditions Latin America forged anti-imperialist blocs, pursued regional integration, and engaged in transnational solidarity. To provide a more nuanced

understanding of Latin American international relations, this course will historically contextualize and analyze the influence of changes in the international state system, national and sub-national political cultures, the balance of domestic forces, and non-state actors.

#### **L97 GS 4215 Anthropology of Food**

The rising interest in food research crosscuts various academic disciplines. This seminar focuses on aspects of food of particular interest in anthropology. The first 2/3 of the course is reading intensive and discussion-intensive. Each student will write short review/response papers for major readings. For the final third, we will still be reading and discussing, but the reading load will be lighter (and we will have a field trip) as students devote more time to their research paper. The research paper will be a major effort on a topic discussed with and approved by the professor. In most cases it will have to deal with cultural and historical aspects of a food, set of foods, form of consumption or aspect of food production. Papers will be critiqued, assigned a provisional grade, revised and resubmitted.

Same as L48 Anthro 4215

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

#### **L97 GS 422 Europe, Questions of Identity and Unity**

Nation states and their cultures have been changed by globalization. Within this process, continentalisation has played an important role. The European Union is only half a century old, but continental unity has been discussed and demanded by European writers and thinkers for hundreds of years. We will read essays on Europe (its identity, its cultural diversity and its cultural roots, contemporary problems, and future goals) by writers like Coleridge, Madame de Staël, Novalis, Chateaubriand, Heine, Nerval, Hugo, Thomas Mann, Ernst Jünger, T.S. Eliot, Klaus Mann, de Madariaga, Kundera, Enzensberger, Frischmuth, and Drakulic; we will discuss studies re-inventing Europe by philosophers like the Abbé de Saint-Pierre, Kant, Hegel, Nietzsche, and Ortega y Gasset; we will deal with the mythological figure of Europa and her resurrections in the world of art; we will study the Nazarene painters of the early 19th century in Rome and will discuss portraits of Bonaparte by French painters of the time. CompLit students will meet with the instructor for an additional two hours per month.

Credit 3 units. A&S IQ: HUM, LCD BU: BA EN: H

---

#### **L97 GS 4232 Contemporary Issues in Latin America**

How do the institutional designs of contemporary democratic governments help us understand the nature and quality of representation? We will concentrate on variations in the powers granted presidents by constitutions as well as the institutional determinants of whether executives are likely to find support for their policies in the legislature. In addition, we will explore how incentives established by electoral laws influence the priorities of members of congress. Given all these variations in democratic institutional design, can voters go to the polls with the confidence that politicians will implement the economic policies for which their parties have long stood or which they promised in their campaigns?

---

#### **L97 GS 4245 Culture and Politics in the People's Republic of China: New Approaches**

This course inquires into the political, ideological, and social frameworks that shaped the cultural production and consumption in the People's Republic of China (PRC). In the realm of literature, film, architecture, and material culture and everyday life, this course pays a close attention to the contestation and negotiation between policy makers, cultural producers, censors, and consumers. Understanding the specific contour of how this process unfolded in China allows us to trace the interplay between culture and politics in the formative

years of revolutionary China (1949-1966), high socialism (1966-1978), the reform era (1978-1992), and post-socialist China (1992 to present). The course examines new scholarship in fields of social and cultural history, literary studies, and gender studies; and it explores the ways in which new empirical sources, theoretical frameworks, and research methods reinvestigate and challenge conventional knowledge of the PRC that have been shaped by the rise and fall of Cold War politics, the development of area studies in the U.S., and the evolving U.S.-China relations. Graduate students should be proficient in scholarly Chinese, as they are expected to read scholarly publications and primary materials in Chinese. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor. Same as L04 Chinese 4242

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

---

#### **L97 GS 4246 State Failure, State Success and Development**

Why do some nations develop while others languish? This course takes an interdisciplinary approach to examining the role governments play in development and economic outcomes. Knee-jerk ideologues from all parts of the political spectrum make competing arguments, most of which are overly simplistic and ignore good social science. Some argue that state involvement in the economy hinders economic activity and development, while others argue for greater state involvement. Such arguments are often poorly informed by systematic rigorous research. We will look at some of the competing arguments about governments in failed and successful states and compare those arguments to the empirical world, or data. In so doing we will recognize that how governments affect development and economic outcomes in society is neither straightforward nor consistent with any of the simplistic ideological screeds that often dominate public discourse.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

#### **L97 GS 4251 Topics in Religion and Culture in East Asia**

This reading seminar introduces students to texts on and by women in East Asia from the earliest extant writings to the nineteenth century. Texts covered in the first half of the course include philosophical and doctrinal writings that deal with the role of women in society, their fitness for self-cultivation, and their access to salvation. The second part of the course focus is on narrative texts, memoirs and diaries that portray women or that were written by women, drawn from the literary traditions of China, Korea and Japan. Some of the issues students will grapple with are: Are Confucianism and Buddhism, some of the great intellectual traditions of East Asia, inherently misogynistic? Or can they function as liberating forces for women in their search for agency and meaning? More broadly, how can boundaries and constraints contribute to self-cultivation, growth, and even salvation? Previous coursework on East Asia and/or Buddhism is strongly recommended, but no prior knowledge of Chinese, Korean, or Japanese language is required. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: junior level or above or permission of instructor.

Same as L81 EALC 425

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

#### **L97 GS 4253 Researching Fertility, Mortality, and Migration**

Students will undertake research projects centering on the most fundamental demographic processes -- fertility, mortality, and migration. The first section covers basic demographic methodology so that students understand how population data is generated and demographic statistics analyzed. Course readings will then include seminal theoretical insights by anthropologists on demographic processes. Meanwhile, students will work toward the completion of a term paper in which they are expected to undertake some original research on a topic of their choice (e.g., new reproductive technologies; cross-cultural adoption; ethnicity and migration). Each assignment in this course will be a component of the final term paper. Prerequisite: L48-3612 (Population and Society) or permission of instructor.

**L97 GS 4264 Memory for the Future**

The year-long Studiolab "Memory for the Future" (M4F) will create spaces and practices of humanities education, practical public history, and collaboration in the spirit of "multidirectional memory." This concept tries to address the interlinked histories and legacies of the Holocaust, slavery, apartheid, and colonialism and create opportunities for dialogue between communities impacted by and implicated in these forms of violence. Our principal aims are to explore, enrich, and sustain the global and local focus of "reparative memorial practices" in St. Louis. Focusing on commemorative efforts through public memorials, monuments and especially museums, M4F will engage survivors, activists, institutional leaders, and scholars (students and faculty) in the development of educational materials, artistic representations, exhibitions, and other approaches to bringing the past into the present. We strive to support the efforts of local and regional initiatives and venues to end racism, antisemitism, and homophobia and their related violence through innovative and inclusive memory work. Alongside classroom-based instruction focusing on discussing scholarship and acquiring practical, curatorial, and pedagogical skills, students will work with area institutions and initiatives to apply their study of multidirectional memory. This practicum is an integral part of the course and requires students to leave campus and regularly work with one of our partners (The Griot Museum of Black History, George B. Vashon Museum, St. Louis Kaplan Feldman Holocaust Museum, The Mildred Lane Kemper Art Museum, Reparative Justice Coalition of St. Louis, St. Louis Community Remembrance Project). Participants of the Studiolab are expected to attend regular weekly meetings and engage in self-directed and collaborative project work. We are also preparing study trips to regional sites of memory and education. The M4F Studiolab will convene at the Lewis Collaborative, a living-learning-commercial space at the west end of the Delmar Loop. All A&S graduate students and advanced undergraduates are invited to participate. Undergraduate enrollment by permission of the instructors. For History majors, this course fulfills the capstone requirement as an Advanced Seminar. As a year-long course, students are expected to enroll in both the fall and spring sections. For more information, please consult <https://www.m4f.community/>

**L97 GS 4284 The New Sicilian School**

The unification of Italy in the mid-19th century led to the creation of a new "Sicilian School," the first since that of the court poets associated with Frederick II in the 13th century. These new Sicilian writers have given us many narrative masterpieces, focusing on common concerns such as the island's identity over two millennia and the impact of Italian nationalism; the rise of bourgeois culture and the decline of indigenous patriarchal structures; the rule of law and the role of the Mafia; and the politics of language. Authors studied include Verga, Pirandello, Vittorini, Brancati, Tomasi di Lampedusa and Sciascia. Course taught in Italian or English.

**L97 GS 4302 Divergent Voices: Italian Women Writers**

This course engages the fictional and political works of Italian women writers from the seventeenth century to the present day. We will read one of the acclaimed Neapolitan novels of Elena Ferrante, who is considered by many to be the most important Italian fiction writer of her generation. We will examine a cloistered Venetian nun's defiant 1654 indictment of the misogynist society that forced her into the convent. We will confront the reality of a woman writer who in 1901 was compelled to choose between her child and her literary career. Among other contemporary writers, we will study the humorous and radical feminist one-acts of playwright Franca Rame. Taught in English. No Final.

---

**L97 GS 4311 Renegades and Radicals: The Japanese New Wave**

In 1960, the major studio Shochiku promoted a new crop of directors as the "Japanese New Wave" in response to declining theater attendance, a booming youth culture, and the international success of the French Nouvelle Vague. This course provides an introduction to those iconoclastic filmmakers, who went on to break with major studios and revolutionize oppositional filmmaking in Japan. We will analyze the challenging politics and aesthetics of these confrontational films for what they tell us about Japan's modern history and cinema. The films provoke as well as entertain, providing trenchant (sometimes absurd) commentaries on postwar Japanese society and its transformations. Themes include: the legacy of WWII and Japanese imperialism; the student movement; juvenile delinquency; sexual liberation; and Tokyo subcultures. Directors include: Oshima Nagisa, Shinoda Masahiro, Terayama Shuji, Masumura Yasuzo, Suzuki Seijun, Matsumoto Toshio, and others. No knowledge of Japanese necessary. Credit 3 units. Mandatory weekly screening:

**L97 GS 4324 Divergent Voices: Italian Women Writers**

This course will examine select novels, poetry, and political writings by such noted authors as Sibilla Aleramo, Dacia Maraini, Luisa Muraro, and Anna Banti. Special attention will be paid to the historical, political, and cultural contexts that influenced authors and their work. Textual

and critical analysis will focus on such issues as historical revisionism in women's writing, female subjectivity, and the origins and development of contemporary Italian feminist thought and practice. Taught in English.

### L97 GS 4325 Global Art Cinema

How do art films tell stories? The dominant storytelling genre of the contemporary festival circuit, the art film has since World War Two combined "realist" and "modernist" impulses. Influenced by Italian neorealism, art films grant priority to characters from working class, sexual, and other exploited and imperiled minorities. Drawing on the fine arts, literature and music, art films also experiment with modernist themes and formal principles, such as subjectivity, duration, serial structure, denotative ambiguity and reflexivity. This course explores art cinema from a variety of national contexts, analyzing storytelling techniques and themes that challenge the "economical" and diverting forms associated with mainstream commercial filmmaking. Required Screenings.

Same as L53 Film 432

### L97 GS 4330 Literature of the Italian Enlightenment

This course aims to explore the spectrum of intellectual and literary discourse of the Italian Enlightenment by examining a wide array of texts and genres. Readings will include selections from Enlightenment and popular periodicals, scientific tracts on human anatomy, women's fashion magazines, the reformed theater of Carlo Goldoni, as well as Arcadian poetry, and literary criticism. We will study the rise and characteristics of "coffee culture" during this age. We will pay special attention to the "woman question," which stood at the center of eighteenth-century Italian intellectual discourse, and which was critical to the contemporary drive to define the enlightened nation-state. The class will be conducted as a workshop in which students and instructor collaborate in the realization of course goals. Readings in Italian or English; discussion in English. Prereq. Ital 323C or Ital 324C.

---

### L97 GS 4357 The Holocaust in the Sephardic World

The course provides students with a comprehensive understanding of the Holocaust, of its impact on the Sephardic world, of present-day debates on the "globalization" of the Holocaust, and of the ways in which these debates influence contemporary conflicts between Jews, Muslims and Christians in Southern Europe and North Africa. We will

turn to the history of these conflicts, and study the Sephardic diaspora by focusing on the consequences that the 1492 expulsion had within the Iberian Peninsula, in Europe, and in the Mediterranean world. We will study Sephardic communities in Europe and North Africa and their interactions with Christians and Muslims before World War II. Once we have examined the history of the Holocaust and its impact on the Sephardic world in a more general sense, our readings will focus on the different effects of the Holocaust's "long reach" into Southeastern Europe, the Balkans, and North Africa, paying close attention to interactions among Jews, local communities, and the Nazi invaders. Finally, we will address the memory of the Sephardic experience of the Holocaust, and the role of Holocaust commemoration in different parts of the world. We will approach these topics through historiographies, memoirs, novels, maps, poetry, and film.

### L97 GS 4370 Global Feminisms

This course engages contemporary feminist theories from diverse transnational contexts, as well as the social movements and local resistances they inspire. Through engagement with key works of feminist theory, political manifestos, and creative works of resistance, we will explore how transnational feminist alliances and coalitions have contested and responded to gendered and racialized forms of exploitation, navigating and reshaping territorial and social boundaries. We will engage with debates around the notion of a "global sisterhood"; tensions between universal and local feminist practice; the role of difference, nationality and culture in navigating the possibility of solidarity; the role of the Internet in forging cross-border alliances; human rights-based activism; "women's" work; transgender inclusivity and transfeminisms. Part of our goal will be to ask how feminist theories from diverse geographical locations have influenced the politics of borders, movements for environmental justice, migrations and mobility, resistance to imperialism and the forging of alternative economies. We will also explore the gray areas existing in between binaries such as feminist/anti-feminist; local/global; home/away; global South/North; victim/agent; domination/dependency. Finally, we will ask how processes of knowledge-production take shape within different intellectual and political movements such as post-colonial feminism, decolonial and indigenous feminism, liberal and radical feminism, Marxist feminism and religiously-based feminisms.

### L97 GS 4371 Caffè, Cadavers, Comedy, and Castrati: Italy and the Age of the Grand Tour

Taught in English. With French libertine philosopher the Marquis de Sade, German novelist Johann Wolfgang von Goethe, Romantic poet Lord Byron, and other illustrious travelers of high birth and good fortune who sought finishing enrichment by making their Grand Tour to Italy from the mid-eighteenth through the early nineteenth centuries, we will explore the richness and variety of Italian life and culture as depicted by both Grand Tourists as well as their Italian interlocutors. Chief among our destinations will be Venice, Bologna, Florence and Rome. Attractions typical of the early modern Tour will circumscribe our journey. Coffee houses first appeared in the eighteenth century and, in ways strikingly similar to their function today, became the real and symbolic centers of social, intellectual and civil exchange. We will explore eighteenth-century coffee culture through comedies and Enlightenment and popular journals that took them as their theme, as well as through a study of the coffee houses themselves, a number of which are still in existence. Theaters, concert halls, gaming houses, literary and scientific academies, galleries, churches, and universities will be part of the standardized itinerary we will follow. During the period, anatomy and physiology attained new legitimacy as crucial scientific disciplines and we will visit both the anatomical theater at the University of Bologna, where the annual Carnival dissection took

place, as well as the first museum of anatomy and obstetrics founded in the Bolognese Institute of Sciences in 1742 by Pope Benedict XIV. We will visit archeological excavation sites, in particular Pompeii, first unearthed in 1748. Fashion, an obsessive preoccupation of the day, will also be a point of interest in our travels. Through primary and recently published secondary sources we will also encounter the remarkable authority of Italian women unmatched anywhere else in Europe at the time. Prereq: at least one 300-level literature course. Readings in Italian or English.

**L97 GS 4392 Capitalism and Culture**

Capitalism is perhaps the most important historical and social phenomenon in the modern world. In tribal settings and major cities alike its complex impacts are evident. Through rich case studies of how capitalism touches down in diverse cultures, this course provides an introduction to anthropological perspectives on the economy and economic development. Themes covered include the history of capitalism and globalization, the cultural meanings of class and taste, the relationship between capitalism and popular culture, major artistic responses to capitalism, social movements such as environmentalism, and the field of international development. No background in anthropology or economics is required.

**L97 GS 4414 Gender Analysis for International Affairs**

In this transdisciplinary course, gender is not a synonym for women, as Terrell Carver reminds us; rather, students take gender seriously as both an analytical category and a lived experience, examining how masculinities, femininities, gender identities, and sexualities shape international affairs. Traversing from the macro to the micro level, the course functions as a learning community in which students are exposed to diverse voices from around the world, and students conduct gender analyses in case studies and simulations. Throughout, the class will be mindful of 1) how gender functions in tandem with other aspects of identity, such as race, religion, class, sexuality, and more (intersectionality) and 2) how multidimensional identities morph historically, regionally, and culturally. Students build a gender analysis toolkit and practice what Cynthia Enloe describes as "feminist curiosity," exploring the relationship between gender and power in international affairs.

**L97 GS 4415 Technology, Empire, and Science in China**

How did technology, science, and empire intersect in early modern and modern Chinese history? Was there a unique "Chinese" way of studying nature? How did non-Chinese scientists and engineers contribute to China's knowledge of the world? This course offers a historical and historiographical survey of science and technology studies in China, from the 13th to the 20th century. It particularly examines the global circulation of scientific knowledge in the late imperial period, the place of technology in the empire building of the Qing dynasty (1637-1912), and the violent epistemic encounters between the West and China from

the 19th century onward. Throughout the semester, we will explore Confucian scientists as well as Muslim geographers, Jesuit engineers, Manchu anatomies, and Chinese barefoot doctors. Positioning China within a global order, the students will question the premises of modern scientific discourses and try to respond to a seemingly simple question: What does science and technology even mean in a Chinese context?

**L97 GS 4435 Memory, Tears, and Longing: East Asian Melodrama Film**

Excessive emotion, unreasonable sacrifice, hidden truth, untimely knowledge, and forbidden desire—the power of melodrama and its moving representations have fueled the popularity of hundreds, if not thousands, of books, plays, and films. Melodrama has variously been defined as a genre, a logic, an affect, and a mode, applied to diverse media, divergent cultural traditions, and different historical contexts. The course provides a survey of East Asian melodrama films—as well as films that challenge conventional definitions of melodrama—by pairing Japanese, Korean, and Chinese-language productions with key critical texts in melodrama studies. We will see classics such as *Tokyo Story*, *Two Stage Sisters*, and *The Housemaid*. We will examine melodrama's complex ties to modernity, tradition, and cultural transformation in East Asia; special emphasis will be placed on representations of the family, historical change, gender, and sexuality. In addition to historical background and film studies concepts, we will also consider a range of approaches for thinking about the aesthetics and politics of emotion. No prerequisites. No prior knowledge of East Asian culture or language necessary. Mandatory weekly scheduled screening.

**L97 GS 4441 The Forbidden City**

Home to 24 emperors of the Ming and Qing dynasties (1368-1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of premodern architecture in China. This seminar examines the origins of the palace; its construction in the early Ming; the coded symbolisms of its plan and decoration; the rituals of court; and the lives of its denizens, from emperors (including Pu Yi, the "last emperor") to concubines and from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and a backdrop to major political events, as well as its role in the urban design and contemporary art of 21st-century Beijing. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Same as L01 Art-Arch 444

**L97 GS 4450 Japanese Fiction: Meiji Women Writers (Writing-Intensive Seminar)**

The Meiji Period (1868-1912) in Japan was a time of tumultuous change. During the era Japan made sweeping reforms to its government, educational system, and social structures. Meiji men were encouraged to "modernize" along Western lines, while women were expected to serve as "repositories of the past." Most women prized the elegant traditions and saw these as important markers of cultural identity. But not all were willing to completely abdicate their place in the modernizing impulse. This writing intensive course will examine these women's literary works, paying attention to the way they developed strategies to both "serve the nation" and find an outlet for their own creative voice. Works to consider include the short fiction of Higuchi Ichiyo, Shimizu Shikin, and Tamura Toshiko, the poetry of Yosano Akiko, the essays of Kishida Toshiko, and the translations of Wakamatsu Shizuko. All readings are available in English translation and students need not be familiar with Japanese, though background in Japanese Studies, Women's Studies, or literary studies will be helpful. This is a Writing-Intensive Seminar. Prerequisite: junior level or above or permission of instructor.

**L97 GS 4451 Contemporary Politics in India**

This seminar will examine current topics and controversies in contemporary Indian politics. The course will have three main foci: the links between politics and economic liberalization over the last two decades; the links between ascriptive identities such as religion, caste and gender and contemporary political processes, including ethnic and gender quotas; and the changes in party politics at the national and state levels that have accompanied the decline of Congress party dominance. Specific topics include the role of caste and religion in contemporary politics; the rise of state parties and its effects on federal relations; the effects of economic reform and globalization on economy and society; urbanization and migration flows; the rise of modern Hindu nationalism; and the links between collective violence and electoral politics.

**L97 GS 4453 Topics in Islam**

This course aims to study political thought and practice in Islamic history through a close reading of a selection of primary sources in translation (and in their original language, if language proficiency is satisfactory). Particular attention will be given to the historical contexts in which thoughts are espoused and texts written. We plan to examine the development of political concepts and themes as articulated in diverse literary genres (e.g., legal, theological, political) from the eighth through the 13th centuries. We hope to engage various theoretical models to analyze the relationship between politics and

religion and to tease out the role of power in determining sociopolitical relations, distinctions, and structures. We hope to have a better grasp on the historicity of ideas presented in timeless categories in political discourse. Advanced knowledge of Arabic preferred but not required.

**L97 GS 4490 Modern Japanese Women Writers (WI)**

Japanese women have been scripted by Western (male) imagination as gentle, self-effacing creatures. From their (re)emergence in the late 19th century to their dominance in the late 20th, Japanese women writers have presented an image of their countrywomen as anything but demure. Struggling to define their voices against ever-shifting expectations and social contexts, the women they create in their fiction are valiant, if not at times violent. This course examines the various manifestations of the female image in female-authored modern Japanese fiction. Writers to be considered are Higuchi Ichiyo, Hirabayashi Taiko, Uno Chiyo, Enchi Fumiko, Yamada Eimi, and others. A selection of novels and shorter fiction will be available in English translation, and students need not be familiar with Japanese. Prior coursework in literature/women's studies may be helpful. This is a Writing Intensive course. Prerequisite: junior level or above or permission of instructor.

Same as L05 Japan 449

**L97 GS 4492 The Irish Literary Revival**

The class will study major writings by Oscar Wilde, W. B. Yeats, J. M. Synge, James Joyce, & Flann O'Brien within the contexts of the language movement, colonialism, cultural nationalism, the socialist movement and the 1913 Lockout, the Easter Rising and the War for Independence, the Civil War, the founding of the Irish Free State, the Partition, and the Irish Theocracy. Wilde's notions of the primacy of art with regard to politics and their elaboration by W. I. Thompson and Declan Kiberd will be an organizing principle in the course. The class will see two films, offer oral reports, and write papers.

Same as L14 E Lit 4492

Credit 3 units.

---

**L97 GS 4496 East, Meet West: Asia Encounters Europe**

This seminar, which is grounded in cross-cultural aesthetics, examines East Asian visual responses to European art and science from the 16th through 19th centuries. The same Western ideas and works that were first introduced by Jesuit missionaries, that were continued by merchants, and that culminated with colonial enterprises left very different impressions on China and Japan. An introduction to cross-cultural aesthetics from both Western and East Asian perspectives lays the theoretical foundation to engage these works of art before the course proceeds thematically through time to cover painting, cartography, woodblock prints, ceramics, and photography within transregional and transcultural contexts. One upper-level course in Art History is recommended but not required before taking this course.

Same as L01 Art-Arch 4494

**L97 GS 4511 Urban Culture in Modern China**

The narrative of rural crisis and peasant revolution has dominated China's modern history for decades. But there has been a growing interest in China's urban past and present with the increased prominence of cities in China's breathtaking economic development and the opening of municipal archives in post-Mao era. The course aims to introduce students to "conventional wisdoms," new directions, and major debates in the urban history field. Topics include: the urban political economy, the cultural dynamics of modernity, the reconstruction of traditions in the making of modernity, the cultural production and consumption, colonialism and imperialism in the urban setting, nationalism, and reform and revolution. Acknowledging and understanding the nuance and difference in views and interpretations in historical writings (historiography) are essential. The course seeks to develop students' research and analytical skills, such as locating secondary sources, incorporating scholarly interpretations, and developing and sustaining a thesis based on secondary and primary sources in student research. This is an interdisciplinary seminar designed for advanced undergraduates and graduate students. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor.

**L97 GS 4517 Anthropology and Development**

What is 'development'? Economic progress for all? A slow and gradual 'improvement' in the human condition? Helping people with 'projects'? Westernization? Modernization? The sorting out of bodies that are useful and can be put to work from those less useful bodies that must be contained, imprisoned, or killed? The militarized accumulation of capital? The commodification of labor? The exhaustion of nature? In this advanced seminar we will consider how anthropologists - as writers, analysts, and theorists - have engaged the theories, meanings, practices, and consequences of (sometimes externally directed) economic and political change. We focus on issues of the contemporary moment: oil; urban poverty and inequality (sex work, migration, water, debt, and cash transfer programs); and cultures of militarism. The course is designed to provide a graduate-level introduction to theory and ethnography based on intensive reading, discussion, critique, and writing, with revision. It is open to advanced undergraduates and fulfills writing-intensive (WI) requirements, as well as capstone requirements for some majors.

**L97 GS 4520 International Climate Negotiation Seminar**

This course is designed to prepare students to attend and observe annual meetings associated with the United Nations Framework Convention on Climate Change (UNFCCC) as a delegate of Washington University. The course and meetings provide student delegates with a unique educational experience to observe the development of

international climate policy through interdisciplinary negotiations and interactions inside the negotiating space. Students see the interaction between climate policy, science and technology as they identify and analyze policy decisions across the international climate regime.

The COP 29 meeting will be held in Baku, Azerbaijan, from Monday, November 11, 2024 to Friday, November 22, 2024. While the number of students who can attend meetings is limited by the United Nations, we will do our best to have course participants attend one week of the COP. Course enrollment is limited. Indicate your interest by placing yourself on the waitlist and completing an application. The cost of meeting attendance is partially covered by the College of Arts & Sciences and need based support is available. More information on cost is included on the course FAQ page. Pre-requisite: junior standing. Contact the instructor with questions at martin@wustl.edu. Registration for this course is direct to the waitlist, and students are selected by application. The application can be found here. The deadline for the application is 5 PM on April 24th.

### L97 GS 457 Gender and Modernity in Latin America

The purpose of this course is to introduce students to the particular forms modernity assumes in Latin American countries and to the ways in which national cultures, identity politics, and gender issues interweave during the 20th-century. The course will discuss three particular articulation of this topic: 1) Gender and the national question in Argentina: Eva Peron; 2) Gender and Visual Arts: Frida Kahlo; and 3) Gender and Ethnicity: Rigoberta Menchu. Through these iconic figures students will be introduced to the specific features that characterized three very different but representative cultural scenarios in Latin America. In each case, the context for the emergence of these highly influential public figures will be studied from historical, social and cultural perspectives. In order to explore the cultural and political significance of Eva Peron, Frida Kahlo and Rigoberta Menchu, the course will utilize literary texts (speeches, letters, diaries, etc.), visual materials (photography, films, and paintings) and critical bibliography.

### L97 GS 4582 Major Film Directors

What does the film director do? In the earliest movies, film directors modeled themselves on their theatrical counterparts: they chiefly focused on how to stage an action in a confined space for a stationary camera that represented an ideal member of the audience. As the camera began to be used to direct audience attention, first through cutting, then through actual movement, the film director evolved from a stager of events to a narrator. By analyzing the work of one or more major film directors, this course will explore the art of film direction. We will learn how film directors may use the camera to narrate a scene, to provide their own distinctive view of the actions playing out on the movie screen. May be repeated for credit with permission of the instructor. REQUIRED SCREENING: [day, time].

### L97 GS 4590 Writing North Africa: Francophone Literature of the Maghreb

With statues of colonizers coming down around the world, France reckons with its colonial legacy in North Africa. Ever since their conquest of Algiers in 1830, the French have been fascinated by writing from across the Mediterranean. Beginning with nineteenth-century French travel narratives about Algeria, the colonial era defined ideas of the "exotic." As Algeria, Morocco, and Tunisia gained independence from France in the mid-twentieth century, North African authors often wrote their own literature in the language of their former colonizer. These authors and their contemporary descendants continue to create and challenge the ideas of postcolonial francophone literature today. The main seminar sessions are taught in English, with additional required weekly undergraduate discussions (section A) in French. Prerequisites: for undergraduates, French 325 or 326, Thinking-It-Through, or In-Depth; for graduates not in French, reading knowledge of the language.

### L97 GS 4611 Latin American Populism and Neo-Populism

Over the past 100 years populism, in its diverse forms, has dominated Latin American politics. This course examines case studies of classical populism (Aprismo, Cardenismo, Peronismo, Varguismo, etc.) and neopopulism (Fujimorismo, Chavismo, Moralesismo, neo-Peronismo). In doing so, it explores new theories of populism and analyzes populist discourses, leadership styles, gender and racial politics, mobilizational tactics, transnational networks, and foreign policies.

### L97 GS 4615 Caricature: The Culture and Politics of Satire

This course examines the golden age of caricature. Beginning with the prints of William Hogarth, we will look at the caricatural traditions in France and England from the late 18th century through the early 20th century. Special emphasis will be placed on visual satire as a vehicle for social and political critique; on theories of humor (particularly Baudelaire and Bakhtin); and on the development of a mass market for this imagery. Other figures to be discussed include Rowlandson, Cruikshank, Daumier, Gavarni, Philippon, and Gil. We will take advantage of a major collection of French caricature in the Mildred Lane Kemper Art Museum at Washington University as well as collections available for study in Olin Library and at the Saint Louis Art Museum. Prerequisites: L01 113, L01 215, or a 300-level course in modern European history or literature; or permission of instructor.

### L97 GS 4622 Labor and Labor Movements in Global History

This course examines the connections between work, types of workers, workers' movements, labor ideologies, and labor politics from a global historical perspective. It analyzes working-class formation, state-labor relations, patterns of racialized and gendered work, and transnational and transcontinental labor activism in the context of global capitalism. Special attention will be given to experiments in workers' control, workers' responses to precarity, and the emergence of platform and digital workers as part of the global working class.

**L97 GS 4630 Modernity, Culture and the State in Mexico**

This course is an advanced seminar on the process of the cultural, ideological and institutional modernization of Mexico. Drawing on readings from fields such as history, cultural anthropology, political sociology and cultural theory, the course discusses the shaping of various forms of social subjectivity and cultural ideology that sustained the formation and development of the state. The course also engages with the identities and processes that led both to the formation of structures of citizenship and to the contestation of state power. This course is structured chronologically, following the development of three interrelated processes unfolding between 1810 and the present: (1) the creation of state institutions and ideology and their evolution in relationship to events such as the liberal Reforma of the 1850s and the Mexican Revolution; (2) the cultural and social implication of processes of capitalist development, modernization and globalization; and (3) the ways in which Mexico's histories of sociocultural difference led to political and cultural insurgencies and rebellions. This course fulfills the seminar requirement for Latin American Studies majors. Prerequisite: L45 165D, L45 305, any other 300-level course with significant focus on Mexico, or permission of instructor.

**L97 GS 4631 The Binational Condition. The Mexico-US Relationship in Mexican History and Culture**

From the 19th century onwards, the relationship between Mexico and the United States has been defined by intense tensions and contradictions. Closely intertwined by geopolitical engagement and integrations, mutual migration flows, and rich cultural exchange, both countries belong to a binational system with few equivalents around the world, which defines the lives of people living across North America. And yet, few people in the United States have access to a clear and rigorous understanding of the Southern neighbor, often leading to conflict at the political and social levels. This class explores this historically, from the early frictions caused by territory and slavery to the binational conditions of the present. The class emphasizes the Mexican perspective of the relationship, often erased in discussions from the U.S. From this perspective, the course will engage critical moments in the history of the relationships, such as the underground railroad to the South, the Mexican American War, the Guadalupe Hidalgo treaty, and the Cold War. The class will also discuss the ways in which Mexico has influenced the United States culturally, from the impact of Mexican post-Revolutionary art in the New Deal to the rise of film directors like Alfonso Cuarón and Guillermo del Toro. Finally, the class will lay out the ways in which Mexicans and scholars of Mexican studies think about questions such as regional development, the border, immigration, and the Drug War. Prereq. L45 165D or prior coursework on Global Studies, Latin American Studies or American Studies. The course covers the seminar requirement for majors and minors in Latin American Studies.

**L97 GS 4633 20th-Century Latin American Revolutions**

Latin America has been described as one of the most "revolutionary" regions of the world in the twentieth century. It experienced four major social revolutions and gave rise to many consequential guerrilla movements. This course uses theories of revolution and a social science historical approach to elucidate the causes, processes, outcomes, and implications of revolutions in Mexico (1910), Bolivia (1952), Cuba (1959), and Nicaragua (1979). It also analyzes late 20th century revolutionary guerrilla movements in El Salvador and Peru. Why peasants, university students, and women formed key social bases of support for revolutionary movements and how revolutions were institutionalized and consolidated will receive special attention.

---

**L97 GS 4640 Nation and Desire in Latin America**

The purpose of this course is to analyze the process of nation formation in Latin America, since the imaginaries of the "Creole nation" to the first half of the 20th century. Class discussion will encompass the study of theories on nation formation and nationalism as well as textual representations of national projects, such as Simon Bolivar's letters and discourses, selections from Facundo, Civilization and Barbarism by Domingo F. Sarmiento, selected texts by Andres Bello, Alfonso Reyes, et al, Ariel, by J. E. Rodo, Pedro Henriquez Urena's Seis ensayos en busca de nuestra expresion, Jose Vasconcelos' La raza cosmica, Jose Carlos Mariategui, Siete ensayos de interpretacion de la realidad peruana, Jose Marti's Nuestra America and other essays. Some of the main topics to be discussed are the leading role of Creole elites in the consolidation of national cultures, the marginalization of women as well as indigenous and Afro-Hispanic populations, and the role of nationalism in the shaping of modern societies. Colonialism, Occidentalism, liberalism, positivism, nationalism and modernity are some of the concepts that will be explored both theoretically and in their particular discursive usages. Finally, the concept of nation(alism) will be studied as a political/rhetorical device and as the resulting expression of agency, interest, and desire, in peripheral societies.

**L97 GS 4641 Japanese Textual Analysis**

This course introduces the advanced student of Japanese to a variety of prose narratives in the modern language. Readings, which include literary texts and topical essays on aspects of Japanese society and culture, reflect the needs and interests of the enrolled students. Focus is on close reading and syntactic analysis of the selected texts. Regular translation exercises gauge the mastery of grammar, syntax, and idiomatic usages. All readings are in Japanese, with class discussion conducted predominantly in English. A final translation project, to be chosen by the student in consultation with the instructor, is required. Prerequisite: permission of instructor.

**L97 GS 4650 Cities, Race and Development in Latin America**

This course offers a multi-disciplinary approach to the study of the Latin American city: its history, development and inherent economic, social, cultural, ethnic, and political tensions. Lectures, readings, and class debates will explore interactions between the materiality and structure of Latin American modern cities and the social and cultural phenomena related to urban life in multicultural societies. Particular attention will be devoted to the effects of internal/external migration, and to the development of public spaces and sites of memory. Patterns of social segregation, marginalization, inequality, and the like, will be analyzed in order to elaborate on the contemporary challenges of the city in a globalized yet traditional world. In addition to the analysis of living, institutional, and commercial spaces, the course will cover social dynamics that break the discipline of the city through different forms of transgression, including crime, informal housing, and underground movements. The goal of the course is to expose students to historical and social developments as exemplified in a variety of urban environments, and to encourage reflection on issues of social justice related to the living conditions of rural, disadvantaged, and indigenous populations. The course will be conducted in English. Mandatory readings will be in English. Additional readings in Spanish will be required for those students fluent in the language. Prereq. None. **L97 GS 4652 Latin American Subcultures**

This course has been planned as an introduction to the interconnections between "high" culture, popular culture, and mass culture, with particular emphasis on the formation of urban subcultures in contemporary Latin America. The topic of subculture and counterculture will be analyzed, taking into consideration the influence of factors of class, race, and gender in the construction of alternative cultural identities. Some of the connections to be studied are between political power and cultural resistance, affect, violence, symbolic value, hegemony and marginality. Distinctions will be made between culture, subcultures, traditions, and lifestyles as well as between multiculturalism and interculturality. While the first part of the course will introduce critical concepts, theories, and methodologies, the second half will focus on specific articulations between cultural practices and the domains of belief, sexuality, violence, and social media, including uses of music, video, and films. Students will prepare a final paper on a Latin American subculture of their choice and analyze it using the critical and theoretical tools discussed in class. Prerequisite: L45 165D. This course fulfills the seminar requirement for Latin American Studies majors and minors.

**L97 GS 4664 Popular Culture and the Representation of Youth in Latin America**

The objective of this course is to introduce students to different aspects related to the representation of youth in Latin America, particularly through the depiction this sector receives in the realm of popular culture. The course will focus on the relationship between youth and social/political conflict and on the literary and cinematic representation of juvenile sectors in cultural production in different Latin American countries. The roles of music, melodrama and the media will be studied in connection to the construction of subjectivity and collective identity. The course will also analyze the involvement of juvenile sectors in narco-culture, gangs, maras, and the like, as well as the impact of violence, fear, and social inequality in early life. The analysis of films, literary texts, critical studies and cultural practices will be approached through a combination of biopolitical analysis and the analysis of representational strategies utilized in the elaboration of symbolic materials. This course fulfills the seminar requirement for Latin American Studies majors and minors. Prerequisite: LatAm 165D or another Latin American Studies course.

---

**L97 GS 4690 Citizenship in the Hot Seat. Migration and Borders in Latin America**

This course is an introduction to concepts, interpretations, and debates related to different forms of human mobilization across borders, particularly in contemporary Latin America. However, class discussions will expand to other scenarios in order to contextualize the experience and characteristics of migration today. Some of the notions to be analyzed in connection to this topic are freedom of movement, citizenship, inequality, the labor market, borders, territoriality, and national security. Borders will be studied as material constructions (i.e., walls, wire fences, technological surveillance, funnel systems, and strategies of deterrence) and as conceptual/symbolic representations. In addition to migratory movements, other phenomena such as diaspora, exile, and forced displacements will also be introduced as they have developed in Latin America. Cultural and psychological aspects related to migratory experiences -- such as the role of memory and affect, individual and collective trauma, social effects of deportation, stereotyping, the role of race and gender, and so on -- will also be considered, as they constitute integral aspects of migratory studies. The course will be conducted in English as a combination of lectures, student presentations, and collective discussions of assigned readings. Fulfills the seminar requirement for Latin American Studies majors and minors. Prerequisite: L45 165D.

**L97 GS 4692 Reading Across Languages and Cultures: Theory, Research and Practice**

The United Nations has declared that literacy is a fundamental human right. This course, which is taught in English, connects to the mission of UNESCO and examines the wide range of theoretical and research issues -- both historical and current -- related to reading and writing across languages and cultures. Literacy acquisition among second-language learners involves a number of variables, including both cognitive and social factors. Topics to be discussed include universal cognitive operations, individual learner differences, text types and literary forms, literacy and social power, and the extent to which reading and writing are interrelated. Students will discuss how to bridge scientific research in the laboratory to practice, and they will be involved in St. Louis community outreach projects with refugees and immigrants at the International Institute, where they will create and implement reading and writing activities driven by theory and empirical investigations. Students will take the theory and research they learn, and they will help meet the local reading and writing needs of a changing population with a variety of backgrounds, values, and educational preparations. The course is required for the minor in applied linguistics, the PhD in applied linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors, such as Global Studies and Educational Studies.

**L97 GS 4750 Screening the Holocaust**

This course surveys the history of Holocaust representation on film, examining a wide range of documentary and fictional works from 1945 to the present day. Discussions will consider a number of key questions, including: What challenges does the Holocaust pose to cinematic representation, and how have filmmakers grappled with them? How have directors worked within and against notions of the Holocaust as unrepresentable, and how have they confronted the challenge of its association with a limited set of highly iconic images? What are the more general ethical and political dimensions of representing the Holocaust onscreen -- its victims as well as its perpetrators, the systematic genocidal violence that characterized it, and the sheer absence of so many dead? We will also probe the changing significance of cinematic representation of the Holocaust, exploring the medium's increasingly memorial function for audiences ever further removed from the historical moment of its occurrence. Screenings may include *The Last Stage*; *Distant Journey*; *Night and Fog*; *Judgment at Nuremberg*; *Shoah*; *Europa, Europa*; *Schindler's List*; *Train of Life*; *The Specialist*; *Photographer*; *A Film Unfinished*. Critical readings by figures such as Giorgio Agamben, Jean Amery, Shoshana Felman, Geoffrey Hartman, Marianne Hirsch, Sidra Israhi, Dominick LaCapra, Alison Landsberg, Berel Lang, Michael Rothberg, and James Young. Required screenings

**L97 GS 4755 Worldviews, World-Building, and World Literature: New Approaches to Chinese Literature**

This course explores how the multivalent notion of "world" creates new approaches for studying Chinese literature from the 16th century up to the early 20th century. It will consider the following questions: How did the Chinese people perceive, map, and write about the world prior to modernity? What are the strategies to construct fictional, virtual, or gameful worlds through literature and other media? How and why should we position Chinese literature as world literature? Issues covered in this course include premodern worldviews, literary and transmedia world-building, multilingualism, adaptation, and translation. One primary goal of this course for students is to learn how to critically apply theories from narratology, media studies, and comparative literature to study Chinese literature. To this end, the first session will focus on a particular piece of theoretical work or relevant secondary scholarship, and in the second session students will conduct a case study with selected primary sources to practice employing, questioning, and complicating those theories and methods. All readings will be provided in English. Students with classical and modern Chinese skills will be encouraged to read materials in the original to the extent possible. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisites: junior level or above or permission of instructor.

**L97 GS 4762 Money, Exchange and Power: Economy and Society in the Ancient Mediterranean World**

From seaborne trade and banking to slavery and the impact of new technology, the economy of the ancient Mediterranean world constitutes a particularly dynamic field of study. To examine a society's underlying economics is to gain critical insight into those historical phenomena that are themselves the product of multiple, overlapping dimensions of human action and thought. This course engages directly with a fascinating array of primary evidence for economic behaviors, beliefs, structures, and institutions among the Romans, Greeks, and their neighbors. We will also explore the methodological challenges and implications of that evidence as well as a variety of modern theoretical approaches. This year our focus is mainly upon developments among the Greeks, ranging from the transformative invention of coinage to the rise of commercial networks centered around religious sanctuaries like Delos. PREREQ: CLA 341C OR 342C OR 345C OR 346C OR PERMISSION OF INSTRUCTOR.

**L97 GS 4771 Native and Cosmopolitan Modernisms: American and European Art between the Two World Wars**

This seminar focuses on two contrasting currents within American and European modernism between the two world wars: native and cosmopolitan. Alternating between the United States and France, the content of this course begins in the years before World War I and concludes with the rise of virulent forms of cultural nationalism during the late 1930s. We consider the subjects, personalities, aesthetic strategies, and political and social investments associated with these alternative modernisms, which are linked to a search for roots on the

one hand and to a desire for forms of spatial and social mobility on the other. By comparing the "homegrown" and expatriate experiences, we will consider divergent attitudes toward identity, gender, nation, time, and nature, analyzing these two fundamental responses to modernity in relation to one another. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

**L97 GS 4803 Advanced Seminar: Partition: The Making of India and Pakistan**

The division of India and Pakistan at the time of Independence from British colonial rule was a major event that has left its mark on the lives, memories, and politics of contemporary South Asians. Why did British India break apart along apparently religious lines? Was sectarian or "communal" violence inevitable, or endemic in South Asian society? How was Partition - a time of violence, mistrust, dispossession, displacement, and mass migration -- experienced by ordinary people? How is the traumatic memory of this event borne by individual women, children, by families? How does its legacy persist, and how is it being remembered, and reckoned with, today? In this course, we will not find final answers to these difficult questions, but we will learn how to explore them responsibly, using literature, film, and other archival sources. This course provides students with a forum to discuss and explore topics of their own choosing.

**L97 GS 4810 Global Structures and Problems**

This course examines social problems around the world and their relationship to globalization - that is, the increasing connectedness of social and economic life across borders. Students will investigate a range of these problems - such as environmental degradation, labor exploitation, human rights abuses, ethnic conflict, poverty, and inequality - and these issues' links to both personal experiences and larger social structures. The course is premised on the idea that to understand current global social problems, one must understand the evolution of markets, states, civil society and social movements, gender hierarchies, ethnic categories, and global governance over the past century. While the course has no specific prerequisites, some familiarity with sociological analysis is strongly recommended. Graduate students should enroll in the 500-level offering.

**L97 GS 4816 Art and Culture in Fin-de-Siecle Europe**

This course presents an examination of painting, photography, and the decorative arts in France during the period between the two World's Fairs of 1889 and 1900. Artistic movements include Symbolism (Van Gogh, Gauguin, and Redon), later Impressionism (Monet and Morisot), Neo-Impressionism (Seurat and Signac), and Art Nouveau. Thematics include urban leisure and cafe culture, the agrarian ideal, the promises and threats of science and technology, the lure of the primitive, and the impact of nationalism and feminism on the arts. Prerequisites: L01 215 and any 300-level course in 19th-century art, literature, or history; or permission of instructor.

Same as L01 Art-Arch 4816

Credit 3 units. Art: AH

---

**L97 GS 4820 War, Migration, and Human Rights**

In this course we will explore the recent history of displacement and human rights; this includes the origins of laws that still govern the lives of refugees and asylum seekers. While migration has been a constant in history, we will center our inquiries on more recent events, beginning in the 1930s and up to the present day. We will pay close attention to several conflicts that led not only to global displacements, but that also raised important questions about human rights. These conflicts include, but are not limited to: the Spanish Civil War, World War II, and the Vietnam War. While most of our more contemporary sources will involve migration to the United States from Latin America, we will also address the present flow of people across visible and invisible borders in other parts of the world. We will work our way through complex arguments about extremely contentious and timely topics and make use of primary sources and secondary literature, fiction, memoirs, film and other media. The last section of the class will center on different research and writing methods.

**L97 GS 4842 The Japanese Empire in Asia, 1874-1945**

This course examines the expansion of the Japanese Empire in Asia from 1874-1945, focusing on Japan's acquisition of neighboring territory and the subsequent building of colonies in Taiwan, Korea, and Manchuria. The course will explore the concepts of imperialism and colonialism, how they functioned in East Asia, and how they intersect with other major developments in Asia, including ideas of civilization and race, the formation of the nation, and the growth of capitalism.

Same as L22 History 4842

**L97 GS 4844 Women and Confucian Culture**

This course explores the lives of women in East Asia during a period when both local elites and central states sought to Confucianize society. The course will focus on Ming (1368-1644) and Qing (1644-1911) China, but will also examine these issues in two other early modern

East Asian societies: Yi/Choson (1392-1910) Korea and Tokugawa (1600-1868) Japan. Course readings are designed to expose students both to a variety of theoretical approaches and to a wide range of topics, including: women's property rights; the medical construction of gender; technology, power and gender; and state regulations on sexuality.

#### **L97 GS 485 Preparation for Global Studies Honors Thesis**

Required for GS senior thesis writers, this course addresses the methods and mechanics of research and writing in GS, concurrently with independent work with the thesis adviser. The seminar provides structure, guidance, and response to your work. Students will already have identified a thesis topic; in the seminar, they will identify a research question and develop a thesis proposal. In workshop format, students will examine one another's research questions, hypotheses, and methods of analysis. In additional sessions, students will learn the basics of several models of electronically assisted research, and they will develop and refine presentation skills through the presentations of their proposals and results at various stages of progress. Prerequisites: 1) a GPA of 3.65 at the time of application to the thesis program; 2) the identification of a thesis adviser; and 3) the approval of the GS Honors Program Director. Attendance is required.  
Credit 3 units.

#### **L97 GS 4854 Gauguin in Polynesia: the Late Career**

This seminar focuses on the late career of Paul Gauguin, in Tahiti and the Marquesas. This course examines closely the colonial context of fin-de-siecle French Polynesia, Gauguin's response to indigenous culture, his ongoing interests in European currents of theosophy and anarchism, the development of his primitivist style in response to the French avant-garde, and Gauguin's legacy to modern art and culture in the early twentieth century. Readings will range from primary texts (literature and journals read by the artist, his letters, his satirical articles and caricatures produced for a Tahitian newspaper, his treatises on religion), to post-colonial theory and recent critiques of primitivism. French reading skills are useful, but not required for the course. We will visit the St. Louis Art Museum to view both the Oceanic collection, and prints and paintings by Gauguin. PRE-REQUISITE: AT LEAST ONE UPPER-LEVEL COURSE IN MODERN ART HISTORY, OR PERMISSION OF THE INSTRUCTOR.

#### **L97 GS 4856 French Art and Politics in the Belle Epoque**

This interdisciplinary seminar addresses the rich intersection of politics, fine arts and visual culture in modern France from the Franco-Prussian War (1870) to the First World War (1914). We will study the political trends, historical events, and cultural conditions of the era, and their direct influence on the production and reception of a wide range of visual arts, ranging from official paintings and monuments to popular culture such as tourist and documentary photography, commercial posters and political caricature. We also examine the question of what it meant in the Belle Epoque to be an avant-garde artist, and how such artists expressed political sentiment in their work. Prerequisites: permission of instructor.

---

#### **L97 GS 4859 Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000**

This seminar examines film and modern art within the framework of "Orientalism" Reading foundational texts by Said, and incorporating theory and historical discourse concerned with race, nationalism, and colonialism, we explore artistic practice in European photography, painting, and decorative arts from 1850 to recent times and European and Hollywood Film. We study how power and desire have been inscribed in western visual culture across the bodies of nations and peoples through conventions such as the harem, the odalisque, the desert, and the mysteries of ancient Egypt. To that end, we will look at artists such as Delacroix, Ingres, Gérôme, Beardsley, and Matisse and will screen films such as *The Sheik*, *The Mummy*, *Salome*, *Cleopatra*, *Pepe le Moko*, *Naked Lunch*, *Shanghai Gesture*, *Thief of Bagdad*, *Princess Tam Tam* and *The Sheltering Sky*. Subjects include the representation of gender, sexuality, desire, race, and identity as well as the cultural impact of stereotype and "exotic" spectacle. Students will study methods of visual analysis in film studies and art history. All students must attend film screenings. 3 credits

#### **L97 GS 4861 Gauguin Then and Now: Art, Myth, and Controversy**

This course is an examination of the art and career of Paul Gauguin (1848-1903) and the artistic, social, and political milieu of colonialism in which he worked in France, Polynesia, and the Caribbean. Topics include avant-garde Impressionist and Symbolist cultures, the power of the art market/dealer system, the artist's writings (in translation), French colonial culture and pervasive myths of island paradise, and the pressing critiques offered today by postcolonial and feminist theory. The final third of the course will focus on the varied global reception of his work in the 20th and 21st centuries as well as controversies surrounding his art, writings, and legacies, particularly among contemporary Pacific Islander artists and artists of color. We will consult local museum collections as possible and perhaps take a class trip to Chicago to see essential collections. Prerequisite: L01 215 or any 300-level course in art history, or permission of instructor.

Same as L01 Art-Arch 4861

---

#### **L97 GS 4864 Exoticism and Primitivism in Modern Art**

An interdisciplinary investigation of the development of exoticism and primitivism in European and American Art from the Enlightenment to the Second World War. Topics include exoticist representations of non-western cultures; the links between colonialism and orientalism; the intersection of discourses on race and gender with exoticism; and the anti-modernist impulse of modernist primitivism. Sample artists and authors include Delacroix, Flaubert, Gauguin, LaFarge, Segalen, Picasso, and Matisse. PREREQUISITE: ANY 300 LEVEL COURSE IN ART HISTORY, PERMISSION OF THE INSTRUCTOR.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L97 GS 4867 The Impressionist Landscape: Style, Place and Global Legacies 1870-1920**

We will consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism, but soon expanded into an avant-garde style that objectified sensation and emotion in the name of truth in representation. We will examine the place of individual perception, the physiology of sight, and theories of the natural in the development of the Impressionist landscape, through the consideration of style, genre, artistic theory, and these artists' investment in particular sites. Furthermore, the social, commercial and critical networks that supported the movement will be analyzed. Particular attention will be given to Monet, and a special exhibition of his water lily paintings on view at the St Louis Art Museum. Other key artists include Degas, Morisot, Renoir, and Cassatt. We will also discuss the relationship of the Impressionist landscape to the development of modernist abstraction, and the aesthetic and nationalist motivations for its appropriation across the globe. Prerequisite: Introduction to Western Art; Introduction to Modern Art, or permission of instructor. Same as L01 Art-Arch 4867

Credit 3 units. A&S IQ: HUM, LCD Art: AH EN: H

---

**L97 GS 4868 Russia and the West: Creating and Representing Identity**

What does the West look like through Russia's eyes, and what does Russia look like through the eyes of the West? And to what extent does this relationship matter to the rest of the world? In this course, students will examine American/European/Russian philosophical and polemical essays, literary texts (novels, poetry, short stories), films, dance/vocal/theatrical performances, architecture, travelogues, autobiographies, visual arts, propaganda, and primary historical documents- from the early 19th century to the Cold War to the present day. Our focus is on how group identity (national, ideological, coalitional, and so forth) intersects with various types of personal or individual identity. This is a discussion-based course and active participation (speaking and listening) each class-day is expected. There will be two short writing assignments and weekly online Canvas discussion and collaboration. Students will research a topic of their choice, culminating in an in-class presentation and final paper or project. No prerequisites. All interested students are welcome.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L97 GS 4869 Reading War and Peace**

What is it like to enter into a fictional world for a semester? In this course we read Leo Tolstoy's War and Peace in its entirety. Set during the Napoleonic wars (1805-1812), War and Peace takes the reader on a panoramic journey from the battlefield to the hay field, from the war room to the ballroom. It is a vivid portrayal of 19th-century Russian society as well as a penetrating examination of the causes and consequences of violence and the nature of love and family dynamics. In our discussions, we explore philosophies of history, issues of social injustice and gender inequality, the psychology of human suffering and joy, questions of literary form and genre, and the very experience of reading a long work of fiction. We begin with a selection of Tolstoy's early works that laid the foundation for War and Peace and conclude with a few of Tolstoy's late works that had an enormous influence on, among others, Mahatma Gandhi. Primary texts are supplemented with literary theory and film. All readings are in English.

---

**L97 GS 4872 Colonial Cities and the Making of Modernity**

Massive urban growth has been a central result of the incorporation of many areas--both central and peripheral--into the global economy in the 19th and 20th centuries. Scholars have long theorized urbanization as a key component of modernity, but they have usually done so by looking at urbanization and modernization from the perspective of the West. This course will investigate the character of cities in the colony

and then use these empirical and analytical entry points to examine critically some theories of modernity. The geographical focus of the course will be primarily on cities in the Middle East, North Africa, and South Asia.

---

**L97 GS 4876 Advanced Seminar in History: Mexican Agriculture: Land, Politics and Development**

Access to and ownership of land has been a major issue in Mexican history. Land tenure in economic development has been a constant source of tension and debate since the 18th century. Paradoxically, land tenure has been put forth as both the obstacle and the solution to the country's modernization. Given its centrality in the construction of the modern period, this course examines liberalism, agrarian revolts, the revolution, the green revolution and neoliberalism through the lens of land issues. This course will also explore how these have shaped and have been shaped by indigenous peoples and peasants, from land disentanglement to the fight against GMO maize. Students will evaluate agrarian reforms, agricultural modernization programs, concepts of and transformations of natural resources, food production/consumption and social policies.

---

**L97 GS 4879 Marking History: Painting and Sculpture After World War II in the U.S., France and Germany**

This seminar focuses on the aesthetic, cultural, and philosophical reactions to the devastating events surrounding World War II and its later reception. We consider artistic developments within a network of international exchange -- biennials as well as gallery and museum exhibitions -- in which France, Germany, and the United States participated equally within a field of visually similar aesthetic responses to a seismic shift in historical consciousness. What distinctive artistic languages emerged after the war to express transformations in historical consciousness and in older ideas about an unfettered subjectivity? In what ways did concepts of trauma with which we live today reshape collective memory and leave their trace on painting and sculpture? Looking at abstraction and semi-abstract works in painting and sculpture, we analyze the works of Jackson Pollock, Willem de Kooning, Alberto Giacometti and Jean Dubuffet, Wols, K.O. Götz, Emil Schuhmacher, and Hans Hartung. Students with reading skills in German or French are encouraged. Prerequisite: L01 215 or permission of instructor.

Same as L01 Art-Arch 4879

### L97 GS 4914 Advanced Seminar in History: Japan in World War II - History and Memory

This course examines the history of World War II in Asia and how it has been remembered in the postwar era. We will trace the war, from the first Japanese military attack on China in 1931 through the US atomic bombings of Hiroshima and Nagasaki in 1945. We will also examine several postwar controversies concerning how the war has been forgotten and remembered in Japan, in the rest of Asia, and in the United States. Goals include grasping the empirical history of the war as a step to becoming familiar with the theories and methods of Memory Studies in History.

Same as L22 History 4914

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM, IS EN: H

---

### L97 GS 4918 Postmodernism

This course explores the complex significance of Italian Postmodernism through an examination of the theoretical arguments and literary works that have shaped the cultural and political debate of the past fifty years. Students will study, among others, the critical theories of "open work" (Umberto Eco), "literature as lie" (Manganelli), and "weak thought" (Gianni Vattimo) that developed from the neo-avant-garde movement of the 1960s. Analysis will focus on the novels of four authors who have had a defining influence on Italian postmodern thought and narrative forms: Carlo Emilio Gadda, Italo Calvino, Luigi Malerba, and Umberto Eco. Course conducted in English; Italian majors read in Italian, others in English translation. Prereq for Italian majors: Ital 307D, or permission of instructor.

Same as L36 Ital 491

Credit 3 units.

---

### L97 GS 4920 The Italian Detective Novel

The detective novel has an unusual and exceptionally brief history in Italy. Only within the past 35 years has an Italian version or, more precisely, subversion of the genre emerged and come to dominate the Italian literary scene. Prominent Italian writers such as Italo Calvino, Umberto Eco, Leonardo Sciascia, and Luigi Malerba have deconstructed the conventions of the detective novel in order to portray the disorder

and arbitrary meaning of the postmodern world. This course will explore the history of the "anti-detective" novel in Italy, and the philosophical and political questions the genre evokes. Readings in Italian and English. Conducted in English.

Same as L36 Ital 492

Credit 3 units. Art: HUM

### L97 GS 4936 The Unmaking and Remaking of Europe: The Literature and History of the Great War of 1914-1918

The Great War of 1914-1918 is one of the most momentous events in history. We can approach its broad European import by reading its literatures comparatively. Far wider than the concerns of any one national ideology, the literature of record represents a profound crisis in the European cultural imaginary. A number of critical and interpretive issues will be in play in our readings, which will move through three major phases. We begin with the powerful immediacy of trench poetry (1914-1919), develop into the constructed narratives of the great postwar novels and memoirs (1920-1931), and then turn toward the retrospect of the 1930s, which is also the prospect on the next, now inevitable, war. The authors featured include combatant and civilian writers, names well-known and not so famous: Mann, Apollinaire, Owen, Pound, Cocteau, H.D., Woolf, Maurois, West, Celine, Joyce, Musil, Eliot, Rosenberg, Sassoon, Graves, Hardy, Trakl, Stramm, Lichtenstein, Péguy, Barbusse, Manning, Jünger, Zweig, Brittain, and Kroner. All readings for class will be in English translation. Our secondary literature will provide approaches to specific texts and models of literary and cultural history that represent the longer-range importance of the war.

### L97 GS 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories

This seminar examines the theory and the cultural history of the collecting of art objects and artifacts from a range of cultures and periods, and it considers how and why both individuals and institutions create collections. What social and psychological factors drive this passion? What are the various cultural, political, and aesthetic priorities that have driven this practice historically? How is cultural patrimony defined, and how do law, the art market, and cross-cultural ethics impact the placement, study, and display of a culture's material heritage? We will build the seminar around the history of collecting in America, with a focus on Midwestern examples and particularly

important case studies in St. Louis. We will consider, for example, the significant local collections built by Joseph and Emily Rauh Pulitzer (modern art) and Morton May (modern and Oceanic art), as well as the histories of both modern European and non-Western collections now owned by St. Louis-area museums. This course will be complemented by various local field trips, including to the Saint Louis Art Museum, the Pulitzer Arts Foundation, the Mildred Lane Kemper Art Museum, and Cahokia Mounds State Historic Site. Prerequisites: L01 113; L01 215; or permission of instructor. One 300-level course in Art History preferred. Same as L01 Art-Arch 4975

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

#### **L97 GS 4976 Global Asia**

This course engages a new methodological approach to Asia that expands beyond the spatial concept of the region as a set of political entities occupying a specific part of the world. Global Asia seeks to open up avenues of inquiry to accommodate the study of flows of people, ideas, and practices across Asia and throughout the world. It provides the opportunity to consider Asian communities as they manifest themselves in different places and different ways. We begin with a survey of past attempts to define, understand, and manage Asia, which resulted in an area studies approach. We then engage transnational and interdisciplinary efforts, and conclude by considering the possibility that Global Asia can challenge and perhaps unseat the reigning epistemologies that exist today.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: IS EN: H

#### **L97 GS 4995 Advanced Seminar in History: Incredible India!**

From Christopher Columbus' misguided search for a mythical notion of India, to the Incredible India branding campaign launched by the Indian State's Department of Tourism, to the allure of yoga and true love, the notion of "India" has its own history. In this Advanced Seminar we trace the invention of India - as a concept - over time. We'll learn how the fabrication of India has proceeded through the centuries, and how the many meanings of "India" coalesce, nimbly side-stepping any popular or professional narrative of Indian history. Mobilizing an array of interdisciplinary tools, we will plot how the fetishization of "India" has itself become a flexible industry, how the management of Indian exceptionalism drives caste expansion. We'll study how the process renders certain subject positions and hierarchies as neutral and hegemonic while violently discarding others; how "India" is a product collectively manufactured, circulated, and consumed by a range of people around the world; the very real work of translation in bringing "India" into our everyday lives and imaginaries. This course fulfills the History major capstone requirement as an Advanced Seminar.

Same as L22 History 49SC

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

#### **L97 GS 49CA Advanced Seminar in History: Religion and the Secular: Struggles over Modernity**

A generation ago, scholars and observers around the world felt assured that modernization would bring the quiet retreat of religion from public life. But the theory of secularization now stands debunked by world events, and a host of questions has been reopened. This course provides students with a forum to think through these issues as they prepare research papers on topics of their own choosing.

## Program Requirements

- **Total units required:** 36

All societies change over time, sometimes for better and sometimes for worse. In this concentration, students explore different conceptions of development and consider why some societies develop while others languish. What accounts for disparities in longevity, wealth, and access to food and health care? How can we explain differences in extreme poverty, malnutrition, and treatable disease? Students consider how societies move from being heavily rural to having higher levels of urbanization. What explains differences in political, civil, and economic liberties? What accounts for differences in gender rights and opportunities? What are the implications of climate change and environmental distress?

## Concentration Objectives

The Global Studies concentration in development offers an interdisciplinary approach to examine why some societies develop politically, socially, and economically while others languish. Students can explore disparities in wealth, political freedoms, gender rights, urbanization, access to basic resources like food and health care, environmental conditions, and social justice.

## General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

### This concentration requires 36 units of course work:

- 3 units of core course work: GS 3020 Global Futures
- 3 units of Research Methods course work (any level)
- 6 units of introductory course work (100-200 level) from two different academic disciplines

- 9 units of advanced course work from the Core Courses list (300-400 level)
- 12 units of advanced course work (300-400 level)
- 3 units of additional course work (any level)

Africa, East Asia, Eurasia, Europe, Latin America, the Middle East, South Asia, and North America are considered world areas for the development concentration. A student must complete two courses in one of these world areas and one course in another world area.

**Note:** A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or world area). Some of these requirements may be completed while abroad.

## Introductory Courses

Students choose two courses from this list, for a total of 6 units:

Code	Title	Units
AFAS 178	First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change	3
AFAS 255	Introduction to Africana Studies	3
Anthro 132	First-Year Seminar: Past Tense, Future Imperfect: The Rise & Fall of Societies & Global Civilization	3
Anthro 160B	Introduction to Cultural Anthropology	3
BEYOND 160	Gender, Youth, and Global Health	3
Biol 2950	Introduction to Environmental Biology	3
Chinese 227C	Chinese Civilization	3
Chinese 270	Sophomore Seminar: U.S.-China Relations: Perceptions and Realities	3
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
EEPS 111	Introduction To Global Climate Change In the 21st Century	3
EEPS 201	Earth and the Environment	4
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3
EEPS 219	Energy and the Environment	3
EnSt 110	Environmental Issues	3
EnSt 290	Sophomore Seminar in Sustainability and the Environment	3
FYP 116	Ampersand: Geographies of Globalization and Development	3
FYP 2242	Ampersand: Migration Policies and Colonialism: Refugee Resettlement and Integration	3
FYP 2243	Ampersand: Mediterranean Migration: Dynamics and Consequences on the EU and MENA	3
GIS 200	Introduction to GIS (U90)	3
GS 111	First-Year Seminar: The Vietnam Wars	3
GS 1133	Ampersand: Legacies of the Silk Road	3

GS 124	First-Year Sem: Bridging London: An Interdisciplinary Exploration of One of the World's Great Cities	3
GS 127	Migration in the Global World: Stories	3
GS 135	First-Year Seminar: Chinatown: Migration, Identity, and Space	3
GS 140	East Asia in the World	3
GS 155	First-Year Seminar: Mapping the World: Introduction to Human Geography	3
GS 207	Crossing Borders: An Introduction to Institutions and Concepts in Global Studies	3
GS 229	Modern European History: Migrations, Nation States, Identities	3
GS 244	Introduction to European Studies	3
GS 280	Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film	3
History 102D	Introduction to Modern European History	3
History 1500	Silver, Slaves and the State: Globalization in the 18th Century	3
History 164	Introduction to World History: The Second World War in World History	3
History 1640	Health and Disease in World History	3
History 2119	First-Year Seminar: Race and Ethnicity in Latin America: Myths, Realities and Identities	3
History 2157	First-Year Seminar: The Meaning of Pakistan: History, Culture, Art	3
IPH 207C	Modern Political Thought: Text & Traditions	3
Japan 226C	Japanese Civilization	3
JIMES 208F	Introduction to Jewish Civilization: History and Identity	3
JIMES 210C	Introduction to Islamic Civilization	3
JIMES 263	Democracies & Dictatorships in the Middle East	3
Korean 223C	Korean Civilization	3
LatAm 165D	Latin America: Nation, Ethnicity and Social Conflict	3
MEC 290	Microeconomics	3
MEC 292	Global Economy	3
Phil 100G	Logic and Critical Analysis	3
Phil 131F	Present Moral Problems	3
Phil 233F	Biomedical Ethics	3
Phil 235F	Introduction to Environmental Ethics	3
Physics 171A	Physics and Society	3
Pol Sci 102B	Introduction to Comparative Politics	3
Pol Sci 103B	International Politics	3
Pol Sci 106	Introduction to Political Theory	3

Pol Sci 2010	Introduction to Environmental Policy	3
Pol Sci 2100	Introduction to Migration Policy and Politics	3
Psych 221	First-Year Seminar: Introduction to Memory Studies	3
RelPol 290	Islamophobia & U.S. Politics	3
SOC 106	Social Problems and Social Issues	3
SOC 2010	The Roots of Ferguson: Understanding Racial Inequality in the Contemporary U.S.	3
SOC 2030	Social Movements	3
SOC 2110	Social Inequality in America	3
SDS 1011	Introduction to Statistics	3
SDS 2200	Elementary Probability and Statistics	3
URST 101	First-Year Seminar: Introduction to Urban Studies	3
WGSS 100B	Introduction to Women, Gender, and Sexuality Studies	3
WGSS 206	Sexuality and the State: Introduction to Sexuality Studies	3
WGSS 270A	Sophomore Seminar: Globalization and its Discontents	3

## Core Courses

Students choose three courses from this list, for a total of 9 units:

Code	Title	Units
Anthro 3206	Global Gender Issues	3
Anthro 3283	Introduction to Global Health	3
Anthro 3391	Economies as Cultural Systems	3
Anthro 3612	Population and Society	3
Anthro 4022	Transnational Reproductive Health Issues: Meanings, Technologies, Practices	3
Anthro 4517	Anthropology and Development	3
Econ 376	International Economics	3
Econ 451	Environmental Policy	3
GS 3020	Global Futures	3
GS 3176	Chinese Economy in World History	3
GS 4201	International Relations of Latin America	3
GS 4204	International Relations of Latin America (WI)	3
GS 4246	State Failure, State Success and Development	3
GS 4414	Gender Analysis for International Affairs	3
GS 4622	Labor and Labor Movements in Global History	3
History 3168	History of Global Capitalism: From Slavery to Neoliberalism	3
History 3194	Environment and Empire	3
History 3404	The Creation of Capitalism	3
History 3593	The Wheels of Commerce: From the Industrial Revolution to Global Capitalism	3

History 3598	The First World War and the Making of Modern Europe	3
IA 511	International Law and Human Rights (U85)	3
IA 519	International Growth and Development, Inequality, and Transitional Justice (U85)	3
IA 535	American Foreign Policy	3
IA 5571	Politics of Global Finance (U85)	3
IA 574	International Relations	3
IA 5772	State Failure, State Success and Development (U85)	3
Pol Sci 3171	Conflict and Security in International Relations	3
Pol Sci 3171	International Conflict Management and Resolution	3
Pol Sci 332B	Energy Politics	3
Pol Sci 3399	Political Violence	3
Pol Sci 373	International Political Economy	3
Pol Sci 4070	Global Justice	3
Pol Sci 4731	Global Political Economy	3
Pol Sci 4792	Globalization and National Politics	3
SOC 3001	Social Theory	3
SOC 4810	Global Structures and Problems	3
WGSS 4154	Decolonization to Globalization: How to End an Empire	3

## Research Methods Courses

Students choose one course from this list, for a total of 3 units:

Code	Title	Units
AFAS 4401	Intersectionality	3
Anthro 3284	Public Health Research and Practice	3
Anthro 4123	Argumentation Through Ethnography	3
Anthro 4253	Researching Fertility, Mortality, and Migration	3
Anthro 4455	Ethnographic Fieldwork: The Politics of Schooling	3
Anthro 4481	Writing Culture	3
Anthro 4803	Advanced GIS Modeling and Landscape Analysis	3
APL 4111	Linguistics and Language Learning	3
ARCH 307X	Community Building	3
CFH 400W	Merle Kling Undergraduate Honors Fellowship Seminar	3
Comp Lit 394	Worldwide Translation: Language, Culture, Technology	3
CSE 131	Introduction to Computer Science	3
DAT 120	Managerial Statistics I	3
DAT 121	Managerial Statistics II	3
Econ 413	Introduction to Econometrics	3
Econ 414	Econometric Techniques (U07)	3

EnSt 380	Applications in GIS	3
GIS 200	Introduction to GIS (U90)	3
GIS 300	Advanced GIS (U90)	3
GIS 303	Digital Cartography (U90)	3
GIS 421	Spatial Data Modeling and Design (U90)	3
GS 318	Learning to Use GIS in Development, Area Studies and International Affairs	3
GS 3248	Intercultural Communication	3
GS 4007	Global Studies Research Methods Proseminar and Assistantship	3
GS 4414	Gender Analysis for International Affairs	3
History 301T	Historical Methods-Transregional History	3
IA 524	Process and Design of Research (U85)	3
IA 5410	Alternative Analytic Techniques for International Affairs (U85)	3
NPM 450	Social Entrepreneurship (only if offered in person)	3
Phil 321G	Philosophy of Science	3
Pol Sci 263	Data Science for Politics	3
Pol Sci 3011	Computational Modeling in the Social Sciences	3
Pol Sci 362	Politics and the Theory of Games	3
Pol Sci 363	Quantitative Political Methodology	3
Pol Sci 4043	Public Policy Analysis, Assessment and Practical Wisdom	3
Pol Sci 4271	Topics in Politics	3
Pol Sci 495	Research Design and Methods	3
Psych 300	Introduction to Psychological Statistics	3
SOC 3050	Statistics for Sociology	3
SDS 1011	Introduction to Statistics	3
SDS 2200	Elementary Probability and Statistics	3
SDS 3200	Elementary to Intermediate Statistics and Data Analysis	3
SDS 475	Statistical Computation	3

## Advanced Courses

Students choose five courses from current, relevant, internationally focused course offerings in the following departments.\* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage and concentration course list for the full list of options.

- African and African-American Studies
- Anthropology
- Applied Linguistics
- Arabic
- Architecture
- Art History
- Biology and Biomedical Sciences
- Chinese
- Classics

- Earth, Environmental, and Planetary Sciences
- East Asian Languages and Cultures
- Economics
- Education
- Environmental Studies
- Film and Media Studies
- Finance (Business School)
- German
- Global Studies
- History
- Interdisciplinary Studies
- Italian
- Jewish, Islamic, and Middle Eastern Studies
- Korean
- Latin American Studies
- Management (Business School)
- Philosophy
- Political Science
- Psychological and Brain Sciences
- Religion and Politics
- Religious Studies
- Russian
- Social Administration (Social Work)
- Sociology
- Spanish
- School of Continuing & Professional Studies — International Affairs; International Studies; Nonprofit Management; Sustainability (only when courses are offered in person)
- Women, Gender, and Sexuality Studies

\* Students may submit a request to add a course by following the instructions for the Petition Process.

## Additional Requirements and Information

### Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 300 or 400 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.

- Study abroad credit only counts at the 300 level.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, the School of Continuing & Professional Studies, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit form with Arts & Sciences to take the course for "general credit" and then petition to have the course count as an elective toward their Global Studies major.
- Students may not receive credit for January Intensive Term (J-Term) study abroad programs; these programs are too short in duration.

### Latin Honors

- Students must confidently expect to graduate with an overall grade point average of 3.65 or higher to qualify for Latin Honors.
- Students should enroll in GS 485 Preparation for Global Studies Honors Thesis during the fall of senior year and in GS 486 Global Studies Senior Honors Thesis during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

### Language Requirement

All Global Studies majors must satisfy a language requirement that entails both the successful completion of four semesters of a modern language for a letter grade and placement into the third year of that language.

Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili.

Students should consult the course listings for details about the language sequences. (On the "A&S IQ" tab, click on "Courses," and then toggle "Area Requirement" to "LS Language & Cultural Diversity-Language." Click "Search" to see a list of available language courses.)

Please see the FAQs on the Global Studies website for more information.

## Global Studies Major, Eurasian Studies Concentration

### Program Requirements

- **Total units required:** 36

This concentration focuses on the social, cultural, and economic interconnections among the peoples of Eurasia. We define Eurasia as the vast landmass stretching east to west from China to Europe and north to south from Siberia into the Caucasus, the Crimean Peninsula, Central Asia, and the Himalayas. Ancient trade routes that crisscrossed the interior spaces of Europe and Asia, known collectively as the Silk Road, served as a globalizing thoroughfare for the movement of peoples, cultural practices, religious values, and commodities. Recent infrastructural improvements in these areas — as well as international economic, environmental, and political concerns — have once again opened up transnational economic networks and cross-cultural exchange along these "new silk roads."

## Concentration Objectives

For the Eurasian Studies concentration, students draw from a variety of disciplines to study not only specific geographical regions but also vital intersections and interrelationships among regions and peoples.

## General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

### This concentration requires 36 units of course work:

- 3 units of core course work: GS 3020 Global Futures
- 6 units of introductory course work (100-200 level)
- 27 units of advanced Eurasian studies course work (300-400 level) dealing with three different regions (e.g., Eastern, Western, and Central Eurasia) or with a transregional focus
- Students must fulfill the standard Global Studies language requirement with Arabic, Chinese, Hebrew, Hindi, Persian, Russian, or another Eurasian language as determined in consultation with their Global Studies advisor.
- The study abroad location must be in a country relevant to this concentration area. Otherwise, the student will not meet the study abroad requirement and will need to complete an additional 300- or 400-level course on campus.

**Note:** A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or regional). Some of these requirements may be completed while abroad.

## Advanced Courses

Students choose nine courses from current, relevant, internationally focused course offerings in the following areas of study.\* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage and concentration course list for the full list of options.

\* Students may submit a request to add a course by following the instructions for the Petition Process.

# Global Studies Major, European Studies Concentration

## Program Requirements

- **Total units required:** 36

This concentration focuses on the new Europe and its historical and cultural contexts, attempting to understand the European contribution to world politics and cultural exchange. It involves the study of both traditional and new European cultural products (e.g., literature, film, visual art, electronic media) as well as of European institutions and contexts. This concentration will educate students interested in understanding Europe for its own sake but also help them to discover the ways in which the continent connects with other parts of the world. The concentration is committed to interdisciplinary approaches, and students may take courses in the traditional language-and-literature disciplines as well as in anthropology, art history, economics, film, history, music, philosophy, and political science.

## Concentration Objectives

The European Studies concentration defines the geography of modern Europe to include the Atlantic world as well as its Eurasian and Mediterranean neighbors.

## General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

### This concentration requires 36 units of course work:

- 3 units of core course work: GS 3020 Global Futures
- 3 units of introductory course work (100 or 200 level)
- 3 units of European history course work (300 level or above from history department offerings on Europe [from 1750 forward])
- 3 units of non-European world area course work (any level)
- 24 units of advanced European studies course work (300-400 level; at least one course must focus on gender, race, or class)
- Students must fulfill the standard Global Studies language requirement with a European language consistent with their study abroad location (e.g., French, German, Italian, Portuguese, Spanish).

**Note:** A single course may satisfy more than one of the distribution requirements (i.e., disciplinary; race, gender, class; or world area). Some of these requirements may be completed while abroad.

## Introductory Courses

Students choose one course from this list, for a total of 3 units:

Code	Title	Units
GS 207	Crossing Borders: An Introduction to Institutions and Concepts in Global Studies	3
GS 244	Introduction to European Studies (preferred)	3
History 102D	Introduction to Modern European History	3

## Non-European Area Courses

Students choose one course, for a total of 3 units. We consider world areas to be Africa, East Asia, Eurasia, Latin America, the Middle East, and South Asia. Courses that may be used to satisfy this requirement may include advanced area-specific courses or the following lower-level courses:

Code	Title	Units
AFAS 209B	African Studies: An Introduction	3
Art-Arch 111	Introduction to Asian Art	3
Chinese 227C	Chinese Civilization	3
GS 135	First-Year Seminar: Chinatown: Migration, Identity, and Space	3
GS 140	East Asia in the World	3
GS 280	Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film	3
History 2157	First-Year Seminar: The Meaning of Pakistan: History, Culture, Art	3
Japan 226C	Japanese Civilization	3
JIMES 208F	Introduction to Jewish Civilization: History and Identity	3
JIMES 210C	Introduction to Islamic Civilization	3
Korean 223C	Korean Civilization	3
LatAm 165D	Latin America: Nation, Ethnicity and Social Conflict	3

## Advanced Courses

Students choose nine courses from current European-focused course offerings in the following departments.\* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage and concentration course list for the full list of options.

- African and African-American Studies
- Anthropology
- Applied Linguistics
- Art History
- Classics
- Drama
- Economics
- Education
- Film and Media Studies
- Global Studies
- History
- Interdisciplinary Project in the Humanities
- Jewish, Islamic and Middle Eastern Studies
- Languages and Literatures
- Music
- Philosophy

- Political Science
- Sociology
- Women, Gender, and Sexuality Studies

\* Students may submit a request to add a course by following the instructions for the Petition Process.

## Additional Requirements and Information

### Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 300 or 400 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Study abroad credit only counts at the 300 level.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, the School of Continuing & Professional Studies, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit form with Arts & Sciences to take the course for "general credit" and then petition to have the course count as an elective toward their Global Studies major.
- Students may not receive credit for January Intensive Term (J-Term) study abroad programs; these programs are too short in duration.

### Latin Honors

- Students must confidently expect to graduate with an overall grade point average of 3.65 or higher to qualify for Latin Honors.
- Students should enroll in GS 485 Preparation for Global Studies Honors Thesis during the fall of senior year and in GS 486 Global Studies Senior Honors Thesis during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

### Language Requirement

All Global Studies majors must satisfy a language requirement that entails both the successful completion of four semesters of a modern language for a letter grade and placement into the third year of that language.

Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili.

Students should consult the course listings for details about the language sequences. (On the "A&S IQ" tab, click on "Courses," and then toggle "Area Requirement" to "LS Language & Cultural Diversity-Language." Click "Search" to see a list of available language courses.)

Please see the FAQs on the Global Studies website for more information.

## Global Studies Major, Global Asias Concentration

### Program Requirements

- **Total units required:** 36

Global Asias provides the means for students to study Asia transnationally and transculturally, thereby expanding the geographic concept of the region beyond a set of political entities occupying a specific world region. East Asia, South Asia, Southeast Asia, Central Asia, and the Asian diaspora are all part of this concentration, with the goal of recognizing that the flows of people, objects, ideas, and practices of Asia have spread across the region and around the globe.

### Concentration Objectives

Drawing on a range of approaches, the Global Asias concentration provides the means to study Asia in its many manifestations — in the past and in the present — in our world today.

### General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

#### This concentration requires 36 units of course work:

- 3 units of introductory course work (100-200 level)
- 3 units of core course work: GS 3020 Global Futures
- 3 units of core course work: GS 4976 Global Asias
- 6 units of multiethnic, diaspora, transnational, or transregional Asia-related course work (at least 3 units at the 300-400 level)
- 21 units of advanced Global Asias course work (300-400 level; at least one course must focus on premodern Asias [pre-1850])
- East Asia, North Asia, South Asia, Southeast Asia, Central Asia, and the Asian diaspora are the relevant areas for the Global Asias concentration. A student must complete one course in at least three of these areas or with a transregional focus.
- Students must fulfill the standard Global Studies language requirement with Arabic, Chinese, Hindi, Japanese, Korean, or Urdu. Russian may be considered upon petition if a student is a native speaker of one of the listed languages or has tested into the fourth year of one of the listed languages.
- The study abroad location must be in a country relevant to this concentration area. Otherwise, the student will not meet the study abroad requirement and will need to complete an additional 300- or 400-level course on campus.

**Note:** A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or regional). Some of these requirements may be completed while abroad.

### Introductory Courses

Students choose one course from this list, for a total of 3 units:

Code	Title	Units
Art-Arch 111	Introduction to Asian Art	3
Art-Arch 146	First Year Seminar: Beijing and the Forbidden City	3
AAS 200	Doctors and Terrorists: The Fictions of South Asian America	3
Chinese 227C	Chinese Civilization	3
GS 111	First-Year Seminar: The Vietnam Wars	3
GS 135	First-Year Seminar: Chinatown: Migration, Identity, and Space	3
GS 207	Crossing Borders: An Introduction to Institutions and Concepts in Global Studies	3
History 193	First-Year Seminar: Silk Roads and Empires	3

History 2157	First-Year Seminar: The Meaning of Pakistan: History, Culture, Art	3
Japan 226C	Japanese Civilization	3
JIMES 210C	Introduction to Islamic Civilization	3
Korean 223C	Korean Civilization	3

## Multiethnic, Diaspora, Transnational, or Transregional Asia-Related Courses

Students choose two courses from this list, for a total of 6 units; at least one course must be at the 300 or 400 level:

Code	Title	Units
AMCS 202	The Immigrant Experience	3
Anthro 3102	Topics in Anthropology: Sustainability in Extractive Communities	3
Anthro 3313	Women and Islam	3
Anthro 3775	Ancient Eurasia and the New Silk Roads	3
Anthro 4033	Culture, Illness, and Healing in Asia	3
Art-Arch 144	FYS: Collecting Art/Excluding People: The Contradictions of Chinese Art in U.S. Museums	3
Art-Arch 4494	East, Meet West: Asia Encounters Europe	3
AAS 200	Doctors and Terrorists: The Fictions of South Asian America	3
Chinese 330	Topics in Chinese Literature and Culture	3
Chinese 350	U.S.-China Relations from 1949 to the Present	3
Chinese 4891	Topics in Chinese Literature and Culture	3
Comp Lit 375	Topics in Comparative Literature: Representation and Memory in St. Louis Museums	3
Film 443	Memory, Tears, and Longing: East Asian Melodrama Film	3
FYP 116	Ampersand: Geographies of Globalization and Development	3
FYP 2243	Ampersand: Mediterranean Migration: Dynamics and Consequences on the EU and MENA	3
GS 111	First-Year Seminar: The Vietnam Wars	3
GS 1133	Ampersand: Legacies of the Silk Road	3
GS 127	Migration in the Global World: Stories	3
GS 135	First-Year Seminar: Chinatown: Migration, Identity, and Space	3
GS 140	East Asia in the World	3
GS 155	First-Year Seminar: Mapping the World: Introduction to Human Geography	3
GS 280	Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film	3
GS 3512	"Model Minority": The Asian American Experience	3

GS 3822	From McDonald's to K-pop: New Movements in East Asia	3
GS 386	Empire in East Asia: Theory and History (WI)	3
GS 4036	Children of Immigrants: Identity and Acculturation	3
History 193	First-Year Seminar: Silk Roads and Empires	3
History 2062	Sophomore Seminar	3
History 301T	Historical Methods-Transregional History	3
History 3165	Chinese Diasporas	3
History 3167	Economic History of China: From the Silver Age to Reform and Opening, 1500-1990	3
History 3192	Modern South Asia	3
History 3194	Environment and Empire	3
History 3455	Cultural Encounters: China and Eurasia Since the Middle Ages	3
History 39SC	Imperialism and Sexuality: India, South Asia and the World: Writing-Intensive Seminar	3
History 4154	Decolonization to Globalization: How to End an Empire	3
History 4872	Colonial Cities and the Making of Modernity	3
History 4914	Advanced Seminar: Japan in World War II- History and Memory	3
History 5376	Science and Technology in East Asia	3
JIMES 210C	Introduction to Islamic Civilization	3
JIMES 351	Muhammad: His Life and Legacy	3
JIMES 354	Anthropological and Sociological Study of Muslim Societies	3
Re St 3090	Chinese Thought	3
Re St 311	Buddhist Traditions	3
Re St 403	Topics in East Asian Religion and Thought	3

## Advanced Courses

Students choose seven courses from current, relevant, internationally focused course offerings in the following departments.\* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage and concentration course list for the full list of options.

\* Students may submit a request to add a course by following the instructions for the Petition Process.

- Anthropology

Code	Title	Units
Anthro 3055	Contemporary Chinese Culture and Society	3
Anthro 3102	Topics in Anthropology: Sustainability in Extractive Communities	3

## Global Studies Major, Global Cultural Studies Concentration

### Program Requirements

- **Total units required:** 36

The concentration in Global Cultural Studies focuses on the practical and theoretical issues arising from cross-cultural encounters around the world. Students will study these issues by both examining conventional cultural products (e.g., literature, film, visual art, new media) and investigating their broader political and social contexts. This concentration addresses compelling issues of cultural interchange for students interested in cultures for their own sake as well as in careers in NGOs and international business and law.

### Concentration Objectives

The Global Cultural Studies concentration is committed to interdisciplinary approaches to contemporary problems. Students may take courses in the language and literature disciplines as well as in anthropology; art history; film; history; music; religious studies; and women, gender, and sexuality studies.

### General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

#### This concentration requires 36 units of course work:

- 3 units of core course work: GS 3020 Global Futures
- 6 units of disciplinary introductions and methods course work (from two different disciplines; 100-200 level)
- 9 units of world area course work (any level)\*
- 18 units of advanced course work (at least one course must focus on gender, race, or class) (300-400 level)

\* Of the three required world area courses, one must be at the advanced level. The other two courses may be taken at any level.

Africa, East Asia, Eurasia, Europe, Latin America, the Middle East, South Asia, and North America are considered world areas for the Global Cultural Studies concentration. A student must complete two courses in one of these world areas and one course in another world area.

**Note:** A single course may satisfy more than one of the distribution requirements (i.e., disciplinary; gender, race, class; or world area). Some of these requirements may be completed while abroad.

### Disciplinary Introductory and Methods Courses

Students choose two courses from this list,\* for a total of 6 units:

Code	Title	Units
AFAS 255	Introduction to Africana Studies	3

WGSS 104	First-Year Seminar: Gender, Sexuality and Settler Colonialism	3
WGSS 105	Introduction to Sexuality Studies	3
WGSS 206	Sexuality and the State: Introduction to Sexuality Studies	3
WGSS 270A	Sophomore Seminar: Globalization and its Discontents	3

\* Students may submit a request to add a course by following the instructions for the Petition Process.

## World Area Courses

Of the three required world area courses, one must be at the advanced level, and it will be counted toward the 21 credits of advanced work needed to complete the major. The other two courses may be taken at any level. Examples of lower-level courses that may be used to satisfy this requirement include the following:

Code	Title	Units
AFAS 178	First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change	3
AFAS 209B	African Studies: An Introduction	3
AFAS 255	Introduction to Africana Studies	3
Chinese 227C	Chinese Civilization	3
GS 111	First-Year Seminar: The Vietnam Wars	3
GS 140	East Asia in the World	3
GS 229	Modern European History: Migrations, Nation States, Identities	3
GS 244	Introduction to European Studies	3
GS 280	Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film	3
History 102D	Introduction to Modern European History	3
History 2157	First-Year Seminar: The Meaning of Pakistan: History, Culture, Art	3
Japan 226C	Japanese Civilization	3
JIMES 208F	Introduction to Jewish Civilization: History and Identity	3
JIMES 210C	Introduction to Islamic Civilization	3
Korean 223C	Korean Civilization	3
LatAm 165D	Latin America: Nation, Ethnicity and Social Conflict	3

## Advanced Courses

Students choose eight courses from current, relevant, internationally focused course offerings in the following departments.\* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage and concentration course list for the full list of options.

- African and African-American Studies
- Anthropology
- Applied Linguistics
- Architecture
- Art History
- Children's Studies
- Classics
- Dance

- Drama
- Economics
- Environmental Studies
- Film and Media Studies
- Global Studies
- History
- Interdisciplinary Project in the Humanities
- International Affairs (School of Continuing & Professional Studies)
- International Studies (School of Continuing & Professional Studies)
- Jewish, Islamic and Middle Eastern Studies
- Languages and Literatures
- Latin American Studies
- Music
- Philosophy
- Political Science
- Psychological and Brain Sciences
- Religion and Politics
- Religious Studies
- Sociology
- Women, Gender, and Sexuality Studies

\* Students may submit a request to add a course by following the instructions for the Petition Process.

## Additional Requirements and Information

### Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 300 or 400 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Study abroad credit only counts at the 300 level.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, the School of Continuing & Professional Studies, summer school at other U.S. universities, or any combination thereof.

- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit form with Arts & Sciences to take the course for "general credit" and then petition to have the course count as an elective toward their Global Studies major.
- Students may not receive credit for January Intensive Term (J-Term) study abroad programs; these programs are too short in duration.

### Latin Honors

- Students must confidently expect to graduate with an overall grade point average of 3.65 or higher to qualify for Latin Honors.
- Students should enroll in GS 485 Preparation for Global Studies Honors Thesis during the fall of senior year and in GS 486 Global Studies Senior Honors Thesis during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

### Language Requirement

All Global Studies majors must satisfy a language requirement that entails both the successful completion of four semesters of a modern language for a letter grade and placement into the third year of that language.

Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili.

Students should consult the course listings for details about the language sequences. (On the "A&S IQ" tab, click on "Courses," and then toggle "Area Requirement" to "LS Language & Cultural Diversity-Language." Click "Search" to see a list of available language courses.)

Please see the FAQs on the Global Studies website for more information.

## Global Studies Major, International Affairs Concentration

### Program Requirements

- **Total units required:** 36

Why do states, nations, and societies cooperate, compromise, and fight? Living and working in our rapidly changing global arena presents great opportunities to advance the human condition, improve political and civil liberties, recast bargains between governments and their societies, transform social welfare, and advance the boundaries of

knowledge and scientific exploration. Yet, this same context presents great risks as people fear loss of identity, worry about economic subordination and loss to those beyond their borders, encounter the export of environmental degradation, and confront potential decline in personal and social autonomy. Students can explore the heightened economic, political, social, cultural, and environmental interdependence that generates prospects for cooperation; at the same time, this interdependence involves serious challenges, which create the possibility for conflict but also for compromise.

## Concentration Objectives

The concentration in International Affairs offers an interdisciplinary approach to understanding relations between societies. It provides opportunities to examine complex global issues and processes from multiple perspectives and to help understand the fundamental processes of cooperation, compromise, and conflict in the global arena. The program provides students with knowledge and skills for understanding and working with difficult international and cross-cultural problems that states, societies, and communities face.

## General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

### This concentration requires 36 units of course work:

- 3 units of core course work: GS 3020 Global Futures
- 3 units of Research Methods course work (any level)
- 6 units of introductory course work (100-200 level) from two different academic disciplines
- 9 units of advanced course work from the Core Courses list (300-400 level)
- 12 units of advanced course work (300-400 level)
- 3 units of additional course work (any level)

Africa, East Asia, Eurasia, Europe, Latin America, the Middle East, South Asia, and North America are considered world areas for the International Affairs concentration. A student must complete two courses in one of these world areas and one course in another world area.

**Note:** A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or world area). Some of these requirements may be completed while abroad.

## Introductory Courses

Students choose two courses from this list, for a total of 6 units:

Code	Title	Units
AFAS 178	First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change	3
AFAS 255	Introduction to Africana Studies	3
Anthro 132	First-Year Seminar: Past Tense, Future Imperfect: The Rise & Fall of Societies & Global Civilization	3
Anthro 160B	Introduction to Cultural Anthropology	3
BEYOND 160	Gender, Youth, and Global Health	3
Biol 2950	Introduction to Environmental Biology	3
Chinese 227C	Chinese Civilization	3
Chinese 270	Sophomore Seminar: U.S.-China Relations: Perceptions and Realities	3
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
EEPS 111	Introduction To Global Climate Change In the 21st Century	3
EEPS 201	Earth and the Environment	4
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3
EEPS 219	Energy and the Environment	3
EnSt 110	Environmental Issues	3
EnSt 290	Sophomore Seminar in Sustainability and the Environment	3
FYP 116	Ampersand: Geographies of Globalization and Development	3
FYP 2242	Ampersand: Migration Policies and Colonialism: Refugee Resettlement and Integration	3
FYP 2243	Ampersand: Mediterranean Migration: Dynamics and Consequences on the EU and MENA	3
GIS 200	Introduction to GIS (U90)	3
GS 111	First-Year Seminar: The Vietnam Wars	3
GS 1133	Ampersand: Legacies of the Silk Road	3
GS 124	First-Year Sem: Bridging London: An Interdisciplinary Exploration of One of the World's Great Cities	3
GS 127	Migration in the Global World: Stories	3
GS 135	First-Year Seminar: Chinatown: Migration, Identity, and Space	3
GS 140	East Asia in the World	3
GS 155	First-Year Seminar: Mapping the World: Introduction to Human Geography	3

GS 207	Crossing Borders: An Introduction to Institutions and Concepts in Global Studies	3
GS 229	Modern European History: Migrations, Nation States, Identities	3
GS 244	Introduction to European Studies	3
GS 280	Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film	3
History 102D	Introduction to Modern European History	3
History 1500	Silver, Slaves and the State: Globalization in the 18th Century	3
History 164	Introduction to World History: The Second World War in World History	3
History 1640	Health and Disease in World History	3
History 2119	First-Year Seminar: Race and Ethnicity in Latin America: Myths, Realities and Identities	3
History 2157	First-Year Seminar: The Meaning of Pakistan: History, Culture, Art	3
IPH 207C	Modern Political Thought: Text & Traditions	3
Japan 226C	Japanese Civilization	3
JIMES 208F	Introduction to Jewish Civilization: History and Identity	3
JIMES 210C	Introduction to Islamic Civilization	3
JIMES 263	Democracies & Dictatorships in the Middle East	3
Korean 223C	Korean Civilization	3
LatAm 165D	Latin America: Nation, Ethnicity and Social Conflict	3
MEC 290	Microeconomics	3
MEC 292	Global Economy	3
Phil 100G	Logic and Critical Analysis	3
Phil 131F	Present Moral Problems	3
Phil 233F	Biomedical Ethics	3
Phil 235F	Introduction to Environmental Ethics	3
Physics 171A	Physics and Society	3
Pol Sci 102B	Introduction to Comparative Politics	3
Pol Sci 103B	International Politics	3
Pol Sci 106	Introduction to Political Theory	3
Pol Sci 2010	Introduction to Environmental Policy	3
Pol Sci 2100	Introduction to Migration Policy and Politics	3
Psych 221	First-Year Seminar: Introduction to Memory Studies	3
RelPol 290	Islamophobia & U.S. Politics	3
SDS 1011	Introduction to Statistics	3
SDS 2200	Elementary Probability and Statistics	3
SOC 106	Social Problems and Social Issues	3

SOC 2010	The Roots of Ferguson: Understanding Racial Inequality in the Contemporary U.S.	3
SOC 2030	Social Movements	3
SOC 2110	Social Inequality in America	3
URST 101	First-Year Seminar: Introduction to Urban Studies	3
WGSS 100B	Introduction to Women, Gender, and Sexuality Studies	3
WGSS 206	Sexuality and the State: Introduction to Sexuality Studies	3
WGSS 270A	Sophomore Seminar: Globalization and its Discontents	3

## Core Courses

Students choose three courses from this list, for a total of 9 units:

Code	Title	Units
Anthro 3206	Global Gender Issues	3
Anthro 3283	Introduction to Global Health	3
Anthro 3391	Economies as Cultural Systems	3
Anthro 3612	Population and Society	3
Anthro 4022	Transnational Reproductive Health Issues: Meanings, Technologies, Practices	3
Anthro 4517	Anthropology and Development	3
Econ 376	International Economics	3
Econ 451	Environmental Policy	3
GS 3020	Global Futures	3
GS 3176	Chinese Economy in World History	3
GS 4201	International Relations of Latin America	3
GS 4204	International Relations of Latin America (WI)	3
GS 4246	State Failure, State Success and Development	3
GS 4414	Gender Analysis for International Affairs	3
GS 4622	Labor and Labor Movements in Global History	3
History 3168	History of Global Capitalism: From Slavery to Neoliberalism	3
History 3194	Environment and Empire	3
History 3404	The Creation of Capitalism	3
History 3593	The Wheels of Commerce: From the Industrial Revolution to Global Capitalism	3
History 3598	The First World War and the Making of Modern Europe	3
IA 511	International Law and Human Rights (U85)	3
IA 519	International Growth and Development, Inequality, and Transitional Justice (U85)	3
IA 535	American Foreign Policy (U85)	3
IA 5571	Politics of Global Finance (U85)	3
IA 574	International Relations (U85)	3

IA 5772	State Failure, State Success and Development (U85)	3
Pol Sci 3171	Conflict and Security in International Relations	3
Pol Sci 3171	International Conflict Management and Resolution	3
Pol Sci 332B	Energy Politics	3
Pol Sci 339	Political Violence	3
Pol Sci 373	International Political Economy	3
Pol Sci 4070	Global Justice	3
Pol Sci 4731	Global Political Economy	3
Pol Sci 4792	Globalization and National Politics	3
SOC 3001	Social Theory	3
SOC 4810	Global Structures and Problems	3
WGSS 4154	Decolonization to Globalization: How to End an Empire	3

## Research Methods Courses

Students choose course one from this list, for a total of 3 units:

Code	Title	Units
AFAS 4401	Intersectionality	3
Anthro 3284	Public Health Research and Practice	3
Anthro 4123	Argumentation Through Ethnography	3
Anthro 4253	Researching Fertility, Mortality, and Migration	3
Anthro 4455	Ethnographic Fieldwork: The Politics of Schooling	3
Anthro 4481	Writing Culture	3
Anthro 4803	Advanced GIS Modeling and Landscape Analysis	3
APL 4111	Linguistics and Language Learning	3
ARCH 307X	Community Building	3
CFH 400W	Merle Kling Undergraduate Honors Fellowship Seminar	3
Comp Lit 394	Worldwide Translation: Language, Culture, Technology	3
CSE 131	Introduction to Computer Science	3
DAT 120	Managerial Statistics I	3
DAT 121	Managerial Statistics II	3
Econ 413	Introduction to Econometrics	3
Econ 414	Econometric Techniques (U07)	3
EnSt 380	Applications in GIS	3
GIS 200	Introduction to GIS (U90)	3
GIS 300	Advanced GIS (U90)	3
GIS 303	Digital Cartography (U90)	3
GIS 421	Spatial Data Modeling and Design (U90)	3
GS 318	Learning to Use GIS in Development, Area Studies and International Affairs	3
GS 3248	Intercultural Communication	3

GS 4007	Global Studies Research Methods Proseminar and Assistantship	3
GS 4414	Gender Analysis for International Affairs	3
History 301T	Historical Methods-Transregional History	3
IA 524	Process and Design of Research (U85)	3
IA 5410	Alternative Analytic Techniques for International Affairs (U85)	3
NPM 450	Social Entrepreneurship (only if offered in person)	3
Phil 321G	Philosophy of Science	3
Pol Sci 263	Data Science for Politics	3
Pol Sci 3011	Computational Modeling in the Social Sciences	3
Pol Sci 362	Politics and the Theory of Games	3
Pol Sci 363	Quantitative Political Methodology	3
Pol Sci 4043	Public Policy Analysis, Assessment and Practical Wisdom	3
Pol Sci 4271	Topics in Politics	3
Pol Sci 495	Research Design and Methods	3
Psych 300	Introduction to Psychological Statistics	3
SDS 1011	Introduction to Statistics	3
SDS 2200	Elementary Probability and Statistics	3
SDS 3200	Elementary to Intermediate Statistics and Data Analysis	3
SDS 475	Statistical Computation	3
SOC 3050	Statistics for Sociology	3

## Advanced Courses

Students choose five courses from current, relevant, internationally focused course offerings in the following departments.\* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage and concentration course list for the full list of options.

- African and African-American Studies
- Anthropology
- Applied Linguistics
- Arabic
- Architecture
- Art History
- Biology and Biomedical Sciences
- Chinese
- Classics
- Earth, Environmental, and Planetary Science
- East Asian Languages and Cultures
- Economics
- Education
- Environmental Studies
- Film and Media Studies
- Finance (Olin Business School)

- German
- Global Studies
- History
- Interdisciplinary Studies
- Italian
- Jewish, Islamic and Middle Eastern Studies
- Korean
- Latin American Studies
- Management (Olin Business School)
- Philosophy
- Political Science
- Psychological and Brain Sciences
- Religion and Politics
- Religious Studies
- Russian
- Social Administration (Social Work)
- Sociology
- Spanish
- School of Continuing & Professional Studies — International Affairs; International Studies; Nonprofit Management; Sustainability (only when courses are offered in person)
- Women, Gender, and Sexuality Studies

\* Students may submit a request to add a course by following the instructions for the Petition Process.

## Additional Requirements and Information

### Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 300 or 400 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Study abroad credit only counts at the 300 level.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, the School of Continuing & Professional Studies, summer school at other U.S. universities, or any combination thereof.

- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit form with Arts & Sciences to take the course for "general credit" and then petition to have the course count as an elective toward their Global Studies major.
- Students may not receive credit for January Intensive Term (J-Term) study abroad programs; these programs are too short in duration.

### Latin Honors

- Students must confidently expect to graduate with an overall grade point average of 3.65 or higher to qualify for Latin Honors.
- Students should enroll in GS 485 Preparation for Global Studies Honors Thesis during the fall of senior year and in GS 486 Global Studies Senior Honors Thesis during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

### Language Requirement

All Global Studies majors must satisfy a language requirement that entails both the successful completion of four semesters of a modern language for a letter grade and placement into the third year of that language.

Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili.

Students should consult the course listings for details about the language sequences. (On the "A&S IQ" tab, click on "Courses," and then toggle "Area Requirement" to "LS Language & Cultural Diversity-Language." Click "Search" to see a list of available language courses.)

## History

The Department of History engages its students through a study of the past. We are committed to the idea that the most compelling stories are often the most revealing ones. In addition to teaching students the particular skills of historical inquiry, we provide them with tools that serve them beyond their majors and beyond the university.

The discipline of history poses challenging questions about the ways that human beings have made the worlds they live in. There are many approaches to history. Some historians study politics, whether that means political parties or the ways that people who never held public office nonetheless act to shape public life. Others study the lived experience of everyday Americans or the popular culture that reflects how people understand the world around them. Still others are especially interested in the kinds of stories about the past that we tell

ourselves, for those stories reveal a great deal about our own society as well as that of a different time. Although it is not true that history repeats itself, it is true that, without knowledge of the past, we are unable to understand the present.

The Department of History at Washington University offers history majors and minors the opportunity to develop a coherent and challenging program of study. We also encourage all undergraduates to incorporate the discipline of historical thinking into their liberal arts education. In all courses, students are taught the kinds of skills that will help them succeed both in classes at Washington University and in their postgraduate careers. History students learn to read carefully, think critically, research honestly, and present information and ideas clearly and concisely, both verbally and in writing.

The Department of History offers a wide variety of courses, ranging from the ancient world to the present and spanning across Africa, Asia, the Middle East, Europe, and the Americas. There are many opportunities for small-group learning and discussion in first-year seminars, sophomore honors colloquia, writing-intensive seminars, and advanced seminars. The history major is structured to be flexible and to encourage students both to pursue established interests and to explore topics, time periods, and locales that may be less familiar.

The Department of History prides itself on the individual attention that faculty mentors provide to students. Graduates express great satisfaction with their experiences in the major, specifically mentioning the faculty's knowledge of the subject matter, dynamic teaching styles, and respect for students.

Some history majors go on to pursue graduate work in the field and become professional historians, but most find that the knowledge and skills they build through history courses prepare them for a wide range of careers. Our graduates have attended law and medical schools and have pursued careers in government, education, research, business, communications, international agencies, publishing, museums and archives, public advocacy, and many other fields.

## Faculty

### Chair

#### **Corinna Treitel**

William Eliot Smith Professor of History  
PhD, Harvard University  
Modern European History

### Director of Graduate Studies

#### **Steve Hindle**

Derek Hirst Endowed Professor of Early Modern British History  
PhD, University of Cambridge  
Early Modern European History

### Director of Undergraduate Studies

#### **Peter J. Kastor**

Samuel K. Eddy Professor  
PhD, University of Virginia  
U.S. History

### Department Faculty

#### **Cassie Adcock**

Associate Professor  
PhD, University of Chicago  
Modern South Asian History

#### **Iver Bernstein**

Professor  
PhD, Yale University  
U.S. History and the Civil War

#### **Daniel Bornstein**

Stella K. Darrow Professor of Catholic Studies  
PhD, University of Chicago  
Early Modern European History

#### **Flora Cassen**

Associate Professor  
PhD, New York University  
Jewish History, Early Modern Europe

#### **Shefali Chandra**

Associate Professor  
PhD, University of Pennsylvania  
Modern South Asian History

#### **Douglas Flowe**

Associate Professor  
PhD, University of Rochester  
U.S. History

#### **Christine R. Johnson**

Associate Professor  
PhD, Johns Hopkins University  
Early Modern European History

#### **Jonathan Judaken**

Gloria M. Goldstein Endowed Chair in Jewish History & Thought  
PhD, University of California, Irvine  
Jewish History, Racism, Existentialism

#### **Krister Knapp**

Teaching Professor  
PhD, Boston University  
U.S. Intellectual History

#### **Uluğ Kuzuoğlu**

Assistant Professor  
PhD, Columbia University  
Modern Chinese History

**Kenneth Ludmerer**

Mabel Dorn Reeder Distinguished Professor in the History of Medicine  
PhD, MD, Johns Hopkins University  
Medical History

**Steven B. Miles**

Professor  
PhD, University of Washington  
Chinese History

**Diana J. Montaña**

Assistant Professor  
PhD, University of Arizona  
Latin American History

**Sowandé Mustakeem**

Associate Professor  
PhD, Michigan State University  
Atlantic Slave Trade and the Middle Passage

**Tim Parsons**

Professor  
PhD, Johns Hopkins University  
African History

**Mark Pegg**

Professor  
PhD, Princeton University  
Medieval European History

**Christina Ramos**

Associate Professor  
PhD, Harvard University  
Latin American History, History of Medicine

### L22 History 101C Western Civilization

This course is a history of Western civilization from 3500 BC to AD 1600. Western civilization may be characterized as one long debate on the holy. In no other civilization did this debate about the limits of the sacred and the profane -- this constant effort at trying to grasp the divine through word and deed -- last continuously for more than 5000 years. To argue over the holy is to argue over the very nature of how to live a life, from the most mundane daily activity to the most sublime act of the imagination. It is to argue over how politics, economics, art, philosophy, literature, and religion are realized in a society. Apart from many types of polytheism, we study the three great world monotheistic religions: Judaism, Christianity, and Islam. We study the ancient cultures of northern Africa and the eastern Mediterranean, the empires of Alexander the Great and imperial Rome, the Christianization of the Roman Empire and the rise of Islam, the early medieval world in the North Sea and the Byzantine Empire in Constantinople, the formation of Latin Christendom and the papal monarchy, the Crusades and the reaction of the Islamic lands, concepts of individuality, the persecution of Jews and heretics, chivalry and peasant servitude, the Mongol Empire, the Black Death and the devastation of the 14th century, the Renaissance in Italy and the Protestant reformation, the hunt for witches and the scientific revolution, and the medieval origins of the African diaspora and the European conquest of the Americas. What defined being human -- and so a man, a woman, or a child -- over five millennia? Fundamental questions of this course include the following: What is "Western civilization"? When do the characteristics defined as "Western" come together as a coherent phenomenon? What, then, is historical truth? This course (through lectures, reading primary sources, discussion sections, and essay writing) gives the student a learned background in almost 5000 years of history. This is an introductory course for the history major and minor.

### L22 History 1021 An Ancient Murder Mystery: The Death of Jesus from the Gospels to Mel Gibson

When Mel Gibson's movie "The Passion of the Christ" was released in 2004, it provoked a tremendous amount of public debate and divided Christians (Catholics and Protestants of all sorts) and Jews (Orthodox, Conservative, Liberal and Reform) in every possible combination. Although the virulence of the discussions may have given us the impression that this was a new issue, in reality the question of the Jews' role and involvement in Jesus' death has been disputed for almost two thousand years. The claim that the Jews are responsible for Christ's death is the subject of this class and we will study its history from the gospels to today using textual sources (historical, religious

and literary works) and the visual arts (paintings and movies). But this class is not about who did or did not kill Jesus, nor is it about judging people's positions on the issue. Rather it is about the power of a story to travel through time and space, to being told and retold in different versions and with different purposes, and to affect the real lives of men and women. First-Year Seminar; Course is for first-year, non-transfer students only.

### **L22 History 102D Introduction to Modern European History**

The history of Europe since 1500 is a remarkable array of contradictions: freedom and fascism; democracy and imperialism; industrialization and Romanticism; international capitalism and fervent nationalism; social change and scientific racism. What produced these developments in European social, economic, and political spheres and how did these different currents diverge and converge? How did European developments affect global actors and vice versa? What are the consequences for our own time of these contradictory aspects of Europe's modernization? Class assignments include textbook and primary source reading (c. 75 pages/week), discussion participation, 2 short analytical papers, 3 in-class exams, and a final cumulative take-home essay. This course satisfies the Introductory Survey requirement for the history major and minor. DISCUSSION SECTION IS REQUIRED.

### **L22 History 1119 First-Year Seminar: Race and Ethnicity in Latin America: Myths, Realities and Identities**

This course examines the history of racial thinking and the experience of race in Latin America. Topics covered include: concepts of "blood purity" in early modern Spain; the casta system in colonial Spanish America; indigenous and African identities; race, citizenship, and nation-building; whitening projects; discourses of mestizaje or "race mixture"; and the intersection of race, gender, and class. While the focus of the course will be on the complexities of race in Latin America, a place of enormous ethnic and cultural diversity, we'll also be looking to draw comparisons to the history of race in the U.S.

Credit 3 units. BU: HUM, IS

---

### **L22 History 1130 Introduction to Race**

This course serves as an introduction to the analytic category race. Students will be exposed to major theories concepts, processes, frameworks, and scholars of race. They will develop the skills and language to critically examine and discuss race, with emphasis on how conceptions of race and collective identity have deep historical roots and have changed over time. This course takes the position that race-like gender, class and sexuality-is socially constructed. That said, while race is socially constructed, this course also emphasizes that racialization and racial categories have social, political, and economic consequences in people's everyday lives. Meaning the socially and historically constructed category of race has real implications for people and communities. Ultimately, the purpose of the course is to teach students to read, think and write critically about one of today's most contentious topics-race-by exposing them to readings and other course materials that consider race and the process of racialization in specific contexts and time periods throughout the world.

### **L22 History 1150 First-Year Seminar: The Presidency 101: From Washington to Trump**

Is this your first presidential election, or are you a policy wonk? Regardless of your political experience, this course provides an opportunity for students to learn about the American presidency as a contemporary political institution with deep roots in American history.

This first-year seminar introduces undergraduates to the presidency by considering the institution in its political and cultural contexts. Using the 2020 election as a point of departure, this course will explore how the current president as well as the aspiring candidates reveal broader trends and new developments in American political history. In addition to introducing students to the study of the presidency, this course will also introduce students to diverse means of studying culture, with assignments that range from political speeches to policy documents to popular media.

### **L22 History 1500 Silver, Slaves and the State: Globalization in the 18th Century**

In this course, students will look at how silver, and also porcelain, tobacco and salt, shaped the early modern world. The course will look at how merchants and adventurers, as well as pilgrims, pirates, migrants, and captives, encountered very different facets of that world, and tried to make sense of it. Students will also study how these attempts at exchange, how that process of "making sense," transformed how men and women of the 18th century, around the globe, saw their territories and their fellow humans. This is a world history class.

### **L22 History 163 Freedom, Citizenship and the Making of American Life**

This course offers a broad survey of American history from the era before European settlement of North America to the late twentieth century. The course explores the emergence and geographic expansion of the United States and addresses changes in what it meant to be an American during the nation's history. Tracing major changes in the nation's economic structures, politics, social order and culture, the course chronicles, among other issues, changes in the meanings of freedom, citizenship, and American identity. Introductory course to the major and minor.

**L22 History 164 Introduction to World History: The Second World War in World History**

This course introduction to World History uses World War II as a lens to examine the methodologies, approaches and sources historians employ to understand and analyze historical periods. The class will explore the global connections and interactions which characterize World History. The emphasis of this course will be on digging into topics traditionally neglected: the impact of the war on race, gender, family and children; daily life; and daily ethical decision making. Credit 3 units. A&S IQ: HUM, LCD, SD Art: HUM BU: HUM, IS EN: H

---

**L22 History 1640 Health and Disease in World History**

Health and disease are universal human experiences, yet vary profoundly across time and place. Extending from ancient times to the present, this course surveys that variety from a global perspective. We will explore medical traditions from around the world, then examine how these responded to major epidemic diseases such as the Black Death. We will study the globalization of disease and the emergence of scientific medicine after 1450, then turn to the interrelated histories of health and disease in the modern era. Throughout, we will attend carefully to how the biological aspects of health and disease have shaped world history, while at the same time exploring the powerful mediating role of social, cultural, economic, and political factors—from religious beliefs and dietary practices to inequality, poverty, empire, and war—in determining the myriad ways in which health and disease have been experienced and understood. Introductory course to the major and minor.

**L22 History 180 First-Year Seminar in Religious Studies: Miracles**

This course is for freshman only. The topic varies from semester to semester. Recent topics include Miracles; Sexuality in Early Christianity; and The Self in Chinese Thought.

Credit 3 units. A&S: FYS A&S IQ: HUM

---

**L22 History 192 First-Year Seminar: African Experiences in the Second World War**

Most conventional histories of the Second World War pay scant attention to Africa, thereby creating the misconception that the war had little impact on the peoples of the African continent. This introductory seminar restores the experiences of ordinary African women and men to the larger historical narratives of both Africa and World War II. Combining personal memoirs with official primary sources reveals not only how the global conflict influenced African history but also how Africans helped shape the final outcome and consequences of the war. This course is for first-year, non-transfer students only.

---

**L22 History 193 First-Year Seminar: Silk Roads and Empires**

Did the Silk Road even exist? Coined by a German geographer in the late 19th century, the term "Silk Road" has long been a metaphor for global connectivity. Evoking the image of camels and traders, diplomats and warriors, and missionaries and artists roaming across Eurasia from Chinese cities to Mediterranean shores, the so-called Silk Road has captivated the imagination of historians, novelists, and film makers for decades. This course investigates the fact and fiction of the Silk Road. Over the course of the semester, we will encounter people, texts, and objects that weaved a world wide web before the age of the internet. We will examine Buddhist monks, Muslim scholars, and Mongol rulers who connected disparate regions of the globe before the age of globalization, and we will discuss whether the concept and history of the Silk Road may offer anything novel for us in the 21st century. This course is for first-year, non-transfer students only.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, IS EN: H

**L22 History 200 Doctors and Terrorists: The Fictions of South Asian America**

South Asians have always played an integral role in the culture, history and politics of the United States. However, for complex reasons, their presence has either been concealed, or dismissed through dangerous stereotypes, or just as inaccurately, excessively celebrated for proving the generosity of American liberalism and multiculturalism. Racially misrecognized, this large and heterogeneous group has nonetheless shaped American categories of race, sexuality, and citizenship in intriguing and powerful ways. South Asian Americans have reached to fiction, music and popular culture to craft deeply intimate and original assessments of mainstream desires. In doing so they have sought to resist the dictates of whiteness, to question US imperialism, to garner acceptance and mobility, to build solidarity with other US minorities. In this course we learn about the complex history and cultural productions of South Asians in America. How did "South Asia" become a category of identification, and who benefitted from that designation? What role have South Asians played in the economic, cultural and global ascendancy of the United States? How do South Asians connect with, and control, their countries of origin? Why do discourses of sex and intimacy rise to the surface in this history, and what is the significance of story-telling in building the archive and questioning the fiction of South Asian America? Course enrollment is limited to first-year and sophomore students.

**L22 History 2052 Historical Fiction & Fictional Histories**

The relationship between history and fiction has always been contentious and sometimes turbulent, not least because the two genres have traditionally been seen as mutually exclusive. However, new hybrid forms of writing—from historical fiction, to docudramas, to fictionalized biographies—have led to the blurring of the boundary and encouraged the claim that history itself is just another form of fiction. At the same time, historical novelists have placed increasing emphasis on the authenticity, sometimes even the accuracy, of their narratives and characterizations. And further still, contemporary writers are challenging dominant historical narratives by creating plausible fictions from the perspectives of the subordinated, the marginalized and the disenfranchised: plebeians, women, and indigenous, enslaved, and diasporic peoples. As historical novels become ever more popular, the distinction between history and fiction appears to be collapsing before our eyes. Through reading and discussing some outstanding examples of the genre of historical fiction published between the early nineteenth and the early twenty-first century (from Walter Scott to Charles Dickens, from Toni Morrison to Amitav Ghosh, from Graham Swift to Hilary Mantel), this course will investigate whether history is 'factual' or just another form of fiction; whether the appeal of historical fiction should lie in its authenticity; whether the recent success of historical novels should be viewed as a new development, or rather, as a revival of an older literary tradition; and whether novelists and dramatists are more adept than historians at interrogating issues of memory, identity, and change.

### L22 History 2070 Crossing Borders: An Introduction to Institutions and Concepts in Global Studies

This course provides an overview of the emergence of international governing institutions, the ideologies that shaped them, and concepts helpful for understanding them. Identifying the systems that have emerged to govern modern human societies at the national and international levels provides the means to consider how human beings are categorized within those systems, as citizens, subjects, asylum seekers, refugees, and the stateless. We engage a few classic works -- including "The Communist Manifesto," "Imagined Communities," and "Orientalism" -- and consider how they have transformed knowledge. The goal is for students to gain an empirical grasp of world institutions and a critical vocabulary that will provide the means for an informed engagement with international issues across different world regions and academic approaches.

### L22 History 2081 Introduction to Jewish Civilization: History and Identity

The anthropologist Clifford Geertz once famously invoked Max Weber in writing that "man is an animal suspended in webs of significance he himself has spun. I take culture to be those webs." The main goal of this course--designed as an introduction to Jewish history, culture, and society--will be to investigate the "webs of significance" produced by Jewish societies and individuals, in a select number of historical periods, both as responses to historical circumstances and as expressions of Jewish identity. Over the course of the semester we will focus on the following historical settings: 7th century BCE Judah and the Babylonian exile; pre-Islamic Palestine and Babylonia (the period of the Mishnah and the Talmud); Europe in the period of the Crusades; Islamic and Christian Spain; Europe in the 18th and 19th centuries; North America in the 20th century; and the modern State of Israel. For each period we will investigate the social and political conditions of Jewish life; identify the major texts that Jews possessed, studied, and produced; determine the non-Jewish influences on their attitudes and aspirations; and explore the efforts that Jews made to define what it meant to be part of a Jewish collective.

### L22 History 2091 First-Year Seminar: The City in Early Modern Europe

From the city-states of Renaissance Italy to the eighteenth-century boomtowns of London and Paris, cities functioned as political, economic, and cultural centers, creating unique opportunities and challenges for their diverse inhabitants. Using a wide variety of primary and secondary sources, this course will examine how men and women, rich and poor, established citizens and marginal groups, tried to understand and manage life in the city. Their conflicting experiences and expectations created not only social and economic unrest, but also a resilient social infrastructure, a tradition of popular participation in politics, and a rich legacy of cultural accomplishment. Topics studied include: urban political and economic organization; the creation and use of public spaces; religion as a source of community and conflict; and urban crime and public punishment.

### L22 History 2118 First-Year Seminar: Angels, Prostitutes and Chicas Modernas: Women in Latin American History

Women have been active players in the construction of Latin American nations. In the last two decades, leading scholars in the field have taken up the challenge of documenting women's participation. This research explosion has produced fruitful results to allow for the development of specialized courses. This course looks at the nation building process through the lens of Latin American women. Students will examine the expectations, responsibilities and limitations women confronted in their varied roles from the Wars of Independence to the social revolutions and dictatorial regimes of the twentieth century. Besides looking at their political and economic lives, students will explore the changing gender roles and relations within marriage and the family, as well as the changing sexual and maternal mores.

---

**L22 History 2157 First-Year Seminar: The Meaning of Pakistan: History, Culture, Art**

Pakistan is the second largest Muslim nation and the sixth most populous country in the world. First imagined as an anti-majoritarian and anti-imperial idea, the nation came to be split between East and West Pakistan, with a hostile Indian nation dividing the country. The subsequent emergence of Bangladesh, from within, exposed the complexities of US imperial and Indian power, colonialism, identity, ethnicity, race, nationalism and repression. More recently, the War on Terror has once again exploited the ethnic and cultural conflicts produced by world histories of power and resistance. The events of the past two hundred years have undoubtedly and violently exacerbated the politicization of social and cultural identities. This course situates Pakistan in the context of pre-colonial social formations, British colonialism, internal colonialism, US imperialism, the Cold War, Soviet interests, Indian regional hegemony and then turns to the powerful and diverse struggles launched by its own citizens against these external forces. How did successive empires construct and politicize social identities, and how did people contest and adapt these? How did caste, gender, race and religion shape empire and anti-imperial histories? Our sources will be historical, ethnographic, and literary. We will cover topics such as colonial fantasies, decolonization, the political uses of social categories of tribe, caste, language and gender, the political economy of militarism, terrorism, 'development', activism, diasporic formations, poetry, music and art. The course will deepen our collective understanding of a critical series of developments in world history. Just as crucially, we will build a framework within which to address the stereotypes about Pakistan that dominate popular and media discourses today.

---

**L22 History 2158 First Year Seminar: Outcasts and Outlaws: The History of Othering in Modern Europe**

Villainous figures such as pirates, bandits, rebels, and terrorists have easily jumped from the historical record into the broader cultural imaginary. But what, beyond their disdain for the law, do they have in common, and why do they keep resurfacing in accounts of contemporary politics? This course will survey several outsider archetypes across 19th- and 20th-century Europe and its empires. We will ask: what does it mean to be "outside" of the community, and which mechanisms and spaces have historically produced and maintained this exclusion? With particular attention to the history of European imperialism, this course will analyze how images of outcasts and outlaws have been shaped by perceptions of gender, race, and class, and how they have produced distinct forms of management and policing. The class will also highlight the central role that mobility has played for this type of othering. Putting archetypes from the European underworld into conversation with one another and investigating their reconfigurations across time, we will systematically work out what function they perform for past and present society and what, if any, forms of resistance they afford.

---

**L22 History 2251 Religion and Politics in American History**

In a famous 2004 article, historian Jon Butler once remarked that US history textbooks and survey courses tend to pay significant attention to religion during the Colonial Era and early Republic, yet after the Civil War "religion more often appears as a jack-in-the-box" that pops up in historical accounts somewhat randomly and without much elaboration or analysis. To address the gaps in historical understandings that these absences may create, this course will provide a survey of the ways theological ideas and religiously-motivated social movements have shaped US politics and civic life from the Civil War to the present. With a particular emphasis placed on how religion intersects with other social categories such as race, gender, and class, it will examine the complex role that religious beliefs, practices, and identities have played

in major political events and debates from the 1860s to today. In doing so, it will also inquire into what it means to study religion as a historical phenomenon, the theoretical and methodological tools that best assist in this work, and the historiographic implications of better attending to religion in historical analyses. No prior coursework in US history or religious studies is required.

**L22 History 2255 First-Year Seminar: The Caribbean and the World**

For many, the Caribbean evokes images of an exotic place with beautiful beaches, friendly, happy "natives" and unbridled hedonism. Yet, much more than a distant vacation destination for "first world" consumption, the Caribbean has long been closely intertwined with major events in World History. This course explores the ways in which the Caribbean has been a part of the making of World History, beginning in the 14th century and ending in the contemporary period. Themes covered will include: capitalism and slavery; the Haitian Revolution and its global reverberations; U.S. imperialism in the Caribbean; the impact of Caribbean migration on British culture; Caribbean sports; music and food in a global context; and the contributions of Caribbean thinkers to anti-colonial and anti-imperialist thought and action.

---

**L22 History 2674 Sophomore Seminar: Slavery and Memory in American Popular Culture**

Sophomores receive priority registration. The history of slavery has long created a sense of unease within the consciousness of many Americans. Recognizing this continued reality, this seminar examines how slavery is both remembered and silenced within contemporary popular culture. Although slavery scholarship continues to expand, how do everyday Americans gain access to the history of bondage? Taking an interdisciplinary approach to these intriguing queries, we will examine a range of sources: literature, public history, art/poetry, visual culture, movies and documentaries, as well as contemporary music including reggae and hip hop. The centerpiece of this course covers North American society, however, in order to offer a critical point of contrast students will be challenged to explore the varied ways slavery is commemorated in others parts of the African Diaspora.

**L22 History 270 Globalization and its Discontents**

Today, the heady promises of globalization appear to have failed us. The notion of global markets and global citizens seems to have remained at best, an ideal. Meanwhile the world's majority has witnessed a staggering decline in education, nutrition, health and even physical mobility. Nowhere have these developments passed unquestioned: from the rise of the so-called Maoist insurgency in India to the Occupy movement in the US, people and especially the youth have expressed their outrage in creative and unconventional ways. This course plots the long and necessarily violent history of forging global interconnections. The lens for our analysis will be India, South Asia and their relationship with the United States. We will approach a range of novels, films and popular cultural artifacts as we build our own understanding of the nature, critique and promise of globalization.

**L22 History 270A Sophomore Seminar: Globalization and its Descendants**

The metanarrative of globalization and global inter-connections privileges the story of markets, growth, and mobility. That story is relentlessly optimistic, and simultaneously, devoid of an understanding of gender, sexual difference or race. In this course, we take a different approach. We discard the more conventional "metrics" of globalization by focusing instead on another equally global story: the manner by which human beings have been gendered and racialized over time. Doing so allows us to revisit globalization through its own deceptions, its interconnected secrets. We confront a different set of questions: how has intimacy shaped global mobility, what is the relationship between caste and MAMAA, between custom and the movement of capital, between "slums" and scale, between outsourcing and incarceration, how does the normative family propel global racial regimes? Most crucially, how and why is the emotional and intimate story of globalization concealed? The seminar class utilizes a wide array of sources, historical documents, scholarly critiques, novels and film and largely considers the longer, global history of India as the case study. Our specific focus will be on the secretive interconnections of slavery, seclusion, settlers, servitude, surrogacy, and scholarship, as we take a deep dive into the disguises, and the more hidden aspects, of globalization.

**L22 History 2721 Ampersand: Rethinking WashU's Relation to Enslavement: Past, Present and Future**

Explore Washington University's entanglement with the institution of slavery over its 168-year history. This full-year course guides students into independent research that engages the distortions, erasures, and silences of the "slavery archive," especially as they pertain to Black lives in St. Louis whose stories shape the University's long and important tradition. Use textual and digital methods in an endeavor to understand this past, learn how it shapes our present, and consider how it ought to shape our institutional future. This class is for first-year, non-transfer students only.

**L22 History 2750 Sophomore Seminar: Beijing: From Imperial Capital to Olympic City**

This course examines recent English-language scholarship on Beijing's history and culture. From the early modern period to the contemporary era, Beijing has served as the capital for imperial, early Republican, and revolutionary and post-socialist China. The city thus has been virtually synonymous with governmental power and elite politics. However, recent scholarship has shifted focus from the political perspective to uncovering the social and cultural changes at the grassroots. Notable scholarly works have demonstrated that the modernization impulse and the move to industrialization served to create the city's modern face. Administrative reforms gave rise to new conceptions and a host of institutions to manage social relief, public services, and legal and punitive institutions. The rise, fall, and subsequent revival of the consumer marketplace impacted cultural production and consumption. Mass (de)mobilization closed old venues while opening new possibilities for residents to understand and participate in politics. The recent English-language scholarship not only delineates forces that shaped the lives of millions of residents of Beijing but also situates their experience in the national and global context of modernization and revolution.

**L22 History 2802 Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film**

This course is an examination of key turning points in Japan from the mid-19th century to the present. It focuses on the important role that bureaucracies, staffed by public servants, have played in shaping the political and social life on the archipelago and in the region. We will engage representations of political and social life in Japan by making use of its rich visual culture by viewing and discussing Japanese films. The assigned films, which will be screened in Japanese with English subtitles, will likely include "The Twilight Samurai," "To Live," and "Shin Godzilla," among others. These films provide representations of how people in Japan have responded to crises, including revolution, war, and natural disasters. Through written and visual materials, students will gain a better understanding of history in Japan, public service, and the utility of film for engaging the past. Film screenings are mandatory. **L22 History 2910 Racism and Antiracism**

When President Obama was elected, it ignited a debate about whether America had finally become "post-racial." This assertion was belied by an entrenched underclass of Blacks and others from immigrant backgrounds; by the regular killing of innocent, young Black men alongside their mass incarceration, along with a whole series of other social indicators; by the dramatic rise in anti-Semitic incidents and Islamophobia globally; and most evidently by the discourse used during the Trump era that weaponized white Christian nationalism. At the end of four years of the Trump presidency defined by racist discourse and policies, it culminated in an insurgent riot on the Capitol designed to block the peaceful transfer of power, the basis of American democracy. This course provides the long view to understanding this recent period in American and global history. We begin by defining key terms in the discussion around racism today, including what we mean by racism and what unites anti-Semitism, anti-Black racism and Islamophobia, but also notions like privilege, cultural appropriation, and microaggressions. We then move on to the long history of the category of race. We start with a unit on race and religion and then move on to the role of the discovery of the "New World" and the development of the Atlantic slave system, and its impact on the Enlightenment, which was the incubator for the concept of race. From there, we consider how fundamental race was to European and American colonial dominance by the end of the nineteenth-century and the role it played in racial states like Nazi Germany and South Africa. The last portion of the class will focus on struggles to dismantle racism over the last century, considering the anti-colonial and Civil Rights movement, and the anti-apartheid struggle. Along the way, we will have addressed the overlaps and disconnects between anti-Black, anti-Jewish, and anti-Islamic racism and read a number of key thinkers and activists who can help us in the fight against racism.

**L22 History 299 Undergraduate Internship in History**

Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities, e.g., 8-10 hours a week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours. Students may not receive credit for work done for pay but are encouraged to obtain written evaluations about such work for the student's academic adviser and career placement file.

Credit variable, maximum 3 units.

**L22 History 3011 Biblical Law and the Origins of Western Justice**

This course will explore how law developed from the earliest periods of human history and how religious ideas and social institutions shaped law. The course will also illuminate how biblical law was influenced by earlier cultures and how the ancient Israelites reshaped the law they inherited. It will further analyze the impact of biblical law on Western culture and will investigate how the law dealt with those of different social classes and ethnic groups, and we will probe how women were treated by the law.

**L22 History 301N Historical Methods-Microhistories: Scale and Narrative in Historical Research and Writing**

Historical Methods (Transregional): How much can we learn about the past through the story of a single person, place, object, or event? Since the 1970s, historians have attempted to show that 'microhistories' can powerfully illuminate the grand sweep of history. By narrowing their focus to magnify the small, the particular, and the local, 'microhistorians' have argued that studies of apparently inconsequential subjects can have a major impact on our understanding of the past. This course is based on the intensive reading and discussion of several outstanding examples of the 'micro-historical' study of individuals, families, communities, events, and social interactions. These will be primarily drawn from the literature on early modern Europe, which has a long and continuing tradition of work of this kind. Some, however, are taken from the historiography of Early America and recent approaches to 'Global' history. Particular attention will be paid to questions of evidence and of its potential in the hands of imaginative historians; and to the deployment of particular analytical and narrative techniques in the construction of history. We will often be less concerned with whether the historians we study are 'right' in their arguments than with how they develop and present them.

---

**L22 History 3034 Jews in French History and Culture**

This course will explore the rich history of the representations of Jews within French culture and contributions to French history. The class will consider how French Jews served as incubators of cultural modernity. France was the first country in Europe to emancipate Jews from their ghettos, offering them civil rights and civic equality. But at the same time, France was a crucible for the development of modern anti-Semitism. Jews appear as characters in novels, hosts of intellectual salons, as actors on the French stage, as icons of financial capitalism, as examples of the limits and possibilities of immigration, integration, and even assimilation, as authors and intellectuals, as quintessentially French and Other to France. We will navigate these tensions through literature, art, film, theater, and in their diverse historical contexts.

**L22 History 3044 Humors, Pox and Plague: Medieval and Early Modern Medicine**

This course examines how people thought about, experienced, and managed disease in the medieval and early modern periods. Students will consider developments in learned medicine alongside the activities of a diverse range of practitioners-e.g. surgeons, empirics, quacks, midwives, saints, and local healers-involved in the business of curing a wide range of ailments. Significant attention will be paid to the experiences of patients and the social and cultural significance of disease. Major topics include: the rise and fall of humoral medicine; religious explanations of illness; diseases such as leprosy, syphilis, and plague; the rise of anatomy; herbs and pharmaceuticals; the experience of childbirth; and the emergence of identifiably "modern" institutions such as hospitals, the medical profession, and public health. The focus will be on Western Europe but we'll also consider developments in the Islamic world and the Americas.

### **L22 History 3045 Hot Peace: U.S.-Russia Relations Since the Cold War**

This course is an historical analysis of U.S.-Russia relations since the end of the Cold War. Focusing on "reset" diplomacy during the terms of five American and three Russian presidents since 1990, it reveals a familiar historical pattern that begins with high hopes, dialogue, and optimism only to be followed by vast disappointment, standoffs, and pessimism. Despite this dynamic, the course shows how and why the two countries have been able to cooperate at times to make substantial headway on critical issues such as arms control, nonproliferation of WMD, NATO expansion, counterterrorism, and economic and energy development, whereas at other times they have run afoul of major obstacles such as further NATO expansion, missile defense, and democracy and human rights in Russia. The course also examines how many political events created substantial challenges to U.S.-Russia relations, including the Balkan Wars; U.S. wars in Iraq and Afghanistan; Russia's wars in Chechnya, Georgia and Ukraine/Crimea; the "Color Revolutions"; the Arab Spring and subsequent civil wars in Iraq, Syria, Yemen and Libya; the fight against ISIS and other militant Islamists; the threats posed by Iran and North Korea; the rise of China; espionage crises; hybrid wars; cyberattacks; and disinformation campaigns. Two vital questions frame the analysis: (1) Why has it been so difficult for these two great powers to develop a mutually beneficial relationship? (2) What would be required to move beyond the limited partnership to something more productive and sustaining? The course concludes by evaluating "reset" diplomacy and the ongoing attempts to move U.S.-Russia relations beyond a Hot Peace.

### **L22 History 3056 Material Culture in Modern China**

In this course, we will explore change and continuity from late imperial to postsocialist China through an analysis of everyday material culture. Drawing upon material objects, historical texts, ethnographic studies, and films, we will investigate values, beliefs and attitudes towards the material world in modern Chinese life. Readings, lectures, and discussions will focus on how political, ethnic, regional, religious, and gender identities have been constructed and shaped by the use and production of material artifacts ranging from household goods and tomb objects to built forms and bodily dispositions. Case studies include foot-binding, opium use, fashion, tea culture, fast food consumption, sports and nation building, contemporary art markets, the privatization of housing, and worker discipline in transnational factories.

### **L22 History 3066 The American City in the 19th and 20th Centuries**

This course will explore the cultural, political, and economic history of U.S. cities in the 19th and 20th centuries. The course will focus on New York, Chicago, St. Louis, Los Angeles, and Atlanta, although other cities may be included. Students will conduct significant primary research on sections of St. Louis, developing a detailed history of one of the city's neighborhoods. Much of the course readings address broad themes such as immigration, industrialization, deindustrialization, and race and gender relations in American cities.

### **L22 History 3067 Topics in the History of Medicine: History of Madness**

Mental health -- its diagnosis, social implications, and experience -- is a central and increasingly visible part of the practice of medicine. This course explores "madness." How have different societies explained and responded to states of mind, behavior, and emotion judged to be unreasonable? What role has medicine played in framing understandings about mental disorders and their management? During this course we will engage these questions, charting the shifting experience of mental illness roughly from the Middle Ages to the present. Themes covered include: religious models of madness; humoral medicine and disorders such as melancholy; the pre-modern madhouse and the emergence of the modern asylum; the history of psychiatry; the insanity defense in the courtroom; patient autobiography; gender, race, and mental health.

Credit 3 units. A&S IQ: HUM BU: ETH EN: H

### **L22 History 3074 Hinduism & the Hindu Right**

We are witnessing a global rise in rightwing politics, and India is no exception. In May 2019, Narendra Modi and his "Hindu Nationalist" party were elected to power for a second term. Observers in the United States and Europe may be stunned by what seems to be a new development, but observers in India have been following the rise of the Hindu Right since the early 1990s. In its wake, the Hindu Right has brought violence against minorities; curbs on free speech; and moves toward second-class citizenship for Indian Muslims. This course will track the history of the Hindu Right in India from its 19th-century roots to the present. The struggle to come to grips with the Hindu Right is of immediate political relevance. It also raises big questions about the history of religion and the politics of secularism.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, IS EN: H

---

### **L22 History 3082 City on a Hill: The Concept and Culture of American Exceptionalism**

This course examines the concept, history, and culture of American exceptionalism--the idea that America has been specially chosen, or has a special mission to the world. First, we examine the Puritan sermon that politicians quote when they describe America as a "city on a hill." This sermon has been called the "ur-text" of American literature, the foundational document of American culture; learning and drawing from multiple literary methodologies, we will re-investigate what that sermon means and how it came to tell a story about the Puritan origins of American culture--a thesis our class will reassess with the help of modern critics. In the second part of this class, we will broaden our discussion to consider the wider (and newer) meanings of American exceptionalism, theorizing the concept while looking at the way it has been revitalized, redefined and redeployed in recent years. Finally, the course ends with a careful study of American exceptionalism in modern political rhetoric, starting with JFK and proceeding through Reagan to the current day, ending with an analysis of Donald Trump and the rise of "America First." In the end, students will gain a firm grasp of the long history and continuing significance--the pervasive impact--of this concept in American culture.

**L22 History 3091 Poverty and Social Reform in American History**

This course explores the history of dominant ideas about the causes of and solutions to poverty in American society. We will investigate changing economic, cultural, and political conditions that gave rise to new populations of impoverished Americans and to the expansion or contraction of poverty rates at various times in American history. However, we will focus primarily on how various social commentators, political activists, and reformers defined poverty, explained its causes, and struggled to ameliorate its effects. The course aims to highlight changes in theories and ideas about the relationship between dependence and independence, personal responsibility and social obligation, and the state and the citizen.

---

**L22 History 30CC The American School**

In this course we analyze the development of American schooling within the context of American social history. Our focus is on three general themes: the differing conceptions of schooling held by some American political, social, and cultural thinkers; the changing relationships among schools and other educational institutions such as the church and the family; and the policy issues and arguments that have shaped the development of schooling in America. We spend considerable time studying the history of schooling in relation to the enduring challenges and dilemmas of marginalized groups including but not limited to systemic racial inequalities, access to schooling and inequitable schooling experiences. Undergraduate students must enroll in Educ. 301C, while graduate students must enroll in Educ. 5001.

**L22 History 30GS "I Know It When I See It": A History of Obscenity & Pornography in the United States**

When Supreme Court Justice Potter Stewart was asked to describe his test for obscenity in 1964, he responded: "I know it when I see it." But do we? What is pornography and how has it changed over the last two and a half centuries? What role does pornography play in our society and how is our society reflected in its contents? This course seeks to explore these questions and more and actively engages in the debate and controversies inherent to discussions of pornography in America. In this course we will engage with primary sources to track the changing nature of pornographic material- written, physical, and visual- and to recognize the way pornography reflects changes in the wider social milieu, as well as secondary and theoretical sources to contextualize and provoke our understanding of patterns of pornography use and regulation. It is likely that our definition of pornography will change over the semester- our initial definition is broadly bounded by material considered pornographic by its contemporaries and that which is created with the intent of erotic stimulation.

---

**L22 History 3113 Seminar: Perceptions of Time and Place in Early Modern England**

This seminar analyses perceptions of time and place in England, c.1500-1800, and their relationship to both personal and social identity. These issues will be explored using appropriate theoretical and substantive readings and both visual and textual primary sources. Particular attention will be given to the use of visual images as historical evidence. Specific issues addressed include the development of cartography, chorography and antiquarianism; conventions of time reckoning and the dating of events; perceptions of the life course; the creation of social memory and historical narratives; representations of social place; agrarian change and the transformation of the landscape; the impact of the Reformation on the calendar, the landscape, and senses of the past; and representations of previously unknown places and peoples. Primary sources for discussion include maps and

prospects; chorographical surveys; illustrated antiquarian writings; almanacs; pictorial representations of notable events; engravings; paintings (portraits; 'country house portraits'; landscapes; 'conversation pieces'; history painting and 'documentary' works); memorials; family histories; extracts from court records.

**L22 History 3149 The Late Ottoman Middle East**

This course surveys the Middle East in the late Ottoman period (essentially the 18th and 19th centuries, up to the First World War). It examines the central Ottoman state and the Ottoman provinces as they were incorporated into the world economy, and how they responded to their peripheralization in that process. Students will focus on how everyday people's lived experiences were affected by the increased monetarization of social and economic relations; changes in patterns of land tenure and agriculture; the rise of colonialism; state efforts at modernization and reform; shifts in gender relations; and debates over the relationship of religion to community and political identity.

---

**L22 History 314C Islamic History: 1200-1800**

An introduction to Islamic polities and societies from the Mongol conquests to the thirteenth century to the collapse and weakening of the colossal "gunpowder" empires of the Ottomans, Safavids and Mughals in the early eighteenth century. Broadly speaking, this course covers the Middle Period (1000-1800) of Islamic history, sandwiched between the Early and High Caliphal Periods (600-100) on the one hand and the Modern Period (1800-Present) on the other hand. Familiarity with the Early and High Caliphal periods is not assumed. The course will not be a "survey" of this period but a series of "windows" that will allow you to develop both an in-depth understanding of some key features of Islamic societies and a clear appreciation of the challenges (as well as the rewards!) that await historians of the Middle Period. Particular attention is given to the Mamluk and Ottoman Middle East, Safavid Iran and Mughal India.

---

### L22 History 3153 Sex and Gender in Greco Roman Antiquity

In this course, we will explore how ancient Greeks and Romans thought about gender and sexuality. We will consider questions such as: which traits and behaviors did the Greeks and the Romans associate with masculinity and with femininity? What can we tell from our sources about those who did not fit neatly into this binary? How did ancient Greeks and Romans think about male and female anatomy and psychology? How did the Greeks and the Romans construct sexuality and how did they approach homosexual and heterosexual relationships? How did they think about erotic desire? How did ancient laws and institutions circumscribe the lives of men and women, and how did they contribute to the construction of gender and sexuality? How did class, ethnicity, and age intersect with ideas about gender and sexuality in antiquity? We will read an array of ancient texts in translation, we will consider various theoretical viewpoints, and we will move toward a better understanding of how gender and sexuality were constructed in antiquity. Ultimately, we will reflect on how our exploration of ancient ideas about these issues can help us understand better how we think about them today.

### L22 History 3162 Early Modern China

This course examines political, socio-economic, and intellectual-cultural developments in Chinese society from the middle of the fourteenth century to 1800. This chronological focus largely corresponds to the last two imperial dynasties, the Ming (1368-1644) and Qing (1644-1911). Thematically, the course emphasizes such early modern indigenous developments as increasing commercialization, social mobility, and questioning of received cultural values.

### L22 History 3163 Historical Landscape and National Identity in Modern China

This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campus, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens, and churches. Using methods of historical and cultural anthropological analysis, the course invests the places where we see with historical meaning. Through exploring the ritual, political, and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local, and personal identity. The historical events and processes we examine along the way through the sites include the changing notion of rulership, national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory, and changing over time are an important concern of this course.

### L22 History 3165 Chinese Diasporas

Five hundred years ago, the Chinese population was concentrated in core areas of China proper. Beginning in the 16th century, significant numbers of Chinese people moved to the frontiers of an expanding China and across its borders: to Japan and Southeast Asia, to the Americas and Australia, and to Africa and Europe. Although Chinese migration certainly existed beforehand, the period from the 16th century to the present day is marked by the emergence of sustained movement of non-state actors and the development of institutions -- ranging from native-place associations to tourist agents' websites -- that supported this vast circulation of people. Likewise, in many emigrant communities and host societies, Chinese diasporic families adapted to migration as a way of life. This course traces this worldwide circulation of Chinese people over these five centuries.

---

### L22 History 3166 A History of Modern China

This course explores the 19th- and 20th-century history of China. Its purpose is to provide students with a historical foundation to understand the momentous changes the country underwent during its traumatic transition from an empire to a nation-state. We start the course at the height of the empire's power in the late 18th century, when the Qing dynasty (1637-1912) conquered vast swathes of lands and people in Inner Asia. We then move on to the Qing's troubled relationship with Western capitalism and imperialism in the 19th century, which challenged the economic, social, and ideological structures of the imperial regime, culminating in the emergence of "China" as a nation-state. By situating China's national history within a global context, the course outlines in detail the transformations that took place in the 20th century, from the rise of communism and fascism to the Second World War to Maoism and cultural revolution. We end the semester with yet another major change that took place in the 1980s, when a revolutionary Maoist ideology was replaced with a technocratic regime, the legacies of which are still with us today.

### L22 History 3167 Economic History of China: From the Silver Age to Reform and Opening, 1500-1990

This seminar explores the economic history of China from the 16th to the 20th century; this time period is the half a millennium during which China became part of the world economy and defined its development in major ways. Over the course of the semester, students will be exposed to the main debates in the field of Chinese economic history while acquiring a strong grasp of the nuts and bolts of how economy functioned and changed from the imperial to the modern times. Situating China within a comparative perspective, we will examine a multitude of debates ranging from the global silver age of the 16th century to the birth of capitalism, the socialist economy, and the PRC's recent involvement in Africa. We will in particular discuss the contradictions that arose out of China's integration into the world economy and the different kinds of economic regimes that existed and continue to exist within China. While this course assumes a basic familiarity with Asian history, students with backgrounds in other world histories and/or social science disciplines should feel comfortable with the course material.

### L22 History 3168 History of Global Capitalism: From Slavery to Neoliberalism

This course introduces the methods, issues, and debates that shape our understanding of economic change and development from the Industrial Revolution to the post-industrial age. Engaging economic theorists from Marx to Smith to Weber and Wallerstein, this course problematizes the notion of rational economic actors and interrogates notions of free trade in an attempt to understand the impact of capitalism on the world. We start the course with a discussion of

the "exceptionalism" of Great Britain as the first industrial nation and reconsider the impact of new trade, production, property and monetary/financial regimes that resulted in the so-called "Great Divergence" between China and the West. We then turn to the "late industrializers" of China, Japan, and Mexico in order to investigate the varieties of development, specifically focusing on monetary integration, legal integration and the global impact of the great depression. Continuing into the Bretton Woods Conference and the post-war international monetary systems, we bring the course to a close with the advent of the "post-industrial age." This course is designed both for students specializing in economic history and students in all disciplines interested in historical approaches to political/economic development. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: IS EN: H

---

**L22 History 3169 Cyborgs in History: From Cybernetics to Artificial Intelligence**

Who coined the word "cyborg," and why? How did cyborgs become so integral to our imaginative worlds and daily existence? In this course, we will contemplate the intersection between technologies and societies through the lens of cyborgs, a term that is shorthand for "cybernetic organisms." Defying the separation between humans and machines, cyborgs have been critical to sciences, humanities, pop culture, feminism, afrofuturism, and queer studies, among many other fields of inquiry. This course will take a deep dive into the worlds of scientists, scholars, artists, and ordinary people to discover the cultural meanings of cyborgs across time and space. Along the way, we will meet Norbert Wiener, who coined the term "cybernetics"; Donna Haraway, for whom the cyborgs were a revolutionary species; and John C. Lilly, who thought he could speak with dolphins. We will also travel to the USSR to read about a failed internet; to Chile, where cybernetics was a socialist project; and to Japan, to learn about gender and technology in non-Western spaces. By the end of the course, students will have a strong theoretical and historical grasp on the social worlds of cybernetic technologies. Credit 3 units. ---

**L22 History 316C Modern China: 1890s to the Present**

A survey of China's history from the clash with Western powers in the 1800s to the present day economic revolution. This course examines the background to the 1911 revolution that destroyed the old political order. Then it follows the great cultural and political movements that lead to the Communist victory in 1949. The development of the People's Republic will be examined in detail, from Mao to the global economy. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

**L22 History 3171 American Unbelief from the Enlightenment to the Present**

This course examines American secularism, humanism, freethought, and atheism from the Enlightenment forward to the present. Topics to be explored include: the tensions between secular and Christian conceptions of the nation's founding, blasphemy and irreligious cartoons, the civil liberties of atheists and nontheists, the battles over religion in the public schools, atheism and gender politics, the culture wars over secular humanism, and the contemporary growth of the religiously disaffiliated or "nones." The course considers not only the intellectual dimensions of skeptical critiques of religion, but also the underlying politics of secularism (and anti-secularism) in a nation routinely imagined as "under God." Same as L57 RelPol 3160  
Credit 3 units. A&S IQ: HUM

---

**L22 History 3172 Queer Histories**

Queer history is a profoundly political project. Scholars and activists use queer histories to assert theories of identity formation, build communities, and advance a vision of the meanings of sexuality in modern life and the place of queer people in national communities. This history of alternative sexual identities is narrated in a variety of settings—the internet as well as the academy, art and film as well as the streets—and draws upon numerous disciplines, including anthropology, geography, sociology, oral history, fiction and memoir, as well as history. This discussion-based course will examine the sites and genres of queer history, with particular attention to moments of contestation and debate about its contours and meanings. **L22 History 3173 Service Learning: Documenting the Queer Past in St. Louis**

Around the United States and the world, grassroots LGBTQ history projects investigate the queer past as a means of honoring the courage of those who have come before, creating a sense of community today as well as building an understanding of the exclusions and divisions that shaped these communities and that continue to limit them. In this course, we participate in this national project of history-making by helping to excavate the queer past in the greater St. Louis region. Course readings will focus on the ways that sexual identities and communities in the United States have been shaped by urban settings since the late 19th century, with particular attention to the ways that race, class, and gender have structured queer spaces and communities. In their community service project, students will work with local LGBTQ groups, including the St. Louis LGBT History Project, to research St. Louis's queer past. Each student will also conduct an oral history interview with an LGBTQ community member. Note: This is a community-engaged learning class, which means that it combines classroom learning with outside work at a community organization. In addition to regular class time, there is a service requirement, which necessitates an additional three to five hours per week. Before beginning the community service component, students must complete required training. Prerequisite: Introduction to Women, Gender, and Sexuality Studies; Introduction to Queer Studies; or permission of instructor. Same as L77 WGSS 3173

**L22 History 3176 Chinese Economy in World History**

From the Belt and Road Initiative to high-tech surveillance, China is at the center of contemporary discussions about the future of the global economy. This course will expose students to a historical understanding of how China not only became part of the world economy, but in fact defined its development in major ways. Over the course of the semester, students will explore a variety of subjects, from the Great Divergence between Europe and China in the eighteenth century to the rise of Maoist socialism in mid-twentieth century, to China's transition to capitalism and involvement in Africa in the twenty-first century. Examining the past two hundred fifty years of Chinese and global economic history, the students will gain a deep understanding of how China became the world's second largest economy, and what that means for the future. **L22 History 3183 The Jews of North Africa**

This course examines the colonial and postcolonial experiences of Jews living in North Africa (mainly Algeria, Morocco, Tunisia, Libya and Egypt) in the context of the region's connections with and relationships to the European powers in the 19th and 20th centuries. We will focus on how the intrusion of foreign powers disrupted and shifted long-

standing relationships between Jews and their non-Jewish neighbors, particularly the Muslim populations. We will also explore changes that occurred within the Jewish community as Jews negotiated their place within the new European Imperial system and its subsequent dismantling. Students will have the opportunity to engage with European ideas of "regenerating" North African Jews living under Ottoman Rule, the changing political and social statuses of Jews throughout the French and British regions, the changing relationship between Jews and their non-Jewish neighbors, the rupture caused by both World Wars, and how Jews coped with and responded to the dismantling of European empires and the birth of nation-states in the region, including Israel.

### L22 History 3194 Environment and Empire

In this course we study British imperialism from the ground up. At bottom, the British empire was about extracting the wealth contained in the labour and the natural resources of the colonized. How did imperial efforts to maximize productivity and profits impact the ecological balance of forests, pastures, and farm lands, rivers and rainfall, animals and humans? We'll ask, with environmental historians of the U.S., how colonialism marked a watershed of radical ecological change. The course will cover examples from Asia to Africa, with a focus on the "jewel in the crown" of the British empire: the Indian subcontinent. We'll learn how the colonized contributed to the science of environmentalism, and how they forged a distinctive politics of environmentalism built upon local resistance and global vision, inspired by religious traditions and formative thinkers, not least Mahatma Gandhi.

### L22 History 3195 Empire and Ethnicity: Qing Legacies in China and Inner Asia, 1600 to Today

Eschewing traditional narratives of a "closed" Chinese civilization, this course explores the cultural, religious, and ethnic diversity of China and its dynamic interactions with Inner Asia during the early modern period. It questions the myth of a monolithic Chinese culture and uncovers the region's multiple and ethnically entangled past through an in-depth look at the Manchu-led Qing dynasty (1644-1912). This was the last non-Han dynasty of the Imperial Era, and it gave the People's Republic of China its vast Inner Asian territories: Xinjiang, Inner Mongolia, and Tibet. In rethinking the Qing Empire, this course particularly focuses on Tibetan Buddhism and Islam as religious ideologies that linked China with Tibetan, Mongolian, and Turkic-Muslim regions of Inner Asia through the imperial center at Beijing. Specific topics will range from food culture (Halal) to the Qing's expansion into and later colonization of Xinjiang, the reverberations of which persist even today under the Belt and Road Initiative.

### L22 History 320C Japan Since 1868

For some, the word Japan evokes Hello Kitty, animated films, cartoons, and sushi. For others, it makes them think of the Nanjing Atrocity, "comfort women," the Bataan Death March, and problematic textbooks. Still others will think of woodblock prints, tea ceremonies, and cherry blossoms or perhaps of Sony Walkmans and Toyota automobiles. At the same time, still others may have no image of Japan at all. Tracing the story of Japan's transformations - from a preindustrial peasant society managed by samurai-bureaucrats into an expansionist nation-state and then into its current paradoxical guise of a peaceful nation of culture led by conservative nationalists - provides the means for deepening our understandings of historical change in one region and grappling with the methods and aims of the discipline of history.

### L22 History 321C Introduction to Colonial Latin America until 1825

This course surveys the history of Latin America from the pre-Columbian civilizations through the Iberian exploration and conquest of the Americas until the Wars of Independence (roughly 1400-1815). Stressing the experiences and cultural contributions of Americans, Europeans, and Africans, we consider the following topics through primary written documents, first-hand accounts, and excellent secondary scholarship, as well as through art, music, and architecture: Aztec, Maya, Inca, and Iberian civilizations; models of conquest in comparative perspective (Spanish, Portuguese, and Amerindian); environmental histories; consolidation of colonialism in labor, tributary, and judicial systems; race, ethnicity, slavery, caste, and class; religion and the Catholic Church and Inquisition; sugar and mining industries, trade, and global economies; urban and rural life; the roles of women, gender, and sexuality in the colonies. Geographically, we will cover Mexico, the Andes, and to a lesser extent, Brazil, the Southwest, Cuba, and the Southern Cone. Pre-modern, Latin America.

---

**L22 History 3262 The Early Medieval World: 200-1000**

This course begins with the crisis of the Roman Empire in the third century and the conversion of the Emperor Constantine to Christianity in 312. We will study the so-called "barbarian invasions" of the fourth and fifth centuries and the collapse of the Roman Empire in the West. The Roman Empire in the East (and commonly known as the Byzantine Empire after the seventh century) survived intact, developing a very different style of Christianity than in the lands of the former western empire. Apart from examining Christianization in the deserts of Egypt or the chilly North Sea, we will discuss the phenomenon of Islam in the seventh century (especially after the Prophet Muhammad's death in 632) and the Arab conquests of the eastern Mediterranean and north Africa. In the post-Roman world of the West we will read about the Anglo-Saxons, the Carolingians, and the Vikings. In exploring these topics we will have to think about the relationship of kings to popes, Emperors to patriarchs, of missionaries to pagans, of cities to villages, of the sacred to the profane. Our attention will be directed to things as various as different forms of monasticism, the establishment of frontier communities, the culture of the Arabian peninsula, magic, paganism, military tactics, Romanesque churches, sea travel, manuscript illumination, the architecture of mosques, early medieval philosophy, the changing imagery of Christ, holiness, and violence as a redemptive act.

---

**L22 History 3263 The High Middle Ages: 1000-1500**

This course begins with Latin Christendom in the first millennium and ends with the arrival of Europeans in the Americas. We will study, amongst other topics, the relationship of popes to kings, cities to villages, Jews to Christians, vernacular literature to Latin, knights to peasants, the sacred to the profane, as well as different forms of religious life, farming, heresy, the shift from a penitential culture to a confessional one, the crusades and Islam, troubadour poetry, love, universities, leprosy, the inquisition, Gothic art, the devil, chivalry, manuscript illumination, the Mongol Empire, shoes, definitions of feudalism, environment, trade, scholastic philosophy, female spirituality, witchcraft, sex, the Black Death, food, the Hundred Years War, the formation of "Europe," the renaissance in Italy, enslaved Africans in the Iberian peninsula, and the conquest of the Mexica.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

**L22 History 3266 Scholarship and the Screen: Medieval History and Modern Film**

Historical films are surprisingly accurate reflections of modern historiographical trends in the study of the Middle Ages. This course uses films on the Middle Ages, medieval documentary evidence, scholarship from the time the film was released, and current scholarship. It will explore the shifts in historical interpretation of the Middle Ages over the last century and engage in debates over what evoking the past means for the scholar and the filmmaker.

Credit 3 units. A&S IQ: HUM BU: HUM, IS EN: H

---

**L22 History 3307 The Politics of Black Criminality and Popular Protest**

This course will explore the meanings and perceptions of Black criminality in modern American culture. It will consider issues of rioting and racial violence; movements ranging from hip-hop to Black power; the crucial matter of police brutality; and cultural associations between criminality and Black masculinity. Our work will be informed by an awareness of the historical interactions between African Americans and legal and other systems of authority: in particular, the ambiguous boundaries of legality under slavery, post-emancipation convict leasing, Jim Crow laws, Black gangs, and the functions of illegal acts in the lives of Black citizens. The course will give special attention to the ways that

popular thought, imagination, and culture -- and particularly Black thought and culture -- have addressed crime. How does criminality connect to popular forms of protest, resistance, and discussions about inequality and identity?

**L22 History 331 19th-Century China: Violence and Transformation**

This course traces the history of China over the course of the 19th century, with an emphasis on social and cultural history. This was one of the most tumultuous centuries in Chinese history, during which China faced threats from abroad in the form of Western and Japanese imperialism as well as from within in the form of environmental degradation and rebellions resulting in an unprecedented loss of human life. The 19th century has thus often been portrayed as a period of sharp decline for China. At the same time, we will explore the ways in which the origins of the dynamic society and economy found in China today -- as well as the worldwide influence of overseas Chinese -- can be traced to this century of turmoil.

---

**L22 History 334C Crusade, Conflict, and Coexistence: Jews in Christian Europe**

This course will investigate some of the major themes in the history of the Jews in Europe, from the Middle Ages to the eve of the French Revolution. Jews constituted a classic, nearly continuous minority in the premodern Christian world—a world that was not known for tolerating dissent. Or was it? One of the main purposes of the course is to investigate the phenomenon of majority/minority relations, to examine the ways in which the Jewish community interacted with and experienced European societies, cultures, and politics. We will look at the dynamics of boundary formation and cultural distinctiveness; the limits of religious and social tolerance; the periodic eruption of persecution in its social, political, and religious contexts; and the prospects for Jewish integration into various European societies during the course of the Enlightenment era.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD BU: ETH, HUM, IS EN: H

---

**L22 History 3350 Out of the Shtetl: Jewish Life in Central and Eastern Europe in the 19th and 20th Centuries**

"Out of the Shtetl" is a course about tradition and transformation; small towns and urban centers; ethnicity and citizenship; and nations, states, and empires. At its core, this course asks the following questions: What did it mean for the Jews of Central and Eastern Europe to emerge from small market towns and villages to confront modern ethnicities, nations, and empires? What lasting impact did the shtetl experience have on Jewish life in a rapidly changing environment? The focus is on the Jewish historical experience in the countries that make up

Central and Eastern Europe (mainly the Bohemian lands, Hungary, Poland, and Russia) from the late 18th century to the fall of the Soviet Union. Among the topics that we will cover are Jews and the nobility in Poland-Lithuania; the multicultural imperial state; Hasidism and its opponents; absolutism and reform in imperial settings; the emergence of modern European nationalisms and their impact on Jewish identity; antisemitism and popular violence; nationalist and radical movements among Jews; war, revolution, and genocide; and the transition from Soviet dominion to democratic states.

### **L22 History 3352 China's Urban Experience: Shanghai and Beyond**

The course studies the history of Chinese cities from the mid-19th century to the late 20th century. It situates the investigation of urban transformation in two contexts: the domestic context of modern China's reform and revolution and the global context of the international flow of people, products, capitals, and ideas. It chooses a local narrative approach and situates the investigation in one of China's largest, complex, and most dynamic and globalized cities - Shanghai. The experience of the city and its people reveals the creative and controversial ways people redefined, reconfigured, and reshaped forces such as imperialism, nationalism, consumerism, authoritarianism, liberalism, communism, and capitalism. The course also seeks to go beyond the "Shanghai model" by comparing Shanghai with other Chinese cities. It presents a range of the urban experience in modern China.

---

### **L22 History 3354 Vienna, Prague, Budapest: Politics, Culture and Identity in Central Europe**

The term Central Europe evokes the names of Freud and Mahler; Kafka and Kundera; Herzl, Lukács, and Konrád. In politics, it evokes images of revolution and counter-revolution, ethnic nationalism, fascism, and communism. Both culture and politics, in fact, were deeply embedded in the structures of empire (in our case, the Habsburg Monarchy)--structures which both balanced and exacerbated ethnic, religious, and social struggles--in modern state formation, and in the emergence of creative and dynamic urban centers, of which Vienna, Budapest, and Prague were the most visible. This course seeks to put all of these elements into play--empire, nation, urban space, religion, and ethnicity--in order to illustrate what it has meant to be modern, creative, European, nationalist, or cosmopolitan since the 19th century. It engages current debates on nationalism and national identity; the viability of empires as supra-national constructs; urbanism and modern culture; the place of Jews in the social and cultural fabric of Central Europe; migration; and authoritarian and violent responses to modernity.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

### **L22 History 335C Becoming "Modern": Emancipation, Antisemitism and Nationalism in Modern Jewish History**

This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be-or to become-modern. To answer this question, we look at two broad trends that took shape toward the end of the eighteenth century--the Enlightenment and the formation of the modern state--and we track changes and developments in Jewish life down to the close of the twentieth century with analyses of the (very different) American and Israeli settings. The cultural, social, and political lives of Jews have undergone major transformations and dislocations over this time--from innovation to revolution, exclusion to integration, calamity to triumphs. The themes that we will be exploring in depth include the campaigns for and against Jewish "emancipation;" acculturation and religious reform; traditionalism and modernism in Eastern Europe; the rise of political

and racial antisemitism; mass migration and the formation of American Jewry; varieties of Jewish national politics; Jewish-Gentile relations between the World Wars; the destruction of European Jewry; the emergence of a Jewish nation-state; and Jewish culture and identity since 1945.

### **L22 History 336C History of the Jews in Islamic Lands**

This course is a survey of Jewish communities in the Islamic world, their social, cultural, and intellectual life from the rise of Islam to the Imperial Age. Topics include: Muhammad, the Qur'an and the Jews; the legal status of Jews under Islam; the spread of Rabbinic Judaism in the Abbasid empire; the development of new Jewish identities under Islam (Karaites); Jewish traders and scholars in Fatimid Egypt; the flourishing of Jewish civilization in Muslim Spain (al-Andalus); and Sephardi (Spanish) Jews in the Ottoman empire. On this background, we will look closely at some of the major Jewish philosophical and poetical works originating in Islamic lands. Another important source to be studied will be documents from the Cairo Genizah, reflecting social history, the status of women, and other aspects of daily life.

---

### **L22 History 3404 The Creation of Capitalism**

Capitalism is now the dominant form of economic organization around the world. This course traces the rise of capitalism from its beginnings in late medieval Europe, through its development in the global trade connecting Europe to Africa, Asia, and the Americas, to its formative role in the Industrial Revolution of the early nineteenth century. How and why did capitalism emerge and expand to a position of such importance? Who profited from it and who resisted it? And how did numerous elites become convinced that capitalism was necessary and moral? Students will engage these questions through lectures and class discussions based on primary source readings such as merchant letters, economic legislation, and Adam Smith's *The Wealth of Nations*, as well as key works of historical scholarship on topics such as piracy, the Dutch tulipmania, and the Atlantic plantation economy. Assignments include weekly readings, short response assignments, open-note exams, and researching and developing a time-appropriate business plan.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

### **L22 History 3414 The World is Not Enough: Europe's Global Empires, 1400-1750**

"Non sufficit orbis" (the world is not enough) became the motto for King Philip II of Spain, whose empire touched nearly every part of the globe. Europe's expansion to Africa, Asia, and the Americas was a transforming event for world history and for its willing and unwilling participants. This course examines the religious, political, and economic forces driving the overseas expansion of Europe, compares the experience

of European sailors, soldiers, and merchants in different parts of the world, and analyzes the effect of empire on the colonizers, the colonized, and the balance of world power. Topics covered include: Portuguese and Spanish conquests in the East and West Indies, religious conversion and resistance, trade routes and rivalries, colonial practices and indigenous influence, the establishment of Atlantic slavery, and the rise of the Dutch and English empires.

**L22 History 3416 War, Genocide and Gender in Modern Europe**

This course explores the way in which gender and gender relations shaped and were shaped by war and genocide in 20th century Europe. The course approaches the subject from various vantage points, including economic, social and cultural history, and draws on comparisons between different regions. Topics covered will include: new wartime tasks for women; soldier's treatment of civilians under occupation, including sexual violence; how combatants dealt with fear, injury and the loss of comrades; masculine attributes of soldiers and officers of different nations and in different wartime roles; survival strategies and the relation to expectations with regard to people's (perceived) gender identity; the meanings of patriotism for women and men during war; and gender specific experiences of genocide.

**L22 History 3420 Americans and Their Presidents**

How have Americans understood what it means to be President of the United States? This seminar uses that question as a point of departure for a multidisciplinary cultural approach to the presidency in the United States, examining the shifting roles of the chief executive from George Washington through Barack Obama. In addition to a consideration of the President's political and policymaking roles, this course examines how the lived experiences of presidents have informed the ways Americans have conceived of public and private life within a broader political culture. In the process, this course uses the presidency as a means to explore topics ranging from electioneering to gender, foreign policy to popular media. Readings are drawn from a broad range of fields.

**L22 History 3424 Childhood, Culture, and Religion in Medieval Europe and the Mediterranean World**

From child saints to child scholars and from child crusaders to child casualties, the experience of childhood varied widely throughout the European Middle Ages. This course will explore how medieval Jews, Christians, and Muslims developed some parallel and some very much divergent concepts of childhood, childrearing, and the proper cultural roles for children in their respective societies. Our readings will combine primary and secondary sources from multiple perspectives and multiple regions of Europe and the Mediterranean World, including a few weeks on the history and cultural legacy of the so-called Children's Crusade of 1312. We will conclude with a brief survey of medieval childhood and its stereotypes as seen through contemporary children's books and TV shows. This course fulfills the Language & Cultural Diversity requirement for Arts & Sciences. Same as L66 ChSt 342

**L22 History 343C Europe in the Age of Reformation**

How should people act towards each other, towards political authorities and towards their God? Who decided what was the "right" faith: the individual? the family? the state? Could a community survive religious division? What should states do about individuals or communities who refused to conform in matters of religion? With Martin Luther's challenge to the Roman Catholic Church, the debates over these questions transformed European theology, society, and politics. In this class we will examine the development of Protestant and Radical theology, the Reformers' relations' with established political authorities, the response of the Catholic Church, the development of new social and cultural expectations, the control of marginalized religious groups such as Jews, Muslims, and Anabaptists, and the experiment of the New World.

**L22 History 3450 Modern Germany**

This course surveys the political, social, economic, and cultural forces that have shaped German history since 1800. After examining the multiplicity of German states that existed in 1800, we will identify the key factors that resulted in unification in 1871. We then turn to a study of modern Germany in its various forms, from the Empire through the Weimar Republic and Third Reich, to post-war division and reunification. A major focus will be the continuities and discontinuities of German history, particularly with regard to the historical roots of Nazism and attempts to "break with the past" after 1945.

---

**L22 History 3455 Cultural Encounters: China and Eurasia Since the Middle Ages**

Eschewing traditional narratives of Chinese civilization, which imply a society closed to the outside world, this course follows current scholarship in situating Chinese history within a broader spatial context. In particular, this course explores cultural encounters between China and other subregions of the Eurasian continent to the north and west of China, from the Tang Dynasty (618-907) to the present. The course begins by analyzing the relationship between nomadic societies on the steppe (and, more generally, "non-state spaces") and settled agricultural societies such as China. We then turn to the influence of two religions imported from central Eurasia: Buddhism and Islam. A related theme is the relationship, in the early modern era, between trade, which tended to erode boundaries, and states, which sought to create boundaries. We will then trace the changing dynamics among commerce, religion, and nation-states in the 20th century. Finally, we return to the role of Buddhism and Islam in the contemporary relationship between China and the various peoples and states across its western frontier.

**L22 History 3473 Race, Rights, and Humanity in European History**

This course explores discourses of human rights as natural rights in Europe from the Enlightenment to the present. While Europe -- and particularly France -- has been quick to declare itself the birthplace of human rights, a closer look reveals a broad continuum of conceptions of political, social, and economic rights. The course functions as a kind of survey of Modern European history, touching on the Age of Revolutions, the rise of European overseas empires, international anti-slavery movements, totalitarianism, and postwar development. It focuses on how political, social, and economic rights have always been articulated incompletely, to the benefit of some and to the detriment of others.

---

**L22 History 3481 Revolutionize It!: Second-Wave Feminism and the Struggle for a Radical Movement**

In this discussion-based course, we explore the complex, contradictory and profoundly multiracial history of the so-called "second wave" of the feminist movement (1960s-1980s). We will focus on those activists who understood themselves to be radicals and revolutionaries -- women's liberationists, women of color (or third-world) feminists, and lesbian-feminists -- as they collaborated and collided with each other. Among the questions we will ask are the following: What happens to our understanding of the second wave when we center the activism of African-American, Latinx, indigenous and anti-capitalist feminists? What were the promises and the pitfalls of a politics of "sisterhood"? How did sexual desire and sexual conflict shape both notions of identity and the movement on the ground? We will also consider the legacy of second-wave feminism for the politics of our time, including #MeToo, reproductive freedom, and the struggle for trans liberation. Prerequisite: L77 100B or permission of instructor.

**L22 History 3503 U.S.-China Relations from 1949 to the Present**

The United States and China are the two most important global powers today, and the relationship between them is one of the most comprehensive, complex, and consequential major-power relations in the world. The tangled relationship is at times turbulent, and its future remains uncertain. This course studies the bilateral relationship from the Chinese Civil War to the rise of China as a major political and economic power in the 21st century. It invites students to explore the following questions: What have China and the U.S. done to confront or accommodate each other in global politics? How has foreign policy in both countries balanced the often competing goals of state security, economic stability, domestic political order, and international influence? What are the impacts of a rising China on geopolitics in

the Asia-Pacific region and on the U.S.'s global leadership in the 21st century? By drawing on scholarship in political and social history and area studies, this course helps students better understand both the historical context and current developments of U.S.-China relations. Fulfills modern elective for EALC major.

**L22 History 3514 Race, Ethnicity, and Migration: A Transatlantic History**

This course interrogates the making and re-making of racial and ethnic categories in the long history of transatlantic migration from the 1850s to the present. We will examine how the steady movement of people and ideas between Europe and the United States have shaped the discourses and policies of immigration, social reform, and globalization on both sides of the mighty Atlantic. Students will be exposed to historical processes and discourses which not only affected the racialization of different groups in various nations but also the ways in which those processes and discourses were influenced by events unfolding across vast spaces. Rather than simply working in a comparative modality, students will think relationally and transnationally to explore the material and representational consequences of racial and ethnic politics.

---

**L22 History 3548 Gender, Sexuality and Communism in 20th-Century Europe**

This upper-division course examines the role of gender and sexuality for the establishment of communist societies in Europe in 20th century. We will explore to what extent societies built on the communist model succeeded with the achievement of gender equality and allowed for sexual relations liberated from religious or economic constraints. Class materials examine how state socialism shaped gender roles and women's and men's lives differently as well as how gays and lesbians struggled against social taboo and state repression. Students analyze the impact of modernization, industrialization, war and other conflicts on concepts of femininity and masculinity as well as on the regulation of sexuality and family relations in several Eastern European countries. We will place these dynamics within the context of broader political and cultural developments, ending with an analysis of the breakdown of socialism in the early 1990s and its impact on gender relations and the freedom of expression. The course provides students with a basic knowledge of the history of Eastern Europe and of left-wing movements active in the area, emphasizing the effects of communist ideas on women, gender equality, and non-normative sexual orientations.

**L22 History 3561 Andean History: Culture and Politics**

Since pre-Columbian times, the central Andean mountain system, combining highlands, coastal and jungle areas, has been the locus of multiethnic polities. Within this highly variegated geographical and cultural-historical space, emerged the Inca Empire, the Viceroyalty of Peru - Spain's core South American colony, and the central Andean republics of Ecuador, Peru, and Bolivia. Taking a chronological and thematic approach, this course will examine pre-Columbian Andean societies, Inca rule, Andean transformations under Spanish colonialism, post-independence nation-state formation, state-Indian relations, reform and revolutionary movements, and neoliberal policies and the rise of new social movements and ethnic politics. This course focuses primarily on the development of popular and elite political cultures, and the nature and complexity of local, regional, and national power relations.

**L22 History 3563 Ancient Sport and Spectacle**

Ancient sport and spectacle seem both familiar and foreign to us today. We share the Greek obsession with athletic success, and we have revived their Olympic games-and yet the Greeks competed nude and covered in oil and included in their celebration a sacrifice of 100 oxen to Zeus. So too do we recognize the familiar form of the Roman arena, but recoil from the bloody spectacles that it housed. In this class we will examine the world of ancient Greco-Roman sport and spectacle, seeking to better understand both ancient culture and our own. We will consider Greek athletic competition, Roman gladiatorial combat, chariot racing, and other public performances. We will set these competitions in their social and historical context, considering both their evolution and their remarkable staying power.

---

**L22 History 357 All Measures Short of War**

This course focuses on the return of great power competition in the 21st century. In particular, it examines the security challenges facing the United States in the form of strategic competition from revisionist states (Russia and China) and hostile threats from rogue regimes (Iran and North Korea). Through a consideration of the strategic, military, political, economic, and intelligence dynamics germane to foreign policy and national security, it will examine the hypothesis that the United States is not likely to go to hot war with any of these four nations but instead resort to what President Roosevelt in another context and time famously called "all measures short of war" -- in other words, engaging one another through new technologies such as cyber, artificial intelligence, robotics, big data, hypersonics, biotechnology, and other means that have come to demarcate a hybrid battlefield in an age of hostile competition. As such, the course will assess the recent past, current state, and likely future of American power in the new global security environment.

---

**L22 History 3593 The Wheels of Commerce: From the Industrial Revolution to Global Capitalism**

This course introduces the methods, issues, and debates that shape our understanding of economic change and development from the Industrial Revolution to the post-industrial age. Engaging economic theorists from Marx to Smith, to Weber and Wallerstein, this course problematizes the notion of rational economic actors and interrogates notions of free trade in an attempt to understand the impact of capitalism on the world. We start the course with a discussion of the "exceptionalism" of Great Britain as the first industrial nation and reconsider the impact of new trade, production, property and monetary/financial regimes that resulted in the so-called "Great Divergence" between China and the West. We then turn to the "late industrializers" of China, Japan, and Mexico in order to investigate the varieties of development, specifically focusing on monetary integration, legal integration and the global impact of the great depression. Continuing into the Bretton Woods Conference and the post-war international monetary systems, we bring the course to a close with the advent of the "post-industrial age." This course is designed both for students specializing in economic history and students in all disciplines interested in historical approaches to political/economic development.

Credit 3 units. A&S IQ: HUM, LCD BU: BA, HUM EN: H

---

**L22 History 3598 The First World War and the Making of Modern Europe**

The First World War ushered our age into existence. Its memories still haunt us and its aftershocks shaped the course of the twentieth century. The Russian Revolution, the emergence of new national states, Fascism, Nazism, the Second World War, and the Cold War are all its products. Today, many of the ethnic and national conflicts that triggered war in 1914 have resurfaced. Understanding the First World War, in short, is crucial to understanding our own era.

---

**L22 History 3599 Travelers, Tricksters, and Storytellers: Jewish Travel Narratives and Autobiographies**

Jewish literature includes highly fascinating travel accounts and autobiographies that are still awaiting their discovery by a broader readership. In this course, we will explore a broad range of texts originating from the Middle Ages to the 19th century. They were written by both Ashkenazi and Sephardi Jews hailing from countries as diverse as Spain, Italy, Germany, and the Ottoman Empire. Among the authors were pilgrims, rabbis, merchants, and one savvy businesswoman. We will read their works as responses to historical circumstances and as expressions of Jewish identity, in its changing relationship to the Christian or Muslim environment in which the writers lived or traveled. Specifically, we will ask questions such as: How do travel accounts and autobiographies enable their authors and readers to reflect on issues of identity and difference? How do the writers produce representations of an "other," against which and through which they define a particular sense of self? This course is open to students of varying interests, including Jewish, Islamic, or Religious Studies, medieval and early modern history, European or Near Eastern literatures. All texts will be read in English translation. Please note: L75 559 is intended for graduate students only.

**L22 History 35SM Hands on the Past: History, Murder and the Archive**

The future depends on the past. This course taps into that understanding by offering an alternative hands-on methods class to encourage undergraduate student engagement with history and archives, both on and off line. In this particular class, students will be nurtured to more deeply interact with the historical past by exploring gender, race, violence and sexuality through three central questions explored throughout the course: What and how is African American history conducted? How do we best document the past with students fully at the intellectual table of production and preservation? How do we make history with history? These exciting and diverse interests will be pursued through in class discussions and course assigned readings, but especially by taking a spring break research project trip across Missouri to various local repositories and the State archives, to activate and fuel the idea of putting hands on the past.

**L22 History 3600 Beyond Sea, Sunshine and Soca: A History of the Caribbean**

This course examines major themes in the history of the Caribbean from the fifteenth to the twentieth century. The first half of the course will focus on the fifteenth to the nineteenth century, exploring issues such as indigenous societies, European encounter and conquest, plantation slavery, the resistance of enslaved Africans and emancipation. The remainder of the course focuses on aspects of the cultural, economic, political and social experiences of Caribbean peoples during the twentieth century. Major areas of inquiry include the labor rebellions of the 1930s, decolonization, diasporic alliances, Black Power, identity construction and the politics of tourism. While the English-speaking Caribbean constitutes the main focus, references will be made to other areas such as Cuba and Haiti.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

**L22 History 3609 Jamaica: A Political History**

This course examines the political history of Jamaica from the colonial period to the 1970s. Students will use primary documents (speeches, policy documents, etc.), secondary sources (historical monographs, political biographies, etc.), and film to engage the evolution of Jamaica's government. The course begins by exploring the colonial governmental apparatus with a view to grasping the impact of the British system on the island's current political apparatus. This will allow students to engage important debates concerning the transition from colony to postcolony. Additionally, students will discuss the relationship between the governmental structure and the ever-evolving socio-cultural realities in Jamaica, especially as it pertains to race, class, gender, culture, clientelism, patronage, and national identity.

**L22 History 361 Topics in History and Technology**

The history of computing from mechanical calculating devices to electronic digital computers. This course will examine technical systems in terms of the nexus between technologies and the humans who operate them. Emphasis will be placed on the interconnections between technological and cultural change.

Credit 3 units. BU: HUM

---

**L22 History 3613 Women and Social Movements: Gender and Sexuality in U.S. Social Movements with History**

This course examines the history of grassroots activism and political engagement of women in the United States. Looking at social movements organized by women or around issues of gender and sexuality, class texts interrogate women's participation in, and exclusion from, political life. Key movements organizing the course units include, among others: the Temperance Movement, Abolitionist Movements, the Women's Suffrage Movements, Women's Labor Movements, Women's Global Peace Movements, and Recent Immigration Movements.

Readings and discussion will pay particular attention to the movements of women of color, as well as the critiques of women of color of dominant women's movements. Course materials will analyze how methods of organizing reflect traditional forms of "doing politics," and we will also examine strategies and tactics for defining problems and posing solutions particular to women. Prerequisites: any 100- or 200-level Women, Gender, and Sexuality Studies course or permission from the instructor.

---

**L22 History 3620 Aliens and Undesirables: The Making of American Immigrants**

What makes the "right kind of immigrant?" This question has been on the minds of Americans for generations, yet we still are often left without an answer. This course explores that question by proposing another set of questions: "what is an immigrant?" "How are certain people included or excluded from this category?" and "why is immigration still a concern in the 21st century?" We will explore these questions by examining cultural materials such as film, music, photographs, and ephemera alongside the social, legal, and political discourses which framed immigration throughout the long 20th century. We will learn about refugees from Europe, migrants from Latin America, and those deemed "undesirable" from around the world as they travelled to our own fine city of Saint Louis. Starting in the late 19th century this course will untangle the legislative, cultural, and political actions that impact the discussions around immigration and migration today. A large component of the course will explore the cultural productions which overlapped with the social and political discourses and ensured the longevity and spread of those ideas far beyond the homes and halls of the powerful and into the streets and theaters of the nation. Examining the cultural artifacts that individuals

and groups produced for the public allows us to practice historical thinking, material cultural analysis, and draw connections between different time periods and emergent concerns. Throughout the course students will have the opportunity to examine primary source material alongside selected texts which explore the various immigration issues related to concerns around mobility including race, ethnicity, gender, sexuality, and progressive and liberal politics. In the end students will walk away from this course with an understanding of the historical forces which have shaped American immigration from the calls of Benjamin Franklin to exclude Germans to the cries of "Build the Wall" in the 21st century.

### **L22 History 3630 Mapping the World of Black Criminality**

Ideas concerning the evolution of violence, crime, and criminal behavior have been framed around many different groups. Yet, what does a typical criminal look like? How does race - more specifically blackness - alter these conversations, inscribing greater fears about criminal behaviors? This course taps into this reality examining the varied ways people of African descent have been and continue to be particularly imagined as a distinctly criminal population. Taking a dual approach, students will consider the historical roots of the policing of black bodies alongside the social history of black crime while also foregrounding where and how black females fit into these critical conversations of crime and vice. Employing a panoramic approach, students will examine historical narratives, movies and documentaries, literature, popular culture through poetry and contemporary music, as well as the prison industrial complex system. The prerequisite for the course is L90 3880(Terror and Violence in the Black Atlantic) and/or permission from the instructor, which will be determined based on a student's past experience in courses that explore factors of race and identity. For AFAS majors, this course counts as Area Requirement 2. Same as L90 AFAS 363

### **L22 History 365 The Birth Crisis of Democracy: The New United States of America, 1776-1850**

"Go get yourself some democracy!" Americans have so often preached to other nations, but just how did Americans themselves go about creating the world's largest and most successful democratic republic? How democratic was this violent new nation that reeled from one crisis to another and ultimately to the brink of collapse in its first 75 years? This survey of American history from the creation of the Republic to the eve of the Civil War explores the Revolution and its ambiguous legacies, the starkly paradoxical "marriage" of slavery and freedom, and the creation of much of the America that we know; mass political parties; a powerful presidency; sustained capitalist growth; individualistic creeds; formalized and folkloric racism; heteronormative patriarchal family life; technological innovation; literary experimentation; distinctively American legal, scientific and religious cultures; and the modern movements of labor, feminism, and African-American empowerment. Prerequisite: sophomore standing or permission of the instructor. Modern, U.S.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM, IS EN: H UColl: HSP, HUS

### **L22 History 366 The Living American Civil War**

This course focuses on the Civil War and Reconstruction as the central drama of American life in the 19th century, and also, the central event of American history itself, to the present day. How do we begin to understand the significance of the killing fields of the American Civil War, its three quarters of a million dead? The bloody conflict, and its causes and consequences, are explored from multiple perspectives: those of individuals such as Lincoln, McClellan, Davis, Grant, Longstreet and Lee, Dix and Tubman, Douglas and Douglass, who made momentous choices of the era; of groups such as the African American freedpeople and the Radical Republicans, whose struggles for freedom and power helped shape the actions of individuals; and of the historians, novelists, filmmakers and social movements that have fought to define the war's legacy for modern America. How is the Civil War both long ended and, at the same time, very much alive and still contested in contemporary America? Modern, U.S. PREREQUISITE: Sophomore standing or permission of the instructor.

### **L22 History 3662 Experts, Administrators and Soldiers:**

#### **Governance and Development in Post-Colonial Africa**

Between 1957 and 1975, one African territory after another made the transition from European colony to independent nation state. Widespread optimism that these "transfers of power" would bring a new era of prosperity and dignity dissipated quickly as the new nations struggled with political instability, military coups, social unrest, and persistent poverty. Consequently many western observers and development specialists are certain that they have become "failed states" requiring foreign assistance to develop properly. This course challenges these assumptions by tracing the origins of African governance and economic development from their imperial origins into the independence era. By exploring nation-building, economic planning, and public administration from the perspective of political elites, foreign experts, and ordinary people the class takes an intimate look at how colonies became nation states. These new perspectives offer students a historical grounding in international public administration and development by exploring how imperial ideas and concepts continue to influence contemporary social planning and development policy in both Africa and the wider world.

### **L22 History 3663 Caste: Globalization, Sexuality and Race**

Be it sati or enforced widowhood, arranged or love marriage, the rise of national leaders like Indira Gandhi and Kamala Harris, or the obsession with "fair" skin, caste shapes possibilities and perceptions for billions. In this class we combine a historical understanding of the social caste structure with the insights made by those who have worked to annihilate caste. We will re-visit history with the analytic tools provided by the concepts of compulsory endogamy, "surplus woman," and "brahmanical patriarchy," and we will build an understanding of the enduring yet invisible "sexual-caste" complex. As we will see, caste has always relied on sexual difference, its ever-mutating power enabled by the intersectionalities of race, gender and class. We'll learn how caste adapts to every twist in world history, increasingly taking root outside India and South Asia. We will delve into film and memoir, sources that document the incessant injustices of caste and how they have compounded under globalization. The class will research the exchange of concepts between anti-race and anti-caste activists: how caste has shaped the work of prominent anti-racist intellectuals and activists in the United States such as W.E.B. DuBois and Isabel Wilkerson and in turn, the agenda and creativity of groups such as the Dalit Panthers. Finally, the course will build a practical guide to engaging with and interrupting caste in the context of the contemporary global world today. Waitlists controlled by Department; priority given to WGSS majors. Enrollment cap 15.

**L22 History 367 America in the Age of Inequality: The Gilded Age & the Progressive Era, 1877-1919**

This course will explore dramatic changes in American society during the half-century from the Civil War to the end of WWI. We will discuss industrialization; mass immigration from Europe, Asia and Latin America; the vast movement of rural people to cities; the fall of Reconstruction and rise of Jim Crow; the expansion of organized labor; birth of American Socialism; and the rise of the American empire in the Caribbean and the Philippines. The course will, in addition, analyze the many and varied social reform efforts of the turn of the twentieth century, from women's suffrage to anti-lynching campaigns; from trust-busting and anti-immigrant crusades to the settlement house movement.

**L22 History 3670 The Long Civil Rights Movement**

The Civil Rights Movement is known as a southern movement, led by church leaders and college students, fought through sit-ins and marches, dealing primarily with non-economic objectives, framed by a black and white paradigm, and limited to a single tumultuous decade. This course seeks to broaden our understanding of the movement geographically, chronologically, and thematically. It pays special attention to struggles fought in the North, West and Southwest; it seeks to question binaries constructed around "confrontational" and "accommodationist" leaders; it reveals how Latinos, Native Americans, and Asian Americans impacted and were impacted by the movement; and it seeks to link the public memory of this movement with contemporary racial politics.

**L22 History 3672 Medicine, Healing and Experimentation in the Contours of Black History**

Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, this course examines the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus will be extended towards the underpinnings of race and gender in the medical treatment allocated across time and space--the U.S., Caribbean, and Latin America--to give further insight into the roots of contemporary practice of medicine.

**L22 History 3681 The U.S. War in Iraq, 2003-2011**

This course presents a historical assessment of the United States' eight year war in Iraq from its inception on March 20, 2003, to the withdrawal of all combat troops on December 15, 2011. Topics to be covered include: the Bush Administration's decision to make Iraq part of the "War on Terror" and the subsequent plan of attack; the combat operations; losing the victory; sectarian violence; torture; the insurgency; battling Al-Qaeda in Iraq; reassessment; the surge; the drawdown; and the end of the war. The course will conclude with an assessment of the war's effectiveness regarding the Global War on Terrorism and U.S. policy in the Middle East.

**L22 History 36CA Heroes and Saints in India: Religion, Myth, History**

This course provides an introduction to the history of modern India and Pakistan through the voices of the Indian subcontinent's major thinkers. We will spend time in the company of saints, from the "great-souled" Mahatma Gandhi to the Sufi scholar Ashraf 'Ali Thanawi, and we will travel alongside the heroes of peasant politics, women's rights, and struggles for national and social freedom and equality. We will immerse ourselves in the rich narrative heritage of India -- as it has been challenged, reworked, and harnessed for present and future needs -- from the 19th century through the present. Lecture and discussion format; prior knowledge of India or Pakistan not required.

**L22 History 3714 What a Way to Make a Living: Work, Politics, & Culture in the 20th Century United States**

This course explores the lives, labors, and leisure of working people in the twentieth century United States. Students will focus on the seismic transformations and bitter conflicts that went into making a mass production, mass consumption society. How did working people experience and fight to exert control over jobs increasingly dictated by the unyielding pace of vast assembly lines? What happened when manufacturing jobs disappeared? Who left? Who got left behind? How were households and neighborhoods made and remade by huge movements of people from the countryside into cities, and then from urban centers to suburban sprawl? How have working people narrated their own stories from below, and, in turn, how has working life been narrated and (re)packaged from above? To answer these questions, and many more, we will pay close attention to how the organization of work under 20th century capitalism (re)defined social hierarchies, the meaning of citizenship, and racial, gendered, and sexual identity.

---

**L22 History 3715 Unruly Populations: Biopolitics in 20th-Century Europe**

While modern European history is usually told as a rapid succession of political revolutions, social reforms, and expanding civil rights, this course centers demographics as the driving force of change and presents Europe's turbulent 20th century as a struggle for population control. Beginning at the turn of the century, the course critically examines what it meant to understand and govern society as a population and interrogates the state tools used to record and stratify populations by attributes of race, ethnicity, sex, and age. It then considers how the tenet of biopolitics has influenced policies towards health care, schooling, social security, the food economy, urban development, and migration in Europe and across its overseas empires. The course also explores how individual historical actors, including colonial subjects, refugees, and women's rights activists, have challenged and evaded this pervasive government of life.

**L22 History 3722 The American South: Histories, Cultures, and Representatives Beyond a Region**

In 1995 Atlanta based hip hop group Goodie Mob released their debut album entitled Soul Food. On the record is a song called "Dirty South." The track talks about life in the South highlighting the war on drugs, racism, and stereotypes that people thought about Black southerners. That same year another Southern hip hop group, Outkast, won the best new hip hop award and brought widespread attention to the rap and hip-hop scene which had been dominated by East Coast and West Coast artists. A new generation of Southern music would quickly become the dominant form of hip hop we hear today. In the early albums you hear lines which ask what it means to be Southern, questions where the South is, and speaks of Southern culture. We will attempt to answer some of those questions that Goodie Mob, Outkast, and more recently Beyoncé posed through a historical exploration of a region steeped in mystery and mystique. The South has fascinated generations of Americans, often represented as a deeply divided and troubled area of backward peoples and histories which continue to shock the nation. At the same time, the South is home to more diverse peoples, businesses, foodstuffs, and geography than most of the United States. The South often defies expectations and surprises the most seasoned social scientist. This course will introduce students to the history of a place that is both familiar and strange while exploring difficult issues of race, ethnicity, and identity. Students will be exposed to a variety of sources including music, film, and art produced by and/or about Southerners. Students will walk away from this course with a deeper understanding of the diversity of cultures and histories of the South and question what makes the South exceptional.

---

**L22 History 3748 Of Dishes, Taste, and Class: History of Food in the Middle East**

This course will cover the history of food and drink in the Middle East to help us understand our complex relation with food and look at our lives from perspectives we intuitively feel or by implication know, but rarely critically and explicitly reflect on. Food plays a fundamental role in how humans organize themselves in societies, differentiate socially, culturally, and economically, establish values and norms for religious, cultural, and communal practices, and define identities of race, gender, and class. This course does not intend to spoil, so to speak, this undeniably one of the most pleasurable human needs and activities, but rather to make you aware of the social meaning of food and reflect on how food shapes who we are as individuals and societies. We will study the history of food and drink in the Middle East across the centuries until the present time, but be selective in choosing themes, geographic regions, and historical periods to focus on. Please consult the instructor if you have not taken any course in the humanities. Enrollment priority given to seniors and juniors.

---

**L22 History 3770 History of Slavery in the Middle East**

This course examines slavery and its abolition in the Middle East and North Africa from 600 C.E. to the 20th Century. It addresses slavery as a discourse and a question of political economy. We begin with an overview of slavery in late antiquity to contextualize the evolution of this practice after the rise of Islam in the region. We then examine how it was practiced, imagined, and studied under major empires, such as the Umayyads, the Abbasids, the Fatimids, the Mamluks, the Ottomans, and the Safavids. In addition to examining the Qur'anic discourse and early Islamic practices of slavery, to monitor change over time we address various forms of household, field, and military slavery as well as the remarkable phenomenon of "slave dynasties" following a chronological order. We discuss, through primary sources, theoretical, religious, and moral debates and positions on slavery, including religious scriptures, prophetic traditions, religious law, and a plethora of narratives from a range of genres. We highlight a distinct theme each week to focus on until we conclude our discussion with the abolition of slavery in the 19th and 20th centuries. Topics of discussion include various forms of male and female slavery, Qur'anic and prophetic discourse on slavery, legal and moral views on slavery, slavery as represented in religious literature, political, military, and economic structures of slavery, issues of race and gender as well as slave writings to reflect on the experiences of slavery from within. The goal is to enable students to understand the histories of slavery in the Middle East and eventually compare it to that of other regions and cultures, such as European and Atlantic slavery. No second language required.

### L22 History 3785 The Second British Empire in World History

Throughout most of the nineteenth century it appeared that the British Empire was winding down. Most of British North America was now the United States of America, and the remaining West Indian colonies were less valuable after the abolition of slavery. The Indian mutiny and the demise of the Imperial British East India Company raised similar doubts about the worth of Britain's Asian possessions. Yet by 1900 Britain ruled 400 million people and one quarter of the habitable globe, and most Britons were confident that this new "second" British Empire would rival the Roman Empire by lasting for centuries. This course surveys the sudden rise and equally unexpected collapse of the twentieth century British Empire from the perspective of its subjects.

### L22 History 3803 Ancient Greek and Roman Medicine

This course introduces students to the practice and theory of medicine in the ancient Mediterranean, beginning in Egypt and continuing through Greece and Rome. It ends in the Middle Ages. Greco-Roman medicine will be our focus. How was disease understood by practitioners and, as far as can be reconstructed, by laypeople? What form did surgical, pharmacological, and dietetic treatment take? What were the intellectual origins of Greek medicine? The social status of medical practitioners? How was medicine written and in what terms did its practitioners conceive it?"

### L22 History 3809 Furies and Die-Hards: Women in Rebellion and War

Furies and Die-Hards: Women in Rebellion and War juxtaposes contemporary social science perspectives on women and war with the history and testimonies of Irish women during the Irish revolutionary period (1898-1922), the Irish Civil War (1922-1923), and the Free State. Under English rule from the 12th-century Norman invasions to the establishment of the Irish Free State and the partition of Northern Ireland in 1922, Ireland presents a compelling historical laboratory to deliberate on the relationship between gender and political conflict. Intentionally transdisciplinary, the course draws from across disciplinary discourses and highlights perspectives across race, gender, class, ethnicity, religion, and sexuality. Topics include political organizing, nationalism, rebellion, radicalization, militarism, terrorism, pacifism, and peacebuilding. Rooted in Cynthia Enloe's enduring question of "Where are the women?" and drawing on sociologist Louise Ryan's landmark essay by the same name, we inquire how and why Irish nationalist women, who were integral to building the revolutionary movement, became "Furies" and "Die-hards" in the eyes of their compatriots when the Free State was established (Bishop Doorley, 1925; President Cosgrave, 1923). Taking advantage of the plethora of archival resources now available through the Irish Decade of Centenaries program, the course incorporates the voices of Irish women through their diaries, military records, letters, interviews, speeches, newspapers, and memoirs.

### L22 History 3810 Between Sand and Sea: History, Environment, and Politics in the Arabian Peninsula

Although it is today primarily associated with oil, the Arabian peninsula was for most of its history defined by water: its surrounding seas, its monsoon-driven winds, and its lack of water in its vast and forbidding interior deserts. As home to the major holy cities of Islam and a key source of global oil, the region has played an important role in the Western European and North American imagination. Despite being relatively sparsely populated, the peninsula hosts millions of believers each year on the annual Muslim pilgrimage, and it has been the site

of major wars and military occupations by European, American, and other Middle Eastern countries for much of the 20th and 21st centuries. It has been an outpost of the Ottoman Empire, a center of British colonialism and (at Aden) an axis of its global empire, the location of Egypt's "Vietnam" (its long war in Yemen in the 1960s), the Gulf Wars I and II, and the recent wars in Yemen, to name just a few of the major conflicts. Often depicted as unchanging until caught up by the influx of massive oil wealth, this region is frequently characterized as a place of contradictions: home to some of the world's largest skyscrapers and also the most inhospitable and largest sand desert in the world, known as "the Empty Quarter"; the location of crucial American allies and the home of al-Qaeda founder Usama Bin Laden. In this course, we will examine the development of the peninsula historically to understand these contradictory images. We will investigate changes in the following arenas: environment and society; colonial occupation; newly independent states; the demise and development of key economic sectors (pearling; shipping; agriculture; oil; finance; piracy); political regimes; resources such as water, oil, and date palms; the growth of oil extraction infrastructure and its effects on the political regimes and societies in the region; the emergence of new Gulf cities; Islamic law; women's rights; human rights debates; and religious and ethnic minorities.

### L22 History 3831 Magicians, Healers, and Holy Men

Magic is perhaps not one of the first words one associates with Greco-Roman antiquity. Yet for most individuals living in the ancient Mediterranean, including philosophers, businessmen, and politicians, magic was a part of everyday life. Casting spells, fashioning voodoo dolls, wearing amulets, ingesting potions, and reading the stars are just some of the activities performed by individuals at every level of society. This course examines Greco-Roman, early Christian, and Judaic "magical" practices. Students read spell-books which teach how to read the stars, make people fall in love, bring harm to enemies, lock up success in business, and win fame and the respect of peers. Students also look at what is said, both in antiquity and in contemporary scholarship, about magic and the people who practiced it, which helps illuminate the fascinating relationship between magic, medicine, and religion.

### L22 History 3840 Migration and Modernity in Russia and the (Former) Soviet Union

This course introduces students to a broad history of 19th- and 20th-century Russia and the Soviet Union alongside problems of migration. In this course, students will be introduced to the historical, social, and political dimensions of migration within, to, and from the Russian Empire, the Soviet Union, and its successor states. We will look at the intersection of the movement of people with long-term economic, social and political transformations, but we will also pay attention to crucial events and phenomena of Soviet history that set large-scale migrations in motion. Course materials will, for instance, address mass movements related to modernization and internal colonization, analyze the role of revolutionary change and warfare for forced displacement, and study the implications of geopolitical changes in the aftermath of the breakdown of the USSR for human rights discourses. Alongside this historically grounded overview, the course explores concepts of citizenship, diaspora, nationality policy, gender-specific experiences of migration, and the ethics and political economy of migration politics, thereby highlighting how current trends in Russian society are indicative of broader discourses on difference and social transformation.

**L22 History 3843 Filming the Black Freedom Struggle in St. Louis**

This inter-disciplinary course introduces students to the history of the Black freedom struggle in St. Louis and to the complex and multiple ways historic narratives are constructed. We will explore the political, economic and cultural history of St. Louisans who challenged racial segregation in housing and work, fought white mobs in city streets, and battled the destruction of Black communities by federal urban renewal and public housing policies. Students, working with a historian and a filmmaker, will research and make a documentary film on a piece of St. Louis' crucial contribution to the Black Freedom Struggle in America. We bring together documentary filmmaking and history research to draw attention to the multiple narratives (many long-neglected) of African American and urban history, and to the multiple approaches to presenting history.

**L22 History 385 Topics in American History: The Urban Crisis: Historical Perspectives on Modern American Cities.**

Since World War II, American cities have undergone enormous changes. Industrial decline, rumbling neighborhoods, rigid segregation, racial trauma, and suburban sprawl have all contributed to a troubled urban world. This course will equip students with an historical perspective on the urban crisis. Rather than simply identifying urban problems, we will use the tools of historical inquiry to grapple with the underlying causes of these problems. Students will learn the value of history as a method for illuminating the social, cultural, political, and economic forces that underlie the current urban crisis. Students will also apply their historical understandings toward the creation of an informed position on metropolitan policy and planning issues.

**L22 History 3856 The Sephardic World: 1492 to the Present**

In the public perception, modern Jews divide into two subethnic groups: Ashkenazi and Sephardi, or European and Middle Eastern Jews. However, this is an oversimplification that does not do justice to the diversity and complex history of Jewish identities, which are often multilayered. Strictly speaking, Sephardi Jews trace their ancestral lines or cultural heritage to the medieval Iberian Peninsula, present-day Spain and Portugal. That said, according to some scholars, Sephardi Judaism did not even exist before the general expulsion of Spanish Jewry in 1492 and is the result of their subsequent migrations within the Mediterranean and transatlantic worlds. We will start with an introduction into the history of Spanish Jews prior to 1492, asking to what extent memories of pre-expulsion Iberia are at the heart of Sephardi identity. We will then follow the migratory path of Sephardi exiles to North Africa, Italy, the Ottoman Empire, the Netherlands, and the Americas. The questions we will explore include: in what sense did Sephardim form a transnational community? How did they transmit and transform aspects of Spanish culture in form of Ladino (Judeo-Spanish) language and literature? How did they become intermediaries between Christian Europe and the Ottoman Empire? What was their

role in Europe's transatlantic expansion and the slave trade? How did Ottoman and North African Jews respond to European cultural trends in the nineteenth century and create their own forms of modernity? How did the Holocaust impact Sephardi Jews?

**L22 History 3860 Empire in East Asia: Theory and History (WI)**

An introduction to how historians and anthropologists incorporate theoretical insights into their work, this course first "reverse engineers" the main arguments in several insightful books and articles on empire in Asia, arguments which are informed by a range of theorists. Retaining our theoretical knowledge, we then focus on the more empirical aspects of the Japanese empire in Asia, including settler colonialism, the colonial economy, representations of colonialism and the long-term ramifications of empire. We conclude with a general assessment of the history of empire. In these ways, this course seeks to equip students with a knowledge of empire in East Asia in the late 19th and 20th centuries while simultaneously investigating the nature of that knowledge.

**L22 History 3900 Mormon History in Global Context**

The focus of this seminar is Mormonism, meaning, primarily, the Church of Jesus Christ of Latter-day Saints, which is the largest Mormon body. Mormons in the United States have gone from being one of the most intensely persecuted religious groups in the country's history to the fourth largest religious body in the U.S., with a reputation for patriotism and conservative family values. Because of its vigorous missionary program, the LDS Church now has more members outside the U.S. than inside. This seminar will introduce the basic practices and beliefs, and explore issues regarding economics, race, gender, and sexuality within the faith. These issues include: How did conflicts over Mormonism during the 19th century, especially the conflict over polygamy, help define the limits of religious tolerance in this country? How have LDS teachings about gender and race, or controversies about whether or not Mormons are Christian, positioned and repositioned Mormons within U.S. society? What does the LDS faith look like in other parts of the world, and how does its identification with U.S. prosperity and politics shape its growth in other places?

**L22 History 3904 Existentialist Thought**

Existentialism "begins with a disoriented individual facing a confused world that s/he cannot accept" (Robert Solomon). Existentialists seek to make meaning of the brokenness (Marcel), dislocation (Merleau-Ponty), and ambiguity (de Beauvoir) of modern life. While its origins go back

to the nineteenth-century (Kierkegaard, Dostoevsky, Nietzsche), with even older antecedents, as a specific moment in the history of ideas existentialism was created in response to the "age of anxiety" from the end of World War I through the 1960s. It continues to ripple through to the present. We will explore the richness and depth of the canonic figures of existentialism. But we will also consider how that canon was itself shaped and what this entailed for how these thinkers have been understood. We will consider existentialist giants such as Sartre and Heidegger. But we will also spend time with less totemic thinkers. One key thematic strand will focus on is race and existentialism. In short, we will explore why existentialism continues to speak to the Millennial generation's concerns about the meaning and purpose of human existence.

**L22 History 3921 Secular & Religious: A Global History**

Recent years have seen a dramatic rethinking of the past in nearly every corner of the world as scholars revisit fundamental questions about the importance of religion for individuals, societies and politics. Is religion as a personal orientation in decline? Is Europe becoming more secular? Is secularism a European invention? Many scholars now argue that "religion" is a European term that doesn't apply in Asian societies. This course brings together cutting-edge historical scholarship on Europe and Asia in pursuit of a truly global understanding. Countries covered will vary, but may include Britain, France, Turkey, China, Japan, India and Pakistan.

**L22 History 394C African Civilization to 1800**

Beginning with an introduction to the methodological and theoretical approaches to African history, this course surveys African civilization and culture from the Neolithic age until 1800 AD. Topics include African geography and environmental history, migration and cross-cultural exchange, the development of Swahili culture, the western Sudanese states, the trans-Atlantic slave trade, and the historical roots of apartheid. For AFAS majors, this course counts as Area Requirement 4.

**L22 History 395C African Civilization: 1800 to the Present**

Beginning with social and economic changes in 19th Century Africa, this course is an in-depth investigation of the intellectual and material culture of colonialism. It is also concerned with the survival of pre-colonial values and institutions, and examines the process of African resistance and adaptation to social change. The survey concludes with the consequences of decolonization and an exploration of the roots of the major problems facing modern Africa.

**L22 History 3977 The Making of the Modern Catholic Church**

This course examines the work of three church councils that put their stamp on the Catholic Church at key moments in its history, making it what it is today. The first section is dedicated to the Fourth Lateran Council (1215), which defined the high medieval church as an all-encompassing papal monarchy with broad powers over the lives of all Europeans, Christian and non-Christian alike. In the second section we turn our attention to the Council of Trent (1545-1563), which responded to the threat posed by the Protestant Reformation by reforming the Catholic church, tightening ecclesiastical discipline, improving clerical education, and defining and defending Catholic doctrine. We conclude with a consideration of the largest church council ever, Vatican II (1962-1965), which reformed the liturgy and redefined the church to meet the challenges of the modern, multicultural, post-colonial world. ---

**L22 History 39SC Imperialism and Sexuality: India, South Asia and the World: Writing-Intensive Seminar**

What is the connection between the appropriation of other people's resources and the obsession with sex? Why is 'race' essential to the sexual imperatives of imperialism? How has the nexus between 'race,' sexuality, and imperial entitlement reproduced itself despite the end of formal colonialism? By studying a variety of colonial documents, memoirs produced by colonized subjects, novels, films and scholarship on imperialism, we will seek to understand the history of imperialism's sexual desires, and its continuation in our world today.

**L22 History 39SM Women and Crime in the Evolution of American History**

Crime happens. Property is damaged and stolen, lives are lost, and law, order, and justice evolves. This course taps into that ongoing reality by centering the herstorical evolution of female crime, highlighting women and girls of many kinds across time and spaces of America. It moves across centuries (through to the contemporary period) probing

within and far beyond icons to unveil the gendered nature of crime and moreover to empower students to see and trace everyday female criminality that ignited across racial, ethnic, as well as lines of age in the winding path of American history. While men and boys dominate public and even scholarly expectations of crime and carceral conversations for many, students will leave this course with a far more rigorous understanding of the herstories gained by taking serious the types of crimes that women and girls acted out by exploring: robbery, assault, infanticide, larceny, murder, arson, prostitution, serial killers, and drug-related crimes. As well as going further to probe state and federal power through carceral medicine - showing the interior world of female prisoners, physicians, the movement of females into "asylums" and mental state hospitals, incarceration based on "insanity" while going further to examine births, illnesses, and death of women and teens in jails and prisons. Students will be likewise pushed to engage America's timeline of race, gender, and executions that includes women and girls. Racialized and gendered criminality, law enforcement violence, healthcare and deathcare in prisons are critical public health issues that students can better understand the complicated evolutions by deeply probing the herstorical lives of women, girls, and crime through this course. Students will read, learn, dig up the past, and write to ensure a future of herstory and remembrance.

**L22 History 39UK Mao and the World**

Was Mao Zedong an uncompromising tyrant who caused the death of millions, or was he a revolutionary leader who was daring enough to imagine an alternative existence? This course is a close investigation of Mao and his world through a global perspective. The students will be exposed to primary sources written by Mao himself, and they will situate Mao within the turbulent decades of China's engagement with Western colonialism, imperialism, and revolutionary thought in the 20th century. Putting Maoism at the center of world history, students will learn the intimate links between China, Southeast Asia, Africa, and North America, and they will examine in detail how Maoism shaped a variety of political and infrastructural transformations around the world, from the Black Panthers to Tanzanian railroads. By the end of the course, students will have a strong grasp of the contradictions that Mao himself faced throughout his life -- contradictions that changed nothing less than the world itself.

**L22 History 4009 Slavery and Public History**

Public history, or applied history, encompasses the many and diverse ways in which history is put to work in the world and applied to real-world issues. This course teaches public history practice with particular emphasis on engaging in the public history of slavery through research and interpretation on the regional histories of enslavement within St. Louis and at Washington University. Students will learn by engaging critical scholarship on public history, debates about how public history is practiced, and learning core tenets of public history interpretation, museum best practices, oral history, preservation, and material culture and their particular application to public history interpreting slavery. This includes grappling with the politics of memory and heritage that shape, limit, and empower public history practice on slavery, and how white supremacy has shaped what histories we absorb in the public.

**L22 History 4040 Senior Seminar: Convivencia or Reconquista?**

**Muslims, Jews, and Christians in Medieval Iberia**

This seminar will explore various facets of the coexistence (convivencia) of Muslims, Jews, and Christians in medieval Spain. Its horizon stretches from the Muslim conquest of Iberia (al-Andalus) up to the turn of the 16th century when Spanish Jews and Muslims were equally faced with the choice between exile and conversion to Christianity. Until about 1100, Muslims dominated most of the Iberian Peninsula; from then onward, Christians ruled much and eventually all of what would become modern Spain and Portugal. Through a process known as reconquista (reconquest), Catholic kingdoms acquired large Muslim enclaves. As borders moved, Jewish communities found themselves under varying Muslim or Christian dominion. Interactions between the three religious communities occurred throughout, some characterized by shared creativity and mutual respect, others by rivalry and strife. The course focuses on these cultural encounters, placing them in various historical contexts. It will explore the ambiguities of religious conversion, and the interplay of persecution and toleration. Last not least, the course will address the question of how the memory of medieval Spain's diversity reverberates-and is utilized-in modern popular and academic discourse. All sources will be read in English translation; however, students are encouraged to make use of their linguistic and cultural expertise acquired in previous classes. This course serves as the capstone seminar for Jewish, Islamic & Near Eastern Studies majors, Arabic majors, and Hebrew majors. Graduate students, minors, and other interested undergrads are likewise welcome.

**L22 History 4051 Diaspora in Jewish and Islamic Experience**

Tensions between center and periphery; migration and rest; power and powerlessness; and exile, home, and return are easily found in the historical record of both Jews and Muslims. For Muslims, it can be said that it was the very success of Islam as a world culture and the establishment of Muslim societies in all corners of the globe that lay at the root of this unease. However, the disruptions of the post-colonial era, the emergence of minority Muslim communities in Europe and North America, and the recent tragic flow of refugees following the Arab Spring have created a heightened sense of displacement and yearning for many. Of course, the very term "diaspora" -- from the ancient Greek, meaning "dispersion" or "scattering" -- has most often been used to describe the Jewish condition in the world. The themes of exile and return and of catastrophe and redemption are already woven into the Hebrew Bible, and they continued to be central motifs in Rabbinic Judaism in late antiquity and the Middle Ages. This occurred despite the fact that more Jews lived outside the borders of Judea than within the country many years before the destruction of Jewish sovereignty at the hands of the Romans. In the 20th century, European imperialism, nationalisms of various types, revolution, and war -- including the Israeli-Palestinian conflict -- have done much to underscore the continuing dilemmas of diaspora and home in both Jewish and Islamic identity. The goal of this course is to offer a comparative historical perspective on the themes of migration and displacement, center and periphery, home and residence, and exile and return and to give students the opportunity to examine in depth some aspect of the experience of diaspora. Note: This course fulfills the capstone requirement for Jewish, Islamic, and Middle Eastern Studies. The course also counts as an Advanced Seminar for history. (Students wishing to receive history Advanced Seminar credit should also enroll in L22 491R section 19 for 1 unit.) The course is open to advanced undergraduate and graduate students.

**L22 History 4154 Decolonization to Globalization: How to End an Empire**

The conventional markers of the twentieth century - imperialism, decolonization and globalization - are acutely compromised if we mobilize gender and sexuality as modes of analysis. In this course we bring questions of sexual difference and gender to the wider stories of colonialism, nationalism, decolonization, neocolonialism, US imperialism, neoliberalism, globalization, WoT, and majoritarianism. We "engender" the contradiction between enormous turning points and the lived experiences of billions. We probe how the non-profit industrial complex, development aid, and the normative family have shaped and given shape to the very idea of gender. Finally, we examine the capacious power of gender to interrupt the power of the state and to reorganize extractive relations of race and caste.

---

**L22 History 4203 Nature, Technology and Medicine in Korea**

This course examines the cultural history of modern Korea with a focus on science, technology, and medicine. From about 1500 to the present, a number of hugely consequential things happened in Korea that have been called revolutionary-or what historians dub "early modern" and "modern." Confucian kings planned large-scale projects that changed nature, rustic scholars made inventories of flora and fauna, colonial Koreans became biologists, nurses, and "Edisons," and in North and South Korea, new professionals created distinctive-and in some cases, globally-competitive-regimes of knowing, making, and healing. Students will interrogate these developments as an opportunity to revisit the history of modernity, which has been told predominantly from the perspective of the West. What does it mean to be "modern" in Korea? How did that modernity intersect with Korean science, technology, and medicine? Students will find and articulate their own answers by writing the final research paper. Recommended to have taken Korean Civilization or equivalent course that provides basic working knowledge of Korean history. Course also counts as an EALC capstone course. Prerequisite: junior level or above or permission of instructor.

**L22 History 4234 The Reception of Egypt in the Graeco-Roman World**

Ancient Greeks and Romans found Egypt to be an exceptionally enthralling world, in terms not only of its physical features but also of its people, monuments, and traditions. This course will explore how different views of Egypt emerged in the Graeco-Roman world; it will also investigate the possible reasons for the remarkable popularity and allure of Egypt and things Egyptian as reflected in the writings of Greek and Roman authors as well as in the art and architecture of the Mediterranean world in Classical antiquity. In this seminar, we will read primary literary sources (in translation) that focus on the reception of ancient Egypt and, more specifically, its history, religion, and customs. Several of these sources also offer a privileged viewpoint to investigate how the perception of notable Egyptian figures -- chiefly Cleopatra -- was shaped by Rome to suit a specific agenda. In addition to the written sources, we will look at the artistic and archaeological evidence that best showcases the impact of Egypt's legacy on Graeco-Roman traditions. The readings assigned for each class will also provide a broad sample of secondary sources, consisting of some of the most significant scholarship on the image of Egypt in Classical antiquity.

**L22 History 4242 Culture and Politics in the People's Republic of China: New Approaches**

This course inquires into the political, ideological, and social frameworks that shaped the cultural production and consumption in the People's Republic of China (PRC). In the realm of literature, film, architecture, and material culture and everyday life, this course pays a close attention to the contestation and negotiation between policy makers, cultural producers, censors, and consumers. Understanding the specific contour of how this process unfolded in China allows us to trace the interplay between culture and politics in the formative years of revolutionary China (1949-1966), high socialism (1966-1978), the reform era (1978-1992), and post-socialist China (1992 to present). The course examines new scholarship in fields of social and cultural history, literary studies, and gender studies; and it explores the ways in which new empirical sources, theoretical frameworks, and research methods reinvestigate and challenge conventional knowledge of the PRC that have been shaped by the rise and fall of Cold War politics, the development of area studies in the U.S., and the evolving U.S.-China relations. Graduate students should be proficient in scholarly Chinese, as they are expected to read scholarly publications and primary materials in Chinese. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor. Same as L04 Chinese 4242

**L22 History 4264 Memory for the Future**

The year-long Studiolab "Memory for the Future" (M4F) will create spaces and practices of humanities education, practical public history, and collaboration in the spirit of "multidirectional memory." This concept tries to address the interlinked histories and legacies of the Holocaust, slavery, apartheid, and colonialism and create opportunities for dialogue between communities impacted by and implicated in these forms of violence. Our principal aims are to explore, enrich, and sustain the global and local focus of "reparative memorial practices" in St. Louis. Focusing on commemorative efforts through public memorials, monuments and especially museums, M4F will engage survivors, activists, institutional leaders, and scholars (students and faculty) in the development of educational materials, artistic representations, exhibitions, and other approaches to bringing the past into the present. We strive to support the efforts of local and regional initiatives and venues to end racism, antisemitism, and homophobia and their related violence through innovative and inclusive memory work. Alongside classroom-based instruction focusing on discussing scholarship and acquiring practical, curatorial, and pedagogical skills, students will work with area institutions and initiatives to apply their study of multidirectional memory. This practicum is an integral part of the course and requires students to leave campus and regularly work with one of our partners (The Griot Museum of Black History, George B. Vashon Museum, St. Louis Kaplan Feldman Holocaust Museum, The Mildred Lane Kemper Art Museum, Reparative Justice Coalition of St. Louis, St. Louis Community Remembrance Project). Participants of the Studiolab are expected to attend regular weekly meetings and engage in self-directed and collaborative project work. We are also preparing study trips to regional sites of memory and education. The M4F Studiolab will convene at the Lewis Collaborative, a living-learning-commercial space at the west end of the Delmar Loop. All A&S graduate students and advanced undergraduates are invited to participate. Undergraduate enrollment by permission of the instructors. For History majors, this course fulfills the capstone requirement as an Advanced Seminar. As a year-long course, students are expected to enroll in both the fall and spring sections. For more information, please consult <https://www.m4f.community/>

**L22 History 4415 Technology, Empire, and Science in China**

How did technology, science, and empire intersect in early modern and modern Chinese history? Was there a unique "Chinese" way of studying nature? How did non-Chinese scientists and engineers contribute to China's knowledge of the world? This course offers a historical and historiographical survey of science and technology studies in China, from the 13th to the 20th century. It particularly examines the global circulation of scientific knowledge in the late imperial period, the place of technology in the empire building of the Qing dynasty (1637-1912), and the violent epistemic encounters between the West and China from the 19th century onward. Throughout the semester, we will explore Confucian scientists as well as Muslim geographers, Jesuit engineers, Manchu anatomies, and Chinese barefoot doctors. Positioning China within a global order, the students will question the premises of modern scientific discourses and try to respond to a seemingly simple question: What does science and technology even mean in a Chinese context?

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

**L22 History 4444 The Mystical Tradition in Judaism**

What is Jewish "mysticism"? What is its relationship to the category of "religion"? Is Jewish mysticism just one form of a general phenomenon common to a variety of religious traditions or is it a specific interpretation of biblical, rabbinic, and other Jewish traditions? Taking the above questions as a starting point, this course aims at a systematic and historically contextualized analysis of a broad range of Jewish texts that are commonly classified as "mystical". (All primary texts are read in translation.) At the same time, we explore such overarching themes as: the interplay of esoteric exegesis of the Bible and visionary experiences; the place of traditional Jewish law (halakha) within mystical thought and practice; the role of gender, sexuality, and the body in Jewish mystical speculation and prayer; the relationship between mysticism and messianism; Ashkenazic and Sephardic traditions and their mutual impact on Jewish mysticism; the "absence of women" from Jewish mystical movements; esoteric traditions of an elite vs. mysticism as a communal endeavor; and the tension between innovation and (the claim to) tradition in the history of Jewish mysticism.

**L22 History 4450 Topics in Islam: History of Political Thought**

This course aims to study political thought and practice in Islamic history through a close reading of a selection of primary sources in translation (and in their original language, if language proficiency is satisfactory). Particular attention will be given to the historical contexts in which thoughts are espoused and texts written. We plan to examine the development of political concepts and themes as articulated in diverse literary genres (e.g., legal, theological, political) from the eighth through the 13th centuries. We hope to engage various theoretical models to analyze the relationship between politics and religion and to tease out the role of power in determining sociopolitical relations, distinctions, and structures. We hope to have a better grasp on the historicity of ideas presented in timeless categories in political discourse. Advanced knowledge of Arabic preferred but not required.

**L22 History 4491 American Unbelief from the Enlightenment to the New Atheism**

This seminar examines American secularism, humanism, and atheism from the Enlightenment forward to the present. Topics to be explored include: the tensions between secular and Christian conceptions of the republic, the civil liberties of atheists and nontheists, the battles over religion in the public schools, the culture wars over secular humanism and science, and the contemporary growth of the religiously disaffiliated or religious "nones." The course considers not only the intellectual dimensions of skeptical critiques of religion, but also the underlying politics of secularism (and anti-secularism) in a nation routinely imagined as "under God."

**L22 History 4511 Urban Culture in Modern China**

The narrative of rural crisis and peasant revolution has dominated China's modern history for decades. But there has been a growing interest in China's urban past and present with the increased prominence of cities in China's breathtaking economic development and the opening of municipal archives in post-Mao era. The course aims to introduce students to "conventional wisdoms," new directions, and major debates in the urban history field. Topics include: the urban political economy, the cultural dynamics of modernity, the reconstruction of traditions in the making of modernity, the cultural production and consumption, colonialism and imperialism in the urban setting, nationalism, and reform and revolution. Acknowledging and understanding the nuance and difference in views and interpretations in historical writings (historiography) are essential. The course seeks to develop students' research and analytical skills, such as locating secondary sources, incorporating scholarly interpretations, and developing and sustaining a thesis based on secondary and primary sources in student research. This is an interdisciplinary seminar designed for advanced undergraduates and graduate students. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor.

**L22 History 4610 Latin American Populism and Neo-Populism**

Over the past 100 years populism, in its diverse forms, has dominated Latin American politics. This course examines case studies of classical populism (Aprismo, Cardenismo, Peronismo, Varguismo, etc.) and neopopulism (Fujimorismo, Chavismo, Moralesismo, neo-Peronismo). In doing so, it explores new theories of populism and analyzes populist discourses, leadership styles, gender and racial politics, mobilizational tactics, transnational networks, and foreign policies.

---

**L22 History 4633 Twentieth Century Latin American Revolutions**

Latin America has been described as one of the most "revolutionary" regions of the world in the twentieth century. It experienced four major social revolutions and gave rise to many consequential guerrilla movements. This course uses theories of revolution and a social science historical approach to elucidate the causes, processes, outcomes, and implications of revolutions in Mexico (1910), Bolivia (1952), Cuba (1959), and Nicaragua (1979). It also analyzes late 20th century revolutionary guerrilla movements in El Salvador and Peru. Why peasants, university students, and women formed key social bases of support for revolutionary movements and how revolutions were institutionalized and consolidated will receive special attention.

**L22 History 4675 Beyond the Harem: Women, Gender, and Revolution**

This course examines the history and current situations of women in Middle Eastern societies. The first half of the course is devoted to studying historical changes in factors structuring women's status and their sociopolitical roles. The second half of the course will focus on several case studies of women's participation in broad anticolonial social revolutions and how these revolutions affected the position of women in those societies.

---

**L22 History 4681 Topics in Literature and History: The Age of Lincoln -- America in the 1850s**

This seminar is an interdisciplinary examination of the culture and politics of America in the critical watershed decade before the Civil War. The course explores how a range of writers -- some avowedly "literary," others more decidedly "political" -- advanced their versions of America in the larger culture at a time when all things American -- democracy, religious destiny, and nationality itself -- were becoming profoundly problematic.

**L22 History 4689 American Intellectual History to 1865**

This course presents an overview of American intellectual history from the early seventeenth century and the founding of the first English settlements in North America to the mid-nineteenth century and the American Civil War. We will investigate how different thinkers responded to and helped shape key events and processes in colonial and early American history, concentrating in particular on developments in religious, political, social, scientific, and educational thought. We will cover major topics such as: Puritanism; the Enlightenment; Evangelicalism; Romanticism; and the inner Civil War. We will address concepts central to the formation of the nation's identity including those of the covenant; republicanism; citizenship; equality; freedom; liberty; natural law; transcendentalism; order; reason; progress; and democracy.

---

**L22 History 469 American Intellectual History Since 1865**

This course concentrates on social, cultural, philosophical and political thought since the end of the Civil War, and investigates how American thinkers have responded to the challenge of modernity. After an examination of the end of the old religious order and the revolt against Victorianism, it analyzes the subsequent rise of pragmatism, progressivism, literary modernism, radical liberalism, political realism, protest movements and the New Left, neo-conservatism and the New Right, and the current state of intellectuals in post-9/11 America.

**L22 History 4742 Americans and Their Presidents**

How have Americans understood what it means to be President of the United States? This seminar uses that question as a point of departure for a multidisciplinary cultural approach to the presidency in the United States, examining the shifting roles of the chief executive from George Washington through George W. Bush. In addition to a consideration of the President's political and policymaking roles, this course examines how the lived experiences of presidents have informed the ways Americans have conceived of public and private life within a broader political culture. In the process, this course uses the presidency as a means to explore topics ranging from electioneering to gender, foreign policy to popular media. Readings are drawn from a broad range of fields.

**L22 History 4761 Money, Exchange and Power: Economy and Society In the Ancient Mediterranean World**

From seaborne trade and banking to slavery and the impact of new technology, the economy of the ancient Mediterranean world constitutes a particularly dynamic field of study. To examine a society's underlying economics is to gain critical insight into those historical phenomena that are themselves the product of multiple, overlapping dimensions of human action and thought. This course engages directly with a fascinating array of primary evidence for economic behaviors, beliefs, structures, and institutions among the Romans, Greeks, and their neighbors. We will also explore the methodological challenges and implications of that evidence as well as a variety of modern theoretical approaches. This year our focus is mainly upon developments among the Greeks, ranging from the transformative invention of coinage to the rise of commercial networks centered around religious sanctuaries like Delos. PREREQ: CLA 341C OR 342C OR 345C OR 346C OR PERMISSION OF INSTRUCTOR.

**L22 History 4763 Olympian Shadows: Macedon and Its Neighbors in Antiquity**

The home of both Alexander the Great and Aristotle, Macedon was pivotal to the course of ancient Greek and Roman history and yet stood apart as a culturally and politically distinct region. Macedonian dynasts dominated the Hellenistic world and deeply shaped Roman reception of Greek culture, while others profoundly affected the intellectual life of antiquity. We will explore topics ranging from ethnicity, religion, and the nature of kingship to urbanization and Macedon's emergence as a great power until its subsequent transformation at the hands of the conquering Romans. We will pay special attention to Macedon's neighbors, especially Thrace and Illyria, as well as to Macedon's relationships with the Persian Empire and the Greek coastal colonies. PREREQUISITES: AT LEAST ONE SEMESTER OF CLASSICS 341C, 342C, 345C, OR 346C, OR INSTRUCTOR'S PERMISSION.

**L22 History 4803 Advanced Seminar: Partition: The Making of India and Pakistan**

The division of India and Pakistan at the time of Independence from British colonial rule was a major event that has left its mark on the lives, memories, and politics of contemporary South Asians. Why did British India break apart along apparently religious lines? Was sectarian or "communal" violence inevitable, or endemic in South Asian society? How was Partition - a time of violence, mistrust, dispossession, displacement, and mass migration -- experienced by ordinary people? How is the traumatic memory of this event borne by individual women, children, by families? How does its legacy persist, and how is it being remembered, and reckoned with, today? In this course, we will not find final answers to these difficult questions, but we will learn how to explore them responsibly, using literature, film, and other archival sources. This course provides students with a forum to discuss and explore topics of their own choosing.

**L22 History 481W History of Education in the United States**

Examines education within the context of American social and intellectual history. Using a broad conception of education in the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, work place, and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas, and practices that have shaped American educational policy in different periods of our history. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: All students will be enrolled onto the waitlist. Because this is a writing intensive course, enrollment will most likely be 12-15 students. Enrollment preference will be given to students who are majoring/ minoring in Educational Studies, Teacher Education, History, American Culture Studies, and Children's Studies and to students needing to complete their Writing Intensive requirement. Instructor will e-mail students about enrollment. Undergraduate students must enroll in Educ. 481W, and graduate students must enroll in Educ. 5810.

---

**L22 History 4844 Women and Confucian Culture**

This course explores the lives of women in East Asia during a period when both local elites and central states sought to Confucianize society. The course will focus on Ming (1368-1644) and Qing (1644-1911) China, but will also examine these issues in two other early modern East Asian societies: Yi/Choson (1392-1910) Korea and Tokugawa (1600-1868) Japan. Course readings are designed to expose students both to a variety of theoretical approaches and to a wide range of topics, including: women's property rights; the medical construction of gender; technology, power and gender; and state regulations on sexuality.

Credit 3 units.

**L22 History 4854 Advanced Seminar: The United States in Afghanistan Since 1979**

This course offers a historical examination and analysis of America's involvement in Afghanistan from the Cold War through the present, focusing in particular on the U.S. War in Afghanistan from 2001 onward. Special attention will be given to political, military, diplomatic, and economic dynamics as well as to international relationships, the experience of war, and the subsequent developments upon both American and Afghani societies. Major topics covered include U.S. covert operations against the Soviets in Afghanistan during the 1980s; revolution, civil war, and the rise of the Taliban during the 1990s; 9/11 and the War on Terror; national building and stability measures during the early 2000s and subsequent security threats in the forms of insurgency, warlords, drug gangs, criminal networks, and the al-Qaeda alliance of terrorist organizations; the key roles played by Pakistan, India, Iran, Russia, China, and Central Asian states; the Obama surge and counterinsurgency operations, starting in 2009; the soldier's experience, special forces, and covert operations; prisoners, torture, and human rights abuses; and the end of NATO's mission in 2014 and subsequent developments: the Ghani government, the return of the Taliban, the arrival of ISIS, the peace process, the U.S. drawdown, and the elusive quest for peace and stability in Afghanistan. This is a capstone course open to history majors only.

---

**L22 History 487 Topics in American History: Race and Drugs in American History**

This course explores the racial construction of the use of legal and illegal substances in American history from the mid-19th century to the present. We will spend time engaging in a historical analysis of the social, economic, and racial dynamics that defined drug addiction

in popular imagination, and examine how these factors contributed to discussions about legality, access to substances, one's ability to be rehabilitated, and criminal status. Regarding criminality we will particularly explore sociological and theoretical perspectives of labeling, habitual and occasional offenders, and moral panic in order to understand how racial minority groups were targeted for different rhetorical, legislative, and economic purposes. One major goal of the course will be to outline the early 20th century beginnings of the war on drugs and connect it to the century long growth of a militarized police system and prison industrial complex. We will secondly work to understand the role of local and national political actors, law enforcement, and the media in manufacturing and maintaining connections between race, crime and drugs. Ultimately, we will use our study of drugs to contextualize 21st century issues of police violence, increases in homicide in minority communities, mass incarceration, poverty, segregation, and mass movements of protest.

---

**L22 History 4872 Colonial Cities and the Making of Modernity**

Massive urban growth has been a central result of the incorporation of many areas--both central and peripheral--into the global economy in the 19th and 20th centuries. Scholars have long theorized urbanization as a key component of modernity, but they have usually done so by looking at urbanization and modernization from the perspective of the West. This course will investigate the character of cities in the colony and then use these empirical and analytical entry points to examine critically some theories of modernity. The geographical focus of the course will be primarily on cities in the Middle East, North Africa, and South Asia.

---

**L22 History 4876 Advanced Seminar: Mexican Agriculture: Land, Politics and Development**

Access to and ownership of land has been a major issue in Mexican history. Land tenure in economic development has been a constant source of tension and debate since the 18th century. Paradoxically, land tenure has been put forth as both the obstacle and the solution to the country's modernization. Given its centrality in the construction of the modern period, this course examines liberalism, agrarian revolts, the revolution, the green revolution and neoliberalism through the lens of land issues. This course will also explore how these have shaped and have been shaped by indigenous peoples and peasants, from land disenfranchisement to the fight against GMO maize. Students will evaluate agrarian reforms, agricultural modernization programs, concepts of and transformations of natural resources, food production/consumption and social policies.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

---

**L22 History 4881 Advanced Seminar: Mad: Mental Illness, Power and Resistance in Africa and the Caribbean**

This seminar explores the history of mental illness in Africa and the Caribbean during the colonial and post-colonial periods. We will be guided by the following questions: What is mental illness? How do social, cultural and political realities affect how mental illness is defined? Should mental illness always be analyzed within a specific cultural context? How did psychiatry factor into the efforts of European colonizers to maintain social order in their colonies? How have colonized people resisted colonial notions of madness? What is the place of religion in these histories? How did mental institutions change after the end of colonial rule and how was post-colonial Caribbean and African psychiatry harnessed in service of decolonization? The course will pay special attention to how European colonial powers employed similar understandings of blackness across regions as they formulated ideas concerning the black populations they deemed "mad" across Africa and the Caribbean.

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

**L22 History 4884 Advance Seminar: The Roots of the American Working Classes: Myths, Realities, Histories**

The diverse realities of American labor and working-class experience have long been submerged under layers of politics and ideology. How should we study the lives of working people? What questions should we ask? Where do we go to answer them? This research seminar engages the lived experiences of the American working classes, in all their complexity, over the long 19th- and 20th-centuries, to the present. The course has the double project of (1) exploring the roots of mythologies about American working people that have the effect of distorting or erasing their experiences, efforts and accomplishments, and struggles for organization, visibility, citizenship, and power, with special attention to mythologies about American workers who are non-white, non-male, and non-U.S.-born who did/do not fit conventional tropes of "American labor" or "the white worker"; and (2) exploring the roots of working people's experiences, as shaped by forces of technology, class, race, gender and sexuality, religion, nationalism, and violence: what are the challenges, conceptual and archival, of studying the people, in their working and familial/community lives, as producers and consumers, in their organizing efforts, and in their civic and political capacities? How did the transformation of work, technology, culture, and society over this long era from Enslavement to Artificial Intelligence, from Blackface Minstrelsy to Hip Hop, shape working people's lives and struggles? How did working people survive cataclysmic crises, from the Civil War to Covid, and mold the evolution of American citizenship and democracy? Each student will produce a 12-15 page original research paper related to the course material, based on an analysis of primary sources, in consultation with the instructor, and due at the end of the semester; the course is designed to closely mentor students in this project.

---

**L22 History 4887 Advanced Seminar: Digital Frontiers in History**

Can digital technologies offer new ways to rethink historical narratives? Is DH the future of the humanities and of history as a profession? Can DH and critical inquiry be brought together? This course explores the history, present, and future of digital humanities (DH) to seek responses to these questions. From its origins in the Cold War to its rise to fame in the 1990s, the digital turn in the humanities has garnered excitement and support as well as critique and even disavowal from historians. In this course, we will examine the debates in the field of DH and learn about new ways in which historians are using digital tools for academic research as well as public outreach and activism. The course will be divided into two parts. The first half of the course will be devoted to understanding the historical growth and the present status of the field. In the second half, students will be learning basic digital tools to conduct research. The purpose of the course is not to turn historians into coders; it is to understand what codes can do for historians.

**L22 History 481B Advanced Seminar: New York, New York: The Empire City from Stuyvesant to Trump**

This research seminar engages the long history of greater New York City: from the place Native Americans called Manna-hata to the largest city in the United States and the world political, financial, and cultural capital that it is today. The course explores New York City's ambivalent relationship with America, with the world, and with itself. It focuses on matters of power - how, in different moments of the city's history, it was defined, who held it, and how various groups managed to contest for it; matters of exchange and extraction - political, cultural, and economic; and matters of belonging - whether a city of immigrants, exiles and refugees succeeded in becoming a home for the homeless. It pays close attention to both the micro - the street corner and the political ward; the bridge and the tunnel; the gentrifying neighborhood; the mosaic of the city's foodways; the theater, financial, slaughterhouse, brothel, and other districts - and the macro - the banks and the stock exchange; the port and transit authorities; the instrumentalities of knowledge and cultural production in the city's universities, print media, clubs, and salons; the sports empires; and the political machines, organized crime, grassroots labor and political movements, insurgencies, and undergrounds. Above all, the course will foreground the city's massive and unbearable contradictions, as a city of skyscrapers and of basement dives, lures, and snares; as a symbol of the future and freedom bound to traumatic, slave, and unfree pasts; as a symbol of modern independence bound to modern interdependence; and as a place of renaissances and ruinations, where the world either comes together or spectacularly falls apart. Sites of potential investigation, in a list that is suggestive rather than exhaustive, range from the African Burial Ground to the 9/11 Memorial and Museum, from Hamilton to Hamilton, from Boss Tweed to Robert Moses, from the Five Points to Chinatown, from Delmonico's to Sylvia's, from Blackwell's Island Lunatic Asylum to Hart Island Potter's Field, from the African Free School to Ocean Hill-Brownsville, from Marcus Garvey to Amadou Diallo, from Billie Holiday to Andy Warhol, from James Baldwin's Harlem to Stonewall, from George Steinbrenner to Jerry Seinfeld, from the Gowanus Canal to Estée Lauder, and, in the spirit of the course title, from Stuyvesant to Trump. Students will engage with the history of New York City via two three-page book reviews, a three-page site analysis, and two five-minute oral reports on assigned readings before conducting their own original research in consultation with the instructor that will culminate in a 15-page final essay. Attendance at all classes and participation in class discussions required. This course fulfills the history major capstone requirement as an Advanced Seminar.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L22 History 4914 Advanced Seminar: Japan in World War II- History and Memory**

This course examines the history of World War II in Asia and how it has been remembered in the postwar era. We will trace the war, from the first Japanese military attack on China in 1931 through the US atomic bombings of Hiroshima and Nagasaki in 1945. We will also examine several postwar controversies concerning how the war has been forgotten and remembered in Japan, in the rest of Asia, and in the United States. Goals include grasping the empirical history of the war as a step to becoming familiar with the theories and methods of Memory Studies in History.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM, IS EN: H

---

**L22 History 4918 Advanced Seminar: Sexuality in the United States**

Does sex have a history, and if so, how can we study it? This seminar examines important themes in the history of sexuality: the relationship between sexual ideologies and practices; racial hierarchy and sexuality; the policing of sexuality; construction of sexual identities and communities; and sexual politics at the end of the century. Students will also spend time discussing theoretical approaches to the history of sexuality, as well as methodological issues, including problems of source and interpretation.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L22 History 4941 Advanced Seminar: The Inquisition in Europe, Asia, and Latin America, 1200-1700**

This seminar will study the history of the Inquisition from its beginnings in southern France in the first half of the 13th century up to the investigations undertaken by Dominicans and Franciscans in 17th century Mexico and Peru. Along the way the seminar will focus upon other inquisitions in Europe (especially those made in Italy, Spain, and Germany), and the hunt for heresy in Goa and the Philippines. This course will read inquisitional manuals (books on how to conduct an inquisition), and original inquisitional documents (the records of the trials and interrogations). Consequently, the history of heresy and witchcraft, as understood by people in the past and historians in the present, will be discussed.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM

---

**L22 History 4965 Advanced Seminar: Magic, Heresy and Witchcraft in the Medieval World, 350-1550**

This seminar will study the history of magic, heresy, and witchcraft in the medieval world. It will begin in the fourth century after the conversion of Constantine the Great and end with the great witchcraft trials of the fifteenth and sixteenth centuries. The seminar will read magical treatises, ecclesiastical polemics against vulgar belief, inquisitorial trials, chronicles, and histories, in our attempt to define what was considered the ordinary and the extraordinary, the natural and the supernatural, good and evil, the boundaries of heaven and earth. How do modern historians use medieval documents to evoke the lives of men, women, and children who believed in magic or were accused of heresy? Can this only be done through a form of historical anthropology? What methods do historians use in trying to understand past ideas and practices? What is historical truth then? What is the relationship of supposedly heterodox belief and behavior with religious orthodoxy? How do we define religion? A theme throughout this seminar will be the definition of evil and the powers of the devil. Students will write a short historiographic essay and a long research essay. Pre-modern, Europe. PREREQUISITE: Sophomore standing or permission of the instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L22 History 4976 Advanced Seminar: The American Trauma: Representing the Civil War in Art, Literature, and Politics**

This seminar is an interdisciplinary examination of how Americans represented the Civil War during and after the titanic conflict, with special attention given to the period between 1865 and 1915. The course explores how painters, novelists, photographers, sculptors, essayists, journalists, philosophers, historians, and filmmakers engaged the problems of constructing narrative and reconstructing national and individual identity out of the physical and psychological wreckage of a war which demanded horrific sacrifice and the destruction of an enemy that could not be readily dissociated from the self.

Credit 3 units. A&S IQ: HUM EN: H

---

**L22 History 497A Global Asias**

This course engages a new methodological approach to Asia that expands beyond the spatial concept of the region as a set of political entities occupying a specific part of the world. Global Asias seeks to open up avenues of inquiry to accommodate the study of flows of people, ideas, and practices across Asia and throughout the world. It provides the opportunity to consider Asian communities as they manifest themselves in different places and different ways. We begin with a survey of past attempts to define, understand, and manage Asia, which resulted in an area studies approach. We then engage transnational and interdisciplinary efforts, and conclude by considering the possibility that Global Asias can challenge and perhaps unseat the reigning epistemologies that exist today.

**L22 History 4982 Advanced Seminar: Women and Confucian Culture in Early Modern East Asia**

This course explores the lives of women in East Asia during a period when both local elites and central states sought to Confucianize society. We will focus on Ming (1368-1644) and Qing (1644-1911) China, but will also examine these issues in two other early modern East Asian societies: Yi/Choson (1329-1910) Korea and Tokugawa (1600-1868) Japan.

Credit 3 units.

---

**L22 History 4983 Advanced Seminar: Renaissance Florence and Venice**

Venice was the most famously stable city-state in Renaissance Italy, Florence the most notoriously unstable one. This course explores how those contrasting political environments and experiences shaped social relations and cultural production (and vice versa) in those two cities.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L22 History 4984 Advanced Seminar: The Problem of Freedom: The Age of Democratic Revolution in the Americas**

Ever since the improbable alliance of the English pirate and slave trader Sir Francis Drake and the fugitive slave Cimarrons on the Atlantic coast of Panama many centuries ago, the history of freedom in the New World has unfolded in unlikely fits and starts. The course will explore two related conjectures: first, that maroon politics (the often short-lived alliances between slaves, quasi-free blacks and white allies),

slave rebellion, provincial secession and civil war were the widespread and normative conditions of post-colonial regimes throughout the New World; and second, that the problem of freedom was especially challenging in a New World environment in which freedom was fleeting and tended to decompose. Special attention will be given to antislavery insurgencies, interracial politics and alliances in the United States and the perspectives on freedom they produced, but the readings will also include materials on debates over freedom in the Caribbean and South America over the course of the long age of democratic revolution, 1760-1888.

Credit 3 units. A&S IQ: HUM, SD EN: H

---

**L22 History 4990 Advanced Seminar: History of the Body**

Do bodies have a history? Recent research suggests that they do. Historians have tapped a wide variety of sources - including vital statistics, paintings and photographs, hospital records, and sex manuals - to reconstruct changes in how humans have conceptualized and experienced their own bodies. We will pay particular attention to the intersection of European cultural history and history of medicine since 1500. This course fulfills the History major capstone requirement as an Advanced Seminar.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

---

**L22 History 4993 Advanced Seminar: Women and Religion in Medieval Europe**

This course explores the religious experience of women in medieval Europe and attempts a gendered analysis of the Christian Middle Ages. In it, we will examine the religious experience of women in a variety of settings - from household to convent. In particular, we will try to understand how and why women came to assume public roles of unprecedented prominence in European religious culture between the twelfth century and the sixteenth, even though the institutional church barred them from the priesthood and religious precepts remained a principal source of the ideology of female inferiority.

---

**L22 History 4998 Advanced Seminar: The Crusades**

This seminar will study the phenomenon of crusading in medieval Latin Christendom, from the First Crusade proclaimed by Pope Urban II in 1095 to the late crusades of the fourteenth and fifteenth centuries. We will particularly focus on crusading in the twelfth and thirteenth centuries, when the ideas and practices of being a martial pilgrim were developed and formalized by the Church. The concept of holy war in Latin Christianity and Islam will be examined. We will analyze the Fourth Crusade and the sack of Constantinople in 1204. We will investigate the Albigensian Crusade (1208-1229) into what is now southern France, when Christians were promised salvation for killing other Christians and whether "genocidal moments" occurred during this holy war against heretics. Topics to be discussed are the Kingdom of Jerusalem and other crusader colonies in the Levant, women on crusade, the poetry of crusading, chivalry, military orders like the Knights Templars and the Hospitallers, and violence as a redemptive act. One historiographic paper and a research essay are required.

**L22 History 49CA Advanced Seminar: Religion and the Secular: Struggles over Modernity**

A generation ago, scholars and observers around the world felt assured that modernization would bring the quiet retreat of religion from public life. But the theory of secularization now stands debunked by world events, and a host of questions has been reopened. This course provides students with a forum to think through these issues as they prepare research papers on topics of their own choosing.

**L22 History 49DM Advanced Seminar: Meet me in St. Louis**

This seminar uses the 1904 Louisiana Purchase Exposition held in St. Louis as a lens to explore the intersection of exhibitionary culture, nation building and history. In the second half of the 19th century, world's fairs became a fact of life in many parts of the world. By the end of the century, American historian and cultural critic Henry Adams argued there was indeed a "religion of world's fairs." These international expositions, as sites of pilgrimages not only informed people's perception of the world but also were ideal stages for young countries to showcase their achievements, to attract investors and to craft a national identity. Students will examine the rise of exhibitionary culture and the construction of patriotic histories and national symbols, the manufacturing of racial ideologies and otherness, and how these were all embedded in debates on civilization, modernity and progress. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

**L22 History 49JK Advanced Seminar: Blood & Sacred Bodies: Ritual Murder & Host Desecration Accusations**

This seminar follows the history of the Ritual Murder and Host Desecration accusations from the origins in 12th and 13th century Europe to the 20th century. It pays close attention to the social and political functions of the narratives; their symbolic importance in Christianity's salvific drama; attacks on such beliefs from both within and outside the community of the faithful; the suppression and decline of the ritual murder accusation; the integration of Jews into European societies in the 19th century; and the reappearance of the blood libel in the aftermath of emancipation.

**L22 History 49KK Advanced Seminar: The U.S. in Afghanistan: Origins, Developments, Consequences**

This course offers a historical examination and analysis of America's involvement in Afghanistan from the Cold War through the present, focusing in particular on the US War in Afghanistan from 2001 onward. Special attention will be given to political, military, diplomatic and economic dynamics as well as to international relationships, the experience of war and the subsequent developments upon both American and Afghani societies. Major topics covered include US covert operations against the Soviets in Afghanistan during the 1980s; revolution, civil war and the rise of the Taliban during the 1990s; 9/11 and the War on Terror; national building and stability measures during the early 2000s and subsequent security threats in the form of an insurgency, warlords, drug gangs, criminal networks and the al-Qaeda alliance of terrorist organizations; the key roles played by Pakistan, India, Iran, Russia, China and Central Asian states; the Obama surge and counterinsurgency operations starting in 2009; the soldier's experience, special forces, and covert operations; prisoners, torture and human rights abuses; the end of NATO's mission in 2014 and subsequent developments: the Ghani government, the return of the Taliban, the arrival of ISIS, the peace process, the U.S. drawdown and the elusive quest for peace and stability in Afghanistan. This is a capstone course open to history majors only. This course fulfills the History major capstone requirement as an Advanced Seminar.

**L22 History 49MB Advanced Seminar: Women and Gender in Modern Caribbean History**

This course will highlight women in the "making" of Caribbean history, and it will consider how "men" and "women" were made in the English-speaking Caribbean from emancipation (1838) to the present. We will explore women and gender issues within the context of significant political shifts including the transition from slavery to wage and indentured labor, the labor rebellions of the 1930s, the rise of labor unions and political parties, anti-colonial activism, decolonization and nationalism. The course will also situate the Caribbean within an international context, paying attention to migration, black internationalism and the Third World movement. Credit 3 units. **L22 History 49NR Advanced Seminar: Egypt and the Arab Spring: Middle Eastern Revolution in Historical Perspective**

The uprisings of the "Arab Spring" of 2011 captivated global media and observers. The movements brought down established regimes in Tunisia, Libya, Yemen, and Egypt. The focus of this course will be to understand the historical background and primary contemporary issues that have shaped Egypt's Arab Spring, and to examine the huge popular effort to document Egypt's revolution. Each student will design, research, and write a 25-page paper on a topic of his/her choice related to the Arab Spring.

**L22 History 49PK Advanced Seminar: The Founding Fathers' Government in an Electronic Age**

This is a research seminar that examines how Americans sought to translate their notions of government into a realistic set of priorities and a functioning set of public institutions. Extending from 1789 through the 1820s, this course investigates how the federal government came into being, what it did, and who populated the civilian and military rank of American officialdom. This is also a course in digital history. Students will create new knowledge through their own contributions to an ongoing digital project that seeks to reconstitute the early federal workforce. In the process, students will learn a variety of digital techniques, ranging from encoding languages to electronic systems to software packages.

**L22 History 49SA Advanced Seminar: Slavery in America: The Politics of Knowledge Production**

This course focuses on the long history of chattel slavery in North America, from origins through emancipation, encompassing Black and Indigenous enslavement. The course foregrounds the struggles over power, over life and death, that were at the heart of slavery's traumatic and grotesquely violent two-hundred-fifty-year career in North America, with attention to hemispheric context. At the same time, it highlights the fiercely contested historical battleground where scholars have argued about how to define American slavery--as a system or site of labor, production, and reproduction; law, property, and dispossession; racial and gender domination; sexual violation,

rape, and incest; psychological terror and social death; containment and marooning; selfhood and nationality; agency and resistance; anti-colonial and revolutionary liberation and millennial redemption. Finally, it engages the "politics of knowledge production" that have produced the slavery "archive," replete with its annihilating silences, repressions, and erasures, and overdetermined "presences." In the end, the course's overarching question is how the politics of slavery, of its material experiences, interpretations, and archives, have shaped the lives and afterlives of slavery and race, to the present day. Students will conduct original research on topics related to North American slavery in consultation with the instructor that will culminate in a 12-15-page final essay. The course includes attention to the role of slavery in the founding and development of Washington University, and research projects that engage the University's slavery "archive" and questions related to enslavement in the history of the University and/or the history of St. Louis are welcome and will be supported by Olin Library Special Collections and other resources. ### L22 History 49SC Advanced Seminar: Inventing India

From Christopher Columbus' misguided search for a mythical notion of India, to the Incredible India branding campaign launched by the Indian State's Department of Tourism, to the allure of yoga and true love, the notion of "India" has its own history. In this Advanced Seminar we trace the invention of India - as a concept - over time. We'll learn how the fabrication of India has proceeded through the centuries, and how the many meanings of "India" coalesce, nimbly side-stepping any popular or professional narrative of Indian history. Mobilizing an array of interdisciplinary tools, we will plot how the fetishization of "India" has itself become a flexible industry, how the management of Indian exceptionalism drives caste expansion. We'll study how the process renders certain subject positions and hierarchies as neutral and hegemonic while violently discarding others; how "India" is a product collectively manufactured, circulated, and consumed by a range of people around the world; the very real work of translation in bringing "India" into our everyday lives and imaginaries. This course fulfills the History major capstone requirement as an Advanced Seminar.

### L22 History 49TP Advanced Seminar: Whose Nairobi? Opportunity and Inequality in a Twentieth Century African City

Visitors to East Africa often hear the cautionary refrain, "Nairobi is not Kenya." But over the past century, Kenya's largest city has meant distinctly different things to distinctly different people. Starting as a simple railway camp in the late nineteenth century, and shaped by decades of colonial racial and ethnic segregation, it has grown into a global "mega-city," where Kenyans from every background and every corner of the country interact with an equally diverse cast of foreigners. Focusing on the realities of the day-to-day, this research seminar deploys a wide variety of historical evidence to better understand how ordinary people experienced, and were shaped by, Nairobi during the long and turbulent twentieth century. This seminar's centerpiece is an extensive and original research paper that offers students the opportunity to work a wide variety of primary sources including archives, city planning reports, maps, images of the built environment, music, material culture, memoirs and narrative fiction.

### L85 MedH 130 The Art of Medicine

This interdisciplinary, cross-school course at the intersection of history, visual culture and the visual arts includes a roster of notable speakers and offers students a singular encounter with western medicine from ancient times to the present day. In tandem with the history of medicine, the course examines the capacity of the arts to frame medical practice and to raise questions and influence perceptions, both positively and negatively, of medical advancements. This course is for first-year (non-transfer) students only.

### L85 MedH 1640 Health and Disease in World History

Health and disease are universal human experiences, yet vary profoundly across time and place. Extending from ancient times to the present, this course surveys that variety from a global perspective. We will explore medical traditions from around the world, then examine how these responded to major epidemic diseases such as the Black Death. We will study the globalization of disease and the emergence of scientific medicine after 1450, then turn to the interrelated histories of health and disease in the modern era. Throughout, we will attend carefully to how the biological aspects of health and disease have shaped world history, while at the same time exploring the powerful mediating role of social, cultural, economic, and political factors—from religious beliefs and dietary practices to inequality, poverty, empire, and war—in determining the myriad ways in which health and disease have been experienced and understood. Introductory course to the major and minor.

### L85 MedH 214 Medical French

In this introductory course to the "Français Professionnel de la Santé" track (French for Medical Professionals), students will be exposed to medical terminology and practices as well as to health-related issues in France and the Francophone world (Quebec, Haiti, West and North Africa). Using an interactive approach based on real life situations, students will learn to perform various medical tasks such as writing a prescription, advising a patient, or presenting a humanitarian project to potential donors. Medical vocabulary and pre-professional oral and written expression will be enhanced throughout the course. Students will acquire the necessary tools to perform their tasks, preparing them for further coursework in the FPS track, the Diplôme de français professionnel de la santé, and the France for the Pre-Med study abroad program in Nice. Prereq: Fr 203D or equivalent (this class can replace Fr 204D).

### L85 MedH 248 Religion, Health, and Wellness in Modern America

Religion, Health, and Wellness in Modern America will examine changing conceptions of health and wellness in America from the late nineteenth-century to the present. With media, artifacts, and literature drawn from the histories of medicine, religion, and capitalism, this class will cover the proliferation of alternative health regimens, the rise of the medical establishment, claims of divine healing, and the impact

of market forces on wellness cultures. Course topics include the raced and gendered dynamics of care, socioeconomic status, technological innovation and media, the role of nature, health activism and radical self-care, and New Age spirituality and mental health. Special attention will be paid to how the politics of the body and its regulation intersect with religious and consumer practices in the modern wellness industry

### L85 MedH 3001 Philosophy of Medicine

Philosophy of Medicine is an investigation into what doctors know and how they know it. This course will investigate the following questions: What is disease? What is health? How do we classify disease? What counts as good evidence and good evidential reasoning in medicine? Is medicine a science? If so, what makes it distinctive as a science? What kinds of evidential roles do case studies play in medicine? How should we measure and compare outcomes in clinical trials and in systematic reviews? What is the appropriate relationship between medicine and the basic sciences or between medicine and the public health sciences (e.g., epidemiology, biostatistics, economics, behavioral science)? What role, if any, should private industry (e.g., the pharmaceutical industry, the health insurance industry) play in shaping the practice of medicine? How should we define and measure "effectiveness" in medicine? Do values inform decision making about health policy, and, if so, how? The overall goal of the course is to develop a reasoned, reflective approach to research and practice in medicine through the critical analysis of texts and case studies in the history of medicine. Students do not need a background in philosophy to take this course. This course is intended to be of special interest to pre-health professionals and to philosophy and science majors. For graduate students in philosophy, this course satisfies the seminar requirement. Extra assignments will be provided to satisfy graduate course work; students should consult the instructor for details.

### L85 MedH 3033 Religion and Healing

This course explores the relationship between religion and healing through historical and comparative study of Christian, Jewish and other religious traditions. We will examine how specific religious worldviews influence conceptions of the body and associated healing practices, how states of health and disease are identified and invested with religious significance, and how religious thought contributed to and coexisted alongside the growth of modern Western medicine. While much of the course will draw on specific case studies, students will be encouraged to pursue their own interests in the area of religion and healing through final projects.

### L85 MedH 3041 Making Sex and Gender: Understanding the History of the Body

This course provides an overview of history of the body in Europe and the United States from medieval to modern times using feminist and queer theoretical frameworks. We explore the shifting authority in defining a "normal" body as the fields of medicine and science become professionalized, the cultural interaction with science and medicine in the modern era, and how aesthetics and popular perception of science inform the notion of ideal body, gender, race, sex, and sexuality in the modern era. Prerequisite: Any -100 or -200 level Women, Gender, and Sexuality Studies course or permission of instructor.

### L85 MedH 3044 Humors, Pox, and Plague: Medieval and Early Modern Medicine

This course examines how people thought about, experienced, and managed disease in the medieval and early modern periods. Students will consider developments in learned medicine alongside the activities of a diverse range of practitioners-e.g. surgeons, empirics, quacks, midwives, saints, and local healers-involved in the business of curing a wide range of ailments. Significant attention will be paid to the experiences of patients and the social and cultural significance of disease. Major topics include: the rise and fall of humoral medicine; religious explanations of illness; diseases such as leprosy, syphilis, and plague; the rise of anatomy; herbs and pharmaceuticals; the experience of childbirth; and the emergence of identifiably "modern" institutions such as hospitals, the medical profession, and public health. The focus will be on Western Europe but we'll also consider developments in the Islamic world and the Americas.

### L85 MedH 3067 Current Topics in the History of Medicine

Mental health -- its diagnosis, social implications, and experience -- is a central and increasingly visible part of the practice of medicine. This course explores "madness." How have different societies explained and responded to states of mind, behavior, and emotion judged to be unreasonable? What role has medicine played in framing understandings about mental disorders and their management? During this course we will engage these questions, charting the shifting experience of mental illness roughly from the Middle Ages to the present. Themes covered include: religious models of madness; humoral medicine and disorders such as melancholy; the pre-modern madhouse and the emergence of the modern asylum; the history of psychiatry; the insanity defense in the courtroom; patient autobiography; gender, race, and mental health.

**L85 MedH 3141 The Racial and Sexual Politics of Public Health**

Race and sexuality have long been concerns of public health. From hygienic campaigns against Mexican immigrants in early-1900s California to the 1991 quarantine of Haitian refugees with HIV at Guantanamo Bay, race and sexuality have proven crucial to how society identifies health and, by extension, determines who is fit to be a citizen. This interdisciplinary course interrogates the intersections of race, sexuality, and medicine, discussing how each domain has been constitutive of the other in the American context. Via feminist and queer theorizing, we will examine the political and economic factors under which diseases, illnesses, and health campaigns have impacted racial and sexual minorities over the last two centuries. An orienting question for the course is the following: How has the state wielded public health as a regulatory site to legitimize perceived racial differences and to regulate ostensible sexual deviations? Through primary and secondary sources, we will likewise explore the various forms of "health activism" undertaken by these very same targeted populations. Themes to be addressed will include the medicalization of racial and sexual difference; activism both in and against health institutions; and the roles of race, class, gender, sexuality, and disability in contemporary health issues. Case studies include the Tuskegee syphilis experiment; the sterilization of black, Mexican, Puerto Rican, and Native American women; the medicalization of homosexuality during the Cold War; and the role of mass incarceration in the diffusion of HIV. At a moment in time when access to health continues to be shaped by categories of social difference, understanding the role of public health in the normalization and subversion of racial and sexual hierarchies in the West is more pertinent than ever.

**L85 MedH 366 Art and the Mind-Brain**

In recent years, there has been a growing interest in the bearing of cognitive science on the perception and understanding of art. This interest has roots in tradition: historically, art, aesthetics, and vision science have often been linked. But the growth of knowledge in cognitive science has opened up new opportunities for understanding art and addressing philosophical questions. The converse is also true. The production, perception, and understanding of art are human capacities that can shed light on the workings of the mind and brain. This course considers questions such as: What is art? How do pictures represent? Does art express emotion? Why does art have a history? Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L85 MedH 3672 Medicine, Healing and Experimentation in the Contours of Black History**

Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, this course examines the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus will be extended towards the underpinnings of race and gender in the medical treatment allocated across time and space--the U.S., Caribbean, and Latin America--to give further insight into the roots of contemporary practice of medicine.

**L85 MedH 3801 Ancient Greek and Roman Medicine**

This course introduces students to the practice and theory of medicine in the ancient Mediterranean, beginning in Egypt and continuing through Greece and Rome. It ends in the Middle Ages. Greco-Roman medicine will be our focus. How was disease understood by practitioners and, as far as can be reconstructed, by laypeople? What form did surgical, pharmacological, and dietetic treatment take? What were the intellectual origins of Greek medicine? The social status of medical practitioners? How was medicine written and in what terms did its practitioners conceive it?"

---

**L85 MedH 385 What is Medical Humanities?**

What is medical humanities? What are its core questions and methods? When and how did the field emerge? To whom does it matter and why? These questions will ground our exploration of recent work in medical humanities. We begin with readings chosen by the instructor to illuminate various humanistic methods (e.g., historical, literary, philosophical) and their approach to recurrent topics and problems in the field (e.g., the doctor-patient relationship, illness as experience, the social construction of disease, health inequality, medicalization). In the second part of the course, students will be guided in co-writing and co-teaching the rest of the syllabus. Students will finish the class able to provide their own definition of medical humanities and to explain the field's origins and concerns as well as why and to whom the field matters. Enrollment preference will be given to students who have already declared the minor in medical humanities.

**L85 MedH 395M Women and Crime in the Evolution of American History**

Crime happens. Property is damaged and stolen, lives are lost, and law, order, and justice evolves. This course taps into that ongoing reality by centering the herstorical evolution of female crime, highlighting women and girls of many kinds across time and spaces of America. It moves across centuries (through to the contemporary period) probing within and far beyond icons to unveil the gendered nature of crime and moreover to empower students to see and trace everyday female criminality that ignited across racial, ethnic, as well as lines of age in the winding path of American history. While men and boys dominate public and even scholarly expectations of crime and carceral conversations for many, students will leave this course with a far more rigorous understanding of the herstories gained by taking serious the types of crimes that women and girls acted out by exploring: robbery, assault, infanticide, larceny, murder, arson, prostitution, serial killers, and drug-related crimes. As well as going further to probe state and federal power through carceral medicine - showing the interior world of female prisoners, physicians, the movement of females into "asylums" and mental state hospitals, incarceration based on "insanity" while going further to examine births, illnesses, and death of women and teens in jails and prisons. Students will be likewise pushed to engage America's timeline of race, gender, and executions that includes women and girls. Racialized and gendered criminality, law enforcement violence, healthcare and deathcare in prisons are critical public health issues that students can better understand the complicated evolutions by deeply probing the herstorical lives of women, girls, and crime through this course. Students will read, learn, dig up the past, and write to ensure a future of herstory and remembrance.

**L85 MedH 408 Disease, Madness, and Death Italian Style**

Italian literary history teems with representations of illness, insanity, and death. From the ghastly 1348 plague that frames Boccaccio's Decameron to the midday madness of errant Renaissance knights, from 16th-century tales of poisoning and 19th-century Pirandellian madmen to the contemporary scourge of mafia killings, disease, madness and death are dominant facts of reality, points of view, symbols, and cultural characteristics of Italian poetry and prose. This course undertakes a pathology of these tropes in Italian literary history and seeks to understand their meaning for the changing Italian cultural identity across time and the Italian peninsula. We will read primary literary texts and view excerpts from films alongside articles focused on the cultural history of medicine, religion, and criminal justice. Taught in English. No Final.

---

**L85 MedH 414 Gender, Religion, Medicine, and Science**

Have you ever wondered why some topics are argued using religion as a guide, while others may approach the topic from what is perceived as a strictly scientific point of view? This course explores how and why gender and sexuality tend to be at the center of debates that pit Medicine and Science against Religion. Using feminist and queer scholarship, this course explores five hundred years of rhetorical strategies related to defining, or regulating, gender and sexuality. We will consider how much debates have changed from sixteenth-century Europe to 21st century United States by asking when, why and how either Medicine & Science or Religion influenced social thought and laws. Finally, we will consider how, and if, contemporary debates on vaccines are either part of the long history of debating bodily autonomy (as is the case with the other topics addressed in class), or if the conflict between religion, medicine and science in the modern era is new and distinctly different from past rhetorical strategies. Prerequisite: Introduction to Women, Gender and Sexuality Studies

---

**L85 MedH 418 Sexuality and Gender in East Asian Religions**

In this course we will explore the role of women in the religious traditions of China, Japan and Korea, with a focus on Buddhism, Daoism, Shamanism, Shinto and the so-called "New Religions." We will begin by considering the images of women (whether mythical or historical) in traditional religious scriptures and historical or literary texts. We will then focus on what we know of the actual experience and practice of various types of religious women - nuns and abbesses, shamans and mediums, hermits and recluses, and ordinary laywomen - both historically and in more recent times. Class materials will include literary and religious texts, historical and ethnological studies, biographies and memoirs, and occasional videos and films. Prerequisites: This class will be conducted as a seminar, with minimal lectures, substantial reading and writing, and lots of class discussion. For this reason, students who are not either upper-level undergraduates or graduate students, or who have little or no background in East Asian religion or culture, will need to obtain the instructor's permission before enrolling.

---

**L85 MedH 420 Nature, Technology, and Medicine in Korea**

This course examines the cultural history of modern Korea with a focus on science, technology, and medicine. From about 1500 to the present, a number of hugely consequential things happened in Korea that have been called revolutionary-or what historians dub "early modern" and "modern." Confucian kings planned large-scale projects that changed nature, rustic scholars made inventories of flora and

fauna, colonial Koreans became biologists, nurses, and "Edisons," and in North and South Korea, new professionals created distinctive—and in some cases, globally-competitive—regimes of knowing, making, and healing. Students will interrogate these developments as an opportunity to revisit the history of modernity, which has been told predominantly from the perspective of the West. What does it mean to be "modern" in Korea? How did that modernity intersect with Korean science, technology, and medicine? Students will find and articulate their own answers by writing the final research paper. Recommended to have taken Korean Civilization or equivalent course that provides basic working knowledge of Korean history. Course also counts as an EALC capstone course. Prerequisite: junior level or above or permission of instructor.

### **L85 MedH 4601 Historical Racial Violence: Legacies & Reckonings**

There is growing awareness of the legacies of historical racial violence in the United States and a related increase in reckoning efforts.

Area histories of enslavement, lynching, and other racial terror and dispossession relate to inequality, conflict, and violence in the same places today. These 'haunting legacies' include heart disease and other health disparity, homicide rates, white supremacist mobilization, and corporal punishment in schools. Meanwhile, many communities and institutions are moving to acknowledge and address legacies of historical racial violence in various ways. This course combines seminar-style readings and writing on legacies of racial violence with a practicum component, where individual students or groups of students will conceptualize and develop interventions intended to clarify and disrupt legacies of racial violence, facilitating contemporary reckoning. The practicum will explore and support a broad range of interventive efforts, including public policy measures, original research projects, archival development, commemorative efforts, and a related array of mediums, including visual art, design, film, digital projects, and other creative approaches.

---

### **L85 MedH 4647 Ancient Madness**

In this course we will ask what madness meant in Greek and Roman culture. We will find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating, and categorizing people treated as mad. While we will concentrate on literary (particularly tragic and epic), philosophical, and medical texts, we will also look at visual representations and evidence from ritual and cult. An important part of our project will involve tracing the afterlife of classical ideas: the history of melancholia will ground this aspect of the course. Finally, we will consider how antiquity informs psychoanalysis (Oedipus, Antigone, Narcissus), and how ancient madness might partake in a critique of contemporary understandings of mental illness.

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

### **L85 MedH 4700 Ancient Greek and Roman Gynecology**

This course examines gynecological theory and practice in ancient Greece and Rome, from about the 5th century BCE to the 3rd century CE. The task is complicated by the nature of our evidence. Our surviving textual sources are authored exclusively by men, mainly physicians. They have a pronounced tendency to conceptualize the health and disease in terms of a single body, which was male by default. They distinguished female bodies from male primarily in reproductive aspects. How exactly did these physicians understand diseases of women and, as far as can be recovered, to what extent were their views represented among laypeople? What form did treatment take and what was the social status of practitioners, both that of our extant sources and female practitioners whose voices have largely been silenced by the textual tradition? We will approach the study of Greek and Roman gynecology, first from the perspective of Greco-Roman medical views,

then from the point of view of contemporary Western biomedicine. The limited nature of our sources will allow students to read the majority of surviving material. These primary readings will be accompanied by current secondary scholarship that explores these fascinating and often frustrating questions about the female body in ancient medical thought. All primary materials will be available in English translation. There will be an option for students with a background in Greek or Latin to form a satellite reading group. The course does not assume familiarity with Greek and Roman medicine more broadly.

---

### **L85 MedH 471 Galen's "On Prognosis": A Social History of Medicine in Second-Century Rome**

Galen of Pergamum was a Greek physician, philosopher, and intellectual active throughout most of the second century CE. He was also a voracious reader and writer of Greek literature; his surviving work far exceeds the extant output of any other Greek author before the third century CE. In this course, we will be reading Galen's treatise "On Prognosis," in which he recounts his career in the city of Rome, from his arrival in the early 160s through his tenure as an imperial physician to at least the emperors Marcus Aurelius and Commodus. While ostensibly a medical account, "On Prognosis" has little to say on technical medical issues. Rather, Galen's story is a carefully constructed professional autobiography that pivots from searing denunciations of Roman life to tense public performances of medical expertise and finally to intimate case histories of Rome's rich and powerful. The text presents us a fascinating window through which to examine not only the social practice of elite medicine in Rome of the second century but also the complicated experience of a Greek intellectual navigating the corridors of the Imperial court. Course goals include improving accuracy and speed in reading Greek prose, acquiring greater familiarity with intellectual discourse of the Imperial Period, and training in methods of research and writing.

### **L85 MedH 4881 Advanced Seminar: Mad: Mental Illness, Power and Resistance in Africa and the Caribbean**

This seminar explores the history of mental illness in Africa and the Caribbean during the colonial and post-colonial periods. We will be guided by the following questions: What is mental illness? How do social, cultural and political realities affect how mental illness is defined? Should mental illness always be analyzed within a specific cultural context? How did psychiatry factor into the efforts of European colonizers to maintain social order in their colonies? How have colonized people resisted colonial notions of madness? What is the place of religion in these histories? How did mental institutions change after the end of colonial rule and how was post-colonial Caribbean and African psychiatry harnessed in service of decolonization? The course will pay special attention to how European colonial powers employed similar understandings of blackness across regions as they formulated ideas concerning the black populations they deemed "mad" across Africa and the Caribbean.

Same as L22 History 4881

Credit 3 units. A&S IQ: HUM, LCD EN: H

**L85 MedH 4885 Advanced Seminar: Medicine, Disease, and Empire**

This course examines the history of medicine in connection to the politics of colonialism and empire-building, spanning the sixteenth century through the twentieth century. Topics covered include: epidemic disease outbreaks (e.g. smallpox, cholera, malaria); the role of science and medicine in endorsing the "civilizing missions" of empires; tropical climates and tropical diseases as western constructs; tensions between western medicine and indigenous healing practices and beliefs; ideas of race and racism in science and medicine; modern advancements in sanitation and public health and their implementation overseas; and the historical roots of the modern global health movement.

**L85 MedH 491 Staging Illness**

"Suddenly some force struck him in the chest and side, making it still harder to breathe, and he fell through the hole and there at the bottom was a light." This quotation, from Tolstoi's story "The Death of Ivan Ilych," offers an example of how artists have employed serious or life-threatening diseases as a means of illuminating both physical suffering and spiritual rebirth. Even as it invades the body and isolates us from our fellow man, illness may offer opportunities for spiritual growth and renewal, serving as an apt metaphor for human survival in times of extremis. In her brilliant essay, "Illness as Metaphor" (1978), Susan Sontag takes issue with how illnesses like tuberculosis were misunderstood or even romanticized during the 19th century in works like Dumas's "Camille" and Puccini's "La Boheme." During the AIDS crisis in the 1980s and 1990s, American artists -- particularly theatre artists, whose communities were decimated by the disease -- were forced to consider how this global pandemic impacted their lives, especially at a time when the term AIDS was not even mentioned by the President of the United States. In conjunction with the Performing Arts Department's 25th anniversary production of Tony Kushner's extraordinary play, "Angels in America, Part 1, Millennium Approaches," this new course examines how disease has been a focal point of artistic inquiry over the course of centuries. By examining works that are focused on illness throughout history, the seminar offers both a deeper understanding of and context for Kushner's masterpiece and the AIDS crisis, and it considers how illness has always been an important subject for the investigation of what it means to be fully human.

**L85 MedH 4990 Advanced Seminar: History of the Body**

Do bodies have a history? Recent research suggests that they do. Historians have tapped a wide variety of sources - including vital statistics, paintings and photographs, hospital records, and sex manuals - to reconstruct changes in how humans have conceptualized and experienced their own bodies. We will pay particular attention to the intersection of European cultural history and history of medicine since 1500. This course fulfills the History major capstone requirement as an Advanced Seminar.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

## History Major

### Program Requirements

- **Total units required: 28**

### Required Courses

Requirements	Units
Introductory courses	6
Upper-level courses	18
Capstone experience	4

### Introductory Courses

- One introductory survey (100 level)
- One additional introductory course, chosen from any 100- or 200-level course listed in History and taught by history department faculty\*

**Note:** Students may satisfy introductory course requirements using AP credit if they have earned a score of 5 on the AP European, U.S., or World History examinations.\*\*

\* This course can be an introductory survey, lecture, or seminar, and it can be either home-based or cross-listed in History. **Note:** "History department faculty" does *not* include affiliated faculty.

\*\* Students will be awarded 3 units of credit per AP exam for a maximum of 6 credits toward the major or minor. A score of 4 on any of these exams may earn 3 units of elective credit but will not be counted toward the major or minor.

### Upper-Level Courses

At least 18 300- or 400-level units *plus* a capstone experience (for a minimum of 22 advanced units) must be completed. Requirements at this level include the following:

- At least one course designated "premodern" and one course designated "modern"
- At least one course from three of the following geographical areas: Africa, East Asia, South Asia, Europe, Latin America, Middle East, or the United States or in transregional history (please refer to note 5 below)
- The capstone experience: History majors must, prior to graduation, complete a capstone experience that consists of the following:
  - Successful completion of the senior honors thesis; or
  - An advanced seminar; or
  - An independent research project with a significant writing component (History 500 Independent Work); or
  - Directed fieldwork in the historical or archival profession, with a significant writing component

## Notes

1. Students should register under the History L22 department code for any courses that will count toward the major.
2. Students must achieve a grade of C- or higher in a course in order for that course to count toward the major requirements.
3. International Baccalaureate: The department recognizes the superior preparation that many students have received in this program; however, no credit is awarded for the International Baccalaureate.
4. The department recognizes that some students take their first history course or develop an interest in majoring in history only during their junior year and then face a dilemma in choosing between required introductory courses and upper-level course work more appropriate to their abilities. Such students, with the recommendation of their advisor in history, may petition the director of undergraduate studies to permit a designated upper-level course to substitute for one of the introductory courses. In all such cases, the minimum number of units remains 18 in the minor and 28 in the major.
5. All upper-level units must be separate courses that are not double-counted toward a minor or second major. Courses in the major are excluded from the Pass/Fail option.
6. If a student chooses to count a transregional course toward the geographical requirement, at least one of the two other geographical areas that the student counts toward the major must cover a region that is not included in the transregional course. For example, a student who has completed courses in U.S. and Latin American history could not count a transregional course that examines the comparative history of the United States and Latin America. However, a student who has taken a transregional course on the United States and Latin America could take a course on either U.S. or Latin American history and would then need to take a course covering an area other than the United States or Latin America to satisfy the third area requirement.
7. Courses taken Pass/Fail do not count toward the major or minor.

## Additional Information

### Fieldwork

History majors are eligible for fieldwork at the Missouri Historical Society or at other museums. Opportunities are also sometimes available in the special collections at Olin Library, with local businesses, and at historical sites.

### Study Abroad

The Department of History strongly encourages student participation in the various year and semester abroad programs approved by the College. A maximum of 6 history credits earned from studying abroad may be applied to the major in history. Students must have their courses preapproved by the department's study abroad advisor prior to departure. It is possible to pursue a senior honors thesis after study abroad, but careful planning is required.

## Transfer Credits

While the History Department does not restrict the number of transfer credits a student can apply to the major requirements, University policy does specify that at least half of the units for the major must be completed in residence at the Washington University.

## Senior Honors

Students who have a strong academic record may work toward Latin Honors. Students graduating with Latin Honors must meet grade point average requirements and satisfactorily complete History 399 Senior Honors Thesis and Colloquium: Writing-Intensive Seminar while writing a thesis during the senior year.

## Awards and Prizes

The Department of History annually awards the following prizes:

- The Helen and Isaac Izenberg Prize for a superior paper written for an Advanced Seminar
- The Shirley McDonald Wallace Prize for an outstanding first-year student enrolled in both semesters of Western Civilization
- The J. Walter Goldstein Prize for an excellent, well-written senior honors thesis
- The Konig Prize in Law & History for the best-written paper addressing the connection between law and history in any history course

## Special Opportunities

Undergraduates interested in history are encouraged to join the Undergraduate History Association, which is the local chapter of Phi Alpha Theta (PAT). Led by the ongoing campus PAT members, the chapter usually holds an initial organizing meeting in the fall of each year. The activities of the chapter vary, but they typically include sponsorship of lectures, films, discussions and social events. Although national PAT membership requires 12 completed units of history courses, the local chapter welcomes the participation of all students interested in history. Each year, PAT publishes *The Gateway History Journal*, an anthology of the best student historical writing at Washington University.

## History Minor

### Program Requirements

- **Total units required:** 18

## Required Courses

Requirements	Units
Introductory courses	6
Upper-level courses	12

### Introductory Courses

- One introductory survey (100 level)
- One additional introductory course, chosen from any 100- or 200-level course listed in History and taught by history department faculty\*

**Note:** Students may satisfy introductory course requirements using AP credit if they have earned a score of 5 on the AP European, U.S., or World History examinations.\*\*

\* This course can be an introductory survey, lecture, or seminar, and it can be either home-based or cross-listed in History. **Note:** "History department faculty" does *not* include affiliated faculty.

\*\* Students will be awarded 3 units of credit per AP exam for a maximum of 6 credits toward the major or minor. A score of 4 on any of these exams may earn 3 units of elective credit but will not be counted toward the major or minor.

### Upper-Level Courses

Students must complete 12 additional units, 9 of which must be at the 300 or 400 level.

### Study Abroad

The Department of History strongly encourages student participation in the various year and semester abroad programs approved by the College. A maximum of 3 history credits earned from studying abroad may be applied to the minor. Students must have their courses preapproved by the department's study abroad advisor prior to departure.

### Transfer Credits

While the History Department does not restrict the number of transfer credits a student can apply to the minor requirements, College policy does specify that at least half of the units for the minor must be completed in residence at the Washington University.

### Notes

1. Students must achieve a grade of C- or higher in a course in order for that course to count toward the minor requirements.
2. All 18 units must be separate courses not double-counted toward the major or another minor. Courses in the minor may not be taken Pass/Fail.
3. The department recognizes that some students take their first history course or develop an interest in declaring a minor in history only during their junior year and then face a dilemma in choosing between required introductory courses and upper-level course work more appropriate to their abilities. Such students, with the

recommendation of their advisor in history, may petition the director of undergraduate studies to permit a designated upper-level course to substitute for one of the introductory courses. In all such cases, the minimum number of units in the minor remains 18.

## Medical Humanities Minor

### Program Requirements

- **Total units required:** 18

### Required Courses

**First-year courses** include the following:

Code	Title	Units
MedH 130	The Art of Medicine	3
MedH 151	First-Year Seminar: Stories of Medicine	3

**An additional 15 units of Medical Humanities courses are required to complete the minor:** At least 12 of these units must be core courses, designated by the "CFH MH" attribute, whereas the remaining 3 credits may come from either the core or affiliate lists shown below. At least 9 units of core courses must be at the 300 level or above. Core courses include the gateway courses as well as the following:

Code	Title	Units
MedH 214	Medical French	3
MedH 248	Religion, Health, and Wellness in Modern America	3
MedH 3001	Philosophy of Medicine	3
MedH 301R	Historical Methods - European History (when offered as "The Black Death and the Plague in Europe")	3
MedH 3033	Religion and Healing	3
MedH 3041	Making Sex and Gender: Understanding the History of the Body	3
MedH 3044	Humors, Pox, and Plague: Medieval and Early Modern Medicine	3
MedH 3067	Current Topics in the History of Medicine	3
MedH 307	Writing and Medicine	3
MedH 310	From Hysteria to Hysterectomy: Women's Health Care in America	3
MedH 3141	The Racial and Sexual Politics of Public Health	3
MedH 316	Gender and Health	3
MedH 353	Medical Spanish	3
MedH 360	Trans Studies	3
MedH 366	Art and the Mind-Brain	3

MedH 3672	Medicine, Healing and Experimentation in the Contours of Black History	3
MedH 3801	Ancient Greek and Roman Medicine	3
MedH 385	What is Medical Humanities?	3
MedH 391W	Literature and Medicine	3
MedH 399	Independent Work in Medical Humanities	-3
MedH 233F	Biomedical Ethics	3
MedH 130	The Art of Medicine	3
MedH 1640	Health and Disease in World History	3
MedH 408	Disease, Madness, and Death Italian Style	3
Anthro 4134	The AIDS Epidemic: Inequalities, Ethnography, and Ethics	3
MedH 414	Gender, Religion, Medicine, and Science	3
MedH 420	Nature, Technology, and Medicine in Korea	3
MedH 4601	Historical Racial Violence: Legacies & Reckonings	3
MedH 4647	Ancient Madness	3
MedH 468	Topics in French Literature: Disability Studies, Before "Disability"	3
MedH 4700	Ancient Greek and Roman Gynecology (Ancient Greek and Roman Gynecology)	3
MedH 471	Galen's "On Prognosis": A Social History of Medicine in Second-Century Rome	3
MedH 474	Frankenstein: Origins and Afterlives	3
MedH 4881	Advanced Seminar: Mad: Mental Illness, Power and Resistance in Africa and the Caribbean	3
MedH 4885	Advanced Seminar: Medicine, Disease, and Empire	3
MedH 491	Staging Illness	3
MedH 4990	Advanced Seminar: History of the Body	3
MedH 495	PNP Seminar (when offered as "Mental Health & Mental Illness: Philosophical Questions")	3

Core courses are recommended to take at least two of seven different disciplinary categories: Classics & Art History; History; Languages/Literature/Culture; Medicine, Race and Ethnicity; Performing Arts & Music; Philosophy & Religious Studies; and Women, Gender, and Sexuality Studies. (The interdisciplinary "What is Medical Humanities?" course [MedH 385] may count toward any of these disciplinary categories.) Core courses may require additional prerequisites within their home departments or programs.

**Up to 3 units of affiliate courses from complementary disciplines** in the natural sciences and social sciences discipline (designated by the "CFH MHA" attribute) may be applied to the minor. These courses include but are not limited to the following:

Code	Title	Units
Anthro 3201	Gender, Culture, and Madness	3
Anthro 3283	Introduction to Global Health	3
Anthro 3310	Health, Healing and Ethics: Introduction to Medical Anthropology	3
Anthro 3620	Anthropological Perspectives on the Fetus	3
Anthro 3625	The Female Life-Cycle in Cross-Cultural Perspective	3
Anthro 3626	Adventures in Nosology: The Nature and Meaning of Disease	3
Anthro 4033	Culture, Illness, and Healing in Asia	3
LatAm 325	Cultures of Health in Latin America	3
Psych 399	Living, Dying, and Death: A Biopsychosocial Approach to Understanding the End of Life	3
SOC 2510	Sociological Approaches to American Health Care	3
SOC 2520	Inequality By Design: Understanding Racial/Ethnic Health Disparities	3
SOC 4511	Sick Society: Social Determinants of Health and Health Disparities in the United States	3

Any additional affiliate courses must be approved by the minor director.

## Additional Information

While our core courses and affiliate courses are generally listed under the L85 MedH designation, the most up-to-date list of recent medical humanities courses and medical humanities affiliate courses can be found by searching Washington University Course Listings for the "CFH MH" and "CFH MHA" attributes or by consulting the course requirements online.

Website: <https://humanities.wustl.edu/>

## Jewish, Islamic, and Middle Eastern Studies

Jewish, Islamic, and Middle Eastern Studies is an academic department, unique in North America, in which Jewish studies, Islamic studies, and Middle Eastern studies are integrated. It is an interdisciplinary department that motivates students to explore the historical experience; the literary, religious, and cultural expression; and the political and material life of Jewish, Islamic, and Middle Eastern civilizations. Whether students favor the study of language, literature, religion, history, or politics, they will find a way to deepen their appreciation and understanding of these complex and diverse societies and cultures in our courses. Students will also be inspired to explore the interaction of Jews and Muslims with neighboring societies and cultures in the Middle East, Europe, North Africa, and other parts of the world.

Students completing our majors and minors have gone on to do many things after graduation. Many have entered professional schools in such fields as law, government, journalism, international affairs, education, the rabbinate or ministry, and communal or social work. Others have gone on to do graduate work in either Jewish, Islamic, or Middle Eastern studies or related disciplines. Still others have combined their interest in Jewish, Islamic, and Middle Eastern Studies with careers in business, medicine, or scientific research. All have found the major to be an intellectually and emotionally rewarding experience and an important component of their overall development.

The goals of the department are as follows:

1. Convey an appreciation for the complexities, depth, diversity, and cultural richness of Jewish and Islamic civilizations in their historical context, from antiquity to the present.
2. Explore the interaction of Jewish, Islamic, and other Middle Eastern societies and cultures with neighboring peoples both within and outside the Middle East.
3. Encourage the mastery of the primary languages and literatures in which Jews and Muslims have expressed their cultures.
4. Prepare students for graduate or professional studies in these or related fields.

### L49 Arab 1020 First-Year Seminar: The New Arab Gulf: Migrants, Weirdos, and Rebels

The Arab Gulf (also known as the Arabian Peninsula, or the Persian Gulf) is a central yet understudied region of the modern Middle East. The six oil-rich countries (Saudi Arabia, United Arab Emirates, Qatar, Kuwait, Bahrain, and Oman) have been allies of the United States for decades, hosting some of the U.S. largest military bases, and spending billions on US arms sales every year. The Gulf region has also been a main destination for blue-collar workers from the Arab world, South and East Asia, and more recently from Africa. Historically, the region was a central point on the trade routes between the Indian subcontinent, West Asia, Africa, and into Europe. These routes involved spice and tea trades, pearl and gold trade, and what is known as the Indian Ocean

slave trade. In addition to its colonial history and economic power, the Gulf region has become a place of cultural production, capital, and infrastructure, representing a shift away from the traditional centres of Arab culture like Egypt, Lebanon, and Iraq. It hosts remote campuses of western universities such as New York University Abu Dhabi, Georgetown Doha, or global branches of western arts institutions like the Louvre and Guggenheim. Moreover, most of the major literary and arts awards, funds, grants, and galleries in the Arabic-speaking world are now located in the Gulf region, established and funded as government initiatives. Parallel to this growing infrastructure, the Gulf region is also a hub of ideas and movements where diverse groups come to critique and contest conceptions of identity, class, gender, and race, against official histories. This course will explore the following set of special topics to help us learn about the region, its politics, cultures, and societies: Petro-capitalism, Race and Ethnicity, Migration, Ecology, Gender and Sexuality, and Pop Culture. We will be studying the region through an interdisciplinary lens that involves fiction, non-fiction, literary criticism, scholarship, and visual arts. Course is for first-year, non-transfer students only.

### L49 Arab 208F Introduction to Jewish Civilization: History and Identity

The anthropologist Clifford Geertz once famously invoked Max Weber in writing that "man is an animal suspended in webs of significance he himself has spun. I take culture to be those webs." The main goal of this course—designed as an introduction to Jewish history, culture, and society—will be to investigate the "webs of significance" produced by Jewish societies and individuals, in a select number of

historical periods, both as responses to historical circumstances and as expressions of Jewish identity. Over the course of the semester we will focus on the following historical settings: 7th century BCE Judah and the Babylonian exile; pre-Islamic Palestine and Babylonia (the period of the Mishnah and the Talmud); Europe in the period of the Crusades; Islamic and Christian Spain; Europe in the 18th and 19th centuries; North America in the 20th century; and the modern State of Israel. For each period we will investigate the social and political conditions of Jewish life; identify the major texts that Jews possessed, studied, and produced; determine the non-Jewish influences on their attitudes and aspirations; and explore the efforts that Jews made to define what it meant to be part of a Jewish collective.

#### **L49 Arab 3075 Third-Level Arabic I**

This course is a continuation of Intermediate Arabic II. Competence in reading, writing, speaking, listening and culture is developed through intensive exposure to classical and modern standard Arabic in its written and audiovisual forms. Prerequisite: Grade of B- or better in L49 208D or placement by examination. Note: L75 5075 is intended for graduate students only.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L49 Arab 3085 Third-Level Arabic II**

This course is a continuation of Third-Level Arabic I. The continued integration of language development will occur through reading, writing, speaking, and listening activities centered around advanced authentic material. This semester will prove critical for making the transition from modern Arabic to classical Arabic, including Qur'anic Arabic. There will also be focus on the continued development of colloquial Arabic. Prerequisite: Grade of B- or better in L49 3075 or placement by examination. Note: L75 5085 is intended for graduate students only.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L49 Arab 313C Islamic History: 600-1200**

The cultural, intellectual, and political history of the Islamic Middle East, beginning with the prophetic mission of Muhammad and concluding with the Mongol conquests. Topics covered include: the life of Muhammad; the early Muslim conquests; the institution of the caliphate; the translation movement from Greek into Arabic and the emergence of Arabic as a language of learning and artistic expression; the development of new educational, legal and pietistic institutions; changes in agriculture, crafts, commerce and the growth of urban culture; multiculturalism and inter-confessional interaction; and large-scale movements of nomadic peoples.

---

#### **L49 Arab 3149 The Late Ottoman Middle East**

This course surveys the Middle East in the late Ottoman period (essentially the 18th and 19th centuries, up to the First World War). It examines the central Ottoman state and the Ottoman provinces as they were incorporated into the world economy, and how they responded to their peripheralization in that process. Students will focus on how everyday people's lived experiences were affected by the increased monetarization of social and economic relations; changes in patterns of land tenure and agriculture; the rise of colonialism; state efforts at modernization and reform; shifts in gender relations; and debates over the relationship of religion to community and political identity.

Same as L22 History 3149

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

#### **L49 Arab 325 Introduction to Arabic Literature**

A survey of the major genres and themes in Arabic literature from the pre-Islamic era to the modern period. Texts will include pre-Islamic, classical and Sufi poetry, as well as popular tales and critical prose from the Umayyad and Abbasid empires and Andalusia. The modern sections of the course will interrogate political commitment in Arabic literature and introduce students to feminist and magical realist novels from North Africa and the Levant. All readings will be in English translation. Please note: L75 525 is intended for graduate students only.

---

#### **L49 Arab 329C Middle Eastern Islamic Literatures in Translation**

This course will study, in English translation, several great works of Islamic literature that still influence or reflect the ways in which we perceive Islamic culture today. We will critically consider great and disparate literary works, originally written in a variety of languages including Arabic, Turkish, and Persian and stretched from Spain to India, which share the common backdrop of an urban and educated milieu in which they were produced, widely read, and circulated. The course aims at exploring the literary cultures in their historical and social context. Possible themes include court literature, politics, Sufi literature, history, theology, and literature of romance. All readings are in English.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

#### **L49 Arab 352 Iraqi Literature**

This course introduces students to major works in Iraqi literature in the twentieth and twenty-first centuries, with a focus on the post-World War Two period up to the present day.

---

#### **L49 Arab 396 Islamic Philosophy, Mysticism, and Theology**

How does an individual achieve access to knowledge and access to God? To what extent is such access dependent upon scripture? To what extent is such access dependent upon reason? Are there forms of truth and experience that only reveal themselves through mysticism? Questions of this sort are central to the interrelated disciplines of Islamic philosophy, Islamic theology, and Islamic mysticism (i.e., Sufism). This course examines how these three disciplines have shaped various aspects of social life within premodern Muslim communities.

Same as L23 Re St 396

**L49 Arab 4050 Diaspora in Jewish and Islamic Experience**

Tensions between center and periphery; migration and rest; power and powerlessness; and exile, home, and return are easily found in the historical record of both Jews and Muslims. For Muslims, it can be said that it was the very success of Islam as a world culture and the establishment of Muslim societies in all corners of the globe that lay at the root of this unease. However, the disruptions of the post-colonial era, the emergence of minority Muslim communities in Europe and North America, and the recent tragic flow of refugees following the Arab Spring have created a heightened sense of displacement and yearning for many. Of course, the very term "diaspora" -- from the ancient Greek, meaning "dispersion" or "scattering" -- has most often been used to describe the Jewish condition in the world. The themes of exile and return and of catastrophe and redemption are already woven into the Hebrew Bible, and they continued to be central motifs in Rabbinic Judaism in late antiquity and the Middle Ages. This occurred despite the fact that more Jews lived outside the borders of Judea than within the country many years before the destruction of Jewish sovereignty at the hands of the Romans. In the 20th century, European imperialism, nationalisms of various types, revolution, and war -- including the Israeli-Palestinian conflict -- have done much to underscore the continuing dilemmas of diaspora and home in both Jewish and Islamic identity. The goal of this course is to offer a comparative historical perspective on the themes of migration and displacement, center and periphery, home and residence, and exile and return and to give students the opportunity to examine in depth some aspect of the experience of diaspora. Note: This course fulfills the capstone requirement for Jewish, Islamic, and Middle Eastern Studies. The course also counts as an Advanced Seminar for history. (Students wishing to receive history Advanced Seminar credit should also enroll in L22 491R section 19 for 1 unit.) The course is open to advanced undergraduate and graduate students.

---

**L49 Arab 4060 Convivencia or Reconquista? Muslims, Jews, and Christians in Medieval Iberia**

This seminar will explore various facets of the coexistence (convivencia) of Muslims, Jews, and Christians in medieval Spain. Its horizon stretches from the Muslim conquest of Iberia (al-Andalus) up to the turn of the 16th century when Spanish Jews and Muslims were equally faced with the choice between exile and conversion to Christianity. Until about 1100, Muslims dominated most of the Iberian Peninsula; from then onward, Christians ruled much and eventually all of what would become modern Spain and Portugal. Through a process known as reconquista (reconquest), Catholic kingdoms acquired large Muslim enclaves. As borders moved, Jewish communities found themselves under varying Muslim or Christian dominion. Interactions between the three religious communities occurred throughout, some characterized by shared creativity and mutual respect, others by rivalry and strife. The course focuses on these cultural encounters, placing them in various historical contexts. It will explore the ambiguities of religious conversion, and the interplay of persecution and toleration. Last not least, the course will address the question of how the memory

of medieval Spain's diversity reverberates-and is utilized-in modern popular and academic discourse. All sources will be read in English translation; however, students are encouraged to make use of their linguistic and cultural expertise acquired in previous classes. This course serves as the capstone seminar for Jewish, Islamic & Near Eastern Studies majors, Arabic majors, and Hebrew majors. Graduate students, minors, and other interested undergrads are likewise welcome.

**L49 Arab 407 Fourth-Level Arabic: Modern Literature**

Focused reading and discussion of texts written by modern Arab intellectuals. These texts will center on the interrelated topics of modernity, politics, and religion. The course will emphasize: (1) increasing reading speed; (2) increasing depth of reading comprehension; (3) strengthening grammar; (4) building Arabic to English translation skills. PREREQ: Grade of B- or better in L49 308D Advanced Arabic I or L49 3085 Third-Level Arabic II or placement by examination.

Credit 3 units. A&S IQ: LCD, LS Art: HUM BU: HUM EN: H

---

**L49 Arab 408 Fourth-Level Arabic: Classical Literature**

This class provides an overview of pre-modern Arabic-Islamic thought (i.e., Islamic intellectual traditions expressed in the Arabic language). Topics to be covered include Pre-Islamic Poetry, Quran, Hadith, Islamic Law, Sufism, Philosophy, Natural Science, and Social Thought. Students will be introduced to these topics through focused reading and discussion of Classical Arabic texts by key thinkers like al-abari, Ibn al-ajar, Ibn Qudama, al-Ghazali, Ibn Sina, Ibn Rushd, and Ibn Khaldun. In addition to reading Classical Arabic texts, students will be given select exercises designed to strengthen their grammar, expand their vocabulary, and build their translation. PREREQ: Grade of B- or better in L49 308D Advanced Arabic I or L49 3085 Third-Level Arabic II or placement by examination.

Credit 3 units. A&S IQ: LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

**L74 HBRW 179 First Year Seminar: Midrash: The Imaginative Interpretation of Biblical Texts**

FRESHMAN SEMINAR. The aim of this course is to introduce students to Midrash, the highly fascinating literature of Rabbinic Biblical interpretation. Among the topics to be studied are: How did the classical Rabbis read the Bible? What is the relationship between the plain meaning of the Biblical text and the polyphone interpretations of Midrash? How can numerous, at times even contradictory interpretations of the same verse coexist? What is the function of imaginative narratives, parables, and folklore in Midrash? Initially the Midrashic logic may seem elusive from the viewpoint of a modern Western reader, in turn its creative thinking will prove to be smart, playful, at times even slippery, and yet substantial. Addressing the literary, historical, and cultural context in which Rabbinic Midrash developed, we will get to know a variety of Midrashic collections and styles covering a time span from late antiquity to the Middle Ages. All

primary sources will be read in translation. Throughout the semester we will devote time to discussing practical questions such as how to use the Library's catalogue and (electronic) reference sources, as well as techniques for structuring and writing students' essays. Same as L75 JIMES 179

Credit 3 units. A&S: FYS A&S IQ: HUM BU: ETH EN: H

---

**L74 HBRW 301C Kings, Priests, Prophets, and Rabbis: The Jews in the Ancient World**

We will trace Israelite and Jewish history from its beginnings in the biblical period (circa 1200 BCE) through the rise of rabbinic Judaism and Christianity until the birth of Islam (circa 620 CE). We will explore how Israel emerged as a distinct people and why the rise of the imperial powers transformed the political, social, and religious institutions of ancient Israel. We will illuminate why the religion of the Bible developed into rabbinic Judaism and Christianity and how rabbinic literature and institutions were created.

Same as L75 JIMES 301C

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: BA, HUM

---

**L74 HBRW 3082 From the Temple to the Talmud: The Emergence of Rabbinic Judaism**

This course offers a survey of the historical, literary, social, and conceptual development of Rabbinic Judaism from its emergence in late antiquity to the early Middle Ages. The goal of the course is to study Rabbinic Judaism as a dynamic phenomenon -- as a constantly developing religious system. Among the topics to be explored are: How did Judaism evolve from a sacrificial cult to a text-based religion? How did the "Rabbis" emerge as a movement after the destruction of the Second Temple and how could they replace the old priestly elite? How did Rabbinic Judaism develop in its two centers of origin, Palestine (the Land of Israel) and Babylonia (Iraq), to become the dominant form of Judaism under the rule of Islam? How did Jewish ritual and liturgy develop under Rabbinic influence? How were the Rabbis organized and was there diversity within the group? What was the Rabbis' view of women, how did they perceive non-Rabbinic Jews and non-Jews? As Rabbinic Literature is used as the main source to answer these questions, the course provides an introduction to the Mishnah, the Palestinian and Babylonian Talmuds, and the Midrash-collections -- a literature that defines the character of Judaism down to our own times. All texts are read in translation.

Same as L23 Re St 3082

---

**L74 HBRW 320D Third-Level Modern Hebrew I**

Designed to improve proficiency in the oral and written use of modern Hebrew through reading and discussion of short stories, Israeli newspaper articles, and other selected materials. Students will also have an opportunity to discuss, in Hebrew, current events and public issues related to contemporary Israeli society. PREREQ: Grade of B- or better in L74 214D Intermediate Modern Hebrew II or placement by examination. Please note: L75 520 is intended for graduate students only.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L74 HBRW 3211 Conversational Hebrew**

Designed to focus on and strengthen oral proficiency, we will explore a variety of different topics together based on our common interests - not limited to current affairs, space travel and exploration, advances in medical technology, climate change, pandemic preparedness, economic inequality, and the future of work. With each topic, we will learn relevant vocabulary and structures and apply them in small group discussions, individual presentations, simulated interviews, and classroom debates. Students will also listen to different to Israeli news

reports and documentaries in order to learn how to present at a formal level. The course is designed to simulate a variety of real-life situations, which require the balance of both rehearsal as well as improvisation. By learning Hebrew in different contexts, students will be exposed to a wide range of vocabulary and will be prepared to use the language in a variety of situations. The language of instruction is Hebrew only. PREREQ: Grade of B- or better in L74 214D Intermediate Modern Hebrew II or placement by examination. Please note: L75 5211 is intended for graduate students only.

Credit 3 units. A&S IQ: LCD, LS BU: HUM

---

**L74 HBRW 322D Third-Level Modern Hebrew II**

Designed to develop communicative skills, this course provides opportunities for students to practice the art of speaking and writing correctly, clearly, and effectively. Includes reading and discussion of selected short stories from modern Hebrew literature as well as articles from current Hebrew newspapers. Class discussions deal with literary topics as well as contemporary social and political issues related to life and institutions in Israel. PREREQ: Grade of B- or better in L74 320D Third-Level Modern Hebrew I or placement by examination. Please note: L75 522D is intended for graduate students only.

---

**L74 HBRW 335C Becoming "Modern": Emancipation, Antisemitism and Nationalism in Modern Jewish History**

This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be-or to become-modern. To answer this question, we look at two broad trends that took shape toward the end of the eighteenth century-the Enlightenment and the formation of the modern state-and we track changes and developments in Jewish life down to the close of the twentieth century with analyses of the (very different) American and Israeli settings. The cultural, social, and political lives of Jews have undergone major transformations and dislocations over this time-from innovation to revolution, exclusion to integration, calamity to triumphs. The themes that we will be exploring in depth include the campaigns for and against Jewish "emancipation," acculturation and religious reform; traditionalism and modernism in Eastern Europe; the rise of political and racial antisemitism; mass migration and the formation of American Jewry; varieties of Jewish national politics; Jewish-Gentile relations between the World Wars; the destruction of European Jewry; the emergence of a Jewish nation-state; and Jewish culture and identity since 1945.

Study of selected novels and shorter fiction by women. Attention to the texts as women's writing and as products of Israeli literature. No knowledge of Hebrew necessary; all readings in English translation. Credit 3 units. A&S IQ: HUM, LCD, SC, SD, WI Art: HUM BU: HUM EN: H

---

**L74 HBRW 349 Yidishkayt: Yiddish Literature in English Translation**

This course will trace the emergence, development, flourish, and near-decline of Yiddish literature, beginning with some of the earliest writings to appear in Yiddish in the late middle ages and early modern period, continuing with 19th-century attempts to establish a modern Yiddish literature and the 20th-century emergence of both a classical canon and a literary avant-garde, and ending with post-Holocaust attempts to retain a Yiddish literary culture in the near absence of Yiddish-speaking communities. Focusing on the role of Yiddish as the "national" language of Ashkenaz, the course will examine the ways in which Yiddish literature has responded to the social conditions of

European Jewish life, exploring among others the relationship between Yiddish and the non-Jewish cultures in which it existed, the tensions between secular trends versus religious tradition, life in the shtetl and in the metropolis, immigration from the old world to the new, and Yiddish literary responses to the Holocaust.

#### **L74 HBRW 359 Travelers, Tricksters, and Storytellers: Jewish Travel Narratives and Autobiographies, 1100-1800**

Jewish literature includes highly fascinating travel accounts and autobiographies that are still awaiting their discovery by a broader readership. In this course, we will explore a broad range of texts originating from the Middle Ages to the 19th century. They were written by both Ashkenazi and Sephardi Jews hailing from countries as diverse as Spain, Italy, Germany, and the Ottoman Empire. Among the authors were pilgrims, rabbis, merchants, and one savvy businesswoman.

We will read their works as responses to historical circumstances and as expressions of Jewish identity, in its changing relationship to the Christian or Muslim environment in which the writers lived or traveled. Specifically, we will ask questions such as: How do travel accounts and autobiographies enable their authors and readers to reflect on issues of identity and difference? How do the writers produce representations of an "other," against which and through which they define a particular sense of self? This course is open to students of varying interests, including Jewish, Islamic, or Religious Studies, medieval and early modern history, European or Near Eastern literatures. All texts will be read in English translation. Please note: L75 559 is intended for graduate students only.

#### **L74 HBRW 390 Topics in Migration and Identity: Genocide and Migration: Flight and Displacement Under the Nazi Regime**

The course examines migration movements that are related to the Nazi genocide in Europe. Grounded in a study of the Nazi project to reshape the European geopolitical map, students explore how the mass movement of people is impacted by geopolitics, political violence, and economical considerations. Class materials address the relationship between identity formation and social exclusion, thus opening up a critical investigation of concepts of citizenship, human rights, and their institutional frameworks (states, international organizations etc.) more generally. Students will work with a variety of sources, including primary sources, scholarly analyses, podcasts, literary works, and film to study migrations related to the prehistory, policies, and aftermath of the Nazi regime. The class provides insights into issues of expulsion, refuge, forced migration, settlement projects, ethnic cleansing and others, but also demonstrates the global impact and long-term repercussions of political and genocidal violence. Looking at the Nazi regime through the lens of migration shows that the Nazi genocide is embedded in a history of racism, colonialization, and mass violence.

**L74 HBRW 405 Diaspora in Jewish and Islamic Experience**

Tensions between center and periphery; migration and rest; power and powerlessness; and exile, home, and return are easily found in the historical record of both Jews and Muslims. For Muslims, it can be said that it was the very success of Islam as a world culture and the establishment of Muslim societies in in all corners of the globe that lay at the root of this unease. However, the disruptions of the post-colonial era, the emergence of minority Muslim communities in Europe and North America, and the recent tragic flow of refugees following the Arab Spring have created a heightened sense of displacement and yearning for many. Of course, the very term "diaspora" -- from the ancient Greek, meaning "dispersion" or "scattering" -- has most often been used to describe the Jewish condition in the world. The themes of exile and return and of catastrophe and redemption are already woven into the Hebrew Bible, and they continued to be central motifs in Rabbinic Judaism in late antiquity and the Middle Ages. This occurred despite the fact that more Jews lived outside the borders of Judea than within the country many years before the destruction of Jewish sovereignty at the hands of the Romans. In the 20th century, European imperialism, nationalisms of various types, revolution, and war -- including the Israeli-Palestinian conflict -- have done much to underscore the continuing dilemmas of diaspora and home in both Jewish and Islamic identity. The goal of this course is to offer a comparative historical perspective on the themes of migration and displacement, center and periphery, home and residence, and exile and return and to give students the opportunity to examine in depth some aspect of the experience of diaspora. Note: This course fulfills the capstone requirement for Jewish, Islamic, and Middle Eastern Studies. The course also counts as an Advanced Seminar for history. (Students wishing to receive history Advanced Seminar credit should also enroll in L22 491R section 19 for 1 unit.) The course is open to advanced undergraduate and graduate students.

---

**L74 HBRW 4060 Conflict or Convivencia? Muslims, Jews, and Christians in Medieval Spain**

This seminar will explore various facets of the coexistence (convivencia) of Muslims, Jews, and Christians in medieval Spain. Its horizon stretches from the Muslim conquest of Iberia (al-Andalus) up to the turn of the 16th century when Spanish Jews and Muslims were equally faced with the choice between exile and conversion to Christianity. Until about 1100, Muslims dominated most of the Iberian Peninsula; from then onward, Christians ruled much and eventually all of what would become modern Spain and Portugal. Through a process known as reconquista (reconquest), Catholic kingdoms acquired large Muslim enclaves. As borders moved, Jewish communities found themselves under varying Muslim or Christian dominion. Interactions between the three religious communities occurred throughout, some characterized by shared creativity and mutual respect, others by rivalry and strife. The course focuses on these cultural encounters, placing them in various historical contexts. It will explore the ambiguities of religious conversion, and the interplay of persecution and toleration. Last not least, the course will address the question of how the memory of medieval Spain's diversity reverberates-and is utilized-in modern popular and academic discourse. All sources will be read in English translation; however, students are encouraged to make use of their linguistic and cultural expertise acquired in previous classes. This course serves as the capstone seminar for Jewish, Islamic & Near Eastern Studies majors, Arabic majors, and Hebrew majors. Graduate students, minors, and other interested undergrads are likewise welcome.

**L74 HBRW 444 The Mystical Tradition in Judaism**

What is Jewish "mysticism"? What is its relationship to the category of "religion"? Is Jewish mysticism just one form of a general phenomenon common to a variety of religious traditions or is it a specific interpretation of biblical, rabbinic, and other Jewish traditions? Taking the above questions as a starting point, this course aims at a systematic and historically contextualized analysis of a broad range of Jewish texts that are commonly classified as "mystical". (All primary texts are read in translation.) At the same time, we explore such overarching themes as: the interplay of esoteric exegesis of the Bible and visionary experiences; the place of traditional Jewish law (halakhah) within mystical thought and practice; the role of gender, sexuality, and the body in Jewish mystical speculation and prayer; the relationship between mysticism and messianism; Ashkenazic and Sephardic traditions and their mutual impact on Jewish mysticism; the "absence of women" from Jewish mystical movements; esoteric traditions of an elite vs. mysticism as a communal endeavor; and the tension between innovation and (the claim to) tradition in the history of Jewish mysticism.

**L73 Hindi 111D Beginning Hindi I**

An introduction to the most widely spoken language of South Asia. The aim of this course is to achieve proficiency in spoken comprehension, and to enable the student to acquire the major language skills--listening, speaking, reading, and writing. A standard text, web-based materials, a reader prepared by the instructor, as well as audio materials are used, with equal emphasis on both spoken and written Hindi. The language presented in the course is colloquial. The Hindi (Devanagari) script will be taught as part of the same class. Please note: There are no prerequisites (no previous knowledge of Hindi is required). Students with some previous Hindi language background must take a placement examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L73 Hindi 112D Beginning Hindi II**

Continuation of Beginning Hindi I, devoted to the further development of basic skills--listening, speaking, reading, and writing--with a particular emphasis on the acquisition of speaking proficiency. PREREQ: Grade of B- or better in L73 111D Beginning Hindi I or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L73 Hindi 121 Hindi for Heritage Students I**

Designed for the student with some background in Hindi. Emphasis on review of grammar, increased fluency, and vocabulary enrichment. Student may not take this class pass/fail or audit.

Credit 3 units. BU: HUM

---

**L73 Hindi 130 Beginning Urdu**

This course covers all five skills (reading, writing, listening, speaking, cultural competency) for beginning students. Starting with the Nastaliq script and simple greetings, we will then cover the basics of Urdu grammar while building vocabulary. The class will be conducted in Urdu. Homework is due by the beginning of class the day it is assigned. All work must be completed to pass the course. Student may not take this class pass/fail or audit.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L73 Hindi 131 Beginning Urdu II**

Beginning Urdu II is the continuation of the 130 Beginning Urdu course, devoted to the further development of basic skills - listening, speaking, reading and writing - with a particular emphasis on the acquisition of speaking proficiency. Training in spoken Urdu emphasizes speaking and listening at normal speed with near native pronunciation and intonation. The course meets 3 hours per week. Those who have not taken the sequence of Urdu courses offered by the department may be able to join this course, if they have obtained prior knowledge of the language by some other means (see instructor for placement). The course is tailored to address students' interests not only in the language, but also in the culture it is rooted in. Along with texts for

speaking and grammar, new and additional materials will be constantly introduced, especially as the students develop increased facility and proficiency in the language. The class sequence relies heavily on student interaction, partner activities and group work. Prerequisite: Urdu-I (130) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L73 Hindi 150 First-Year Urdu I**

This course covers all five skills -- reading, writing, listening, speaking, cultural competency -- for beginning students. Starting with the Nastaliq script and simple greetings, we will then cover the basics of Urdu grammar while building vocabulary. The course will be conducted in Urdu.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L73 Hindi 151 First-Year Urdu II**

This course is a continuation of the first semester of First-Year Urdu I. It is devoted to the further development of basic skills - listening, speaking, reading and writing - with a particular emphasis on the acquisition of speaking proficiency. Training in spoken Urdu emphasizes speaking and listening at normal speed with near native pronunciation and intonation. Prerequisite: Grade of B- or better in L73 150 First-Year Urdu I or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM

#### **L73 Hindi 301 Third Level Hindi I**

This course is designed to help students gain advanced proficiency in the oral and written use of Hindi through reading and discussion of short stories, newspaper articles, and other selected materials. Students will engage in discussions and debates based on these readings as well as current topics, to improve spoken and conversational language skills. Group and project-based learning is encouraged to enhance students' critical thinking in Hindi. PREREQ: Grade of B- or better in L72 202 Intermediate Hindi II or placement by examination. Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L73 Hindi 302 Third Level Hindi II**

A continuation of Third Level Hindi I, this course is designed to further enhance students' advanced proficiency in the oral and written use of Hindi language. Students are exposed to a variety of readings such as short stories and plays by renowned authors, magazine and newspaper articles, other selected readings and visuals. Students will engage in discussions and debates based on these readings to improve spoken and conversational language skills. Group and project based learning is encouraged to enhance students' critical thinking in Hindi. PREREQ: Grade of B- or better in L73 301 Third Level Hindi I or placement by examination. Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L73 Hindi 305 Third-Level Urdu I**

This course is a continuation of Second Year Urdu II. It has been designed to help students gain advanced proficiency in the oral and written use of Urdu through the reading and discussion of stories from Urdu books, newspaper articles, topics in advanced grammar, and other selected materials. Prerequisite: Grade of B- or better in L73 251 or L73 232A, or placement by examination. Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L73 Hindi 306 Third-Level Urdu II**

This course is a continuation of Third-Level Urdu I. It is designed to help students gain advanced proficiency in the oral and written use of Urdu through the reading and discussion of stories from Urdu books and newspaper articles, Topics in advanced grammar and Urdu poetry will also be included. Students will be expected to converse clearly across a wide variety of communicative tasks using diverse language strategies. Prerequisite: Grade of B- or better in L73 305 or placement by examination. Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L73 Hindi 307 The Writing of the Indian Subcontinent**

The Indian Sub-continent has in recent years yielded a number of writers, expatriate or otherwise, whose works articulate the postcolonial experience in the "foreign" English tongue. This course is designed to be an introductory survey of such writing, drawing on select Sub-continental writers. Covering both fiction and non-fiction by several authors including R. K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatjie and Romesh Gunesequera, we will discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity and the constraints of gender roles. Same as L14 E Lit 307. Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM

---

### L73 Hindi 3074 Hinduism & the Hindu Right

We are witnessing a global rise in rightwing politics, and India is no exception. In May 2019, Narendra Modi and his "Hindu Nationalist" party were elected to power for a second term. Observers in the United States and Europe may be stunned by what seems to be a new development, but observers in India have been following the rise of the Hindu Right since the early 1990s. In its wake, the Hindu Right has brought violence against minorities; curbs on free speech; and moves toward second-class citizenship for Indian Muslims. This course will track the history of the Hindu Right in India from its 19th-century roots to the present. The struggle to come to grips with the Hindu Right is of immediate political relevance. It also raises big questions about the history of religion and the politics of secularism.

Same as L22 History 3074

---

### L73 Hindi 311 Sacred Architecture of the Indian Subcontinent

The built structure remains a principal visible record of the evolution of a civilization and its culture. Through this interdisciplinary course on culture, art, design, religion and society, students will be introduced to and gain a deeper insight into the rich diversity of South Asia through the study of the architecture of its significant sacred places. We will take a journey through the Hindu, Jain and Buddhist Temples; the Islamic Mosque; the Sikh Gurudwara; the Zoroastrian Fire Temple; the Jewish Synagogue; and the Christian Church, tracing the evolution of these places of worship from the Indus Valley Civilization to Pre-Colonial times. Through visuals, readings, and discussions, students will learn about the different architectural styles and motifs used in sacred buildings and how they came about. We will explore the inter-relationships between the design elements through the lens of political, social, religious, regional, artistic, and technological influences and understand the ways in which evolving design principles reflect these influences overtime. This course will be of interest to students of languages and cultures, architecture, archeology, art history, history, preservation, religion, and South Asian culture, among others. Please note: At the end of the semester, students will go on a field trip to experience the diverse sacred architecture in the St. Louis region. No prior knowledge of architecture or the history of this region is required.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

---

### L73 Hindi 3171 Religion and Culture in South and Southeast Asia

Although it is now common to differentiate between South and Southeast Asia, historically these regions have often been conceptualized as part of a single geographical area. Known as the "(East) Indies", this area is marked by a rich history of (earlier) Hindu and Buddhist influences, as well as (later) Islamic and Christian influences. The present course will take an in-depth look at the four aforementioned religious traditions, and examine how they have shaped local forms of culture in premodern and modern times. Students will be introduced to host of phenomena in South and Southeast Asian societies, including religious worship, education, law, traditional governance, colonial governance, art, architecture, economic production, kinship, gender, and sexuality. Countries to be studied in the course include India, Pakistan, Sri Lanka, Thailand, Myanmar, Indonesia, Malaysia, the Philippines, and Papua New Guinea.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD BU: ETH, IS

---

### L73 Hindi 3292 Topics in Politics: Modern South Asian Politics

This course will focus on the recent political history and development of South Asia. It will begin with a review of the British colonial period and the Independence movement. The remainder of the course will examine different political issues in India, Pakistan, Bangladesh, and Sri Lanka. Topics will include political mobilization, land reform, law and politics, social movements, religious and caste politics, the rise of religious nationalism, and political control of the economy. ### L73 Hindi 353 Understanding Indian (Hindi/Urdu) Literature: Through Text and Images (Visual)

This course focuses on the films and cultural traditions of South Asia in general and of India in particular. Students will be introduced to a variety of contemporary literary genres through visuals. Readings and class discussions will be followed by film screenings from the popular Hindi cinema (known as the Bollywood industry in India) to demonstrate how images and visuals influence modern-day cultural traditions. Students will also get a chance to work on films based on literary texts by well-known writers of the subcontinent. These readings and films focus on various social, cultural, political and historical aspects of Indian society. Students will be encouraged to explore these issues in their written assignments as well as in their class discussions.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

---

### L73 Hindi 3670 Gurus, Saints, and Scientists: Religion in Modern South Asia

Many long-standing South Asian traditions have been subject to radical reinterpretation, and many new religious movements have arisen, as South Asians have grappled with how to accommodate their traditions of learning and practice to what they have perceived to be the conditions of modern life. In this course we consider some of the factors that have contributed to religious change in South Asia, including British colonialism, sedentarization and globalization, and new discourses of democracy and equality. We consider how new religious organizations were part and parcel with movements for social equality and political recognition; examine the intellectual contributions of major thinkers like Swami Vivekananda, Sayyid Ahmad Khan, and Mohandas Gandhi; and explore how Hindu, Islamic, and other South Asian traditions were recast in the molds of natural science, social science, and world religion.

### L73 Hindi 36CA Heroes and Saints in India: Religion, Myth, History

This course provides an introduction to the history of modern India and Pakistan through the voices of the Indian subcontinent's major thinkers. We will spend time in the company of saints, from the "great-souled" Mahatma Gandhi to the Sufi scholar Ashraf 'Ali Thanawi, and we will travel alongside the heroes of peasant politics, women's rights, and struggles for national and social freedom and equality. We will immerse ourselves in the rich narrative heritage of India -- as it has been challenged, reworked, and harnessed for present and future needs -- from the 19th century through the present. Lecture and discussion format; prior knowledge of India or Pakistan not required.

**L73 Hindi 38C8 Religion and Politics in South Asia: Writing-Intensive Seminar**

The relationship between religion, community, and nation is a topic of central concern and contestation in the study of South Asian history. This course will explore alternative positions and debates on such topics as: changing religious identities; understandings of the proper relationship between religion, community, and nation in India and Pakistan; and the violence of Partition (the division of India and Pakistan in 1947). The course will treat India, Pakistan and other South Asian regions in the colonial and post-colonial periods.

**L73 Hindi 3921 Secular & Religious: A Global History**

Recent years have seen a dramatic rethinking of the past in nearly every corner of the world as scholars revisit fundamental questions about the importance of religion for individuals, societies and politics. Is religion as a personal orientation in decline? Is Europe becoming more secular? Is secularism a European invention? Many scholars now argue that "religion" is a European term that doesn't apply in Asian societies. This course brings together cutting-edge historical scholarship on Europe and Asia in pursuit of a truly global understanding. Countries covered will vary, but may include Britain, France, Turkey, China, Japan, India and Pakistan.

**L73 Hindi 39SC Imperialism and Sexuality: India, South Asia and the World: Writing-Intensive Seminar**

What is the connection between the appropriation of other people's resources and the obsession with sex? Why is 'race' essential to the sexual imperatives of imperialism? How has the nexus between 'race,' sexuality, and imperial entitlement reproduced itself despite the end of formal colonialism? By studying a variety of colonial documents, memoirs produced by colonized subjects, novels, films and scholarship on imperialism, we will seek to understand the history of imperialism's sexual desires, and its continuation in our world today.

**L75 JIMES 1020 First-Year Seminar: The New Arab Gulf: Migrants, Weirdos, and Rebels**

The Arab Gulf (also known as the Arabian Peninsula, or the Persian Gulf) is a central yet understudied region of the modern Middle East. The six oil-rich countries (Saudi Arabia, United Arab Emirates, Qatar, Kuwait, Bahrain, and Oman) have been allies of the United States for decades,

hosting some of the U.S. largest military bases, and spending billions on US arms sales every year. The Gulf region has also been a main destination for blue-collar workers from the Arab world, South and East Asia, and more recently from Africa. Historically, the region was a central point on the trade routes between the Indian subcontinent, West Asia, Africa, and into Europe. These routes involved spice and tea trades, pearl and gold trade, and what is known as the Indian Ocean slave trade. In addition to its colonial history and economic power, the Gulf region has become a place of cultural production, capital, and infrastructure, representing a shift away from the traditional centres of Arab culture like Egypt, Lebanon, and Iraq. It hosts remote campuses of western universities such as New York University Abu Dhabi, Georgetown Doha, or global branches of western arts institutions like the Louvre and Guggenheim. Moreover, most of the major literary and arts awards, funds, grants, and galleries in the Arabic-speaking world are now located in the Gulf region, established and funded as government initiatives. Parallel to this growing infrastructure, the Gulf region is also a hub of ideas and movements where diverse groups come to critique and contest conceptions of identity, class, gender, and race, against official histories. This course will explore the following set of special topics to help us learn about the region, its politics, cultures, and societies: Petro-capitalism, Race and Ethnicity, Migration, Ecology, Gender and Sexuality, and Pop Culture. We will be studying the region through an interdisciplinary lens that involves fiction, non-fiction, literary criticism, scholarship, and visual arts. Course is for first-year, non-transfer students only.

**L75 JIMES 1022 First Year Seminar: A Century of Egyptian Cinema**

This First-Year-Seminar offers a survey of Egyptian Cinema, from silent film to contemporary productions. In addition to regular film screenings, we will be reading articles in film criticism, as well as in history and fiction. This course is designed to enable students to develop their academic and conceptual tools to critically approach national cinemas. Students should utilize and further advance their knowledge of major historical and theoretical themes in cinema studies, cultural studies, and literary studies and apply them to analyze Egyptian Cinema as a case study. Additionally, this course will function as a window to reflect on political, and critical themes, such as: colonialism and postcolonialism, modernism and postmodernism, class, gender, identity, nationalism, representation among other questions.  
Credit 3 units. A&S: FYS A&S IQ: HUM, LCD, SC EN: H

---

**L75 JIMES 102A An Ancient Murder Mystery: the Death of Jesus from the Gospels to Mel Gibson**

When Mel Gibson's movie "The Passion of the Christ" was released in 2004, it provoked a tremendous amount of public debate and divided Christians (Catholics and Protestants of all sorts) and Jews (Orthodox, Conservative, Liberal and Reform) in every possible combination. Although the virulence of the discussions may have given us the impression that this was a new issue, in reality the question of the Jews' role and involvement in Jesus' death has been disputed for almost two thousand years. The claim that the Jews are responsible for Christ's death is the subject of this class and we will study its history from the gospels to today using textual sources (historical, religious and literary works) and the visual arts (paintings and movies). But this class is not about who did or did not kill Jesus, nor is it about judging people's positions on the issue. Rather it is about the power of a story to travel through time and space, to be told and retold in different versions and with different purposes, and to affect the real lives of men and women. First-Year Seminar; Course is for first-year, non-transfer students only.

**L75 JIMES 111D Beginning Hindi I**

An introduction to the most widely spoken language of South Asia. The aim of this course is to achieve proficiency in spoken comprehension, and to enable the student to acquire the major language skills--listening, speaking, reading, and writing. A standard text, web-based materials, a reader prepared by the instructor, as well as audio materials are used, with equal emphasis on both spoken and written Hindi. The language presented in the course is colloquial. The Hindi (Devanagari) script will be taught as part of the same class. Please note: There are no prerequisites (no previous knowledge of Hindi is required). Students with some previous Hindi language background must take a placement examination.

Same as L73 Hindi 111D

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L75 JIMES 112D Beginning Hindi II**

Continuation of Beginning Hindi I, devoted to the further development of basic skills--listening, speaking, reading, and writing--with a particular emphasis on the acquisition of speaking proficiency. PREREQ: Grade of B- or better in L73 111D Beginning Hindi I or placement by examination.

Same as L73 Hindi 112D

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L75 JIMES 121 Hindi for Heritage Students I**

Designed for the student with some background in Hindi. Emphasis on review of grammar, increased fluency, and vocabulary enrichment. Student may not take this class pass/fail or audit.

Same as L73 Hindi 121

Credit 3 units. BU: HUM

---

**L75 JIMES 151 First-Year Urdu II**

This course is a continuation of the first semester of First-Year Urdu I. It is devoted to the further development of basic skills - listening, speaking, reading and writing - with a particular emphasis on the acquisition of speaking proficiency. Training in spoken Urdu emphasizes speaking and listening at normal speed with near native pronunciation and intonation. Prerequisite: Grade of B- or better in L73 150 First-Year Urdu I or placement by examination.

Same as L73 Hindi 151

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L75 JIMES 1771 First Year Seminar: The Exodus in the Jewish Experience**

This course will investigate how the Exodus has been, and continues to be, a crucial source of identity for both Jews and Judaism. We will explore how the Exodus has functioned as the primary model from which Jews have created historical self-understanding and theological meaning. We will investigate how and why this story continues to be vital to Jews throughout the unfolding of the Jewish experience. How does the Exodus remain pertinent? How has the Exodus been re-imagined multiple times throughout the history of Judaism? Why has the Passover celebration been transformed radically in different Jewish communities? We will analyze many types of expression: historical sources, liturgy, art, commentaries, theology, literature, film, mysticism, and music.

Credit 3 units. A&S IQ: HUM BU: IS EN: H

---

**L75 JIMES 179 First Year Seminar: Midrash: The Imaginative Interpretation of Biblical Texts**

FRESHMAN SEMINAR. The aim of this course is to introduce students to Midrash, the highly fascinating literature of Rabbinic Biblical interpretation. Among the topics to be studied are: How did the classical Rabbis read the Bible? What is the relationship between the plain meaning of the Biblical text and the polyphonic interpretations of Midrash? How can numerous, at times even contradictory interpretations of the same verse coexist? What is the function of imaginative narratives, parables, and folklore in Midrash? Initially the Midrashic logic may seem elusive from the viewpoint of a modern Western reader, in turn its creative thinking will prove to be smart, playful, at times even slippery, and yet substantial. Addressing the literary, historical, and cultural context in which Rabbinic Midrash developed, we will get to know a variety of Midrashic collections and styles covering a time span from late antiquity to the Middle Ages. All primary sources will be read in translation. Throughout the semester we will devote time to discussing practical questions such as how to use the Library's catalogue and (electronic) reference sources, as well as techniques for structuring and writing students' essays.

Credit 3 units. A&S: FYS A&S IQ: HUM BU: ETH EN: H

---

**L75 JIMES 180 First-Year Seminar: Jewcy: Jewish Culture in the 21st Century**

This course will examine cultural expressions of American Jewish identity within an ethnographic context. We will analyze processes of assimilation, Americanization, and innovation, as well as Jewish contributions to popular American culture and entertainment, from Irving Berlin to Madonna, and the 'The Joys of Yiddish' to 'jewlicious.com.' Moving from tradition to modernity, pluralism and transdenominationalism and back to tradition (sometimes with a vengeance) we explore challenges to Jewish identity and creative responses through the cultural lens. Course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

---

**L75 JIMES 188 Beginning Coptic I**

This course provides an introduction to the Coptic language in the Sahidic (southern) dialect. Coptic was the vernacular language spoken and written in Egypt during the Roman, Byzantine, and Arab periods (until about 1300 CE) and as such is important for studying the history of premodern Egypt. It preserves some of the oldest known translations of the Bible, many apocryphal and "heretical" books that illustrate the wide diversity of ancient Christianity (e.g., the Gospels of Thomas and Mary), as well as sermons, saints' lives, monastic instructions, and liturgical manuals that still constitute the literary culture of the Coptic Orthodox Church today. In addition, a plethora of "magical" papyri illustrate medical and religious practices; personal letters reveal the lives of everyday people; and troves of business documents (e.g., contracts, wills, governmental petitions, receipts) have proved important for understanding Roman and Byzantine economies. Because Roman Egypt was a highly bilingual society, there are even instances of Classical Greek literature translated into Coptic (e.g., selections of Homer and Plato), and these offer a unique witness to how such texts were received by Egyptians. The goal of this course is to cover 15 of the 20 lessons in the grammar book. The remainder will be covered in the second level of this course.

Same as L08 Classics 188

Credit 4 units. A&S IQ: HUM, LCD BU: HUM EN: H

---

**L75 JIMES 189 Beginning Coptic II**

After completing the remaining grammar lessons from Beginning Coptic I, we will build skill and confidence as translators by reading selections from a variety of Coptic texts: the Sahidic Gospel of Mark, the hagiographic "Life of John the Monk," selections from the Gospels of Mary and Thomas, and a unique Coptic translation of Plato's "Republic." In our readings from the Bible and Plato, those who read Classical Greek will also have the opportunity to study how ancient translators chose to render the Greek texts into Egyptian, and how, in the process of translation, they changed the meaning of the originals. Prerequisite: Classics 188 or permission of instructor.

Same as L08 Classics 189

Credit 4 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

**L75 JIMES 200 Internship**

For students with at least one course in Jewish and Near Eastern Studies who wish to do an internship. Prerequisite: permission of the director of the program. A "learning agreement" must be submitted and approved prior to beginning internship work.

Credit variable, maximum 3 units.

---

**L75 JIMES 200A Doctors and Terrorists: The Fictions of South Asian America**

South Asians have always played an integral role in the culture, history and politics of the United States. However, for complex reasons, their presence has either been concealed, or dismissed through dangerous stereotypes, or just as inaccurately, excessively celebrated for proving

the generosity of American liberalism and multiculturalism. Racially misrecognized, this large and heterogeneous group has nonetheless shaped American categories of race, sexuality, and citizenship in intriguing and powerful ways. South Asian Americans have reached to fiction, music and popular culture to craft deeply intimate and original assessments of mainstream desires. In doing so they have sought to resist the dictates of whiteness, to question US imperialism, to garner acceptance and mobility, to build solidarity with other US minorities. In this course we learn about the complex history and cultural productions of South Asians in America. How did "South Asia" become a category of identification, and who benefitted from that designation? What role have South Asians played in the economic, cultural and global ascendancy of the United States? How do South Asians connect with, and control, their countries of origin? Why do discourses of sex and intimacy rise to the surface in this history, and what is the significance of story-telling in building the archive and questioning the fiction of South Asian America? Course enrollment is limited to first-year and sophomore students.

**L75 JIMES 208F Introduction to Jewish Civilization: History and Identity**

The anthropologist Clifford Geertz once famously invoked Max Weber in writing that "man is an animal suspended in webs of significance he himself has spun. I take culture to be those webs." The main goal of this course—designed as an introduction to Jewish history, culture, and society—will be to investigate the "webs of significance" produced by Jewish societies and individuals, in a select number of historical periods, both as responses to historical circumstances and as expressions of Jewish identity. Over the course of the semester we will focus on the following historical settings: 7th century BCE Judah and the Babylonian exile; pre-Islamic Palestine and Babylonia (the period of the Mishnah and the Talmud); Europe in the period of the Crusades; Islamic and Christian Spain; Europe in the 18th and 19th centuries; North America in the 20th century; and the modern State of Israel. For each period we will investigate the social and political conditions of Jewish life; identify the major texts that Jews possessed, studied, and produced; determine the non-Jewish influences on their attitudes and aspirations; and explore the efforts that Jews made to define what it meant to be part of a Jewish collective.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, IS EN: H

---

**L75 JIMES 2091 Scriptures and Cultural Traditions**

When we think of the word "scripture" in antiquity, we might think of the texts that have been compiled in the different holy books that we currently have today. Yet the function of "scriptures" within a community, and the status given to different texts treated as "scriptural," has changed in different times and places. In this course, we will consider texts that would eventually come to be part of the Hebrew Bible, New Testament, and the Qu'ran as well as several of the exegetes and reading communities that shaped their various interpretations. We will explore how non-canonical sources played a role in the formation of the various canons we have today, comparing the authoritative status given to these texts to that given to other works from antiquity, such as the epics of Homer. Special attention will be played to the role of the receiving community in the development of "scripture," and the variety of the contexts in which scripture can function in the construction of and opposition to religious authority. Same as L93 IPH 209

**L75 JIMES 2157 Freshman Seminar: The Meaning of Pakistan: History, Culture, Art**

Pakistan is the second largest Muslim nation and the sixth most populous country in the world. First imagined as an anti-majoritarian and anti-imperial idea, the nation came to be split between East and West Pakistan, with a hostile Indian nation dividing the country. The subsequent emergence of Bangladesh, from within, exposed the complexities of US imperial and Indian power, colonialism, identity, ethnicity, race, nationalism and repression. More recently, the War on Terror has once again exploited the ethnic and cultural conflicts produced by world histories of power and resistance. The events of the past two hundred years have undoubtedly and violently exacerbated the politicization of social and cultural identities. This course situates Pakistan in the context of pre-colonial social formations, British colonialism, internal colonialism, US imperialism, the Cold War, Soviet interests, Indian regional hegemony and then turns to the powerful and diverse struggles launched by its own citizens against these external forces. How did successive empires construct and politicize social identities, and how did people contest and adapt these? How did caste, gender, race and religion shape empire and anti-imperial histories? Our sources will be historical, ethnographic, and literary. We will cover topics such as colonial fantasies, decolonization, the political uses of social categories of tribe, caste, language and gender, the political economy of militarism, terrorism, 'development', activism, diasporic formations, poetry, music and art. The course will deepen our collective understanding of a critical series of developments in world history. Just as crucially, we will build a framework within which to address the stereotypes about Pakistan that dominate popular and media discourses today.

**L75 JIMES 2242 Ampersand: Migration Policies and Colonialism: Refugee Resettlement and Integration**

This Course will continue our investigation of the Dynamics of Migration in the MENA and African countries primarily and re-orient the discussions towards a/the much-overlooked cause of migration: Colonialism. To achieve genuine refugee/ Migrant oriented reform policies, the Global North needs to reconcile with its colonial past. Towards this end, we will highlight how the history of Migration is deeply entangled with colonialism. Our readings-based discussions will focus on analyzing how colonial logics continue to shape the dynamics of migration as well as fuel the growing Xenophobia and Anti-migration rhetoric in the Global North towards intercontinental human mobility. To understand the enduring legacies of colonialism on the contemporary politics of migration, our discussions will argue the premise that colonial histories should be central to migration studies today for there to be real reform in refugee, asylum, and migrant policies. We will explore a wide range of inspiring and challenging perspectives on migration and learn what postcolonial and decolonial scholarships can offer us studying international migration today. We will address these areas through our weekly readings of Migration Studies and Colonialism as a primary source; we will also survey a selection of articles as a secondary source. To supplement the readings, we will watch short documentaries addressing the topic as well as hear from activists, journalists, and specialists in the field. Course is for first-year, non-transfer students only.

---

**L75 JIMES 2243 Ampersand: Mediterranean Migration: Dynamics and Consequences on the EU and MENA**

First course in the Ampersand: Safe Asylum program. What are the causes, dynamics and consequences of international population movements? What are the key trends and patterns of migration in the major world region? How does migration trends form both destination and origin societies? What are the effects of migration and increasing ethnic diversity on national identity and politics? How has the Global North elected to manage the forced flow of people from the Global South? We will address these questions among others and survey the critical assessments of the policies whereby the host nations try to manage these flows and discourage mobility. The readings of the first weeks of the Spring semester - based on our main textbook the Age of Migration- will give us a profound understanding of the theories of migration, and empirical research from a variety of disciplines; namely Sociology, Political science, history, anthropology and geography. We will also have an opportunity to hear from some of the leading scholars and Journalists, lawyers specialized in international migration law...We will also watch short documentaries to get a closer sense of cases in the EU and MENA regions. Our End of the Semester project will be exploring success stories of migrants in St. Louis; this could be building on your project in the Fall semester; or we could agree on identifying success stories of refugees/ migrant communities in the state. E.g. the Iraqi, Senegalese, Bosnian communities. Besides the planned travel to Konstanz, Germany to get a closer look at the public-civic interaction in facilitating refugee incorporation, we will discuss our planned visits to Morocco as one of the main key crossing border states linking both sides of the Mediterranean.

**L75 JIMES 2300 Jews and Jewishness in Black American Thought**

The history of what has been called "Black-Jewish relations" in the United States has a rich and contested history. The stories told about this relationship feature solidarity, controversy, and betrayal. This course will look at this history by attending to the role of Jews and Jewishness in Black thought. How has Jewishness featured in the self-understanding of Black thinkers? Have Jews been regarded as allies or adversaries, role models or competitors? What role have Jewish texts or narrative paradigms played in Black religion and Black politics? What have Black writers made of the Jewish project of national liberation i.e. Zionism? The course will likely include readings from W.E.B. Du Bois, Marcus Garvey, James Baldwin, and Malcolm X among others.

Same as L57 RelPol 230

**L75 JIMES 232A Intermediate Urdu II**

This course is a continuation of Intermediate Urdu I. Those who have not taken the sequence of Urdu courses offered by this department may be able to join this course if they have obtained prior knowledge of the language by some other means (see the instructor for placement exam). This course is designed to further develop skills in speaking and reading comprehension. Emphasis is given especially to communicative skill development (i.e., the use of language in various sociocultural contexts) and to introducing a wide range of constructions to develop comprehension skills. Standard text, web-based materials, language lab, audio-video materials, and a course reader prepared by the instructor are used.

**L75 JIMES 2396 The "Orient": Europe and Islamic Art from 1851 to Today**

In the 19th century, the expansion of British and French colonial rule in North Africa, the Middle East, and India facilitated a variety of cultural exchanges, including the movement of Islamic carpets, textiles, manuscripts, ceramics, metalwork, and other artworks to European collections. These collections, both public and private, presented a new repertoire of forms, motifs, and techniques that dramatically transformed cultural production in the west. Taking the Great Exhibition of 1851 in London as its starting point, this course explores the relationships between Islamic art, European modernism, and the artistic currents that traverse the globe today by examining the ways in which Islamic art has been circulated, acquired, understood, appreciated, utilized, and imitated in the west. As a result, students will gain a better understanding of the particular relationship between modern cultural production, museology, and colonialism, and obtain a good overall grasp of the artistic phenomena associated with the interaction between Islam and the West from the Modern Era to the present day. **L75 JIMES 240 Representations of the Holocaust in Literature and Film**

As the Holocaust recedes into the historical past, our knowledge of the event becomes increasingly dominated by literary and cinematic representations of it. This course focuses on such depictions of the Holocaust in literature and film and raises a number of provocative

questions: What does it mean to represent the horror of the Holocaust? Can one effectively depict the event in realistic terms, or do unrealistic representations work better? What happens to the history of the Holocaust when it becomes the subject of a fictional text? Who is authorized to speak for the victims? Are representations of perpetrators appropriate? What types of representations will help us to remember the Holocaust in the twenty-first century? We will grapple with these challenging questions by examining both literary texts by American, European and Israeli authors from a range of genres, including survivor memoirs, fictional narratives, a graphic novel, drama and poetry, and a number of films that depict the Holocaust.

#### **L75 JIMES 2400 Jewish Political Thought**

The question of Jewish belonging in the Christian West has played a defining role in the formation of the modern state, and the afterlives of "the Jewish question" in Europe, America, and Israel continue to have significant influence on how political life is understood and evaluated. This course begins with classical Jewish sources on politics--including the nature of authority, national belonging, and territory--and then moves to a consideration of several crucial modern Jewish thinkers likely including Spinoza, Marx, and Arendt. The course will consistently consider topical contemporary questions about liberal democracy, totalitarianism, nationalism, Zionism, race, and secularism.

#### **L75 JIMES 2401 First-Year Seminar: Sex and the Bible**

What does the Bible say about sex and sexual desire? Gender and gender identity? Bodies and bodily pleasure? This class critically examines sex, gender, and sexuality as they are constructed in the Bible. We will consider biblical ideas of sexuality and desire, laws regulating sex and the body, homoeroticism and homosexuality, trans representation, the portrayal of women, and queer characters and moments in the Bible. We will also explore how key biblical texts about gender and sexuality (Adam and Eve, Sodom and Gomorrah, the Whore of Babylon, etc) have been interpreted over time. Our methods of interpretation will include feminist, womanist, postcolonial, queer, and trans reading strategies; biblical texts will come from both the Hebrew Bible and the New Testament. This class is for first-year, non-transfer students only.

#### **L75 JIMES 250 Zionism**

Zionism is often thought of as a commitment to the principle that the Jewish People, as a distinct "people," has a right to self-determination in its own historical land of the biblical Palestine. Yet the history of the term and the set of ideologies show a much more complex understanding. In this course we trace the emergence of a number of different "Zionisms" that would lead to the creation of the modern state of Israel. And we explore how the political principles at the core of these ideologies have fared in the 65 years since the founding of the modern Jewish state. The course is at its heart applied political theory: a case study of the way that ideas emerge from historical events, take on a life of their own, and then shape real outcomes in the world. The readings will weave together history, philosophy, literature and government.

#### **L75 JIMES 263 Democracies & Dictatorships in the Middle East**

What makes a country a democracy? A dictatorship? How do we know? In this course, we take a comparative approach toward the regimes of the Middle East and North Africa in order to critically examine the history, politics, religions, demographics, and economies of different case studies. Students will learn to identify key characteristics of contemporary governments of prominent Middle Eastern countries, the extent to which they can be called democratic, and the different degrees and nuances of authoritarianism. With the 2011 Arab Spring and its aftermath in mind, students will also explore academic debates over why regimes do, or do not, respond to popular pressure for change as they continually adapt and upgrade their capacities to remain in power.

#### **L75 JIMES 285 Islam in America**

This course explores various Muslim discourses and practices in America with a special focus on the intersections of race, gender, and religion. In this course, students will first study the history of Islam and Muslims in America in light of the narratives of enslaved West African Muslims and some of the early narratives of immigrant Muslims. Students will then explore some later historical narratives that represent the impact of religious and racial structures on identity formations, such as the formation of the Nation of Islam, and transnational religious connections in Cold War America. Students will also examine the construction of Muslim identities and institutions in light of some of the US structures and discourses about Islam and Muslims, with regard to the racialization of Muslims, and in connection to the broader Americas. Students will also use popular culture as a site to observe the intersection of race, religion, and gender in Muslim practices.

#### **L75 JIMES 288 Muslims in the Media and Popular Culture**

In the post 9/11 context of the United States, Muslims have been a constant presence in news media, typically cast in a negative light as political others who are backwards, threatening, and inherently prone to violence. This pattern has long been replicated in films in which Muslims serve as static and dehumanized perpetrators of violence and/or as symbols of a backwards and depraved culture, antithetical to U.S. values and interests. In recent years, however, Muslims have become increasingly visible in the entertainment industry

as protagonists and producers of their own media, including G. Willow Wilson's "Ms. Marvel," Hulu's "Ramy," and Netflix's "Man Like Mobeen." This course explores a selection of recent media projects created by Muslim writers, actors, musicians, and comedians. We will be pairing films, television shows, music, and comics with scholarship on Islam and religion in the media to analyze Muslim representation and storytelling in contemporary popular culture. We will evaluate these works on their own terms, noting the ways in which gender and racial hierarchies dictate who gets to represent American Muslims while also assessing how these new media both disrupt and further reify Muslims' construction as religious and political outsiders.

### L75 JIMES 290 Islamophobia & U.S. Politics

The presence of Muslim minorities in the West is increasingly divisive as political leaders appeal to voters' fear of the 'Other' to promote Islamophobic agendas that reshape immigration and asylum policies and redefine Western identity as Christian. Politicians further exploit the rise of extremist groups like ISIS to justify anti-Muslim rhetoric and critique multiculturalism, claiming that Islam and the West are inherently antithetical. In this course we examine the phenomenon of Islamophobia as a form of anti-Muslim racism that parallels hostility towards other religious and racial minorities in the US. We explore how while the post-9/11 context gave way to an increase in incidents of anti-Muslim violence, contemporary manifestations of Islamophobia are deeply rooted in state level anti-black racism from the early twentieth century, as well as in anti-Muslim attitudes that date back to the colonial period. By examining academic literature, political speeches, and news media sources, we situate Islamophobia within its historical context and also analyze how US anxieties about Islam and Muslims are not only gendered and racialized, but also exist across the political spectrum.

### L75 JIMES 2910 Racism and Antiracism

When President Obama was elected, it ignited a debate about whether America had finally become "post-racial." This assertion was belied by an entrenched underclass of Blacks and others from immigrant backgrounds; by the regular killing of innocent, young Black men alongside their mass incarceration, along with a whole series of other social indicators; by the dramatic rise in anti-Semitic incidents and Islamophobia globally; and most evidently by the discourse used during the Trump era that weaponized white Christian nationalism. At the end of four years of the Trump presidency defined by racist discourse and policies, it culminated in an insurgent riot on the Capitol designed to block the peaceful transfer of power, the basis of American democracy. This course provides the long view to understanding this recent period in American and global history. We begin by defining key terms in the discussion around racism today, including what we mean by racism and what unites anti-Semitism, anti-Black racism and Islamophobia, but also notions like privilege, cultural appropriation, and microaggressions. We then move on to the long history of the category of race. We start with a unit on race and religion and then move on to the role of the discovery of the "New World" and the development of the Atlantic slave system, and its impact on the Enlightenment, which was the incubator for the concept of race. From there, we consider how fundamental race was to European and American colonial dominance by the end of the nineteenth-century and the role it played in racial states like Nazi Germany and South Africa. The last portion of the class will focus on struggles to dismantle racism over the the last century, considering the anti-colonial and Civil Rights

movement, and the anti-apartheid struggle. Along the way, we will have addressed the overlaps and disconnects between anti-Black, anti-Jewish, and anti-Islamic racism and read a number of key thinkers and activists who can help us in the fight against racism.

### L75 JIMES 300 Introduction to the Hebrew Bible/Old Testament

The Hebrew Bible is the foundational text of Judaism and Christianity. It is a complex compilation of materials, reflecting great diversity in ideology, literary expression, social and political circumstances, and theology. In this course, we shall read a significant amount of the Bible in English translation. We shall study the various approaches that have been taken by scholars in trying to understand the Bible in its historical context. We shall also study how the Bible was traditionally interpreted by Jews and Christians during the last two thousand years.

### L75 JIMES 301C Kings, Priests, Prophets, and Rabbis: The Jews in the Ancient World

We will trace Israelite and Jewish history from its beginnings in the biblical period (circa 1200 BCE) through the rise of rabbinic Judaism and Christianity until the birth of Islam (circa 620 CE). We will explore how Israel emerged as a distinct people and why the rise of the imperial powers transformed the political, social, and religious institutions of ancient Israel. We will illuminate why the religion of the Bible developed into rabbinic Judaism and Christianity and how rabbinic literature and institutions were created.

**L75 JIMES 3034 Jews in French History and Culture**

This course will explore the rich history of the representations of Jews within French culture and contributions to French history. The class will consider how French Jews served as incubators of cultural modernity. France was the first country in Europe to emancipate Jews from their ghettos, offering them civil rights and civic equality. But at the same time, France was a crucible for the development of modern anti-Semitism. Jews appear as characters in novels, hosts of intellectual salons, as actors on the French stage, as icons of financial capitalism, as examples of the limits and possibilities of immigration, integration, and even assimilation, as authors and intellectuals, as quintessentially French and Other to France. We will navigate these tensions through literature, art, film, theater, and in their diverse historical contexts.

**L75 JIMES 3070 The Writing of the Indian Subcontinent**

The Indian Sub-continent has in recent years yielded a number of writers, expatriate or otherwise, whose works articulate the postcolonial experience in the "foreign" English tongue. This course is designed to be an introductory survey of such writing, drawing on select Sub-continental writers. Covering both fiction and non-fiction by several authors including R. K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatje and Romesh Guneseckera, we will discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity and the constraints of gender roles.

**L75 JIMES 3074 Hinduism & the Hindu Right**

We are witnessing a global rise in rightwing politics, and India is no exception. In May 2019, Narendra Modi and his "Hindu Nationalist" party were elected to power for a second term. Observers in the United States and Europe may be stunned by what seems to be a new development, but observers in India have been following the rise of the Hindu Right since the early 1990s. In its wake, the Hindu Right has brought violence against minorities; curbs on free speech; and moves toward second-class citizenship for Indian Muslims. This course will track the history of the Hindu Right in India from its 19th-century roots to the present. The struggle to come to grips with the Hindu Right is of immediate political relevance. It also raises big questions about the history of religion and the politics of secularism.

**L75 JIMES 3082 From the Temple to the Talmud: The Emergence of Rabbinic Judaism**

This course offers a survey of the historical, literary, social, and conceptual development of Rabbinic Judaism from its emergence in late antiquity to the early Middle Ages. The goal of the course is to study Rabbinic Judaism as a dynamic phenomenon -- as a constantly developing religious system. Among the topics to be explored are: How did Judaism evolve from a sacrificial cult to a text-based religion? How did the "Rabbis" emerge as a movement after the destruction of the Second Temple and how could they replace the old priestly elite? How did Rabbinic Judaism develop in its two centers of origin, Palestine (the Land of Israel) and Babylonia (Iraq), to become the dominant form of Judaism under the rule of Islam? How did Jewish ritual and liturgy develop under Rabbinic influence? How were the Rabbis organized and was there diversity within the group? What was the Rabbis' view

of women, how did they perceive non-Rabbinic Jews and non-Jews? As Rabbinic Literature is used as the main source to answer these questions, the course provides an introduction to the Mishnah, the Palestinian and Babylonian Talmuds, and the Midrash-collections -- a literature that defines the character of Judaism down to our own times. All texts are read in translation.

### L75 JIMES 3110 Sacred Architecture of the Indian Subcontinent

The built structure remains a principal visible record of the evolution of a civilization and its culture. Through this interdisciplinary course on culture, art, design, religion and society, students will be introduced to and gain a deeper insight into the rich diversity of South Asia through the study of the architecture of its significant sacred places. We will take a journey through the Hindu, Jain and Buddhist Temples; the Islamic Mosque; the Sikh Gurudwara; the Zoroastrian Fire Temple; the Jewish Synagogue; and the Christian Church, tracing the evolution of these places of worship from the Indus Valley Civilization to Pre-Colonial times. Through visuals, readings, and discussions, students will learn about the different architectural styles and motifs used in sacred buildings and how they came about. We will explore the inter-relationships between the design elements through the lens of political, social, religious, regional, artistic, and technological influences and understand the ways in which evolving design principles reflect these influences overtime. This course will be of interest to students of languages and cultures, architecture, archeology, art history, history, preservation, religion, and South Asian culture, among others. Please note: At the end of the semester, students will go on a field trip to experience the diverse sacred architecture in the St. Louis region. No prior knowledge of architecture or the history of this region is required.

### L75 JIMES 312 Introduction to the History and Cultures of Turkey

Since ancient times, the Anatolian Peninsula, the land surrounded by the Black Sea, the Aegean and the Mediterranean Seas, has been a home and a passageway to a multitude of diverse peoples. This course is intended to offer an overview of Turkey, its history, peoples, cultures, socio-economic, and political structures and institutions within the context of modern and contemporary global trends since

the 19th century through the prism of long duree developments and processes. As an introductory and preparatory course, it aims primarily at familiarizing students with scholarly themes, questions, and problems which will aid those who wish to further delve into studying the deep and complex fabric of the Turkish society, culture, and history. Credit 3 units. A&S IQ: HUM BU: IS EN: H

---

### L75 JIMES 3120 South Asian Religious Traditions

In this course we will learn the basic vocabulary (conceptual, ritual, visual) needed to become conversant with the various religious traditions that are important to personal, social, and political life on the Indian subcontinent and beyond. We will first encounter each tradition through narrative, with the support of visual media. We will then explore how contemporary adherents make these traditions meaningful for themselves -- in their everyday lives, in their struggles for social change, and in their political statements and contestations. Students will also become familiar with the analytical categories and methodologies that make up the basic toolkit of the religion scholar. Prior knowledge of India or Pakistan is not required. First year students are welcome to enroll in this course.

### L75 JIMES 3122 From Country to Heavy Metal: Ancient Civilizations of the Old World

This course will explore the archaeology of Europe, the Near East, and Central Asia from approximately 10,000 years ago to classical times (ending before Ancient Greece). This prehistoric epoch saw major developments among various civilizations of the Old World, such as the introduction of agriculture, animal domestication, the growth of cities, and technological developments such as pottery, metallurgy, and horse-riding. A major focus will be the trajectory of cultural innovations of regional populations through time, and the complexity of their social, political, and ritual practices. We will also investigate the variation in human adaptive strategies to various environmental and social contexts, from hunter/gatherers to early Neolithic farmers, to the interactions between nomadic populations and larger scale, urban societies in the Bronze and Iron Ages.

### L75 JIMES 3149 The Late Ottoman Middle East

This course surveys the Middle East in the late Ottoman period (essentially the 18th and 19th centuries, up to the First World War). It examines the central Ottoman state and the Ottoman provinces as they were incorporated into the world economy, and how they responded to their peripheralization in that process. Students will focus on how everyday people's lived experiences were affected by the increased monetarization of social and economic relations; changes in patterns of land tenure and agriculture; the rise of colonialism; state efforts at modernization and reform; shifts in gender relations; and debates over the relationship of religion to community and political identity.

### L75 JIMES 314C Islamic History: 1200-1800

An introduction to Islamic politics and societies from the Mongol conquests to the thirteenth century to the collapse and weakening of the colossal "gunpowder" empires of the Ottomans, Safavids and Mughals in the early eighteenth century. Broadly speaking, this course covers the Middle Period (1000-1800) of Islamic history, sandwiched between the Early and High Caliphal Periods (600-100) on the one hand and the Modern Period (1800-Present) on the other hand. Familiarity with the Early and High Caliphal periods is not assumed. The course will not be a "survey" of this period but a series of "windows" that will allow you to develop both an in-depth understanding of some key features of Islamic societies and a clear appreciation of the challenges (as well as the rewards!) that await historians of the Middle Period. Particular attention is given to the Mamluk and Ottoman Middle East, Safavid Iran and Mughal India.

### L75 JIMES 3160 Beauty & Aesthetics In Islam: Islamicate Literature, Material Art, & Architecture

This course provides an introduction to beauty and aesthetics in Muslim societies from across the world. The course focuses on Islamicate literature (e.g., poetry, narrative, biography), material art (e.g., textiles, ceramics, decorated manuscripts), and architecture (e.g., palaces, built gardens, mosques, mausoleums). Some attention is also given to performing arts (e.g., dance, music, plays, puppetry). Various types of material will be considered, ranging from religious to non-religious. Material will be drawn from across the Muslim world, including the Middle East, Sub-Saharan Africa, Central Asia, South Asia, and Southeast Asia. Although the course is primarily concerned with the premodern period, it will also consider the impact of modernity on Muslim literature, art, and architecture.

### L75 JIMES 3171 Religion and Culture in South and Southeast Asia

Although it is now common to differentiate between South and Southeast Asia, historically these regions have often been conceptualized as part of a single geographical area. Known as the "(East) Indies", this area is marked by a rich history of (earlier) Hindu and Buddhist influences, as well as (later) Islamic and Christian influences. The present course will take an in-depth look at the four aforementioned religious traditions, and examine how they have shaped local forms of culture in premodern and modern times. Students will be introduced to host of phenomena in South and Southeast Asian societies, including religious worship, education, law, traditional governance, colonial governance, art, architecture, economic production, kinship, gender, and sexuality. Countries to be studied in the course include India, Pakistan, Sri Lanka, Thailand, Myanmar, Indonesia, Malaysia, the Philippines, and Papua New Guinea. Same as L73 Hindi 3171

### L75 JIMES 3183 The Jews of North Africa

This course examines the colonial and postcolonial experiences of Jews living in North Africa (mainly Algeria, Morocco, Tunisia, Libya and Egypt) in the context of the region's connections with and relationships to the European powers in the 19th and 20th centuries. We will focus on how the intrusion of foreign powers disrupted and shifted long-standing relationships between Jews and their non-Jewish neighbors, particularly the Muslim populations. We will also explore changes that occurred within the Jewish community as Jews negotiated their place within the new European Imperial system and its subsequent dismantling. Students will have the opportunity to engage with European ideas of "regenerating" North African Jews living under Ottoman Rule, the changing political and social statuses of Jews throughout the French and British regions, the changing relationship between Jews and their non-Jewish neighbors, the rupture caused by both World Wars, and how Jews coped with and responded to the dismantling of European empires and the birth of nation-states in the region, including Israel.

### L75 JIMES 3184 A Rainbow Thread: A History of Queer Identities in Judaism and Islam

The notion that gender and sexuality minorities are forbidden or simply do not exist within traditional Judaism and Islamic traditions is an assumption that has been questioned in recent years. For these scholars and activists, it is not up for debate whether someone can be queer and Jewish or queer and Muslim. Therefore, what follows is an exploration of how to resurrect gender non-conforming interpretations of religious texts and rediscover the spectrum of gender and sexual identities that have always existed within Judaism and Islam. The course is divided into three parts. First, we will examine the religious textual traditions of both faiths to establish the space for queer identities in both the Qur'an and Torah as well as the traditions of Hadith and Talmud. Second, we will study key communities such as medieval Iberia, the Ottoman Mediterranean, Hasidic communities in Eastern Europe, Qajar Iran, and the colonial empires of the Middle East. This survey will show the influence European Christian dominance had (or did not have) on the evolution of Jewish and Islamic gender and sexual norms from pre-modern times through the 20th century. Finally, we will examine the 21st century by reading the memoirs of trans Muslims and trans Jews in order to analyze the ways in which contemporary queer Jewish and Islamic individuals frame their experiences and tell their stories of faith with agency, in their own words.

**L75 JIMES 3185 The Jewish Experience in the United States: A History of Exceptions and Exceptionalism**

This course surveys American Jewish life from the colonial settlement of the new world to the present day with special emphasis on configurations of the Jewish Question in a variety of historical and geographical contexts. We will explore the paradox between American Jewish social and economic success over the last three and a half centuries and the sense of ambivalence many Jews feel toward their place in American society. As a class, we will consider key moments in American Jewish history, including the converso community that arrived alongside early Spanish settlers, the role of Jews in the slave trade and plantation complex, Jewish appeals for acceptance and equality within the American colonies and early republic, as well as how Jews coped with a divided union during the Civil War. We will analyze successive waves of Jewish immigration from different countries, the building of Jewish communal structures, and the evolution of Judaism and Jewish identity within the United States. Jewish contributions to American culture will also be an important focus of the class as we explore the birth of American popular culture through music, film, television, and fiction. Throughout the course we will be cognizant of the regional, religious, ethnic, racial, class, gender, and sexual differences that comprise American Jewish society from its early inception to the present. We will observe how Jews have been simultaneously welcomed as well as excluded from political, economic, and social realms of the American community. As often as possible we will engage in a multitude of case studies and primary sources so we can gain specific regional expertise, while maintaining a national, and often transnational lens for analyzing these central questions.

**L75 JIMES 3194 Environment and Empire**

In this course we study British imperialism from the ground up. At bottom, the British empire was about extracting the wealth contained in the labour and the natural resources of the colonized. How did imperial efforts to maximize productivity and profits impact the ecological balance of forests, pastures, and farm lands, rivers and rainfall, animals and humans? We'll ask, with environmental historians of the U.S., how colonialism marked a watershed of radical ecological change. The course will cover examples from Asia to Africa, with a focus on the "jewel in the crown" of the British empire: the Indian subcontinent. We'll learn how the colonized contributed to the science of environmentalism, and how they forged a distinctive politics of environmentalism built upon local resistance and global vision, inspired by religious traditions and formative thinkers, not least Mahatma Gandhi.

**L75 JIMES 3200 An Introduction to Literature and Visual Culture in the Arab World**

The course aims to provide a framework within which the literary and image cultures of the Arabic-speaking peoples have developed. This is done through a combination of contextual analysis and close reading of seminal texts and films. Our starting points are foundational sources such as the Quran and classical prose and poetry. From the later period, emphasis will be put on fiction and cinema.

**L75 JIMES 3211 Conversational Hebrew**

Designed to focus on and strengthen oral proficiency, we will explore a variety of different topics together based on our common interests - not limited to current affairs, space travel and exploration, advances in medical technology, climate change, pandemic preparedness, economic inequality, and the future of work. With each topic, we will learn relevant vocabulary and structures and apply them in small group discussions, individual presentations, simulated interviews, and classroom debates. Students will also listen to different Israeli news reports and documentaries in order to learn how to present at a formal level. The course is designed to simulate a variety of real-life situations, which require the balance of both rehearsal as well as improvisation. By learning Hebrew in different contexts, students will be exposed to a wide range of vocabulary and will be prepared to use the language in a variety of situations. The language of instruction is Hebrew only. PREREQ: Grade of B- or better in L74 214D Intermediate Modern Hebrew II or placement by examination. Please note: L75 5211 is intended for graduate students only.

**L75 JIMES 3221 Topics: The Jewish Experience in Italy**

This course will examine the social and political history of the Jews of Italy from the period of Italian unification through the end of the Second World War. We will look through two different prisms: first, the constant of Jews' minority status in a Catholic country at a time when Church doctrine was hostile to them and second, their changing status during significant moments in the brief history of the Italian monarchy. Under the latter rubric we will study the rehabilitation of the Jews under liberal political philosophies, their problematic relationship with Fascism, and finally the arrival of the Holocaust in Italy and efforts to defend Jews against Nazi genocide. We will approach these topics wherever possible through primary texts, including essays, memoirs, and novels. Reading knowledge of Italian is not required. Readings in English; some readings in Italian for Italian majors. Discussion in English. Prerequisite for Italian majors: Italian 307D; no prerequisite for students in other majors. Three five-page papers. PLEASE NOTE: THE L75 5221 CROSS-LISTING COURSE IS FOR GRADUATE STUDENTS ONLY.

#### **L75 JIMES 3230 Jews & Christians in the Premodern World**

In modern times, it is common to think of Judaism and Christianity as two distinct, if historically connected, "religions." Increasingly, however, historians of ancient religions have thought more deeply about the implications of taking Christianity and Judaism in antiquity as more fluid and porous than we tend to think of them. In this upper division course, we will explore the ways in which the boundaries that early Christians attempted to draw between Christianity and Judaism remained unstable and incomplete. While the various efforts to establish early Christian identity led to the production of a variety of hermeneutical representations of the Judaioi, these literary representations nevertheless often reflected, to various degrees, engagement with actual historical Jews/Judeans, who shared political, economic, and intellectual worlds with Christians. We will consider how early Christian discourse about Jews and Judaism informed and was informed by intra-Christian disputes and their negotiations of their relationships with the wider Greco-Roman culture. We will explore how Christian efforts to establish both continuity and difference between Judaism played a role in the construction of 'orthodoxy' and 'heresy,' as well as the way in which Christians re-appropriated Jewish texts, rituals, and ideas in their efforts to construct a Christian identity. We will also explore how this continued dynamic of difference and continuity continued into the Middle Ages.

#### **L75 JIMES 3231 Jews and Jewishness in Black American Thought**

The history of what has been called "Black-Jewish relations" in the United States has a rich and contested history. The stories told feature solidarity, controversy, and betrayal. This course will look at that history by attending to the role of Jews and Judaism in Black thought. How has Jewishness featured in the self-understanding of Black writers? Have Jews been regarded as allies or adversaries, role models or competitors? What role have Jewish texts or narrative paradigms played in Black religion? What have Black writers made of the Jewish project of national liberation?

---

#### **L75 JIMES 3232 Religion & Nationalism in the Middle East & South Asia**

How does religion shape national identity? How and why do some religious traditions become intertwined with the identities of national communities, often at the expense of others? In this course we explore how Islam, Judaism, Hinduism, and Christianity have interacted with modern nationalism to shape the nation-states of the Middle East and South Asia in profound ways. Throughout the course, we examine a range of case studies to compare and contrast, for example, the complex interaction between religion and nationalism in the creation of Pakistan and Israel in 1947 and 1948 as Muslim and Jewish national homes, the rise of the Hindu Right in India, religion and race in Iran, or the significance of Christianity and Islam for Palestinians and Iraqis. As we do so, we investigate how national movements have selectively and creatively engaged religious traditions over time in order to redefine communal boundaries, narrate new histories, exclude minorities, and reread sacred texts to draw the borders of their national homelands, which have often overlapped at great cost.

#### **L75 JIMES 331 Topics in Holocaust Studies: Children in the Shadow of the Swastika**

This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period—the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children—both those they considered "Aryan" and those they designated "enemies" of the German people, such as Jewish children—an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the

increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. OPEN TO FRESHMEN. STUDENTS MUST ENROLL IN BOTH MAIN SECTION AND A DISCUSSION SECTION.

**L75 JIMES 3341 Religion, Race, and Migration: Borders of Difference?**

This seminar is an experiment in studying the intersections of religion, race, and migration through the idea of difference. We discuss how particular understandings of religion, race, and migration inform contemporary scholarship and shape national and international legal and governmental practices. Specifically, this course explores how difference-of community, body, and place-produces conditions of possibility. Over the semester, we will investigate various borders of difference, using binaries to guide our analysis. We will examine this through a range of problem spaces including: religion/secularism; race/ethnicity/sect; terrorist/citizen; and refugee/migrant. Ultimately, this course aims to critically unpack the relations of power by which people, places, and ideas are differentially constructed, maintained, and transformed

---

**L75 JIMES 334C Crusade, Conflict, and Coexistence: The Jews in Christian Europe**

This course will investigate some of the major themes in the history of the Jews in Europe, from the Middle Ages to the eve of the French Revolution. Jews constituted a classic, nearly continuous minority in the premodern Christian world—a world that was not known for tolerating dissent. Or was it? One of the main purposes of the course is to investigate the phenomenon of majority/minority relations, to examine the ways in which the Jewish community interacted with and experienced European societies, cultures, and politics. We will look at the dynamics of boundary formation and cultural distinctiveness; the limits of religious and social tolerance; the periodic eruption of persecution in its social, political, and religious contexts; and the prospects for Jewish integration into various European societies during the course of the Enlightenment era.

---

**L75 JIMES 335C Becoming "Modern": Emancipation, Antisemitism and Nationalism in Modern Jewish History**

This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be-or to become-modern. To answer this question, we look at two broad trends that took shape toward the end of the eighteenth century—the Enlightenment and the formation of the modern state—and we track changes and developments in Jewish life down to the close of the twentieth century with analyses of the (very different) American and Israeli settings. The cultural, social, and political lives of Jews have undergone major transformations and dislocations over this time—from innovation to revolution, exclusion to integration, calamity to triumphs. The themes that we will be exploring in depth include the campaigns for and against Jewish "emancipation;" acculturation and religious reform; traditionalism and modernism in Eastern Europe; the rise of political and racial antisemitism; mass migration and the formation of American Jewry; varieties of Jewish national politics; Jewish-Gentile relations between the World Wars; the destruction of European Jewry; the emergence of a Jewish nation-state; and Jewish culture and identity since 1945.

**L75 JIMES 336C History of the Jews in Islamic Lands**

This course is a survey of Jewish communities in the Islamic world, their social, cultural, and intellectual life from the rise of Islam to the Imperial Age. Topics include: Muhammad, the Qur'an and the Jews; the legal status of Jews under Islam; the spread of Rabbinic Judaism in the Abbasid empire; the development of new Jewish identities under Islam (Karaites); Jewish traders and scholars in Fatimid Egypt; the flourishing of Jewish civilization in Muslim Spain (al-Andalus); and Sephardi (Spanish) Jews in the Ottoman empire. On this background, we will look closely at some of the major Jewish philosophical and poetical works originating in Islamic lands. Another important source to be studied will be documents from the Cairo Geniza, reflecting social history, the status of women, and other aspects of daily life.

**L75 JIMES 3411 Children and Childhood in World Religions**

This course will investigate the roles children play in some of the world's major religious traditions and how those traditions construct their concepts of childhood. From child disciples to child martyrs, from the miraculous childhoods of religious founders to the rites marking childhood's end, and from divine commandments involving fertility to those mandating celibacy, we will explore a wide range of different religions' teachings about children and childhood. We will combine primary and secondary sources including written texts, movies/video, and web-based content in order to learn more about the complex relationships between children and the religious traditions of Judaism, Christianity, Islam, Hinduism, Buddhism, and Confucianism.

Same as L66 ChSt 341

**L75 JIMES 3421 Childhood, Culture, and Religion in Medieval Europe and the Mediterranean World**

From child saints to child scholars and from child crusaders to child casualties, the experience of childhood varied widely throughout the European Middle Ages. This course will explore how medieval Jews, Christians, and Muslims developed some parallel and some very much divergent concepts of childhood, childrearing, and the proper cultural roles for children in their respective societies. Our readings will combine primary and secondary sources from multiple

perspectives and multiple regions of Europe and the Mediterranean World, including a few weeks on the history and cultural legacy of the so-called Children's Crusade of 1312. We will conclude with a brief survey of medieval childhood and its stereotypes as seen through contemporary children's books and TV shows. This course fulfills the Language & Cultural Diversity requirement for Arts & Sciences. Same as L66 ChSt 342

#### **L75 JIMES 3422 Art of the Islamic World**

This course surveys the art and architecture of societies in which Muslims were dominant or in which they formed significant minorities from the seventh through the 20th centuries. It examines the form and function of architecture and works of art as well as the social, historical, and cultural contexts; patterns of use; and evolving meanings attributed to art by the users. The course follows a chronological order, and selected visual materials are treated along chosen themes. Themes include the creation of a distinctive visual culture in the emerging Islamic polity; the development of urban institutions; key architectural types such as the mosque, madrasa, caravanserai, palace, and mausoleum; art objects and the art of the illustrated book; cultural interconnections along trade and pilgrimage routes; and Westernization and modernization in art and architecture.

#### **L75 JIMES 345 Mesopotamian Mythology: Stories from Ancient Iraq**

In this course we will read, explore, and interpret various ancient myths originating from the fertile crescent, especially ancient Iraq, between the years 2500 and 400 BCE. The Epic of Gilgamesh, the Enuma Elish, myths of the goddess Ishtar as well as various flood and creation accounts will be among those we read. Cultural background information will be examined to situate each myth in its ancient context. Various theories of interpreting myth will also be explored in order to appreciate the power and the many uses of these multivalent stories. Several basic questions will underlie all that we do throughout the semester: What is myth?, How should we understand the conceptualization of the category "myth" (in other words, How does myth work?), and Does myth still play a role in our own modern cultures?

Credit 3 units. BU: HUM

---

#### **L75 JIMES 346 Islamic Law**

This course will present a general overview of Islamic law and an introduction to the study of religious legal authority, which values consensus. It will then explore the formation of the major schools of law. Next, it will debate the notions of "ijtihad" and "taqlid" and discuss how open and independent legal decisions have been in the Islamic world. It will also trace the transmission of legal knowledge in religious institutions across time and place by focusing on medieval Muslim societies and by closely examining the education of a modern-day Ayatollah. Note: L75 546 is intended for graduate students only.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

---

#### **L75 JIMES 349 Yiddishkayt: Yiddish Literature in English Translation**

This course will trace the emergence, development, flourish, and near-decline of Yiddish literature, beginning with some of the earliest writings to appear in Yiddish in the late middle ages and early modern period, continuing with 19th-century attempts to establish a modern Yiddish literature and the 20th-century emergence of both a classical canon and a literary avant-garde, and ending with post-Holocaust attempts to retain a Yiddish literary culture in the near absence of

Yiddish-speaking communities. Focusing on the role of Yiddish as the "national" language of Ashkenaz, the course will examine the ways in which Yiddish literature has responded to the social conditions of European Jewish life, exploring among others the relationship between Yiddish and the non-Jewish cultures in which it existed, the tensions between secular trends versus religious tradition, life in the shtetl and in the metropolis, immigration from the old world to the new, and Yiddish literary responses to the Holocaust.

#### **L75 JIMES 3520 Fantasy, Horror, Sci-Fi: Genre-Fiction in Arabic Literature**

Genre is a category, or to use Aristotle's term, a species. It is a category of literature, arts, music, and other forms of composition, to classify works of shared conventions, practices, and aesthetics. A typical example would be poetry. Subgenre is a single division of a given genre. In this example, epic poetry, the sonnet, haiku are subgenres of poetry. But who gets to decide what is genre, subgenre, and how? These would be some of the main questions we will address in this course. Genre theory can teach us a fascinating history of how various cultures imagine their forms of creative expression. The development of genres and subgenres reveal complex histories on who has the power to define and redefine creative expression. For example, the novel, now a dominant and prestigious global literary genre, was once considered an inferior and working-class genre in Europe over a century ago. The novel genre then developed into numerous subgenres, which are today placed under one large umbrella that is "genre-fiction," such as sci-fi, fantasy, horror, gothic, mystery etc.. However, the borders between these subgenres and the larger genre itself are always contested and reformulated. Through the history of genre and subgenre, we get to learn about literary taste and literary criticism, and whose definitions and conventions have changed the course of literature and the arts, and for what reason. The dominance of the historical novel today, for example, is attributed to larger phenomenon such as decolonization,

feminism, and anti-racism. The sociopolitical urge to utilize fiction to address larger issues has not only boosted the impact of the historical novel but "elevated" it to become a common form of the genre itself. Within this grand history, Arabic literature has a complex and rich story to tell about genre and subgenre. The most obvious example here, which will be our entry point in this course, is 1001 Nights (also known as The Nights, or The Arabian Nights). This multi-volumed masterpiece has influenced fiction writers across the globe, especially in the past three centuries as the novel began to formulate into a modern genre. It is an exceptional work where we see a cosmology of subgenres of storytelling, narrative, but also of poetry, and in some editions, illustration and drawing, as well as translation. The Nights is often seen as the first hybrid work of literature where subgenres and forms co-exist but also blur and converge. This dynamic, revolutionary, and mobile nature of The Nights expresses the meeting of various cultures, experiences, and traditions of storytelling during the Abbasid empire. Today, it remains ever more relevant and inspiring in a cosmopolitan world. The question and history of sub/genre, however, will guide us through an exploration of modern and contemporary Arabic literature. We will get to engage with these texts thematically, stylistically, and intellectually. The aesthetic choices made in literature are never isolated from the intellectual, political, and sociohistorical contexts of a given text. Through the assigned texts and artworks, we will also learn about colonization, gender, imperialism, class, migration, ecology, among other pressing topics. No knowledge of Arabic is necessary; all readings in English translation.

#### **L75 JIMES 352A Anthropology of Human Rights**

This course draws on anthropological scholarship to examine doctrines, practices, and institutions associated with international human rights law. Topics to be covered include: (1) colonialism and the history of international human rights law; (2) the complex theoretical issues raised by attempts to define and apply human rights concepts in different cultural contexts; (3) the role of governments, NGOs, and other international institutions in promoting human rights and humanitarianism; (4) key human rights issues such as freedom of religion, cultural rights, women's rights, and economic rights in different cultural contexts.

#### **L75 JIMES 353 Understanding Indian Literature through Visual Media**

This course focuses on the films and cultural traditions of South Asia in general and of India in particular. Students will be introduced to a variety of contemporary literary genres through visuals. Readings and class discussions will be followed by film screenings from the popular Hindi cinema (known as the Bollywood industry in India) to demonstrate how images and visuals influence modern-day cultural traditions. Students will also get a chance to work on films based on literary texts by well-known writers of the subcontinent. These readings and films focus on various social, cultural, political and historical aspects of Indian society. Students will be encouraged to explore these issues in their written assignments as well as in their class discussions.

#### **L75 JIMES 354 Anthropological and Sociological Study of Muslim Societies**

This course introduces students to anthropological and sociological scholarship on Muslim societies. Attention will be given to the broad theoretical and methodological issues which orient such scholarship. These issues include the nature of Muslim religious and cultural traditions, the nature of modernization and rationalization in Muslim societies, and the nature of sociopolitical relations between "Islam"

and the "West." The course explores the preceding issues through a series of ethnographic and historical case studies, with a special focus on Muslim communities in the Middle East, Southeast Asia, and Europe. Case studies address a range of specific topics, including religious knowledge and authority, capitalism and economic modernization, religion and politics, gender and sexuality, as well as migration and globalization. Please note: L75 554 is intended for graduate students only.

#### **L75 JIMES 356 Genesis**

Genesis, the first book of the Bible, remains among the most important literary, historical, and theological works ever written - at once beautiful, funny, perplexing, and challenging. In this class, we will take a deep dive into Genesis, while also exploring literary, historical, mythological, feminist, postcolonial, and other responses to the text. We will also consider the history of interpretation, with a particular interest in the reception of Genesis in literature and in popular culture. Same as L23 Re St 356

---

#### **L75 JIMES 3561 Exodus**

We will investigate the biblical book of Exodus in both its original significance in the ancient Near East and its later meanings for Jews, Christians, and Muslims in societies around the world. Why did its narratives and ideas about law and justice and religion resonate so strongly both in biblical times and afterwards? Which assumptions did the biblical authors make about writing stories and poetry? What is the historical reality of the Exodus? How did the biblical Israelites conceive of their religious practices and institutions? We will also explore how Exodus and the celebration of Passover has been, and continues to be, a crucial source of identity in Jewish and Christian circles. How has Exodus been re-imagined and transfigured multiple times, and how has the Passover celebration reflected transformations in the understanding of the Exodus? We will analyze many types of expression influenced by Exodus: historical sources, liturgy, art, commentaries, theology, literature, film, mysticism, and music.

#### **L75 JIMES 3581 Musica Ebraica: Jewish Identities in Western Music from 1600 to the 21st Century**

The course explores Western music from the 17th century to the 21st century through the prism of musical works that were written by Jews and for Jews and of musical compositions reflecting their composers' identifying themselves as Jews. Jewish art music from these periods will be examined against the background of musical development in general, the social, political, and religious context of the composers, and written reflections about Jewish music. Examples of Jewish art music will be analyzed through different approaches in order to determine the cultural interrelationships between Jews and non-Jews, Jewish cultural autonomy, and the perception of Jewishness in music.

---

#### **L75 JIMES 3582 Music in Jewish Culture and Society**

The common term 'Jewish Music' raises numerous questions that emanate from the difficulty to define 'Jewish' identity of any given music. This course will deal with various approaches to the definition of Jewish music, perceived as a cultural and sociological component in the Jewish communities throughout the Diaspora. We will survey the functions in which music is performed in traditional Jewish communities, especially Jewish liturgy, and the substantial vicissitudes in these musics after the European Enlightenment, European colonialism in north-Africa, and in the Mediterranean. We will study the background and the different characteristics of selected Jewish

communities - Ashkenazic, Sephardic, Italian, Yemenite, and others - as well as instrumental music, questions of gender, and the relationship between music and text." A secondary goal of this course will be the study of the bibliography and discography of Jewish musics.  
Credit 3 units. A&S IQ: HUM, LCD EN: H

---

#### **L75 JIMES 3583 The Soundtrack of Israeli History**

This course explores connections between Israeli history, nationality, and culture, and between Israeli art music. Such an encounter between reveals the reflection of, and responses to, local social developments in various historic and constitutive moments in Israeli history such as: the fifth Aliya (wave of immigration) in the 1930s, the statehood years, the waning of nationalistic sentiments in the late 1950s, the aftermath of Israeli wars, the negotiation between Israeli and Jewish identities, and even artistic expressions of postmodernity within the Israeli context. These histories will be surveyed through historical studies as well as through their musics and against the background of developments in 20th century music.

#### **L75 JIMES 359 Travelers, Tricksters, and Storytellers: Jewish Travel Narratives and Autobiographies,**

Jewish literature includes highly fascinating travel accounts and autobiographies that are still awaiting their discovery by a broader readership. In this course, we will explore a broad range of texts originating from the Middle Ages to the 19th century. They were written by both Ashkenazi and Sephardi Jews hailing from countries as diverse as Spain, Italy, Germany, and the Ottoman Empire. Among the authors were pilgrims, rabbis, merchants, and one savvy businesswoman. We will read their works as responses to historical circumstances and as expressions of Jewish identity, in its changing relationship to the Christian or Muslim environment in which the writers lived or traveled. Specifically, we will ask questions such as: How do travel accounts and autobiographies enable their authors and readers to reflect on issues of identity and difference? How do the writers produce representations of an "other," against which and through which they define a particular sense of self? This course is open to students of varying interests, including Jewish, Islamic, or Religious Studies, medieval and early modern history, European or Near Eastern literatures. All texts will be read in English translation. Please note: L75 559 is intended for graduate students only.

---

#### **L75 JIMES 3602 Borders, Checkpoints, and the Frontiers of Literature**

Borders are some of the most strange, dangerous, and changeable places in the world. They help define not only where we are, but also who we are. This course will read literature from and about border regions around the world: the Mexican-American frontera, the Indian and Pakistani Partition line, the German Iron Curtain, the African colonial borders, and the Israeli-Palestinian divisions. Even if we live far from any international boundary, the notion of the border shapes our thinking about the world. Literature is a place where borders are vividly imagined, marked, and debated in ways that both affect preexisting frontiers and help draw new ones on the ground. We will read all texts in English.

#### **L75 JIMES 362A Islam, Gender, Sexuality**

In this course, we examine discourses of gender and sexuality across historical period and geographical region. We analyze encounters with Western imperialism, investigating how gender informs social, political, religious, and family life in Islamic cultures. Our course materials include histories, ethnographies, graphic novels, and films, and we examine how these sources approach the study of Islam, gender, and sexuality through the lens of various topics: from women in the earliest years of Islam in 7th century Arabia to revolutionary Iran and American Muslim women in the 21st century. Throughout the course, we examine how notions of gender and sexuality have changed over time and played various roles in the political and social life of Muslim nations, societies, and communities. By the end of the course, students will be able to critically assess scholarly and non-scholarly (media) discussions of gender in Islam.

#### **L75 JIMES 366 The Sephardic Experience: 1492 to the Present**

In the public perception, modern Jews divide into two subethnic groups: Ashkenazi and Sephardi, or European and Middle Eastern Jews. However, this is an oversimplification that does not do justice to the diversity and complex history of Jewish identities, which are often multilayered. Strictly speaking, Sephardi Jews trace their ancestral lines or cultural heritage to the medieval Iberian Peninsula, present-day Spain and Portugal. That said, according to some scholars, Sephardi Judaism did not even exist before the general expulsion of Spanish Jewry in 1492 and is the result of their subsequent migrations within the Mediterranean and transatlantic worlds. We will start with an introduction into the history of Spanish Jews prior to 1492, asking to what extent memories of pre-expulsion Iberia are at the heart of Sephardi identity. We will then follow the migratory path of Sephardi exiles to North Africa, Italy, the Ottoman Empire, the Netherlands, and the Americas. The questions we will explore include: in what sense did Sephardim form a transnational community? How did they transmit and transform aspects of Spanish culture in form of Ladino (Judeo-Spanish) language and literature? How did they become intermediaries between Christian Europe and the Ottoman Empire? What was their role in Europe's transatlantic expansion and the slave trade? How did Ottoman and North African Jews respond to European cultural trends in the nineteenth century and create their own forms of modernity? How did the Holocaust impact Sephardi Jews?

**L75 JIMES 3660 Caste: Sexuality, Race, and Globalization**

Be it sati or enforced widowhood, arranged or love marriage, the rise of national leaders like Indira Gandhi and Kamala Harris, or the obsession with "fair" skin, caste shapes possibilities and perceptions for billions. In this class we combine a historical understanding of the social caste structure with the insights made by those who have worked to annihilate caste. We will re-visit history with the analytic tools provided by the concepts of compulsory endogamy, "surplus woman," and "brahmanical patriarchy," and we will build an understanding of the enduring yet invisible "sexual-caste" complex. As we will see, caste has always relied on sexual difference, its ever-mutating power enabled by the intersectionalities of race, gender and class. We'll learn how caste adapts to every twist in world history, increasingly taking root outside India and South Asia. We will delve into film and memoir, sources that document the incessant injustices of caste and how they have compounded under globalization. The class will research the exchange of concepts between anti-race and anti-caste activists: how caste has shaped the work of prominent anti-racist intellectuals and activists in the United States such as W.E.B. DuBois and Isabel Wilkerson and in turn, the agenda and creativity of groups such as the Dalit Panthers. Finally, the course will build a practical guide to engaging with and interrupting caste in the context of the contemporary global world today. Waitlists controlled by Department; priority given to WGSS majors. Enrollment cap 15.

**L75 JIMES 3670 Gurus, Saints, and Scientists: Religion in Modern South Asia**

Many long-standing South Asian traditions have been subject to radical reinterpretation, and many new religious movements have arisen, as South Asians have grappled with how to accommodate their traditions of learning and practice to what they have perceived to be the conditions of modern life. In this course we consider some of the factors that have contributed to religious change in South Asia, including British colonialism, sedentarization and globalization, and new discourses of democracy and equality. We consider how new religious organizations were part and parcel with movements for social equality and political recognition; examine the intellectual contributions of major thinkers like Swami Vivekananda, Sayyid Ahmad Khan, and Mohandas Gandhi; and explore how Hindu, Islamic, and other South Asian traditions were recast in the molds of natural science, social science, and world religion.

**L75 JIMES 374 Of Dishes, Taste, and Class: History of Food in the Middle East**

This course will cover the history of food and drink in the Middle East to help us understand our complex relation with food and look at our lives from perspectives we intuitively feel or by implication know, but rarely critically and explicitly reflect on. Food plays a fundamental role in how humans organize themselves in societies, differentiate socially, culturally, and economically, establish values and norms for religious, cultural, and communal practices, and define identities of race, gender, and class. This course does not intend to spoil, so to speak, this undeniably one of the most pleasurable human needs and activities, but rather to make you aware of the social meaning of food and reflect on how food shapes who we are as individuals and societies. We will study the history of food and drink in the Middle East across the centuries until the present time, but be selective in choosing themes, geographic regions, and historical periods to focus on. Please consult the instructor if you have not taken any course in the humanities. Enrollment priority given to seniors and juniors.

### **L75 JIMES 377 History of Slavery in the Middle East**

This course examines slavery and its abolition in the Middle East and North Africa from 600 C.E. to the 20th Century. It addresses slavery as a discourse and a question of political economy. We begin with an overview of slavery in late antiquity to contextualize the evolution of this practice after the rise of Islam in the region. We then examine how it was practiced, imagined, and studied under major empires, such as the Umayyads, the Abbasids, the Fatimids, the Mamluks, the Ottomans, and the Safavids. In addition to examining the Qur'anic discourse and early Islamic practices of slavery, to monitor change over time we address various forms of household, field, and military slavery as well as the remarkable phenomenon of "slave dynasties" following a chronological order. We discuss, through primary sources, theoretical, religious, and moral debates and positions on slavery, including religious scriptures, prophetic traditions, religious law, and a plethora of narratives from a range of genres. We highlight a distinct theme each week to focus on until we conclude our discussion with the abolition of slavery in the 19th and 20th centuries. Topics of discussion include various forms of male and female slavery, Qur'anic and prophetic discourse on slavery, legal and moral views on slavery, slavery as represented in religious literature, political, military, and economic structures of slavery, issues of race and gender as well as slave writings to reflect on the experiences of slavery from within. The goal is to enable students to understand the histories of slavery in the Middle East and eventually compare it to that of other regions and cultures, such as European and Atlantic slavery. No second language required.

### **L75 JIMES 3810 Between Sand and Sea: History, Environment, and Politics in the Arabian Peninsula**

Although it is today primarily associated with oil, the Arabian peninsula was for most of its history defined by water: its surrounding seas, its monsoon-driven winds, and its lack of water in its vast and forbidding interior deserts. As home to the major holy cities of Islam and a key source of global oil, the region has played an important role in the Western European and North American imagination. Despite being relatively sparsely populated, the peninsula hosts millions of believers each year on the annual Muslim pilgrimage, and it has been the site of major wars and military occupations by European, American, and other Middle Eastern countries for much of the 20th and 21st centuries. It has been an outpost of the Ottoman Empire, a center of British colonialism and (at Aden) an axis of its global empire, the location of Egypt's "Vietnam" (its long war in Yemen in the 1960s), the Gulf Wars I and II, and the recent wars in Yemen, to name just a few of the major conflicts. Often depicted as unchanging until caught up by the influx of massive oil wealth, this region is frequently characterized as a place of contradictions: home to some of the world's largest skyscrapers and also the most inhospitable and largest sand desert in the world, known as "the Empty Quarter"; the location of crucial American allies and the home of al-Qa'eda founder Usama Bin Laden. In this course, we will examine the development of the peninsula historically to understand these contradictory images. We will investigate changes in the following arenas: environment and society; colonial occupation; newly independent states; the demise and development of key economic sectors (pearling; shipping; agriculture; oil; finance; piracy); political regimes; resources such as water, oil, and date palms; the growth of oil extraction infrastructure and its effects on the political regimes and societies in the region; the emergence of new Gulf cities; Islamic law; women's rights; human rights debates; and religious and ethnic minorities.

### **L75 JIMES 382 The History and Politics of Middle East Studies: Producing Expert Knowledge**

How do we know Muslim women need gender equality? How do we know minorities in the Middle East suffer from religious persecution, and that religious freedom is the solution? How do we know promoting human rights is a universal good? How do we know development aid improves the lives of Palestinian or Syrian refugees? Why do we need so many US military bases in the Arab Gulf? In this class, we consider the history and politics behind the answers to these kinds of questions. To do so, we examine the field of Middle East Studies in the United States, historically and today, and its role in the production of expert knowledge about the region. After learning foundational theories around knowledge production, we consider the history of US foreign policy and analyze how certain theories of the Middle East became common sense notions at the expense of other possibilities. We then investigate the history and politics of universal concepts and their promotion in the region such as human rights, gender equality, and religious freedom.

### **L75 JIMES 3843 Comparative Religion**

This course provides an overview of religion from the emergence of the human species until the present. It draws on scholarship from a variety of fields including archaeology, cultural anthropology, history, religious studies, evolutionary biology, psychology, and neuroscience. The course begins with a discussion of the psychological/biological foundations of religion. It then examines hunter-gatherer religions, prehistoric agricultural/pastoral religions, and major ancient/early religions (e.g., Mesopotamian, Egyptian, Zoroastrian, Greco-Roman, Aztec). Next, students are introduced to the three major families of world religions; namely, the "Abrahamic" religions (Judaism, Christianity, Islam); the "Indic" religions (Hinduism, Buddhism, Jainism), and the "East Asian" religions (Confucianism, Daoism, Shintoism).

**L75 JIMES 3900 Topics in Migration and Identity**

The course examines migration movements that are related to the Nazi genocide in Europe. Grounded in a study of the Nazi project to reshape the European geopolitical map, students explore how the mass movement of people is impacted by geopolitics, political violence, and economical considerations. Class materials address the relationship between identity formation and social exclusion, thus opening up a critical investigation of concepts of citizenship, human rights, and their institutional frameworks (states, international organizations etc.) more generally. Students will work with a variety of sources, including primary sources, scholarly analyses, podcasts, literary works, and film to study migrations related to the prehistory, policies, and aftermath of the Nazi regime. The class provides insights into issues of expulsion, refuge, forced migration, settlement projects, ethnic cleansing and others, but also demonstrates the global impact and long-term repercussions of political and genocidal violence. Looking at the Nazi regime through the lens of migration shows that the Nazi genocide is embedded in a history of racism, colonialization, and mass violence.

**L75 JIMES 3921 Secular & Religious: A Global History**

Recent years have seen a dramatic rethinking of the past in nearly every corner of the world as scholars revisit fundamental questions about the importance of religion for individuals, societies and politics. Is religion as a personal orientation in decline? Is Europe becoming more secular? Is secularism a European invention? Many scholars now argue that "religion" is a European term that doesn't apply in Asian societies. This course brings together cutting-edge historical scholarship on Europe and Asia in pursuit of a truly global understanding. Countries covered will vary, but may include Britain, France, Turkey, China, Japan, India and Pakistan.

**L75 JIMES 4011 Staging Atrocity: Theater of the Holocaust**

Responding to the Holocaust has challenged artists working in every medium. Nowhere are these challenges more extreme than in the theater, where the intimacy of the space, the close proximity of live actors and audience, and the subject matter itself may serve to intensify its effect. We will read a careful selection of modern and contemporary dramas and explore the range of responses. Underneath each weekly topic reverberate the nagging question of whether one can -- or should -- make art from the Holocaust, as well as a serious exploration of the uses and effectiveness of theater to communicate on this subject. We look at the ways in which the Holocaust has been used as a subject to raise moral dilemmas, examine the limits of humanity, elicit doubt or faith, and provide political commentary. We will also discuss the ways in which playwrights have stretched the limits of the theater to meet the challenge of staging the Holocaust. Topics considered include the nationalization and personalization of the Holocaust, the role of the second generation, issues of audience, and the use of experimental forms and obscenity. The plays on the syllabus are from North America, Israel and Europe. All readings are in English (original or translation).

**L75 JIMES 4043 Race and Ethnicity in the Middle East and North Africa**

This seminar explores formations, articulations, and legacies of race in the Middle East and North Africa. The main purpose is to acquaint students with different theories and methodological approaches to studies of race and racialization in the region. Given the large scope of the topic, the course will mainly focus on Egypt and Sudan, as well as the Arabian Peninsula and Persian Gulf. In dialogue with a transnational body of scholarship, political theory, as well as artistic and literary

production, we will read about the following set of topics: slavery and abolition; race and racialization; empire and colonialism; third world-ism and nationalism; revolution and solidarity; ethnicity and nationality; migration and minorities. By studying how peoples of the region have debated issues of race and racialization, from the Abbasid era to the contemporary moment, we come to realize the legibility and urgency of race as an analytics in Middle East studies. In considering pre-modern and modern articulations of race across the region, we begin to understand how race has functioned as a technology of power and hierarchization, and its intersectional role in forming categories of ethnicity, nationality, or even gender and sexuality. This section is intended for undergraduate students only. Graduate students should enroll in L75 5043.

Credit 3 units. A&S IQ: HUM, LCD, SC EN: H

**L75 JIMES 405 Diaspora in Jewish and Islamic Experience**

Tensions between center and periphery; migration and rest; power and powerlessness; and exile, home, and return are easily found in the historical record of both Jews and Muslims. For Muslims, it can be said that it was the very success of Islam as a world culture and the establishment of Muslim societies in in all corners of the globe that lay at the root of this unease. However, the disruptions of the post-colonial era, the emergence of minority Muslim communities in Europe and North America, and the recent tragic flow of refugees following the Arab Spring have created a heightened sense of displacement and yearning for many. Of course, the very term "diaspora" -- from the ancient Greek, meaning "dispersion" or "scattering" -- has most often been used to describe the Jewish condition in the world. The themes of exile and return and of catastrophe and redemption are already woven into the Hebrew Bible, and they continued to be central motifs in Rabbinic Judaism in late antiquity and the Middle Ages. This occurred despite the fact that more Jews lived outside the borders of Judea than within the country many years before the destruction of Jewish sovereignty at the hands of the Romans. In the 20th century, European imperialism, nationalisms of various types, revolution, and war -- including the Israeli-Palestinian conflict -- have done much to underscore the continuing dilemmas of diaspora and home in both Jewish and Islamic identity. The goal of this course is to offer a comparative historical perspective on the themes of migration and displacement, center and periphery, home and residence, and exile and return and to give students the opportunity to examine in depth some aspect of the experience of diaspora. Note: This course fulfills the capstone requirement for Jewish, Islamic, and Middle Eastern Studies. The course also counts as an Advanced Seminar for history. (Students wishing to receive history Advanced Seminar credit should also enroll in L22 491R section 19 for 1 unit.) The course is open to advanced undergraduate and graduate students.

**L75 JIMES 4060 Conflict or Convivencia? Muslims, Jews, and Christians in Medieval Spain**

This seminar will explore various facets of the coexistence (convivencia) of Muslims, Jews, and Christians in medieval Spain. Its horizon stretches from the Muslim conquest of Iberia (al-Andalus) up to the turn of the 16th century when Spanish Jews and Muslims were equally faced with the choice between exile and conversion to Christianity. Until about 1100, Muslims dominated most of the Iberian Peninsula; from then onward, Christians ruled much and eventually all of what would become modern Spain and Portugal. Through a process known as reconquista (reconquest), Catholic kingdoms acquired large Muslim enclaves. As borders moved, Jewish communities found themselves under varying Muslim or Christian dominion. Interactions between the three religious communities occurred throughout, some characterized by shared creativity and mutual respect, others by rivalry and strife. The course focuses on these cultural encounters, placing them in various historical contexts. It will explore the ambiguities of religious conversion, and the interplay of persecution and toleration. Last

not least, the course will address the question of how the memory of medieval Spain's diversity reverberates-and is utilized-in modern popular and academic discourse. All sources will be read in English translation; however, students are encouraged to make use of their linguistic and cultural expertise acquired in previous classes. This course serves as the capstone seminar for Jewish, Islamic & Near Eastern Studies majors, Arabic majors, and Hebrew majors. Graduate students, minors, and other interested undergrads are likewise welcome.

**L75 JIMES 4081 Fourth-Level Arabic: Classical Literature**

This class provides an overview of pre-modern Arabic-Islamic thought (i.e., Islamic intellectual traditions expressed in the Arabic language). Topics to be covered include Pre-Islamic Poetry, Quran, Hadith, Islamic Law, Sufism, Philosophy, Natural Science, and Social Thought. Students will be introduced to these topics through focused reading and discussion of Classical Arabic texts by key thinkers like al-Abari, Ibn al-ajar, Ibn Qudama, al-Ghazali, Ibn Sina, Ibn Rushd, and Ibn Khaldun. In addition to reading Classical Arabic texts, students will be given select exercises designed to strengthen their grammar, expand their vocabulary, and build their translation. PREREQ: Grade of B- or better in L49 308D Advanced Arabic I or L49 3085 Third-Level Arabic II or placement by examination.

**L75 JIMES 409 Beyond Geography: The Meaning of Place in the Near East**

This course considers the importance of place in the Middle East with particular reference to Jewish and Islamic traditions. Topics to cover include the creation of holy sites, the concept of sacred space, the practice of pilgrimages, and the tropes of exile and return. Texts will range from analytical essays to novels, memoirs, and films by authors such as Edward Said, Naguib Mahfouz, Taher Ben Jelloun, Elif Shafak, A. B. Yehoshua, Shulamit Hareven, and Hanan Al-Shaykh. Requirements include participation, short assignments, and a seminar paper. This course fulfills the capstone requirement for students majoring in Jewish, Islamic and Near Eastern Languages and Cultures, but is open to advanced undergraduates and graduate students. Prerequisites: coursework in JINES and senior standing or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

**L75 JIMES 4154 Decolonization to Globalization: How to End an Empire**

The conventional markers of the twentieth century - imperialism, decolonization and globalization - are acutely compromised if we mobilize gender and sexuality as modes of analysis. In this course we bring questions of sexual difference and gender to the wider stories of colonialism, nationalism, decolonization, neocolonialism, US imperialism, neoliberalism, globalization, WoT, and majoritarianism. We "engender" the contradiction between enormous turning points and the lived experiences of billions. We probe how the non-profit industrial

complex, development aid, and the normative family have shaped and given shape to the very idea of gender. Finally, we examine the capacious power of gender to interrupt the power of the state and to reorganize extractive relations of race and caste.

**L75 JIMES 435 Sabbath Politics: Rest and Refusal in Religion and Politics**

The Jewish Sabbath arrives every week to disrupt ordinary life with a wholly different way of living, abstaining from some activities in divinely commanded rest. Is this different way of life strictly a break from the ordinary, or also a guide to it-and to how it might require disruption, reformation, and repair? Sabbath traditions have inspired radical political action including movements against debt, income inequality, environmental destruction, and racial injustice. This course will consider the ways that 20th and 21st century American Jews have practiced Shabbat and thought about its significance in political life. Students will read a range of texts including Abraham Joshua Heschel's classic 1951 book *The Sabbath*, and consider them in relation to movements of contemporary radical politics that have been inspired by Sabbath traditions, including Strike Debt, reparations for the descendants of enslaved people, and agonistic democratic politics.

---

**L75 JIMES 4357 The Holocaust in the Sephardic World**

The course provides students with a comprehensive understanding of the Holocaust, of its impact on the Sephardic world, of present-day debates on the "globalization" of the Holocaust, and of the ways in which these debates influence contemporary conflicts between Jews, Muslims and Christians in Southern Europe and North Africa. We will turn to the history of these conflicts, and study the Sephardic diaspora by focusing on the consequences that the 1492 expulsion had within the Iberian Peninsula, in Europe, and in the Mediterranean world. We will study Sephardic communities in Europe and North Africa and their interactions with Christians and Muslims before World War II. Once we have examined the history of the Holocaust and its impact on the Sephardic world in a more general sense, our readings will focus on the different effects of the Holocaust's "long reach" into Southeastern Europe, the Balkans, and North Africa, paying close attention to interactions among Jews, local communities, and the Nazi invaders. Finally, we will address the memory of the Sephardic experience of the Holocaust, and the role of Holocaust commemoration in different parts of the world. We will approach these topics through historiographies, memoirs, novels, maps, poetry, and film.

**L75 JIMES 442 Empire and Memory: Approaches to Islamic Historiography (ca. 800-1250)**

The subject of this course is an in-depth study of medieval Arabic historiography from the 8th through the 13th centuries, when the Mongols run over the remnants of the Abbasid caliphate, established their own rule over Eurasia, and thereby sparked new questions about the past. After the initial survey of medieval Islamic history as background, we will focus on the development of historiographical writing in its socio-political context and examine one by one the most major historiographical traditions and philosophies from the 8th through the 13th centuries: prophetic traditions, belles-lettres, annals, biographical dictionaries, and genealogical literature.

Credit 3 units. A&S IQ: HUM EN: H

**L75 JIMES 444 The Mystical Tradition in Judaism**

What is Jewish "mysticism"? What is its relationship to the category of "religion"? Is Jewish mysticism just one form of a general phenomenon common to a variety of religious traditions or is it a specific interpretation of biblical, rabbinic, and other Jewish traditions?

Taking the above questions as a starting point, this course aims at a systematic and historically contextualized analysis of a broad range of Jewish texts that are commonly classified as "mystical". (All primary texts are read in translation.) At the same time, we explore such overarching themes as: the interplay of esoteric exegesis of the Bible and visionary experiences; the place of traditional Jewish law (halakhah) within mystical thought and practice; the role of gender, sexuality, and the body in Jewish mystical speculation and prayer; the relationship between mysticism and messianism; Ashkenazic and Sephardic traditions and their mutual impact on Jewish mysticism; the "absence of women" from Jewish mystical movements; esoteric traditions of an elite vs. mysticism as a communal endeavor; and the tension between innovation and (the claim to) tradition in the history of Jewish mysticism.

**L75 JIMES 445 Topics in Islam**

This course aims to study political thought and practice in Islamic history through a close reading of a selection of primary sources in translation (and in their original language, if language proficiency is satisfactory). Particular attention will be given to the historical contexts in which thoughts are espoused and texts written. We plan to examine the development of political concepts and themes as articulated in diverse literary genres (e.g., legal, theological, political) from the eighth through the 13th centuries. We hope to engage various theoretical models to analyze the relationship between politics and religion and to tease out the role of power in determining sociopolitical relations, distinctions, and structures. We hope to have a better grasp on the historicity of ideas presented in timeless categories in political discourse. Advanced knowledge of Arabic preferred but not required.

**L75 JIMES 4460 The Israeli-Palestinian Conflict Through Cinema**

The Israeli-Palestinian "conflict" is often considered the longest-running national conflict in the world. The "dispute," which started in the early 20th century, attracts much attention more than a hundred year later, stirring intense passions and generating controversial headlines. This course explores the Israeli-Palestinian conflict through Palestinian and Israeli cinema. We examine the ways in which cinema depicts the conflict in the Middle East, starting from the British Mandate to the present day. Adopting a relational history reading, the course examines the "treatment," the influences, and the representation of major historical and political events in the region - Israeli independence/Palestinian Nakba (1948), the Six-Day War/Arab Naksa (1967), the Yom Kippur war (1973), the Lebanon War I (1982), the Palestinian uprising Intifada I (1987), the Oslo accords (1993), Intifada II (2000) - in both Israeli and Palestinian films. The course examines the social and historical processes which shape Palestinian and Israeli cinematic narratives, self-representation, the representation of the Other, the relationship to the land, diaspora, national narratives, collective memory, and trauma. This course offers a dialectical cinematic and historic journey from national films to transnational modernist and experimental films, from the collective to the individual, and from hope to despair. **L75 JIMES 475 Screening the Holocaust**

This course surveys the history of Holocaust representation on film, examining a wide range of documentary and fictional works from 1945 to the present day. Discussions will consider a number of key questions, including: What challenges does the Holocaust pose to cinematic representation, and how have filmmakers grappled with

them? How have directors worked within and against notions of the Holocaust as unrepresentable, and how have they confronted the challenge of its association with a limited set of highly iconic images? What are the more general ethical and political dimensions of representing the Holocaust onscreen -- its victims as well as its perpetrators, the systematic genocidal violence that characterized it, and the sheer absence of so many dead? We will also probe the changing significance of cinematic representation of the Holocaust, exploring the medium's increasingly memorial function for audiences ever further removed from the historical moment of its occurrence. Screenings may include *The Last Stage*; *Distant Journey*; *Night and Fog*; *Judgment at Nuremberg*; *Shoah*; *Europa, Europa*; *Schindler's List*; *Train of Life*; *The Specialist*; *Photographer*; *A Film Unfinished*. Critical readings by figures such as Giorgio Agamben, Jean Amery, Shoshana Felman, Geoffrey Hartman, Marianne Hirsch, Sidra Israhi, Dominick LaCapra, Alison Landsberg, Berel Lang, Michael Rothberg, and James Young. #### **L75 JIMES 4803 Advanced Seminar: Partition: The Making of India and Pakistan**

The division of India and Pakistan at the time of Independence from British colonial rule was a major event that has left its mark on the lives, memories, and politics of contemporary South Asians. Why did British India break apart along apparently religious lines? Was sectarian or "communal" violence inevitable, or endemic in South Asian society? How was Partition - a time of violence, mistrust, dispossession, displacement, and mass migration -- experienced by ordinary people? How is the traumatic memory of this event borne by individual women, children, by families? How does its legacy persist, and how is it being remembered, and reckoned with, today? In this course, we will not find final answers to these difficult questions, but we will learn how to explore them responsibly, using literature, film, and other archival sources. This course provides students with a forum to discuss and explore topics of their own choosing.

#### **L75 JIMES 4872 Colonial Cities and the Making of Modernity**

Massive urban growth has been a central result of the incorporation of many areas--both central and peripheral--into the global economy in the 19th and 20th centuries. Scholars have long theorized urbanization as a key component of modernity, but they have usually done so by looking at urbanization and modernization from the perspective of the West. This course will investigate the character of cities in the colony and then use these empirical and analytical entry points to examine critically some theories of modernity. The geographical focus of the course will be primarily on cities in the Middle East, North Africa, and South Asia.

**L75 JIMES 49NR Advanced Seminar: Egypt and the Arab Spring: Middle Eastern Revolution in Historical Perspective**

The uprisings of the "Arab Spring" of 2011 captivated global media and observers. The movements brought down established regimes in Tunisia, Libya, Yemen, and Egypt. The focus of this course will be to understand the historical background and primary contemporary issues that have shaped Egypt's Arab Spring, and to examine the huge popular effort to document Egypt's revolution. Each student will design, research, and write a 25-page paper on a topic of his/her choice related to the Arab Spring.

**L75 JIMES 49SC Advanced Seminar: Incredible India?**

From Christopher Columbus' misguided search for a mythical notion of India, to the Incredible India branding campaign launched by the Indian State's Department of Tourism, to the allure of yoga and true love, the notion of "India" has its own history. In this Advanced Seminar we trace the invention of India - as a concept - over time. We'll learn how the fabrication of India has proceeded through the centuries, and how the many meanings of "India" coalesce, nimbly side-stepping any popular or professional narrative of Indian history. Mobilizing an array of interdisciplinary tools, we will plot how the fetishization of "India" has itself become a flexible industry, how the management of Indian exceptionalism drives caste expansion. We'll study how the process renders certain subject positions and hierarchies as neutral and hegemonic while violently discarding others; how "India" is a product collectively manufactured, circulated, and consumed by a range of people around the world; the very real work of translation in bringing "India" into our everyday lives and imaginaries. This course fulfills the History major capstone requirement as an Advanced Seminar.

## Arabic Major

### Program Requirements

- **Total units required:** 24 advanced, in addition to prerequisites

### Prerequisites

- 100- and 200-level Arabic, by course work or by placement exam. (A student who skips the first four semesters of Arabic courses by placement exam must successfully complete Arab 3075 Third-Level Arabic I. Students who complete the third-level language course with a grade of B- or better will receive 6 units of back credit.)
- JIMES 210C Introduction to Islamic Civilization and JIMES 208F Introduction to Jewish Civilization: History and Identity. (Students with substantial prior course work may substitute an additional upper-level course with permission of their advisor and the director of undergraduate studies.)

### Required Courses

- 12 credits in 300- and 400-level language courses
- 6 credits in other 300- and 400-level JIMES courses, distributed as the student wishes
- At least 3 credits in 300- and 400-level courses in a JIMES culture other than that of the selected language tradition
- 3 credits in a departmental capstone course to be taken during the senior year (Students may take this course during their junior year with permission of their advisor and the director of undergraduate studies.)

### Additional Information

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester can earn a maximum of 9 credits subject to review by their advisor and the director of undergraduate studies. Summer programs and transfer courses can be granted as many as 6 credits subject to review by the student's advisor and the director of undergraduate studies. A limit of 9 credits in total can be applied to the major whether the credits are earned via study abroad, summer programs, or transfer credit. For more information about preapproved study abroad programs, please visit the Jewish, Islamic, and Middle Eastern Studies Study Abroad Programs website.

Students must maintain a B average in all courses for the major. A grade of B- or higher must be earned in each language course in order to advance to the next level.

No course taken Pass/Fail can count toward the prerequisites or the major.

A student may request credit for courses taken outside of the department (other than those courses that are cross-listed) by seeking the permission of the director of undergraduate studies and the department chair.

To be eligible to write a senior thesis, a student must maintain a grade point average of 3.65 through the sixth semester. Senior thesis writers should sign up for an appropriate 3-credit course during both the fall and spring semesters. (The 6 credits from these courses may be applied to the primary area of study.)

## Jewish, Islamic, and Middle Eastern Studies Major, Comparative Jewish and Islamic Studies Concentration

### Program Requirements

- **Total units required:** 24 advanced, in addition to prerequisites

Students who wish to major in Jewish, Islamic, and Middle Eastern Studies will select one of two concentrations: **Comparative Jewish and Islamic Studies** or **Modern Middle Eastern Studies**.

#### Required Courses

##### Prerequisites

- 100- and 200-level language (Arabic or Hebrew), by course work or by placement exam. (A student who skips the first four semesters of Arabic courses by placement must successfully complete Arab 3075 Third-Level Arabic I. A student who skips the first four semesters of Hebrew courses by placement exam must successfully complete HBRW 320D Third-Level Modern Hebrew I or HBRW 384 Intro to Biblical Hebrew. Students who complete the third-level language course with a grade of B- or better will receive 6 units of back credit.)
- JIMES 210C Introduction to Islamic Civilization and JIMES 208F Introduction to Jewish Civilization: History and Identity. (Students with substantial prior course work may substitute an additional upper-level course with permission of their advisor and the director of undergraduate studies.)

## Requirements for the Comparative Jewish and Islamic Studies Concentration

- At least 3 credits in 300- and 400-level Jewish studies or Hebrew literature courses
- At least 3 credits in 300- and 400-level Islamic studies or Arabic literature courses
- 15 credits in 300- and 400-level JIMES courses, distributed as the student wishes
- 3 credits in the departmental capstone course to be taken during the senior year. (Students may take this course during their junior year with permission of their advisor and the director of undergraduate studies.)

## Additional Information

## Jewish, Islamic, and Middle Eastern Studies Major, Modern Middle Eastern Studies Concentration

### Program Requirements

- **Total units required:** 24 advanced, in addition to prerequisites

Students who wish to major in Jewish, Islamic, and Middle Eastern Studies will select one of two concentrations: **Comparative Jewish and Islamic Studies** or **Modern Middle Eastern Studies**.

### Required Courses

#### Prerequisites

- 100- and 200-level language (Arabic or Hebrew), by course work or by placement exam. (A student who skips the first four semesters of Arabic courses by placement must successfully complete Arab 3075 Third-Level Arabic I. A student who skips the first four semesters of Hebrew courses by placement exam must successfully complete HBRW 320D Third-Level Modern Hebrew I or HBRW 384 Intro to Biblical Hebrew. Students who complete the third-level language course with a grade of B- or better will receive 6 units of back credit.)
- JIMES 210C Introduction to Islamic Civilization and JIMES 208F Introduction to Jewish Civilization: History and Identity. (Students with substantial prior course work may substitute an additional upper-level course with permission of their advisor and the director of undergraduate studies.)

### Requirements for the Modern Middle Eastern Studies Concentration

- 15 credits in 300- and 400-level JIMES courses, distributed as the student wishes
- 3 to 6 credits in 300- and 400-level courses that are pertinent to the modern Middle East that may be home-based outside of the department (i.e., home-based in Anthropology, History, International and Area Studies, Political Science, Religious Studies, and so on)
- At least 3 credits in 300- and 400-level premodern Middle Eastern studies courses
- 3 credits in the departmental capstone course to be taken during the senior year. (Students may take this course during their junior year with permission of their advisor and the director of undergraduate studies.)

## Additional Information

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester can earn a maximum of 9 credits subject to review by their advisor and the director of undergraduate studies. Summer programs and transfer courses can be granted as many as 6 credits subject to review by the student's advisor and the director of undergraduate studies. ## Arabic Minor

### Program Requirements

- **Total units required:** 18, in addition to prerequisites

The minor in Arabic requires a minimum of 9 units at the 300 level or above and a minimum of 18 total units. The goal of the minor is language proficiency at the 200 level or above. Students placing into Arab 208D Intermediate Arabic II or above must complete two consecutive semesters of language instruction at Washington University to fulfill the language requirement.

### Required Courses

#### Language Prerequisites

- Arab 107D Beginning Arabic I and Arab 108D Beginning Arabic II, by course work or by placement exam

## Language Requirements

- Arab 207D Intermediate Arabic I and Arab 208D Intermediate Arabic II, by course work *or*
- If placed into Arab 208D Intermediate Arabic II or above, two consecutive semesters of language instruction at Washington University

## Required Foundational Course

Choose one of the following courses:

- JIMES 210C Introduction to Islamic Civilization
- JIMES 208F Introduction to Jewish Civilization: History and Identity

## Elective Courses

- 9 credits of 300- or 400-level L49 Arabic or L75 JIMES courses, distributed as the student wishes

## Additional Information

### Pass/Fail

No course taken Pass/Fail can count toward the minor.

### Grades

Grades of B- or higher must be earned in each language course in order to advance to the next level.

### Study Abroad

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester, in summer programs, and in transfer courses can earn a maximum of 3 units subject to review by their advisor and the director of undergraduate study.

### Back Credit

Any earned back credit does not count toward the total number of units for the Language Requirement. All students are required to take at least one year of language instruction at Washington University.

## Hebrew Minor

### Program Requirements

- **Total units required:** 18 units, in addition to prerequisites

The minor in Hebrew requires a minimum of 9 units at the 300 level or above and a minimum of 18 total units. The goal of the minor is language proficiency at the 200 level or above. Students placing into HBRW 2012 Second-Year Modern Hebrew II or above must complete two consecutive semesters of language instruction at Washington University to fulfill the language requirement.

## Required Courses

### Language Prerequisites

- HBRW 1011 First-Year Modern Hebrew I and HBRW 1012 First-Year Modern Hebrew II, by course work or by placement

### Language Requirements

- HBRW 2011 Second-Year Modern Hebrew I and HBRW 2012 Second-Year Modern Hebrew II, by course work *or*
- If placed into HBRW 2012 Second-Year Modern Hebrew II or above, two consecutive semesters of language instruction at Washington University

## Required Foundational Course

Choose one of the following courses:

- JIMES 210C Introduction to Islamic Civilization
- JIMES 208F Introduction to Jewish Civilization: History and Identity

## Elective Courses

- 9 credits of 300- or 400-level L74 Hebrew or L75 JIMES courses, distributed as the student wishes

## Additional Information

### Pass/Fail

No course taken pass/fail can count toward the minor.

### Grades

A grade of B- or higher must be earned in each language course in order to advance to the next level.

### Study Abroad

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester, in summer programs, and in transfer courses can earn a maximum of 3 units subject to review by their advisor and the director of undergraduate studies.

### Back Credit

Any earned back credit does not count toward the total number of units for the Language Requirement. All students are required to take at least one year of language instruction at Washington University.

# Jewish, Islamic, and Middle Eastern Studies Minor, Comparative Jewish and Islamic Studies Concentration

## Program Requirements

- **Total units required:** 18

The minor in Jewish, Islamic, and Middle Eastern studies requires a minimum of 12 units at the 300 level or above and a minimum of 18 total units. Students who wish to minor in Jewish, Islamic, and Middle Eastern studies will select one of two concentrations: the **Comparative Jewish and Islamic Studies Concentration** or the **Middle Eastern Studies Concentration**.

## Required Course for the Comparative Jewish and Islamic Studies Concentration

Choose one of the following courses:

- JIMES 210C Introduction to Islamic Civilization
- JIMES 208F Introduction to Jewish Civilization: History and Identity

## Elective Courses

- 6 credits in 300- or 400-level Islamic studies or Arabic language and literature courses (under L49 Arabic or L75 JIMES)
- 6 credits in 300- or 400-level Jewish studies or Hebrew language and literature courses (under L74 Hebrew or L75 JIMES)
- 3 credits of JIMES courses at any level (L75 JIMES courses only, which does not include language courses)

## Additional Information

### Study Abroad

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester, in summer programs, and in transfer courses can earn a maximum of 3 units subject to review by their advisor and the director of undergraduate studies.

### Grades

Grades of B- or higher must be earned in each language course in order to advance to the next level.

## Pass/Fail

No course taken pass/fail can count toward the minor.

## Courses Taught Outside of JIMES

A student may request credit for courses taken outside of the department (other than those that are cross-listed) by seeking the permission of the director of undergraduate studies and the department chair.

# Jewish, Islamic, and Middle Eastern Studies Minor, Modern Middle Eastern Studies Concentration

## Program Requirements

- **Total units required:** 18

The minor in Jewish, Islamic, and Middle Eastern studies requires a minimum of 12 units at the 300 level or above and a minimum of 18 total units. Students who wish to minor in Jewish, Islamic, and Middle Eastern studies will select one of two concentrations: the **Comparative Jewish and Islamic Studies Concentration** or the **Middle Eastern Studies Concentration**.

## Required Course for the Middle Eastern Studies Concentration

Choose one of the following courses:

- JIMES 210C Introduction to Islamic Civilization
- JIMES 208F Introduction to Jewish Civilization: History and Identity

## Elective Courses

- 3 credits at any level in Middle Eastern Studies courses (L75 JIMES)
- 12 credits of 300- or 400-level Middle Eastern Studies courses (L75 JIMES)

## Additional Information

### Study Abroad

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester, in summer programs, and in transfer courses can earn a maximum of 3 units subject to review by their advisor and the director of undergraduate studies.

### Grades

Grades of B- or higher must be earned in each language course in order to advance to the next level.

### Pass/Fail

No course taken pass/fail can count toward the minor.

# South Asian Studies (Hindi) Minor

## Program Requirements

- **Total units required:** 18 units, in addition to prerequisites

The minor in South Asian Studies requires a minimum of 9 units at the 300 level or above and a minimum of 18 total units. The goal of the minor is language proficiency at the 200 level or above in either the Hindi or Urdu language. Students placing into Hindi 218A Intermediate Hindi II, Hindi 232A Intermediate Urdu II, or above must complete two consecutive semesters of language instruction at Washington University to fulfill the language requirement.

## Required Courses

### Language Prerequisites

- Hindi Language: Hindi 111D Beginning Hindi I and Hindi 112D Beginning Hindi II, by course work or by placement *or*
- Urdu Language: Hindi 130 Beginning Urdu and Hindi 131 Beginning Urdu II, by course work or by placement

## Language Requirements

Students should choose one primary language for the minor to fulfill the language requirement.

- **Hindi Language:**
  - Hindi 218 Intermediate Hindi I and Hindi 218A Intermediate Hindi II, by course work *or*
  - Hindi 219 Hindi for Heritage Students and one additional semester of Hindi language instruction *or*
  - If placed into Hindi 218A Intermediate Hindi II or above, two consecutive semesters of language instruction at Washington University
- **Urdu Language:**
  - Hindi 232 Intermediate Urdu and Hindi 232A Intermediate Urdu II, by course work *or*
  - If placed into Hindi 232A Intermediate Urdu II or above, two consecutive semesters of language instruction at Washington University

## Required Foundational Course

Choose one of the following courses:

- JIMES 210C Introduction to Islamic Civilization
- JIMES 3171 Religion and Culture in South and Southeast Asia

## Elective Courses

- 9 credits of 300- or 400-level L73 Hindi or L75 JIMES courses, distributed as the student wishes

## Additional Information

### Pass/Fail

No course taken pass/fail can count toward the minor.

### Grades

A grade of B- or higher must be earned in each language course in order to advance to the next level.

### Study Abroad

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester, in summer programs, and in transfer courses can earn a maximum of 3 units subject to review by their advisor and the director of undergraduate studies.

### Back Credit

Any earned back credit does not count toward the total number of units for the Language Requirement. All students are required to take at least one year of language instruction at Washington University.

## Latin American Studies

Latin American Studies (LAS) is a gateway to the region and its cultures, politics, and history. The major in LAS can be studied on its own, providing knowledge about a region valuable for employers across different fields and industries. Focusing on Latin America allows students to engage with one of the most fascinating historical trajectories in the world; to explore diverse cultures where the traditional and the modern are always negotiating; and to participate in vibrant business, intellectual, and political scenes. Latin America is a region at the forefront of policy reform, embedded in the complex networks of global economics, development, social engagement, and cultural expression. Because of the region's importance, the LAS major provides key skills for today's jobs.

A major or minor in LAS is also an excellent complement to any other major program. Latin America is the location of major U.S. trade partners, and Latin American immigrants constitute the largest segment of market growth in the United States, including in the major economic markets of Boston, California, New York, Chicago, Texas, and Florida, which makes the LAS major a great companion to a business degree. In this world, business majors and MBA graduates with an LAS background have a competitive advantage in the world market as large corporations seek executives with a better understanding of the region's complex social, cultural, and economic issues.

Pre-medical students and public health majors will find value in the fact that the growing Latino population and the diverse Latin American peoples are two major topics in the health care field. Majors in global studies, political science, economics, and other social sciences can complete their studies by becoming experts in one of the most economically and politically complex regions in the world; Latin America is a true policy laboratory. Scientists of all disciplines work in the region's spectacular biodiversity. LAS students can attend study abroad programs across the region, earn credit, and explore any field of study.

Latin America offers an increasing number of study abroad and fellowship opportunities. At Washington University, we have in-house programs in Chile, Mexico, and Ecuador, with other countries forthcoming. Some of our students apply to other programs and fellowships with environmental, political, and social organizations in the region. NGOs and institutions such as Fulbright, Comexus, the Ford Foundation, Human Rights Watch, and Greenpeace have a strong presence in Latin America, and students with a Latin American background have a wide array of fellowship and internship opportunities available to them.

Given these reasons and more, Washington University students are more encouraged to look into LAS with each passing day. In the job market, in the academic field, and in the world at large, Latin America is the way to go! LAS alumni have gone on to work in the coffee industry, at the Center for International Policy, and at other nonprofit think tanks. They have also pursued graduate degrees in such fields as international relations and public policy.

### L45 LatAm 165D Latin America: Nation, Ethnicity and Social Conflict

This class is an interdisciplinary introduction to the academic study of modern and contemporary Latin America. The course focuses on main issues in Latin American politics, history and culture, both in the continent at large and in the specific regions and sub-regions within it. The class will particularly explore topics such as nation creation, national identity, modes of citizenry, the role of race, ethnicity, gender and class in the region's historical development, as well as social and political conflicts, which have defined the region over the centuries. This course is suggested before taking any other upper-level courses on Latin America or going abroad to other countries, and required for all Latin American Studies majors and minors. Through the course, students gain basic bibliographic knowledge and experience with research tools for a comparative study of Latin American politics society and culture. Prereq. None.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: IS EN: H

---

### L45 LatAm 170 First-Year Seminar: Bodies in Brazil: Race, Representation and Nation

This course will examine the cultural expressions of the body in Brazil from an interdisciplinary perspective. We will examine how ideas about bodies -- both individual bodies and the "body of the nation" -- have mattered in Brazil's history and been expressed through art, literature, and film. We will also analyze how the body features in cultural forms, from Carnival to capoeira, from the "Globeleza" competition to the sensual politics of Anitta and Pablo Vittar, and from indigenous body decoration to disability arts. Moving from the formation of national identity to contemporary culture, we will explore the multiple ways in which bodies are made to matter in Brazil. Rather than proceed in pure chronological order, this course will move dynamically between the past and the present, between different scales of time and space, and between cultural forms and everyday practices. Our materials span disciplines such as cultural studies, anthropology, sociology, and

history, offering a broad array of angles from which to understand the significance of bodies in Brazil. We will address a wide range of topics, including slavery and national formation, modernist reimaginings of the social body, gender and sexuality, Brazilian Carnival, violence and incarceration, urban space, indigenous peoples, capoeira, hunger, religion, and the political significance of contemporary Brazilian pop stars.

Credit 3 units. A&S: FYS

### L45 LatAm 2118 First-Year Seminar: Angels, Prostitutes and Chicas Modernas: Women in Latin American History

Women have been active players in the construction of Latin American nations. In the last two decades, leading scholars in the field have taken up the challenge of documenting women's participation. This research explosion has produced fruitful results to allow for the development of specialized courses. This course looks at the nation building process through the lens of Latin American women. Students will examine the expectations, responsibilities and limitations women confronted in their varied roles from the Wars of Independence to the social revolutions and dictatorial regimes of the twentieth century. Besides looking at their political and economic lives, students will explore the changing gender roles and relations within marriage and the family, as well as the changing sexual and maternal mores.

### L45 LatAm 2119 First Year Seminar: Race and Ethnicity in Latin America: Myths, Realities and Identities

What does it mean to identify as mestizo, moreno, or mulato? How have Latin American nations dealt with their mixed racial populations and their rich African and indigenous heritages? What does it mean to be black in nations where the official discourse is one of racial hybridity or color blindness? This course examines the history of racial thinking and the experience of race in Latin America. While the focus of the course will be on the complexities of race in Latin America, a place of enormous ethnic and cultural diversity, we will also draw comparisons to the history of race in the U.S.

### L45 LatAm 301L Historical Methods: Latin American History

This is a small-group reading course in which students are introduced to the skills essential to the historian's craft. Emphasis will be on acquiring research skills, learning to read historical works critically, and learning to use primary and secondary sources to make a persuasive and original argument. See Course Listings for current topics. Required for history majors. Preference given to History majors; other interested students welcome.

### L45 LatAm 3021 Music of the African Diaspora

This course explores musical cross-fertilization between the African continent and South America, the Caribbean, and Europe. Beginning with traditional musics from selected regions of the African continent, the course examines the cultural and musical implications of transnational musical flows on peoples of the African diaspora and their multicultural audiences.

**L45 LatAm 304 Survey of Brazilian Cultures: Race, Nation and Society**

This course will introduce students to Brazilian culture from the colonial period to the present through literature, art, music, film and other cultural forms. The course gives a historical overview of Brazilian culture and society, exploring major sociohistorical and artistic moments from the colonial, imperial, and republican periods, and their "legacies" or influences on Brazilian society. Students will learn about the Amerindian, European, and African influences of Brazilian culture through the study of representative texts and cultural practices. The course also illustrates Brazil's place within Latin America and the world. The course will seek to deconstruct and expand preconceived notions of Brazil, such as Lusotropicalism and racial democracy. Classes will combine lectures by the instructor, student presentations, collective debates and cooperative learning, and will entail the use of required bibliography and audiovisual materials. Prereq. None.  
Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: IS EN: H

---

**L45 LatAm 305 Survey of Mexican Cultures**

This course provides an interdisciplinary introduction to the study of Mexico, with a particular focus on the 20th and the 21st century. The class will cover the main historical and cultural processes of Mexico in this period: The Mexican Revolution; the consolidation of a one-party political system; the construction of Mexican national identity and the arrival of neoliberalism. The course also focuses on the main aspects of Mexico's relationship to the United States: the Free Trade Agreement, the history of Mexican migration and the Drug War. From this framework, the course touches upon questions of race (particularly the politics of racial mixture), modernization, construction of social identities and the unique nature of governance in Mexico, due to the single-party regime. It also touches on Mexico's specificities and particularities due to the uniqueness of situation as the southern neighbor of the United States. Prereq. None.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

**L45 LatAm 306 Survey of Southern Cone Cultures: Argentina, Chile, and Uruguay**

This course provides an introduction to the culture and society of the region known as the Southern Cone, encompassing Argentina, Chile, and Uruguay. The course will follow a long-term chronological approach, from the nineteenth century to the present, and will cover a wide spectrum of cultural production: literature, newspapers, music, cinema, television, as well as other examples of popular culture such as soccer. From an interdisciplinary perspective, we will explore how race, class, and gender interact in different historical periods. The class will cover the main historical and cultural processes of these countries: the formation of the Nation-State and the construction of national identities, capitalist modernization, Afro-descendant and Indigenous activism, Populism -with special attention to the case of Peronism in Argentina-, military dictatorships, as well as the contemporary feminist movement. In doing so, the class engages with questions of media, identity, memory, and labor, as they allow us to understand the historical processes of the region.

**L45 LatAm 3092 Indigenous Peoples and Movements in Latin America**

This course focuses on the contemporary lives and political struggles of Indigenous Peoples in Latin America, with specific focus on Ecuador, Peru, and Bolivia. Through course lectures, ethnographic texts, and four in-depth case studies, we explore how the politics of Indigeneity articulate with political and economic processes including (neo)colonialism, global capitalism, state transformation and social movement struggle. Themes include: demands for territory and

autonomy; environmentalism and natural resource exploitation; gender and economic inequality; race, racism and political violence; language and education; and the complexities of building multicultural or "plurinational" democracies.

**L45 LatAm 3093 Anthropology of Modern Latin America**

A survey of current issues in the anthropological study of culture, politics, and change across contemporary Latin American and the Caribbean. Topics include machismo and feminismo, the drug war, race and mestizaje, yuppies and revolutionaries, ethnic movements, pop culture, violence, multinational business, and the cultural politics of U.S.-Latin American relations. Attention will be given to the ways that anthropology is used to understand complex cultural and social processes in a region thoroughly shaped by globalization.

---

**L45 LatAm 3095 The Incas and Their Ancestors: The Archaeology of the Ancient Andes**

From the hyper-arid desert of the Pacific Coast to the high-mountain plateaus of the Andes more than 12,000 feet above sea level to the lush forested Amazonian lowlands, Western South America presents one of the most diverse natural and cultural environments in the world and one of the few places where social complexity first developed. Beginning with the earliest human occupations in the region more than 12,000 years ago, this course examines how domestication, urbanization, the rise of early states, and major technological inventions changed life in the Andes from small village societies to the largest territorial polity of the Americas - the Inca Empire. Students will become familiar with the major debates in the field of Andean archaeology. Together, we will examine archaeological evidence (architecture, art, ceramics, metals, textiles, plant and animal remains, etc.) from context of everyday life (households, food production, craft production) to the rituals and ceremonies (offerings, tombs) that took place in domestic and public spaces. We will also touch on the role of Andean archaeology in the context of national politics and heritage sustainability.

**L45 LatAm 313 Hello, Hello Brazil! Popular Culture, Media, and the Making of a Nation**

Our image of Brazil has been deeply shaped by its cultural production, from Tom Jobim and Vinicius de Moraes' ever-popular "Girl from Ipanema" to the spectacular mega-production of Carnival in Rio and from the Afro-Brazilian martial art of capoeira to the international stardom of pop artists like Anitta. This course is an introduction to popular culture in contemporary Brazil. Students will approach the theme through theoretical works that seek to define popular culture, understanding it as a hybrid form of expression that troubles the line between the "traditional" and the mass-produced. This course will examine how the circulation of sounds and images manifests and shapes Brazilian culture historically and in the present. We will also interrogate the different ways in which culture is produced and

received, how it circulates in symbolic markets, and how it comes to be both consumed by diverse audiences and utilized in often unexpected ways. The course will cover topics such as the Tropicalia movement, Afro-centric Carnival blocos, street art such as graffiti, baile funk, forró, favela protest theater, telenovelas (soap operas), the popularization of samba, soccer and the World Cup, and Carnival. Students will use an interdisciplinary lens to approach popular culture in Brazil through music lyrics, TV and film, cultural performances, and graphic novels. These materials will form the basis of our class discussions and written assignments. The course will be taught in English. Prerequisite: L45 165D, L45 304, or another course on Latin America suggested. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, IS EN: H

---

#### **L45 LatAm 318 Gender, Sexuality and Power in Brazil**

This course examines the nexus of gender, sexuality, and power in Brazil through an interdisciplinary lens. We will aim to understand how varying understandings of gender and sexuality have impacted the development of Brazilian society in history and continue to shape contemporary society and politics. We will pay special attention to the ways in which the intersections of race, gender, sexuality, class, ethnicity, and so on impact people's lived experiences and how heteronormativity and homophobia shape current politics. We will take an intersectional feminist approach to analyze topics such as slavery in colonial Brazil, national aspirations to modernity, authoritarian repression and "moral panics," domestic labor, motherhood, sex tourism, Brazilian feminisms, and LGBTQ+ activism. Scholarly work from various fields of study -- with an emphasis on gender studies, history, and anthropology -- will be supplemented by documentaries, film, podcasts, and other media. This is a Writing Intensive and a Social Contrasts class in the IQ curriculum. Prerequisite: L45 165D, or two courses on Latin American or Women and Gender Studies, or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD, SC, WI Arch: HUM Art: HUM BU: BA, IS

---

#### **L45 LatAm 319 The Body in Brazil: Race, Representation, Ontologies**

This course is an introduction to various ways of understanding, representing, and performing the body in Brazil. Course materials will draw on insights from anthropology, the medical humanities, and science and technology studies in order to approach the body not just as biological material but also in its social, cultural, and spiritual dimensions. We will cover topics such as the importance of race and ethnicity since the time of colonization, sexualized media representations of gendered bodies, how some bodies are cast as disposable or "out of place" in contexts of social inequality, indigenous ways of viewing the body in relation to the natural and spiritual world, the politics of disability and access, and constructions of the "body politic" in the formation of national identity through ideas such as "antropofagia" (cultural cannibalism). Throughout, we will pay particular attention to how race, gender, sexuality, and disability shape the lived experiences of Brazilians. Topics will include the impact of slavery in the construction of the body in Brazil, the role played by race in the construction of discourses of corporality, and the development of beauty stereotypes and practices such as the medical industry of plastic surgery, among others. Students will analyze visual materials, ethnographies, historical texts, and internet sources in dialogue with critical theories from the social sciences and humanities, assessing how the body "matters" in a variety of ways that reflect Brazil's cultural diversity while also starkly highlighting its persistent racialized and gendered social inequities. These materials will form the basis of our class discussions and written assignments. The course will be taught in English. Prerequisite: L45 165D, L45 304, or another course on Latin America suggested.

#### **L45 LatAm 321C Introduction to Colonial Latin America Until 1825**

This course surveys the history of Latin America from the pre-Columbian civilizations through the Iberian exploration and conquest of the Americas until the Wars of Independence (roughly 1400-1815). Stressing the experiences and cultural contributions of Americans, Europeans, and Africans, we consider the following topics through primary written documents, first-hand accounts, and excellent secondary scholarship, as well as through art, music, and architecture: Aztec, Maya, Inca, and Iberian civilizations; models of conquest in comparative perspective (Spanish, Portuguese, and Amerindian); environmental histories; consolidation of colonialism in labor, tributary, and judicial systems; race, ethnicity, slavery, caste, and class; religion and the Catholic Church and Inquisition; sugar and mining industries, trade, and global economies; urban and rural life; the roles of women, gender, and sexuality in the colonies. Geographically, we will cover Mexico, the Andes, and to a lesser extent, Brazil, the Southwest, Cuba, and the Southern Cone. Pre-modern, Latin America.

---

#### **L45 LatAm 325 Cultures of Health in Latin America**

This course is a survey of the cultural and political-economic aspects of health, illness, and embodied difference in Latin America. We will approach these themes from an interdisciplinary perspective with an emphasis on anthropology and history, exploring how local, national, regional, and global factors affect health and healthcare and how people experience and respond to them. Topics will include interactions between traditional healing practices and biomedicine; the lasting impacts of eugenic sciences on contemporary ideas about race and disability; the unequal impacts of epidemic disease; Indigenous cosmologies and healing systems; the politics of access to healthcare; the cultural and political specificities of reproductive health; and the intersections of race, gender, ethnicity, class, and bodily capacities in the pursuit of well-being. This course is designed for students of all levels interested in health and/or Latin American cultures. It will be taught in English.

---

**L45 LatAm 326B Latin American Politics**

This course is an introduction to the politics in Latin America, focusing on the trend toward the establishment of democracy. We examine the impact of political culture, economic development, and the legacy of authoritarian regimes on contemporary politics. The course also reviews many of the most pressing challenges confronting governments Latin American governments: the role of the military in politics, the reform of political institutions, threats from radical guerrillas and drug traffickers, debt and economic restructuring, and relations with the United States. Country studies focus on Argentina, Brazil, Chile, Peru, Mexico, and Nicaragua. Prerequisites: 100-level introductory course in Political Science or its equivalent in History or IAS.

---

**L45 LatAm 327 Humans and Others in Latin America: Natures, Cultures, Environments**

What does it mean to inhabit the world with other beings? How are we to cultivate life -- both human and nonhuman -- in toxic environments? What does it mean to be human, and what would it mean to decenter humanity? This course addresses these questions through an exploration of "more-than-human" worlds in Latin America. Students will examine a variety of Latin American thought and practices through the interdisciplinary lens of environmental humanities and social sciences, unsettling presumed boundaries between human and nonhuman, real and imaginary, native and culture. We will engage primarily with ethnographic and other scholarly texts, which will be supplemented by short works of fiction, documentary film, podcasts, and works of art. In the first part of this course, students will be challenged to think about what defines the limits of the human and engage with the concept of "more-than-human" worlds. We will then examine the dark side of such worlds, namely, the ways in which extractive capitalism and environmental destruction demonstrate the permeability of bodies and comprise a kind of "slow violence" against the most vulnerable communities. In the next unit, students will consider Black and Indigenous ecological knowledge and these communities' struggles to care for their lifeways and the environments that sustain them. In our final section, we will explore multispecies entanglements through Indigenous cosmologies and the nexus of science, history, and art. Students will complete several assignments throughout the semester that have been designed to make them think imaginatively and critically about the course themes, including weekly reading responses and in-class discussion facilitation. The final assignment for this course is a creative independent research project where students will synthesize what they learned over the course of the semester and extend it through independent research. Prerequisite: L45 165D or permission of instructor.

---

**L45 LatAm 331 Hispanic Art/Arte Hispano**

This course focuses on the most important movements, artistic expressions and its representatives of the art history of Latin America and Spain. From the Pre-Columbian art of the Mayas, Aztecs and Incas, to the syncretism of Post-colonial Latin American art, the Mexican Muralism and the self-reconstruction portraits of Mexican artist Frida Kahlo to the Chicano Art in the U.S.A. From the Medieval paintings of religious Spain, to the criticism of the Spanish nobility by Diego Velazquez, the Spanish Civil War of "Guernica" by Pablo Picasso, to the Surrealism and the self-reconstruction portraits of Mexican artist Salvador Dalí and Antonio Gaudi. The students will visit the St. Louis and the Kemper Art Museums. Prereq: Span 303 or 308E. In Spanish.

**L45 LatAm 3351 The Ancient Maya: Archaeology and History**

This course focuses on the ancient Maya civilization because there are many exciting new breakthroughs in the study of the Maya. The Olmec civilization and the civilization of Teotihuacan in the Valley of Mexico will be considered as they related to the rise and development of the Maya civilization. The ancient Maya were the only Pre-Columbian civilization to leave us a written record that we can use to understand their politics, religion, and history. This course is about Maya ancient history and Maya glyphic texts, combined with the images of Maya life from their many forms of art. The combination of glyphic texts, art, and archaeology now can provide a uniquely detailed reconstruction of ancient history in a New World civilization.

Same as L48 Anthro 3351

---

**L45 LatAm 3354 Ancient Mesoamerica**

Mesoamerica encompasses the Pre-Columbian complex societies of Mexico and upper Central America, including Guatemala, Belize, and parts of Honduras and El Salvador. It was an agrarian world of great and enduring cities, far-flung trade networks, transcendent religions, kingdoms and empires. This survey lecture course begins with the pioneering hunters and gatherers, reviews the establishment of farming communities and the first Olmec Formative states, the flowering of highland Mexican Classic Period Teotihuacan and other great cities like Tajin in Veracruz, the dynasties of the lowland Maya and summarizes with the Aztec Empire and the period of the Spanish Conquest. The course touches on the many and diverse other cultures that contributed to this vibrant world.

Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: IS EN: H

---

**L45 LatAm 356 Andean History: Culture and Politics**

Since pre-Columbian times, the central Andean mountain system, combining highlands, coastal and jungle areas, has been the locus of multiethnic polities. Within this highly variegated geographical and cultural-historical space, emerged the Inca Empire, the Viceroyalty of Peru - Spain's core South American colony, and the central Andean republics of Ecuador, Peru, and Bolivia. Taking a chronological and thematic approach, this course will examine pre-Columbian Andean

societies, Inca rule, Andean transformations under Spanish colonialism, post-independence nation-state formation, state-Indian relations, reform and revolutionary movements, and neoliberal policies and the rise of new social movements and ethnic politics. This course focuses primarily on the development of popular and elite political cultures, and the nature and complexity of local, regional, and national power relations.

---

#### **L45 LatAm 381 Mexican Visual Culture**

This course will explore the ways in which different aspects of visual culture were used to construct national, regional, political, social and cultural identities in Mexico. The omnipresence of the visual in the everyday life of Mexicans -including state-sponsored muralism, cinema, photography, graphic press, wide-circulating comic books and nationalist architecture- allows for the study of different ways in which citizens become embedded both in official national projects and in projects of political dissidence. The class will thus use the Mexico in the 20th and 21st centuries to introduce students to the study of the visual as a social practice, through theoretical discussions that will run parallel to the study of different visual manifestations. The course will discuss the changing social and political role of art, the influence that Mexican visual culture exerts in other parts of the world and the way in which visual culture allows Mexicans to think about their identity.

#### **L45 LatAm 3824 Film and Revolution in Latin America**

This class is a Writing Intensive course focused on the study of the way in which four landmark Latin American revolutions (The Independence Wars, The Mexican Revolution, The Cuban Revolution and The Bolivarian Revolution) are represented in cinema. Each one of these revolutions will constitute a unit of study, and students will be expected to work with historical texts, films and works of film theory and criticism for each one of them. The course will engage in subjects such as the difference between fiction and nonfiction films when representing history; the politics that underlie specific representations; the way in which cinema questions and revises ideas developed by historians; and the uses of film in creating popular views of history in Latin America. Students will develop a research project comparing two revolutionary processes over the semester. Prereq. L45 165D (Latin America: Nation, Ethnicity and Social Conflict) for LAS majors. Otherwise none.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: IS EN: H

---

#### **L45 LatAm 3826 Contemporary Latin American Cinema: Market Economy, Social Injustice, New Technologies**

This class studies the relationship between cinema and society in Latin America between 1988 and the present. Latin American cinema in this period has gone to a period of deep crisis to the consolidation of industries and production with significant global recognition and impact. In this, cinema has strong correlations with neoliberalism, the political doctrine tied to free-market reform, democratization and privatization, among other ideas. The class will be based on the study and discussion of key films of the period to develop two themes. First, we will study the way in which cinema has become a cultural practice central to the discussion of the effects of neoliberalism in the region, as well as the opposition to neoliberalism. Topics in this regard will include: the social impact of free market reforms, growing economic and social inequality, the emergence of working class, Black and indigenous communities, the rise and fall of the New Left, the creation of new elites and other related themes. Second, we will study the way in which films are made and distributed and the changes on film production over the past decades. Topics will include the privatization of production and exhibition, the role of home video and streaming, the importance of film festivals and the move from national to translational scenes of production. Prereq: L45 165D or L53 220 or other coursework in Latin American Studies, or Film and Media Studies, desirable but not required. Students without this background are encouraged to contact the instructor.

#### **L45 LatAm 4107 Latin America and the Rise of the Global South**

The rise of the global south - and the reordering of global geopolitics, economics and cultural imaginaries - is characterized by progressive change and intense conflict. Economic growth coincides with the impacts of global warming, the assault on natural resources, the rise of new consumers and the entrenchment of deep inequalities. We also see the emergence of cultural and political formations that range from the horrific to the inspiring. Latin America is a central node of the new global south. Here history takes unpredictable turns in the face of declining U.S. hegemony, the economic growth of Brazil, legacies of militarism and political violence, a feverish attack on nature, resurgent economic nationalism, and defiant "anti-globalization" movements. Through close reading of contemporary ethnographies of Latin America we explore emergent cultural and political-economic processes in the region, we consider south-south articulations (theoretical, cultural, political-economic) between Latin America, China, Africa, and India, and we reflect on the changing role, meaning, and relationships of the United States in the region.

#### **L45 LatAm 4110 The Black South Atlantic**

Since the transatlantic slave trade and the establishment of European colonial empires, Latin America and the African continent have remained culturally and geopolitically enmeshed. This course will therefore serve as an interdisciplinary expansion southward of the "Black Atlantic," a term made popular by black studies scholar Paul Gilroy. Our focus on the South Atlantic will be to reorient the debate toward black intellectual, cultural, and activist exchange between Africa and Latin America across history, politics, and cultural production.

---

**L45 LatAm 4201 International Relations of Latin America**

This course examines Latin American foreign relations in the world from the 1820s to the present with a primary emphasis on the period since 1945. Focusing on inter-state and transnational relations, it seeks to historically contextualize and analyze long term patterns and trends between Latin American states and between Latin America and the United States, Europe, and the global South. Given Latin America's shared experience with imperialism and more recently with neo-imperialism, special attention will be paid to the ways Latin America has sought to manage and/or resist foreign domination, especially U.S. hegemonic pretensions. To this end it will analyze patterns of inter-American conflict and cooperation. When, why, and under what conditions Latin America articulated an independent foreign policy, forged anti-imperialist blocs, embraced U.S. sponsored diplomatic efforts and military alliances, and pursued Latin American unity and solidarity will be closely examined. To better understand the continuities, discontinuities, contradictions, and complexities of Latin American foreign policy, this course will also assess the influence of changing regional and national political cultures from both a theoretical and a historical perspective. In doing so, it explores how elite culture, the balance of domestic social forces, ideological and economic development, and shared cultural identities and meanings informed national political cultures and how these in turn shaped Latin American foreign policies.

Same as L97 GS 4201

---

**L45 LatAm 4204 International Relations of Latin America (WI)**

How should we understand Latin American international relations since the early republican era? Standard Western-centric IR studies emphasize Latin America's marginal position in the world system and its historical subordination to either European and/or U.S. hegemony. This course challenges this one-sided approach and reductionist characterization. Adopting a global historical perspective, one that privileges a Latin American-centric view, this course will examine the ways Latin America generated its own ideas, articulated its own concerns, and acted in its own interests in international affairs. Special attention will be paid to how Latin America sought to resist foreign domination and/or hegemony and maintain its relative autonomy. It will also analyze when, why, and under what conditions Latin America forged anti-imperialist blocs, pursued regional integration, and engaged in transnational solidarity. To provide a more nuanced understanding of Latin American international relations, this course will historically contextualize and analyze the influence of changes in the international state system, national and sub-national political cultures, the balance of domestic forces, and non-state actors.

**L45 LatAm 4231 Contemporary Issues in Latin America**

How do the institutional designs of contemporary democratic governments help us understand the nature and quality of representation? We will concentrate on variations in the powers granted presidents by constitutions as well as the institutional determinants of whether executives are likely to find support for their policies in the legislature. In addition, we will explore how incentives established by electoral laws influence the priorities of members of congress. Given all these variations in democratic institutional design, can voters go to the polls with the confidence that politicians will implement the economic policies for which their parties have long stood or which they promised in their campaigns?

**L45 LatAm 4235 Blackness in Brazil**

Brazil is the country with the largest population of people of African descent outside of the African continent. However, with its history of race mixture under colonialism and slavery, many have imagined Brazil as a racial paradise such that race minimally influences one's social, political, or economic quality of life. The main focus of this course will be to understand from an interdisciplinary approach, first, the historical and sociocultural conditions of the African diaspora in Brazil. Second, we will focus on how national ideologies of racial mixture employ a rhetoric of inclusion that incorporates selective aspects of black culture into Brazilian national identity while excluding black people from the protections and pleasures of full citizenship. Beginning with the experiences of enslaved Africans, we will engage how Afro-Brazilians have developed ideas and spaces of freedom and belonging through social movements, religion, the arts, and resistance well into the black consciousness movements of the late twentieth and twenty-first centuries. In the course, we will collaboratively read, view, and listen to a variety of primary and secondary sources in order to analyze and write about blackness and the lives of black people in Brazil across history, intersecting, most predominantly, with the social structures of gender, sexuality, class, and religion.

**L45 LatAm 4515 Migration and Health**

This course explores the complex relationship between migration and health, with a focus on immigrant health in the United States. Topics include the immigrant health paradox, the impact of immigration enforcement on health and health behavior, access to health care, the health effects of migration on those left behind, and refugee health. Throughout the course, students will pay particular attention to the diverse mechanisms through which immigration and immigration status affect health. In addition to sociology, students will draw on scholarship from the fields of anthropology, demography, medicine, public health, and public policy. Prerequisite: successful completion of an introductory Sociology course or consent of instructor. Graduate students should enroll in the 500-level offering.

---

**L45 LatAm 4517 Anthropology and Development**

What is 'development'? Economic progress for all? A slow and gradual 'improvement' in the human condition? Helping people with 'projects'? Westernization? Modernization? The sorting out of bodies that are useful and can be put to work from those less useful bodies that must be contained, imprisoned, or killed? The militarized accumulation of capital? The commodification of labor? The exhaustion of nature? In this advanced seminar we will consider how anthropologists - as writers, analysts, and theorists - have engaged the theories, meanings, practices, and consequences of (sometimes externally directed) economic and political change. We focus on issues of the contemporary moment: oil; urban poverty and inequality (sex work, migration, water, debt, and cash transfer programs); and cultures of militarism. The course is designed to provide a graduate-level introduction to theory and ethnography based on intensive reading, discussion, critique, and writing, with revision. It is open to advanced undergraduates and fulfills writing-intensive (WI) requirements, as well as capstone requirements for some majors.

**L45 LatAm 457 Gender and Modernity in Latin America**

The purpose of this course is to introduce students to the particular forms modernity assumes in Latin American countries and to the ways in which national cultures, identity politics, and gender issues interweave during the 20th-century. The course will discuss three particular articulation of this topic: 1) Gender and the national question in Argentina: Eva Peron; 2) Gender and Visual Arts: Frida Kahlo; and 3) Gender and Ethnicity: Rigoberta Menchu. Through these iconic figures students will be introduced to the specific features that characterized three very different but representative cultural scenarios in Latin America. In each case, the context for the emergence of these highly influential public figures will be studied from historical, social and cultural perspectives. In order to explore the cultural and political significance of Eva Peron, Frida Kahlo and Rigoberta Menchu, the course will utilize literary texts (speeches, letters, diaries, etc.), visual materials (photography, films, and paintings) and critical bibliography. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L45 LatAm 460 Postmodern Narratives in Latin America**

Credit 3 units. A&S IQ: HUM EN: H

---

**L45 LatAm 461 Latin-American Cultural Studies: Critical and Theoretical Approaches**

The goal of the course is to provide students with critical and theoretical tools that could be used for the analysis of Latin American cultural history from a transdisciplinary perspective, from colonial times to the present. Some of the concepts to be discussed in class are: colonialism and coloniality, national culture, dependency theory, cultural antropofagia, lettered city, miscegenation, heterogeneity, hybridity, transculturation, peripheral modernity, media and mediation, postmodernity, postcoloniality, and collective memory. Credit 3 units. A&S IQ: HUM EN: H

---

**L45 LatAm 4611 Latin American Populism and Neo-Populism**

Over the past 100 years populism, in its diverse forms, has dominated Latin American politics. This course examines case studies of classical populism (Aprismo, Cardenismo, Peronismo, Varguismo, etc.) and neopopulism (Fujimorismo, Chavismo, Moralesismo, neo-Peronismo). In doing so, it explores new theories of populism and analyzes populist discourses, leadership styles, gender and racial politics, mobilizational tactics, transnational networks, and foreign policies. Same as L97 GS 4611  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L45 LatAm 462 Latin America and the West**

From the perspective of postcolonial theory, the course will cover different aspects related to Latin America's cultural history, from the Discovery to the present. Some of the issues to be discussed in class are: the colonial encounter; Baroque culture and the emergence of Creole societies in the "New World," the connections between Enlightenment and nationalism, as well as the interweaving of "coloniality" and modernity. Prerequisite: Survey of Latin American Culture or an advanced level course on Latin America.  
Credit 3 units. A&S IQ: HUM EN: H

---

**L45 LatAm 4622 Labor and Labor Movements in Global History**

This course examines the connections between work, types of workers, workers' movements, labor ideologies, and labor politics from a global historical perspective. It analyzes working-class formation, state-labor relations, patterns of racialized and gendered work, and transnational

and transcontinental labor activism in the context of global capitalism. Special attention will be given to experiments in workers' control, workers' responses to precarity, and the emergence of platform and digital workers as part of the global working class.

---

**L45 LatAm 463 Seminar on Urban Cultures in Latin America**

The course will focus on the key role urban development and urban cultures have had in Latin America with particular emphasis on contemporary times. The goal of the course is to discuss the connections between the formation and expansion of cities, the definitions of citizenship, and the role of modernity in the development of "high" and "popular" cultures within different historical and geo-cultural contexts. Particular attention will be paid to the issues of race, class and gender. The course, which will utilize an interdisciplinary and comparative approach, will also focus on the phenomena of marginality, cultural resistance, nationalism and consumerism as well as on the role played by the media in contemporary Latin American societies. Some of the cultural expressions to be analyzed in the course are music (rock, pop, rap), sports, film and video. Prerequisite: L97 165C Survey of Latin American Culture  
Credit 3 units. A&S IQ: HUM EN: H

---

**L45 LatAm 4630 Modernity, Culture and the State in Mexico**

This course is an advanced seminar on the process of the cultural, ideological and institutional modernization of Mexico. Drawing on readings from fields such as history, cultural anthropology, political sociology and cultural theory, the course discusses the shaping of various forms of social subjectivity and cultural ideology that sustained the formation and development of the state. The course also engages with the identities and processes that led both to the formation of structures of citizenship and to the contestation of state power. This course is structured chronologically, following the development of three interrelated processes unfolding between 1810 and the present: (1) the creation of state institutions and ideology and their evolution in relationship to events such as the liberal Reforma of the 1850s and the Mexican Revolution; (2) the cultural and social implication of processes of capitalist development, modernization and globalization; and (3) the ways in which Mexico's histories of sociocultural difference led to political and cultural insurgencies and rebellions. This course fulfills the seminar requirement for Latin American Studies majors. Prerequisite: L45 165D, L45 305, any other 300-level course with significant focus on Mexico, or permission of instructor.  
Credit 3 units. A&S IQ: HUM, LCD BU: ETH, IS EN: H

---

**L45 LatAm 4631 The Binational Condition. The Mexico-US Relationship in Mexican History and Culture.**

From the 19th century onwards, the relationship between Mexico and the United States has been defined by intense tensions and contradictions. Closely intertwined by geopolitical engagement and integrations, mutual migration flows, and rich cultural exchange, both countries belong to a binational system with few equivalents around the world, which defines the lives of people living across North America. And yet, few people in the United States have access to a clear and rigorous understanding of the Southern neighbor, often leading to conflict at the political and social levels. This class explores this historically, from the early frictions caused by territory and slavery to the binational conditions of the present. The class emphasizes the Mexican perspective of the relationship, often erased in discussions from the U.S. From this perspective, the course will engage critical moments in the history of the relationships, such as the underground railroad to the South, the Mexican American War, the Guadalupe Hidalgo treaty, and the Cold War. The class will also discuss the ways in which Mexico has influenced the United States culturally, from the impact of Mexican post-Revolutionary art in the New Deal to the rise of film directors like Alfonso Cuarón and Guillermo del Toro. Finally,

the class will lay out the ways in which Mexicans and scholars of Mexican studies think about questions such as regional development, the border, immigration, and the Drug War. Prereq. L45 165D or prior coursework on Global Studies, Latin American Studies or American Studies. The course covers the seminar requirement for majors and minors in Latin American Studies.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, IS EN: H

---

#### **L45 LatAm 4633 Twentieth Century Latin American Revolutions**

Latin America has been described as one of the most "revolutionary" regions of the world in the twentieth century. It experienced four major social revolutions and gave rise to many consequential guerrilla movements. This course uses theories of revolution and a social science historical approach to elucidate the causes, processes, outcomes, and implications of revolutions in Mexico (1910), Bolivia (1952), Cuba (1959), and Nicaragua (1979). It also analyzes late 20th century revolutionary guerrilla movements in El Salvador and Peru. Why peasants, university students, and women formed key social bases of support for revolutionary movements and how revolutions were institutionalized and consolidated will receive special attention. Same as L97 GS 4633

Credit 3 units. A&S IQ: LCD, SSC, SC, SD Arch: SSC Art: SSC EN: S

---

#### **L45 LatAm 464 Nation and Desire in Latin America**

The purpose of this course is to analyze the process of nation formation in Latin America, since the imaginaries of the "Creole nation" to the first half of the 20th century. Class discussion will encompass the study of theories on nation formation and nationalism as well as textual representations of national projects, such as Simon Bolivar' letters and discourses, selections from Facundo, Civilization and Barbarism by Domingo F. Sarmiento, selected texts by Andres Bello, Alfonso Reyes, et al, Ariel, by J. E. Rodo, Pedro Henriquez Urena's *Seis ensayos en busca de nuestra expresion*, Jose Vasconcelos' *La raza cosmica*, Jose Carlos Mariategui, *Siete ensayos de interpretacion de la realidad peruana*, Jose Marti's *Nuestra America* and other essays. Some of the main topics to be discussed are the leading role of Creole elites in the consolidation of national cultures, the marginalization of women as well as indigenous and Afro-Hispanic populations, and the role of nationalism in the shaping of modern societies. Colonialism, Occidentalism, liberalism, positivism, nationalism and modernity are some of the concepts that will be explored both theoretically and in their particular discursive usages. Finally, the concept of nation(alism) will be studied as a political/rhetorical device and as the resulting expression of agency, interest, and desire, in peripheral societies.

Credit 3 units. A&S IQ: HUM BU: IS EN: H

---

#### **L45 LatAm 465 Cities, Race and Development in Latin America**

This course offers a multi-disciplinary approach to the study of the Latin American city: its history, development and inherent economic, social, cultural, ethnic, and political tensions. Lectures, readings, and class debates will explore interactions between the materiality and structure of Latin American modern cities and the social and cultural phenomena related to urban life in multicultural societies. Particular attention will be devoted to the effects of internal/external migration, and to the development of public spaces and sites of memory. Patterns of social segregation, marginalization, inequality, and the like, will be analyzed in order to elaborate on the contemporary challenges of the city in a globalized yet traditional world. In addition to the analysis of living, institutional, and commercial spaces, the course will cover social dynamics that break the discipline of the city through different forms of transgression, including crime, informal housing, and underground movements. The goal of the course is to expose students to historical and social developments as exemplified in a variety of urban environments, and to encourage reflection on issues

of social justice related to the living conditions of rural, disadvantaged, and indigenous populations. The course will be conducted in English. Mandatory readings will be in English. Additional readings in Spanish will be required for those students fluent in the language. Prereq. None. Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: BA, IS EN: H

---

#### **L45 LatAm 4650 Latin American Subcultures**

This course has been planned as an introduction to the interconnections between "high" culture, popular culture, and mass culture, with particular emphasis on the formation of urban subcultures in contemporary Latin America. The topic of subculture and counterculture will be analyzed, taking into consideration the influence of factors of class, race, and gender in the construction of alternative cultural identities. Some of the connections to be studied are between political power and cultural resistance, affect, violence, symbolic value, hegemony and marginality. Distinctions will be made between culture, subcultures, traditions, and lifestyles as well as between multiculturalism and interculturality. While the first part of the course will introduce critical concepts, theories, and methodologies, the second half will focus on specific articulations between cultural practices and the domains of belief, sexuality, violence, and social media, including uses of music, video, and films. Students will prepare a final paper on a Latin American subculture of their choice and analyze it using the critical and theoretical tools discussed in class. Prerequisite: L45 165D. This course fulfills the seminar requirement for Latin American Studies majors and minors.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, IS EN: H

---

#### **L45 LatAm 466 Popular Culture and the Representation of Youth in Latin America**

The objective of this course is to introduce students to different aspects related to the representation of youth in Latin America, particularly through the depiction this sector receives in the realm of popular culture. The course will focus on the relationship between youth and social/political conflict and on the literary and cinematic representation of juvenile sectors in cultural production in different Latin American countries. The roles of music, melodrama and the media will be studied in connection to the construction of subjectivity and collective identity. The course will also analyze the involvement of juvenile sectors in narco-culture, gangs, maras, and the like, as well as the impact of violence, fear, and social inequality in early life. The analysis of films, literary texts, critical studies and cultural practices will be approached through a combination of biopolitical analysis and the analysis of representational strategies utilized in the elaboration of symbolic materials. This course fulfills the seminar requirement for Latin American Studies majors and minors. Prerequisite: LatAm 165D or another Latin American Studies course.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

#### **L45 LatAm 467 Constructing the (Racial) Other: From the Colonial Caste System to U.S. Latinos**

The goal of this course is to introduce students to categories and concepts related to the questions of race and ethnicity in Latin America, from colonial times to the present. The course also covers U.S. Latinos as a population of Latin American descent that presents particular characteristics connected to the issues of migration, identity politics, reterritorialization, and cultural hybridity. Based on the theoretical and critical study of problems related to colonialism, social classification, miscegenation, whiteness, discrimination, and the like, representative literary and visual materials will be discussed to illustrate the connections between race, social roles, domestic/public spaces, work, democracy and modernization. The issue of race will be analyzed in its multiple articulations to the themes of nationalism,

interculturalism, migration, and symbolic representation. This course covers the seminar requirement for Latin American Studies majors. Prerequisite: L45 165D, one other class in Latin American studies, or one class on race studies.

Credit 3 units. A&S IQ: HUM, SC, SD EN: H

---

#### **L45 LatAm 4691 Citizenship in the Hot Seat. Migration and Borders in Latin America**

This course is an introduction to concepts, interpretations, and debates related to different forms of human mobilization across borders, particularly in contemporary Latin America. However, class discussions will expand to other scenarios in order to contextualize the experience and characteristics of migration today. Some of the notions to be analyzed in connection to this topic are freedom of movement, citizenship, inequality, the labor market, borders, territoriality, and national security. Borders will be studied as material constructions (i.e., walls, wire fences, technological surveillance, funnel systems, and strategies of deterrence) and as conceptual/symbolic representations. In addition to migratory movements, other phenomena such as diaspora, exile, and forced displacements will also be introduced as they have developed in Latin America. Cultural and psychological aspects related to migratory experiences -- such as the role of memory and affect, individual and collective trauma, social effects of deportation, stereotyping, the role of race and gender, and so on -- will also be considered, as they constitute integral aspects of migratory studies. The course will be conducted in English as a combination of lectures, student presentations, and collective discussions of assigned readings. Fulfills the seminar requirement for Latin American Studies majors and minors. Prerequisite: L45 165D.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, IS EN: H

---

#### **L45 LatAm 483 Bodily Injuries: Violence, Gender and Representation in Latin America**

The course will focus on the definitions, uses and "languages" of violence in Latin America, particularly during the last decades of the 20th century and the beginning of the 21st century. Students will be introduced to philosophical, ethical and political issues related to the existence of "structural" violence and to the problems connected to the symbolic representation of this phenomenon in literature, fictional/ documentary films, and visual arts. One of the course's objectives will be to problematize the conceptualization of violence and to promote critical thinking about its emergence, significance and effects on local/global societies. Some of the topics to be analyzed are the body in its multiple manifestations (the body politic, the social body, the individual body, the treatment of the corpse, etc.), the narrativization of violence (violence as discourse, documentation and fictional elaborations, violence and the media, violence and ideology, etc.), violence and the city, citizenry and otherness, biopolitics, etc. Finally, violence will be presented in different contexts and associated to different activities (ordinary crime, narco-cultures, maras, political movements, domestic environments) and different situations (e.g. violence in rural areas, violence in the borderlands, violence and migration). In all cases the course will call for a reflection on the interrelations between private/public spheres, gender politics, ideological/aesthetic values, and individual/ institutional levels. The role of memory and emotions will be emphasized as a crucial element for the construction /mobilization of subjectivity and for the elaboration of agendas that challenge the State's monopoly of legitimate violence and propose alternative and often perverse forms of association and mobilization at the margins of institutional configurations.

Credit 3 units. A&S IQ: HUM, LCD EN: H

#### **L45 LatAm 485 Latin American Studies Thesis Preparation**

This is the first course in the 2-semester thesis for Latin Studies thesis writers. Enrollment requires approval of LASP and the undergraduate director.

Credit 3 units.

---

#### **L45 LatAm 486 Latin American Studies Thesis**

This is the second course in the sequence for Latin American Studies thesis writers. Enrollment requires completion of 485 and permission from LASP and the undergraduate director.

Credit 3 units.

---

#### **L45 LatAm 4876 Advanced Seminar: Mexican Agriculture: Land, Politics and Development**

Access to and ownership of land has been a major issue in Mexican history. Land tenure in economic development has been a constant source of tension and debate since the 18th century. Paradoxically, land tenure has been put forth as both the obstacle and the solution to the country's modernization. Given its centrality in the construction of the modern period, this course examines liberalism, agrarian revolts, the revolution, the green revolution and neoliberalism through the lens of land issues. This course will also explore how these have shaped and have been shaped by indigenous peoples and peasants, from land disentanglement to the fight against GMO maize. Students will evaluate agrarian reforms, agricultural modernization programs, concepts of and transformations of natural resources, food production/consumption and social policies.

Same as L22 History 4876

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

---

#### **L45 LatAm 4885 Advanced Seminar: Medicine, Disease and Empire**

This course examines the history of medicine in connection to the politics of colonialism and empire-building, spanning the sixteenth century through the twentieth century. Topics covered include: epidemic disease outbreaks (e.g. smallpox, cholera, malaria); the role of science and medicine in endorsing the "civilizing missions" of empires; tropical climates and tropical diseases as western constructs; tensions between western medicine and indigenous healing practices and beliefs; ideas of race and racism in science and medicine; modern advancements in sanitation and public health and their implementation overseas; and the historical roots of the modern global health movement.

Same as L22 History 4885

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

#### **L45 LatAm 4926 Contemporary Art of the U.S.-Mexico Border and Beyond**

The question of the materiality of borders has attained new urgency with the resurgence of nationalist and anti-globalist movements. Calls for a "big, beautiful wall" on the U.S.-Mexico border are but one striking example of this phenomenon. A wall, a fence, a line, or a zone may focus attention on a narrow space, but it does so at the expense of broader narratives of structural inequality, the lingering violence of colonialism, and the rapid scale of climate change. The simplicity of a barrier is a particularly damaging fiction, one that avoids examinations of the larger forces that divide us. This upper-level and graduate seminar will delve into the history of "border art" as a category -- whether public art, sculpture, installation, new media, or performance -- using the U.S.-Mexico border as an extended in-depth case study. Analysis will not be limited to this region, as the course encourages a comparative approach that places disparate regions into dialogue with each other. In addition, we will also consider the issue of divides and borders locally, within the St. Louis area and its suburbs. Prerequisites: Intro to Western Art or Intro to Modern Art, plus one 300-level course in Art History.

Same as L01 Art-Arch 4926

# Latin American Studies Major

## Program Requirements

- **Total units required:** 30

The major in Latin American Studies (LAS) allows undergraduate students to pursue an in-depth study of Latin America across diverse disciplines, theoretical approaches and historical periods. Through regular courses, seminars and additional activities such as film series, programs abroad, lectures, and the like, students will explore the processes that resulted in the integration of the so-called New World and Western civilizations, from the discovery of America to the present. An essential aspect of this major is the focus on economic, social and political dynamics corresponding to intercultural relations developed between indigenous cultures, Creole societies, and European and North American nations.

This aspect of the major stresses the study of social change, migration, social movements, multiculturalism, inequality, violence and social justice, and it combines regional analysis with critical interdisciplinary approaches. The program of study combines the analysis of urban environments; issues of education, gender, language and ethnicity; and modernization and border studies. It emphasizes transatlantic approaches as well as the study of topics related to autochthonous cultures in their conflictive interaction with Western traditions, systems of domination, values and economic/political projects.

Focusing on Latin America allows students to engage with a fascinating historical trajectory that promotes a multifaceted reflection on colonialism, diversity issues, economic development and international relations. The major has been designed to provide students with a historical background that will be instrumental both in itself, as an exciting field of specialization, and in combination with their pursuit of other fields of inquiry, such as international relations, business, globalization, and the like. Latin America is a region embedded in the complex networks of global economics, development, social engagement and cultural innovation.

The LAS major offers a sound, updated and competitive approach to the study of the region, both in its specificity and in its connections to the world, through the study of Latin America's processes of internationalization and its changing position in global scenarios. This major has also been designed to further contribute to the university mission of improving engagement with race, ethnicity and diversity.

## Credit Requirements

The major in LAS requires students to complete 30 units. At least 24 units must be at the 300 level or higher, and at least 9 units must be at the 400 level. All units must be exclusive to the major and may not be double-counted, unless the College of Arts & Sciences regulations

state otherwise. To count for LAS, courses must have an L45 number or receive authorization from the director of undergraduate studies (DUS) of LAS, who determines which requirements can be fulfilled by each available course. Units must be fulfilled as follows:

- 3 units for the successful completion of LatAm 165D Latin America: Nation, Ethnicity and Social Conflict, offered annually. LatAm 165C can also fulfill this requirement.
- 3 units for the successful completion of an elective introductory course at the 100, 200 or 300 level. Courses that fulfill this requirement must meet the approval of the DUS of LAS. This requirement may also be fulfilled with an approved course abroad or with a 300-level elective approved by the DUS of LAS.
- 3 units in history or politics at the 300 level or higher. Courses may come from relevant offerings in the departments of History or Political Science, the Global Studies program, or study abroad. Courses must be cross-listed with LatAm (L45) or approved by the DUS of LAS.
- 3 units in literary or cultural studies at the 300 level or higher. These units may include courses offered by the departments of Romance Languages and Literatures, Art History, and Archaeology; LAS home-based courses; or study abroad.
- 3 units in anthropology or pre-Columbian cultures at the 300 level or higher. These courses may come from offerings in the departments of Anthropology and Global Studies; LAS home-based courses; or study abroad.
- 9 units of elective credit at the 300 level or higher. At least 3 of these units must be fulfilled at the 400 level; 3 units of elective credit may be fulfilled through an honors thesis (LatAm 486) or a special project (LatAm 425).
- 6 units of a Latin American seminar. Seminar courses are 400-level courses that are taught by core LAS faculty on theoretical issues related to the region. These courses include LatAm 461 Latin-American Cultural Studies: Critical and Theoretical Approaches; LatAm 457 Gender and Modernity in Latin America; LatAm 463 Seminar on Urban Cultures in Latin America; LatAm 464 Nation and Desire in Latin America; and LatAm 483 Bodily Injuries: Violence, Gender and Representation in Latin America.

## Capstone

Prime majors in LAS must fulfill their capstone requirement by writing an honors thesis (if the student meets the College of Arts & Sciences requirements to do so), writing a Latin American research paper (LatAm 425), or completing the two LAS seminar courses with a grade of B+ or better.

## Language Requirement

LAS requires all majors to complete a language requirement in Spanish or Portuguese. The Spanish requirement may be fulfilled by the completion of Span 302, Span 3021 or certification as a native speaker by the DUS of LAS.

The Portuguese requirement may be fulfilled as follows:

- Successful completion of Portug 220 Reading and Conversation II: Intermediate Portuguese with a grade of B- or higher
- Native or heritage speaker status, as determined by the DUS in LAS
- Successful completion of a program abroad, conducted in Portuguese, with a minimum of 3 credit units in the target language

## Additional Information

### Study Abroad

All majors in LAS must complete at least one study abroad experience in Latin America. This requirement may be fulfilled by the completion of a summer or semester program in the region approved by the Office of Overseas Programs.

Students who attend study abroad programs may request credit for appropriate courses at the 300 level, with approval from the DUS. A maximum of 9 units for one semester (or equivalent) of study abroad or of 12 units for more than one semester is allowed. LatAm 165D and 400-level credit requirements must be completed in residence at Washington University.

Students unable to attend a study abroad program may complete an additional 3 units of 300-level elective credit instead.

## Latin American Studies Minor

### Program Requirements

- **Total units required:** 18

The minor in Latin American Studies (LAS) allows undergraduate students pursuing other major programs to complement their existing curriculum with a study of Latin America across diverse disciplines and how the region engages with the Western world — to which it belongs — at large. The minor in LAS is conceived as an option for students across a variety of disciplines in the social sciences, the humanities, the sciences, the pre-med program, and business and engineering to add knowledge about Latin America to their professional portfolio. The vast relations that the United States has with Latin America in all fields make the minor in LAS the source of valuable skills for our existing population. It also allows students in other major programs to access discussions of socioeconomic and ethnic diversity in one of the regions central to those debates in the world.

### Credit Requirements

The minor in LAS requires students to complete 18 units. At least 15 units must be at the 300 level or higher, and at least 3 units must be at the 400 level. All units must be exclusive to the minor and may not be double-counted, unless the College of Arts & Sciences regulations

state otherwise. The requirements for the minor mirror some of the requirements for the major. To count for LAS, courses must have an L45 number or receive authorization from the LAS director of undergraduate studies (DUS), who determines which requirements can be fulfilled by each available course. Units must be fulfilled as follows:

- 3 units for the successful completion of LatAm 165D Latin America: Nation, Ethnicity and Social Conflict, offered annually. LatAm 165C can also fulfill this requirement.
- 3 units in history or politics at the 300 level or higher. Courses may come from relevant offerings in the departments of History or Political Science, the Global Studies program, or study abroad.
- 3 units in literary or cultural studies at the 300 level or higher. These units may include courses offered by the departments of Romance Languages and Literatures, Art History, and Archaeology; LAS home-based courses; and study abroad.
- 3 units in anthropology or pre-Columbian cultures at the 300 level or higher. These courses may come from offerings in the Anthropology, Global Studies, and the LAS departments or from study abroad.
- 3 units of elective credit at the 300 level or higher.
- 3 units of a Latin American seminar. Seminar courses are 400-level classes that are taught by core LAS faculty on theoretical issues related to the region.

### Language Requirement

LAS requires all minors to complete a language requirement in Spanish or Portuguese. The Spanish requirement may be fulfilled by the completion of Span 202 Intermediate Spanish II or certification as an advanced heritage or native speaker by the DUS in LAS.

The Portuguese requirement may be fulfilled as follows:

- Successful completion of Portug 215 Reading and Conversation I with a grade of B- or higher
- Native or heritage speaker status, as determined by the DUS in LAS.
- Successful completion of a program abroad, conducted in Portuguese, with a minimum of 3 credit units in the target language

## Additional Information

### Study Abroad

All minors in LAS are strongly encouraged (but not required) to pursue a study abroad program in the region. Students who attend study abroad programs may request credit for appropriate courses at the 300 level, with approval from the DUS. A maximum of 6 units is allowed. LatAm 165D and the seminar requirement must be completed in residence at Washington University.

## Linguistics

At Washington University, the Linguistics program offers an undergraduate major and minor. The core of the Linguistics program focuses on the study of how languages are structured. Students examine how words are built from sounds, how sentences are built from words, and how all of this structure manages to communicate meaning. With a good understanding of these formal properties, students can pursue other questions about language. How does language change over time? Do diverse languages have more in common than meets the eye? What functions does language play in society? What is its relation to thought? What are its biological and psychological underpinnings? And just how do children manage to acquire language so well in the first place?

Linguistics takes a scientific approach to the study of language and develops skills in data analysis and scientific experimental methods. Linguistics students may or may not speak many languages, but they definitely will learn how to collect and analyze data about languages in an effort to answer these questions.

## Courses

Visit online course listings to view semester offerings for L44 Ling.

---

#### L44 Ling 1036 First Year Seminar: Storming Off and Slaying Serpents: Linguistic Approaches to Comparative Mythology

This course is an introduction to comparative mythology through the lens of linguistic theory. As all of our most ancient mythological narratives are poetic and given that the production of poetic texts is a fundamentally linguistic enterprise, students will acquire the linguistic skills necessary to fully engage with and analyze the language of ancient mythological texts.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

---

**L44 Ling 148 First-Year Seminar: The Linguistics of Constructed Languages**

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

---

**L44 Ling 170D Introduction to Linguistics**

Language is one of the fundamental capacities of the human species, and there are many interesting and meaningful ways in which it can be studied. This course explores the core components of linguistic theory: speech sounds (phonetics and phonology), word formation (morphology), sentence structure (syntax), and meaning (semantics). It also provides an overview of interdisciplinary ideas and research on how language is acquired and processed, its relation to the mind-brain and to society, and the question of whether the essential properties of language can be replicated outside the human mind (specifically, in chimpanzees or computer programs).

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, HUM EN: S

---

**L44 Ling 225D Latin and Greek in Current English**

An astonishingly large number of English words, especially in areas such as medicine, science, and law, are derived from Latin and Greek. This course will provide a study of the impact of Latin and Greek on the English language through study of the Latin and Greek roots, prefixes, and suffixes that are most commonly found in English technical and non-technical vocabulary and the linguistic principles through which these elements have entered the English language.

Same as L08 Classics 225D

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L44 Ling 258 Methods in Linguistic Research**

This course will introduce students to a range of formal, computational, and experimental tools for conducting linguistic research. Students will learn about different types of linguistic data, experimental design, and statistical techniques in the context of research in general linguistics, psycholinguistics, and sociolinguistics. This course aims to make students more capable readers of linguistic research (and scientific research more generally) and to provide them with hands-on experience in employing linguistic research methods. The course will also serve as an introduction to R for statistical computing. The class is intended for freshman and sophomore students who are considering advanced study in the linguistics program. Prerequisite: Ling 170D.

Credit 3 units. A&S IQ: SSC, AN EN: S

---

**L44 Ling 263 Linguistics for Legal Purposes**

This course exposes students to an array of legal matters in which forensic linguistic science can play a key role. It simultaneously introduces them to linguistic concepts, theories, and methods that can be differentially applied for a combination of forensic and legal purposes. Topics include trademark disputes, defamation suits, civil litigation, authorship identification, and linguistic evaluations of testimony presented during murder trials. Assignments will include the formulation of affidavits and the production of legal opinions derived from diverse linguistic analyses.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L44 Ling 301G Symbolic Logic**

In the first half of the course we will be studying some features of truth-functional and first-order classical logics, including studying the model theory and metatheory for first-order logic in much greater depth than in Phil 100. In the second half of the course we will go on to study three different styles of proof-system: tableaux, axiomatic, and natural deduction. This course continues on where Philosophy 100: An Introduction to Logic and Critical Analysis leaves off. It is recommended for students who have already taken that introductory course, or for students who already have a strong background in mathematics. Priority given to majors in Philosophy & PNP.

Same as L30 Phil 301G

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: HUM

---

**L44 Ling 306G Philosophy of Language**

A survey of major philosophical problems concerning meaning, reference, and truth as they have been addressed within the analytic tradition. Readings that represent diverse positions on these focal issues will be selected from the work of leading philosophers in the field, for example: Frege, Russell, Wittgenstein, Davidson, Quine, Kripke, and Putnam. Students are encouraged to engage critically the ideas and arguments presented, and to develop and defend their own views on the core topics. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Same as L30 Phil 306G

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L44 Ling 309 Syntactic Analysis**

The ability to produce and understand an infinite number of sentences is perhaps the most fascinating aspect of the human language faculty. Syntax is the study of how the brain organizes sentences from smaller phrases and words. This course explores syntactic analysis from several perspectives within generative linguistics, focusing primarily on the Government and Binding framework but also introducing Minimalist and Optimality Theoretic approaches. Topics to be discussed include phrase structure, transformations, case theory, thematic roles, and anaphora. Assignments will help students learn to construct and compare analyses of syntactic problems in English and other languages. Prerequisite: Ling 170D or permission of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

---

**L44 Ling 311 Introduction to Semantics**

Semantics is the branch of linguistics which studies how speakers assign meaning to words, sentences, and larger units of discourse. We combine perspectives from both linguistics and philosophy to explore a variety of topics including polysemy, compositionality, quantification, anaphora, definite descriptions, attitude reports, presupposition, and implicature. Prerequisite: Ling 170D or Phil 301G or permission of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

---

**L44 Ling 312 Phonetics**

Phonetics is the study of the sounds of the languages of the world. The primary goal of the course is to learn how speech sounds are produced, so that the student can describe them in articulatory terms, write them out in a standard notational system, and produce them accurately. Other topics include a basic introduction to the acoustics of speech and the use of personal computers to display, analyze, and synthesize human speech. The course should prove useful to students desiring a deeper understanding of one of the fundamental underpinnings of linguistics, but also has practical applications in such fields as foreign language learning and the appreciation and acquisition of new dialects and accents. Prerequisite: Ling 170D.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

---

**L44 Ling 313 Phonological Analysis**

There are several important abilities involved in the use of human language, one of these being the ability to organize speech sounds. The system that the brain uses to accomplish this task is the subject matter of phonology. This course will explore phonology from several perspectives within generative linguistics, including both traditional rule-based and current Optimality Theoretic approaches. Topics to be discussed include phonological features, lexical phonology, prosodic

morphology, tone, and metrical stress. Assignments will help students learn to analyze phonological problems in a variety of languages and to evaluate the consequences of using different analytic approaches. Prerequisite: Ling 170D or permission of instructor.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

#### L44 Ling 315 Morphology

Concepts covered: morphemic analysis and investigation of morphological processes. Additional topics may include relationship of morphology to language-typology and to syntax. Prerequisite: Ling 170D, or permission of instructor.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

---

#### L44 Ling 317 Introduction to Computational Linguistics

Use of computers to analyze, understand, and generate human language. Emphasis on appreciating practical applications such as text analysis, search and creation of dictionaries and corpora, information retrieval, machine translation, and speech interfaces. Survey of rule-based and statistical techniques. Students acquire programming skills appropriate for solving small- to medium-scale problems in linguistics and text processing, using a language such as Python. Students have regular programming assignments and complete a semester project. No previous knowledge of programming required. Prerequisite: L44 Ling 170D.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

#### L44 Ling 320 Historical and Comparative Linguistics

Historical linguistics focuses on how languages change over time. Comparative linguistics focuses on their similarities and differences. In this course we will trace some of the differences and changes in sound (phonetics and phonology) word formation (morphology), sentence structure (syntax), and meaning (semantics). Topics include linguistic universals, the structural and genetic classification of languages, the techniques of reconstructing proto-languages, and the causes of language change. Examples from Indo-European languages (for example, Greek, English, and Spanish) and from Native American languages (for example, Quechua and Mayan) will be emphasized. Prerequisite: Ling 170D.  
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: HUM EN: S

---

#### L44 Ling 339 Introduction to Sociolinguistics

Studies of language in social context are presented, including research related to diglossia, bilingualism, pidginization, creolization, and dialectology. Discourse analyses and conversational analyses of face-to-face conversation are examined in methodological and analytical terms. Beyond assigned readings, critical discourse analyses, the ethnography of speaking, the sociology of language, and accommodation theory are also considered. Students are required to develop a course project related to one or more studies of language in use. Experimental studies of sociophonetics and sociohistorical linguistics are presented during lectures to demonstrate advanced interdisciplinary research with potential educational and legal relevance. Prerequisite: Ling 170D.  
Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: HUM EN: S

---

#### L44 Ling 340 Linguistic Pragmatics

Discourse analysis and pragmatics are the subfields of linguistics that investigate language as it is used in real-life contexts. The focus of this course is on the following question: What do people do with language, and how do they do it? One goal is to demonstrate how the results of such investigations are relevant for a number of concrete problems in human communication. Some of the more specific questions we will explore are as follows: What distinguishes discourse

analysis and pragmatics from each other? What is their relation to the other branches of linguistics? How can the two fields contribute to the establishment of a paradigm for interdisciplinary and intercultural studies? Prerequisite: Ling 170D or permission of instructor.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

---

#### L44 Ling 341 Linguistic Diversity in the United States

Linguistic diversity has always existed within the United States, and this course begins with a survey of many of the indigenous Native American languages that existed prior to European colonization. The emphasis of this course is linguistic research, as we examine diverse studies of language across the nation with respect to regional differences, racial and ethnic differences, historical differences, and differences in education and economic status. American bilingualism is explored, as are many of the dialects that have evolved in different parts of the nation. Students study a range of sophisticated linguistic analyses of language diversity in different parts of the USA at different points in the nation's history. The culmination of the course explores practical linguistic applications in legal and educational contexts. Prereq: Ling 170D and some familiarity with elementary statistics.  
Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

---

#### L44 Ling 3701 Introduction to Hispanic Linguistics

An introduction to the scientific study of the Spanish language, this course focuses on each of the major linguistic subsystems, including the sound system (phonetics and phonology), word formation (morphology), formation of phrases and sentences (syntax), and the use of the language to convey meaning (semantics and pragmatics). At each level of analysis, selected comparisons are made between Spanish and English and between Spanish and other languages. The course also examines different historical, regional, and social varieties of Spanish and situations of Spanish in contact with other languages. Same as L38 Span 370  
Credit 3 units. A&S IQ: LCD BU: HUM EN: H

---

#### L44 Ling 390 Linguistics Service Learning I

Because language is fundamental to human communication, differences in language can present particularly difficult barriers to learning. Taking classes in a language that is not your native language, for example, presents special challenges both to students and their teachers. For speakers of non-standard dialects, taking classes in a standard dialect presents subtler-and in some ways, even more difficult-challenges. This course provides students with a concrete understanding of the practical difficulties arising from linguistic differences and helps them discover ways in which these difficulties can be addressed. In particular, students are expected to devote two hours per week tutoring local K-12 students and to keep a journal focusing on their experiences from a linguistic perspective. Students will be expected to attend weekly meetings with faculty and community partners to relate challenges that they have encountered and to discuss possible solutions. Students will also receive training on how to better understand and serve under-sourced and diverse populations. Prerequisite: At least two 300-level courses in Linguistics or permission of the instructors  
Credit 3 units. A&S IQ: SSC BU: HUM EN: S

---

#### L44 Ling 391 Linguistics Service Learning II

Linguistics Service Learning II meets with Linguistics Service Learning I, but it requires completion of additional written assignments. Prerequisite: Ling 390.  
Credit 3 units. A&S IQ: SSC BU: HUM EN: S

---

#### L44 Ling 396 Linguistics Seminar

Readings on a selected topic in theoretical linguistics with an emphasis on discussion, presentation, and writing. Prerequisite: varies with topic.

Credit 3 units. A&S IQ: SSC EN: S

**L44 Ling 396W Linguistics Seminar: Writing Intensive**

Readings on a selected topic in theoretical linguistics, with an emphasis on discussion, presentation, and writing. Prerequisite: varies with topic. Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC BU: HUM EN: S

**L44 Ling 408 Psychology of Language**

This course surveys current research and theory in psycholinguistics, covering the biological bases, cognitive bases, and learning of language. We consider studies of normal children and adults, the performance of individuals with various types of language disorders, and computer simulations of language processes. Topics range from the perception and production of speech sounds to the management of conversations. Each student will carry out an original research project on some aspect of psycholinguistics. Prereq: Ling 170D and Psych 100B Same as L33 Psych 433  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

**L44 Ling 427 Computation and Learnability in Linguistic Theory**

This course introduces the advanced linguistics or computer science student to the fields of learnability and computation as they apply to the study of linguistic theories and natural language. Topics covered include the formal language hierarchy, including the subregular languages; issues in the learnability of phonology, morphology, and syntax; and algorithms specific to constraint-based linguistic grammars. Prerequisites: either CS 130 or Ling 317 and at least one of the following: Ling 309, Ling 311, Ling 313, or Ling 315.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

**L44 Ling 466 Second-Language Acquisition**

There are many ways in which a second language can be learned: from infancy as the child of bilingual parents, or later through formal instruction, immersion in a new culture, or in a particular work or social situation. This class is an inquiry into the processes by which acquisition occurs. Topics include the nature of language learning within the scope of other types of human learning; the relationship between first and second language acquisition; the role of linguistic, cognitive, and sociocultural factors; insights gained from analyzing learners' errors; key concepts such as interlanguage and communicative competence; bilingualism; the optimal age for second language acquisition; and a critical appraisal of different theories of second language acquisition. Both theoretical and instructional implications of second language acquisition research are considered. This course can be used towards certification in TESOL and is a required course for the Graduate Certificate in Language Instruction. Prerequisite: Ling 170D or equivalent is recommended, especially for undergraduates, but is not required.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

**L44 Ling 4691 Second Language Reading and Writing: Theory, Research and Practice**

This course, taught in English, extends issues in second language literacy beyond pedagogy by examining the wide range of theoretical and research issues, both historical and current. Literacy acquisition among second language learners involves a number of variables including both cognitive and social factors. Topics to be discussed in class include literacy and social power, universal cognitive operations, individual learner differences, text types and literary forms, and the extent to which reading and writing are interrelated. Students will discuss how to bridge research and practice, and they will create reading and writing activities driven by theory and

empirical investigations. This course is a required course for the for the undergraduate minor in Applied Linguistics and an elective for the Graduate Certificate in Language Instruction. This course carries the Social and Behavioral Sciences attribute.  
Same as L38 Span 4691  
Credit 3 units. A&S IQ: SSC EN: S

**L44 Ling 478 Topics in Linguistics**

Meets with designated linguistics course, but with additional writing and research required for graduate credit and certification.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

**L44 Ling 495 Senior Seminar in Linguistics**

The Senior Seminar affords students an opportunity to integrate the various fields of linguistics. Readings, discussions, and presentations let students address issues that combine the content and the research methods of areas such as phonetics, phonology, morphology, syntax, diachrony, and semantics. Students have individual projects within the scope of the semester's particular topic, but the class as a whole helps in choosing, developing, and refining the treatment. This course fulfills the requirement for a senior capstone for primary majors in Linguistics. It is the normal option for students who wish to take the capstone as a regular class rather than as sponsored independent study.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

**L44 Ling 499 Independent Work For Senior Honors**

Prerequisites: senior standing and permission of the Linguistics Program.  
Credit variable, maximum 6 units.

## Linguistics Major Program Requirements

- **Total units required:** 30 units, at least 24 of which must be from courses at the 300 level or higher

### Required Courses

Code	Title	Units
Ling 170D	Introduction to Linguistics	3
Ling 309	Syntactic Analysis	3
Ling 311	Introduction to Semantics	3
Ling 312	Phonetics	3
Ling 313	Phonological Analysis	3
Ling 317	Introduction to Computational Linguistics	3
<b>Total Units</b>		<b>18</b>

### Elective Courses

Students select 12 units from the courses listed below. At least 9 units must be at the 300 level or higher. At most, 6 units may be drawn from Ling 499 Independent Work For Senior Honors, Ling 500 Independent Study, and cross-listed courses that are not home-based in the Linguistics program.

Code	Title	Units
Ling 148	First-Year Seminar: The Linguistics of Constructed Languages	3
Ling 225D	Latin and Greek in Current English	3
Ling 258	Methods in Linguistic Research	3
Ling 263	Linguistics for Legal Purposes	3
Ling 315	Morphology	3
Ling 320	Historical and Comparative Linguistics	3
Ling 339	Introduction to Sociolinguistics	3
Ling 340	Linguistic Pragmatics	3
Ling 341	Linguistic Diversity in the United States	3
Psych 358	Language Acquisition	3
Ling 396	Linguistics Seminar	3
Ling 396W	Linguistics Seminar: Writing Intensive	3
Ling 408	Psychology of Language	3
Ling 427	Computation and Learnability in Linguistic Theory	3
Ling 466	Second-Language Acquisition	3
Ling 495	Senior Seminar in Linguistics	3
Ling 499	Independent Work For Senior Honors	3-6
Ling 500	Independent Study	6

Under certain circumstances, students may count a limited number of relevant courses not listed here toward their major. Such circumstances include study abroad and preparation for a specialized capstone. A specific plan of study must be worked out with the director of the Linguistics program in advance of the courses being taken.

## Language Requirement

Majors should normally have foreign language competency equivalent to one year of study at the college level. Classes taken to fulfill this requirement do not normally count toward the 30 total units required for the major.

## Additional Information

### Capstone

Primary majors must complete a capstone project. The capstone project is normally done during the senior year while taking Ling 320 Historical and Comparative Linguistics, Ling 495 Senior Seminar in Linguistics, Ling 499 Independent Work For Senior Honors, or Ling 500 Independent Study. Students wishing to count Ling 500 Independent Study for their capstone need to have their independent studies approved in advance by the director of the Linguistics program.

## Senior Honors

Students with a university grade point average of 3.65 or higher and a linguistics GPA of 3.65 or higher at the end of their junior year may apply to enter the honors program by submitting a proposal for a senior thesis. If admitted into the program, the student registers for 3 units of Ling 499 Independent Work For Senior Honors during each semester of their senior year. The student must complete the thesis and pass an oral defense by the middle of March of their senior year.

Email: bhyde@wustl.edu  
Website: <http://linguistics.wustl.edu>

## Linguistics Minor Program Requirements

- **Total units required:** 15, at least 9 of which must be from courses at the 300 level or higher

### Required Course

Code	Title	Units
Ling 170D	Introduction to Linguistics	3

### Elective Courses

Students must complete 12 units of electives:

- At least 6 units must come from the following list:

Code	Title	Units
Ling 309	Syntactic Analysis	3
Ling 311	Introduction to Semantics	3
Ling 312	Phonetics	3
Ling 313	Phonological Analysis	3
Ling 317	Introduction to Computational Linguistics	3

- The remaining elective units may be drawn from any course acceptable as an elective for the major.

Email: bhyde@wustl.edu  
Website: <http://linguistics.wustl.edu>

## Mathematics

Mathematics has always held a central position in the liberal arts, and over time, it has also come to play an important role in more and more aspects of our lives. Mathematical analysis and modeling are involved in many areas far beyond the traditional association of mathematics with the physical sciences and engineering. This fact is reflected in the

diversity of the students who study at least some mathematics during their time at Washington University — students who recognize the importance of quantitative skills in a world that is becoming more and more technological.

Students major in mathematics for many reasons. Some are planning academic careers in mathematics that involve teaching or research. Others plan to work as actuaries or at other jobs in industry or government. Some plan careers in secondary education. Many majors do not intend to become "mathematicians" at all but simply realize that quantitative training is a valuable asset in many kinds of careers; often, work in mathematics is meant to complement their study in other areas. Other majors view mathematics as an interesting concentration in their liberal arts education, even though they plan to enter professional fields such as medicine or law.

The Mathematics program gives majors and minors a broad introduction to the subject. To fit students' varying academic interests and professional goals, the department offers majors in Mathematics, Applied Mathematics, and Mathematical Sciences, along with two joint majors in Mathematics and Computer Science and in Mathematics and Economics. Majors are encouraged to complete additional work (perhaps even a minor or a second major) in other related areas.

Professor  
PhD, Princeton University  
Several complex variables; geometric analysis

**N. Mohan Kumar**

Emeriti Professor  
PhD, Bombay University  
Algebraic geometry; commutative algebra

**Wanlin Li**

Assistant Professor  
PhD, University of Wisconsin–Madison  
Number theory; arithmetic geometry

**Henri Martikainen**

Associate Professor  
PhD, University of Helsinki, Finland  
Harmonic analysis; geometric measure theory

**John E. McCarthy**

Spencer T. Olin Professor of Mathematics  
PhD, University of California, Berkeley  
Analysis; operator theory; one and several complex variables

**Minh Nguyen**

Postdoctoral Lecturer  
PhD, University of Arkansas  
Gauge theory; low dimensional topology

**Charles Ouyang**

Assistant Professor  
PhD, Rice University  
(Higher) Teichmüller theory; Riemann surfaces; harmonic maps and minimal surfaces

**Martha Precup**

Associate Professor  
PhD, University of Notre Dame  
Applications of Lie theory to algebraic geometry and the related combinatorics

**Donsub Rim**

Assistant Professor  
PhD, University of Washington  
Applied mathematics

**Rachel Roberts**

Elinor Anheuser Professor of Mathematics  
PhD, Cornell University  
Low-dimensional topology

**Richard Rochberg**

Emeriti Professor  
PhD, Harvard University  
Complex analysis; interpolation theory

**Angel Roman**

Postdoctoral Lecturer  
PhD, Pennsylvania State University  
Representation theory; operator algebras

**Jesus Sanchez**

Postdoctoral Lecturer  
PhD, Pennsylvania State University  
Noncommutative index theory; cyclic cohomology; spin Riemannian geometry; high-dimensional gauge theory

**Karl Schaefer**

Lecturer  
PhD, University of Chicago  
Algebraic number theory

**Jack Shapiro**

Emeriti Professor  
PhD, City University of New York  
Algebraic K-theory

**Edward Spitznagel**

Emeriti Professor  
PhD, University of Chicago  
Statistics; statistical computation; application of statistics to medicine

**Yanli Song**

Associate Professor  
PhD, Pennsylvania State University  
Noncommutative geometry; symplectic geometry; representation theory

**Xiang Tang**

Professor  
PhD, University of California, Berkeley  
Symplectic geometry; noncommutative geometry; mathematical physics

**Joel Villatoro**

Postdoctoral Lecturer  
PhD, University of Illinois at Urbana-Champaign  
Differential geometry; Poisson geometry; singular spaces

**Brett Wick**

Professor  
PhD, Brown University  
Complex analysis; harmonic analysis; operator theory; several complex variables

**Mladen Victor Wickerhauser**

Professor  
PhD, Yale University  
Harmonic analysis; wavelets; numerical algorithms for data compression

**Edward N. Wilson**

Emeriti Professor  
PhD, Washington University  
Harmonic analysis; differential geometry

### David Wright

Emeriti Professor  
PhD, Columbia University  
Affine algebraic geometry; polynomial automorphisms

### Jay Yang

Postdoctoral Lecturer  
PhD, University of Wisconsin–Madison  
Commutative algebra; algebraic geometry

## Majors

- Applied Mathematics Major (p. 796)
- Mathematical Sciences Major (p. 798)
- Mathematics and Computer Science Major (p. 801)
- Mathematics and Economics Major (p. 805)
- Mathematics Major (p. 808)

## Minors

- Mathematics Minor (p. 810)

## Courses

Visit online course listings to view semester offerings for L24 Math.

---

### L24 Math 100 Foundations for Calculus

A limited enrollment class for students planning to take calculus but who need additional precalculus preparation. The course aims to build both the technical skills and the conceptual understanding needed to succeed in calculus. Course emphasizes links between the graphical, numeric, and algebraic viewpoints. A variety of approaches are used to present the material. Prerequisites: 2 years of high school algebra and a course in geometry (or the equivalent).

Credit 3 units. A&S IQ: NSM

---

### L24 Math 109 Mathematics and Music

An elementary introduction to the connections between mathematics and musical sound. Review of integers, ratios, prime numbers, functions, rationality, exponents, logarithms, trigonometry. Review of scales, clefs, key signatures, intervals, time signatures. Frequency and pitch. The connection between intervals and logarithms. Tuning and temperament, just intonation. Scales and modular arithmetic. The mathematics of harmony; the sound of the low prime numbers and their roles in harmony. Harmonics, partials and overtones. Numerical integration and basic Fourier analysis. The nature of complex tones. Analysis of instrument sounds. Human vowels and formants. Prerequisites: 2 years of high school algebra, and trigonometry.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

### L24 Math 131 Calculus I

Derivatives of algebraic, trigonometric, and transcendental functions, techniques of differentiation, Mean Value Theorem, applications of the derivative. The definite integral and Fundamental Theorem of Calculus. Areas. Simpler integration techniques. Prerequisites: high school algebra and precalculus, including trigonometry.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

### L24 Math 131E Calculus I Extended

Math 131E covers the same content as Math 131 but includes the additional review of precalculus concepts integrated throughout the semester. It is aimed at students whose precalculus skills are not yet fully developed. By the end of this course, students should be ready to enroll in Math 132.

Credit 4 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

### L24 Math 132 Calculus II

Continuation of Math 131. A brief review of the definite integral and Fundamental Theorem of Calculus. Techniques of integration, applications of the integral, sequences and series, Taylor polynomials and series, and some material on differential equations. Prerequisite: Math 131 or a B or better in a one-year high school calculus course, or permission of the department.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

### L24 Math 203 Honors Mathematics I

This is the first half of a one-year calculus sequence for first year student with a strong interest in mathematics with an emphasis on rigor and proofs. The course begins at the beginning but assumes the students have already studied the material from a more "mechanical" view. Students who complete both semesters will have complete the material Calc III and other topics that may let them move through the upper level math curriculum more quickly. Sets, functions, real numbers, and methods of proof. The Riemann-Darboux integral, limits and continuity, differentiation, and the fundamental theorems of calculus. Sequences and series of real numbers and of functions. Vector spaces and linear maps. Prerequisite: Score of 5 on the A.P. Calculus Exam, BC version, or the equivalent.

Credit 4 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

### L24 Math 204 Honors Mathematics II

Matrices, linear systems, and determinants. Eigenvalues and eigenvectors, diagonalization, and the spectral theorem. Scalar and vector fields, differential and integral calculus of several variables, and the fundamental theorems of Green, Gauss, and Stokes. Restricted to first year students who have completed Math 203 in the fall semester. Math 204 can replace Math 233 in major/minor requirements.

Credit 4 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

### L24 Math 217 Differential Equations

Introduction to ordinary differential equations: first-order equations, linear equations, systems of equations, series solutions, Laplace transform methods, numerical solutions. Prerequisite: Math 233 (or Math 233 concurrently).

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

### L24 Math 220 Finite Mathematics

Topics from discrete mathematics will be explored with an emphasis on problem-solving and methods of proofs. Modules on counting; combinatorial tools; binomial coefficients and Pascal's triangle; Fibonacci numbers; combinatorial probability; integers, divisors and primes; and graphs will be covered as well as additional topics as time permits. Addressed mainly to college freshmen and sophomores; it would also be suitable to advanced high school students with an interest in mathematics. Prerequisites: A good understanding of high school mathematics.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

**L24 Math 233 Calculus III**

Multivariable calculus. Topics include differential and integral calculus of functions of two or three variables: vectors and curves in space, partial derivatives, multiple integrals, line integrals, vector calculus at least through Green's Theorem. Prereq: Math 132, or a score of 4-5 on the Advanced Placement Calculus Exam (BC version).

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

**L24 Math 308 Mathematics for the Physical Sciences**

Continuation of Math 233 emphasizing topics of interest in the physical sciences. Topics in multivariable and vector calculus (div, grad, curl); line, surface integrals and connections to electromagnetism; Fourier series and integrals; boundary value problems (diffusion and wave equations); additional topics if time permits. Students may not receive credit toward a math major or minor for both Math 308 and Math 318. Prerequisite: Math 233 and 217, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L24 Math 309 Matrix Algebra**

An introductory course in linear algebra that focuses on Euclidean n-space, matrices and related computations. Topics include: systems of linear equations, row reduction, matrix operations, determinants, linear independence, dimension, rank, change of basis, diagonalization, eigenvalues, eigenvectors, orthogonality, symmetric matrices, least square approximation, quadratic forms. Introduction to abstract vector spaces. Prerequisite: Math 132.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

**L24 Math 310 Foundations for Higher Mathematics**

Introduction to the rigorous techniques used in more advanced mathematics. Topics include propositional logic, use of quantifiers, set theory, methods of proof and disproof (counterexamples), foundations of mathematics. Use of these tools in the construction of number systems, and in other areas such as elementary number theory, combinatorial arguments, and elementary proofs in analysis. Prerequisite: Math 233.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 310W Foundations For Higher Mathematics With Writing**

Introduction to the rigorous techniques used in more advanced mathematics. Topics include basic logic, set theory, methods of proof and counterexamples, foundations of mathematics, construction of number systems, counting methods, combinatorial arguments and elementary analysis. At least 3 papers will be required, which with at least one revision. Prerequisite: Math 233.

Credit 3 units. A&S IQ: NSM, WI Art: NSM

---

**L24 Math 312 Differential Equations and Dynamical Systems**

Qualitative theory of ordinary differential equations. Picard's existence and uniqueness theorem, the phase plane, Poincare-Bendixon theory, stationary points, attractors and repellers, graphical methods. Physical applications, including chaos, are indicated. Prerequisite: Math 217.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 318 Introduction to Calculus of Several Variables**

Selected topics for functions of several variables involving some matrix algebra and presented at a level of rigor intermediate between that of Calculus III and higher level analysis courses. Students may not receive credit toward a mathematics major or minor for both Math 308 and 318. Prerequisites: Math 233 and Math 309. Math 310 is recommended but not required.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 331 Algebraic Systems**

Polynomials, binomial expansions, factoring, rings (integers and polynomials), unique factorization, and other topics relevant to the high school curriculum. Designed for future secondary school teachers and other students looking for a course in algebra at a less abstract level than Math 430. Prerequisite: Math 310 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 350 Topics in Applied Mathematics**

Topics change with each offering of the course. Past topics have included "Mathematics and Multimedia," "The Mathematics and Chemistry of Reaction-Diffusion Systems," "Mathematical Biology," and "Simulation Analysis of Random Processes" and "Introduction to Monte Carlo Methods." Prerequisites will vary, but always include at least Math 233, Math 309 and basic programming skills in some language.

Credit 3 units. A&S IQ: NSM Art: NSM

---

**L24 Math 370 Introduction to Combinatorics**

Basics of enumeration (combinations, permutations and enumeration of functions between finite sets), generating functions; the inclusion-exclusion principle, partition theory and introductory graph theory. As time permits, additional topics may include Ramsey's Theorem, probabilistic methods in combinatorics and algebraic methods in combinatorics. Prerequisites: Math 132, 309 and 310, or permission of the instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

**L24 Math 371 Graph Theory**

Introduction to graph theory including the basic definitions and theorems and some more advanced topics which drive much current research in graph theory: Ramsey's Theorem, random graph theory and, if time permits, Szemerédi's regularity lemma. Graphs will be studied as abstract objects; however graph theory is also of interest to applied mathematicians because graphs are natural models for networks (social, electric,...). Prerequisite: Math 310 or a roughly equivalent course, or permission of instructor. Students should know what a proof is and how to produce one. Some informal understanding of probability will be helpful, but students need not have taken a probability course.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 401 Honors Seminar in Math**

Credit 3 units.

---

**L24 Math 407 An Introduction to Differential Geometry**

A study of properties of curves and surfaces in 3-dimensional Euclidean space. The course is essentially a modern recounting of a seminal paper of Gauss. Prerequisites: Math 233, Math 309, Math 310.

Credit 3 units. A&S IQ: NSM

---

**L24 Math 410 Introduction to Fourier Series and Integrals**

The basic theory of Fourier series and Fourier integrals including different types of convergence. Applications to certain differential equations. Prerequisites: Math 4111 or permission of instructor.

Credit 3 units. A&S IQ: NSM

---

---

**L24 Math 4111 Introduction to Analysis**

The real number system and the least upper bound property; metric spaces (completeness, compactness, and connectedness); continuous functions (in  $\mathbb{R}^n$ ; on compact spaces; on connected spaces);  $C(X)$  (pointwise and uniform convergence; Weierstrass approximation theorem); differentiation (mean value theorem; Taylor's theorem); the contraction mapping theorem; the inverse and implicit function theorems. Prerequisite: Math 310 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 4121 Introduction to Lebesgue Integration**

Riemann integration; measurable functions; measures; Lebesgue measure; the Lebesgue integral; integrable functions;  $L^p$  spaces; modes of convergence; decomposition of measures; product measures. Prerequisite: Math 4111 or permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 415 Partial Differential Equations**

Introduction to the theory of PDE's with applications to selected classical problems in physics and engineering. Linear and quasilinear first order equations, derivation of some of the classical PDE's of physics, and standard solution techniques for boundary and initial value problems. Preliminary topics such as orthogonal functions, Fourier series, and variational methods introduced as needed. Prerequisites: Math 217 or 312, Math 309, and Math 310, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 416 Complex Variables**

Analytic functions, elementary functions and their properties, line integrals, the Cauchy integral formula, power series, residues, poles, conformal mapping and applications. Prereq: Math 310 and (Math 318 or Math 4111), or permission of instructor.

Credit 3 units. A&S IQ: NSM Art: NSM

---

**L24 Math 4171 Topology I**

An introduction to the most important ideas of topology. Course includes necessary ideas from set theory, topological spaces, subspaces, products and quotients, compactness and connectedness. Some time is also devoted to the particular case of metric spaces (including topics such as separability, completeness, completions, the Baire Category Theorem, and equivalents of compactness in metric spaces). Prerequisite: Math 4111 or permission of instructor.

Credit 3 units. A&S IQ: NSM Art: NSM

---

**L24 Math 4181 Topology II**

A continuation of Math 4171 featuring more advanced topics in topology. The content may vary with each offering. Prerequisite: Math 4171, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 429 Linear Algebra**

This course is an introduction to the linear algebra of finite-dimensional vector spaces. It includes systems of equations, matrices, determinants, inner product spaces, and spectral theory. Prerequisite: Math 310 or permission of instructor. Math 309 is not an explicit prerequisite, but students should already be familiar with such basic topics from matrix theory as matrix operations, linear systems, row reduction, and Gaussian elimination. (Material on these topics in early chapters of the text will be covered very quickly.)

Credit 3 units. A&S IQ: NSM Art: NSM

---

**L24 Math 430 Modern Algebra**

Introduction to groups, rings, and fields. Includes permutation groups, group and ring homomorphisms, field extensions, connections with linear algebra. Prerequisite: Math 310, Math 429 or permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 4351 Number Theory and Cryptography**

The course will cover many of the basics of elementary number theory, providing a base from which to approach modern algebra, algebraic number theory and analytic number theory. It will also introduce one of the most important real-world applications of mathematics, namely the use of number theory and algebraic geometry in public key cryptography. Topics from number theory involve divisibility (Euclidean algorithm, primes, Fundamental Theorem of Arithmetic), congruences (modular arithmetic, Chinese Remainder Theorem, primality testing and factorization). Topics from cryptography will include RSA encryption, Diffie-Hellman key exchange and elliptic curve cryptography. Topics about algebraic numbers may be included if time permits. Prerequisites: Math 233, 309 and 310 (or permission of instructor)

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 436 Algebraic Geometry**

Introduction to affine and projective algebraic varieties, the Zariski topology, regular and rational mappings, simple and singular points, divisors and differential forms, genus, the Riemann-Roch theorem. Prerequisites: Math 310, 429, and 430, or permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 444 The Mathematics of Quantum Theory**

An introduction to the mathematical foundations of quantum theory aimed at advanced undergraduate/beginning graduate students in Mathematics and Engineering, although students from other disciplines are equally welcome to attend. Topics include: the mathematical postulates of quantum theory and simple physical systems, spectral theory of self-adjoint operators, rudiments of Lie groups, Lie algebras and unitary group representations, elements of quantum probability and quantum information theory. Prerequisites: Linear algebra at the level of Math 429 or equivalent, multivariate calculus at the level of Math 318, and basic probability theory at the undergraduate level such as Math 493 or instructor's permission.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 449 Numerical Applied Mathematics**

Computer arithmetic, error propagation, condition number and stability; mathematical modeling, approximation and convergence; roots of functions; calculus of finite differences; implicit and explicit methods for initial value and boundary value problems; numerical integration; numerical solution of linear systems, matrix equations, and eigensystems; Fourier transforms; optimization. Various software packages may be introduced and used. Prerequisites: Math 217 or 312, Math 309, Math 310 and CSE 131 (or other computer background with permission of the instructor).

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 450 Topics in Applied Mathematics**

Topic may vary with each offering of the course. Prerequisite: CSE 131 and, Math 449, or permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L24 Math 456 Topics in Financial Mathematics**

An introduction to the principles and methods of financial mathematics, with a focus on discrete-time stochastic models. Topics include no-arbitrage pricing of financial derivatives, risk-neutral probability measures, the Cox-Ross-Rubenstein and Black-Scholes-Merton options pricing models, and implied volatility. Prerequisites: Math 233, Math 3200, Math 310 or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

**L24 Math 470 Topics in Graph Theory**

Credit 3 units. A&S IQ: NSM

**L24 Math 493C Probability**

Mathematical theory and application of probability at the advanced undergraduate level; a calculus based introduction to probability theory. Topics include the computational basics of probability theory, combinatorial methods, conditional probability including Bayes' theorem, random variables and distributions, expectations and moments, the classical distributions, and the central limit theorem. permission of the instructor. Prerequisites: Math/SDS 3200 and Math 233. Same as L87 SDS 493. Credit 3 units. A&S IQ: NSM Art: NSM

**L24 Math 495C Stochastic Processes**

Content varies with each offering of the course. Past offerings have included such topics as random walks, Markov chains, Gaussian processes, empirical processes, Markov jump processes, and a short introduction to martingales, Brownian motion and stochastic integrals. Prerequisites: Math 309; Math/SDS 493 or Math/SDS 3211. Same as L87 SDS 495. Credit 3 units. A&S IQ: NSM Art: NSM

# Applied Mathematics Major

## Program Requirements

- **Total units required:** 42

### Required Courses

- The three-course calculus sequence (9 units)\* and an introductory computer science course (3 units)\*\*:

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
CSE 131	Introduction to Computer Science	3
<b>Total Units</b>		<b>12</b>

\* AP credit can be applied, and students who have completed Math 203 Honors Mathematics I and Math 204 Honors Mathematics II will have this requirement waived.

\*\* This course may be waived after consultation with the director of undergraduate studies of the Department of Computer Science & Engineering.

- The following required upper-level courses (24 units):\*

Code	Title	Units
Math 310 or Math 310W	Foundations for Higher Mathematics Foundations For Higher Mathematics With Writing	3
Math 4111	Introduction to Analysis	3
Math 4121	Introduction to Lebesgue Integration	3
Math 429	Linear Algebra	3
Math 449	Numerical Applied Mathematics	3
Math 450	Topics in Applied Mathematics	3
At least two of the following:		
Math 410	Introduction to Fourier Series and Integrals	3
Math 415	Partial Differential Equations	3
Math 416	Complex Variables	3
Math 4351	Number Theory and Cryptography	3

\* Students who take Math 203 and Math 204 can choose to take an additional elective in place of Math 310/Math 310W.

- Two additional upper-level mathematics electives that have not been used to fulfill any other requirement (6 units).
  - Upper-level mathematics courses have course numbers that begin with a "3" or higher. Lower-level courses do not count toward upper-level mathematics requirements, even if they are cross-listed as an upper-level course in another department or program.
- All required courses (both lower- and upper-level) must be taken for a letter grade and completed with a grade of C- or better.

## Additional Information

### Course Substitutions

At most one approved substitution can be made using a course not home-based in the Department of Mathematics.

Any course from another department that is cross-listed as a mathematics L24 course can count as an upper-level elective. Examples include Math 493C Probability, Math 495C Stochastic Processes, Math 501C Theoretical Physics, Math 502C Methods of Theoretical Physics II, and Math 523C Information Theory. Such L24 courses always end with a "C."

In general the following courses can count as upper-level mathematics electives, but specifics may vary for the various majors in the department:

- Phil 403 Mathematical Logic I and Phil 404 Mathematical Logic II
- ESE 319 Engineering Mathematics B and ESE 403 Operations Research

## Additional Requirements

1. A student cannot declare more than one major or minor in the department. This restriction includes dual majors, such as Mathematics and Economics and Mathematics and Computer Science. These majors are considered "in the department" even if they are declared in another department.
2. No *upper-level* course used to satisfy a major requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
3. At most 3 units of independent study or research work can count toward the major requirements.
4. Students may count courses from the Department of Statistics and Data Science (SDS) as Mathematics courses if at least one of the following conditions holds:
  - a. The course is cross-listed in the Department of Mathematics (e.g., Math 493C and Math 495C are cross-listed versions of SDS 493 and SDS 495).
  - b. The student matriculated in 2023-24 or earlier, and the course was previously offered by the Department of Mathematics and Statistics, as reflected by the student's matriculation-year (p. 16) Bulletin (p. 16).
5. At most one of the following courses can be used to fulfill major requirements: Math 308 Mathematics for the Physical Sciences or Math 318 Introduction to Calculus of Several Variables.
6. Courses transferred from other accredited colleges and universities can be counted, with the following caveats, if they receive department approval:
  - a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
  - b. At least half of the upper-level units required in a major must be earned at Washington University or in a Washington University-approved overseas study program.
  - c. Courses from the School of Continuing & Professional Studies cannot be used to fulfill major requirements.

## Latin Honors

At the time of graduation, the Department of Mathematics will recommend that a candidate receive Latin Honors (*cum laude*, *magna cum laude*, or *summa cum laude*) if that student has completed the department's requirements for High Distinction or Highest Distinction in Mathematics, including an Honors Thesis. The actual award of Latin Honors is managed by the College of Arts & Sciences.

## The Honors Thesis

Arts & Sciences mathematics majors who want to be candidates for Latin Honors, High Distinction, or Highest Distinction must complete an honors thesis. Writing an honors thesis involves a considerable amount of independent work, reading, creating mathematics, writing a paper that meets acceptable professional standards, and making an oral presentation of the results.

## Types of Projects

An honors thesis can take two forms:

1. A thesis that presents significant work by the student on one or more nontrivial mathematics problems.
2. A substantial expository paper that follows independent study on an advanced topic under the guidance of a department faculty member. Such a report would involve the careful presentation of ideas and the synthesis of materials from several sources.

## Process and Suggested Timeline

### Junior Year, Spring Semester:

1. Talk with a faculty advisor about possible projects.
2. Complete the Honors Proposal Form and submit it to Blake Thornton.

### Senior Year:

1. By the end of January, provide the advisor with a draft abstract and outline of the paper.
2. By the end of February, submit a rough draft, including an abstract, to the advisor.
3. The student and the advisor should agree on a date that the writing will be complete and on a date and time for the oral presentation in mid-March (the deadline is March 31).

## Departmental Prizes

Each year, the department considers graduating majors for three departmental prizes and also awards a prize to juniors. Recipients are recognized at an annual awards ceremony in April where graduating majors each receive a certificate and a set of honors cords to be worn as part of the academic dress at Commencement. Awards are noted on the student's permanent university record.

### Ross Middlemiss Prize

The Ross Middlemiss Prize is awarded to a graduating math major with an outstanding record. The award was established by former Professor Ross Middlemiss, who taught at Washington University for 40 years. Middlemiss authored several books, including a widely popular calculus text that was used in courses offered by the School of Continuing & Professional Studies until the late 1970s.

## Putnam Exam Prize

The Putnam Exam Prize is awarded to a graduating senior who has participated regularly in the Putnam Exam Competition and done exceptionally well throughout their time at Washington University.

## Martin Silverstein Award

The Martin Silverstein Award was established in memory of Professor Martin Silverstein, who, until his death in 2004, was a pioneer in work at the interface of probability theory and harmonic analysis. Graduating students completing any major we offer will be considered for this award, but preference is given to those who have done excellent work in applied mathematics or analysis.

## Brian Blank Award

The Brian Blank Award was established in memory of Professor Brian Blank, who passed away in 2018. Each year, the Department of Mathematics selects distinguished juniors majoring in mathematics for this prize.

## Distinctions in Applied Mathematics

### Distinction

- Complete at least 33 units of upper-level mathematics courses.
- The GPA for these 33 upper-level units must be at least 3.7. If more than 33 units are taken for a letter grade, the courses with the lowest grades can be omitted when computing the GPA for this purpose.
- Complete at least five courses, each with a B or better, at level 400+.
- All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

### High Distinction

- Complete all requirements for Distinction.
- Complete an honors thesis.

### Highest Distinction

- Complete all requirements for High Distinction.
- Complete at least five courses, each with a grade of B+ or better, at the 400 level or higher. These courses can be the same five courses used for the Distinction requirement, but the grades must be B+ or better.
- Complete one of the two paths described below:
  - **Graduate Qualifier Path:** Graduate qualifier courses\* in mathematics are two-semester sequences that start in the fall. In mathematics, a two-semester graduate qualifier sequence has a qualifier exam at the end of each semester. Students must complete and pass two semesters of qualifier courses\* and their corresponding exams in mathematics. (These courses can involve a single year-long sequence or be the first semesters of two different sequences.)
  - **Course Work Path:**

- Complete at least 42 units of upper-level mathematics courses. The GPA for these 42 upper-level units must be at least 3.7. If more than 42 units are taken for a letter grade, the courses with the lowest grades can be omitted when computing the GPA for this purpose.
- Complete at least nine total courses at the 400 level or above, all with a B+ or better. These courses can include the five courses taken for distinction. All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

\* These qualifier courses can count toward the additional course requirements for Distinction.

Phone: 314-935-6301

Website: http://math.wustl.edu

## Mathematical Sciences Major

### Program Requirements

- **Total units required:** 36

### Required Courses

- The three-course calculus sequence (9 units)\* and an introductory computer science course (3 units)\*\*:

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
CSE 131	Introduction to Computer Science	3
<b>Total Units</b>		<b>12</b>

\* AP credit can be applied, and students who have completed Math 203 Honors Mathematics I and Math 204 Honors Mathematics II will have this requirement waived.

\*\* This course may be waived after consultation with the director of undergraduate studies of the Department of Computer Science & Engineering.

- The following required upper-level courses (9 units):\*

Code	Title	Units
Math 309	Matrix Algebra	3
Math 310 or Math 310W	Foundations for Higher Mathematics Foundations For Higher Mathematics With Writing	3
SDS 3200	Elementary to Intermediate Statistics and Data Analysis	3

\* Students who take Math 203 and Math 204 can choose to take additional electives in place of Math 309 and Math 310/Math 310W.

- One of the following full-year 400-level sequences (6 units):\*

Code	Title	Units
Math 4111 & Math 4121	Introduction to Analysis and Introduction to Lebesgue Integration	6
Math 4171 & Math 4181	Topology I and Topology II	6
Math 429 & Math 430	Linear Algebra and Modern Algebra	6
Math 449 & Math 450	Numerical Applied Mathematics and Topics in Applied Mathematics	6

\* Students whose primary major is secondary education may fulfill this requirement by taking Math 331 Algebraic Systems and Math 407 An Introduction to Differential Geometry (or another geometry course by departmental approval).

- At least one course from the following list that has not already been used to fulfill any of the previous requirements listed (3 units):

Code	Title	Units
Math 370	Introduction to Combinatorics	3
Math 371	Graph Theory	3
Math 410	Introduction to Fourier Series and Integrals	3
Math 4111	Introduction to Analysis	3
Math 415	Partial Differential Equations	3
Math 416	Complex Variables	3
Math 4171	Topology I	3
Math 429	Linear Algebra	3
Math 4351	Number Theory and Cryptography	3
Math 449	Numerical Applied Mathematics	3

- Two additional upper-level electives in Mathematics or Statistics and Data Science that have not been used to fulfill any other requirement (6 units).
  - Upper-level courses have course numbers that begin with a "3" or higher. Lower-level courses do not count toward upper-level mathematics requirements, even if they are cross-listed as an upper-level course in another department or program.
- All required courses (both lower- and upper-level) must be taken for a letter grade and completed with a grade of C- or better.

## Additional Information

### Course Substitutions

At most one approved substitution can be made using a course not home-based in the Department of Mathematics.

Any course from another department that is cross-listed as a mathematics L24 course can count as an upper-level elective. Examples include Math 493C Probability, Math 495C Stochastic Processes, Math 501C Theoretical Physics, Math 502C Methods of Theoretical Physics II, and Math 523C Information Theory. Such L24 courses always end with a "C."

In general the following courses can count as upper-level mathematics electives, but specifics may vary for the various majors in the department:

- Phil 403 Mathematical Logic I and Phil 404 Mathematical Logic II
- ESE 319 Engineering Mathematics B and ESE 403 Operations Research

### Additional Requirements

1. A student cannot declare more than one major or minor in the department. This restriction includes dual majors, such as Mathematics and Economics and Mathematics and Computer Science. These majors are considered "in the department" even if they are declared in another department.
2. No *upper-level* course used to satisfy a major requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
3. At most 3 units of independent study or research work can count toward the major requirements.
4. Students may count courses from the Department of Statistics and Data Science (SDS) as Mathematics courses if at least one of the following conditions holds:
  - a. The course is cross-listed in the Department of Mathematics (e.g., Math 493C and Math 495C are cross-listed versions of SDS 493 and SDS 495).
  - b. The student matriculated in 2023-24 or earlier, and the course was previously offered by the Department of Mathematics and Statistics, as reflected by the student's matriculation-year (p. 16) Bulletin (p. 16).
5. At most one of the following courses can be used to fulfill major requirements: Math 308 Mathematics for the Physical Sciences or Math 318 Introduction to Calculus of Several Variables.

6. Courses transferred from other accredited colleges and universities can be counted, with the following caveats, if they receive department approval:
  - a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
  - b. At least half of the upper-level units required in a major must be earned at Washington University or in a Washington University-approved overseas study program.
  - c. Courses from the School of Continuing & Professional Studies cannot be used to fulfill major requirements.

## Latin Honors

At the time of graduation, the Department of Mathematics will recommend that a candidate receive Latin Honors (cum laude, magna cum laude, or summa cum laude) if that student has completed the department's requirements for High Distinction or Highest Distinction in Mathematics, including an Honors Thesis. The actual award of Latin Honors is managed by the College of Arts & Sciences.

## The Honors Thesis

Arts & Sciences mathematics majors who want to be candidates for Latin Honors, High Distinction, or Highest Distinction must complete an honors thesis. Writing an honors thesis involves a considerable amount of independent work, reading, creating mathematics, writing a paper that meets acceptable professional standards, and making an oral presentation of the results.

## Types of Projects

An honors thesis can take two forms:

1. A thesis that presents significant work by the student on one or more nontrivial mathematics problems.
2. A substantial expository paper that follows independent study on an advanced topic under the guidance of a department faculty member. Such a report would involve the careful presentation of ideas and the synthesis of materials from several sources.

## Process and Suggested Timeline

### Junior Year, Spring Semester:

1. Talk with a faculty advisor about possible projects.
2. Complete the Honors Proposal Form and submit it to Blake Thornton.

### Senior Year:

1. By the end of January, provide the advisor with a draft abstract and outline of the paper.
2. By the end of February, submit a rough draft, including an abstract, to the advisor.
3. The student and the advisor should agree on a date that the writing will be complete and on a date and time for the oral presentation in mid-March (the deadline is March 31).

## Departmental Prizes

Each year, the department considers graduating majors for three departmental prizes and also awards a prize to juniors. Recipients are recognized at an annual awards ceremony in April where graduating majors each receive a certificate and a set of honors cords to be worn as part of the academic dress at Commencement. Awards are noted on the student's permanent university record.

### Ross Middlemiss Prize

The Ross Middlemiss Prize is awarded to a graduating math major with an outstanding record. The award was established by former Professor Ross Middlemiss, who taught at Washington University for 40 years. Middlemiss authored several books, including a widely popular calculus text that was used in courses offered by the School of Continuing & Professional Studies until the late 1970s.

### Putnam Exam Prize

The Putnam Exam Prize is awarded to a graduating senior who has participated regularly in the Putnam Exam Competition and done exceptionally well throughout their time at Washington University.

### Martin Silverstein Award

The Martin Silverstein Award was established in memory of Professor Martin Silverstein, who, until his death in 2004, was a pioneer in work at the interface of probability theory and harmonic analysis. Graduating students completing any major we offer will be considered for this award, but preference is given to those who have done excellent work in applied mathematics or analysis.

### Brian Blank Award

The Brian Blank Award was established in memory of Professor Brian Blank, who passed away in 2018. Each year, the Department of Mathematics selects distinguished juniors majoring in mathematics for this prize.

## Distinctions in Mathematical Sciences

### Distinction

- Complete at least 33 units of upper-level mathematics courses.
- The GPA for these 33 upper-level units must be at least 3.7. If more than 33 units are taken for a letter grade, the courses with the lowest grades can be omitted when computing the GPA for this purpose.
- Complete at least five courses, each with a B or better, at level 400+.
- All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

## High Distinction

- Complete all requirements for Distinction.
- Complete an honors thesis.

## Highest Distinction

- Complete all requirements for High Distinction.
- Complete at least five courses, each with a grade of B+ or better, at the 400 level or higher. These courses can be the same five courses used for the Distinction requirement, but the grades must be B+ or better.
- Complete one of the two paths described below:
  - **Graduate Qualifier Path:** Graduate qualifier courses\* in mathematics are two-semester sequences that start in the fall. In mathematics, a two-semester graduate qualifier sequence has a qualifier exam at the end of each semester. Students must complete and pass two semesters of qualifier courses\* and their corresponding exams in mathematics. (These courses can involve a single year-long sequence or be the first semesters of two different sequences.)
  - **Course Work Path:**
    - Complete at least 42 units of upper-level mathematics courses. The GPA for these 42 upper-level units must be at least 3.7. If more than 42 units are taken for a letter grade, the courses with the lowest grades can be omitted when computing the GPA for this purpose.
    - Complete at least nine total courses at the 400 level or above, all with a B+ or better. These courses can include the five courses taken for distinction. All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

\* These qualifier courses can count toward the additional course requirements for Distinction.

# Mathematics and Computer Science Major Program Requirements

- **Total units required:** 51

The McKelvey School of Engineering and the College of Arts & Sciences developed a major that efficiently captures the intersection of the complementary studies of computer science and math.

McKelvey Engineering students who declare this major must fulfill the core course requirements listed below and all other requirements for the Applied Science degree (p. 1304) in the McKelvey School of Engineering. They must also complete Engr 310 Technical Writing and

8 units of courses designated as NSM (Natural Sciences & Math) from Anthropology (L48 Anthro), Biology and Biomedical Sciences (L41 Biol), Chemistry (L07 Chem), Earth, Environmental, and Planetary Sciences (L19 EPSc), Physics (L31 Physics) or Environmental Studies (L82 EnSt).

Arts & Sciences students who declare this major must fulfill the distribution requirements and all other requirements for an AB degree (p. 1112) in addition to the specific requirements listed below.

## Core Course Requirements\*

Code	Title	Units
CSE 131	Introduction to Computer Science	3
CSE 240	Logic and Discrete Mathematics	3
CSE 247	Data Structures and Algorithms	3
Math 131	Calculus I (AP credit may satisfy this requirement)**	3
Math 132	Calculus II (AP credit may satisfy this requirement)**	3
Math 233	Calculus III**	3
Math 310	Foundations for Higher Mathematics	3
or Math 310W	Foundations For Higher Mathematics With Writing	
Math 309	Matrix Algebra	3
SDS 3200	Elementary to Intermediate Statistics and Data Analysis	3
or ESE 326	Probability and Statistics for Engineering	
or SDS 3211	Statistics for Data Science I	
CSE 347	Analysis of Algorithms	3
<b>Total Units</b>		<b>30</b>

\* Each of these core courses must be passed with a C- or better.

\*\* Students who complete the Math 203 Honors Mathematics I and Math 204 Honors Mathematics II sequence will be considered to have completed Math 131 Calculus I, Math 132 Calculus II, and Math 233 Calculus III. These students can also choose to take additional electives in place of Math 309 Matrix Algebra and Math 310 Foundations for Higher Mathematics.

## Electives

**Seven upper-level courses from Math or Computer Science & Engineering can be chosen from the approved list, with the following caveats:**

- At least three courses must be taken from CSE and at least three courses must be taken from Math.
- At most one preapproved course from outside both departments can be selected.
- CSE 400 Independent Study or CSE 400E Independent Study may be taken for a maximum of 3 units and must be approved by a CS +Math review committee.

- Students may count either Math 456 or ESE 427 as an elective toward the major, but not both. Likewise, students may count either CSE 417T or ESE 417 as an elective toward the major, but not both.

## List of Approved Electives Computer Science & Engineering

Code	Title	Units
CSE 217A	Introduction to Data Science	3
CSE 341T	Parallel and Sequential Algorithms	3
CSE 411A	AI and Society	3
CSE 412A	Introduction to Artificial Intelligence	3
CSE 416A	Data Science for Complex Networks	3
CSE 417T	Introduction to Machine Learning	3
CSE 427S	Cloud Computing with Big Data Applications	3
CSE 442T	Introduction to Cryptography	3
CSE 447T	Introduction to Formal Languages and Automata	3
CSE 457A	Introduction to Visualization	3
CSE 468T	Introduction to Quantum Computing	3
CSE 513T	Theory of Artificial Intelligence and Machine Learning	3
CSE 514A	Data Mining	3
CSE 515T	Bayesian Methods in Machine Learning	3
CSE 516A	Multi-Agent Systems	3
CSE 517A	Machine Learning	3
CSE 518A	Human-in-the-Loop Computation	3
CSE 533T	Coding and Information Theory for Data Science	3
CSE 534A	Large-Scale Optimization for Data Science	3
CSE 541T	Advanced Algorithms	3
CSE 543T	Algorithms for Nonlinear Optimization	3
CSE 544T	Special Topics in Computer Science Theory	3
CSE 546T	Computational Geometry	3
CSE 554A	Geometric Computing for Biomedicine	3
CSE 555T	Adversarial AI	3
CSE 559A	Computer Vision	3
CSE 581T	Approximation Algorithms	3
CSE 584A	Algorithms for Biosequence Comparison	3
CSE 587A	Algorithms for Computational Biology	3

## Mathematics

Code	Title	Units
Math 350	Topics in Applied Mathematics	3
Math 370	Introduction to Combinatorics	3
Math 371	Graph Theory	3
Math 407	An Introduction to Differential Geometry	3

Math 410	Introduction to Fourier Series and Integrals	3
Math 4111	Introduction to Analysis	3
Math 4121	Introduction to Lebesgue Integration	3
Math 4171	Topology I	3
Math 429	Linear Algebra	3
Math 430	Modern Algebra	3
Math 4351	Number Theory and Cryptography	3
Math 444	The Mathematics of Quantum Theory	3
Math 449	Numerical Applied Mathematics	3
Math 450	Topics in Applied Mathematics	3
Math 456	Topics in Financial Mathematics	3
Math 470	Topics in Graph Theory	3
Math 493C/SDS 493	Probability	3
Math 495C/SDS 495	Stochastic Processes	3

## Statistics and Data Science

Code	Title	Units
SDS 420	Experimental Design	3
SDS 434	Survival Analysis	3
SDS 439	Linear Statistical Models	3
SDS 459	Bayesian Statistics	3
SDS 460	Multivariate Statistical Analysis	3
SDS 4601	Statistical Learning	3
SDS 461	Time Series Analysis	3
SDS 462	Mathematical Foundations of Big Data	3
SDS 475	Statistical Computation	3
SDS 493/Math 493C	Probability	3
SDS 494	Mathematical Statistics	3
SDS 495/Math 495C	Stochastic Processes	3

## Electrical & Systems Engineering

Code	Title	Units
ESE 4031	Optimization for Engineered Planning, Decisions and Operations	3
ESE 415	Optimization	3
ESE 417	Introduction to Machine Learning and Pattern Classification	3
ESE 427	Financial Mathematics	3
ESE 429	Basic Principles of Quantum Optics and Quantum Information	3
ESE 520	Probability and Stochastic Processes	3

## Economics

Code	Title	Units
Econ 4151	Applied Econometrics	3
Econ 467	Game Theory	3

## Linguistics

Code	Title	Units
Ling 317	Introduction to Computational Linguistics	3
Ling 427	Computation and Learnability in Linguistic Theory	3

## Biology and Biomedical Sciences

Code	Title	Units
Biol 5657	Biological Neural Computation	3

## Biomedical Engineering

Code	Title	Units
BME 470	Mathematics of Imaging Science	3

## Additional Information

1. A student cannot declare more than one major or minor in the Department of Mathematics. This restriction includes dual majors, such as Mathematics and Economics and Mathematics and Computer Science. These majors are considered "in the department" even if they are declared in another department.
2. No **upper-level** course used to satisfy a major requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
3. At most 3 units of independent study or research work can count toward the major requirements.
4. Students may count courses from the Department of Statistics and Data Science (SDS) as Mathematics courses if at least one of the following conditions holds:
  - a. The course is cross-listed in the Department of Mathematics (e.g., Math 493C and Math 495C are cross-listed versions of SDS 493 and SDS 495).
  - b. The student matriculated in 2023-2024 or earlier, and the course was previously offered by the Department of Mathematics and Statistics, as reflected by the student's matriculation-year (p. 16) Bulletin (p. 16).
5. At most one of the following courses can be used to fulfill major requirements: Math 308 Mathematics for the Physical Sciences or Math 318 Introduction to Calculus of Several Variables.
6. Courses transferred from other accredited colleges and universities can be counted, with the following caveats, if they receive department approval:
  - a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
  - b. At least half of the upper-level units required in a major must be earned at Washington University or in a Washington University-approved overseas study program.
  - c. Courses from the School of Continuing & Professional Studies cannot be used to fulfill major requirements.

## Latin Honors

At the time of graduation, the Department of Mathematics will recommend that a candidate receive Latin Honors (cum laude, magna cum laude, or summa cum laude) if that student has completed the department's requirements for High Distinction or Highest Distinction in Mathematics, including an Honors Thesis. The actual award of Latin Honors is managed by the College of Arts & Sciences.

## The Honors Thesis

Arts & Sciences mathematics majors who want to be candidates for Latin Honors, High Distinction, or Highest Distinction must complete an honors thesis. Writing an honors thesis involves a considerable amount of independent work, reading, creating mathematics, writing a paper that meets acceptable professional standards, and making an oral presentation of the results.

## Types of Projects

An honors thesis can take two forms:

1. A thesis that presents significant work by the student on one or more nontrivial mathematics problems.
2. A substantial expository paper that follows independent study on an advanced topic under the guidance of a department faculty member. Such a report would involve the careful presentation of ideas and the synthesis of materials from several sources.

## Process and Suggested Timeline

### Junior Year, Spring Semester:

1. Talk with a faculty advisor about possible projects.
2. Complete the Honors Proposal Form and submit it to Blake Thornton.

### Senior Year:

1. By the end of January, provide the advisor with a draft abstract and outline of the paper.
2. By the end of February, submit a rough draft, including an abstract, to the advisor.
3. The student and the advisor should agree on a date that the writing will be complete and on a date and time for the oral presentation in mid-March (the deadline is March 31).

## Departmental Prizes

Each year, the department considers graduating majors for three departmental prizes and also awards a prize to juniors. Recipients are recognized at an annual awards ceremony in April where graduating majors each receive a certificate and a set of honors cords to be worn as part of the academic dress at Commencement. Awards are noted on the student's permanent university record.

## Ross Middlemiss Prize

The Ross Middlemiss Prize is awarded to a graduating math major with an outstanding record. The award was established by former Professor Ross Middlemiss, who taught at Washington University for 40 years. Middlemiss authored several books, including a widely popular calculus text that was used in courses offered by the School of Continuing & Professional Studies until the late 1970s.

## Putnam Exam Prize

The Putnam Exam Prize is awarded to a graduating senior who has participated regularly in the Putnam Exam Competition and done exceptionally well throughout their time at Washington University.

## Martin Silverstein Award

The Martin Silverstein Award was established in memory of Professor Martin Silverstein, who, until his death in 2004, was a pioneer in work at the interface of probability theory and harmonic analysis. Graduating students completing any major we offer will be considered for this award, but preference is given to those who have done excellent work in applied mathematics or analysis.

## Brian Blank Award

The Brian Blank Award was established in memory of Professor Brian Blank, who passed away in 2018. Each year, the Department of Mathematics selects distinguished juniors majoring in mathematics for this prize.

## Distinctions in Mathematics and Computer Science

### Distinction

- For Distinction in Mathematics and Computer Science, a student must take an additional two electives for a total of nine electives.
- The student's GPA in the nine electives must be at least 3.7. If the student takes additional courses that satisfy these requirements, the courses with the lowest grades may be omitted when calculating the GPA for this purpose.
- The student must complete at least four courses from the list of approved courses, each with a grade of B or better. These courses can be in either department (i.e., Mathematics or Computer Science & Engineering) and must be classroom courses, not independent study. The list of courses will be maintained by both departments. Current approved courses include the following:

Code	Title	Units
Math 4111	Introduction to Analysis	3
Math 4121	Introduction to Lebesgue Integration	3
Math 4171	Topology I	3
Math 4181	Topology II	3
Math 429	Linear Algebra	3
Math 430	Modern Algebra	3
Math 4351	Number Theory and Cryptography	3
Math 449	Numerical Applied Mathematics	3

Math 450	Topics in Applied Mathematics	3
Math 456	Topics in Financial Mathematics	3
Math 470	Topics in Graph Theory	3
CSE 411A	AI and Society	3
CSE 416A	Data Science for Complex Networks	3
CSE 417T	Introduction to Machine Learning	3
CSE 427S	Cloud Computing with Big Data Applications	3
CSE 442T	Introduction to Cryptography	3
CSE 447T	Introduction to Formal Languages and Automata	3
CSE 468T	Introduction to Quantum Computing	3
CSE 513T	Theory of Artificial Intelligence and Machine Learning	3
CSE 514A	Data Mining	3
CSE 515T	Bayesian Methods in Machine Learning	3
CSE 516A	Multi-Agent Systems	3
CSE 517A	Machine Learning	3
CSE 518A	Human-in-the-Loop Computation	3
CSE 541T	Advanced Algorithms	3
CSE 543T	Algorithms for Nonlinear Optimization	3
CSE 544T	Special Topics in Computer Science Theory	3
CSE 546T	Computational Geometry	3
CSE 554A	Geometric Computing for Biomedicine	3
CSE 581T	Approximation Algorithms	3
CSE 587A	Algorithms for Computational Biology	3

### High Distinction

- Complete all requirements for Distinction.
- Complete an honors thesis in either department (Mathematics or Computer Science & Engineering).

### Highest Distinction

- Complete the requirements for High Distinction.
- Complete one of the two options described below:
  - **Qualifier Option:** Complete two semesters of graduate course work and qualifier exams in the Department of Mathematics as described above for Highest Distinction for mathematics majors.
  - **Course Option:** Complete three additional electives for a total of 12 courses. As with Distinction, the student's GPA in the 12 electives must be at least 3.7, and additional courses beyond 12 can be disregarded when calculating the GPA. The 12 electives must include at least eight courses selected from the list under Distinction, with the student earning a grade of B+ or better in each course. At least two of these eight courses must be from each department (Mathematics and Computer Science & Engineering).

Phone: 314-935-6301  
Email: mathadvising@wustl.edu  
Website: http://math.wustl.edu

## Mathematics and Economics Major Program Requirements

- **Total units required: 57**

### Required Courses

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 4021	Intermediate Macroeconomic Theory	3
Econ 413	Introduction to Econometrics	3
or Econ 413W	Introduction to Econometrics with Writing	
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Math 309	Matrix Algebra	3
Math 310	Foundations for Higher Mathematics	3
or Math 310W	Foundations For Higher Mathematics With Writing	
SDS 3200	Elementary to Intermediate Statistics and Data Analysis	3
or SDS 3211	Statistics for Data Science I	
or Math 493C	Probability	
<b>Total Units</b>		<b>36</b>

### Elective Courses

Majors must complete seven electives drawn from the lists below. Three electives must be drawn from the Economics list and three electives must be drawn from the Mathematics list. The remaining elective may come from either department or from the preapproved elective list below.

#### Economics

One of the three Economics electives can be any Economics course with Econ 4011 or Econ 4021 as a prerequisite, including from an approved study abroad program. The other two economics electives must come from the following list:

Code	Title	Units
Econ 404	Behavioral Economics and Experimental Economics	3
Econ 407	Market Design	3
Econ 410	Macroeconomics of Inequality	3
Econ 4111	Optimization and Economic Theory	3
Econ 4151	Applied Econometrics	3
Econ 4160	Topics in Econometrics: Microeconometrics	3
Econ 4210	Topics in Financial Economics: Asset Pricing	3
Econ 4211	Topics in Financial Economics: Investments	3
Econ 435	Open Economy Macroeconomics	3
Econ 437	The Economics of Financial Intermediation	3
Econ 445	Public Finance	3
Econ 452	Industrial Organization	3
Econ 4567	Auction Theory and Practice	3
Econ 460	Urban Economics	3
Econ 467	Game Theory	3
Econ 471	Development Economics	3
Econ 480	Labor Economics	3
Econ 484	Computational Macroeconomics	3

#### Mathematics

The three Mathematics electives must come from the following list:

Code	Title	Units
Math 312	Differential Equations and Dynamical Systems *	3
Math 318	Introduction to Calculus of Several Variables *	3
Math 371	Graph Theory	3
Math 410	Introduction to Fourier Series and Integrals	3
Math 4111	Introduction to Analysis	3
Math 4121	Introduction to Lebesgue Integration	3
Math 415	Partial Differential Equations	3
Math 416	Complex Variables	3
Math 429	Linear Algebra	3
Math 449	Numerical Applied Mathematics	3
Math 450	Topics in Applied Mathematics	3
Math 456	Topics in Financial Mathematics	3
Math 493C	Probability *	3
Math 495C	Stochastic Processes	3

\* Students choosing both Math 312 and Math 318 must complete four L24 Mathematics electives from the list above. Math 493C can be taken for elective credit in the major if SDS 3200 (or SDS 3211) is completed to satisfy the core requirements.

## Preapproved Electives

One elective in the major can come from the following list:

Code	Title	Units
SDS 420	Experimental Design	3
SDS 439	Linear Statistical Models	3
SDS 4392	Advanced Linear Statistical Models	3
SDS 459	Bayesian Statistics	3
SDS 460	Multivariate Statistical Analysis	3
SDS 461	Time Series Analysis	3
SDS 462	Mathematical Foundations of Big Data	3
SDS 475	Statistical Computation	3
SDS 494	Mathematical Statistics	3

## Additional Information

- Students may declare a prime or a second major in Mathematics and Economics via L24 (Math) or L11 (Econ), and that will determine their major advisor.
- Students cannot declare more than one major or minor in the Department of Economics. This restriction includes dual majors, such as Mathematics and Economics (and Economics and Computer Science). Dual majors are considered "in the department" even if they are declared in another department.
- All courses in the major must be completed with the letter grade option, and a grade of at least C- must be earned in each.
- It is possible to earn the Financial Economics Specialization (p. 523) in conjunction with this major (prime or second).
- It is recommended that students completing Math 203 and Math 204 should bypass Math 309 and Math 310. However, they must complete one upper-level Mathematics elective from the list above (with the exception of Math 318) in lieu of Math 309 and Math 310.
- With instructor permission, students may use any of the following for Economics elective credit: Econ 501, Econ 502, Econ 503, Econ 504, Econ 511, or Econ 513.
- Transfer credit, including study abroad approval, for mathematics courses, for probability/statistics courses, or for CSE 131 is approved by the respective departments and is accepted by the Department of Economics for major credit.
- Majors may receive a maximum of 6 units of transfer credit from other colleges/universities to replace Econ 1011 and Econ 1021 (3 units of transfer credit per course). A minimum grade of C- must be earned. Preapproval by the Academic Coordinator (dottie@wustl.edu) in the Department of Economics is required.

- Majors selecting an approved study abroad program (for one semester) may receive transfer credit for Econ 413. **Note:** Many study abroad programs in Europe do not offer the equivalent of Econ 413 in the spring semester. A grade of C (or higher) is required in study abroad course work. Preapproval from the Department of Economics' study abroad advisor is required.
- Majors selecting an approved study abroad program (for one semester) may also receive transfer credit for up to two economics electives. (Majors completing two economics electives abroad are required to complete four economics electives in the major.) A grade of C (or higher) is required in study abroad course work. Preapproval from the department's study abroad advisor is required.
- Majors selecting an approved study abroad program for a full year of study will be handled on a case-by-case basis in terms of meeting degree requirements.
- AP credit for Econ 1011, Econ 1021, Math 131, and/or Math 132 is accepted in the major. Consult with the Department of Mathematics and the Department of Economics for International Baccalaureate and British A-level policies.
- For further details on policies and procedures, please refer to the Undergraduate Guide and the Department of Economics' website, or schedule a meeting with the department's Academic Coordinator (dottie@wustl.edu).

## Additional Requirements

1. A student cannot declare more than one major or minor in the Department of Mathematics. This restriction includes dual majors, such as Mathematics and Economics and Mathematics and Computer Science. These majors are considered "in the department" even if they are declared in another department.
2. No upper-level course used to satisfy a major requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
3. Courses transferred from other accredited colleges and universities can be counted, with the following caveats, if they receive department approval:
  - a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
  - b. At least half of the upper-level units required in a major must be earned at Washington University or in a Washington University-approved overseas study program.
  - c. Courses from the School of Continuing & Professional Studies cannot be used to fulfill major requirements.

## Latin Honors

At the time of graduation, the Department of Mathematics will recommend that a candidate receive Latin Honors (cum laude, magna cum laude, or summa cum laude) if that student has completed the department's requirements for High Distinction or Highest Distinction in Mathematics, including an Honors Thesis. The actual award of Latin Honors is managed by the College of Arts & Sciences.

## The Honors Thesis

Arts & Sciences mathematics majors who want to be candidates for Latin Honors, High Distinction, or Highest Distinction must complete an honors thesis. Writing an honors thesis involves a considerable amount of independent work, reading, creating mathematics, writing a paper that meets acceptable professional standards, and making an oral presentation of the results.

## Types of Projects

An honors thesis can take two forms:

1. A thesis that presents significant work by the student on one or more nontrivial mathematics problems.
2. A substantial expository paper that follows independent study on an advanced topic under the guidance of a department faculty member. Such a report would involve the careful presentation of ideas and the synthesis of materials from several sources.

## Process and Suggested Timeline

### Junior Year, Spring Semester:

1. Talk with a faculty advisor about possible projects.
2. Complete the Honors Proposal Form and submit it to Blake Thornton.

### Senior Year:

1. By the end of January, provide the advisor with a draft abstract and outline of the paper.
2. By the end of February, submit a rough draft, including an abstract, to the advisor.
3. The student and the advisor should agree on a date that the writing will be complete and on a date and time for the oral presentation in mid-March (the deadline is March 31).

## Departmental Prizes

Each year, the department considers graduating majors for three departmental prizes and also awards a prize to juniors. Recipients are recognized at an annual awards ceremony in April where graduating majors each receive a certificate and a set of honors cords to be worn as part of the academic dress at Commencement. Awards are noted on the student's permanent university record.

## Ross Middlemiss Prize

The Ross Middlemiss Prize is awarded to a graduating math major with an outstanding record. The award was established by former Professor Ross Middlemiss, who taught at Washington University for 40 years. Middlemiss authored several books, including a widely popular calculus text that was used in courses offered by the School of Continuing & Professional Studies until the late 1970s.

## Putnam Exam Prize

The Putnam Exam Prize is awarded to a graduating senior who has participated regularly in the Putnam Exam Competition and done exceptionally well throughout their time at Washington University.

## Martin Silverstein Award

The Martin Silverstein Award was established in memory of Professor Martin Silverstein, who, until his death in 2004, was a pioneer in work at the interface of probability theory and harmonic analysis. Graduating students completing any major we offer will be considered for this award, but preference is given to those who have done excellent work in applied mathematics or analysis.

## Brian Blank Award

The Brian Blank Award was established in memory of Professor Brian Blank, who passed away in 2018. Each year, the Department of Mathematics selects distinguished juniors majoring in mathematics for this prize.

## Distinctions in Mathematics and Economics

### Distinction

- Complete one additional course in Economics and one additional course in Mathematics, for a total of nine electives. Both courses must be completed at the 400 level or above with a grade of B or better. (In Economics, "400-level" should be interpreted as a course having an Econ 4011 and/or Econ 4021 prerequisite.)
- Maintain a GPA of 3.7 or higher in all the major courses.
- If the student takes additional courses that satisfy these requirements, then the courses with the lowest grades may be omitted when calculating the GPA for this purpose.

### High Distinction

- Complete all requirements for Distinction.
- Complete an honors thesis in either department (Mathematics or Economics).

## Highest Distinction

- Complete all requirements for High Distinction.
- Complete three additional courses in Economics or Mathematics for a total of 12 electives. At least one of the three additional courses must be taken in each department, and all three additional electives must be completed at the 400 level or above. (In Economics, "400 level" should be interpreted as a course having an Econ 4011 and/or Econ 4021 prerequisite.)
- All 12 electives (including the seven electives for the major, the two electives for Distinction, and the three electives for Highest Distinction) must be completed with a grade of B+ or better.
- If the student takes additional courses that satisfy these requirements, then the courses with the lowest grades may be omitted when calculating the GPA for this purpose.

Phone: 314-935-6301  
Email: mathadvising@wustl.edu  
Website: http://math.wustl.edu

## Mathematics Major Program Requirements

- **Total units required:** 42

### Required Courses

- The three-course calculus sequence (9 units)\* and an introductory computer science course (3 units)\*\*:

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
CSE 131	Introduction to Computer Science	3
<b>Total Units</b>		<b>12</b>

\* AP credit can be applied, and students who have completed Math 203 Honors Mathematics I and Math 204 Honors Mathematics II will have this requirement waived.

\*\* This course may be waived after consultation with the director of undergraduate studies of the Department of Computer Science & Engineering.

- The following required upper-level courses (24 units):\*

Code	Title	Units
Math 310 or Math 310W	Foundations for Higher Mathematics Foundations For Higher Mathematics With Writing	3
Math 4111	Introduction to Analysis	3
Math 4121	Introduction to Lebesgue Integration	3
Math 429	Linear Algebra	3

Math 430	Modern Algebra	3
Math 416	Complex Variables	3
Math 4171	Topology I	3
At least one of the following:		
Math 407	An Introduction to Differential Geometry	3
Math 415	Partial Differential Equations	3
Math 4181	Topology II	3
Math 4351	Number Theory and Cryptography	3

- \* Students who take Math 203 and Math 204 can choose to take an additional elective in place of Math 310/Math 310W.
  - Two additional upper-level mathematics electives that have not been used to fulfill any other requirement (6 units).
    - Upper-level mathematics courses have course numbers that begin with a "3" or higher. Lower-level courses do not count toward upper-level mathematics requirements, even if they are cross-listed as an upper-level course in another department or program.
  - All required courses (both lower- and upper-level) must be taken for a letter grade and completed with a grade of C- or better.

## Additional Information

### Course Substitutions

At most one approved substitution can be made using a course not home-based in the Department of Mathematics.

Any course from another department that is cross-listed as a mathematics L24 course can count as an upper-level elective. Examples include Math 493C Probability, Math 495C Stochastic Processes, Math 501C Theoretical Physics, Math 502C Methods of Theoretical Physics II, and Math 523C Information Theory. Such L24 courses always end with a "C."

In general the following courses can count as upper-level mathematics electives, but specifics may vary for the various majors in the department:

- Phil 403 Mathematical Logic 1 and Phil 404 Mathematical Logic II
- ESE 319 Engineering Mathematics B and ESE 403 Operations Research

## Additional Requirements

1. A student cannot declare more than one major or minor in the department. This restriction includes dual majors, such as Mathematics and Economics and Mathematics and Computer Science. These majors are considered "in the department" even if they are declared in another department.
2. No *upper-level* course used to satisfy a major requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).

3. At most 3 units of independent study or research work can count toward the major requirements.
4. Students may count courses from the Department of Statistics and Data Science (SDS) as Mathematics courses if at least one of the following conditions holds:
  - a. The course is cross-listed in the Department of Mathematics (e.g., Math 493C and Math 495C are cross-listed versions of SDS 493 and SDS 495).
  - b. The student matriculated in 2023-24 or earlier, and the course was previously offered by the Department of Mathematics and Statistics, as reflected by the student's matriculation-year (p. 16) Bulletin (p. 16).
5. At most one of the following courses can be used to fulfill major requirements: Math 308 Mathematics for the Physical Sciences or Math 318 Introduction to Calculus of Several Variables.
6. Courses transferred from other accredited colleges and universities can be counted, with the following caveats, if they receive department approval:
  - a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
  - b. At least half of the upper-level units required in a major must be earned at Washington University or in a Washington University-approved overseas study program.
  - c. Courses from the School of Continuing & Professional Studies cannot be used to fulfill major requirements.

## Latin Honors

At the time of graduation, the Department of Mathematics will recommend that a candidate receive Latin Honors (cum laude, magna cum laude, or summa cum laude) if that student has completed the department's requirements for High Distinction or Highest Distinction in Mathematics, including an Honors Thesis. The actual award of Latin Honors is managed by the College of Arts & Sciences.

## The Honors Thesis

Arts & Sciences mathematics majors who want to be candidates for Latin Honors, High Distinction, or Highest Distinction must complete an honors thesis. Writing an honors thesis involves a considerable amount of independent work, reading, creating mathematics, writing a paper that meets acceptable professional standards, and making an oral presentation of the results.

## Types of Projects

An honors thesis can take two forms:

1. A thesis that presents significant work by the student on one or more nontrivial mathematics problems.
2. A substantial expository paper that follows independent study on an advanced topic under the guidance of a department faculty member. Such a report would involve the careful presentation of ideas and the synthesis of materials from several sources.

## Process and Suggested Timeline

### Junior Year, Spring Semester:

1. Talk with a faculty advisor about possible projects.
2. Complete the Honors Proposal Form and submit it to Blake Thornton.

### Senior Year:

1. By the end of January, provide the advisor with a draft abstract and outline of the paper.
2. By the end of February, submit a rough draft, including an abstract, to the advisor.
3. The student and the advisor should agree on a date that the writing will be complete and on a date and time for the oral presentation in mid-March (the deadline is March 31).

## Departmental Prizes

Each year, the department considers graduating majors for three departmental prizes and also awards a prize to juniors. Recipients are recognized at an annual awards ceremony in April where graduating majors each receive a certificate and a set of honors cords to be worn as part of the academic dress at Commencement. Awards are noted on the student's permanent university record.

### Ross Middlemiss Prize

The Ross Middlemiss Prize is awarded to a graduating math major with an outstanding record. The award was established by former Professor Ross Middlemiss, who taught at Washington University for 40 years. Middlemiss authored several books, including a widely popular calculus text that was used in courses offered by the School of Continuing & Professional Studies until the late 1970s.

### Putnam Exam Prize

The Putnam Exam Prize is awarded to a graduating senior who has participated regularly in the Putnam Exam Competition and done exceptionally well throughout their time at Washington University.

### Martin Silverstein Award

The Martin Silverstein Award was established in memory of Professor Martin Silverstein, who, until his death in 2004, was a pioneer in work at the interface of probability theory and harmonic analysis. Graduating students completing any major we offer will be considered for this award, but preference is given to those who have done excellent work in applied mathematics or analysis.

### Brian Blank Award

The Brian Blank Award was established in memory of Professor Brian Blank, who passed away in 2018. Each year, the Department of Mathematics selects distinguished juniors majoring in mathematics for this prize.

## Distinctions in Mathematics

### Distinction

- Complete at least 33 units of upper-level mathematics courses.
- The GPA for these 33 upper-level units must be at least 3.7. If more than 33 units are taken for a letter grade, the courses with the lowest grades can be omitted when computing the GPA for this purpose.
- Complete at least five courses, each with a B or better, at level 400+.
- All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

### High Distinction

- Complete all requirements for Distinction.
- Complete an honors thesis.

### Highest Distinction

- Complete all requirements for High Distinction.
- Complete at least five courses, each with a grade of B+ or better, at the 400 level or higher. These courses can be the same five courses used for the Distinction requirement, but the grades must be B+ or better.
- Complete one of the two paths described below:
  - **Graduate Qualifier Path:** Graduate qualifier courses\* in mathematics are two-semester sequences that start in the fall. In mathematics, a two-semester graduate qualifier sequence has a qualifier exam at the end of each semester. Students must complete and pass two semesters of qualifier courses\* and their corresponding exams in mathematics. (These courses can involve a single year-long sequence or be the first semesters of two different sequences.)
  - **Course Work Path:**
    - Complete at least 42 units of upper-level mathematics courses. The GPA for these 42 upper-level units must be at least 3.7. If more than 42 units are taken for a letter grade, the courses with the lowest grades can be omitted when computing the GPA for this purpose.
    - Complete at least nine total courses at the 400 level or above, all with a B+ or better. These courses can include the five courses taken for distinction. All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

\* These qualifier courses can count toward the additional course requirements for Distinction.

Email: mathadvising@wustl.edu  
Website: http://math.wustl.edu

## Mathematics Minor

### Program Requirements

- **Total units required:** 27

### Required Courses

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Math 309	Matrix Algebra	3
or Math 429	Linear Algebra	
Math 310	Foundations for Higher Mathematics (or any 400-level course with Math 310 or Math 310W as a prerequisite)	3
or Math 310W	Foundations For Higher Mathematics With Writing	
Three additional upper-level electives (any 300- or 400-level course in the Department of Mathematics)		9
<b>Total Units</b>		<b>27</b>

<sup>1</sup> All required courses (both lower- and upper-level courses) must be completed with a letter grade of C- or better.

## Additional Information

### Course Substitutions

At most one approved substitution can be made using a course not home-based in the Department of Mathematics.

Any course from another department that is cross-listed as a mathematics L24 course can count as an upper-level elective. Examples include Math 493C Probability, Math 495C Stochastic Processes, Math 501C Theoretical Physics, Math 502C Methods of Theoretical Physics II, and Math 523C Information Theory. Such L24 courses always end with a "C."

In general, the following courses can count as upper-level mathematics electives:

- Phil 403 Mathematical Logic 1 and Phil 404 Mathematical Logic II
- ESE 319 Engineering Mathematics B and ESE 403 Operations Research

### Additional Requirements

1. A student cannot declare more than one major or minor in the department. This restriction includes dual majors, such as Mathematics and Economics and Mathematics and Computer Science. These majors are considered "in the department" even if they are declared in another department.

2. No *upper-level* course used to satisfy a minor requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
3. At most, 3 units of independent study or research work can count toward the minor requirements.
4. Students may count courses from the Department of Statistics and Data Science (SDS) as Mathematics courses if at least one of the following conditions holds:
  - a. The course is cross-listed in the Department of Mathematics (e.g., Math 493C and Math 495C are cross-listed versions of SDS 493 and SDS 495).
  - b. The student matriculated in 2023-24 or earlier and the course was previously offered by the Department of Mathematics and Statistics, as reflected by the student's matriculation-year (p. 16) Bulletin (p. 16).
5. At most one of the following courses can be used to fulfill minor requirements: Math 308 Mathematics for the Physical Sciences or Math 318 Introduction to Calculus of Several Variables.
6. Courses transferred from other accredited colleges and universities can be counted, with the following caveats, if they receive department approval:
  - a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
  - b. At least half of the upper-level units required in a minor must be earned at Washington University or in a Washington University-approved overseas study program.
  - c. Courses from the School of Continuing & Professional Studies cannot be used to fulfill minor requirements.

## Music

The Department of Music offers a music program of exceptional quality and diversity. In this varied course of study — where music is approached as a liberal and fine art rather than as an isolated, separate subject — students may pursue practical and creative music-making or study musical traditions and individual works. Music courses are open to all students at the university.

We offer students the opportunity to develop performance skills in voice or instruments through private instruction or through participation in small or large ensembles. Private music lessons with our prominent faculty, including members of the St. Louis Symphony Orchestra, are available in voice, piano, organ, guitar, and all orchestral and jazz instruments.

Music majors can explore critical issues of tradition, individual composers, compositional craft, aesthetic interpretation, and music's social and cultural significance through a wide range of courses, from introductory classes to highly specialized seminars. Instruction is available in jazz, popular music, world musics, the history and literature

of Western music, ethnomusicology, music theory and analysis, musical composition, and electronic music. All performance, creative, and academic endeavors in music are supported by a thorough grounding in musicianship and keyboard skills.

Music majors may take advantage of music-focused study abroad programs in Italy, England, and France. Summer research projects under faculty direction are also available.

Several options are available for students interested in music: the Bachelor of Arts degree with a major in music, the Bachelor of Music degree, a minor in music, and a minor in jazz studies. Students may take the AB degree in combination with a major in another field or as their primary major in a broad liberal arts education. Majoring in music can prepare students well for graduate work and for a variety of musical careers and other professions.

## Performance Opportunities

**Ensembles:** The department sponsors numerous performing ensembles that draw members from the university and the surrounding community. Students must audition for admission to the ensembles. All ensembles are available for graded credit, for credit/no credit, or off roster. Ensembles give one or more public performances each semester. Students who are enrolled for credit in one of the department's ensembles may be entitled to a scholarship that covers a portion of the fee for music lessons.

*Vocal Ensembles:* Concert Choir, Chamber Choir

*Instrumental Ensembles:* Jazz Band, Chamber String Ensembles, Symphony Orchestra, Wind Ensemble, Jazz Combos

**Lessons:** Students may take lessons in voice, piano, organ, guitar, and all orchestral and jazz instruments in the appropriate course sequences. A separate fee is charged for private instruction. Music majors and minors receive a scholarship to cover all or a portion of the fee, respectively. If students enroll for credit in one of the department's ensembles, they are entitled to a scholarship for a portion of the fee for each semester in which they are enrolled. In addition, the department has a limited number of partial scholarships that are based on need and merit.

- Music – General Studies Minor (p. 833)

## Courses

Visit online course listings to view semester offerings for L27 Music.

---

### **L27 Music 100B Brass Lessons: Pre-registration**

All students—both new and returning—must enroll if in this course if you are planning to take lessons on a brass instrument this semester. Once registered for this course, new students must sign up for a placement appointment through the department's website (<https://music.wustl.edu/lesson-placement-days>) to be considered for lessons. After the audition, you will be transferred to the appropriate course and section number once your lessons begin. Enrollment in this pre-registration course and auditioning, does not guarantee a spot in an instructor's studio as there are a limited number of lesson spots. Half-hour lessons are 1 unit and hour-long lessons are 2 units. You may also enroll in 0 credits. Students will be charged the Applied Music Fee according to our Lesson Fee and Rebates Policy (<https://music.wustl.edu/rebates-fees-refund-policy>), if applicable. All students not placed in a studio will be dropped from this course after the ArtSci Add/Drop deadline. Credit variable, maximum 2 units.

---

---

### **L27 Music 100D Percussion Lessons: Pre-registration**

All students-both new and returning-must enroll if in this course if you are planning to take percussion lessons this semester. Once registered for this course, new students must sign up for a placement appointment through the department's website (<https://music.wustl.edu/lesson-placement-days>) to be considered for lessons. After the audition, you will be transferred to the appropriate course and section number once your lessons begin. Enrollment in this pre-registration course and auditioning, does not guarantee a spot in an instructor's studio as there are a limited number of lesson spots. Half-hour lessons are 1 unit and hour-long lessons are 2 units. You may also enroll in 0 credits. Students will be charged the Applied Music Fee according to our Lesson Fee and Rebates Policy (<https://music.wustl.edu/rebates-fees-refund-policy>), if applicable. All students not placed in a studio will be dropped from this course after the ArtSci Add/Drop deadline. Credit variable, maximum 2 units.

---

### **L27 Music 100P Piano Lessons: Pre-registration**

All students-both new and returning-must enroll if in this course if you are planning to take piano lessons this semester. Once registered for this course, new students must sign up for a placement appointment through the department's website (<https://music.wustl.edu/lesson-placement-days>) to be considered for lessons. After the audition, you will be transferred to the appropriate course and section number once your lessons begin. Enrollment in this pre-registration course and auditioning, does not guarantee a spot in an instructor's studio as there are a limited number of lesson spots. Half-hour lessons are 1 unit and hour-long lessons are 2 units. You may also enroll in 0 credits. Students will be charged the Applied Music Fee according to our Lesson Fee and Rebates Policy (<https://music.wustl.edu/rebates-fees-refund-policy>), if applicable. All students not placed in a studio will be dropped from this course after the ArtSci Add/Drop deadline. Credit variable, maximum 2 units.

---

### **L27 Music 100S Strings Lessons: Pre-registration**

All students-both new and returning-must enroll if in this course if you are planning to take lessons on a string instrument this semester. Once registered for this course, new students must sign up for a placement appointment through the department's website (<https://music.wustl.edu/lesson-placement-days>) to be considered for lessons. After the audition, you will be transferred to the appropriate course and section number once your lessons begin. Enrollment in this pre-registration course and auditioning, does not guarantee a spot in an instructor's studio as there are a limited number of lesson spots. Half-hour lessons are 1 unit and hour-long lessons are 2 units. You may also enroll in 0 credits. Students will be charged the Applied Music Fee according to our Lesson Fee and Rebates Policy (<https://music.wustl.edu/rebates-fees-refund-policy>), if applicable. All students not placed in a studio will be dropped from this course after the ArtSci Add/Drop deadline. Credit variable, maximum 2 units.

---

### **L27 Music 100V Voice Lessons: Pre-registration**

All students-both new and returning-must enroll if in this course if you are planning to take voice lessons this semester. Once registered for this course, new students must sign up for a placement appointment through the department's website (<https://music.wustl.edu/lesson-placement-days>) to be considered for lessons. After the audition, you will be transferred to the appropriate course and section number once your lessons begin. Enrollment in this pre-registration course and auditioning, does not guarantee a spot in an instructor's studio as there are a limited number of lesson spots. Half-hour lessons are 1 unit and hour-long lessons are 2 units. You may also enroll in 0 credits. Students

will be charged the Applied Music Fee according to our Lesson Fee and Rebates Policy (<https://music.wustl.edu/rebates-fees-refund-policy>), if applicable. All students not placed in a studio will be dropped from this course after the ArtSci Add/Drop deadline. Credit variable, maximum 2 units.

---

### **L27 Music 100W Woodwinds Lessons: Pre-registration**

All students-both new and returning-must enroll if in this course if you are planning to take lessons on a woodwind instrument this semester. Once registered for this course, new students must sign up for a placement appointment through the department's website (<https://music.wustl.edu/lesson-placement-days>) to be considered for lessons. After the audition, you will be transferred to the appropriate course and section number once your lessons begin. Enrollment in this pre-registration course and auditioning, does not guarantee a spot in an instructor's studio as there are a limited number of lesson spots. Half-hour lessons are 1 unit and hour-long lessons are 2 units. You may also enroll in 0 credits. Students will be charged the Applied Music Fee according to our Lesson Fee and Rebates Policy (<https://music.wustl.edu/rebates-fees-refund-policy>), if applicable. All students not placed in a studio will be dropped from this course after the ArtSci Add/Drop deadline. Credit variable, maximum 2 units.

---

### **L27 Music 1010 Topics in Music**

Credit 3 units.

---

### **L27 Music 101E Introductory Survey of Western Music I**

A survey of "art" music in Western culture from the Middle Ages to the mid 18th-century. Emphasis will be on sacred and secular music of the church, court and middle-class society in its historical and cultural context. Regular listening and writing assignments are designed to develop the capacity to hear perceptively and write critically about the music studied. No prior knowledge of musical notation required. This course is not recommended for music minors or majors. For a one-semester course covering Western classical and popular music and music from other cultures, see 114E Exploring Music. Credit 3 units. A&S IQ: HUM BU: HUM

---

### **L27 Music 1021 Musics of the World**

This course provides an introduction to the field of ethnomusicology as well as a survey of selected musics from around the world. We will investigate not only musical sound itself but how music interacts with other cultural domains, such as religion/cosmology, politics, economics, and social structure. The course will use case studies from regions around world (such as Indonesia, India, the Middle East, Sub-Saharan Africa, and Latin America) to illustrate the conceptual problems and methodologies raised by the cross-cultural study of music, as well as acquaint you with the rich variety of music around the globe. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

### **L27 Music 1022 Popular Music in American Culture**

American popular music from 1800s to the present, with emphasis on technology, social and political contexts, and popular music as a realm of interracial encounter. Musics covered include early jazz, classic blues, swing, classic pop, rock and roll, soul, disco, hip hop and the changing relationship between popular music, film, and television. Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: HUM BU: HUM EN: H

---

---

**L27 Music 1023 Beethoven in His Time and Ours**

Ludwig van Beethoven not only composed some of the most significant works of Western classical music -- he continues to make his mark as the prototypical "troubled genius," symbol for a wide range of political causes, subject of numerous films, and classical music's main representative in American pop culture. We will begin with an exploration of Beethoven's life, music, and historical context and continue by tracing how, after his death, Beethoven became a cultural hero whose image took on a life of its own. Throughout, we will unravel the interaction of music, culture, and mythmaking. No previous musical experience required.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 1024 Mozart: Comedy, Science, Politics, Music**

Wolfgang Amadeus Mozart is one of the most recognized composers of classical music and has come to symbolize beauty, "genius," and technical perfection. In this course, we'll peer behind this beauty and discover that Mozart speaks to some of our most complex present-day concerns. Mozart's music reflects the world of the Enlightenment, as well as challenges to its beliefs about reason and human nature. He also created musical comedies that make provocative, strikingly contemporary statements about power, gender, privilege, and sexuality. And, he delighted in musical engineering challenges and thought carefully about how we perceive music. Our focus works will range from symphonies and piano music to musical theatre. We'll also explore Mozart's afterlife: how his music has figured in film and popular culture. This course is open to all - no previous musical experience is required.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 1026 First-Year Seminar: You Never Heard Such Sounds in Your Life: American Avant-Garde Music**

This first-year seminar introduces students to the fascinating history of avant-garde music making in the United States. A series of case studies will address a number of important avant-garde musicians and schools of thought spanning the early twentieth century to the present. In exploring avant-garde music, students will encounter new ways of thinking about art's place in the world and broaden their notions of music itself. No previous training in music is required. Course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 102E Introductory Survey of Western Music II**

A survey of "art" music in Western culture from the middle of the 18th century to the present. Music of composers from Haydn and Mozart to George Crumb and John Cage will be studied in its historical and cultural context. Regular listening and writing assignments are designed to develop the capacity to hear perceptively and write critically about the music studied. No prior knowledge of musical notation required. This course is not recommended for music minors or majors.

Credit 3 units. A&S IQ: HUM BU: HUM

---

**L27 Music 103E Theory I: Introduction to Music Theory**

Vocabularies and skills basic to music theory introduced through concentrated work in notation, the development of specific compositional skills, and musical analysis. Concepts of musical structure and aesthetic experience will be explored through the study of music from three periods of the western tradition: medieval liturgical chant, music of the Classical period, and music of the early 20th century. Ability to read musical notation required. Keyboard skills desirable. Music 103E is the entry level course for all music minors and majors.

Credit 3 units. A&S IQ: HUM BU: HUM

---

**L27 Music 104E Music Theory II**

A systematic introduction to the basic principles of tonality as manifested in western European music of the 18th and early 19th centuries. Topics include: pitch, time, line and linear elaboration, counterpoint, harmony, phrase, form, and chromaticism. The principles are explored through both musical composition and interpretation of musical artworks. Prerequisite: Music 103E.

Credit 3 units. A&S IQ: HUM BU: HUM

---

**L27 Music 105 History of Jazz**

History of jazz to the present, including its African elements.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 1091 Jazz Theory I**

Jazz Theory I introduces the jazz music language as a preparation for the study of improvisation. The course study consists of basic music theory including music-reading skills and notation, scales, intervals and triads. An introduction to extended tertian chords as derived from the twenty-one modes of the major, melodic and harmonic minor scales forms the basis of the jazz harmonic language. The study of chord progression and chord substitution, song form and the blues prepares the student for a detailed study of the modern jazz language.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L27 Music 1092 Jazz Theory II**

Jazz Theory II outlines the harmonic, rhythmic and improvisational practices from the Bebop period of the late 1940's to the jazz music of the present-day. Discussions include intermediate to advanced chord substitution, quartal and bitonal harmony, modal improvisation, pentatonic scales and polyrhythmic drumming, concentrating on the work the major improvisors of the 1950's-1970's. Prerequisite: Music 1091.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L27 Music 109M Mathematics and Music**

An elementary introduction to the connections between mathematics and musical sound. Review of integers, ratios, prime numbers, functions, rationality, exponents, logarithms, trigonometry. Review of scales, clefs, key signatures, intervals, time signatures. Frequency and pitch. The connection between intervals and logarithms. Tuning and temperament, just intonation. Scales and modular arithmetic. The mathematics of harmony; the sound of the low prime numbers and their roles in harmony. Harmonics, partials and overtones. Numerical integration and basic Fourier analysis. The nature of complex tones. Analysis of instrument sounds. Human vowels and formants. Prerequisites: 2 years of high school algebra, and trigonometry. Same as L24 Math 109

**L27 Music 1165 First-Year Seminar: On Broadway - Musicals, Race, Place**

The Broadway theatres are closed, but pressure to make these stages more racially and ethnically diverse when they re-open is strong. This course looks at the history of the Broadway theatres and the ways this coveted theatrical real estate in midtown Manhattan has played host to white and non-white performers in the signature American theatrical genre: the musical. Using digital and archival research tools, including an abundance of maps, our study stretches from the creation of the Theatre District at the turn of the 20th century to the present. We will examine groundbreaking and all-too-typical shows -- from "Show Boat" to "Hamilton" -- and look closely for how systemic racism has played out on Broadway stages for Broadway's mostly white audience. We will produce original research and explore digital humanities methods related to questions of racial inequality in commercial popular culture. This course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM, SC BU: BA, HUM EN: H

---

**L27 Music 1171 Beethoven and Van Gogh: Myths of Creativity, Genius and Madness**

This course draws into dialogue the creative ambitions, artistic production, critical reception and the historical construction of personae and oeuvres of two exceptionally productive and iconic artists who worked in different media: Ludwig von Beethoven (1770-1827) in music and Vincent van Gogh (1853-1890) in painting. We will introduce students to methods of musical and art historical analysis, and then build on those skills to examine the historical contexts within which these artists worked, as well as the ways in which their reputations were established. This course will also consider how Beethoven and Van Gogh became exemplars of creativity and genius for later audiences and artists, leading us to explore fundamental and provocative questions in the humanities. Course is for first-year, non-transfer students only.

---

**L27 Music 119 Guitar Class I**

Intended for students with little to no formal musical training. An introduction to guitar fundamentals through the study of note reading, scales/arpeggios, technique, chord playing, and repertoire from diverse music styles, while integrating basic music theory and listening to historical guitar recordings. Students may self-enroll or be placed by audition. Students will have access to rent an acoustic guitar for the semester or bring their own. Note: If a class does not have 3 students enrolled at the end of the drop/add period, it will be cancelled. Pending studio space, enrolled students may then opt to take private lessons for the remainder of the semester, and the fee will be prorated accordingly. Credit 1 unit.

---

**L27 Music 120 Guitar Class II**

A continuation of the topics and techniques introduced in Guitar I: Guitar fundamentals through the study of note reading, scales/arpeggios, technique, chord playing, and repertoire from diverse music styles, while integrating basic music theory and listening to historical guitar recordings. Prerequisite: Guitar I or permission of the instructor. Students will have access to rent an acoustic guitar for the semester or bring their own. Note: If a class does not have 3 students enrolled at the end of the drop/add period, it will be cancelled. Pending studio space, enrolled students may then opt to take private lessons for the remainder of the semester, and the fee will be prorated accordingly. Credit 1 unit.

---

**L27 Music 121C Classical Theory I**

This course is the first semester of a yearlong sequence about harmony and voice leading in tonal music. We will cover a number of topics, including scales, intervals, triads, seventh chords, harmonic function, and phrase structure. Ability to read musical notation is desirable. Students who register for Music 121C are required to register for one of the subsections.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 1225 Race, Realism, and Representation from Madama Butterfly to Hamilton**

In the Euro-American tradition, operas and musicals have long normalized the portrayal of (usually white) performers as characters of other races. Only in recent decades has the work of activists, performers, and scholars, pushed the cultural conversation to critique these practices as racist, exoticist, and culturally appropriative. On the live stage and on screen, music theater in recent years have paid careful attention to racially sensitive casting as a matter of restorative justice. We intuitively understand today that it is disrespectful for performers to portray themselves as characters of color outside their cultural background, but how has this relatively new idea come to be? How have performers of color engaged with this body of work over the past century? How have imagined narratives about the experiences of marginalized peoples affected the lives of the groups of people being depicted? Who has the cultural authority (or authenticity) to tell stories about others, and how has that authority been constructed and construed across different places and times? This course introduces students to the fraught and complex history of music theater in which performers portray racialized roles outside of their own identities. The syllabus pays particular attention to histories of music-theatrical yellowface as a racialized practice that - unlike brownface and blackface which have become taboo - continues to appear on performing arts stages today. Understanding the historical context in which these works arose and became popular, as well as analyzing the musical and dramatic techniques they utilized, can give us insight into their enduring legacy through to the present day. We will also complicate the easy rejection of this tradition by paying close attention to the history of people of color who, for the past hundred years, participated in, contributed to, and even loved, this body of work.

**L27 Music 130 Composition Workshop**

An introductory course in contemporary music composition, with a 30-minute private lesson and weekly master class.  
Credit 2 units.

---

**L27 Music 1313 Digital Audio and Multitracking: An Introduction to Electronic Music**

An exploration of the foundational techniques of electronic music through hands-on, project-based learning. Our primary goal will be to learn to be creative in the recording studio. To that end, we will build proficiency in audio manipulations, recording and production techniques, sampling, MIDI sequencing, and signal processing. We'll learn to use a variety of technical tools, chief among them the digital audio workstation (DAW), the microphone, and Wash U's unique collection of analog synthesizers. Along the way, we'll train our ears to recognize subtle qualities of recorded sound, and we'll learn to compose with audio as an expressive medium. All genres and musical backgrounds welcome.  
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L27 Music 175W Winds and Percussion**

Credit variable, maximum 2 units.

---

**L27 Music 221 Music Theory III**

Concentrated study of the principles of tonal counterpoint and their application to the interpretation of Bach keyboard suites. Class work includes both writing and analysis. Prerequisite: Music 104E.  
Credit 3 units. A&S IQ: HUM

---

**L27 Music 2213 Singers Performance Workshop: Broadway and Musical Theater**

Developing performance skills for young singers in musical theatre that will help students prepare music for rehearsal, performance, and audition. Semester's work includes musical, vocal, and diction coachings, research, and dramatic analysis. The class will culminate in the preparation and performance of both solo and ensemble pieces. Prerequisite: audition and permission of instructor.  
Credit 1 unit. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L27 Music 221C Classical Theory III**

A synthesis of the knowledge gained in Theory I-II as it applies to the detailed analysis of 18th-, 19th-, and selected 20th-century works (Bach through Bartok). Prerequisite: Music 122C or 122J.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 222 Music Theory IV**

Continuation of Mus 221 with study of 18th- and 19th-century harmonic, textural, and structural procedures (Bach through Brahms). Prerequisite: Mus 221.  
Credit 3 units. A&S IQ: HUM

---

**L27 Music 2231 Musicianship I**

Basic ear training, sight singing, and dictation skills. Three hours a week. Prerequisite: Music 104E.  
Credit 1 unit.

---

**L27 Music 2232 Keyboard Skills III**

Intermediate skills in score reading as well as the introduction of inversions, figured bass, and improvising melodies. Prerequisite: permission of instructor for nonmajors. One and one-half class hours a week.  
Credit 1 unit.

---

**L27 Music 2241 Musicianship II**

Continuation of Music 2231. Intermediate-level ear training, sight singing, and dictation skills. Prerequisite: Music 2231. Two and one-half class hours a week.  
Credit 1 unit.

---

**L27 Music 2242 Keyboard Skills IV**

Intermediate skills in score reading as well as the introduction of inversions, figured bass, and improvising melodies. Prerequisite: permission of instructor for nonmajors. Concurrent registration in Mus 2231 and 2241 required of all music majors. One and one-half class hours a week.  
Credit 1 unit.

---

**L27 Music 227 Selected Area for Special Study**

In-depth study in areas of special interest. Prerequisite: permission of instructor.  
Credit 3 units.

---

**L27 Music 228 Selected Area for Special Study**

In-depth study in areas of special interest. Prerequisite: permission of instructor.  
Credit 3 units. A&S IQ: HUM EN: H

---

**L27 Music 230 Composition**

An intermediate course in contemporary music composition, with a 30-minute private lesson and weekly master class. Prerequisite: Music 229 or permission of instructor.  
Credit 2 units.

---

**L27 Music 231C Small Chamber Ensembles**

Students interested in performance of chamber music are organized into various ensembles and assigned a coach. A public chamber music concert is given once each semester. May be repeated for credit. Prerequisite: permission of the instructor. Special fee, \$135, and special registration procedures. See heading at "Applied Music".  
Credit variable, maximum 1 units.

---

**L27 Music 232W Wind Ensemble**

A group of select woodwind and brass players who form brass and woodwind choirs and smaller ensembles such as quintets and quartets. The weekly rehearsals are coached. The ensembles perform on student recitals and at various campus functions.  
Credit variable, maximum 1 units.

---

**L27 Music 233 Jazz Band**

Study of the literature of big band jazz. Concerts presented each semester. May be repeated for credit. Prerequisite: admission by audition. Two and one-half rehearsal hours a week.  
Credit variable, maximum 1 units.

---

**L27 Music 234S Symphony Orchestra**

Performance and reading of works for orchestra. May be repeated for credit. Prerequisite: admission by audition. Two and one half class hours a week including sectionals.  
Credit variable, maximum 1 units.

---

**L27 Music 236J Jazz Combo**

Students are placed in small combos for regular, weekly coaching. May be repeated for credit. Prerequisite, permission of department.

Credit variable, maximum 1 units.

---

**L27 Music 237 Concert Choir**

Concert Choir takes an academic and artistic approach to the study and performance of choral literature from a variety of historic and modern sources. May be repeated for credit. Please see the department's website for audition dates.

Credit variable, maximum 1 units.

---

**L27 Music 238 Chamber Choir**

Study and performance of advanced repertoire for small vocal ensemble from Renaissance to the present. May be repeated for credit. Prereq: audition and consent of instructor.

Credit variable, maximum 1 units.

---

**L27 Music 270G Jazz Guitar**

Credit variable, maximum 2 units.

---

**L27 Music 270J Jazz Brass**

Credit variable, maximum 3 units.

---

**L27 Music 270P Jazz Piano**

Credit variable, maximum 2 units.

---

**L27 Music 270S Jazz Strings**

Credit variable, maximum 2 units.

---

**L27 Music 270V Jazz Voice**

Credit variable, maximum 2 units.

---

**L27 Music 270W Jazz Winds and Percussion**

Credit variable, maximum 2 units.

---

**L27 Music 275G Guitar**

Credit variable, maximum 2 units.

---

**L27 Music 275O Organ**

Credit variable, maximum 2 units.

---

**L27 Music 275P Piano**

Credit variable, maximum 2 units.

---

**L27 Music 275S Strings**

Credit variable, maximum 2 units.

---

**L27 Music 275V Voice**

Credit variable, maximum 2 units.

---

**L27 Music 275W Winds and Percussion**

Credit variable, maximum 2 units.

---

**L27 Music 295 Independent Study**

Supervised independent study in areas in which there are no current course offerings. Student must submit to the department chair an outline of the work to be covered, the number of credit hours requested for the work, and the name of the instructor who will be asked to supervise the work. Class hours variable, depending on credit.

Credit variable, maximum 3 units.

---

**L27 Music 296 Independent Study**

Supervised independent study in areas in which there are no current course offerings. Student must submit to the department chair an outline of the work to be covered, the number of credit hours requested for the work, and the name of the instructor who will be asked to supervise the work. Class hours variable, depending on credit.

Credit variable, maximum 3 units.

---

**L27 Music 298 Directed Internship**

Students receive credit for a faculty-directed and approved internship, usually with a music professional or musical organization. The primary objective of the internship is to obtain professional experience outside the classroom. Students obtain a Learning Agreement from the Career Center and have it signed by the Career Center, the faculty sponsor, and the site supervisor, if appropriate. A final written project is to be agreed upon before work begins and will be evaluated by the faculty sponsor at the end of the internship. Credit should correspond to actual time spent in work activities; e.g., 8-10 hours per week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours. Refer to \*\* section/faculty list at start of this departmental entry for faculty selections in this course.

Credit variable, maximum 3 units.

---

**L27 Music 299 Performance Project**

Students may contract with a faculty supervisor for credit for work on musical performance projects or research on musical performance. Contracts must be signed by the student, the faculty supervisor, and the department chair before the student's work on the project commences. Refer to \*\* section/faculty list at start of this departmental entry for faculty selections in this course.

Credit variable, maximum 3 units.

---

**L27 Music 3011 Music History I: Music in Europe from the Earliest Notation to 1700**

A study of music history and literature from the Middle Ages to 1700. Composers treated include Machaut, Dufay, Josquin, Palestrina, Monteverdi, Vivaldi, Handel, and Bach. Prereq: Music 121 or permission of the instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 3012 Music History II: The Invention of Classical Music, 1700-1850**

This course is a historical, critical exploration of "classical music." During our focus period—the long eighteenth and nineteenth centuries—musicians and audiences invented what we now know as the culture of classical music, creating some of its canonic musical works and developing its core institutions and belief systems. In this course, we will work inside and beyond the score. We'll engage in intensive listening and analysis, from songs to symphonies. We'll also consider broader cultural issues, particularly: How did the culture of classical music reflect the social ambitions of privileged musicians and listeners? What and who got marginalized within this culture, and how can we discover more inclusive, diverse histories of classical music? Prereq Music 3011 or Music 104E.

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 3014 Ethnomusicology**

This course provides an introduction to the field of ethnomusicology, defined broadly as "the study of music in-or-as-culture" or "the study of people making music." We will explore the varied ethnographic, anthropological, historical, and music-analytical approaches that ethnomusicologists have employed to explain the vital role of music-

making in diverse human societies. We will seek to understand the social significance of a variety of musical practices, drawing on ethnomusicological scholarship to address music's performance, circulation, and reception. Case studies from around the world will demonstrate the multiple ways that sound shapes-and is shaped by-issues of cultural practice and representation, ideologies of authenticity, intersectional identities, cultural memory, ideas and structures of tradition, colonialism and post-colonialism, transnationalism and globalization. Our case studies will introduce students to a number of important musical genres and traditions, including (in the order in which they appear in the class): Mbira (Zimbabwe), Andean Kena music (Peru), Jazz (U.S.), Samba (Brazil), Gamelan (Java), Funk (U.S.), Egyptian musics, Ottoman-Turkish classical music, Karnatic Music (South India), Gisaeng music (Korea), Ngoma (South Africa), Agbekor (Ghana), Hip Hop (U.S.), and Noise (Japan).

### L27 Music 3015 American Popular Music and Media

This course considers the history of American popular music as delivered by successive mass media platforms in the industrial and post-industrial eras: from mass-produced sheet music in the mid nineteenth century to digital music and video on the internet. Historical contextualization and in depth analysis of musical scores and various kinds of audio recordings and audiovisual texts will be at the center of the course. Topics to be considered include: the history of sound recording technologies and formats; the role of electronic mass media structures (radio, film, television, the internet); urbanization, national commercial music centers (New York, Hollywood, Nashville), and the importance of regional sounds in a national context; the formation and transformation of select genres (rock, country, various black musics); legal frameworks relating to music as a commodity (copyright, sampling); the impact of visual media on music dissemination, performance, and meanings; and how recorded media of all kinds have transformed the act of listening. Issues of race, gender, sexuality, personal, and national identity will be considered across the course.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L27 Music 3016 Topics in Music History and Culture: Race and Performers of Musical Theatre, 1700 to Now

This course looks at how race has shaped the careers of performers of musical theatre in Europe and the US from the eighteenth-century to today. European and American opera and Broadway musicals will be considered side by side, as will the performance of white, Black, Asian, and Latino identities. Of particular interest are the changing (and stubbornly unchanging) standards and stereotypes that shape individual performing careers in different times and places.

Credit 3 units. A&S IQ: HUM EN: H

---

### L27 Music 3017 Music History III: Classical Music in Flux, 1850 to the Present

A study of music history and literature from 1850 to the present. Composers treated include Mahler, Debussy, Stravinsky, Schoenberg, Bartok, Copland, Shostakovich, Cage, Reich, and Gubaidulina. Prerequisites: L27 3012 or L27 122C.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

### L27 Music 3018 The Invention of Classical Music

This course explores the historical roots of what we often call "Western classical music": not just the repertoire, but its culture and ideologies. Our chronological scope will extend from the beginning of the eighteenth century through the nineteenth, a time when musicians, intellectuals, entrepreneurs, and audiences developed classical music as we know it.

Credit 3 units. A&S IQ: HUM, LCD, WI EN: H

---

### L27 Music 3020 Music of the Caribbean

Wanna get away? This and other tourism slogans depend on a popular conception of regions such as the Caribbean as distant and desirable, simple places out of sync with the modern world. This course critiques constructions of the Caribbean through engaging ethnomusicological literature representing the diversity of the region. It is a topical appraisal of Caribbean music, emphasizing history and memory, tourism, and cultural influence. The chosen readings are not meant to represent the entire region; rather, they are intended to prompt ideas and questions about regional discourses.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

### L27 Music 3021 Music of the African Diaspora

This course explores musical cross-fertilization between the African continent and South America, the Caribbean, and Europe. Beginning with traditional musics from selected regions of the African continent, the course examines the cultural and musical implications of transnational musical flows on peoples of the African diaspora and their multicultural audiences.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

### L27 Music 3022 Native American Musical Traditions of the Western U.S.

Exploration of music and its historical and contemporary contexts among Native American cultures of the southwest and the northern plains, chiefly Navajo and Lakota, but with some considerations of Pueblo, Shoshone, and other nations. Examinations of inter-tribal pow-wow movements, crossover musics, European appropriation and refashioning of Native American culture in Hollywood and elsewhere.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM

---

### L27 Music 3023 Jazz in American Culture

This course will address the role of jazz within the context of twentieth-century African American and American cultural history, with particular emphasis on the ways in which jazz has shaped, and has been shaped by, ideas about race, gender, economics, and politics. We will make use of recordings and primary sources from the 1910s to the present in order to address the relationship between jazz performances and critical and historical thinking about jazz. This course is not a survey, and students should already be familiar with basic jazz history.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

---

### L27 Music 3028 Music of the 1960's

The music of the 1960s played a significant and widely noted role in an era of global political and social upheaval. This course surveys a broad range of music produced during the decade, spanning the world but with emphasis on Anglo-American popular music. While a music course traditionally deals with a single genre such as "world music," classical, or jazz, this course will analyze several genres together to show how each influenced the others and how all were informed by broader social and cultural concerns. The course thus will both familiarize students with diverse musical traditions and introduce them to a new way of thinking about music and culture. Topics to be discussed include the transnational music industry; the contested concept of "folk" and "traditional" music; music and political protest; music and migration; and music's relation to ethnic and class identity.

### L27 Music 3029 Game of Thrones, Game of Tones: Medieval Music in the Age of HBO

Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

---

**L27 Music 3030 Love Songs and Laptops: Rediscovering Medieval Music in the Digital Age**

Using our laptops as portals into the past, students will gain first-hand experience as historical detectives. In this course, we will explore the world of medieval love—from the chivalrous and courtly to the bodily and obscene—as represented in books of songs from the fifteenth century. Scrumptiously decorated and preserved, five interrelated songbooks from central France, known as the "Loire Valley Chansonniers" contain the majority of love songs from this period. Working from digitized versions of the songbooks, online editions, and modern audio recordings, we will address the following questions: what do the songbooks tell us about the culture in which they were created? How do the graphic decorations that frame each song interact with its music and lyrics? Lastly, by contextualizing these digital sources with respect to the growing interest in the interface between the humanities and digital technology, we will discuss what we can gain from these developments and what—if anything—we stand to lose. (Ability to read music not required.)

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 3032 The Science of Singing**

Introductory look at the physiology and acoustics of singing. Topics we will study include how the voice works in general and the different ways individual singers use their voices; how understanding this science can improve one's singing; how to maintain vocal health; how the voice changes across the lifespan; and psychological aspects of performing. The ability to read music is not required for this course.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L27 Music 3033 Music, Sound, and the Body**

How do musicians use their bodies when creating music? How do audiences, listeners, and dancers feel music in their bodies and contribute to making sound? This course explores embodied perspectives on making, sensing, and moving to music and sound. Examining theories of the body and the senses as they relate to sound practices, the course draws on scholarship from ethnomusicology, anthropology, sound, dance and performance studies, music cognition and other fields. Case studies include EDM, reggae, and salsa dance; Afro-Brazilian and Buddhist religious practices; and music healing and therapy. Because centering the body means considering lived experience along intersecting axes of difference, course readings and discussions will focus on issues of race, ethnicity, gender, sexuality, and (dis)ability. Students will develop their own ethnographic project, and they will be asked to participate in music-movement workshops throughout the course. However, neither previous dance experience nor normative bodily ability are required.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 3034 Roots of Lofi Hip Hop: Amateur Music Making, Recording Technology, and Globalization**

Lofi hip hop is a style of music made by amateur beatmakers that mixes Japanese and African American aesthetics. It relies on anime visuals, scratchy jazz samples, and repetitive drum loops. It serves primarily as background music. This course is about the sounds and popularity of lofi hip hop in the twenty-first century. But to understand this genre, students will also focus on the genre's roots. We learn about French composers' early attempts to create background music at the turn of the twentieth century. We learn about American teenagers who took over their suburban garages to create an energetic style of rock and roll during the 1960s. We learn about how anthropologists during the 1930s thought that low fidelity recordings of blues and country musicians was evidence of their musical authenticity. And we will learn about how jazz harmonies and samples influenced the music of groups like A Tribe Called Quest and De La Soul. Lofi gives us a jumping off point for exploring a wide range of genres and histories. The final assignment will be a collaborative effort. As a class, students will make and publish

a podcast about lofi hip hop and its antecedents. This podcast will feature original lofi hip hop made by the class. The original music will also serve as background music to a study-session event organized by the class towards the end of the semester.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L27 Music 3035 Music and Queer Performance**

This course examines how music serves as a delightful site for performing, negotiating, and living queerness. Some questions we will ask include: How does queer musical performance inhabit the full gamut between conformity and subversion, irony and sincerity, or camp and authenticity? How do performers use or resist tropes of belonging, passing, and coming out to constitute queer performance? How do singers manipulate the sound of their voice, the gendered associations carried by that sound, and the assumptions about the body which produces it? Are queer musical acts a mode of performance or a way of being, and who decides? We will analyze a range of examples from the past and from contemporary popular culture: soft masculinities, cowboy and country personas, cross-dressing in music theater, lip-syncing drag queens and kings, high-femme divas, and performers of androgynous, cyborg, and post-human aesthetics. The parameters for what counts as queer performance are capacious, and students will have plenty of opportunities to contribute their own examples and case studies to the course.

**L27 Music 3050 Music and Masculinity in the Movies of Martin Scorsese**

This course considers the work of American filmmaker Martin Scorsese, with close attention to (1) how Scorsese uses music (and sound) to construct intense cinematic worlds and (2) how his film characters and plots represent various sorts of white American men. The consistent collision between Scorsese's interest in music as a driver of film style and content and his penchant for male-centered, frequently violent narratives makes him an ideal central figure for our study of white American masculinities at the movies over the last five decades. Films to be studied include "Mean Streets," "Taxi Driver," "Raging Bull," "Goodfellas," "Cape Fear," "The Departed," "Shutter Island," and "The Wolf of Wall Street." Required screenings.

Same as L53 Film 305

**L27 Music 3091 Jazz Improvisation I**

An introduction to improvising music in the jazz tradition, including diatonic and chromatic harmony, extended chords, modes, and jazz scales. Exercises in basic aspects of the blues and in the styles of bebop and modern jazz. PREREQ: Music 121J or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 3132 Romantic Revolutions in European Music and Culture**

The early nineteenth century in Europe witnessed sweeping changes in social, political, and cultural life, but some of the most fascinating happened in music. This course considers intersections between Romantic thinking about music—which inspired an idealistic vision of the art form as a source of quasi-spiritual experience—and other contemporary "revolutions." To what extent was Romantic music a "holy art" that offered a refuge from the world? In what ways was it a worldly participant in larger currents in society and culture? By exploring these questions and more, students will develop the skills and framework needed to incorporate works of music into their investigation of enduring issues in history and the humanities. Although

this course will require listening and viewing of musical works, it is designed for students with intellectual curiosity but without prior musical background. We will also require weekly readings, occasional presentations, three short papers, and spirited class discussion.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

### **L27 Music 321T Music Theory IV: Topics in Music Theory**

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### **L27 Music 3221 Music Cognition**

An introduction to modern research on music perception and cognition. The course covers four main topics: the perception of key, the psychoacoustics of dissonance, the relationship between attention and musical meter, and the process by which melodies establish, fulfill, and deny expectations. Students read and discuss research from both cognitive science and music theory, in addition to completing several projects.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: HUM

---

### **L27 Music 3223 Computational Models of Music Theory and Cognition**

We will study computational models that simulate the perception of several aspects of music: phase structure, meter, melody, key, harmony, counterpoint, and texture. In addition to reading about and discussing these models, students will work with them directly by running them on their own. We will also spend some class time on perceptual experiments related to the models we study. Although the course will focus on models of perception, emphasis will be placed on ones that are also pertinent to music theory, and these connections will be discussed.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### **L27 Music 3231 Advanced Musicianship**

Individualized instruction in advanced ear training, sight singing, and dictation skills. Prerequisite: Music 2241

Credit 3 units. BU: HUM

---

### **L27 Music 3232 Keyboard Skills V**

Advanced skills in score reading, figured bass, and improvisation, as well as drills, including seventh chords and modulation. Prerequisites: Mus 2242. One and one-half class hours a week.

Credit 1 unit.

---

### **L27 Music 3235 Compositional Craft in Film Scores and Musical Theatre**

This course examines compositional techniques and aesthetics in two forms of popular music: film/television scores and musical theatre.

Popular songs and other musical works associated with film, television, and musicals are analyzed from multiple perspectives, giving students insight into the sonic, visual, and dramatic techniques employed by major composers. Students engage with the material in rigorous yet practical ways, from analytical projects to deep-listening exercises. This approach emphasizes sonic experience and situated musicianship as the primary means of accessing complex concepts from music theory.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### **L27 Music 3236 Music Arranging for the Multi-Genre Artist**

This course examines the practice of music arranging for numerous applications including ensembles in jazz, rock, pop, a cappella, classical music, new music, and new media. Students analyze musical scores for small and large groups and compose arrangements in a variety of genres. Also learned are instrumentation, vocal ranges, basic orchestration, idiomatic instrumental techniques, chord voicings, and textures, all in the contexts of specific styles and genres. Overall, the course provides an introduction to industry-standard techniques of music arranging.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### **L27 Music 3237 The Art of Popular Song: From Folk and Musical Theatre to Rock and Contemporary A Capella**

This course explores the art of songwriting through the lens of American popular music. Students examine landmark songs from multiple eras and create their own original songs in a variety of styles from the precursors of American music to folk, rock, pop, rhythm and blues, Broadway, and a cappella. The course materials include applied popular music theory while examining the musical languages of each genre. Through composing and arranging, listening and analysis, students gain insight into the sonic structure and cultural significance of popular music. The course also responds to students' individual interests and performance backgrounds, offering opportunities to write music for vocal ensembles, singer-songwriter formats, bands and electronic media. Traditional composition and contemporary production practices are examined in detail as students learn to critically listen and find their personal musical styles.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### **L27 Music 3238 Towards a New Music**

Towards a New Music addresses the numerous possibilities for emerging music, including future musics in a reimagined world of the nature of music itself. In our study, music is situated as part of a web of metapatterns that explain the structure and nature of musical materials, the actions in composition and improvisation, and musical phenomena. Students are placed on a listener's journey of discovery to find the nature of music through philosophy, cognitive science, mathematics, biology, architecture and the structure of sound itself. Music theory topics both simple and advanced are discussed in ways appropriate for the novice as well as the advanced student. The course functions as a music theory and music literature study through the lens of the humanities. The course embraces both culture and nature, seeking out the grand-scale patterns that help explain the qualities of

our musical endeavor. The course begins with the archetypal patterns of space, both structural/formal and relational, and then turns to the concepts that infuse the workings of time: a virtual sonic reality of space and time and the mind of music, revealed in thought-provoking and new contexts.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L27 Music 325 Instrumentation and Orchestration

A study of the principles of instrumentation and orchestration. In-class assignments will aid in the understanding of the capabilities and limitations of the orchestral instruments. Analysis of orchestral scores will provide insight into efficient and creative use of the orchestra. Prerequisite: Music 121C or permission of the instructor.

Credit 3 units.

---

### L27 Music 326 Orchestration

A practicum in writing for orchestra and groups of orchestral instruments. Prerequisite: Mus 325.

Credit 3 units.

---

### L27 Music 3271 Analysis and Performance

This course develops music-analysis skills useful to performers, focusing on topics such as form, phrase structure, texture, orchestration, style identification as a stage, and ear training. Students will analyze pieces they are working on in lessons and ensembles and periodically perform these pieces in class. Prerequisite: Music 122C or 122J, as well as concurrent enrollment in lessons or an ensemble.

Credit 3 units. A&S IQ: HUM EN: H

---

### L27 Music 328 History of the Film Score

This course looks at the role of music in Hollywood films from the beginning of the sound era to the present. Larger themes include the importance of technology, industry structures shaping the nature of scores, notable film music composers, the relationship between music, gender and genre, music's role in the adaptation of literary texts to film, the power of directors to shape the content of film scores, and the importance of popular music as a driving economic and aesthetic force in film music history. Films to be screened include *From Here to Eternity*, *Stagecoach*, *High Noon*, *The Night of the Hunter*, *Butch Cassidy and the Sundance Kid*, *Born on the Fourth of July*, *Casino*, *Jarhead* and *The Social Network*. Required Screenings Same as L53 Film 360

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

---

### L27 Music 329 Advanced Composition Workshop I

A more advanced course in contemporary music composition, with a 50-minute private lesson and weekly master class. Prerequisite: Music 230 or permission of instructor.

Credit 3 units. A&S IQ: HUM

---

### L27 Music 330 Advanced Composition Workshop

A more advanced course in contemporary music composition, with a 50-minute private lesson and weekly master class.

Credit variable, maximum 3 units.

---

### L27 Music 3313 Interactivity and DSP: Laptop Music

This course is a project-based exploration of interactive "laptop music" using the Max/MSP programming environment. (Laptop not required; we have class desktops that will work too.) It will cover the composition of interactive computer music as well as the theory and application of MIDI, synthesis, and digital signal processing. We will learn through weekly programming exercises, readings and tutorials, and engagement with scores, recordings, and software. For

Midterm and Final Projects, students will design digital instruments and compose interactive pieces for the class to play as an ad hoc "laptop ensemble." Both pieces will be planned in advance and workshopped in class throughout the semester. By permission of instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L27 Music 334 Symphony Orchestra

This is a course for a select ensemble of about 75 players that performs a repertoire from the baroque to the modern periods in four public concerts a year. Collegiate member, American Symphony Orchestra League. May be repeated for credit. Prerequisite: Admission by audition. Four rehearsal hours a week.

Credit 1 unit.

---

### L27 Music 339 Introduction to Conducting I

Fundamentals of conducting, including the study of transposing instruments and practice in score reading. Prerequisite: permission of instructor.

Credit 2 units.

---

### L27 Music 340 Introduction to Conducting II

Fundamentals of conducting, including the study of transposing instruments and practice in score reading. Prerequisite: permission of instructor.

Credit 2 units.

---

### L27 Music 3586 Combat Movie Music and Sound After Vietnam

This course considers the Hollywood combat movie genre after the Vietnam War (post 1975) by listening closely to how these always noisy films use music and sound effects to tell stories of American manhood and militarism. Centering on an elite group of prestige films--actions movies with a message for adult audiences--the course examines thirty-five years of Hollywood representations of World War II, the Vietnam War, the Gulf War, and post-9/11 wars against terrorism. Close analysis of how combat film directors and composers have used music and sound in conjunction with the cinematic image will be set within a larger context of ancillary texts (source materials, soundtrack recordings, published and unpublished scripts), media folios (press kits, reviews, editorials, newspaper and magazine stories and interviews), and scholarly writing from across the disciplines. Films to be screened include *Apocalypse Now*, *Platoon*, *Hamburger Hill*, *Courage Under Fire*, *Saving Private Ryan*, *The Thin Red Line*, *We Were Soldiers*, *Flags of our Fathers*, *The Hurt Locker*, and *Act of Valor*, as well as pre-1975 combat films starring John Wayne. The ability to read music is not required. Required Screenings. Prerequisites: None

**L27 Music 400 Independent Study**

Credit 3 units.

---

**L27 Music 401 Elementary Technique of Electronic Music: Synth Lab**

Individual and small group instruction in "classical" procedures and relevant electronic technology. Prerequisite: open to music majors; to others by permission of instructor. Credit contingent upon completion of Mus 402.

Credit 3 units. A&S IQ: HUM EN: H

---

**L27 Music 402 Advanced Techniques in Electronic Music: Studio Songwriting**

How does the act of recording and manipulating sound change the way we write songs? How can the tones and moods of a recording interact with notes and rhythms and words? We'll look for answers through experiments in composition, collaboration, and critical listening. Topics

will include beatmaking, sound collage, vocal manipulations, sampling, and virtual spaces. Formal training is not required, though we will engage (and learn) basic music theory concepts. PREREQ: permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

---

**L27 Music 4052 Music, Sound, and the Body**

This course examines theories of the body, embodiment, and the senses as they relate to music and sound practices. Readings draw on scholarship from ethnomusicology, anthropology and geography of the senses, sound studies, dance studies, performance studies, and music cognition. If ethnomusicology is "the study of people making music," this course explores how people make and experience music and sound with their bodies, through the full range of their senses. We will consider questions surrounding the ways in which musicians, audiences, listeners, and dancers perceive and experience music in their bodies and contribute to the making of sound. By centering the body, we will necessarily consider lived experience along intersecting axes of difference such as race, ethnicity, gender, sexuality, and (dis)ability. Course readings and discussions will therefore focus on the social and political affordances and limitations of body-based practices and their theorization. Case studies will include a broad range of sound-movement practices, from electronic dance music and black social dance to Sufi and Buddhist religious practices, queer taiko drumming, and deaf music-making. Over the course of the semester, students will develop their own project exploring course themes, and they will be asked to participate in music-movement workshops throughout the course. This is an upper-level/graduate-level course, so some knowledge of music and/or dance concepts is assumed, but neither previous music/dance experience nor normative bodily ability are required.

Credit 3 units. A&S IQ: HUM, LCD, SC BU: HUM EN: H

---

**L27 Music 411 Music of Medieval Period**

An intensive survey of Western monophonic and polyphonic music from the beginnings of Christian chant to circa 1450. Prerequisites: Mus 3011 or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

---

**L27 Music 413 Music in the Baroque Era**

An intensive survey of the primary musical forms and styles in seventeenth-century Italy, France, Germany, and England. Prerequisite: Music 3012 or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

---

**L27 Music 4131 Music in the Eighteenth Century**

Musical activity in Europe during the eighteenth century is the subject of this course, which brings the high baroque, galant, and classical eras into a single narrative. Patronage, publishing, star performers, and highly specific musical publics were central to the music-making across the century. How these forces shaped the professional and creative lives of major eighteenth-century composers is a principal theme of the course. A broad range of eighteenth-century instrumental and vocal music will be surveyed, including works by Corelli, F. Couperin, Vivaldi, Rameau, Telemann, Handel, Hasse, Haydn, Mozart, D. Scarlatti, and several members of the Bach family. Extensive listening assignments and score analysis will be supplemented by readings drawn from recent scholarship and examination of eighteenth-century music publishing and other period sources in facsimile.

Credit 3 units. A&S IQ: HUM EN: H

---

**L27 Music 4140 Topics in Embodied Communication**

This course is about listening. We will begin by mediated and unmediated listening with the human auditory system and continue into an exploration of multi-modal listening, focusing on vibration and on somatic attention. We will work in the "studio," which will include a music studio, a dance studio, and the environment. Our investigation will include the study of sensing in more-than-human organisms as well as theoretical perspectives from sound studies, critical improvisation and history of science. The course will encourage the perspective that the practice of listening is a political act of tending to the invisible, the non-normative, and the incomplete.

Same as L15 Drama 4140

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

---

**L27 Music 415 Music in the Romantic Era: Aesthetics and Ideologies**

This course explores pivotal developments in 19th-century thinking about music's cultural and aesthetic significance -- developments that reverberate well beyond that historical period. Rather than surveying repertoire, we will emphasize in-depth exploration of selected issues and music, reading important contemporary writings and grappling with challenging musical works. Our topics will include discourses about musical interiority, the post-Beethovenian symphony, the Lied tradition, performance aesthetics and the creative agency of the performer, intersections of music and literature, and canon formation and its consequences. Our topics will include, to cite but a few examples, discourses about musical interiority, the post-Beethovenian symphony, the Lied tradition, performance aesthetics and the creative agency of the performer, intersections of music and literature, and canon formation and its consequences.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L27 Music 416 Contemporary Music**

Survey of musical styles from the end of the 19th century to the Postmodernism of the 1980's. Developments in music considered in context of intellectual history of the century with specific attention to parallels with literature and visual arts. Readings from a variety of sources and extensive listening assignments. Prerequisite: 3013 or permission of instructor.

Credit 3 units. A&S IQ: HUM

**L27 Music 4190 Selected Areas for Special Study I**

Credit 3 units. A&S IQ: HUM EN: H

---

**L27 Music 4221 Introduction to the Analysis of 20th Century Music**

An introduction to theory and analysis of music from the 20th-century repertoire. In-class analysis and individual assignments emphasize aural understanding and tools for modeling pitch structures in post-tonal and twelve-tone works. In the latter portion of the course focus turns toward works in which pitch structures play a smaller role. Prerequisite: Music 222 (for undergraduates) or Music 423 (for graduates).

Credit 3 units. A&S IQ: HUM

---

**L27 Music 423 Analysis I**

A study of structural principles underlying music of all periods: motivic usage, melodic shape, varieties of texture and structure with an emphasis on fugue, variation forms and proportional forms such as rondo and sonata-allegro. Prerequisite: graduate standing or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

---

**L27 Music 4232 Graduate Keyboard Skills**

Graduate Keyboard Skills prepares students to take the Keyboard Skills exam.

---

**L27 Music 424 Analysis II**

Continuation of Mus 423, concentrating on approaches to larger and more complex works of classically tonal music, including 18th-century symphonies and string quartets, late works by Beethoven, chamber music and symphonies of Brahms and symphonies of Mahler. Prerequisite: Mus 423 or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L27 Music 425 Counterpoint I**

Concentrated independent study in 16th-century contrapuntal composition. Prerequisite: Mus 222.

Credit 3 units.

---

**L27 Music 426 Counterpoint II**

Concentrated independent study in 18th-century contrapuntal composition. Prerequisite: Mus 222.

Credit 3 units.

---

**L27 Music 427 Selected Areas for Special Study**

In-depth study in areas of special interest. Prerequisite: senior standing, graduate standing, or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

---

**L27 Music 428 The Solo Song of Brahms**

In-depth study in areas of special interest. Prerequisite: senior standing, graduate standing, or permission of instructor.

---

**L27 Music 4282 The "Crossover" Tradition in Anglo-American Music Theater**

The musical stage in the United States and Britain has remained a vital artistic and commercial arena over the last hundred years despite the emergence of mass media formats like film and television. Audiences continue to clamor for stage stories where actors sing or singers act and composers, writers, producers and directors have created a stunning variety of musical theater styles to meet the demand. This course surveys important English-language operas, operettas and singer-centered musicals from the turn of the twentieth century to the start of the twenty-first with an emphasis on "crossover" works that blur the lines between opera and the commercial musical stage. All the works included in the course continue to be performed today, forming a core repertory of music theater works in English that emphasize singers and singing. The overlapping, ever changing spheres of the opera house and Broadway and West End theaters provide the geography of the course, which is peopled by performers, creators, and audiences. In class analysis of fourteen works will focus on how the singing voice has been used as an expressive vehicle and how theater singers have adapted to an age of amplification and recording. Works to be studied include Carousell, Sweeney Todd, The Phantom of the Opera, Show Boat, Candide, Street Scene, The Pirates of Penzance, The Light in the Piazza, My Fair Lady, Albert Herring, Porgy and Bess, The Most Happy Fella, Margaret Garner and The Student Prince. In class singing will be encouraged as a means to get inside the musical and dramatic values of these works. Prereq: ability to read music; graduate or upper-division standing.

---

**L27 Music 4311 Black Experimental Music**

Founded on the South Side of Chicago in 1965, the Association for the Advancement of Creative Musicians (AACM) united dozens of African American artists who were interested in experimental approaches to composition and improvisation. Their creative work, often described as black experimental music, would transform black-identified musical styles like jazz as well as white-identified styles of experimental concert music from which African Americans were often excluded-until the AACM intervened. In this course, we will investigate the Association's history by reading and discussing a wide range of texts about the organization, including books and articles written by AACM members themselves. We will also examine a number of important recordings and musical scores created by AACM artists, including Muhal Richard Abrams, Fred Anderson, Anthony Braxton, Joseph Jarman, George Lewis, Nicole Mitchell, Roscoe Mitchell, and Wadada Leo Smith.

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: HUM EN: H

---

**L27 Music 439 Diction I**

Principles of Italian, French, and German pronunciation covered in an interrelated approach; application of these principles to songs. Prerequisite: permission of instructor.

Credit 3 units. A&S IQ: HUM

---

**L27 Music 4530 Presence in Performance: Alexander Technique and Mindful Movement for Performing Artists**

This course provides group and individual instruction in principles and methods from Alexander Technique and other somatic arts for training mindful, embodied presence in performance. Mindful movement techniques are widely used by professional dancers, actors, and musicians to enhance performance skill and to address/prevent injury and chronic pain. Through a workshop process of guided learning, students gain awareness of subtle inefficiencies in coordination and balance that cause pain and limit ability. Students gain ability to self-assess and adjust problematic movement patterns to improve freedom and expression. Alexander Technique works at fundamental levels of movement coordination, and its methods are applicable to all performing art genres. Training is tailored to each individual student's needs, skills and goals. This course involves experiential learning supported with related readings, discussion, personal research projects and presentations. Prerequisites: Graduate standing; also open to undergraduate students studying at the 400 level in their discipline with permission of instructor.

**L27 Music 4571 From Vitaphone to YouTube: Popular Music and the Moving Image**

This course considers American popular music as represented in audiovisual media from 1926 to the present. The relationship between the popular music industry (a commercial sphere oriented primarily towards the selling of sheet music and audio recordings) and audiovisual technologies (various screens and formats encountered in changing social and commercial contexts) will be explored along two complementary tracks: popular music performers as presented in performance-centered media and popular music as a narrative topic or resource in feature films. Three related analytical frames will shape our discussions: industrial and technological history (the material conditions for the making and distribution of popular music and moving images) the question of "liveness" in recorded audiovisual media aesthetics of various popular music styles as translated into audiovisual forms and contexts The course is in seminar format. The ability to read music is not required but students with music reading or transcription skills will be encouraged to draw upon these tools. Prerequisites: graduate status or completion of a 300-level FMS or Music course and permission of the instructor

**L27 Music 4621 Ancient Greek and Roman Music**

Music played a vital role in Ancient Greece and Rome. New resources and perspectives now allow us to appreciate the ancients' music better than ever before. This course addresses the nature of ancient music (instruments, melody and rhythm, modes), ancient attitudes towards music, and its contribution to public and private life. The focus throughout will be on our ancient sources, both literary and archaeological.

## Music Major (AB) Program Requirements

- Total units required: 45

### Required Courses

Code	Title	Units
Music 121C & Music 122C	Classical Theory I and Classical Theory II	6
or Music 121J & Music 122J	Jazz Theory I and Jazz Theory II	
Music 221C	Classical Theory III	3
Music 2231	Musicianship I (should be taken concurrently with Music 221C)	1
Music 2241	Musicianship II (should be taken concurrently with Music 321T)	1
Music 3014	Ethnomusicology	3
Music 3015	American Popular Music and Media	3
Music 3016	Topics in Music History and Culture: Race and Performers of Musical Theatre, 1700 to Now	3
Music 3018	The Invention of Classical Music	3
Music 321T	Music Theory IV: Topics in Music Theory	3
	Two semesters of keyboard skills; course placement determined by piano faculty	2
	Performance courses: private lessons, small ensembles, and/or large ensembles	4
	Also required:	
Music 4992	Senior Capstone: Performance, Composition, or Theory (or Music 4993 or Music 4994)	3

or an approved 400-level Music course	
Lower-level elective units (courses, lessons, and/or ensembles)	7
Upper-level elective units (courses, lessons, and/or ensembles)	3
<b>Total Units</b>	<b>45</b>

## Additional Information

A grade of C- or better is required for courses to count toward the Music major.

A maximum of 6 credits earned via study abroad and/or transfer are allowed upon department approval.

## Becoming a Music Major

Students who plan to declare a major in music should consult with the department as early as possible. Students interested in pursuing a music major should begin the appropriate course sequences in music theory, music history, keyboard skills, and musicianship. All music majors must complete a senior capstone, which could take the form of a thesis, recital, lecture-demonstration, composition portfolio, or 400-level course.

## Senior Honors

Music majors are encouraged to work toward Latin Honors. To qualify, students must have an outstanding academic record and satisfactorily complete a senior honors capstone project, including an oral examination with a faculty committee. Project proposals are due at the end of the junior year.

## Music Major (BMus)

### Program Requirements

- **Total units required:** 51-79

Declaration of this major must be approved by the department before the end of a student's sophomore year. In addition to the required courses, majors must complete a minimum of 12 to 30 units in advanced courses, depending on the area of concentration. Students may earn the BMus degree with concentration in performance, composition, music theory, or music history and culture, or they may pursue a general program that combines two or more of these areas.

Each concentration requires a major senior capstone, such as a thesis, recital, lecture-demonstration, or composition portfolio. All majors must also pass a keyboard proficiency examination.

## Required Courses

Code	Title	Units
Music 121C & Music 122C	Classical Theory I and Classical Theory II	6
or Music 121J & Music 122J	Jazz Theory I and Jazz Theory II	
Music 221C	Classical Theory III	3
Music 2231	Musicianship I (should be taken concurrently with Music 221C)	1
Music 2241	Musicianship II (should be taken concurrently with Music 321T)	1
Music 3014	Ethnomusicology	3
Music 3015	American Popular Music and Media	3
Music 3016	Topics in Music History and Culture: Race and Performers of Musical Theatre, 1700 to Now	3
Music 3018	The Invention of Classical Music	3
Music 321T	Music Theory IV: Topics in Music Theory	3
Music 3231	Advanced Musicianship	3
1 unit of keyboard skills per semester as necessary to complete Music 2242		1-4
Music 4991	Senior Project: Musicology or Analysis	3
or Music 4992	Senior Capstone: Performance, Composition, or Theory	
or Music 4993	Senior Honors Capstone: Musicology or Analysis	
or Music 4994	Honors Project: Performance, Composition, or Theory	

## Lesson and Ensemble Requirements

In addition to the courses listed above, BMus students must also register for music lessons (1-2 units) and at least one ensemble (1 unit) every semester once the major has been declared (no later than the second semester of their sophomore year). **Note:** Students with a performance emphasis must take at least 2 units of music lessons per semester; all other students must take at least 1 unit per semester.

## Elective Courses

Each of the five BMus concentrations includes additional requirements, as follows:

### Performance Emphasis

Code	Title	Units
Music 424	Analysis II	3
Music 439	Diction I (Vocal performance majors only)	3
400- or 500-level music theory elective		3
Junior half-recital		0
<b>Total Units</b>		<b>6-9</b>

## Theory Emphasis

Code	Title	Units
Music 401 & Music 402	Elementary Technique of Electronic Music: Synth Lab and Advanced Techniques in Electronic Music: Studio Songwriting	6
or Music 429 & Music 430	Composition and Composition	
Music 424	Analysis II	3
400- or 500-level electives		12
<b>Total Units</b>		<b>21</b>

## Composition Emphasis

Code	Title	Units
Music 401 & Music 402	Elementary Technique of Electronic Music: Synth Lab and Advanced Techniques in Electronic Music: Studio Songwriting	6
Music 424	Analysis II	3
Upper-level music composition (Music 429, Music 430; repeatable)		12
400- or 500-level music theory electives		6
<b>Total Units</b>		<b>27</b>

## History and Culture Emphasis

Code	Title	Units
Music 424	Analysis II	3
Upper-level music history electives (other than Music 3014, Music 3015, Music 3016, and Music 3018)		12
400- or 500-level music theory electives		6
<b>Total Units</b>		<b>21</b>

## General Emphasis

Code	Title	Units
Music 424	Analysis II	3
Upper-level music history electives (other than Music 3014, Music 3015, Music 3016, and Music 3018)		3
400- or 500-level music theory electives		6
Elective units		9
<b>Total Units</b>		<b>21</b>

# Music Major, Performance Concentration (BMus)

## Program Requirements

- **Total units required:** 51-69

Declaration of this major must be approved by the department before the end of a student's sophomore year. In addition to the required courses, majors must complete a minimum of 12 to 30 units in advanced courses, depending on the area of concentration. Students may earn the BMus degree with concentration in performance, composition, music theory, or music history and culture, or they may pursue a general program that combines two or more of these areas.

Each concentration requires a major senior capstone, such as a thesis, recital, lecture-demonstration, or composition portfolio. All majors must also pass a keyboard proficiency examination.

## Required Courses

Code	Title	Units
Music 121C & Music 122C	Classical Theory I and Classical Theory II	6
or Music 121J & Music 122J	Jazz Theory I and Jazz Theory II	
Music 221C	Classical Theory III	3
Music 2231	Musicianship I (should be taken concurrently with Music 221C)	1
Music 2241	Musicianship II (should be taken concurrently with Music 321T)	1
Music 3014	Ethnomusicology	3
Music 3015	American Popular Music and Media	3
Music 3016	Topics in Music History and Culture: Race and Performers of Musical Theatre, 1700 to Now	3
Music 3018	The Invention of Classical Music	3
Music 321T	Music Theory IV: Topics in Music Theory	3
Music 3231	Advanced Musicianship	3
1 unit of keyboard skills per semester as necessary to complete Music 2242		1-4
Music 4991	Senior Project: Musicology or Analysis	3

or Music 4992	Senior Capstone: Performance, Composition, or Theory
or Music 4993	Senior Honors Capstone: Musicology or Analysis
or Music 4994	Honors Project: Performance, Composition, or Theory

## Lesson and Ensemble Requirements

In addition to the courses listed above, BMus students must also register for music lessons (1-2 units) and at least one ensemble (1 unit) every semester once the major has been declared (no later than the second semester of their sophomore year). **Note:** Students with a performance emphasis must take at least 2 units of music lessons per semester; all other students must take at least 1 unit per semester.

## Elective Courses

Code	Title	Units
Music 424	Analysis II	3
Music 439	Diction I (Vocal performance majors only)	3
400- or 500-level music theory elective		3
Junior half-recital		0
<b>Total Units</b>		<b>6-9</b>

## Additional Information

A grade of C- or better is required for courses to count toward the Music major.

A maximum of 6 credits earned via study abroad and/or transfer are allowed upon department approval.

## Becoming a Music Major

Students who plan to declare a major in music should consult with the department as early as possible. Students interested in pursuing a music major should begin the appropriate course sequences in music theory, music history, keyboard skills, and musicianship. All music majors must complete a senior capstone, which could take the form of a thesis, recital, lecture-demonstration, composition portfolio, or 400-level course.

## Senior Honors

Music majors are encouraged to work toward Latin Honors. To qualify, students must have an outstanding academic record and satisfactorily complete a senior honors capstone project, including an oral examination with a faculty committee. Project proposals are due at the end of the junior year.

## Performing Arts

Performing Arts at Washington University is comprised of dance (p. 834) and drama (p. 834).

### Dance

Students may select dance as a major through the Performing Arts Department. This course of study combines intensive studio work in the technique and theory of modern dance, ballet, and composition with seminars that examine dance as a global phenomenon containing forms that reflect culturally specific historical, aesthetic, and ethnological features. The program also includes a broad range of courses, such as stagecraft, music resources, improvisation, anatomy for dancers, pedagogy, dance therapy, musical theater dance, world dance forms, jazz, and tap. In addition, students may choose to minor in dance or in world music, dance and theater. The interdisciplinary minor in world music, dance and theater encourages students already interested in the performing arts to explore those performing arts outside of Euro-American traditions.

The senior capstone experience is framed in consultation with Performing Arts faculty. In April, prior to registration for the fall semester, dance majors discuss the capstone requirement with their advisors. The dance capstone requirement can be satisfied by a senior honors thesis or a senior dance project. The format may range from a research paper or a written analysis of the student's dance development to a project emphasizing movement expression (e.g., the creation of a video résumé, a performance, or a choreographic project). In all cases, dance capstones have a written component.

Those who study dance at Washington University learn from faculty members who have both professional experience and academic degrees. Students also have the opportunity to study with guest artists-in-residence who teach master classes and set choreography.

Students may audition for the Washington University Dance Theatre, which holds annual auditions for students. Selected students will appear in faculty- and guest artist-choreographed concerts in Edison Theatre. Dance students particularly interested in performance may audition for the student repertory company, Washington University Dance Collective (WUDC). WUDC rehearses and performs throughout the year at area venues and on campus. Students may also participate in departmental drama productions as well as student-directed work in choreography and theater. Further, each year, students have the opportunity to attend the regional American College Dance Conference to adjudicate work, perform, and take master classes.

Dance students may pursue study abroad at the University of Auckland, New Zealand; University of Ghana, Legon; and Roehampton University, London. With approval from the Dance program, courses at these institutions may fulfill dance major and minor requirements. Courses in other disciplines taught at these institutions may also be accepted by Washington University.

### Drama

The drama major combines rigorous training in theater and performance studies (world theater history, performance theory, and dramatic criticism) with theater production, including courses in playwriting, acting, directing, devising, design (i.e., set, costume, lighting, and sound), and experimental digital performance.

In this program, students can take a wide variety of courses covering the history of world theater in comparative relation. Ranging from the ritual practices that emerged into the dramas of Ancient Greece to the post-dramatic explorations of habituated movements we make in everyday life, performance is studied as a corporeal practice and material expression of cultural meanings. By understanding performance as both an artistic practice and a sociological phenomenon, students learn to think critically about the complex ways that cultures make meanings in the forms and practices of embodied movement.

In small, individualized classes, professionally and academically trained faculty lead students in practice and discussion, helping them make connections between the study of theater as a liberal art and the application of skills in production. In acting, the department offers four courses that cover scene and character study, acting styles, and solo performance work. Additional courses in movement, voice/speech, and musical theater augment the performance course curriculum. A two-course directing sequence issues into a public showing of student-directed work, and some students have chosen to direct a fully designed production as their capstone or senior honors thesis. Recent graduates of the acting and directing sequence have been placed in prestigious MFA programs, in internships and jobs in regional American theaters, and in various professional schools and graduate programs. Our nationally recognized program in design and technical theater offers students a varied selection of costume, scene, lighting, and sound design courses. Our design faculty regularly facilitates opportunities for design and technical theater students to shadow

them in professional design jobs and/or to intern within companies. A highly successful playwriting program, enriched by the annual A.E. Hotchner Playwriting Competition and workshops run by leading American dramaturgs, has produced playwrights whose work is now being performed in nationally recognized venues as well as in film and television.

The culture of performance is abundantly rich at Washington University. A wide array of student theater ensembles and improvisation groups provides many opportunities for student-generated performance on campus.

Since 1991, the Performing Arts Department and the Globe Education Program have collaborated in the teaching of Shakespeare's plays. In either a two-semester first-year seminar or a four-week intensive summer program, students can explore the textual meanings, historical contexts, and cultural significance of Shakespeare's plays both as literature and in performance. Working with Performing Arts faculty as well as Globe personnel, students learn to bring Shakespeare's plays to life in master classes that teach them how to voice Shakespeare's poetry, realize his characters, and perform stage combat. Both course options offer students a summer study abroad opportunity to visit Shakespeare's birthplace in Stratford-upon-Avon and the reconstructed Globe Theater in London, culminating in their own performance on the Globe stage.

Courses include the following:

- Dance (p. 836)
- Drama (p. 843)

## Dance

Visit online course listings to view semester offerings for L29 Dance.

### L29 Dance 106E Introduction to Dance as a Contemporary Art Form

Introduction to dance as a creative art form. Through practical work in the studio, students gain an understanding of the human body as an instrument of expression and of motion as the medium of dance. Technique, analysis and creative work. Not open to majors. May be repeated once for credit.

Credit 2 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

### L29 Dance 107 Ampersand: A Performative Perspective on Chinese Culture and Identity

This course examines the diversified and rich history of Chinese visual and performance cultures from the Chinese mainland, Taiwan, Hong Kong, and throughout the Chinese diaspora. A collaboration between the East Asian Languages and Cultures and Performing Arts departments, this course explores Chinese cultural narratives in relation to how they have been performed -- on stage in traditional forms of dance-drama, on screen in film, and as lived in the practice of everyday life -- from the late Imperial period to the present. It includes a practice component that introduces the students to movement disciplines such as Tai' Chi and opera, and it allows students to pursue creative assignments such as interview, stage plays, and filmmaking that demonstrate their developing knowledge of historical and contemporary Chinese culture. Building bridges of

understanding between the United States and the Republic of China in Taiwan, the course will culminate in a spring break trip to Taiwan. This course is only for first-year, non-transfer students in the Ampersand: Encountering China program.

Same as L61 FYP 107

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD, SC BU: HUM, IS EN: H

### L29 Dance 1080 Encountering Chinese Culture: Performing Tradition, Engendering Transformations

This course examines the development of modern Chinese culture and its dynamic relationship with traditions and renovations. During the past century, China has gone through a series of political, cultural, economic, and technological transformations that constantly reshaped the form and content of Chinese culture. Tracing the drastic changes in Chinese language, performance and media forms from the late 19th century to contemporary time, this course guides the student through the pivotal moments in modern Chinese history and analyzes their impacts on literature, drama, dance, film and internet culture. What transformative promise did new media and art forms deliver? How do we make sense of the intricate connection between tradition and renovation? The purpose of this course is to foster an understanding of Chinese culture as a dynamic process of formation rather than a static, homogeneous entity. However, instead of seeing this formation as a linear progression with one form or style replacing the other, we will study how past traditions -- both ancient and recently constructed ones -- are reconfigured in new cultural representations and practices.

Same as L61 FYP 1080

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:

HUM, IS EN: H

### L29 Dance 1500 Ampersand: The Mind: What Makes Us and Other Perspectives on Consciousness

This course explores how consciousness is created in the brain and body. This course will integrate biological, psychological, and philosophical perspectives to investigate the nature of the mind. Utilizing an experiential approach, we will study how perception-action links give rise to consciousness and shape our subjective understanding of the world. Concepts will include sensory-motor integration, spatial and temporal awareness, sense of self and sense of agency. Students will gain a broad understanding of both historical milestones in the development of "enactivism" and current experimental techniques enabling research into perception, embodiment, presence, virtual and augmented reality, and the neural correlates of consciousness. This course is for first-year, non-transfer students only.

Same as L64 PNP 1500

Credit 3 units. A&S IQ: SSC EN: S

### L29 Dance 200 Tutorial

Supplementary work at the low intermediate level in ballet and modern dance at times to be determined. Prerequisites: sophomore standing and permission of the Director of Undergraduate Dance Studies. Credit to be determined in each case.

Credit variable, maximum 6 units. A&S IQ: HUM EN: H

### L29 Dance 201E Theory and Technique of Modern Dance I

Fundamental theory and techniques of American modern dance. Studio work investigating the expressive potential of human movement and developing individual rhythmic and kinesthetic awareness, coordination, and breadth of movement vocabulary. Related reading and video expand on theory embodied in the class work and give an historical overview of modern dance in the U.S. Attendance at two to three performances required. Prerequisite: some previous dance training or permission of instructor.

Credit 2 units. A&S IQ: HUM EN: H

---

**L29 Dance 202 Theory and Technique of Modern Dance II**

A course for students familiar with the basic concepts and technique of modern dance. Emphasis on expanding individual movement versatility with increasing difficulty of choreographic phrase materials. Related readings and videos, some focused on American postmodern dance. Attendance at 2-3 performances required. Prerequisites: Dance 201 or permission of the instructor.

Credit 2 units. A&S IQ: HUM Art: HUM EN: H

---

**L29 Dance 203 Composition I**

Finding personal movement and transforming it into dance. Through a series of class projects the formal elements of composition are introduced. Prerequisites: Dance 201 or permission of the instructor. Concurrent registration in a technique class required.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L29 Dance 2040 Beginning-Intermediate Hip Hop: Culture and Movement**

What is Hip Hop? Is it simply dance and music? Is it something more? This course will be an introduction to Hip Hop dance and its impact on society. Students will explore various foundations of Hip Hop movement through warmup, footwork, body isolations, groove patterns and textures, across-the-floor exercises, choreographic studies, and classroom discussions. Students will then demonstrate their understanding of these foundations through supplemental readings, viewings, and written response papers, students will also gain greater depth and breadth of knowledge about the history and culture of the form.

Credit 2 units.

---

**L29 Dance 212E Introduction to Theatre Production**

An introductory study of the major elements involved with mounting a theatrical production. Utilizing guest speakers in both theater arts and theater studies, the course addresses such topics as scenic, costume, lighting and sound design; production management and procedures; and the history and culture of theatrical space and design. Students are required to serve as a crew member on one departmental production and attend productions of the Edison Theatre Ovations series and the Performing Arts Department.

Same as L15 Drama 212E

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L29 Dance 213 Improvisation I**

This course will explore the process and art form of creative, expressive, spontaneous dancemaking. Students learn to simultaneously move and respond in the moment, developing skills of communication, observation, performance, and composition in the language of movement. Open to dancers of all levels. Light reading; in class and out of class projects.

Credit 1 unit. Art: HUM

---

**L29 Dance 221 Fundamentals of Classical Ballet**

Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on American Ballet Theatre as a repository for classical and modern ballet repertoire of both American and European choreographers. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary. Prerequisite: none.

Credit 2 units. A&S IQ: HUM EN: H

---

**L29 Dance 222 Fundamentals of Classical Ballet**

Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on New York City Ballet as a repository for the choreography of George Balanchine. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary.

Credit 2 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L29 Dance 240 Afro-Modern Dance (Dunham Technique)**

This course introduces students to Katherine Dunham's dance technique, which combines ballet, modern, and Afro-Caribbean dance. Dunham Technique is one of the most important foundations for jazz dance and also shares characteristics with West African Dance and several modern dance techniques. Some lectures and occasional short readings will supplement this studio-based course so that students can learn more about Katherine Dunham (1909-2006), one of the great pioneers of dance in America. The class is open to all levels, although at least one semester of previous dance experience is required. Repeatable one time for credit in subsequent semester.

Credit 2 units.

---

**L29 Dance 257 Dance Theater Production**

Experience in technical production. Required stage work includes 2 studio dance productions supervised by faculty. Prerequisite: Dance 212E.

Credit 1 unit. A&S IQ: HUM EN: H

---

**L29 Dance 296 Internship**

Students may receive up to 3 units of credit for an approved internship with an organization where the primary objective is to obtain professional experience outside the classroom. Students must file a Learning Agreement with the Career Center, a faculty sponsor and the site supervisor. This must be approved by all three constituencies before proceeding. A final written project is to be agreed upon between the student and faculty sponsor before work begins, and will be evaluated by the faculty sponsor at the end of the internship.

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

---

**L29 Dance 297 Fundamentals of Jazz Dance**

This course introduces the basic principles and vocabulary of traditional jazz dance as influenced by American social dances and its relationship to the rise in popularity of jazz music. Both are unique to America and are rooted in African-American and European-American culture.

Credit 2 units. A&S IQ: HUM EN: H

---

**L29 Dance 300 Jazz Dance II**

Intermediate to high intermediate work in jazz dance technique, including choreographic phrases emphasizing stylistic clarity and more complex rhythmic structure. Variable content; may be repeated once for credit in a subsequent semester. Preference given to students registering for the first time. Prerequisite: Dance 297 or permission of instructor.

Credit 2 units. A&S IQ: HUM EN: H

---

**L29 Dance 301 Theory and Technique of Modern Dance III**

Technique and related concepts for the intermediate-level student. Greater emphasis on the ability to accurately replicate or individually interpret choreographic material. Related reading and video assignments on contemporary dance developments and attendance

at two to three performances required. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: Dance 202 or recommendation of the student's previous WU instructor or permission of the course instructor.  
Credit 2 units. A&S IQ: HUM EN: H

---

**L29 Dance 302 Theory and Technique of Modern Dance III**

Prerequisite: permission of the instructor.  
Credit 3 units. BU: HUM

---

**L29 Dance 3021 Theory and Technique of Modern Dance IV**

Continuation of Dance 301. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: Dance 301 or recommendation of the student's previous WU instructor or permission of the course instructor.  
Credit 2 units. A&S IQ: HUM Art: HUM EN: H

---

**L29 Dance 303 Composition II**

A workshop for students with experience in choreography. Study of approaches to dance composition with related improvisation problems. Work outside of studio hours expected. Prerequisites: Dance 203 and permission of the instructor; concurrent registration in a technique course required.  
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

---

**L29 Dance 3033 Music, Sound, and the Body**

How do musicians use their bodies when creating music? How do audiences, listeners, and dancers feel music in their bodies and contribute to making sound? This course explores embodied perspectives on making, sensing, and moving to music and sound. Examining theories of the body and the senses as they relate to sound practices, the course draws on scholarship from ethnomusicology, anthropology, sound, dance and performance studies, music cognition and other fields. Case studies include EDM, reggae, and salsa dance; Afro-Brazilian and Buddhist religious practices; and music healing and therapy. Because centering the body means considering lived experience along intersecting axes of difference, course readings and discussions will focus on issues of race, ethnicity, gender, sexuality, and (dis)ability. Students will develop their own ethnographic project, and they will be asked to participate in music-movement workshops throughout the course. However, neither previous dance experience nor normative bodily ability are required.  
Same as L27 Music 3033  
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM EN: H

---

**L29 Dance 305Z Music Resources for Dance**

Analysis of western (Europe, America) world (Africa, India, Indonesia) and global popular musics. Emphasis on rhythm/form, style/genre, instrumentation, and function/context. Basic music theory: notation, time signatures, subdivisions and polyrhythms. Major composers for dance (Lully, Tchaikovsky, Debussy, Ravel, Stravinsky, Cage, etc.) Introduction to percussion techniques for dance accompaniment using hand drums, drumset and hand-held instruments. Introduction to basic studio techniques including microphones, recording and editing equipment, and the use of synthesizer and drum machines. Prerequisites: For dance students at the intermediate or advanced level.  
Credit 2 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L29 Dance 308 Dance Composition Projects**

Choreography juried by dance faculty or supervised choreography on themes assigned by the instructor or formulated by the student and approved by the instructor. Prerequisite: minimum of 1 semester course work in composition or permission of the instructor.  
Credit variable, maximum 3 units. A&S IQ: HUM EN: H

---

**L29 Dance 309 Composition and Technique II**

Continuing work in dance composition supported by two technique classes each week at the level appropriate to the individual student. Work on composition assignments outside of class is expected. Prereq: Dance 201, Dance 203, or permission of instructor.  
Credit 4 units. A&S IQ: HUM BU: HUM EN: H

---

**L29 Dance 310 Dance Improvisation II**

Continuation of Dance 213. Prerequisite: Dance 213 or permission of instructor. Concurrent registration in a dance technique course at the 300 level or higher is required. May be repeated once for credit.  
Credit 1 unit. A&S IQ: HUM

---

**L29 Dance 3101 Dance Improvisation: Spontaneous Composition & Performance Techniques**

Dance improvisation is a cumulative, integrative practice, applying every skill the performer can bring to the spontaneous present in which creative process and performance is simultaneously one and the same. In this course, students learn and create processes for improvising dance/performance art, with an aim toward developing integrated skill in: dance technique, intuitive movement invention, partnered dancing, collaborative process, performance presence/expressivity, and compositional form. Applications include improvising compositions for theatrical stage, site-specific venues and for camera-based artistic mediums. Meets requirement for dance major. Prerequisite: students must be qualified at 300 level in any genre of dance technique, or obtain special permission of instructor. This course is optimal for students who have previously taken Dance Composition (L29 203/208/303/309), and/or Contact Improvisation (U31 212), though they are not prerequisites. May be repeated once for credit.  
Credit 2 units. A&S IQ: HUM EN: H

---

**L29 Dance 311 Modern Dance and the African-American Legacy**

This course examines the works of several African-American choreographers and their contributions to the field of modern dance in America. These works are considered modern dance classics and some depict important historical events. Through the medium of dance aided by discussions, video and class reading assignments, the choreographers' works are analyzed for form, content and social relevance. Studio work includes technique to support learning the repertory. Prerequisite: one to two years training in modern, jazz or ballet  
Credit 2 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM EN: H

---

**L29 Dance 312 Accompaniment Techniques for Dance**

A wide variety of percussion instruments and techniques are studied to determine what makes effective dance accompaniment. The course includes: examples and discussion of dance musics from western and non-western cultures; basic notation of rhythm and form; demonstrations of musical styles and discussion of social contexts. Students will have opportunities to assist in accompanying modern dance classes. Minimum of 2-3 hours a week of individual practice and/or listening to recordings expected.  
Credit 2 units. A&S IQ: HUM Art: HUM EN: H

---

**L29 Dance 316 Histories of Theatrical and Concert Dance**

This course is a survey of dance on the stage. It examines the interrelated histories of ballet, modern, jazz, hip hop, and musical theatre dance, and it discusses how these forms have converged in today's contemporary dance scene. It offers an overview of key artistic movements, both mainstream and avant-garde, while examining selected dances through a combination of formal analysis and a consideration of the social and political contexts that contributed to

their meaning. Students will learn how to analyze dance using a variety of sources, such as visual art, photographs, film, and written texts. The classroom format will emphasize discussion. Throughout the course, we will interrogate the categories of "theatrical dance" and "concert dance," seeing how the definitions have changed over time to include or exclude certain types of dancing.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L29 Dance 316E From Romantic to Postmodern Dance

An overview of European and American theatre dance from the early nineteenth century to the present. Topics include: Isadora Duncan's work as transition and revolution, Orientalism in early modern dance and the Diaghilev Ballets Russes, the "reconstruction" of the dancer's body, gender issues in movement vocabulary, choreographic content and professional working conditions, the emergence of modernism and postmodernism in dance. Seminar format emphasizing discussion of reading and dance videos.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L29 Dance 319 Stage Lighting

This course will place an emphasis in the aesthetic practice of lighting design through the understanding of technology as it relates to time and space. Early on the student will learn how to properly use and apply designer's tools and then through reading, research and experimentation explore the limitless boundaries of color and texture. This will culminate in a stage design in collaboration with directing or dance class. Upon completion of the course, the student will be able to speak eloquently on design theory and be able to move on to further design study in Advanced Lighting Design: L15 410.

Same as L15 Drama 310

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

### L29 Dance 3222 Rethinking Ballet in the 21st Century: Decolonizing Narratives and Embracing Diversity

This course embarks on a transformative exploration into the heart of ballet, reimagining its narratives for the 21st century. This course challenges the traditional fabric of ballet, examining and dismantling elements steeped in the racial and gendered logics of 17th-19th century Western Europe. Grounded in the principles of inclusivity, the course encourages students to be architects of change, reshaping ballet stories to reflect the rich tapestry of voices that define our global and contemporary world. In a dance landscape evolving towards equality, we delve into the significance of new voices in ballet and the crucial role representation plays. The course serves as a call to action, inspiring students to rethink, redefine, and reconstruct ballet narratives. Through theoretical discourse, practical application, and dynamic discussions, participants engage in a powerful journey to decolonize ballet and champion diversity, equality, and the vital importance of

representation. This course is centered on seminar-style discussions based upon assigned readings and viewings. Movement workshops will be held every two to three weeks to test ideas through embodied investigation.

Credit 3 units. A&S IQ: HUM EN: H

---

### L29 Dance 3224 Intermediate Pointe Technique

This course is designed for dancers with a basic foundation and understanding of pointe technique. The focus of the course is the strengthening of the overall presentation of the pointe technique while additionally developing the performance quality of the dancer. Variable content: may be repeated for credit in a subsequent semester. Co-requisite registration in Dance 3221, 416 or 4291, and permission of the instructor.

Credit 1 unit. A&S IQ: HUM EN: H

---

Credit 3 units. A&S IQ: HUM EN: H

---

### L29 Dance 3270 Experiential Anatomy and Kinesiology

This combined lecture and movement laboratory course explores anatomical, physiological, and kinesiological aspects of human movement. We will cover skeletal and muscular anatomy, muscle physiology, skeletal alignment, and biomechanical force production. Principles of postural control, body conditioning, and injury prevention will be learned through interactive exercises and will be applied to dance and other forms of exercise. Students will leave with an enhanced understanding of movement efficiency and the ability to adjust movement patterns for better health and performance throughout their lives.

Credit 3 units. A&S IQ: NSM

---

### L29 Dance 331 Movement and Meaning: Dance in a Global Context

This course introduces students to various approaches to studying dance in a humanities context. We will explore how people create meaning through dance and how dance, in turn, influences social norms, political institutions, aesthetic ideals and cultural practices. As we compare dance forms across the globe, we will also examine issues of race, gender, sexuality, and ethnicity, analyzing how dance literally embodies identity. At the same time, we will discover how contemporary unequal power hierarchies bear on our designation of some dance forms as "Western" and others as "world" or "ethnic." Tensions around assessment of authenticity/creativity, adaptation/appropriation, agency/resistance, and cultural hierarchies shift with social and political hegemony and with the individual's position as insider or outsider (a position that can shift depending on context). Throughout the semester, the usual process of the course will be discussion of assigned reading and viewing and analyzing together dance videos shown in class. A few dance workshops will be included (for which no previous dance training is necessary). Required work includes short papers and a final project.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: CPSC, HUM BU: HUM, IS EN: H

---

### L29 Dance 332 Mind-Body: Integral Practices

The mind and the body are not only connected, they are a fundamental unity, always functioning in a coordinated state. Whether or not we coordinate them well or badly is a choice we make, whether we are conscious of choosing or not. Many so-called "physical" exercises, activities and arts suffer from a lack of adequate skills of sensation, attention, perception and conscious control. Conversely, many so-called "mental" activities lack adequate awareness of the bodily

underpinnings of thought. Like a person learning to play a musical instrument, one's ability to coordinate the mental and physical aspects of Self toward one's best personal potential is a skill requiring study of strategies and techniques for good practice in "being well." Such ideas and methods are not "new age," but can be traced back through more than a century in the work of investigators such as F.M. Alexander, progressive educator John Dewey, anthropologist Raymond Dart, and many others. Through direct experience and related readings, this class will introduce students to "somatic," or "integral" practices -- activities that are inherently more effective at developing the aspects of Self in a coordinated and authentically holistic manner. We then learn to apply our understanding to all kinds of activities, both mental and physical, from chores to exercise, from arts to sports, from hobbies to vocations. Some kind of prior movement training (e.g., athletics, martial arts, dance, etc.) is preferable, but not required.

Credit 2 units. A&S IQ: HUM EN: H

---

### **L29 Dance 340 Ballet as Ethnic Dance and Classical Art**

This course examines the origins and major developments in ballet theory, technique, and production practice, emphasizing their relationship to concepts of ethnicity and classicism. Issues to be considered include: the influence of classic Greco-Roman theatre on the themes, aesthetic ideals, and theorization of ballet; analysis of ethnic content not only in thematic material but in ballet movement vocabulary and training process; the conscious reformulation in the U.S. of European ballet as an equally American art form; the expansion of Euroamerican "classical ballet" in the work of Balanchine and Tudor; the appropriation of ballet by non-Western countries (such as China and Japan) and its impact on native dance genres; typical construction of the ballet dancer's body and movement, including gender definition, in relationship to a specific ethnic community context. Seminar format with lectures, discussion, and video materials. Three 5-7 page papers and final. No prerequisites.

Credit 3 units. A&S IQ: HUM, SD, WI BU: HUM

---

### **L29 Dance 342 Critical Thinking in Western Theatrical Dance: Questioning Meets Creative Thinking and Collaboration**

This is a course designed to introduce the student to the intersections of creative collaboration and critical thinking in Western Theatrical Dance. This course begins with a review of the literature on creativity, creative collaboration, the process of creating Western Theatrical Dance, and critical thinking. The course continues as an overview of these issues while presenting the intersection and interaction of these elements which form the creative collaboration of Western Theatrical Dance. The students read from both texts and articles on creativity, creative collaboration, the process of creating Western Theatrical Dance in the twentieth and twenty-first century, and critical thinking.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### **L29 Dance 343 West African Music and Dance in Context**

A West African dance course specifically focused on the Ivorian dance traditions of the Baule, Bete Dan, Lobi, Makinke, and Senoufo peoples. The course addresses the relationship between music and dance as well as their social and cultural significance. Study of myths, art, costumes and masks as they relate to various dances and music is also included. A studio course with related reading material.

Credit 2 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM EN: H

---

### **L29 Dance 363 The Neuroscience of Movement: You Think, So You Can Dance?**

Although humans have expressed themselves through movement throughout time, only recently have neurophysiological investigative techniques allowed us to glimpse the complex neural processes that allow the coordination and integration of thought, action, and perception. This course introduces students to the nascent yet growing field of dance neuroscience. In part one of this course, we explore

fundamental concepts of motor control, including how our central nervous system integrates information to allow us to maintain posture and balance, to coordinate our limbs to external rhythms, and to move our bodies gracefully and expressively through space and time. In part two, we explore theoretical frameworks of motor learning as they pertain to movement. We delve into the neuromechanisms underlying common tools that dancers and athletes use to improve motor performance and how dance training induces neuroplasticity in brain structure and function. In part three, we explore the neural underpinnings of aesthetic appreciation while watching dance, including the action observation network and affective responses to art. Required work includes short assignments, a final project and presentation on a topic of your choice related to the course focus, and a few movement workshops (for which dance training is not required). Prerequisite: introductory course in dance, biology, or neuroscience, or permission from the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### **L29 Dance 372 Advanced American Musical Theatre**

This course will focus on developing the acting, singing and dancing techniques required for performing in musical theatre. The student will develop group pieces and will participate in scenes that explore character within a musical theater context. The class will culminate in a workshop performance. Prerequisite: Drama 221 and permission of instructor, by audition. Repeatable 1 time for credit. Same as L15 Drama 372

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### **L29 Dance 384 Digital Media for the Stage**

Entertainment technology continues to evolve and push boundaries by taking our imagination and turning it into a version of reality. Digital Media will attempt to explore some of the tools used to bridge the two worlds of thought and sight. We will learn how to think creatively about imagery and how to paint that onto a stage through a different type of light: digital. Using QLab and Green Hippo -- two of the most widely used media control systems in the world -- we will learn how to deliver thought-provoking illusions of light and texture on the stage.

Same as L15 Drama 384

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

---

### **L29 Dance 394W Writing For and About the Theater**

In this course, students will learn to write for and about the theater, exploring different forms of dramaturgical and scholarly research as well as journalistic and academic writing. To build skills in both critical analysis and synthesis, students will learn how the key elements of the playwright's text (e.g., language, character, plot, setting) work to create meaning within the work of dramatic literature and how theatre-makers use the various "languages" of the stage (e.g., costume/scenic/lighting design, music, acting) to give expression to an overarching interpretation of the play. Because research is essential to this course, students will learn how to access a variety of library resources by working closely with our subject librarians. By the end of the semester, students will have assembled a portfolio consisting of both journalistic and academic performance reviews, a dossier of dramaturgical research, and a research-based scholarly paper.

Same as L15 Drama 394W

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

---

### **L29 Dance 400 Dance Production Projects**

Students may receive credit for work on special dance related production projects conceived by students and supervised by faculty. Contracts must be signed by the student, faculty supervisor, and the coordinator of Dance 400 before work on the project commences. Students should register for this course after work is completed. Prerequisite: permission of the dance faculty. Credit to be determined in each case.

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

---

#### **L29 Dance 401 Theory and Technique of Modern Dance V**

The course emphasis is on versatility in movement vocabulary and on more complex and intensive technical work with discussion of theory inherent in the studio work, related readings, and projects. Variable content: may be repeated for credit in a subsequent semester. Prerequisite: Dance 302 with recommendation of the student's previous 302 instructor or permission of the 401 instructors. Credit 2 units. A&S IQ: HUM EN: H

---

#### **L29 Dance 402 Theory and Techniques of Modern Dance IV**

Emphasis on more complex and intensive technical work. Prerequisite: permission of the instructor. Credit 3 units.

---

#### **L29 Dance 4021 Theory and Technique of Modern Dance VI**

This course is a continuation of Dance 401 with emphasis on more complex and intensive technical work. Variable content; may be repeated for credit in a subsequent semester. Prerequisite: Dance 401 with recommendation of the student's previous 401 instructor or permission of the 4021 instructors. Credit 2 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

#### **L29 Dance 403 Jazz III**

Jazz III is primarily a studio course based on traditional jazz with strong elements of ballet technique, hip hop, Broadway, and street jazz. The main focus of the class will be on increased technical proficiency and development as an expressive performer. The studio work will introduce exercises and movement phrases that challenge the dancer's skill level, and encourage a personal exploration that further enhances the dancer's individual expression and style. Studio work will be supported by individual research on the field of jazz dance. Variable content: may be repeated once for credit. Prereq: High-Intermediate training in jazz dance technique and permission of the instructor. Credit 2 units. A&S IQ: HUM EN: H

---

#### **L29 Dance 4032 Introduction to Screendance Composition and Performance**

Introductory studio workshop in screendance composition and digital performance. For students with experience in choreography or improvisation, Screendance Composition explores the intersection of dance and digital media. Students will learn basic camera and videography skills to create screendance projects and learn about this emerging dance genre that combines the artistry of dance with the visual art capabilities that cameras offer. Methods for improvisation and site-specific performance will also be explored. Group critiques by faculty and students contribute analysis and facilitate dialogue regarding both process and artwork. Prerequisites L29 203, or L29 3110 or permission of instructor. Credit 3 units. A&S IQ: HUM EN: H

---

#### **L29 Dance 404 Composition IV**

The exploration of choreographic problems in small and large ensembles. Prerequisite: completion of Dance 303, senior standing or permission of instructor. Previous or concurrent registration in Dance 401 or 4021 recommended. Credit variable, maximum 3 units.

---

#### **L29 Dance 4040 Intermediate/Advanced Hip Hop**

Over the past fifty years, Hip Hop has transformed not only the professional dance landscape, but also global popular culture. This movement-based studio course expands upon the fundamentals of Hip Hop dance to develop more intermediate and advanced-level technique. Students will develop an understanding of hip hop movement aesthetics and approaches through warmup, across-the-floor exercises, phrase work, choreographic studies, and class discussions. Through supplemental readings, viewings, and written response papers, students will also gain greater depth and breadth of knowledge about the history and culture of the form. Prerequisites: Beginner-Intermediate Hip Hop or equivalent prior experience, with permission from the instructor. Credit 2 units. A&S IQ: HUM EN: H

---

#### **L29 Dance 4041 Composition III**

The exploration of choreographic problems for small and large ensembles. Prerequisite: senior standing or permission of instructor. Previous or concurrent registration in Dance 401 or 4021 recommended. Credit variable, maximum 3 units. A&S IQ: HUM

---

#### **L29 Dance 4052 Music, Sound, and the Body**

This course examines theories of the body, embodiment, and the senses as they relate to music and sound practices. Readings draw on scholarship from ethnomusicology, anthropology and geography of the senses, sound studies, dance studies, performance studies, and music cognition. If ethnomusicology is "the study of people making music," this course explores how people make and experience music and sound with their bodies, through the full range of their senses. We will consider questions surrounding the ways in which musicians, audiences, listeners, and dancers perceive and experience music in their bodies and contribute to the making of sound. By centering the body, we will necessarily consider lived experience along intersecting axes of difference such as race, ethnicity, gender, sexuality, and (dis)ability. Course readings and discussions will therefore focus on the social and political affordances and limitations of body-based practices and their theorization. Case studies will include a broad range of sound-movement practices, from electronic dance music and black social dance to Sufi and Buddhist religious practices, queer taiko drumming, and deaf music-making. Over the course of the semester, students will develop their own project exploring course themes, and they will be asked to participate in music-movement workshops throughout the course. This is an upper-level/graduate-level course, so some knowledge of music and/or dance concepts is assumed, but neither previous music/dance experience nor normative bodily ability are required. Same as L27 Music 4052

Credit 3 units. A&S IQ: HUM, LCD, SC BU: HUM EN: H

---

#### **L29 Dance 407 Topics in Dance Techniques**

Explores a variety of special interest topics in dance techniques. Consult the course listings for the semester topic. Credit variable, maximum 3 units. A&S IQ: HUM EN: H

---

#### **L29 Dance 413 Modern Dance and the African American Legacy II**

This course will focus on works by 2-3 renowned African-American choreographers. The selected choreographers are chosen for their contributions to the field of American modern dance based primarily on their explorations regarding the process and dynamics of building community--the sense of community as experienced through the lens of African-American cultural values and aesthetics and as it pertains to the creative process. Therefore, the course focuses on viewing the

body as a site for the exchange of ideas concerning humanity. Students will investigate these choreographers through learning excerpts of their choreography and choreographing personal responses, as well as through related readings, videos, and independent research.

Credit 2 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM EN: H

---

### L29 Dance 414 Advanced Stage Lighting

This course is an advanced, continuation of Drama 310 Stage Lighting. Emphasis is placed on cultivating design aesthetics and a further exploration of controlling light in a laboratory and live setting. Students will dive deeper into color theory, light plot development, and ultimately into advanced lighting console programming. The course objectives will cover a wide range of production styles and performance venues within a series of challenging design projects. Prerequisite: L15 310 or permission of instructor.

Same as L15 Drama 410

Credit 3 units. A&S IQ: HUM EN: H

---

### L29 Dance 415 High Intermediate Ballet I

A course designed as preparation for the advanced level. Emphasis on vocabulary review and individual technique assessment, including placement, movement quality and musicality. Related readings and video assignments; attendance at and critical analysis of 1-2 ballet performances. Variable content; may be repeated in a subsequent semester. Prerequisite: B+ or better in 221, 222, 321, 322 and/or permission of instructor.

Credit 2 units. A&S IQ: HUM EN: H

---

### L29 Dance 416 High Intermediate Ballet II

A course designed for the high intermediate dancer in preparation for 4281/429. Emphasis on placement, movement quality and musicality. Related readings and projects supplement the classical vocabulary. Prereq: B+ or better in 221, 222, 321, 322 and/or permission of instructor.

Credit 2 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L29 Dance 418 Variations in the Ballet

Introduces classical choreography within various ballets. Prerequisites: Dance 321 or 4281 with some pointe training, and permission of instructor.

Credit 1 unit. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L29 Dance 423 Pointe Technique

Designed for dancers with a basic foundation in pointe work. Variable content; may be repeated for credit in a subsequent semester. Prerequisite: concurrent registration in Dance 321 or 4281 and B+ or better in 221, 222, 321, 322 and/or permission of instructor.

Credit 1 unit. A&S IQ: HUM

---

### L29 Dance 424 Pointe Technique

Designed for dancers with a basic foundation in pointe work. Concurrent registration in Dance 322 or 4291 and permission of instructor. Repeatable one time for credit in subsequent semester.

Credit 1 unit. A&S IQ: HUM EN: H

---

### L29 Dance 426 Performing the Political in American Dance

This course is an exploration of the politics of performance and the performance of politics through the lens of American dance in the 20th and 21st centuries. Through readings, screenings, and discussions, we will examine the ways in which American dance developed against and alongside political movements in the United States, particularly ones concerning nationalism, race, gender, and human rights. We will also investigate how the lens of dance and choreography offers an expansive means to conceptualize political questions of citizenship

and social protest, broadening our understanding of embodied performance. Guided by several key philosophical texts, this course will focus on the concepts necessary for examining the convergence of performance and politics (e.g., representation, ritual, spectacle, body, mimesis, propaganda) while also paying special attention to the politics of funding and censorship that has governed the creation and presentation of dance in the United States. No dance experience is necessary.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD, WI Arch: HUM Art: CPSC, HUM BU: BA EN: H

---

### L29 Dance 4281 Classical Ballet III

Designed for dancers with a solid foundation in beginning and intermediate ballet technique. Related reading, research paper/discussion, video assignments; attendance at 1-2 ballet performances. Variable content; may be repeated for credit in a subsequent semester. Prerequisite: permission of instructor and B+ or better in Dance 3221 and 415 or 416.

Credit 2 units. A&S IQ: HUM Arch: HUM EN: H

---

### L29 Dance 4291 Classical Ballet IV

A course designed for dancers with a solid foundation in beginning and intermediate ballet technique. Variable content; may be repeated for credit in a subsequent semester. Prerequisite: permission of instructor, and B+ or better in 3221 and 415 or 416.

Credit 2 units. A&S IQ: HUM EN: H

---

### L29 Dance 430 Dance Pedagogy

In this course students will learn methods of instruction, assessment and how to develop dance curriculum for K-12. Students will design classes based on national standards, grade level expectations and sound dance principles. In the studio they will teach each other sample lessons that they have developed. This class will cover dance competencies required by DESE for beginning teachers of dance. We will pay attention to current trends in arts education. Our discussion will include the diversity of student populations and how to prepare and respond. We will discuss the role of the arts in education and the dance teacher's role as classroom instructor, arts integration instructor, diplomat and arts advocate. Credit may be applied toward the education major and potentially toward state certification. Prerequisite: minimum of two semesters of upper level coursework in dance technique. Prerequisite: minimum of two semesters of upper level coursework in dance technique.

Credit 2 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L29 Dance 4300 Contemporary Ballet

For intermediate and advanced dancers, this course presents a dynamic fusion of classical ballet technique and the expressive, innovative elements of contemporary dance. We will build upon the foundational ballet principles rooted in an art form dating back to the seventeenth century, during the reign of Louis XIV in France. While ballet traditionally prides itself on classicism, the past forty years have seen the emergence of the genre known as contemporary ballet. This genre pushes the classical ballet vocabulary into new thematic and aesthetic territories, placing emphasis on abstraction, complex rhythms, and movement invention. Many of today's leading dance companies focus is on contemporary ballet, making this course a valuable preparation for entering the evolving world of dance. The course places a strong emphasis on practical, embodied work in the studio to foster the development of technical skills, musicality, and artistry. Prerequisites: Successful completion of L29 Dance 321 or permission of the instructor.

Credit 2 units.

---

**L29 Dance 433 Performing Gender and Sexuality in America**

This course examines how the performance of gender and sexuality has shaped the social, cultural, and political history of the United States from the early nineteenth century to the present. While performance happens in everyday life, we will primarily focus on how the stage has been a potent space to debate issues about gender and sexuality. This course will put forth the argument that the stage has historically not only reflected broader social concerns, but also actively helped to shape those social dynamics. After an introduction to foundational ideas, we will start the semester with minstrelsy, signaling that the performance of gender and sexuality in America is deeply intertwined with race, class, and national belonging. Reading and viewing assignments bring together feminist theory, queer theory, American social history, and performance texts to build robust seminar discussions.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM BU: BA, HUM EN: H

---

**L29 Dance 453 Presence in Performance: Alexander Technique and Mindful Movement for Performing Artists**

This course provides group and individual instruction in principles and methods from Alexander Technique and other somatic arts for training mindful, embodied presence in performance. Mindful movement techniques are widely used by professional dancers, actors, and musicians to enhance performance skill and to address/prevent injury and chronic pain. Through a workshop process of guided learning, students gain awareness of subtle inefficiencies in coordination and balance that cause pain and limit ability. Students gain ability to self-assess and adjust problematic movement patterns to improve freedom and expression. Alexander Technique works at fundamental levels of movement coordination, and its methods are applicable to all performing art genres. Training is tailored to each individual student's needs, skills and goals. This course involves experiential learning supported with related readings, discussion, personal research projects and presentations. Prerequisites: Graduate standing; also open to undergraduate students studying at the 400 level in their discipline with permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L29 Dance 457 Dance Repertory**

Concert dance performance practicum. Under the direction of faculty, guest or graduate student choreographers, students rehearse and prepare for performance in a repertory dance concert or the MFA thesis production. Enrollment by audition. Prerequisite: Permission of the faculty director of an appropriate production. Concurrent registration in a technique class is required. May be repeated once for credit.

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

---

**L29 Dance 458 Dance Repertory**

Concert dance performance practicum. Under the direction of faculty, guest or graduate student choreographers, students rehearse and prepare for performance in a repertory dance concert or the MFA thesis production. Enrollment by audition. Prerequisite: Permission of the faculty director of an appropriate production. Concurrent registration in a technique class is required. May be repeated once for credit.

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

---

**L29 Dance 479 Fundamentals of Sound Design**

Encompassing both creative and technical aspects of sound in the performing arts, the course will give theoretical knowledge of, and practical experience in the following areas: fundamental rules of physics and electronics related to sound, use of standard digital recording studio equipment, "training" of the ear, and basic techniques of sound montage. Students will be expected to participate in a

variety of conceptual and research oriented exercises as well as complete several lab projects. Sound related work on Performing Arts Department productions may be required. Prerequisite: Drama 212 and permission of instructor.

Same as L15 Drama 479

Credit 3 units. A&S IQ: HUM EN: H

---

**L29 Dance 493 Senior Project**

Specialized project in a selected area in dance. The student will work individually under the supervision of a faculty member. Submission of student proposal prior to registration. Final self-evaluation essay required. Prerequisite: permission of the Coordinator of the Dance Division.

Credit variable, maximum 3 units.

---

**L29 Dance 499 Study for Honors**

An honors thesis or performance and thesis project designed by the student, and supervised and assessed by a faculty committee. Prerequisites: senior standing, grade point of 3.65, and 3.65 in dance classes, and permission of the coordinator of the dance division.

Credit variable, maximum 6 units.

---

**L29 Dance 4990 Independent Work**

Prerequisite: senior standing and permission of the director of undergraduate dance studies.

**L15 Drama 107 Ampersand: A Performative Perspective on Chinese Culture and Identity**

This course examines the diversified and rich history of Chinese visual and performance cultures from the Chinese mainland, Taiwan, Hong Kong, and throughout the Chinese diaspora. A collaboration between the East Asian Languages and Cultures and Performing Arts departments, this course explores Chinese cultural narratives in relation to how they have been performed -- on stage in traditional forms of dance-drama, on screen in film, and as lived in the practice of everyday life -- from the late Imperial period to the present. It includes a practice component that introduces the students to movement disciplines such as Tai' Chi and opera, and it allows students to pursue creative assignments such as interview, stage plays, and filmmaking that demonstrate their developing knowledge of historical and contemporary Chinese culture. Building bridges of understanding between the United States and the Republic of China in Taiwan, the course will culminate in a spring break trip to Taiwan. This course is only for first-year, non-transfer students in the Ampersand: Encountering China program.

**L15 Drama 1080 Ampersand: A Performative Perspective on Chinese Culture and Identity**

This course examines the development of modern Chinese culture and its dynamic relationship with traditions and renovations. During the past century, China has gone through a series of political, cultural, economic, and technological transformations that constantly reshaped the form and content of Chinese culture. Tracing the drastic changes in Chinese language, performance and media forms from the late 19th century to contemporary time, this course guides the student through

the pivotal moments in modern Chinese history and analyzes their impacts on literature, drama, dance, film and internet culture. What transformative promise did new media and art forms deliver? How do we make sense of the intricate connection between tradition and renovation? The purpose of this course is to foster an understanding of Chinese culture as a dynamic process of formation rather than a static, homogeneous entity. However, instead of seeing this formation as a linear progression with one form or style replacing the other, we will study how past traditions -- both ancient and recently constructed ones -- are reconfigured in new cultural representations and practices.

### **L15 Drama 1104 Topics in Drama: FYS: Shakespeare: The Godly and the Grotesque**

While Shakespeare is celebrated for his realistic depictions of characters, events, and emotions, his work is filled with other-worldly elements, including sorcery, oracles, myths, and grotesque creatures. This course will explore Shakespeare's use of the fantastic, the unnatural, and the monstrous. Reading a wide selection of comedy, tragedy, and history, we will consider Shakespeare's often contradictory attitude to the supernatural: on one hand, a source of evil, villainy, and perversion, and, on the other, a symbol of the divine and a means of surpassing the humanly possible. We will look at how Shakespeare used monstrous imagery to reflect upon his own work and the nature of theatre itself, paying special attention to how the performance practices of his time impacted his portrayal of the fantastic. At the same time, we will supplement our readings by watching more contemporary performances of Shakespeare's works in order to consider the impact that innovations in theatrical technologies and practices has had on the depiction of the supernatural in these plays. Finally, we will consider how Shakespeare used the unnatural to probe the gender, politics, race, disability, and globalization of his own time and in so doing, we will discover how work continues to impact our own engagement with these issues--and indeed, our conception of monstrosity itself. Plays and productions studied will include Macbeth, A Midsummer Night's Dream, Julius Caesar, The Tempest, Richard III, The Winter's Tale, and Othello. Students with no prior knowledge of Shakespeare are welcome to enroll.

### **L15 Drama 115 First-Year Seminar: What is Art?**

Great works of literature, theatre, film, painting, music and dance provide us with new, intriguing--and often surprising!--ways of understanding reality. In this Freshman Seminar, we examine a variety of works in various media, paying close attention to works which have significantly altered or challenged the way we view and interpret reality. In an intimate, seminar setting, we analyze and discuss individual works of art from the Greeks to the present day. The course incorporates attendance at live performances (both on-campus and off), along with Master Classes by artists from the Performing Arts Department. Examining works both classical and the avant-garde, What is Art? forces us to understand and question how art complicates, enriches, disturbs and asks questions--both about ourselves and our world.

### **L15 Drama 1165 First-Year Seminar: On Broadway - Musicals, Race, Place**

The Broadway theatres are closed, but pressure to make these stages more racially and ethnically diverse when they re-open is strong. This course looks at the history of the Broadway theatres and the ways this coveted theatrical real estate in midtown Manhattan has played host to white and non-white performers in the signature American theatrical genre: the musical. Using digital and archival research tools, including an abundance of maps, our study stretches from the creation of the Theatre District at the turn of the 20th century to the present. We will examine groundbreaking and all-too-typical shows -- from "Show Boat" to "Hamilton" -- and look closely for how systemic racism has played out on Broadway stages for Broadway's mostly white audience. We will produce original research and explore digital humanities methods related to questions of racial inequality in commercial popular culture. This course is for first-year, non-transfer students only.

### **L15 Drama 119 Ampersand: Shakespeare's Globe: All the World's a Stage**

Why--more than 400 years later--do we continue to read the works of William Shakespeare? Why do we continue to stage his plays, identify with his characters, and communicate our thoughts in his language? Why do his poems and plays retain their vibrancy and immediacy, even today? This course invites students to answer these questions by inhabiting Shakespeare's language from the inside and out--breathing in the words of his characters with creative and careful study, while moving out to fully engage the text in performance. Reading plays, watching films, listening to monologues, voicing dialogue, physically enacting fight scenes, and even navigating plots with joysticks, students will develop deep appreciation for the writer who is the original GOAT--the greatest of all time. In this two-semester course, we will read and study Shakespeare's plays in their historical context, learning about the original practices used in performance at both the Elizabethan and Jacobean court theatres as well as the public theatres on the South Bank of the Thames. We will also consider them as adaptable playscripts that have been rewritten over the past 400 years, reinterpreted at different times by different actors in different cultures the world over. Students will contribute to this performance repertoire with their own 21st-century interpretations, striding the stage of the reconstructed Globe Theatre in a capstone experience that concludes the course with a summer trip to London. If all the world's a stage, come be a player in it!

#### **L15 Drama 120 First-Year Seminar: Race and Performance**

What does it mean to "act Black"? What about "acting Jewish"? This course looks at performances of racial and ethnic identity, mostly in the United States and mostly in the 20th century. We will examine novels (e.g., Nella Larsen's "Passing"), plays (e.g., Anna Deavere Smith's "Fires in the Mirror"), and performances of everyday life (e.g., "Cowboys and Indians") to investigate the performance of race in public. Once we begin to explore the social and cultural performance of race, will it all turn out to be "only" an act?

Credit 3 units. A&S: FYS A&S IQ: HUM, SD BU: BA EN: H

---

#### **L15 Drama 135 First Year Seminar Ideation: Idea Generation**

Ideation exists at all phases of a creative process: brainstorming, idea generation, innovation, prototyping, development, and actualization. But Ideation is less like a line and more like a loop from observing to reflecting to making - and back again. It is a rarely-understood, but essential part of any creative or design process. Through collaboration and conversations with classmates, readings on the topic, and group exercises, Ideation is a course that will strive to define and de-mystify what we mean by 'creativity', help students identify their creative strengths and weaknesses, encourage artistic experimentation of new ideas, establish methods of design thinking and make it clear that collaboration amongst varied backgrounds and disciplines is the key to coming up with creative solutions for complex problems. Successful companies like IDEO led by visionaries in the form of Tim Brown and David Kelley have pioneered the notion of Design Thinking: 'Design thinking' is defined as "the ability to combine empathy for the context of a problem, creativity in the generation of insights and solutions, and rationality to analyze and fit solutions to the context." This course will encourage students to explore their collaborative talents in new ways that they will find apply to virtually any discipline and career path: from A to Z.

#### **L15 Drama 175 Designing Creativity: Innovation Across Disciplines**

From "a-ha!" epiphanies to slow-developing discoveries, the creative process has been employed by innovators and artists in virtually every corner of the globe for centuries. This course will explore the study and practice of the creative process across many disciplines, with input from prominent thinkers and practitioners in the areas of medicine, neuroscience, law, engineering, architecture, human-centered design, business, stage design, and the performing arts. The course will also incorporate the practice of design thinking and creativity techniques via a lab component that will allow students to explore the development of innovative ideas in collaborative teams followed by project presentations to core faculty and classmates. This course is for first-year (non-transfer) students only.

This course is a hands-on introduction to the sewing and costume-related skills most useful for creating costumes for theatre productions. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

#### **L15 Drama 212E Introduction to Theater Production**

An introductory study of the major elements involved with mounting a theatrical production. Utilizing guest speakers in both theater arts and theater studies, the course addresses such topics as scenic, costume, lighting and sound design; production management and procedures; and the history and culture of theatrical space and design. Students are required to serve as a crew member on one departmental production and attend productions of the Edison Theatre Ovations series and the Performing Arts Department.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

#### **L15 Drama 214 Public Speaking: Embodied Communication**

The ability to speak well and to communicate effectively in the public forum is an essential skill for all students. This course aims to offer a comprehensive and wide ranging approach to developing the skills of the contemporary speaker. While acknowledging and utilizing traditional approaches to public speaking, this course will expand its reach to include applicable techniques from the world of the Performing Arts -- especially theatre and dance. The course does not intend to train the student as a dancer or actor, but it maintains that the successful speaker would do well to harness some of the transferable skill sets from these disciplines. The speaker, like the performer, must stand before an audience with an objective to communicate something

well. Both should be dedicated advocates for the message. They share the common ground of requiring a strong voice for a sure delivery of the material, and an expressive physicality willing to fully embody and serve the message.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L15 Drama 2150 First-Year Seminar: The Theatre as a Living Art**

Moving in and out of practice and theory, this FOCUS plan interweaves a traditional introductory acting course with discussions of dramatic theory and visits to rehearsals where directors and actors work to shape the play. Must be taken concurrently with Drama 228C. Course is for first-year, non-transfer students only.

---

**L15 Drama 223 Cross-Cultural Women Playwrights**

This course will provide an introductory survey of the work of African-American, Caribbean-American, Asian-American, and Native American women playwrights. We will explore the playwrights' strategies for creating work that is by turns beautiful, fascinating, humorous, moving, and occasionally terrifying, as they chart for contemporary theatre the intersection of race and gender in performative terms. Playwrights to be addressed include Adrienne Kennedy, Ntozake Shange, Suzan-Lori Parks, Anna Deavere Smith, Diana Son, Jessica Hagedorn, Cherie Moraga, Wakako Yamauchi, Migdalia Cruz, Spiderwoman Theatre, Marga Gomez, and Velina Hasu Houston.

Credit 3 units. A&S IQ: HUM, SD Art: HUM BU: BA

---

**L15 Drama 228C Theater Culture Studies I: Antiquity to Renaissance**

This course is a survey of ancient, medieval and Renaissance theater and performance: in both the West and in the East, as it both reflects and shapes culture. Coverage will include the following areas: ancient Greece, ancient Rome, classical Sanskrit theater, Yuan China, medieval Japan, medieval Europe, Renaissance Italy, and Renaissance England. Both scripted theater and performance practices will be examined through the lenses of dramatic literature, theater history, performance studies, and dramatic theory. A continual emphasis will be on marginal and underrepresented figures, as we will attempt to excavate forgotten histories from the theatrical past.

Credit 3 units. A&S: AMP A&S IQ: HUM Arch: HUM Art: HUM BU: HUM, IS

EN: H

---

**L15 Drama 229C Theater Culture Studies II: From Renaissance to Romanticism**

This course provides a survey of theater history from the early seventeenth through mid-nineteenth centuries, covering plays, theories of drama and acting, and the material conditions of theatre production. We will explore events in Asia, the Americas and Europe with particular attention to the Baroque era, Sentimentalism, and Romanticism. The central objectives of the course are 1) to teach students to analyze plays in complex and creative ways, and 2) to cultivate understanding of the ways theater and performance practices reflect the philosophical ideas, aesthetic values, and socio-political realities of their historical context--even as these practices sustained and challenged such ideas, values, and realities.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

---

**L15 Drama 230 Topics in Theater**

Explores a variety of special interest topics in theater not included in the Theater Culture Studies sequence. Consult the Course Listings.

Credit 3 units.

---

**L15 Drama 233 Improvisation**

This course introduces students to the fundamentals of improvisation. Students are provided with the tools and techniques to develop their artistic voice, both individually and within an ensemble, through various theater games, exercises, and techniques. Students will build self confidence, develop creativity, hone presentation skills, and learn collaborative practices for working with others. Students will understand the applied benefits of improvisation toward their professional and personal lives.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L15 Drama 239 Performance and Culture**

What are Lady Gaga & Beyonce doing? How do young men and women in poverty use performance for survival? Why do we create performance and for whom? In this class we apply the vocabulary and concepts of Performance Studies to social and theatrical worlds, understanding performance broadly: from popular culture to everyday life to theatre. To understand performance, we will look closely at ethnographies, plays, and literature. Subjects span a range of topics: racial impersonation, drag/house balls, celebrity culture, reality television, black-latino theatre, and slam poetry. Key course questions: How does performance inform every day culture? How does culture inform popular culture and theatrical performance? This course takes seriously the "doing" and the "undoing" of things---as culture shifts, transforms, and adjusts as bodies engage in the art of performance.

Credit 3 units. A&S IQ: HUM BU: BA EN: H

---

**L15 Drama 240I Fundamentals of Acting**

This course offers an opportunity to investigate the nature of the theater by way of performance. Students study a variety of theatrical texts in the most direct and experiential way: by acting in them. The course is designed for those who want to understand the interpretive work of the actor. Students are introduced to the practical work of building a character for the stage, and they also gain an understanding of how dramatic texts work both on the page and on the stage. Textual analysis, movement work and vocal production skills are developed using monologues, scene work and exercises. These skills should also provide significant benefits outside of the confines of the class itself, in the professional and personal lives of the students taking this course. No previous training or experience necessary.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

### L15 Drama 2503 Introduction to Performance Art

The focus of this course will be on the history, theory, and practice of performance art and performance theater. The class will engage in exercises that generate text, movement, sound, and performance scores. Students will create original performances that incorporate contemporary critical concepts. Performance production will be supplemented by readings and videos that introduce the history and theory of experimental performance and work by specific performance artists.

Credit 3 units. A&S IQ: HUM BU: HUM

---

### L15 Drama 251 The Art of Storytelling

As one of the oldest forms of human communication, storytelling is part of both mundane interactions and carefully crafted events. Many of us tell stories regularly in informal settings (e.g., when we tell a friend about an encounter we had in the cafeteria) as well as in professional settings (e.g., class or work presentations). But what, exactly, are the elements of a well-told story? How do we identify powerful storytellers? These questions ground this course, where we will explore stories as forms through which to present oneself and explain an event to others. We will study storytelling from two perspectives. First, we will look at stories through rhetorical analysis: we will focus on various examples of storytelling across different genres (ranging from cultural myths, fables, spoken word, speeches, hip-hop, R&B, and rock lyrics) to understand stories as an artistic practice, a teaching method, an identity shaper, and a conductor of history. Second, we will consider stories through embodied practice: we will perform and present stories in chosen genres to gain firsthand experience in the conventions and forms of the embodiments that complete the act of telling well-crafted stories. At the end of this course, students will have gained theoretical knowledge about storytelling as an art form as well as the practical skills needed to become confident storytellers.

---

### L15 Drama 256 Contemporary Comedy: Stand-up, Sketch and Improv

The U.S. is in the midst of a second comedy boom. The first boom, during the 1980s, turned stand-up comedy into a major force in American entertainment, creating stars like Jerry Seinfeld, Eddie Murphy, and Ellen DeGeneres. The second, defined in part by new social media, podcasting, and on-line video, is remaking the way comedians find their voices and their audiences. But even as young comedians chart new paths through a dynamic media landscape, live performance is still the heart of the modern comedy universe. This class is a detailed survey of the contemporary American comedy scene. Pioneering artists from Vaudeville through the 1970s are introduced, the stand-up boom of the 1980s is presented as a formative force in the comedy business, alt-comedy is discussed as a stylistic watershed. Select modern theories of comedy are read and discussed (though we studiously avoid explaining jokes). Short units on Improv and Sketch comedy round out the syllabus. Assignments include practical exercises in performing comedy onstage, and students can choose to perform a short original stand-up set for their final assignment.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L15 Drama 257 Dance Theater Production

Experience in technical production. Required stage work includes 2 studio dance productions supervised by faculty. Prerequisite: Dance 212E.

### L15 Drama 271 The American Musical Theater Songbook

From its birth in vaudeville and musical reviews to current future classics such as "Hamilton," American musical theater has produced a voluminous catalogue of material referred to herein as the "American Musical Theater Songbook." Part survey and part performance, this course will focus on the composers, lyricists, performers and subject matter that have been instrumental in defining musical theater and its role in describing a continually evolving human psychology and sociology. The performance aspect of the course will develop students' existing vocal skills and knowledge of style. As both singing and non-singing students are welcome to participate in the course, adjustments for non-singing students will be accommodated so that they may participate fully in the class. The format of the course will be a seminar of student-generated presentations, discussions, and workshop performances. A sampling of shows from which repertoire will be sourced includes the following: early song-and-dance shows ("Girl Crazy," "Anything Goes," "Kiss Me Kate"); Rodgers and Hammerstein ("Oklahoma!," "Carousel," "South Pacific"); Stephen Sondheim ("Gypsy," "Sweeney Todd," "Sunday in the Park With George"); modern era ("West Side Story," "A Chorus Line," "Cabaret," "Hair," "Pippin"); and contemporary ("In the Heights," "Caroline, or Change," "Kinky Boots," "Dear Evan Hansen," "Hamilton"). This course serves as a prerequisite for L15 372.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L15 Drama 295 Portfolio Review

This course is intended to be a one hour credit to meet every Friday for two contact hours. While the main focus of this course will be to dedicate time to learning and preparing a solid professional portfolio, resume and web page, this class will also train the students how to interact and conduct themselves through the interview process. We will review numerous resumes from industry professionals, develop our own, develop both physical and digital portfolios consisting of students' academic and professional work, and culminate in building a strong and evocative web page. Upon completion, the student will have a solid understanding of the theater job market and be ready to face the world.

Credit 1 unit. A&S IQ: HUM EN: H

---

### L15 Drama 296 Internship

Students may receive up to 3 units of credit for an approved internship with an organization where the primary objective is to obtain professional experience outside the classroom. Students must file a Learning Agreement with the Career Center, a faculty sponsor and the site supervisor. This must be approved by all three constituencies before proceeding. A final written project is to be agreed upon between the student and faculty sponsor before work begins, and will be evaluated by the faculty sponsor at the end of the internship.

Credit variable, maximum 3 units.

---

### L15 Drama 300 Production Practicum

Practicum experience in technical theater. Positions such as stage manager, publicist, assistant designer for costumes, scenery or lighting, or crew head of props, sound and makeup design are available.

Credit variable, maximum 2 units.

---

### L15 Drama 3011 A History of African-American Theater

A survey of African American theatre from post-Civil War "coon" shows and reviews to movements for a national black theatre, such as Krigwa, Lafayette and Lincoln, and the Black Arts Movement. Early black theatre and minstrels; black theatre movement and other ethnic theatre movements in America. Critical readings of such plays as Amiri Baraka's "Dutchman," Lorraine Hansberry's "A Raisin in the Sun," Langston Hughes and Zora Neale Hurston's "Mulebone." Also works by August Wilson, Ed Bullins, Charles Fuller, Georgia Douglas Johnson. Same as L90 AFAS 301

#### L15 Drama 3012 Theater Space in Historical Practice

This course examines select theatre spaces from across the globe and from a long span of human history, from caves used in the upper paleolithic era to contemporary digitally-supported sensory experiences. We will treat theatre space as a socially generated phenomenon produced in many cultures that dynamically links performers and audiences. Theatre space will be used as a gathering concept through which many facets of performance culture can be examined, including architecture, scenography, script, and the physical features of embodied communication. Beyond this, theatre space also illuminates myriad aspects of the cultural practice of theatre, including social difference (especially gender and class), economic activity, and political representation. Distinct theories of historical space will be introduced and examples of historical theatre space will include Ancient Greece, Edo Japan, Neo-Classical France, Golden Age Spain, Classical India, and twentieth-century Environmental Scenography. The core of the reading for this course will be representative or exemplary playscripts that help open up interpretive approaches to historical theatre and performance space. This course fulfills the "Studies in Historical Practice" requirement for Drama majors and minors.

Credit 3 units. A&S IQ: HUM Art: VC

---

#### L15 Drama 3013 Politics and Performance in Historical Practice

What is "political theater"? Is it a media stunt, designed to score points with supporters? Is it a form of protest of the status quo? Approached from another direction, we might ask: what theater is not political? This course offers students to think about the role that performance (both on stage and in the streets) has played in the assertion of state power, the constitution of a body politic, the shoring up of consent, the expression of dissent, and as an embodied imagining of another world that might be possible. This course fulfills the "Studies in Historical Practice" requirement for Drama majors and minors.

Credit 3 units. A&S IQ: HUM EN: H

---

#### L15 Drama 3014 Body Language: Acting, Rhetorical Gesture, and Dance in Historical Perspective

Why do actors in silent films seem to gesticulate so wildly? Who could have ever thought that was "realistic"? Would time-travelers from the future think actors in our day appear just as ridiculous? If you've ever thought that thought, then you've stumbled onto the fact that despite its claims to represent the reality of its audience's experiences with the verisimilitude of the actor's body in the here and now-acting is a historical practice. Moreover, it is a culturally-variable practice, with claims to represent the "real" that are both symbolic and mimetic, and usually both at once. In this course, we will trace the history of acting in five thematic units: "rhetorical gestures;" "representing the collective;" "festive formations;" "signs, codes, and animated hieroglyphs;" and "approaching the real." From the ancient Greeks to digital avatars, we will study how bodies in motion create meanings for their audiences in different cultures and across time. Through kinesthetic, emotional, psychological, and visceral appeals, actors not only represent their audiences as they think they are, but also offer to transform them into whom they think they could be. This course fulfills the "historical practice" requirement in the Drama major/minor.

Credit 3 units. A&S IQ: HUM

---

#### L15 Drama 3015 Social Identity and Dramatic Character in Historical Practice

This course examines the roles that dramatic characters play within the "worlds" of the play and performance culture they inhabit. In some cases, we can speak of metaphorical "masks" presented to the world; in others, the theater may use actual masks. We begin with

classical antiquity, examining the differentiation of physical masks and characters in both tragedy and comedy (we will note that the word "person" comes from the Latin word "persona," the word for mask in ancient Roman comedy). We then consider the complex system of types in classical Indian and later Kathakali dance-drama: types that each had specific emotions associated with them. Chinese musical theater of the fourteenth century, with strong ties to a rapidly growing urban environment, had its own distinct types. Following this unit we consider the masked characters of Italian Renaissance comedy (the *commedia dell'arte*) and its uncanny parallels to the nearby Karagöz, Turkish shadow puppet theater. We next move to the theater of Shakespeare, considering the boy actor and gender fluidity in *Twelfth Night*. Then we consider the "realist" playwright Ibsen, in view of the social roles performed by the play's characters. In *Cloud Nine*, Carol Churchill gives us insights into the performance of gender in modern life. A unit on modern and contemporary African drama examines the erasure (or erasure) of political identity in crisis, as we read Athol Fugard's *Sizwe Bansi is Dead* and also the play *Woza Albert!* (Mtwa, Ngema, Simon). The course concludes with two African-American plays, August Wilson's *Fences* and Lynn Nottage's *Sweat*. This course fulfills the "Studies in Historical Practice" requirement for Drama majors and minors.

---

#### L15 Drama 3016 Blood and Magic: Special Effects in Historical Practice

Should Sarah Kane's *Cleansed* have realistic or symbolic blood? Does *The Tempest*'s Ariel have to fly? This course integrates textual analysis with production to consider depictions of violence and magic in performance across centuries. By examining contemporary and historical staging conventions as well as creating their own scenework, students will consider how violence and magic are cultural constructions and explore how on-stage depictions of these cultural constructions can impact interpretations of the source text. Students will read key plays from antiquity to today and write dramaturgical analyses across multiple assignments. Additionally, in a structure based on director Anne Bogart's legendary "Collaboration" course at Columbia University's School of the Arts, students will experiment with practice as a way of knowing, as they work in small companies to create, stage, and review short, critically engaged adaptations of each play, every two weeks. Students will also join a Special Interest Group (SIG) based on rotating course themes, which may include Adaptation, Immersivity, Interactivity/Participation, Stage Technology, and Historical Context. This course fulfills the "Studies in Historical Practice" requirement for Drama majors and minors.

Credit 3 units. A&S IQ: HUM

---

#### L15 Drama 304 Makeup for the Stage

A hands-on introduction to the makeup techniques most commonly used for theater productions, including basic corrective, age, changing the shape of the face, and special effects, as well as the designing process. Students will apply makeup to their own faces and are required to purchase the makeup kit specified by the instructor.

Credit 2 units. A&S IQ: HUM EN: H

---

#### L15 Drama 3081 Costume Rendering and Design

Costume Rendering and Design is an introduction to the skills required for designing costumes for theater productions. Class topics will include duties and responsibilities of costume designers for theatre, elements and principles of design, research methods, drawing the human figure and clothing, various color media, text analysis and creating costume-related paperwork for plays, communicating character with costume renderings, and the time management required to complete designs in a deadline-based industry.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L15 Drama 309 Stage Technology

Practical study of technical theater procedures and scene shop; production techniques. Course outline includes lectures, demonstrations of equipment, production assignments, and research-oriented project work. Prerequisite: Drama 212E, or permission of instructor.

Credit 3 units.

---

### L15 Drama 310 Stage Lighting

This course will place an emphasis in the aesthetic practice of lighting design through the understanding of technology as it relates to time and space. Early on the student will learn how to properly use and apply designer's tools and then through reading, research and experimentation explore the limitless boundaries of color and texture. This will culminate in a stage design in collaboration with directing or dance class. Upon completion of the course, the student will be able to speak eloquently on design theory and be able to move on to further design study in Advanced Lighting Design: L15 410.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L15 Drama 311M Scenic Design

An introduction to the process of scenic design, as it relates to aesthetics, dramatic literature, collaboration and production. Projects involve design conceptualization, documentation, graphics and realization.

---

### L15 Drama 314 Voice-Speech Laboratory

Fundamentals of speech for the stage focusing on breath support, resonance, articulation, and speech as an expression of an individual's needs. The course includes an introduction to stage dialects. Preference given to majors.

Credit 3 units. A&S IQ: HUM EN: H

---

### L15 Drama 3153 The Women of Greek Tragedy

This course examines the role of women in Athenian drama. Students will read English translations of the works of the three major tragedians -- Aeschylus, Sophocles, and Euripides -- and their near contemporary, the comedian Aristophanes. Direct engagement with ancient texts will encourage students to develop their own interpretations of and written responses to the political, social, and ethical manipulation that these mythological women were compelled to endure and the subtle ways in which they appear to exercise power themselves. Selected scholarly articles and book chapters will help students to contextualize these ancient dramas in their culture of origin. Because such issues continue to preoccupy both sexes today, students will see how Greek tragedy addresses perennial historical and cultural concerns through the examination of adaptations of Greek tragedies ranging from Seneca in ancient Rome to Spike Lee's "Chi-Raq" and Luis Alfaro's "Mojada: A Medea in Los Angeles." The final research paper will encourage students to consider how a specific female character from antiquity is transformed for a "modern" dramatic audience.

### L15 Drama 3201 Concepts in Theater Architecture and Performance Space

Can a cloakroom or a stairwell become a theater? How do site and placement affect the meaning potential of performance? How does contemporary environmental staging conjure a world different from that of the modern box set, the baroque perspective stage, or Shakespeare's Globe? We engage such questions by drawing on theory, history and hands-on creation to examine historical, actual and potential performance spaces. Readings in architectural and dramatic theory, theater history, performance studies and philosophy provide

both a critical descriptive vocabulary and a conceptual repertoire for use in creative class assignments--both informing students' investigations of actual theaters or other performance-ready spaces and provoking their creation of experimental performance spaces. Readings will cover semiotic, materialist and situationist approaches to space, as well as concepts including site specificity, space vs. place, framing, perspective, miniature, the door, the curtain, the cloakroom and the monument.

Credit 3 units. A&S IQ: HUM EN: H

---

### L15 Drama 3205 Acting for the Camera

This course offers an introduction to the world of on-camera acting, performance skills for media-based work, and industry-related career opportunities. Students will learn the techniques, skills and vocabulary required for actors when performing for the camera and pursuing a profession in front of the camera. The course is designed for students to practice and examine the craft of on-camera performance and, will examine the business of being a film, television, commercial or video actor. Exercises will be designed to gain relaxation and comfortability in front of the camera and will then extend to performance opportunities using commercial, industrial/corporate, television and feature film scripts. Students will also be given insight into the casting process and current industry standards for performers. Actors with live stage experience and training will focus on adapting their craft to the lens, building on the textual analysis, movement, voice and character work education provided by the Performing Arts Department's acting curriculum. Those students with no acting experience will be introduced to the fundamentals of acting in tandem with the pursuit of disciplined, truthful, believable work while in front of a live audience or a camera. All classes will take place in the Harvey Media Center to utilize a professional setting and equipment.

### L15 Drama 3227 Devising, Adaptation, Docudrama

This course explores three ways of theatre-making that have revolutionized the contemporary stage: devising (a collaborative process emphasizing physical techniques to realize ideas), adaptation (the transposition of a narrative from one mode to another), and docudrama (the self-conscious staging of history through the assemblage of documentary records). Beginning with a focus on the current "postdramatic theatre" and the pre-histories of these contemporary practices, we will engage current scholarship on each form, learning the "how" and "why" from contemporary practitioners, while considering the rhetorical structure of each form in relation to the social meanings they generate for their audiences. Divided into 3 units, the course will combine the study of each method with hands-on practice, and will conclude with a showcase featuring an original performance created by the student collective. A theme (variable by semester) will unite the three sections of the course, helping students see how a single topic can be illuminated in different ways through these three methods of creating performance.

### L15 Drama 323 Topics in American Drama

A rotating topics course on various subjects relating to the history and theatrical practice of modern American drama.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L15 Drama 3301 Performing Gender

This course investigates an array of contemporary performances to explore manifestations of and challenges to gender norms in American culture. An initial reading of crucial performance theories by Judith Butler, Jill Dolan, and others will help set the stage for our examination of a diverse collection of contemporary texts, including plays, solo performances, stand-up, and pop culture phenomenon. We'll raise questions about feminist performance strategies, butch/femme performance, camp, cross-dressing, feminist spectatorship, multi-media performances, and the representation of lesbian desire. Prereq: Any 100 level Women, Gender, and Sexuality Studies course  
Credit 3 units. A&S IQ: HUM, SD BU: BA EN: H

---

### L15 Drama 3309 Performance and Culture

The field of Performance Studies looks carefully at the production and transmission of knowledge from a range of vantage points. This includes the written word, but it also pays special attention to embodied practice, to the built environment, and to digital spaces. In this course we will focus on performance as a form of cultural expression and as a site of cultural exchange across a variety of contexts—from staged productions to acts of everyday life. We will use performance theory to analyze sports events as ritual performances and as platforms for social change. We will think about how monuments perform, how they not only construct often contentious stories about the past but also create opportunities for dialogue. We will privilege the body as a site and method of performance to think in intersectional ways about race, gender, sexuality, citizenship, and religion. As an interdisciplinary and practice-oriented course, we will reflect critically and imaginatively on the work of anthropologists, scholars of race and ethnicity, visual artists, and performance theorists.  
Credit 3 units. A&S IQ: HUM EN: H

---

### L15 Drama 332 Comedy, Ancient and Modern

In this course we will examine the nature of dramatic comedy and its role in society. We will read, discuss and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences? How have comic playwrights responded to issues such as class, gender, religion, and politics? Why does comedy have such power both to unite and to divide people? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy. Same as L08 Classics 385W

### L15 Drama 338 Physical Theater: An Exploration of Viewpoints and Suzuki Training

In this course students will study two very different but complementary styles of movement training. Developed by the Saratoga International Theatre Institute, this method of actor training combines the improvisational exploration of time and space through "Viewpoints" with the rigid structure and physical demands of the Suzuki method. This combined approach is designed to develop heightened awareness and acute focus in the performer. In addition, it fosters greater impulsiveness and freedom in the moment while maintaining discipline and control. Students will gain flexibility and strength and will enhance their creative potential by balancing these seemingly opposing methods. Prerequisites: Acting II, Fundamentals of Movement or Intro to Dance as a Contemporary Art Form.  
Credit 3 units.

---

### L15 Drama 340 Topics in Stage Movement

Exploration of a variety of theatrical and movement concepts with emphasis on process rather than product. Concentrates on developing the expressive flexibility of the body and linking the imaginative impulse with physical movement. Preliminary work in relaxation and efficient self-use. Prerequisite: Drama 240E, or permission of instructor.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L15 Drama 341 Acting II

Fundamental scene study using texts with emphasis on integration of voice and body and the playing of actions. Students are encouraged to precede this course with Drama 207C. Prerequisite: Drama 240E. Preference given to majors.  
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L15 Drama 3411 Intermediate Acting: Scene and Character Study

This course expands and develops the work begun in Fundamentals of Acting. The focus is on developing systematic strategies for challenging theatrical texts. Emphasis will be placed on integrating the use of the voice and body as well as the development of character via actions in scene study projects. We will focus on investing fully in the imaginary/given circumstances of the plays we encounter. In addition, students will augment their study of character through audition preparation and monologue techniques. Research and analysis are featured, and students are asked to demonstrate their proficiency in written assignments. Prerequisite: Drama 240E/2401.  
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L15 Drama 3412 Acting II - Acting Styles in Theory and Practice: Modern

This five-unit class fulfills both one theater studies and one theater arts requirement for the major. It combines fundamental actor training with dynamic, performance-oriented study of the stylistic foundations of modern acting. Text-based scene study that emphasizes the integration of voice and body and playing of actions is paired with units on contemporary and historical acting styles that give context to modern acting practice. Class units cover practical aesthetics and tactical choices for actors interpreting texts, as well as theories of the body in performance ranging from early modern notions of electric and vital passions, to oratorical gesture, Stanislavski, biomechanics, Brechtian alienation, and post-modern practices including documentary theater and cross-media mimesis. Since it fulfills both the Acting II requirement and a Theatre Studies requirement for the major, the class incorporates research, writing and critical thinking assignments. However, in keeping with the notion that performance constitutes a type of research outcome, student research projects will involve kinetic elements. Acting styles will be researched in archival sources and embodied in studio exercises and creative student projects.  
Credit 5 units. A&S IQ: HUM BU: HUM EN: H

---

**L15 Drama 342 Acting III**

Emphasis on characterization while working with a diversity of playwriting styles. Prerequisites: Drama 341, either Drama 207C or 208C, and permission of instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L15 Drama 3422 Acting Styles: Realism to Nonrealism**

**L15 Drama 343 Fundamentals of Directing**

Directing is the most liberal arts of the creative theatre-making areas, drawing analytical, critical thinking, communication, design and actor coaching skills. This course will explore fundamental lessons in some of those areas, including text analysis from a directorial perspective, stage composition, auditions/casting, actor communication, time management and team leadership skills. Major course components will include one extensive script analysis paper and the direction of a scene from a contemporary play. The latter will require outside-of-class rehearsal time. Prerequisites: Drama 212E, Drama 240E/2401, junior or senior standing. Preference given to drama majors. For junior/senior status or grad students only.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L15 Drama 347 Shakespeare Globe Program: Acting**

This Acting Shakespeare course is paired with Drama 3472 as part of a four-week summer intensive program held at the Shakespeare's Globe Education Centre in London. This course, as well as the companion Text and History course (Drama 3472), is taught by a Washington University faculty member, and the program also heavily draws on British theater professionals and educators from Globe Education, who teach a set of short courses on movement, voice, textual analysis, historical context, monologue performance, and stage combat. Frequent access to the Globe stage allows actors to work in a spatial configuration very similar to that once used by Shakespeare's company itself. The course culminates with performances of scenes and monologues on the Globe stage. Application process must initiate through the Performing Arts Department office.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L15 Drama 3473 Shakespeare and Early Modern Performance**

Paired with Drama 347, "Shakespeare Globe Program: Acting," this course uses the resources of London and the Globe Theatre as departure points for an examination of Shakespearean performance in its historical and cultural context. We pay close attention to the dramatic text: meter, style, metaphorical language, dramatic composition, rhetoric, genre, etc. We consider such topics as Shakespeare's playing spaces, the actor-audience relationship in the Globe Theatre, acting, movement, original rehearsal practices, the boy actor, costumes, sound, music, props, and the culture of the Bankside (bear-baiting, taverns, violence, prostitution, etc.)

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L15 Drama 3491 Media Cultures**

This course is an introduction to methods in media and cultural studies. We will analyze intersections of media with race, gender, and sexuality by focusing on television and digital media examples. The course begins by exploring questions of representation in media then continues by interrogating how media are implicated in existing structures of inequality and differences of social and cultural power. We will end by discussing some ways that scholars have theorized media consumers as actively engaging with media texts, including scholarship on fan cultures and social media. Required screenings.

**L15 Drama 361 Stage Management**

A practical approach to the study of theater stage management focusing on organizational and communication skills. Workshops, lectures and discussion, guest speakers and field trips covering the pre-production, rehearsal and performance periods, labor relations/performing arts unions, career opportunities and supporting the vision of the artistic team. Prerequisites: Drama 212E and Drama 240E.

Credit 3 units.

---

**L15 Drama 365C Theater Culture Studies III: Melodrama to Modernism**

The third in the department's three-course history sequence, TCS III surveys the dramatic literature and cultural history of the modern theater. Beginning with Romanticism's self-conscious break with the past, we'll study the rise of bourgeois melodrama with its intensely emotional rendering of character and spectacular effects. We'll consider how those effects were made possible by advances in industrial stage technology which reproduced the everyday world with unprecedented verisimilitude, and how playwrights responded to those technologies by calling for the theatre to become either a "total work of art"--plunging its spectators into a mythical realm--or a petri dish--analyzing the struggles of the modern individual within his or her modern milieu. Exploring a range of aesthetic modes--including Realism, Naturalism, Symbolism, Expressionism, the Epic Theatre, and the Theatre of the Absurd--we will read classic plays by modern playwrights to consider how the modern theatre helped its audiences understand as well as adapt to the rapidly changing conditions of the modern world.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, HUM EN: H

---

**L15 Drama 367 Intro to Drafting for the Theater**

This course will provide the student with a basic understanding of all of the various types of technical drawings needed to successfully execute a scenic design. Throughout the course the student will master all the technical and aesthetic skills needed to produce clean and effective draftings for the theater. In order to successfully complete this class, the student will be required to purchase a drafting board and related drafting materials.

Credit variable, maximum 3 units.

---

**L15 Drama 368 Black Theater Workshop III**

A performance-oriented course that explores the black experience through acting, directing, and playwriting. Students will develop through classroom improvisation short performance pieces during the semester. They will also be required to attend three to five plays. Each student must participate in a final performance which is in lieu of a written final examination.

Credit 3 units. A&S IQ: HUM, SD Art: HUM EN: H

---

**L15 Drama 372 Advanced American Musical Theater**

This course will focus on developing the acting, singing and dancing techniques required for performing in musical theater. The student will develop group pieces and will participate in scenes that explore character within a musical theater context. The class will culminate in a workshop performance. Prerequisite: Drama 221 and permission of instructor, by audition. Repeatable 1 time for credit.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L15 Drama 374 Theories of Modern Drama**

What makes modern drama "modern?" How does it differ from the drama of other cultural movements? When does the modern period begin? This course takes up such fundamental questions in order to examine not only the influential plays that have come to define the "canon" of modern drama, but the various theories that have been proposed as a way of understanding them in relation to the history of western culture. From Friedrich Nietzsche's *The Birth of Tragedy* to Walter Benjamin's thesis on the *Trauerspiel* to Emile Zola's *Manifesto on Naturalism in the theater*, we will start by considering when modern drama begins and what constitutes its defining features. With such provisional definitions in place, we will then engage the responses of fellow modernists such as Richard Wagner, William Archer, T.S. Eliot, Bertolt Brecht, Georg Lukacs, and Theodor Adorno. We will also consider whether so-called post-modern drama has broken with the modern period to introduce something altogether new, and how recent debates concerning interculturalism, the ideology of form, and performance invite new ways of understanding the cultural function of modern drama and its legacy in our own historical moment.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

**L15 Drama 3751 American Culture: Methods & Visions: Home, Bittersweet, Home: Histories of Home and Homeownership**

Required course for AMCS Majors. See semester listing for current topics. As a Writing Intensive course, 375A serves as an occasion for AMCS students to think about matters of argument and presentation, and to develop ideas and models for future research. This course is intended for students at the Junior Level or Higher; it fulfills the "multidisciplinary" (MD) requirement for AMCS Minors and the "Methods Seminar" requirements for AMCS Majors.

Same as L98 AMCS 375A

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: CPSC, HUM EN: H

---

**L15 Drama 378 Contemporary American Theater**

This course is a focused investigation of the aesthetic, political, and urban landscapes of the contemporary American theatre. We will read published and unpublished plays, familiarize ourselves with the country's most important companies, festivals, and institutions, and discuss issues facing the American theatre now. We will explore the role of the arts in urban planning and development, and address the relationship between higher education and arts institutions, paying particular attention to ideas of community engagement and social justice work undertaken by both. Artists to be studied may include Tony Kushner, Suzan-Lori Parks, Caryl Churchill, Branden Jacobs-Jenkins, Lynn Nottage, Young Jean Lee, and Lin-Manuel Miranda. This course will include a mandatory class trip at the end of March to the Humana Festival of New American Plays in Louisville, Kentucky. Students will prepare for this trip by reading the works of featured playwrights and establishing a research project that will be carried out on-site. Findings from the research project will be presented upon the return to St. Louis. Admission to the course is by instructor permission only; an application form will be sent to all registered students at the conclusion of the registration period. In consultation with and with the permission of the instructor, this course may fulfill the Fieldwork requirement for American Culture Studies majors.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

---

**L15 Drama 379 Expressionism in Theater and Film**

This course is designed as an advanced introduction to the aesthetic movement of Expressionism as it appeared in Germany and the United States in the media of theater and film. Characterized by stylized settings that "ex-press" the internal spiritual/emotional/psychological state of its central character, Expressionism is usually discussed as a reaction to Realism, given its overt symbolism, telegraphic diction, and episodic action. Beginning with a brief general introduction to the movement (including its manifestation in the visual arts), we will consider its cultural, political, and critical history, while exploring more recent scholarly investigations into the significance of its performance dimensions.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

---

**L15 Drama 384 Digital Media for the Stage**

Entertainment technology continues to evolve and push boundaries by taking our imagination and turning it into a version of reality. Digital Media will attempt to explore some of the tools used to bridge the two worlds of thought and sight. We will learn how to think creatively about imagery and how to paint that onto a stage through a different type of light: digital. Using QLab and Green Hippo -- two of the most widely used media control systems in the world -- we will learn how to deliver thought-provoking illusions of light and texture on the stage.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

---

**L15 Drama 387 In Living Color: Performing the Black '90s**

From Cross Colours overalls to oversized sweatshirts and boom boxes, the 1990s was loud, colorful, and in your face. But along with the fun of house parties and the growing prominence of hip-hop, Black people in the United States also contended with heightened criminalization and poverty codified through the War on Drugs, welfare reform, police brutality, and divestment from public education. In the midst of insurgency, creativity, and the quiet that undergirded both, we will study the various cultural productions of Black performers and consumers as they navigated the social and political landscapes of the 1990s. Focusing primarily on urban centers, we will study major works growing out of hip-hop, R&B, comedy, television shows, films, and popular literature that attends to the regional differences throughout the nation. In this course, we will use theories from performance and cultural studies to understand the specificities of Blackness, gender, sexuality, religion, and geography in the 1990s.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM BU: BA, HUM EN: H

---

**L15 Drama 388 Asian and Asian Diaspora Theatre**

It is often falsely assumed that Asian and Asian American theatre is a theatre for specific ethnic communities. However, its significance in the US and in broader world theatre scenes has reverberated with audiences of diverse backgrounds, leading to a production of vibrant artistic and scholarly discussions on its power in shaping cultures and politics in America and in other global regions. This course engages with these very discussions, centering on understanding the complexity of contemporary Asian and Asian American theatre by situating them in the context of Asian diasporas. Key inquiries include the following questions: What causes the circulation of peoples from Asia and people of Asian descents from their "home" countries to another country?; how do experiences of war, international marriage, adoption, political oppression, refugee, and marginalization in "new" countries impact the psyche of diasporic subjects?; the notion of "Asia" as Other has been integral to the formation of the US national identity from the country's inception, but what exactly is "Asia," and what is the role of theatre in challenging the relentless othering of Asians?; and finally, how might the framework of Asian diasporic theatre and performance help us move beyond the bifurcation between Asian Studies and Asian American Studies? In exploring these questions, we will engage in analyzing plays, production videos, interviews with

artists, and scholarly writing, learning from artists who examine lives and histories of Asian descents (Chinese, Filipino, Hmong, Japanese, Korean, Vietnamese, and Taiwanese among others), as well as from thinkers that have been foundational to the development of Asian and Asian American theatre and performance studies. By the end of the semester, students will have read plays, documentaries, musicals, and interdisciplinary arts from the contemporary Asian and Asian diaspora theatre and be able to engage in an informed debate on the role of Asian and Asian American theatre in shaping contemporary cultures in the US and in other parts of the world. All readings are in English or in English translation and are available on Canvas.

Credit 3 units. A&S IQ: HUM, LCD, SC EN: H

### L15 Drama 390 Immersive Story Studio

What possibilities and pitfalls do immersive practices create for live storytelling? How do the affordances of a digital tool amplify or suppress aspects of a source story? What new insights into familiar stories can we generate with radical adaptation? To engage these questions, this studio seminar blends humanistic scholarship with critical making, theatrical practice, and interdisciplinary, team-based agile development processes. Each two-week "sprint" engages a different immersive, theatricalized context, asking students to envision how the tools utilized therein might illuminate latent aspects of familiar stories. Topics include spatial computing/AR/VR/ XR, immersive theatre, theme parks, and cultural institutions/ museums. Additionally, this course utilizes "critical making" as an epistemology, wherein the site of knowledge creation is the process of devising an object, tool, performance, or installation in conversation with a discipline's critical apparatus. Accordingly, course-long projects will find students selecting and using immersive tools-digital, analog, or both-to radically adapt a familiar story, broadly construed. Importantly, while technological skills are welcome, they are not required. Students are encouraged to envision gloriously and scope effectively as they design a hypothetical or prototyped research project and complementary critical engagement. This course may be repeated for credit for students who wish to design and execute a more robust project.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L15 Drama 394W Writing For and About the Theater

In this course, students will learn to write for and about the theater, exploring different forms of dramaturgical and scholarly research as well as journalistic and academic writing. To build skills in both critical analysis and synthesis, students will learn how the key elements of the playwright's text (e.g., language, character, plot, setting) work to create meaning within the work of dramatic literature and how theatre-makers use the various "languages" of the stage (e.g., costume/scenic/lighting design, music, acting) to give expression to an overarching interpretation of the play. Because research is essential to this course, students will learn how to access a variety of library resources by working closely with our subject librarians. By the end of the semester, students will have assembled a portfolio consisting of both journalistic and academic performance reviews, a dossier of dramaturgical research, and a research-based scholarly paper.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

---

### L15 Drama 3950 American Musical Film

Film musicals were crucial to the success of the American film industry from the dawn of sound film in the late 1920s to the demise of the studio system in the late 1950s. This course examines the American film musical from a variety of aesthetic, critical, and historical perspectives, with particular attention to how the genre interacted with popular music and dance and the major political and social trends of the Thirties, Forties, and Fifties. REQUIRED SCREENING: [day, time].

### L15 Drama 396 History of Western Costume

Of particular interest to fashion, history, anthropology, and performing arts majors, this course is an exploration into the clothing worn by predominantly Western cultures from Ancient Greece through the 1890s. Lectures incorporating images of extant garments, sculpture, art, and photographs will inspire discussion regarding the influences on fashion evolution and the cyclical nature of fashion. Assessment is by exam, the first of which is on the fourth class meeting, so this is not a recommended course to "shop." Please note that this class is a prerequisite for History of Western Costume in the 20th Century, which is offered in spring semester.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC BU: HUM EN: H

---

### L15 Drama 3961 History of Western Costume in the 20th Century

History of Western Costume in the 20th Century is a continuation of the themes explored in Drama 396 (History of Western Costume from Ancient Greece Through the 19th Century). Ideally, students will have already taken Drama 396 before enrolling in this course. This is a fast-moving, lecture-style course that examines objects of human apparel from 1900 through the present and analyzes the causes of fashion evolution throughout the 20th century. Students will explore the influence and aesthetics of major designers, and they will observe and discuss the ways in which contemporary interpretations of the past are modified to comply with contemporary modes and expectations. Assessment is through exams and evaluation of a presentation to the class.

### L15 Drama 3975 Wolves of Wall Street: American Business and Popular Culture

America's perceptions about Big Business and the Free Enterprise system have evolved and changed over time from the 1920s to the present. During the 1980s, for example, Oliver Stone's 'Wall Street' seemed to endorse the notion that "greed is good." Today, however, the topic of rising income inequality has been connected with the collapse of prestigious Wall Street firms, the "housing bubble," a declining middle class, and widespread fear about the future of "The American Dream." This new course examines a variety of artistic, ethical and historical perceptions about American Business as depicted in popular culture and the arts over the past hundred years. How have America's foremost artists (among them F. Scott Fitzgerald, Eugene O'Neill, Arthur Miller, Martin Scorsese), dealt with questions of conspicuous consumption, the acquisition of capital for its own sake, and the disparity between rich and poor? We survey several artistic genres and artistic forms, including American tragic works like 'The Great Gatsby' and 'Death of a Salesman,' to popular musicals such as 'How to Succeed in Business' without Really Trying and 'The Producers.'

### L15 Drama 400 Theatrical Rendering for Scenery

An exploration of media and rendering techniques used for presentation of design ideas in scenery. A variety of stage sets, still lifes and figure drawing will be rendered during a two hour studio format with some additional studio time required. Materials to be provided by students.

Credit 3 units.

---

**L15 Drama 4001 Computer Assisted Design for the Theater**

This course will be an in-depth study of how computers can assist designers in drafting and rendering processes. Primary study will be focused on the program Vectorworks. We will fully explore the use of this program in development of scenic and lighting design projects from basic line drawings to fully rendered 3D images. Other programs to be covered will be Autocad, Google Sketch Up, AG132, Photoshop CS3, and some lighting design pre-visualization software. Projects will be centered on theatrical applications and based on students' imaginations.

Credit 3 units. A&S IQ: HUM EN: H

---

**L15 Drama 4011 Staging Atrocity: Theater of the Holocaust**

Responding to the Holocaust has challenged artists working in every medium. Nowhere are these challenges more extreme than in the theater, where the intimacy of the space, the close proximity of live actors and audience, and the subject matter itself may serve to intensify its effect. We will read a careful selection of modern and contemporary dramas and explore the range of responses. Underneath each weekly topic reverberate the nagging question of whether one can -- or should -- make art from the Holocaust, as well as a serious exploration of the uses and effectiveness of theater to communicate on this subject. We look at the ways in which the Holocaust has been used as a subject to raise moral dilemmas, examine the limits of humanity, elicit doubt or faith, and provide political commentary. We will also discuss the ways in which playwrights have stretched the limits of the theater to meet the challenge of staging the Holocaust. Topics considered include the nationalization and personalization of the Holocaust, the role of the second generation, issues of audience, and the use of experimental forms and obscenity. The plays on the syllabus are from North America, Israel and Europe. All readings are in English (original or translation).

---

**L15 Drama 403 Dramaturgical Workshop**

A laboratory course that investigates dramaturgy from four vantage points: New Play Dramaturgy, Institutional Dramaturgy, Dramaturgy of Classics, and Dramaturgical Approaches to Nontraditional and Devised Theater. This is a "hands-on" course where student dramaturgs will not only pursue the study of dramaturgy, but will work actively and collaboratively with playwrights, actors and each other.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM

---

**L15 Drama 4031 Black and White in American Drama**

This course will address the complex issue of race in America through the 19th and 20th centuries as dramatized by American playwrights, black and white. Authors include Countee Cullen, Lillian Hellman, Eugene O'Neill, Jean Toomer, Langston Hughes and Arthur Miller. Prerequisites: Junior standing, two 300 level courses or better.

Same as L14 E Lit 403

Credit 3 units. Art: HUM

---

**L15 Drama 4081 Theater for Social Change**

Drawing upon the principles and teachings of Brazilian director Augusto Boal, students will explore ways of effecting positive social change in a theatrical context. Students will study the aesthetic of Boal's "Theatre of the Oppressed" and learn various games and exercises designed to mine issues of social (in)justice. Using Boal's techniques of "image" and "forum" theatre, students will then create and perform plays focused on these issues. This public performance will be an interactive event offered for and with the university community. No prior performance training or experience is required for this course.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM EN: H

---

**L15 Drama 4082 Advanced Theater for Social Change**

This course is a continuation of exploration begun in Drama 4081, Theater for Social Change: a prerequisite for this advanced course. Students will expand from exploring their own experience with oppression to facilitating that exploration with others. Students will be introduced to the "Joker" system, developed by Brazilian director Augusto Boal. The Joker is the director of a forum theater event. He leads both the exploration and play-making phases of the process. In preparation for stepping into this role, students will read Paulo Freire's Pedagogy of the Oppressed which will give them a foundation in the power and efficacy of collaborative educational techniques. In addition, students will read Theatre for Living, Canadian director David Diamond's book detailing his application of Boalian techniques in a less overtly oppressive society. Students will begin their practical exploration by first working with one another, learning how to lead exercises and games, followed by an exploration of play making and the facilitation of an interactive forum theater event. The course will culminate in an outside project in which each student is placed with a St. Louis area school or social organization. The student will apply skills he has acquired throughout the semester by serving as the "Joker" of the workshop. In this role, the student will lead the entirety of the workshop process with a selected group exploring ways of effecting positive social change in a theatrical context. He will facilitate exercises with the group that mine a chosen area of oppression with which the group is grappling. The student will guide play-making with the group that highlights this area of oppression. The resulting plays will then be presented to the larger school or organization community. This culminating event will be an interactive forum theater presentation that the student will lead as "Joker."

**L15 Drama 409 The Modernist Revolution in the Arts**

What is/was Modernism? How did this worldwide phenomenon impact the arts in every genre and medium from the turn of the Twentieth Century to the present? Do we still live in the age of Modernism, or should we consider ours a new, Post-Modern age? This course will examine these and other questions as they relate to the theatre, prose, poetry, and the visual arts. Our investigation will focus on most of the major literary and artistic movements, including Naturalism, Impressionism, Symbolism, Surrealism, and Expressionism. We will examine literary manifestoes which help to illuminate the periods under discussion, as well as look at individual works themselves. Central to our approach in the course will be an interdisciplinary perspective. Among the luminaries whose work will be considered are Ibsen, Strindberg, Chekhov, Hemingway, Dali, Picasso, Stravinsky, Artaud, Kafka, and Beckett.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L15 Drama 410 Advanced Stage Lighting**

This course is an advanced, continuation of Drama 310 Stage Lighting. Emphasis is placed on cultivating design aesthetics and a further exploration of controlling light in a laboratory and live setting. Students will dive deeper into color theory, light plot development, and

ultimately into advanced lighting console programming. The course objectives will cover a wide range of production styles and performance venues within a series of challenging design projects. Prerequisite: L15 310 or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

---

#### **L15 Drama 4101 Retina Burn: Concert Lighting Technology**

Lighting Technology will be an extremely hands on approach to learning how the top industry designers create major shows and concerts with the most state-of-the-art equipment. We will spend a considerable amount of time learning how to use and program robotic/moving lights, LED fixtures and video integration for use in drama, dance, musical and concert settings. The student will gain intensive training in the use and programming of the ETC Express, ETC Ion and GrandMA 2 Light consoles with a full range of Vari\* Lite robotic fixtures. In addition the student will also receive training in Isadora, a very powerful video design program. Due to the amount of programming time required outside of class, this will be a four (4) credit lab course. Prereqs: Drama 212 and Drama 310.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

#### **L15 Drama 412 Advanced Practicum in Technical Theater**

Independent Study. Intensive practical experience in scenic design building and painting; lighting design and installation; costume design, coordination, and construction; makeup; and audio production. Prerequisites: Drama 212E, credits on at least two productions, and permission of staff.

Credit variable, maximum 3 units.

---

#### **L15 Drama 4121 Advanced Practicum in Technical Theater: Scene Painting**

Exploration of the skills and traditions of theatrical scene painting in a laboratory setting. Projects involve color theory, basic surface treatment techniques, representational depiction and advanced problems. Realized paint work on Performing Arts production will be part of the course. Prerequisite: permission of instructor.

Credit 3 units. EN: H

---

#### **L15 Drama 4140 Topics in Embodied Communication**

This course is about listening. We will begin by mediated and unmediated listening with the human auditory system and continue into an exploration of multi-modal listening, focusing on vibration and on somatic attention. We will work in the "studio," which will include a music studio, a dance studio, and the environment. Our investigation will include the study of sensing in more-than-human organisms as well as theoretical perspectives from sound studies, critical improvisation and history of science. The course will encourage the perspective that the practice of listening is a political act of tending to the invisible, the non-normative, and the incomplete.

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

---

#### **L15 Drama 416 Period Style and Design History**

Examination of period styles as they relate to theatrical design and history. Study of architecture, furniture, and props from Greek to contemporary periods. Prerequisite: Drama 212E.

Credit 3 units. A&S IQ: HUM Art: HUM

---

#### **L15 Drama 4224 Acting Styles: Realism to Nonrealism**

This course builds on skills in character development and scene study, beginning with psychological realism and then shifting into various forms of nonrealism. Through written analysis and performance, students apply acting techniques that address a variety of playwriting styles. Prerequisites: Drama 240E/2401 and Drama 341/3411. The semester begins with a deepening understanding of psychological

realism through the exploration of Anton Chekhov's plays. Focus then shifts to nonrealism with Harold Pinter. The second half of the semester is solidly rooted in nonrealism. Students hone their skills by exploring two more scenes from classical and/or contemporary texts. Additionally, in the final scene, students are encouraged to explore applicable considerations of gender-identity, race, and ethnicity in play and character selection. Prerequisites: Drama 2401 Fundamentals of Acting, Drama 3411 Intermediate Acting This course is open exclusively to seniors and graduate students

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

#### **L15 Drama 422A Film Stardom, Performance, and Fan Culture**

This course focuses the Hollywood star system. We will explore stars in relation to celebrity and consumerism, especially how "stardom" is created by a system that seeks to create effects in film viewers whether conceived as audiences, fans, or spectators. We will examine the performance element of stardom and its relationship to genre, style, and changing film technology. Also of concern will be how stars and the discursive construction of stardom intersect with gender representation, race, ideology, sexuality, age, disability, nationality, and other points of theoretical interest to and historical inquiry in contemporary film studies. While emphasis will be placed on mainstream commercial U.S. cinema, students are encouraged to pursue questions beyond this framework within their own research. REQUIRED SCREENING: [day, time]. Same as L53 Film 422

---

#### **L15 Drama 4234 Performing Knowledge: Arts Integration Pedagogy in Theory and Practice**

This course invites students interested in the performing arts to apply their talents to the K-12 classroom through a service-learning component that allows them to develop and implement an arts-integrated curriculum grounded in current research in the cognitive sciences. Divided into four units, the course begins with a survey of recent research in cognitive science that traces the effects of arts-related activities on brain development. The second unit builds upon that theoretical grounding, focusing on a model of arts-integrated pedagogy developed through Harvard University's "Project Zero." The third and fourth units are practice-based, with students developing a lesson plan in a core subject area that incorporates the performing arts. Then-in consultation and collaboration with an Interchange artist-in-residence and a master teacher in the St. Louis or Normandy Public Schools-students will implement their curriculum in a K-12 classroom, testing its efficacy as well as the theoretical assumptions upon which it is based. This course is open to all students across campus who have a strong interest and/or background in the arts, and who wish to explore opportunities in service-learning.

Credit 3 units. A&S IQ: HUM EN: H

---

#### **L15 Drama 4261 Performing the Political in American Dance**

This course is an exploration of the politics of performance and the performance of politics through the lens of American dance in the 20th and 21st centuries. Through readings, screenings, and discussions, we will examine the ways in which American dance developed against and alongside political movements in the United States, particularly ones concerning nationalism, race, gender, and human rights. We will also investigate how the lens of dance and choreography offers an expansive means to conceptualize political questions of citizenship and social protest, broadening our understanding of embodied performance. Guided by several key philosophical texts, this course will focus on the concepts necessary for examining the convergence of performance and politics (e.g., representation, ritual, spectacle, body, mimesis, propaganda) while also paying special attention to the politics of funding and censorship that has governed the creation and presentation of dance in the United States. No dance experience is necessary.

**L15 Drama 431 English Drama Exclusive of Shakespeare to 1642**

Studies of selected major plays against a background of change and tradition in English drama from its beginnings to the closing of the theatres.

Same as L14 E Lit 431  
Credit 3 units. Art: HUM

---

**L15 Drama 4310 Borders and Boundaries**

International borders affect you every day. In the United States and elsewhere, they play a role in determining whether you are a birthright citizen or an unauthorized migrant. They showcase a nation's ability or inability to guarantee your wellbeing. They factor into immigration, asylum, and national security debates. Those who live near an international border often deal with a particular set of issues. Living in an either/or environment can impel border residents to strategically recognize or deny cultural forms to be hyper patriotic, for example, to speak one language at home and another at school, or to understand gender, sexuality, race and ethnicity in site-specific ways. This course will draw from the work of performance theorists, playwrights, anthropologists, historians, and geographers to write critically about and devise artistic work that opens up foundational theories, debates, and genealogies in the study of borders and boundaries. This course will use North America as its primary reference point, but it will also draw our attention to border and boundary dynamics elsewhere to think about global challenges such as forced migration and climate change.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L15 Drama 433A Performing Gender and Sexuality in America**

This course examines how the performance of gender and sexuality has shaped the social, cultural, and political history of the United States from the early nineteenth century to the present. While performance happens in everyday life, we will primarily focus on how the stage has been a potent space to debate issues about gender and sexuality. This course will put forth the argument that the stage has historically not only reflected broader social concerns, but also actively helped to shape those social dynamics. After an introduction to foundational ideas, we will start the semester with minstrelsy, signaling that the performance of gender and sexuality in America is deeply intertwined with race, class, and national belonging. Reading and viewing assignments bring together feminist theory, queer theory, American social history, and performance texts to build robust seminar discussions.

**L15 Drama 435 Expressionism in the Arts**

A close study of expressionism as an international phenomenon in the arts, from the anti-naturalist movements of the 1890s to Hitler's condemnation of expressionism as decadent. The evolution of expressionist theatre from Wedekind to Toller and Kaiser; such composers as Schoenberg and Berg; in the visual arts, such groups as Der blaue Reiter and Die Brücke, such independents as Kokoschka; in cinema, such figures as Pabst, Murnau, Von Sternberg, Lang. Prerequisite: Drama 208E, Drama 336, or permission of instructor. Credit 3 units. Art: HUM

---

**L15 Drama 436 Seminar in Comparative Drama**

The course begins with Plato's critique of mimesis and Aristotle's defense, as we read THE POETICS as a response to Plato. We will take some of Aristotle's basic concepts, such as mimesis, plot, character, and thought, and attempt to apply them to drama up to the present day. We will also consider fundamental elements of both the dramatic text and the dramatic production, such as space, time, dialogue, narrative devices, and perspective. Brecht's theory of "epic drama" will form the other conceptual pole in the course, opposing Aristotle. Besides these two theorists, other figures will include Ben Jonson, Corneille, Dryden, Diderot, Schiller, Hegel, Zola, Artaud, and Grotowski. The course, then, will have both chronological and thematic axes. Three papers and one oral presentation. Credit 3 units.

Same as L16 Comp Lit 436  
Credit 3 units. Art: HUM

---

**L15 Drama 437 Performing Ghosts: Blackness, Performance, and Archival Erasure**

Taking ghost as apparition, metaphor, an imaginary, and type of possession, this course focuses on the intersections between performance, affect theory, and archival practice to investigate how scholars and artists contend with the psychic and affective terrors against blackness. Part of these terrors, the course asserts, happened and is happening in the realm of the affective, ephemeral, and archival. Moving across theoretical works, literature, and theater, our readings differently query: how can performance enable us to recuperate the lives of those violently erased from the archive? How to imagine embodiment for subjects "tracked" by history, such as black folks whose bodies suggest other forms of pathology, like sexual deviancy, mentally "insanity," and other forms of criminalization? How have attachments to ghosts been used as a methodology to stage and reperform blackness in the past and in the present? And lastly, how can we capture embodiment (or enmeshment) without live bodies? By rethinking "liveness," "absence," "loss," and "remains," the readings and discussions will offer performance as a methodological and analytical infrastructure to conduct historical and/or archival research.

---

**L15 Drama 4370 Music and Performance**

Christopher Small has asserted that music is not a thing but an activity--something that people DO. Starting from this premise, this course explores popular music in performance and introduces students to the flourishing scholarship at the intersection of performance studies, sound studies, and popular music studies. We will attend to sound, music, listening, and voice--and we will consider these elements of performance in combination with costume, choreography, stage design, and audience participation and interaction. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, musical theater, and rock. We will consider the pleasure and politics embraced by everyday people and activists who have

used music in protest movements from the labor movement to Black Lives Matter. We also attend performances around St. Louis, guided by the interests of the class. Upper-level undergraduates and graduate students (enrolled under a 500-number) with an interest in music, theater, dance, cultural history, American studies, and African American studies are especially welcome.

#### L15 Drama 440 Acting IV

Acting IV synthesizes the student's performance training, creative and scholarly writing skills and knowledge of dramatic literature. The advanced acting student is encouraged to develop and articulate his/her own aesthetic convictions. The course includes intensive solo performance projects, including writing and performing original monologues. Also, significant emphasis is placed on preparing the student for the work of professional acting, including workshops on audition monologues, head shots, resumes, and economic issues. In addition, the students become familiar with various American theater cities, the regional theater system and prominent working theater artists. The course closes with a public performance of the original, scripted and audition material developed over the semester.

Credit 3 units. A&S IQ: HUM EN: H

---

#### L15 Drama 4401 Advanced Acting

Are you a senior or graduate student about to enter the marketplace? Are you considering a career in theater-making, particularly in acting? This course is poised on the border of a university environment and the real world. In a very full 14 week curriculum, we will explore the generous set of performance-based theatrical skills you have amassed over your education. The projects are designed to synthesize the student's theatrical training and experience through solo performance work. Students will be encouraged to develop and articulate their own aesthetic convictions through an examination of the creative process, the development of original solo material, the exploration of the theater profession within the current American and international theatrical climate, the development of new audition pieces, small group presentations and an analysis of plays and other reading assignments. The course closes with a public showcase of the original material written and developed over the semester. While the course's performance work is explored through an actor's lens, the class is open to all advanced drama students who meet the prerequisites. Prereq: L15 2401 and L15 3411. This course is open only to seniors and graduate students.

---

#### L15 Drama 448 The History of Theater Design

Survey course covering the history of the performance space and the scenic design elements contained within that space. The visual elements and theater architecture of each period are examined in relationship to the art and technology of the time. Prerequisites: Drama 207C or 208C, and Drama 212E.

Credit 3 units. Art: HUM

---

#### L15 Drama 449 Seminar in Dramatic Theory

This course is an in-depth exploration of core works of dramatic theory from the ancient world to the present, and it will introduce texts that enunciate what theater is, has been, and should be. We will study authors' expressions of theater's role in society, their articulations of and responses to anti-theatrical prejudice, and their negotiations of the contradiction of putting "the real" on stage. Other significant themes include accounting for the aesthetic pleasures of drama and theater; theater as a means of educating the citizen; and the relationship between dramatic form and social and political revolution. Moving chronologically, we begin with foundational documents of the ancient world, including Aristotle's "Poetics," Bharata's "Natyasastra," and Horace's "Ars Poetica." The course then progresses through the Middle Ages, the Neoclassical and Romantic eras, and the explosion of fin de siècle avant-gardes. We will also read key texts from beyond the European tradition, including works of dramatic theory written in medieval Japan (Zeami), postcolonial Nigeria (Soyinka), and the millennial, multicultural United States (Parks). Along these same lines, we will also be attuned to transnational exchange and influence, particularly as it appears in the 20th-century theories of Bertolt Brecht, Antonin Artaud, and Konstantin Stanislavsky. Although the course will be focused on efforts to describe and prescribe theories of drama, dramatic genre, and theatrical pleasure, it will also position play scripts alongside the theoretical treatises that guide or are guided by them.

#### L15 Drama 450 Advanced Scenic Design

Advanced projects in scenic design including drafting, rendering, model building, and conception. Prerequisite: Drama 311M, or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

---

#### L15 Drama 451 Topics in Period Style: Baroque Opera and Neoclassical Style

An exploration of the dynamic interplay between high Baroque culture and the perceived style of the ancient Greeks and Romans. Primary sources used will be paintings, sculpture and renderings for Baroque operas, as well as, rare artifacts which exist from that time as these

sources relate to classical evidence extant in that period. Secondary sources will be journal articles and records of fully staged productions of intervening years. Primary interest is retracing the thought processes of the designers of Baroque opera. Focus will be on Purcell's "Dido and Aeneas", looking at the libretto and its relationship to source texts both ancient and contemporary and also its place within the cultural history of the theatre. Projects include: in class presentations and a research paper or fully realized design project.

#### **L15 Drama 4530 Presence in Performance: Alexander Technique and Mindful Movement for Performing Artists**

This course provides group and individual instruction in principles and methods from Alexander Technique and other somatic arts for training mindful, embodied presence in performance. Mindful movement techniques are widely used by professional dancers, actors, and musicians to enhance performance skill and to address/prevent injury and chronic pain. Through a workshop process of guided learning, students gain awareness of subtle inefficiencies in coordination and balance that cause pain and limit ability. Students gain ability to self-assess and adjust problematic movement patterns to improve freedom and expression. Alexander Technique works at fundamental levels of movement coordination, and its methods are applicable to all performing art genres. Training is tailored to each individual student's needs, skills and goals. This course involves experiential learning projects supported with related readings, discussion, personal research projects and presentations. Prerequisites: Graduate standing; also open to undergraduate students studying at the 400 level in their discipline with permission of instructor.

#### **L15 Drama 456 A Madman in the Theater: The History of Insanity on Stage from Sophocles to Shaffer**

The image of the madman and the theme of insanity have been extraordinarily captivating to theatre artists from the Greeks to the present. In this course we shall consider some of the most remarkable examples from the classical period, including Sophocles' "Ajax" and Euripides' "Medea" and "The Bacchae," and the Renaissance ("Hamlet," "Othello," "The Spanish Tragedy," "The Duchess of Malfi," "Life is a Dream"). We shall investigate these works both for what they tell us about the image of the madman in the historical period and culture in which they were written as well as in order to closely examine the texts themselves. We will also examine plays from the 19th and 20th Centuries, including Buchner's "Woyzeck," O'Neill's "Emperor Jones," Anouilh's "The Madwoman of Chaillot," Miller's "Death of a Salesman" and Shaffer's "Equus." Finally, the course will make extensive use of the Performing Arts Department's production of Peter Weiss' extraordinary work "Marat/Sade" and incorporate theoretical writings such as Michael Foucault's "Madness and Civilization" into discussions.  
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

---

#### **L15 Drama 459 The Filmed Stage Play**

Close textual analyses of stage plays and their film adaptations, examining structural parameters such as space, time point of view, spectator position, and performance in the two art forms. Prerequisite: permission of the instructor.  
Credit 3 units.

---

#### **L15 Drama 460 The Creative Impulse**

Developed with the director and designer in mind, this course will encourage imaginative theatermaking by developing the student's own sense of creative confidence and ability, by expanding the source options for artistic inspiration, by recognizing and valuing the synergistic properties of transcendent theatermaking, and by strengthening the collaborative skills essential to the art. The course will include creativity exercises, comprehensive forms of text analysis, exploration of other art forms, cooperative conceptual projects, and field trips to area productions and museums. Students will be expected to complete several individual projects, presentations and research papers, as well as intensive small group projects. Prerequisite: one of the following courses: Drama 307, 310, 311 or 343.  
Credit 3 units. A&S IQ: HUM

---

#### **L15 Drama 465 The Chinese Theater**

This course is a survey of the performance and literary traditions of the Chinese theater from their pre-Tang origins to the present day. The course focuses on three forms: 14th-century zaju plays, 16th- and 17th-century chuanqi plays, and recent films from China, Taiwan, and Hong Kong. Background in either China studies or theater in other cultures recommended. Prerequisite: junior level or above or permission of instructor  
Same as L04 Chinese 467  
Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

---

#### **L15 Drama 469 Topics in Shakespearean Production**

This course will examine Shakespeare's comedies in performance. Combining scene work and production history, students will gain access to the world of the comedies from both a hands-on, theoretical and historical perspective. Prerequisites: Drama 395C or permission of instructor.  
Credit 3 units. A&S IQ: HUM EN: H

---

#### **L15 Drama 4691 Shakespeare and Early Modern Performance**

Credit 3 units.

---

#### **L15 Drama 4692 Shakespeare and Performance**

How were Shakespeare's plays performed in their own day--in the Globe theater, with boy actors, and with very short rehearsal times? How, for the actor, did performance work on the outdoor stage, with the Globe's wide and deep acting platform and its intimate relationship to the audience? How might one stage Shakespeare today in an outdoor environment without lighting and with minimal sets, and with the capacity to move easily from one outdoor venue to another? From what social types in Renaissance England--such as merchants, prostitutes, aristocrats, constables, beggars, and princes--did Shakespeare draw? How can evolving ideas about race, gender, and sexuality inform the way we perform Shakespeare today? Addressing these questions and others, the course weaves together performance and literary, critical, and historical study. Topics include blank verse, performing Shakespeare's prose, playing with figures of speech, working the Globe stage, engaging an outdoor audience, acting from a written "part" rather than an entire script, performing types, exploring Shakespeare's sources as performance alternatives, making Shakespeare new-

and more. Students will rehearse and perform sonnets, scenes, and monologues based on social figures from Shakespeare's England. The course assumes a willingness to perform but not specialized acting training.

Credit 3 units. A&S IQ: HUM EN: H

---

#### **L15 Drama 471 Millinery Design and Construction**

A hands-on course exploring the major sewing and patterning techniques used to make hats from a variety of materials in a variety of styles. Students will be required to purchase some of their own materials to create several hats over the course of the semester. Prerequisite: Drama 207 or sewing equivalent, or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

#### **L15 Drama 473 Advanced Playwriting**

This course explores the tendencies and relationship between each individual student writer and the page. Exercises dispel any lingering doctrine that presupposes a certain style of writing. A large part of the class centers around collaborations. The writers write scenes as a final project for an acting class, and also work with two professional actors in an extended writing project that culminates in a script-in-hand presentation. The informal moments between collaborations look at the process beyond the first draft -- i.e., the playground of language, non-verbal options, and the maintaining of "the work" through rewrites, readings, workshops, and productions. Prerequisite: Introduction to Playwriting, Drama 227.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

#### **L15 Drama 474 Acting Theories**

This course will explore in depth the major theoretical texts on acting and performance theory. Pertinent philosophical texts, dramatic theories, acting systems and methodologies will be studied. The survey will operate chronologically from early documents on acting (Greek, Roman, Italian Renaissance) through to modern and contemporary documents that inform acting and acting training today (Stanislavsky, Brecht, Grotowski, Meisner, Spolin, Suzuki). Methodologies and practices of select major stage actors will be explored as well. In some cases, directing theories that have had major influence on acting theory will be examined.

Credit 3 units. A&S IQ: HUM

---

#### **L15 Drama 479 Fundamentals of Sound Design**

Encompassing both creative and technical aspects of sound in the performing arts, the course will give theoretical knowledge of, and practical experience in the following areas: fundamental rules of physics and electronics related to sound, use of standard digital recording studio equipment, "training" of the ear, and basic techniques of sound montage. Students will be expected to participate in a variety of conceptual and research oriented exercises as well as complete several lab projects. Sound related work on Performing Arts Department productions may be required. Prerequisite: Drama 212 and permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

---

#### **L15 Drama 487 Theater Culture Studies Seminar**

Rotating upper level topics course. Topics will come from Theater Culture Studies sequence.

Credit 3 units. A&S IQ: HUM, WI

---

#### **L15 Drama 4891 Topics in Chinese Literature and Culture: Jingju (Beijing/Peking Opera)**

Topics course in Chinese literature and culture; subject matter varies by semester. Prerequisite: junior level or above or permission of instructor.

Same as L04 Chinese 4891

---

#### **L15 Drama 491 Staging Illness**

"Suddenly some force struck him in the chest and side, making it still harder to breathe, and he fell through the hole and there at the bottom was a light." This quotation, from Tolstoi's story "The Death of Ivan Ilych," offers an example of how artists have employed serious or life-threatening diseases as a means of illuminating both physical suffering and spiritual rebirth. Even as it invades the body and isolates us from our fellow man, illness may offer opportunities for spiritual growth and renewal, serving as an apt metaphor for human survival in times of extremis. In her brilliant essay, "Illness as Metaphor" (1978), Susan Sontag takes issue with how illnesses like tuberculosis were misunderstood or even romanticized during the 19th century in works like Dumas's "Camille" and Puccini's "La Boheme." During the AIDS crisis in the 1980s and 1990s, American artists -- particularly theatre artists, whose communities were decimated by the disease -- were forced to consider how this global pandemic impacted their lives, especially at a time when the term AIDS was not even mentioned by the President of the United States. In conjunction with the Performing Arts Department's 25th anniversary production of Tony Kushner's extraordinary play, "Angels in America, Part 1, Millennium Approaches," this new course examines how disease has been a focal point of artistic inquiry over the course of centuries. By examining works that are focused on illness throughout history, the seminar offers both a deeper understanding of and context for Kushner's masterpiece and the AIDS crisis, and it considers how illness has always been an important subject for the investigation of what it means to be fully human.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

---

#### **L15 Drama 493 Senior Project**

Specialized study in a selected area in drama. Required of all drama majors not taking Drama 499. Prerequisite: 15 units of advanced work in drama at the 300 or 400 level.

Credit 3 units.

---

#### **L15 Drama 497 Performance Theory**

This course introduces students to contemporary theories of performance, with "performance" understood as both metaphor and event. From a multi-disciplinary perspective, students will consider how cultures produce meanings-and, indeed, perform those meanings-to create and/or disrupt their own social coherence. Theories likely to be studied include: J. L. Austin's speech-act theory and its engagement by John Searle and Jacques Derrida; Victor Turner's analysis of ritual as social process and Richard Schechner's use of it to transform "theater studies" into "performance studies;" Erving Goffman's sociology of the self and its relation to a post-structuralist model of subjectivity; Michael Fried's screed against minimalist art and its relation to Happenings, Body Art, Fluxus, and other mid- to late-20th century examples of "performance art;" and Judith Butler's influential revision of Austin's performative in her theory of queer "performativity."

Credit 3 units. A&S IQ: HUM EN: H

---

#### **L15 Drama 498 Special Topics in Playwriting: Art and Activism**

Taught by guest teaching artist, Regina Taylor, playwright, director, stage/screen actor, this course will focus on how art can effect change through personal expression. The monumental cultural shift that is in motion throughout the world will be explored through the specific lens of each student's life. Students will write short pieces and one-act plays that will explore where they are at this moment in time. Works in the class may be added to Regina Taylor's black album mixtape. No playwrighting experience necessary. Course open only to juniors, seniors and graduate students.

Credit 3 units. BU: HUM

**L15 Drama 499 Study for Honors**

Prerequisite: Senior standing, a cumulative and a major GPA of 3.5 and permission of the Chair of the Performing Arts Department.  
Credit variable, maximum 6 units.

**L15 Drama 4990 Independent Work**

Students may contract with a faculty supervisor for credit for their work on theatrical productions or research. Contracts must be signed by the student and the coordinator of Drama 500 before the student's work on the project commences. Credit and grade option to be determined in each case. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.  
Credit variable, maximum 6 units.

**L15 Drama 4991 Acting**

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.  
Credit variable, maximum 3 units.

**L15 Drama 4992 Directing**

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.  
Credit variable, maximum 3 units.

**L15 Drama 4993 Technical Theater**

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.  
Credit variable, maximum 3 units.

**L15 Drama 4994 Voice, Speech**

Independent study.  
Credit variable, maximum 3 units.

**L15 Drama 4995 Literature, Theory, Criticism**

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.  
Credit variable, maximum 3 units.

**L15 Drama 4996 Race, Memory, and Performance**

This course takes as its starting point the vexing questions of history, memory, and identity that activists, scholars, artists, and others have posed in recent years. What is to be done with the commemorative landscape of monuments and memorials? How do we account for the silences and erasures in archival records? How should histories of racial violence be commemorated? These are questions that have been taken up in many arenas of civic life, including public art, "living history" tourism, museum studies, and urban planning. They have also been taken up by theater artists and performance artists who use their bodies, narrative, historical fact and, sometimes, fiction to bear witness to the past and to imagine new futures. In this course, we will examine the role of theater and performance in constituting-and challenging-the historically contingent meanings of "race;" we will also explore how performance of history shapes national narratives. Artists to be explored might include Branden Jacobs-Jenkins, Mary Kathryn Nagle, Dread Scott, Quiara Alegria Hudes, Simone Leigh, and Heidi Schreck. Artistic and/or performance experience is not required. Students will

have the opportunity to propose their own commemorative projects; together we will explore whether and how performances of the past can do a certain kind of reparative work necessary for a more equitable future.

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM, VC BU: BA, ETH EN: H

## Dance Major Program Requirements

- **Total units required:** 34-35 units, with a minimum of 20 units at the 300 level or above

### Required Courses

Dance courses at Washington University integrate praxis and the study of the historical, cultural, scientific, and aesthetic dimensions of dance. Although course work is required in all aspects of the dance major, students may individually choose to tailor their study to emphasize any one of the four areas — Embodied Practice, Creative Process, History/Theory, or Movement Science & Somatics — through the capstone and through electives.

### Creative Process: 8-9 units

Code	Title	Units
<b>Required:</b>		
Dance 203	Composition I	3
Dance 212E	Introduction to Theatre Production	3
<b>Plus 2-3 units chosen from the following:</b>		
Dance 303	Composition II	3
Dance 3101	Dance Improvisation: Spontaneous Composition & Performance Techniques	2
Dance 305Z	Music Resources for Dance	2
Dance 312	Accompaniment Techniques for Dance	2
Dance 4032	Introduction to Screendance Composition and Performance	3

### Embodied Practice: 8 units

Students must complete work in at least two dance genres, and at least 6 units must be at the 300 level or above.

Code	Title	Units
<b>Ballet</b>		
Dance 221	Fundamentals of Classical Ballet	2
Dance 222	Fundamentals of Classical Ballet	2
Dance 321	Classical Ballet: Intermediate I	2
Dance 3221	Classical Ballet: Intermediate II	2
Dance 415	High Intermediate Ballet I	2
Dance 416	High Intermediate Ballet II	2
Dance 4281	Classical Ballet III	2
Dance 4291	Classical Ballet IV	2
Dance 4300	Contemporary Ballet	2

<b>Modern</b>		
Dance 201E	Theory and Technique of Modern Dance I	2
Dance 202	Theory and Technique of Modern Dance II	2
Dance 240	Afro-Modern Dance (Dunham Technique)	2
Dance 301	Theory and Technique of Modern Dance III	2
Dance 3021	Theory and Technique of Modern Dance IV	2
Dance 401	Theory and Technique of Modern Dance V	2
Dance 4021	Theory and Technique of Modern Dance VI	2
<b>Jazz</b>		
Dance 297	Fundamentals of Jazz Dance	2
Dance 300	Jazz Dance II	2
Dance 403	Jazz III	2
<b>Hip Hop</b>		
Dance 2040	Beginning-Intermediate Hip Hop: Culture and Movement	2
Dance 4040	Intermediate/Advanced Hip Hop	2
<b>West African</b>		
Dance 343	West African Music and Dance in Context	2
<b>Other</b>		
Dance 407	Topics in Dance Techniques	3

## History/Theory: 6 units

Students must choose two courses from the following list:

Code	Title	Units
Dance 316	Histories of Theatrical and Concert Dance	3
Dance 331	Movement and Meaning: Dance in a Global Context	3
Dance 3033	Music, Sound, and the Body	3
Dance 3222	Rethinking Ballet in the 21st Century: Decolonizing Narratives and Embracing Diversity	3
Dance 426	Performing the Political in American Dance	3
Dance 430	Dance Pedagogy	2
Dance 433	Performing Gender and Sexuality in America	3

## Movement Science and Somatics: 3 units

Options for this requirement include the following:

Code	Title	Units
Dance 3270	Experiential Anatomy and Kinesiology	3
Dance 363	The Neuroscience of Movement: You Think, So You Can Dance?	3
Dance 453	Presence in Performance: Alexander Technique and Mindful Movement for Performing Artists	3

## Elective Courses

Students must complete 6 units of elective courses. They may choose any L29 dance courses at the 200 level or above in any of the categories (Embodied Practice, Creative Process, Movement Science & Somatics, or History/Theory). Students may also take in-person dance and somatic studies (U31) courses, at the 200-level or above, in the School of Continuing & Professional Studies (per Arts & Sciences policy, online courses may not be applied to an Arts & Sciences degree). Students may also select from specified drama courses.

Code	Title	Units
Drama 304	Makeup for the Stage	2
Drama 3081	Costume Rendering and Design	3
Drama 309	Stage Technology	3
Drama 310	Stage Lighting	3
Drama 361	Stage Management	3
Drama 396	History of Western Costume	3

## Capstone

The 3-unit capstone is an opportunity for students to integrate what they have learned in the dance major throughout their time at Washington University. It is also an opportunity to go further in-depth into a particular aspect of the field of dance, whether that be performance, choreography, movement science/somatics, or history/theory; overall, it is a culminating experience for the major. There are four primary options for the capstone, which must be completed during the student's senior year:

1. Dance 499 Study for Honors: an honors thesis
2. Dance 493 Senior Project
3. Dance 457 Dance Repertory or Dance 458 Dance Repertory: a significant role in a performance in WUDT, WUDC, or the MFA Concert, with a post-production analytical essay evaluated by the Artistic Director. The essay examines how the performance represents a culmination of the student's growth and experience in the dance major. In addition, it incorporates background research on the aesthetic influences of the choreography and offers dramaturgical reflections on the performance: how well it worked in communicating its messages to audiences.
4. An additional course at the 300-level or above, not already taken as a requirement or as an elective, in Creative Process, Movement Science & Somatics, or History/Theory categories that the student designates as a capstone. The intention to use the course to fulfill the capstone requirement will be made prior to the first day of class in consultation with the instructor. For a Creative Process

course, the student devises a final creative project above and beyond the requirements for the regular course, culminating in a live performance and a critical response. For either a Movement Science & Somatics or History/Theory course, the student takes on a significant final research project beyond the normal assignments for the course, culminating in a 15+-page research paper and public presentation.

## Additional Information

### Study Abroad

Washington University students can pursue dance studies abroad during the academic year at the University of Auckland, New Zealand; the University of Ghana, Legon; and Roehampton University, London. With approval from the dance program, courses at these institutions may fulfill dance major and minor requirements. Courses in other disciplines taught at these institutions may also be accepted by Washington University.

A maximum of 12 credits earned outside of Arts & Sciences at Washington University (e.g., through transfer credit or study abroad) may be applied to the dance major, with permission from the Dance Overseas Programs Advisor.

### Minimum Required Grade

Students must earn a grade of C- or better in all required and elective dance courses in order for them to apply toward major requirements.

Phone: 314-935-5858  
Email: pad@wustl.edu  
Website: http://pad.wustl.edu

## Drama Major

### Program Requirements

- **Total units required:** 36 (12 courses)

### Required Courses

#### Theater Arts (TA) Requirements (Five Courses)

- Three required courses:

Code	Title	Units
Drama 212E	Introduction to Theater Production	3
Drama 2401 or FYP 215 or Drama 119 & 1192	Fundamentals of Acting First-Year Seminar: The Theatre as a Living Art Ampersand: Shakespeare's Globe: All the World's a Stage and Ampersand: Shakespeare's Globe: All the World's a Stage II	3
Drama 343	Fundamentals of Directing	3

- \* The Drama major requires one course in introductory acting. As noted here, there are three ways to satisfy this acting requirement. If the Globe Ampersand option is selected, note that, due to the Ampersand curriculum, a student must complete *both* 119 and 1192 (the full year) in order to satisfy the Drama major introductory acting requirement. However, Globe Ampersand 119 and 1192 will each add 3 credit units, for a total of 6 Humanities credit units, to a student's overall Washington University credit tally.

- One introductory design course chosen from the following list:

Code	Title	Units
Drama 3081	Costume Rendering and Design	3
Drama 310	Stage Lighting	3
Drama 311M	Scenic Design	3

- One additional upper-level (300 level or above) elective in TA

### Theater and Performance Studies (TPS) Requirements (Five Courses)

- Three courses from the Historical Practice collection:

Code	Title	Units
Drama 3012	Theater Space in Historical Practice	3
Drama 3013	Politics and Performance in Historical Practice	3
Drama 3014	Body Language: Acting, Rhetorical Gesture, and Dance in Historical Perspective	3
Drama 3015	Social Identity and Dramatic Character in Historical Practice	3
Drama 3016	Blood and Magic: Special Effects in Historical Practice	3

- A 300-level or above elective in a TPS-related course that examines racial and/or ethnic communities whose contributions have been historically underrepresented in the study of drama
- A 300-level or above elective in a TPS-related course

### Two Additional Courses

- One upper-level (300-level or above) course in either TA or TPS
- Every Drama major will complete a 3-credit capstone during their senior year. The capstone requirement may be met by completing one of the following options:
  - A one-semester, 3-credit senior project (Drama 493) based in the Performing Arts Department
  - A two-semester, 6-credit senior honors thesis project (Drama 499) based in the Performing Arts Department, with the goal of receiving Latin honors upon graduation
  - An additional 400-level course taught by a TPS faculty member in the Performing Arts Department, culminating in a 15-page critical research paper (which may not be part of the general requirements for the course) with an accompanying public oral presentation. The intention to use this course to fulfill the

capstone requirement will be made prior to the first day of class in consultation with the instructor. There is no special capstone course number; students should simply register for the 400-level course and notify their advisor that this course is the capstone designate.

- An additional 400-level course in TA (design, directing, acting, playwriting, dramaturgy) that culminates in a significant artistic project and a critical response. The intention to use this course to fulfill the capstone requirement will be made prior to the first day of class in consultation with the instructor. There is no special capstone course number; students should simply register for the 400-level course and notify their advisor that this course is the capstone designate.
- A lead performance role\* or a lead design position (Drama 4990 Independent Work, Drama 4991 Acting, or Drama 4993 Technical Theater) in a Performing Arts Department faculty- or guest-directed production during the senior year with a critical post-production response. The project will be evaluated and graded by the director along with, if applicable, the supervising faculty designer. In the case of a guest director, a designated Performing Arts Department faculty evaluator will serve as the instructor of record.

\* Eligible roles identified prior to auditions.

## Additional Information

- Students must earn a grade of C- or better in all required and elective drama courses in order for them to apply toward major requirements.
- A maximum of 3 credits earned outside of Arts & Sciences at Washington University (e.g., through transfer credit or study abroad) may be applied to the drama major, with permission of the Director of Undergraduate Studies in Drama.

Phone: 314-935-5858  
Email: pad@wustl.edu  
Website: http://pad.wustl.edu

## Dance Minor

### Program Requirements

- **Total units required:** 17 units

### Required Courses

#### Studio-Based/Technique Courses: 9 units

At least 6 of these units must be at the 300 level or above. Students must select from the following list:

Code	Title	Units
<b>Ballet</b>		
Dance 221	Fundamentals of Classical Ballet	2
Dance 222	Fundamentals of Classical Ballet	2
Dance 321	Classical Ballet: Intermediate I	2
Dance 3221	Classical Ballet: Intermediate II	2
Dance 3224	Intermediate Pointe Technique	1
Dance 415	High Intermediate Ballet I	2
Dance 416	High Intermediate Ballet II	2
Dance 4281	Classical Ballet III	2
Dance 4291	Classical Ballet IV	2
<b>Modern</b>		
Dance 106E	Introduction to Dance as a Contemporary Art Form	2
Dance 201E	Theory and Technique of Modern Dance I	2
Dance 202	Theory and Technique of Modern Dance II	2
Dance 240	Afro-Modern Dance (Dunham Technique)	2
Dance 301	Theory and Technique of Modern Dance III	2
Dance 3021	Theory and Technique of Modern Dance IV	2
Dance 3101	Dance Improvisation: Spontaneous Composition & Performance Techniques	2
Dance 311	Modern Dance and the African-American Legacy	2
Dance 401	Theory and Technique of Modern Dance V	2
Dance 4021	Theory and Technique of Modern Dance VI	2
Dance 413	Modern Dance and the African American Legacy II	2
<b>Jazz</b>		
Dance 297	Fundamentals of Jazz Dance	2
Dance 300	Jazz Dance II	2
Dance 403	Jazz III	2
<b>West African</b>		
Dance 343	West African Music and Dance in Context	2

#### Composition Course: 3 units

Code	Title	Units
Dance 203	Composition I	3

#### History/Theory Course: 3 units

Students must select from the following list:

Code	Title	Units
Dance 316	Histories of Theatrical and Concert Dance	3
Dance 331	Movement and Meaning: Dance in a Global Context	3
Dance 340	Ballet as Ethnic Dance and Classical Art	3

Dance 342	Critical Thinking in Western Theatrical Dance: Questioning Meets Creative Thinking and Collaboration	3
Dance 363	The Neuroscience of Movement: You Think, So You Can Dance?	3
Dance 426	Performing the Political in American Dance	3
Dance 430	Dance Pedagogy	2
Dance 433	Performing Gender and Sexuality in America	3

## Elective Course

Students must complete 2 units of an elective course. Any additional history/theory course or studio-based/technique course at the 300 level or above may be used to fulfill this requirement.

## Additional Information

- Students must earn a grade of C- or better in all required and elective dance courses in order for them to apply toward minor requirements.
- A maximum of 3 credits earned outside of Arts & Sciences at Washington University (e.g., through transfer credit or study abroad) may be applied to the dance minor, with permission from the Dance Overseas Programs Advisor.

Phone: 314-935-5858  
Email: pad@wustl.edu  
Website: http://pad.wustl.edu

## Drama Minor Program Requirements

- **Total units required:** 18

Students must earn a grade of C- or better in all courses for them to apply toward minor requirements.

## Required Courses

- Students must complete the following course:

Code	Title	Units
Drama 212E	Introduction to Theater Production	3

- They must also complete 6 units (two courses) from the Historical Practice Collection:

Code	Title	Units
Drama 3012	Theater Space in Historical Practice	3
Drama 3013	Politics and Performance in Historical Practice	3
Drama 3014	Body Language: Acting, Rhetorical Gesture, and Dance in Historical Perspective	3
Drama 3015	Social Identity and Dramatic Character in Historical Practice	3
Drama 3016	Blood and Magic: Special Effects in Historical Practice	3

## Elective Courses

Students must also complete at least 9 credit units at the 300 level or above. No more than 3 units may be production credits.

## Additional Information

- Students must earn a grade of C- or better in all required and elective drama courses in order for them to apply toward minor requirements.
- A maximum of 3 credits earned outside of Arts & Sciences at Washington University (e.g., through transfer credit or study abroad) may be applied to the drama minor, with permission of the Director of Undergraduate Studies in Drama.

Phone: 314-935-5858  
Email: pad@wustl.edu  
Website: http://pad.wustl.edu

## World Music, Dance, and Theater Minor Program Requirements

- **Total units required:** 17-19

## Required Courses

Code	Title	Units
Music 1021	Musics of the World	3
Dance 331	Movement and Meaning: Dance in a Global Context	3
<b>Total Units</b>		<b>6</b>

One to two of the following courses (3-5 units) are also required:

Code	Title	Units
AFAS 301	A History of African-American Theater	3
Chinese 467	The Chinese Theater	3
Drama 223	Cross-Cultural Women Playwrights	3
Dance 343	West African Music and Dance in Context	2
Japan 446	The Japanese Theater	3

## Elective Courses (8 units)

Code	Title	Units
Drama 368	Black Theater Workshop III	3
Music 3021	Music of the African Diaspora	3
Music 3022	Native American Musical Traditions of the Western U.S.	3
Dance 305Z	Music Resources for Dance	2
Dance 340	Ballet as Ethnic Dance and Classical Art	3
Dance 343	West African Music and Dance in Context	2

Additional electives available in the School of Continuing & Professional Studies (U31):

Code	Title	Units
Dance 235	Dance Doorway to India	2
Dance 328	Dance of West Africa: Intermediate	2
Dance 335	Bharata Natyam as Movement Narrative	1

## Additional Information

- Students must earn a grade of C- or higher in all required and elective courses for them to apply toward minor requirements.
- A maximum of 3 credits earned outside of Arts & Sciences at Washington University (e.g., through transfer credit or study abroad) may be applied to the minor, with permission from the Overseas Programs Advisor.

This minor is interdisciplinary and draws on the distinctive methodologies and training inherent in several disciplines. This minor encourages students already interested in the performing arts to explore outside of Euro-American traditions. Additionally, students majoring in fields such as anthropology, political science, psychology, education, comparative literature, history, and foreign languages may find this minor a useful complement to their primary discipline.

## Philosophy

Philosophy tackles central questions in human life, such as the following: *What counts as human knowledge? How should I live? What is truth? How is the mind related to the body? What is a just society?* These difficult but fundamental questions are rigorously explored in philosophy and worked through by drawing on the historical tradition

and utilizing careful reasoning. Because philosophers have shaped many of the central ideas on which Western civilization is based, the study of philosophy plays a vital role in a well-rounded liberal arts education.

Philosophy courses at Washington University provide opportunities to gain deeper knowledge of the history of philosophy, from the work of the ancient philosophers Plato and Aristotle through key thinkers such as Descartes and Kant to the present. Students can study the interface between philosophy and other disciplines (e.g., psychology; environmental studies; women, gender, and sexuality studies; law; political science). They can also examine the methods of inquiry and the underlying conceptual frameworks of scientific work itself. Courses in logic equip students to think and argue clearly and rigorously while courses in analytic philosophy allow for the exploration of fundamental questions about knowledge and metaphysics. The department offers a variety of courses in ethics where students can consider different theoretical approaches to current political, social, medical, and environmental problems.

## Majors

- Philosophy Major (p. 874)
- Philosophy Major, Law and Policy Specialization (p. 875)
- Philosophy Major, Philosophy of Science Specialization (p. 876)
- Philosophy Major, Philosophy Research Specialization (p. 877)

## Minors

- Philosophy Minor (p. 879)
- Philosophy of Science Minor (p. 879)

## Courses

Visit online course listings to view semester offerings for L30 Phil.

---

### L30 Phil 100G Logic and Critical Analysis

Introduction to the elementary tools of logic required for constructing and critically evaluating arguments and the claims they support. Topics include: the nature of an argument; argument structure; how arguments can fail both in structure and in content; formal and informal fallacies; propositional logic and predicate calculus; and critical analysis of rhetorical strategies for presenting arguments. Students will be encouraged to develop critical reasoning skills that can be widely applied.

Credit 3 units. A&S IQ: NSM, AN Arch: HT, NSM Art: NSM BU: HUM

---

### L30 Phil 102 Introduction to Scientific Reasoning

This course analyzes scientists' reasoning strategies. Case studies from the history of astronomy, epidemiology, molecular biology, and neuroscience, provide a basis for understanding of the character of scientific theories and the means by which they are evaluated. Special attention will be given to the construction and evaluation of statistical and causal hypotheses, including experimental design, and to the use of scientific knowledge in public policy decision-making. Students will acquire basic skills in critical thinking and scientific reasoning and an introductory understanding of issues in the philosophy of science.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

### L30 Phil 1061 Introduction to Political Theory

This course offers an undergraduate level introduction to the field of political theory. We will focus on three major themes—social justice, power and freedom, and democracy—reading some canonical texts, such as Bentham's Introduction to the Principles of Morals and Legislation and Marx's Capital, but emphasizing contemporary works, such as those of John Rawls, Michael Walzer, Michel Foucault, and Robert Dahl.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: FAAM, SSC BU: BA EN: S

---

### L30 Phil 120F Problems in Philosophy

Introduction to philosophical methods and concepts through an investigation of major issues in Western philosophy such as: what counts as knowledge; truth and belief; the existence of God; the mind-body problem; materialism and idealism; moral theory and concepts of justice. A range of historical and contemporary views on these issues will be considered. The aim of the course is to prepare students to think and write about philosophical problems on their own.

Credit 3 units. A&S IQ: HUM Arch: HT, HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 125C Great Philosophers

In this course we focus on some of the most important texts in the history of Western philosophy in order to discuss a wide range of central philosophical problems. We typically consider, for example, the existence of God, the justification of claims to knowledge, and the requirements of a good human life, including the demands of morality. Among the philosophers most likely to be studied are Plato, Aristotle, Descartes, Hume, Kant, Marx, Nietzsche, and Wittgenstein. Our goal is not just to appreciate the genius of some great philosophers but also to grapple with the current philosophical problems they have bequeathed to us.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 131F Present Moral Problems

An investigation of a range of contemporary moral issues and controversies that draws on philosophical ethics and culturewide moral considerations. Topics may include: racism, world hunger, war and terrorism, the distribution of income and wealth, gender discrimination, pornography, lesbian and gay rights, abortion, euthanasia, and capital punishment. The aim of the course is to present diverse points of view regarding these topics and to provide conceptual and theoretical tools that enable the student to make headway in thinking carefully and critically about the issues.

Credit 3 units. A&S IQ: HUM Arch: HUM, SEM Art: HUM BU: ETH EN: H

---

### L30 Phil 1500 Ampersand: The mind: what makes us and other perspectives on consciousness

This course explores how consciousness is created in the brain and body. This course will integrate biological, psychological, and philosophical perspectives to investigate the nature of the mind. Utilizing an experiential approach, we will study how perception-action links give rise to consciousness and shape our subjective understanding of the world. Concepts will include sensory-motor integration, spatial and temporal awareness, sense of self and sense of agency. Students will gain a broad understanding of both historical milestones in the development of "enactivism" and current experimental techniques enabling research into perception, embodiment, presence, virtual and augmented reality, and the neural correlates of consciousness. This course is for first-year, non-transfer students only.

Credit 3 units. A&S IQ: SSC EN: S

---

### L30 Phil 2201 Disagreement, Extremism, and Polarization

Americans are increasingly skeptical about the future of their democracy and about our ability to pursue equality and social justice within the existing political system, and many people identify irresolvable disagreement, political extremism, and partisan polarization as causes of the current crisis in American democracy. In this course, we will study disagreement, extremism, and polarization using insights and methods from philosophy, political science, and empirical psychology, with the aim of understanding these phenomena and the social and political challenges they pose. Our questions will include whether it is possible for reasonable people to disagree,

whether democratic deliberation requires a background of agreement or "shared facts," how our moral psychology shapes our political beliefs, whether prejudice and bias can be eliminated from political thinking, and whether there are some political positions that are so extreme they should not be taken seriously. There are no prerequisites for this course and no background in philosophy, political science, or psychology will be assumed

Credit 3 units. A&S IQ: HUM EN: H

---

### L30 Phil 233F Biomedical Ethics

A critical examination, in the light of contemporary moral disagreements and traditional ethical theories, of some of the moral issues arising out of medical practice and experimentation in our society. Issues that might be discussed include euthanasia, genetic engineering, organ transplants, medical malpractice, the allocation of medical resources, and the rights of the patient.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 234F Business Ethics

Study of the nature and justification of economic systems, business organizations, and business practices. Focus on contemporary business and the ideology it embodies. Discussion of moral problems arising in business includes both the analysis of structural factors that cause them and the evaluation of courses of action that might resolve them.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 235F Introduction to Environmental Ethics

A general survey of current issues in environmental ethics, focusing on problems such as the obligation to future generations, protection of endangered species, animal rights, problems of energy and pollution, wilderness, global justice, and business obligations. Students will also learn some ethical and political theory.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 237F Introduction to Aesthetics

Study of characteristic problems in aesthetics and the philosophy of art, e.g., the nature of aesthetic entities, of aesthetic experience, and of individual differences in the various arts. Primary emphasis on solutions various theories offer to these problems.

Credit 3 units. A&S IQ: HUM Art: AH BU: HUM

---

### L30 Phil 239 Topics in Philosophy and Environment

Philosophical questions are central to study of the environment. Such questions span many philosophical fields including metaethics, value theory, applied ethics, aesthetics, political philosophy and philosophy of science. Given such a diversity of important questions, this course will focus on a different intersection of philosophy and environment each time it runs. It aims to develop students' understanding of the complex philosophical claims and problems that lie behind environmental values, practices and policies. Examples of topics to be considered are: wilderness, food and agriculture, and animals.

Credit 3 units. A&S IQ: HUM EN: H

---

### L30 Phil 2910 Racism and Antiracism

When President Obama was elected, it ignited a debate about whether America had finally become "post-racial." This assertion was belied by an entrenched underclass of Blacks and others from immigrant backgrounds; by the regular killing of innocent, young Black men alongside their mass incarceration, along with a whole series of other social indicators; by the dramatic rise in anti-Semitic incidents and Islamophobia globally; and most evidently by the discourse used during the Trump era that weaponized white Christian nationalism. At the end of four years of the Trump presidency defined by racist discourse and policies, it culminated in an insurgent riot on the Capitol

designed to block the peaceful transfer of power, the basis of American democracy. This course provides the long view to understanding this recent period in American and global history. We begin by defining key terms in the discussion around racism today, including what we mean by racism and what unites anti-Semitism, anti-Black racism and Islamophobia, but also notions like privilege, cultural appropriation, and microaggressions. We then move on to the long history of the category of race. We start with a unit on race and religion and then move on to the role of the discovery of the "New World" and the development of the Atlantic slave system, and its impact on the Enlightenment, which was the incubator for the concept of race. From there, we consider how fundamental race was to European and American colonial dominance by the end of the nineteenth-century and the role it played in racial states like Nazi Germany and South Africa. The last portion of the class will focus on struggles to dismantle racism over the the last century, considering the anti-colonial and Civil Rights movement, and the anti-apartheid struggle. Along the way, we will have addressed the overlaps and disconnects between anti-Black, anti-Jewish, and anti-Islamic racism and read a number of key thinkers and activists who can help us in the fight against racism.

---

### L30 Phil 297 Undergraduate Independent Study

Prerequisite: Permission of the department. Credit variable, max 6 units. Credit variable, maximum 6 units.

---

### L30 Phil 299 Internship in Philosophy

Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement which the student obtains from the Career Center and which must be filled out and signed by the Career Center, the site supervisor, and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities, e.g., 8-10 hours a week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours.

Credit variable, maximum 3 units.

---

### L30 Phil 3001 Philosophy of Medicine

Philosophy of Medicine is an investigation into what doctors know and how they know it. This course will investigate the following questions: What is disease? What is health? How do we classify disease? What counts as good evidence and good evidential reasoning in medicine? Is medicine a science? If so, what makes it distinctive as a science? What kinds of evidential roles do case studies play in medicine? How should we measure and compare outcomes in clinical trials and in systematic reviews? What is the appropriate relationship between medicine and the basic sciences or between medicine and the public health sciences (e.g., epidemiology, biostatistics, economics, behavioral science)? What role, if any, should private industry (e.g., the pharmaceutical industry, the health insurance industry) play in shaping the practice of medicine? How should we define and measure "effectiveness" in medicine? Do values inform decision making about health policy, and, if so, how? The overall goal of the course is to develop a reasoned, reflective approach to research and practice in medicine through the critical analysis of texts and case studies in the history of medicine. Students do not need a background in philosophy to take this course. This course is intended to be of special interest to pre-health professionals and to philosophy and science majors. For graduate students in philosophy, this course satisfies the seminar requirement. Extra assignments will be provided to satisfy graduate course work; students should consult the instructor for details.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 301G Symbolic Logic

In the first half of the course we will be studying some features of truth-functional and first-order classical logics, including studying the model theory and metatheory for first-order logic in much greater depth than in Phil 100. In the second half of the course we will go on to study three different styles of proof-system: tableaux, axiomatic, and natural deduction. This course continues on where Philosophy 100: An introduction to Logic and Critical Analysis leaves off. It is recommended for students who have already taken that introductory course, or for students who already have a strong background in mathematics. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: HUM

---

### L30 Phil 306G Philosophy of Language

A survey of major philosophical problems concerning meaning, reference, and truth as they have been addressed within the analytic tradition. Readings that represent diverse positions on these focal issues will be selected from the work of leading philosophers in the field, for example: Frege, Russell, Wittgenstein, Davidson, Quine, Kripke, and Putnam. Students are encouraged to engage critically the ideas and arguments presented, and to develop and defend their own views on the core topics. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L30 Phil 308 Introduction to Semantics

Semantics is the branch of linguistics which studies how speakers assign meaning to words, sentences, and larger units of discourse. We combine perspectives from both linguistics and philosophy to explore a variety of topics including polysemy, compositionality, quantification, anaphora, definite descriptions, attitude reports, presupposition, and implicature. Prerequisite: Ling 170D or Phil 301G or permission of instructor.

Same as L44 Ling 311

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

---

### L30 Phil 309 Topics in the Wilderness

Philosophical questions are central to study of the environment. Such questions span many philosophical fields including metaethics, value theory, applied ethics, aesthetics, political philosophy and philosophy of science. Given such a diversity of important questions, this course will focus on a different intersection of philosophy and environment each time it runs. It aims to develop students' understanding of the complex philosophical claims and problems that lie behind environmental values, practices and policies. Examples of topics to be considered are: wilderness, food and agriculture, and animals.

Credit 3 units. A&S IQ: HUM BU: ETH

---

### L30 Phil 3090 Chinese Thought: What is a Good Life?

This course offers an introduction to Chinese thought through a study of thinkers from arguably one of the most vibrant periods of religious-philosophical discourse in China. We will examine early classical texts from the Daoist, Confucian, Mohist, and Legalist traditions, and we will follow arguments in which the thinkers expand upon, dispute, and respond to each other in regard to questions that are still important to us today. We will explore issues such as notions of the self, conceptions of the greater cosmos, the role of rituals, ideas about human nature, and the subjects of freedom and duty. Motivating the course will be the underlying question, "What is the good life?"

Same as L23 Re St 3090

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

---

### L30 Phil 3113 Theory of Knowledge

An introduction to epistemology, which is concerned with questions about knowledge, belief, evidence, and intellectual conduct and character. This course focuses on selected issues in epistemology with the aim of providing a survey of contemporary work. Possible topics include the nature of knowledge and justification, probability, epistemic norms of assertion and action, philosophical skepticism, the value of knowledge, disagreement, intellectual virtue, and epistemic injustice. Prerequisite: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L30 Phil 315 Philosophy of Mind

An introduction to philosophical analyses of the nature of mind, especially those developed by contemporary philosophers. The focus will be on questions such as the following: What is a mind? How does it relate to a person's brain? How does it relate to a person's body and the external world? Can a mind exist in a very different kind of body (e.g., a computer or a robot)? Does thinking require a language-like code? If so, can non-linguistic species think? What is it to have a mental image or to experience pain? Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L30 Phil 316 Mind and Morals

This course explores a number of issues at the intersection of ethics and cognitive science. Possible topics include: Are we rational? Do we know our own thoughts and motivations? Can one believe that one ought to do something without being motivated to do it? Do emotions impair or enhance our ability to reason? How do moral beliefs develop through childhood? Are traits such as intelligence and character unchangeable, and what implications follow if they are (or are not)? Does retaining my identity over time require having the same mind, and, if so, am I the same person now as I was as a child? Are non-human animals worthy of moral consideration? If brain activity is determined by causal laws, can we have free will? Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 321G Philosophy of Science

Pivotal concepts common to empirical sciences are examined and clarified. These include: explanation, confirmation, prediction, systematization, empirical significance, and the relationship of all these concepts to the structure of scientific theory. Examples may be drawn from both contemporary and historical science, including the social, biological, and physical sciences. Students with a background in science are particularly encouraged to consider this course. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L30 Phil 322 Philosophy of Biology

Philosophy of biology is concerned with how biologists come to know about the world, and what it is that they come to know. Such questions are more or less continuous with questions biologists themselves face in practice. So, philosophical debates about such questions often overlap with, and engage, the scientific literature. For example, one such debate is over how to measure and define biodiversity - whether in terms of genes, species, or ecological communities.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L30 Phil 327 Philosophy of Religion

This course focuses on debates concerning the existence of God as well as on special issues that arise within religion generally and also on some that arise within specific religious traditions. Topics include: the rationality of religious belief, the problem of evil, the coherence of theism, and the freedom-foreknowledge problem.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 3313 Theories of Social Justice

This course overviews the leading contemporary conceptions of social justice, including utilitarian, liberal, libertarian, communitarian, and deliberative-democratic theories, and their implications for the design of political, economic, and social institutions. In addition, this course will examine special topics such as justice between generations, global justice, and the rights of resistance or disobedience.

Same as L32 Pol Sci 3313

Credit 3 units. A&S IQ: SSC EN: S

---

### L30 Phil 331F Classical Ethical Theories

Intensive readings of great works in the history of ethics, especially by Plato, Aristotle, Hume, Kant, and Mill. Topics may include: the sources of moral knowledge, the nature of practical moral judgment, the moral role of emotion and desire, weakness of will, moral autonomy, and the universality of moral norms. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, HUM EN: H

---

### L30 Phil 339F Philosophy of the Arts

An examination both of general issues that apply to all types of art and of issues specific to particular art forms. For example, what is art? What are the central artistic values: beauty, truth, emotional expressiveness, representational power, or something else? Does art have a moral or political function? How can we account for the history of art and for different artistic styles? In regard to selected forms, there are important questions concerning how pictures represent, whether music and dance are forms of 'language', and the nature of literary interpretation. Some consideration is given to the relation of psychology and theories of the mind to art. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HT Art: HUM BU: ETH EN: H

---

### L30 Phil 340F Social and Political Philosophy

Study of certain fundamental issues concerning government, society, and culture. For example: what are the nature and limits of legitimate political authority? Are ordinary human beings capable of governing themselves justly? Do citizens have a duty to obey the state? If so, to what extent, if at all, is that duty grounded in consent or contract? Should the state limit or regulate the personal relationships of citizens, such as marriage, family, and sexuality? How should social institutions rectify a history of political or social injustice against oppressed groups? Readings from historical and contemporary sources. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, HUM EN: H

---

### L30 Phil 345F Issues in Applied Ethics

Advanced study of a selected topic in applied ethics. Abstract ethical theories and methods are brought to bear on the moral problems that arise in an area of social and professional practice such as medicine, business, law, journalism, engineering, or scientific and humanistic research. Possible topics include: reproductive healthcare and policy, the just distribution of medical resources, the social responsibilities

of corporations, accountability in the media and public office, and the ethics of research on or affecting human subjects. Prerequisites: one course at the 100 or 200-level in applied ethics; or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 346 Philosophy of Law

This course will first focus on the philosophical foundations of law, examining both the relationship between law and rules, as well as the types of legal reasoning. Second, the course will focus on philosophical issues that arise in the key substantive areas of law: contracts, torts, property, criminal law, and constitutional law, as well in specialized areas such as family and employment law. The course will end with a brief discussion of several problems in legal ethics. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 347C Ancient Philosophy

An examination of the high-water marks of philosophy in ancient Greece and Rome, focusing primarily on Plato and Aristotle. A wide range of philosophical problems will be discussed, including the nature of the good life, the justification of knowledge, and the ultimate nature of mind and world. Attention will be paid to how these problems unfolded in their historical context and to how the ancient treatments of them compare to contemporary efforts. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 3481 Introduction to Metaphysics

This course is an introduction to central debates of contemporary analytic metaphysics. Metaphysics is concerned with the nature of the most general kinds of things and the relationship between these things. We will discuss the nature of and relationship between properties, material objects, persons, time, space, and modality. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L30 Phil 349C Descartes to Hume

An examination of major philosophical systems and problems in Modern Philosophy as presented in the original writings of the 17th and 18th centuries. Topics may include rationalism and empiricism, idealism, materialism, and skepticism, with readings selected from the continental rationalists, Descartes, Spinoza, and Leibniz, and from the British empiricists, Locke, Berkeley, and Hume. Central problems include the mind-body problem, representationalism, and transcendentalism. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

---

### L30 Phil 351 History of Western Philosophy: Modern

This course offers a survey of the history of 17th and 18th century Western (European) Philosophy, with a focus on the nature and limits of knowledge. Topics include skepticism, the mind-body relationship, the existence of God, the problem of induction, the distinction between primary and secondary qualities, personal identity, causation, and a priori versus a posteriori knowledge. We examine the canonical texts of Descartes, Locke, Berkeley, Hume, and Kant.

Credit 3 units. BU: ETH

---

### L30 Phil 357C Kant and 19th-Century Philosophy

Examination of Kant and nineteenth-century philosophy. We will discuss Kant's "Copernican Turn" in metaphysics and epistemology, as well as his moral philosophy, and we will study works of selected nineteenth-century philosophers such as those of Hegel, Marx, Mill, and Nietzsche. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

---

### L30 Phil 358 Conceptual Foundations of Modern Science

Where does modern science come from? This course examines the winding paths by which the dominant scientific world-views of the 20th century became established. We will discuss a variety of broad themes: scientific method or methods, revolutionary science, the relationship between science and society, and the aims of science. This course is not intended to be a comprehensive survey of the history of science. Instead, we will focus upon a few key figures - Galileo, Newton, Darwin, - and we will read both primary and secondary literature on their significance to these broad themes. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L30 Phil 361 Philosophy of Emotions

Emotions like fear, joy, disgust, sadness, and love are central to how we engage with each other and understand the world around us. But what can we say about what emotions are, how they function, and when they are valuable? This course will draw on research in philosophy as well as the social and cognitive sciences. The aim will be to develop a rich combination of conceptual, empirical, and phenomenological resources and bring them to bear on central questions about the nature and significance of emotions.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

---

### L30 Phil 366 Art and the Mind-Brain

In recent years, there has been a growing interest in the bearing of cognitive science on the perception and understanding of art. This interest has roots in tradition: historically, art, aesthetics, and vision science have often been linked. But the growth of knowledge in cognitive science has opened up new opportunities for understanding art and addressing philosophical questions. The converse is also true. The production, perception, and understanding of art are human capacities that can shed light on the workings of the mind and brain. This course considers questions such as: What is art? How do pictures represent? Does art express emotion? Why does art have a history? Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L30 Phil 375 Existentialism

The philosophical systems of selected philosophers such as Kierkegaard, Nietzsche, and Sartre are examined to determine their historical origins, their ontological and epistemological ramifications, and their relationships to contemporary philosophy. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

### L30 Phil 3801 Ancient Greek and Roman Medicine

This course introduces students to the practice and theory of medicine in the ancient Mediterranean, beginning in Egypt and continuing through Greece and Rome. It ends in the Middle Ages. Greco-Roman medicine will be our focus. How was disease understood by

practitioners and, as far as can be reconstructed, by laypeople? What form did surgical, pharmacological, and dietetic treatment take? What were the intellectual origins of Greek medicine? The social status of medical practitioners? How was medicine written and in what terms did its practitioners conceive it?"

Same as L08 Classics 3801

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: IS EN: H

---

### L30 Phil 390 Philosophical Writing

This seminar will have a different topic of central philosophical importance each semester. Significant attention will also be devoted to conceiving, researching, writing, revising, critiquing, and presenting philosophical essays. Limited to 15 students. Priority will be given to philosophy majors and minors who have not yet completed their Writing Intensive requirement.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

---

### L30 Phil 3904 Existentialist Thought

Existentialism "begins with a disoriented individual facing a confused world that s/he cannot accept" (Robert Solomon). Existentialists seek to make meaning of the brokenness (Marcel), dislocation (Merleau-Ponty), and ambiguity (de Beauvoir) of modern life. While its origins go back to the nineteenth-century (Kierkegaard, Dostoevsky, Nietzsche), with even older antecedents, as a specific moment in the history of ideas existentialism was created in response to the "age of anxiety" from the end of World War I through the 1960s. It continues to ripple through to the present. We will explore the richness and depth of the canonic figures of existentialism. But we will also consider how that canon was itself shaped and what this entailed for how these thinkers have been understood. We will consider existentialist giants such as Sartre and Heidegger. But we will also spend time with less totemic thinkers. One key thematic strand will focus on is race and existentialism. In short, we will explore why existentialism continues to speak to the Millennial generation's concerns about the meaning and purpose of human existence.

Same as L22 History 3904

Credit 3 units. A&S IQ: HUM, SC EN: H

---

### L30 Phil 397 Undergraduate Independent Study

Credit variable, maximum 6 units.

---

### L30 Phil 3991 Philosophy Capstone Course

This course will focus either on classic writings from the past century or on contemporary writings that address a major philosophical concern, such as "The Meaning of Life" or "The Concept of Self". In either case, the course will draw together a variety of philosophical specializations. Must be taken by all philosophy majors who are not writing an honors project. Work for the course will typically consist of one written project, one oral presentation, and one commentary on another student's oral presentation. Prerequisite: Senior standing, major in philosophy, preference given to those majors not pursuing Honors.

Credit 3 units. A&S IQ: HUM EN: H

---

### L30 Phil 403 Mathematical Logic I

A first course in mathematical logic, an introduction to both proof theory and model theory. The structure and properties of first-order logic are studied in detail, with attention to such notions as axiomatic theory, proof, model, completeness, compactness, and decidability. Prerequisite: Phil 301G or equivalent, or a background in mathematics.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

---

### L30 Phil 403 Topics in East Asian Religion & Thought: Tools & Methods in East Asian Religions & Philosophies

Topics in East Asian Religions is a course for advanced undergraduate and graduate students on specific themes and methodological issues in East Asian religions.

Same as L23 Re St 403

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

### L30 Phil 404 Mathematical Logic II

Godel's Incompleteness Theorem: its proof, its consequences, its reverberations. Prerequisite: Philosophy 403 or a strong background in mathematics.

Credit 3 units. A&S IQ: HUM Art: HUM

---

### L30 Phil 405 Philosophical Logic

What the philosophy student needs to know of logic, its techniques, and its use as a tool in philosophical analysis. Some attention to the history of the subject and to its metatheory. Prerequisite: previous exposure to formal logic, or permission of instructor.

Credit 3 units.

---

### L30 Phil 4051 Philosophy of Logic

This course surveys some important issues in the philosophy of logic. We begin with basic foundational issues in classical logic, including the relation of logic to psychological reasoning and Tarski's definition of logical consequence, and gradually go on to consider the motivations and status of well-known extensions (sometimes regarded as 'neo-classical' logics) such as modal logics and second-order logic. In the last weeks of the course, we'll examine some outright challengers, including intuitionistic and paraconsistent logics. After evaluating the arguments for and against these challenges, we'll examine one recent, controversial view-logical pluralism-which suggests that we might not need to choose among the rival systems. Many of the readings for this course are classics of contemporary philosophy, and the subject is likely to be of especial interest to students who have interests in logic, and in the philosophy and foundations of mathematics and language. Some of the important ideas in the course presuppose at least a basic acquaintance with formal logic, and hence either Phil 100 or Phil 301 (or permission of the instructor) are prerequisites.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L30 Phil 4061 Topics in the Philosophy of Language

Focus on the work of a single philosopher of language such as Carnap, Chomsky, Foucault, or Kripke, or on a central topic such as the theory of reference, the theory of meaning, or the problem of cross-cultural translation. Prerequisite: one course in epistemology, philosophy of language, or analytic philosophy, or permission of instructor.

Credit 3 units. BU: HUM

---

### L30 Phil 4065 Advanced Philosophy of Language

An advanced-level treatment of basic topics in the philosophy of language as this discipline is understood in the analytic tradition. The main positions and the problems they pose will be surveyed; focal themes include meaning, reference, and truth. The aim of the course is to help students develop effective expository techniques and to provide them with the necessary conceptual resources to analyze and criticize different theoretical views. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

### L30 Phil 4070 Global Justice

This course examines contemporary debates and controversies regarding global justice. Seminar discussions will be arranged around significant issues in the current literature. For example: What (if anything) do we owe to the distant needy? Do we have special obligations to our compatriots? Do political borders have normative significance? And so on. This course will be of interest not only to political theorists, but also students in other fields interested in social justice or international relations generally.

Same as L32 Pol Sci 4070

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

---

### L30 Phil 409 Formal Methods for Philosophy

This course is an advanced course exploring formal methods in both logic and confirmation theory. It begins with an introduction to metatheory, which is explored in more depth in the 403-404 sequence on Mathematical Logic, addressing the basic metatheory for logic in addition to alternatives to standard first-order logic. The second part of the course focuses on modal and other intensional logics. The final part of the course focuses on non-monotonic logics, focusing especially on Bayesian confirmation theory and decision theory. Prerequisite: 6 units of philosophy or permission of the instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

### L30 Phil 410 Theories of Perception

A consideration of recent work in philosophy and cognitive science on the nature of perception and its contribution to thought, knowledge, and behavior. Special attention will be paid to two questions: To what extent can perceptual experience be changed through learning? In what sense do perceptual states have content? The relation of these issues to more general theories of mental content, to the possibility of objective and theory-neutral observation in science, and to the directness or indirectness of perception will be discussed. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of instructor.

Credit 3 units.

---

### L30 Phil 4141 Advanced Epistemology

Competing theories of knowledge and belief justification will be considered. Careful attention will be given to selected problems such as skepticism, certainty, foundations, coherence, perception, induction. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

### L30 Phil 4142 Advanced Metaphysics

Through readings from both classical and contemporary sources, a single traditional metaphysical concern will be made the subject of careful and detailed analytic attention. Possible topics include such concepts as substance, category, cause, identity, reality, and possibility, and such positions as metaphysical realism, idealism, materialism, relativism, and irrealism. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

### L30 Phil 418 Current Controversies in Cognitive Science

An advanced survey of current debates in cognitive science with an emphasis on the philosophical issues raised by these debates. Topics may include: evolutionary psychology; innateness and neural plasticity; perception and action; consciousness; connectionism; robotics; embodied cognition; moral reason; emergence and artificial life; concepts and content; animal cognition. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Same as L64 PNP 418

---

Credit 3 units. A&S IQ: HUM EN: H

---

### L30 Phil 419 Philosophy of Psychology

An investigation of the philosophical presuppositions and implications of various traditions in psychology, including behaviorism, Gestalt, and cognitivism, with a special emphasis on the development of the information processing approach of contemporary cognitivism. The conception of psychological phenomena, data, and explanation central to each of these traditions will be examined, and typical topics will include the debates between propositional and imagistic models of representation, different accounts of concepts and categorization, and the relation of psychology to ethics. Prerequisites: one previous course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM

---

### L30 Phil 4210 Topics in Advanced Philosophy of Science

This course will vary in topics related to Philosophy of Science from semester to semester. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L30 Phil 4212 Philosophy of Neuroscience

This course focuses on the historical roots of neuroscience as well as its contemporary developments. Topics include: (1) the nature of explanatory strategies in neuroscience; (2) the relation between neuroscience research and higher-level disciplines such as psychology; and (3) the epistemology of the investigatory tools of neuroscience. Prerequisites: one previous course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM

---

### L30 Phil 423 Philosophy of Biological Science

This course examines a number of theoretical, conceptual, and methodological issues that arise in the attempts of biologists to explain living systems. One sort of problem concerns the relation between biology (and biological descriptions and explanations) and physics and chemistry. Biological phenomena have often seemed very different from ordinary physical phenomena in being teleological or goal oriented. Vitalists, accordingly, resisted the attempt to invoke physics and chemistry in the attempt to explain biological phenomena. But recently biology has come more and more to draw upon physics and chemistry; we will examine the conceptual frameworks that underlie these efforts. Another sort of problem concerns the adaptiveness of living organisms. Charles Darwin offered one naturalistic explanation of this feature, an explanation that was further developed in this century as the synthetic theory of evolution. A number of controversial issues have arisen within this context of adaptation, and the range of levels at which selection can occur. The ubiquity of evolution, moreover, has been challenged in recent years, as a number of non-selectionist explanations have recently been put forward. We will consider the arguments for the synthetic theory and these alternatives.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

### L30 Phil 426 Theories of Concepts

Concepts are the building blocks of thought. They are implicated in just about every cognitive task. Beyond that, there is little consensus. What information do concepts encode? How are they acquired? How are they combined to form thoughts? How are they related to perception and imagery? Each of these questions has been answered in numerous ways. In this course, we will explore competing theories of concepts that have been proposed by philosophers, psychologists, and other cognitive scientists. No prior acquaintance with these issues is required. Prerequisites: one previous course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

---

Credit 3 units. A&S IQ: HUM Art: HUM

---

### L30 Phil 430 Topics in Ethics

Selected advanced topics in ethics. Prerequisite: 6 units of philosophy, or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L30 Phil 4310 Metaethics

Ethics asks questions about right and wrong, good and bad, virtue and vice. Metaethics asks questions about ethics, including questions about whether we have any reason to do the right thing or to be virtuous, questions about whether it is possible to know the answer to ethical questions, and questions about what we mean by such ethical terms as "right" and "wrong" or "good and "bad." Influential metaethical views include relativism (on which ethical judgments are only true or false relative to an individual or culture) and moral skepticism (on which ethical knowledge is impossible). This course will introduce metaethics through an examination of selected texts and questions. Prerequisites: One previous course in philosophy at the 300 level, graduate standing, or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L30 Phil 4315 Normative Ethical Theory

An exploration of the three major normative ethical theories debated by philosophers in the last hundred years: Kantian ethics, utilitarianism, and virtue theory. Authors covered in the course may include: Henry Sidgwick, R. M. Hare, R. B. Brandt, John Rawls, Bernard Williams, Philippa Foot, Thomas Nagel, Christine Korsgaard, Michael Slote, and Barbara Herman. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L30 Phil 4320 British Moralists

An investigation of the work of the great British moral philosophers of the 17th-19th centuries, especially Hobbes, Hume, and Mill. Other figures may include Reid, Butler, Hutcheson, Bentham, and Sidgwick. In considering these philosophers, we will explore the relations between normative ethics, moral psychology, and political philosophy, and may include a discussion of legal, social, and economic philosophies as well. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

### L30 Phil 4331 Topics in the Philosophy of Feminism

This course addresses selected advanced topics in feminist philosophy. Credit 3 units.

---

### L30 Phil 4332 Cognition and Computation

This course introduces students to some of the key frameworks for thinking about the mind in computational terms. We will be looking at some basic topics in the theory of computation, in addition to considering philosophical issues raised by computational models of cognitive processes. This course is required for graduate students in the PNP Ph.D. program. Prerequisites: At least two 400-level PNP courses crosslisted in Philosophy.

Same as L64 PNP 4332

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L30 Phil 438 Aesthetics

A careful consideration of selected issues regarding the experience of visual art, architecture, music, or literature, as well as of the power or beauty of nature, people, and artifacts. For example, is there a special form of aesthetic experience or aesthetic attitude? In what do aesthetic power and beauty consist? Are they different in art and nature? Do the

artists' intentions matter? Some central concerns are: how do visual art and literary texts have 'meaning', what role do the viewer's or reader's interpretations play, and how might recent work in cognitive science and social theory shed light on these issues? Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

### L30 Phil 4400 Advanced Social and Political Philosophy

A selective investigation of one or two advanced topics in the philosophical understanding of society, government, and culture. Readings may include both historical and contemporary materials. Possible topics include: liberalism, socialism, communitarianism, citizenship, nationalism, cosmopolitanism, social contract theory, anarchism, and the rights of cultural minorities. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L30 Phil 451 Plato

An examination of some of Plato's most important dialogues, typically including the Gorgias, Phaedo, and Republic, with the aim of grasping the development of Plato's most influential thoughts in ethics and in metaphysics and epistemology. In order to provide both historical understanding and philosophical evaluation, attention will be paid to the context and structure of the dialogues and to the best of recent secondary literature. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

### L30 Phil 452 Aristotle

This course offers a maximally full and detailed introduction to the works of Aristotle. His logic, natural philosophy, psychology, metaphysics, ethics, and political philosophy will be discussed, and stress will be laid on the interpretive problems facing contemporary philosophers seeking to understand Aristotle's achievement. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

### L30 Phil 4530 Hellenistic Philosophy

The Hellenistic Age, traditionally dated from the death of Alexander and his (Macedonian) Empire at 323 BCE to the birth of Augustus' (Roman) Empire in 31 BCE, gave the West three of its most innovative and influential schools of philosophy: Epicureanism, Skepticism, and Stoicism. This course investigates the central features of their thought. Special attention is paid to the still-relevant debates between the Stoics and Skeptics about the possibility of knowledge, to the disagreements among all three schools about the issues of freedom, responsibility, and determinism, and to their ethical theories. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

---

### L30 Phil 4550 Continental Rationalism

A rationalist is a philosopher for whom at least one certain truth is inborn or comes from reason rather than from empirical or sensory experience. The major systemic writings of Descartes, Spinoza, and Leibniz will be examined with a focus on the question: does the epistemology determine the ontology of these philosophical systems, or vice versa? The lines of development connecting these philosophers will be traced, and such enduring problems as the relation of mind to body will be examined. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM

---

**L30 Phil 4551 17th & 18th Century British Philosophy**

17th and 18th century British philosophy introduced a profound shift in how philosophers and scientists understood themselves, the natural world, society, politics, and culture. The new, Newtonian science altered their sense of the place of humans in the natural world and the scope of what could be studied scientifically. Social, political, and economic changes motivated new conceptions of human nature, culture, and society. And because Britain was an Empire, the theories developed in the 17th and 18th centuries on this island remain embedded in the way many people and cultures understand themselves and the natural world to this day. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L30 Phil 4570 Kant's Critique of Pure Reason**

An in-depth investigation of Kant's Critique of Pure Reason, one of the most important books in the history of Western philosophy. Some supplementary readings from other philosophers will be used to situate Kant's work in a systematic and historical context, to present some 'Kantian' positions in current philosophy, and to bring in some important contrasting views and criticisms. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L30 Phil 4575 Kant's Moral Theory**

An in-depth examination of Kant's practical philosophy: his moral and political theory. Readings include the Critique of Practical Reason, parts of the Metaphysics of Morals, Perpetual Peace, and other writings. Supplementary readings will be used to situate Kant's work in its systematic and historical context, to provide orientation in the world of Kant scholarship, and to introduce important contrasting views and criticisms. We will also discuss recent reformulations of Kantian themes in the works of contemporary philosophers. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L30 Phil 464 Advanced Continental Philosophy**

A study of selected texts by such major figures of 20th Century continental philosophy as Husserl, Heidegger, Merleau-Ponty, Sartre, de Beauvoir, Levinas, Habermas, Foucault, Derrida, and Irigaray. Such topics as phenomenology, hermeneutics, existentialism, critical theory, structuralism and post-structuralism will be investigated. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM

---

**L30 Phil 465 Topics in the History of Philosophy**

Study of individual philosophers or themes from the ancient, medieval, and/or modern periods. Examples: Spinoza, St. Thomas Aquinas, neo-Platonism, universals in ancient and medieval thought, ancient and modern theories of space and time. Prerequisite: 6 units in philosophy, or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

---

**L30 Phil 480 History of Analytic Philosophy**

This course will begin with the reaction of G.E. Moore to the dominant idealism of the 19th century, together with the advances in formal approaches launched by Gottlob Frege and Bertrand Russell. It will engage in the rise of ordinary language philosophy through the later work of Ludwig Wittgenstein, as well as the important influence of the Vienna Circle and the rise and fall of Logical Positivism/Empiricism,

culminating in the resurgence of metaphysics with the work of Saul Kripke. The course will close with a look at philosophy that is still in the analytic tradition after analytic philosophy itself had been abandoned. Prerequisites: One previous course in philosophy at the 300 level, graduate standing, or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L30 Phil 497 Undergraduate Independent Study**

Prerequisite: Permission of the department. Credit variable, max 6 units. Credit variable, maximum 6 units.

---

**L30 Phil 499 Study for Honors**

Prerequisites: senior standing, a 3.5 minimum grade point average overall, a 3.5 minimum grade point average in philosophy courses, and the permission of the department. Applications and further information are available in the Department of Philosophy. See further: [arts.wustl.edu/~philos/undergrad/honors.html](http://arts.wustl.edu/~philos/undergrad/honors.html) Credit 3 units.

---

## Philosophy Major Program Requirements

- **Total units required:** 27; at least 6 units must be at the 400 level, and an additional 15 units must be at the 300 level or above
- Courses must be passed with a C- or above
- Up to 6 Credits can be transferred from other institutions and/or study abroad

Majors are encouraged to take more than this minimum number of courses, especially if they are considering graduate work in philosophy. Majors and minors are encouraged to fulfill the writing-intensive requirement by taking Phil 390 Philosophical Writing. All majors are required to complete a capstone experience in philosophy: either an honors thesis (Phil 499 Study for Honors) or the philosophy capstone course (Phil 3991 Philosophy Capstone Course). Majors who are planning to do graduate work in philosophy should attain at least reading proficiency in German, Greek, Latin, or French.

## Required Courses

Majors must complete at least one core course in each of the three areas below. Students who do not take Phil 390 will be required to take one additional core course. The core courses, by area, are as follows:

*Contemporary/Analytic Philosophy:*

Code	Title	Units
Phil 306G	Philosophy of Language	3
Phil 3113	Theory of Knowledge	3
Phil 315	Philosophy of Mind	3
Phil 321G	Philosophy of Science	3
Phil 3481	Introduction to Metaphysics	3
Phil 361	Philosophy of Emotions	3

*History of Philosophy:*

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 357C	Kant and 19th-Century Philosophy	3
Phil 358	Conceptual Foundations of Modern Science	3

*Value Theory:*

Code	Title	Units
Phil 331F	Classical Ethical Theories	3
Phil 339F	Philosophy of the Arts	3
Phil 340F	Social and Political Philosophy	3
Phil 345F	Issues in Applied Ethics	3
Phil 346	Philosophy of Law	3
Phil 361	Philosophy of Emotions	3

On occasion, it may be appropriate to substitute a 400-level course in one of these areas for a 300-level core course; individual petitions for substitutions will be considered by the director of undergraduate studies. Generally, for a course to count either as "core" or as partly satisfying the requirement for 6 units at the 400 level, it must be home-based in Philosophy. At most, 3 units of credit in Phil 499 or Phil 500 Independent Work can be counted toward the required 6 units of 400-level course work.

## Additional Information

### Senior Honors

Eligible majors are encouraged to work toward Senior Honors. To qualify, students must have the agreement of a faculty member to serve as their thesis advisor. In addition, at the end of their junior year, they must have an overall grade point average of at least 3.65. For important additional information regarding Senior Honors, consult our Undergraduate Honors webpage.

### The Writing-Intensive Seminar

Majors are encouraged to fulfill their writing-intensive requirement by taking Phil 390 Philosophical Writing, which is specially designated as writing intensive. It is typically taken during the junior year, and it is limited to 15 students. Significant attention is devoted to conceiving, researching, writing, revising, critiquing and presenting philosophical essays. A philosophy major who does not take a philosophy writing-intensive seminar must take a fourth core course from any of the three core areas. Registration priority for Phil 390 is given to philosophy majors and minors who have not yet completed their writing-intensive requirement.

### Capstone Experience

All philosophy majors are required to complete a capstone experience either by writing an honors thesis or by taking Phil 3991 Philosophy Capstone Course. **Please be aware that the capstone course is offered only in the spring semester**, so students will need to plan

their class schedules accordingly if they decide not to write an honors thesis. To qualify to write an honors thesis, at the end of their junior year, students must have a GPA of at least 3.5 in the major, a GPA of at least 3.5 in advanced philosophy courses, and an overall GPA of at least 3.65. Alternatively, majors should sign up for Phil 3991 (a 3-credit course), which will draw together a variety of different philosophical areas. Only philosophy majors of senior standing may take this course; preference is given to students not pursuing honors.

## Study Abroad

Students can pursue the philosophy major while studying abroad. The department has special study abroad arrangements with University College, London; King's College, London; Trinity College, Dublin (Ireland); Sussex University (U.K.); Utrecht University (the Netherlands); and the University of Auckland (New Zealand). Information about study abroad and specific overseas programs is available from the departmental website and the study abroad advisor.

Phone: 314-935-6670  
Email: [philosophy@wustl.edu](mailto:philosophy@wustl.edu)  
Website: <http://philosophy.artsci.wustl.edu>

## Philosophy Major, Law and Policy Specialization

### Program Requirements

- **Total units required: 27**

This specialization is especially recommended for students who intend to pursue a career in law or public policy. The track involves taking certain specific courses for the major (and possibly a few extra courses) that will provide the student with additional preparation and a competitive edge when applying to law school, postgraduate programs in public policy, and related jobs.

### Requirements

- Phil 100G Logic and Critical Analysis or Phil 301G Symbolic Logic
- Strongly recommended: a 100-level class in addition to Phil 100G Logic and Critical Analysis
- One core course in **Contemporary/Analytic** and one core course in **History**

*Contemporary/Analytic Courses:*

Code	Title	Units
Phil 306G	Philosophy of Language	3
Phil 3113	Theory of Knowledge	3
Phil 315	Philosophy of Mind	3
Phil 321G	Philosophy of Science	3
Phil 3481	Introduction to Metaphysics	3
Phil 361	Philosophy of Emotions	3

*History Courses:*

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 357C	Kant and 19th-Century Philosophy	3
Phil 358	Conceptual Foundations of Modern Science	3

- Phil 340F Social and Political Philosophy and Phil 346 Philosophy of Law
- Strongly recommended: at least one other **Value Theory** course:

Code	Title	Units
Phil 340F	Social and Political Philosophy	3
Phil 346 or Phil 361	Philosophy of Law Philosophy of Emotions	3

- Strongly recommended: at least one 200-level course
- Phil 390 Philosophical Writing or another core course
- Phil 3991 Philosophy Capstone Course or Phil 499 Study for Honors
- At least 21 units at the 300 level or above (including core courses)\*
- At least 6 of those 21 units at the 400 level\*\*
- Courses taken Pass/Fail **cannot** count toward the major.

## Additional Information

### Senior Honors

Eligible majors are encouraged to work toward Senior Honors. To qualify, students must have the agreement of a faculty member to serve as their thesis advisor. In addition, at the end of their junior year, they must have an overall grade point average of at least 3.65. For important additional information regarding Senior Honors, consult our Undergraduate Honors webpage.

### The Writing-Intensive Seminar

Majors are encouraged to fulfill their writing-intensive requirement by taking Phil 390 Philosophical Writing, which is specially designated as writing intensive. It is typically taken during the junior year, and it is limited to 15 students. Significant attention is devoted to conceiving, researching, writing, revising, critiquing and presenting philosophical essays. A philosophy major who does not take a philosophy writing-intensive seminar must take a fourth core course from any of the three core areas. Registration priority for Phil 390 is given to philosophy majors and minors who have not yet completed their writing-intensive requirement.

### Capstone Experience

All philosophy majors are required to complete a capstone experience either by writing an honors thesis or by taking Phil 3991 Philosophy Capstone Course. **Please be aware that the capstone course is offered only in the spring semester**, so students will need to plan their class schedules accordingly if they decide not to write an honors thesis. To qualify to write an honors thesis, at the end of their junior

year, students must have a GPA of at least 3.5 in the major, a GPA of at least 3.5 in advanced philosophy courses, and an overall GPA of at least 3.65. Alternatively, majors should sign up for Phil 3991 (a 3-credit course), which will draw together a variety of different philosophical areas. Only philosophy majors of senior standing may take this course; preference is given to students not pursuing honors.

## Study Abroad

Students can pursue the philosophy major while studying abroad. The department has special study abroad arrangements with University College, London; King's College, London; Trinity College, Dublin (Ireland); Sussex University (U.K.); Utrecht University (the Netherlands); and the University of Auckland (New Zealand). Information about study abroad and specific overseas programs is available from the departmental website and the study abroad advisor.

## Philosophy Major, Philosophy of Science Specialization

### Program Requirements

- **Total units required: 27**

The philosophy of science specialization is available only as a second major in combination with work in one or more of the sciences. It is intended for those students with a scientific background who have an interest in pursuing philosophical issues relating to the natural and physical sciences.

### Requirements

- **In Contemporary/Analytic:**

Code	Title	Units
Phil 321G	Philosophy of Science	3
<b>Total Units</b>		<b>3</b>

- **In History:** Any one of the core courses listed below:

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 358	Conceptual Foundations of Modern Science	3

- **In Advanced Philosophy of Science:**

Code	Title	Units
Phil 4210	Topics in Advanced Philosophy of Science	3

- Any three of the supplementary courses listed below, which must include Phil 390 Philosophical Writing if the writing-intensive requirement is to be fulfilled in Philosophy
- Phil 3991 Philosophy Capstone Course or Phil 499 Study for Honors
- At least 27 units at the 300 level or above (including core courses)\*
- At least 6 of those 27 units at the 400 level\*\*
- Courses taken Pass/Fail **cannot** count toward the major.

## Supplementary Courses

### General Philosophy Courses:

Code	Title	Units
Phil 390	Philosophical Writing	3
Phil 426	Theories of Concepts	3

### Epistemology and Metaphysics Courses:

Code	Title	Units
Phil 3113	Theory of Knowledge	3
Phil 3481	Introduction to Metaphysics	3
Phil 4141	Advanced Epistemology	3
Phil 4142	Advanced Metaphysics	3

### Life and Science Courses:

Code	Title	Units
Phil 3001	Philosophy of Medicine	3
Phil 4212	Philosophy of Neuroscience	3
Phil 423	Philosophy of Biological Science	3

### Mind and Science Courses:

Code	Title	Units
Phil 315	Philosophy of Mind	3
Phil 419	Philosophy of Psychology	3
Phil 4212	Philosophy of Neuroscience	3
PNP 495	PNP Seminar (with approval of topic)	3

\* At least 27 units of the required upper-level courses must be completed with a minimum of a C-.

\*\* Three of these credits (one course) must not be from Honors Thesis or Independent Study.

## Additional Information

### Senior Honors

Eligible majors are encouraged to work toward Senior Honors. To qualify, students must have the agreement of a faculty member to serve as their thesis advisor. In addition, at the end of their junior year, they must have an overall grade point average of at least 3.65. For important additional information regarding Senior Honors, consult our Undergraduate Honors webpage.

## The Writing-Intensive Seminar

Majors are encouraged to fulfill their writing-intensive requirement by taking Phil 390 Philosophical Writing, which is specially designated as writing intensive. It is typically taken during the junior year, and it is limited to 15 students. Significant attention is devoted to conceiving, researching, writing, revising, critiquing and presenting philosophical essays. A philosophy major who does not take a philosophy writing-intensive seminar must take a fourth core course from any of the three core areas. Registration priority for Phil 390 is given to philosophy majors and minors who have not yet completed their writing-intensive requirement.

## Capstone Experience

All philosophy majors are required to complete a capstone experience either by writing an honors thesis or by taking Phil 3991 Philosophy Capstone Course. **Please be aware that the capstone course is offered only in the spring semester**, so students will need to plan their class schedules accordingly if they decide not to write an honors thesis. To qualify to write an honors thesis, at the end of their junior year, students must have a GPA of at least 3.5 in the major, a GPA of at least 3.5 in advanced philosophy courses, and an overall GPA of at least 3.65. Alternatively, majors should sign up for Phil 3991 (a 3-credit course), which will draw together a variety of different philosophical areas. Only philosophy majors of senior standing may take this course; preference is given to students not pursuing honors.

## Study Abroad

Students can pursue the philosophy major while studying abroad. The department has special study abroad arrangements with University College, London; King's College, London; Trinity College, Dublin (Ireland); Sussex University (U.K.); Utrecht University (the Netherlands); and the University of Auckland (New Zealand). Information about study abroad and specific overseas programs is available from the departmental website and the study abroad advisor.

## Philosophy Major, Philosophy Research Specialization

### Program Requirements

- **Total units required:** 36

The philosophy research specialization is especially recommended for students who plan to pursue graduate studies and an advanced degree in philosophy, which is a must for anyone interested in a career as a university or college philosophy teacher. It will give the student a broad background in philosophy, which is a competitive advantage when applying to graduate programs in the field.

## Requirements

- Phil 100G Logic and Critical Analysis
- One 100-level class in addition to Phil 100G, preferably Phil 120F Problems in Philosophy or Phil 125C Great Philosophers
- **In Contemporary/Analytic:**

Code	Title	Units
Phil 3113	Theory of Knowledge	3
or Phil 3481	Introduction to Metaphysics	
Phil 306G	Philosophy of Language	3
or Phil 315	Philosophy of Mind	
or Phil 321G	Philosophy of Science	
or Phil 361	Philosophy of Emotions	
<b>Total Units</b>		<b>6</b>

- **In History:** Any two core courses (a 400-level History course may be substituted for a second 300-level course):

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 357C	Kant and 19th-Century Philosophy	3
Phil 358	Conceptual Foundations of Modern Science	3

- **In Value Theory** (Phil 4310 Metaethics or Phil 4315 Normative Ethical Theory can satisfy a 400-level requirement):

Code	Title	Units
Phil 331F	Classical Ethical Theories	3
Phil 4310	Metaethics	3
or Phil 4315	Normative Ethical Theory	
or Phil 361	Philosophy of Emotions	
<b>Total Units</b>		<b>6</b>

- Phil 390 Philosophical Writing or another core course
- Phil 3991 Philosophy Capstone Course or Phil 499 Study for Honors
- At least 30 units at the 300 level or above (including core courses)\*
- At least 6 of those 30 units at the 400 level\*\*
- Courses taken Pass/Fail **cannot** count toward the major.

## Additional Information

### Senior Honors

Eligible majors are encouraged to work toward Senior Honors. To qualify, students must have the agreement of a faculty member to serve as their thesis advisor. In addition, at the end of their junior year, they must have an overall grade point average of at least 3.65. ## Philosophy Minor Program Requirements

- **Total units required:** 18

### Required Courses

Philosophy minors are required to complete at least 12 units at the 300 level or above, which must include at least one course in each of the following three core areas:

#### Contemporary/Analytic Philosophy

Code	Title	Units
Phil 306G	Philosophy of Language	3
Phil 3113	Theory of Knowledge	3
Phil 315	Philosophy of Mind	3
Phil 321G	Philosophy of Science	3
Phil 3481	Introduction to Metaphysics	3
Phil 361	Philosophy of Emotions	3

#### History of Philosophy

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 357C	Kant and 19th-Century Philosophy	3
Phil 358	Conceptual Foundations of Modern Science	3

#### Value Theory

Code	Title	Units
Phil 331F	Classical Ethical Theories	3
Phil 339F	Philosophy of the Arts	3
Phil 340F	Social and Political Philosophy	3
Phil 345F	Issues in Applied Ethics	3
Phil 346	Philosophy of Law	3
Phil 361	Philosophy of Emotions	3

### Additional Information

Minors are encouraged to take the writing-intensive course Phil 390 Philosophical Writing. A philosophy minor must receive a grade of C- or higher in each course. Many philosophy courses can also be taken as part of a minor in history, philosophy of science, or legal studies.

Phone: 314-935-6670  
Email: [philosophy@wustl.edu](mailto:philosophy@wustl.edu)  
Website: <http://philosophy.artsci.wustl.edu>

## Philosophy of Science Minor

### Program Requirements

- **Total units required:** 18, at least 15 of which must be taken at the 300 level or above

### Required Courses

Code	Title	Units
Phil 321G	Philosophy of Science	3
Phil 4210	Topics in Advanced Philosophy of Science	3
<b>Total Units</b>		<b>6</b>

### Elective Courses

At least one of the following three courses:

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 358	Conceptual Foundations of Modern Science	3

At least two courses from the following list:

Code	Title	Units
Phil 3001	Philosophy of Medicine	3
Phil 3113	Theory of Knowledge	3
Phil 315	Philosophy of Mind	3
Phil 3481	Introduction to Metaphysics	3
Phil 390	Philosophical Writing	3
Phil 4141	Advanced Epistemology	3
Phil 4142	Advanced Metaphysics	3
PNP 495	PNP Seminar (with approval of topic)	3

Phone: 314-935-6670  
Email: [philosophy@wustl.edu](mailto:philosophy@wustl.edu)  
Website: <http://philosophy.artsci.wustl.edu>

## Philosophy- Neuroscience-Psychology

Philosophy-Neuroscience-Psychology (PNP) is an interdisciplinary program that provides an opportunity to examine the mind from multiple perspectives. Students who choose to major in PNP will learn to bring some of the newest findings in science to bear on some of the oldest questions in philosophy; they will also see new questions emerge and learn to pursue those questions as well. They will consider questions like the following: Is the mind-brain a single entity, or does having a mind involve something over and above the activity of a brain? What assumptions are made by cognitive psychologists when they

divide mental activity into separate processes and use response times or other measures of task performance to describe those processes? What assumptions are made by neuroscientists when they use imaging techniques to determine where in the brain a cognitive process is carried out? What are we to make of Chomsky's claim that language is an innate mental organ designed to generate an infinite number of sentences? PNP majors will seek answers to such questions in courses offered by PNP and PNP's affiliated departments.

## Faculty

### Director

#### Ron Mallon

Professor; Chair, Department of Philosophy  
PhD, Rutgers University  
(Philosophy; Philosophy-Neuroscience-Psychology)

### Core Faculty

#### Carl F. Craver

Professor  
PhD, University of Pittsburgh  
(Philosophy; Philosophy-Neuroscience-Psychology)

#### Rebecca "Becko" Copenhaver

Professor  
PhD, Cornell University  
(Philosophy; Philosophy-Neuroscience-Psychology)

#### Brett D. Hyde

Associate Professor  
PhD, Rutgers University  
(Philosophy; Linguistics; Philosophy-Neuroscience-Psychology)

#### Zoe Jenkin

Assistant Professor  
PhD, Harvard University  
(Philosophy; Philosophy-Neuroscience-Psychology)

#### Casey O'Callaghan

Professor  
PhD, Princeton University  
(Philosophy; Philosophy-Neuroscience-Psychology)

#### Jake Quilty-Dunn

Assistant Professor  
PhD, The Graduate Center, CUNY  
(Philosophy; Philosophy-Neuroscience-Psychology)

## Participating Faculty

#### Richard A. Abrams

Professor  
PhD, University of Michigan  
(Psychological & Brain Sciences)

#### David A. Balota

Professor  
PhD, University of South Carolina  
(Psychological & Brain Sciences)

#### Joe Barcroft

Professor  
PhD, University of Illinois at Urbana-Champaign  
(Romance Languages and Literatures)

#### Cindy Brantmeier

Professor  
PhD, Indiana University  
(Romance Languages and Literatures; Education)

#### Todd S. Braver

Professor  
PhD, Carnegie Mellon University  
(Psychological & Brain Sciences)

#### Leonard Green

Professor  
PhD, State University of New York–Stony Brook  
(Psychological & Brain Sciences; Economics)

#### John Heil

Professor  
PhD, Vanderbilt University  
(Philosophy)

#### Erik Herzog

Professor  
PhD, Syracuse University, Institute for Sensory Research  
(Biology)

#### Patrick Hill

Associate Professor  
PhD, University of Notre Dame  
(Psychological & Brain Sciences)

#### Lori Markson

Associate Professor  
PhD, University of Arizona  
(Psychological & Brain Sciences)

#### Kathleen McDermott

Professor  
PhD, Rice University  
(Psychological & Brain Sciences)

#### Camillo Padoa-Schioppa

Professor  
PhD, Massachusetts Institute of Technology  
(Anatomy and Neurobiology; Biological Engineering)

**Jonathan Peelle**

Assistant Professor  
PhD, Brandeis University  
(Otolaryngology)

**Anya Plutynski**

Professor  
PhD, University of Pennsylvania  
(Philosophy)

**Joseph L. Price**

Professor  
PhD, Oxford University  
(Anatomy and Neurology)

**Larry Snyder**

Professor  
PhD, University of Rochester  
(Anatomy and Neurobiology)

**Mitchell S. Sommers**

Professor  
PhD, University of Michigan  
(Psychological & Brain Sciences)

**Ray Sparrowe**

Senior Lecturer  
PhD, University of Illinois  
(Olin Business School)

**Paul S.G. Stein**

Professor  
PhD, Stanford University  
(Biology)

**James Wertsch**

Marshall S. Snow Professor in Arts & Sciences  
PhD, University of Chicago  
(Anthropology; American Culture Studies; Education; International and Area Studies)

**Desirée A. White**

Professor  
PhD, Washington University  
(Psychological & Brain Sciences)

**Jeffrey M. Zacks**

Professor  
PhD, Stanford University  
(Psychological & Brain Sciences)

## Endowed Professors

**Deanna M. Barch**

Gregory B. Couch Professor of Psychiatry  
PhD, University of Illinois  
(Psychological & Brain Sciences; Radiology)

**John Baugh**

Margaret Bush Wilson Professor in Arts & Sciences  
PhD, University of Pennsylvania  
(African and African-American Studies; American Culture Studies; Anthropology; Education; English; Psychological & Brain Sciences)

**Pascal R. Boyer**

Henry Luce Professor of Collective and Individual Memory  
PhD, University of Paris–Nanterre  
(Anthropology; Religious Studies)

**Steven E. Petersen**

James S. McDonnell Professor of Cognitive Neuroscience  
PhD, California Institute of Technology  
(Neurology; Neurological Surgery; Psychological & Brain Sciences)

**Marcus E. Raichle**

Alan A. and Edith L. Wolff Distinguished Professor of Medicine  
MD, University of Washington  
(Radiology; Neurology; Neurobiology and Biomedical Engineering)

**Henry L. Roediger III**

James S. McDonnell Distinguished University Professor  
PhD, Yale University  
(Psychological & Brain Sciences; American Culture Studies)

**Rebecca Treiman**

Burke and Elizabeth High Baker Professor of Child Developmental Psychology  
PhD, University of Pennsylvania  
(Psychological & Brain Sciences)

## McDonnell Postdoctoral Fellows

**Amanda Evans**

PhD, The University of Texas at Austin

**Mason Westfall**

PhD, University of Toronto

- Philosophy-Neuroscience-Psychology Major, Language Cognition and Culture Concentration (p. 889)

## Minors

- Philosophy-Neuroscience-Psychology Minor (p. 892)

## Courses

Visit online course listings to view semester offerings for L64 PNP.

---

**L64 PNP 1500 Ampersand: The Mind: What Makes Us and Other Perspectives on Consciousness**

This course explores how consciousness is created in the brain and body. This course will integrate biological, psychological, and philosophical perspectives to investigate the nature of the mind. Utilizing an experiential approach, we will study how perception-action links give rise to consciousness and shape our subjective understanding of the world. Concepts will include sensory-motor integration, spatial and temporal awareness, sense of self and sense of agency. Students will gain a broad understanding of both historical milestones in the development of "enactivism" and current experimental techniques enabling research into perception, embodiment, presence, virtual and augmented reality, and the neural correlates of consciousness. This course is for first-year, non-transfer students only.

Credit 3 units. A&S IQ: SSC EN: S

---

**L64 PNP 200 Introduction Cognitive Science**

We will seek to understand the mind-brain by integrating findings from several of the cognitive sciences, including philosophy, psychology, neuroscience, linguistics, anthropology, and artificial intelligence. This course will consider multiple perspectives on such topics as mental imagery, concepts, rationality, consciousness, emotion, language, thought, memory, attention, and machine intelligence. Prerequisite: completion of at least one of the following courses: Psych 100B, Phil 120F, Phil 125C, Biol 296A, MBB 120A or Ling 170D.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L64 PNP 201 Inquiry in the Cognitive Sciences**

Understanding the mind-brain involves orchestrating a variety of conceptual tools and modes of inquiry from the cognitive sciences. This course offers a hands-on introduction to a variety of research tactics used in the behavioral and biological sciences and emphasizes the advantages of combining them. For example, neuroimaging can enhance the interpretation of experiments by cognitive psychologists, and modeling can be used to simulate and understand the effects of brain lesions. Prerequisite: completion of at least one of the following courses: Psych 100B, Phil 120F, Phil 125C, Biol 296A, MBB 120 or Ling 170D.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

**L64 PNP 301 Symbolic Logic**

In the first half of the course we will be studying some features of truth-functional and first-order classical logics, including studying the model theory and metatheory for first-order logic in much greater depth than in Phil 100. In the second half of the course we will go on to study three different styles of proof-system: tableaux, axiomatic, and natural deduction. This course continues on where Philosophy 100: An introduction to Logic and Critical Analysis leaves off. It is recommended for students who have already taken that introductory course, or for students who already have a strong background in mathematics. Priority given to majors in Philosophy & PNP.

Same as L30 Phil 301G

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: HUM

---

**L64 PNP 306 Philosophy of Language**

A survey of major philosophical problems concerning meaning, reference, and truth as they have been addressed within the analytic tradition. Readings that represent diverse positions on these focal issues will be selected from the work of leading philosophers in the field, for example: Frege, Russell, Wittgenstein, Davidson, Quine, Kripke, and Putnam. Students are encouraged to engage critically the ideas and arguments presented, and to develop and defend their own views on the core topics. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Same as L30 Phil 306G

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L64 PNP 309 Syntactic Analysis**

The ability to produce and understand an infinite number of sentences is perhaps the most fascinating aspect of the human language faculty. Syntax is the study of how the brain organizes sentences from smaller phrases and words. This course explores syntactic analysis from several perspectives within generative linguistics, focusing primarily on the Government and Binding framework but also introducing Minimalist and Optimality Theoretic approaches. Topics to be discussed include phrase structure, transformations, case theory, thematic roles, and anaphora. Assignments will help students learn to construct and compare analyses of syntactic problems in English and other languages. Prerequisite: Ling 170D or permission of instructor.

Same as L44 Ling 309

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

---

**L64 PNP 311 Introduction to Semantics**

Semantics is the branch of linguistics which studies how speakers assign meaning to words, sentences, and larger units of discourse. We combine perspectives from both linguistics and philosophy to explore a variety of topics including polysemy, compositionality, quantification, anaphora, definite descriptions, attitude reports, presupposition, and implicature. Prerequisite: Ling 170D or Phil 301G or permission of instructor.

Same as L44 Ling 311

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

---

**L64 PNP 313 Phonological Analysis**

There are several important abilities involved in the use of human language, one of these being the ability to organize speech sounds. The system that the brain uses to accomplish this task is the subject matter of phonology. This course will explore phonology from several perspectives within generative linguistics, including both traditional rule-based and current Optimality Theoretic approaches. Topics to be discussed include phonological features, lexical phonology, prosodic morphology, tone, and metrical stress. Assignments will help students learn to analyze phonological problems in a variety of languages and to evaluate the consequences of using different analytic approaches. Prerequisite: Ling 170D or permission of instructor.

Same as L44 Ling 313

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L64 PNP 315 Philosophy of Mind**

An introduction to philosophical analyses of the nature of mind, especially those developed by contemporary philosophers. The focus will be on questions such as the following: What is a mind? How does it relate to a person's brain? How does it relate to a person's body and the external world? Can a mind exist in a very different kind of body (e.g., a computer or a robot)? Does thinking require a language-like code? If so, can non-linguistic species think? What is it to have a mental image or to experience pain? Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Same as L30 Phil 315

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L64 PNP 3151 Introduction to Social Psychology**

An introduction to the scientific study of social influence. Topics include person perception, social cognition, attitudes, conformity, group behavior, aggression, altruism, prejudice and psychology's interface with law, health, and climate change. PREREQ: Psych 100B/1000

Same as L33 Psych 315

Credit 3 units. A&S IQ: SSC Arch: SEM, SSC Art: SSC BU: BA EN: S

---

---

**L64 PNP 316 Mind and Morals**

This course explores a number of issues at the intersection of ethics and cognitive science. Possible topics include: Are we rational? Do we know our own thoughts and motivations? Can one believe that one ought to do something without being motivated to do it? Do emotions impair or enhance our ability to reason? How do moral beliefs develop through childhood? Are traits such as intelligence and character unchangeable, and what implications follow if they are (or are not)? Does retaining my identity over time require having the same mind, and, if so, am I the same person now as I was as a child? Are non-human animals worthy of moral consideration? If brain activity is determined by causal laws, can we have free will? Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Same as L30 Phil 316

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

---

**L64 PNP 3171 Introduction to Computational Linguistics**

Use of computers to analyze, understand, and generate human language. Emphasis on appreciating practical applications such as text analysis, search and creation of dictionaries and corpora, information retrieval, machine translation, and speech interfaces. Survey of rule-based and statistical techniques. Students acquire programming skills appropriate for solving small- to medium-scale problems in linguistics and text processing, using a language such as Python. Students have regular programming assignments and complete a semester project. No previous knowledge of programming required. Prerequisite: L44 Ling 170D.

Same as L44 Ling 317

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L64 PNP 320 Historical and Comparative Linguistics**

Historical linguistics focuses on how languages change over time. Comparative linguistics focuses on their similarities and differences. In this course we will trace some of the differences and changes in sound (phonetics and phonology) word formation (morphology), sentence structure (syntax), and meaning (semantics). Topics include linguistic universals, the structural and genetic classification of languages, the techniques of reconstructing proto-languages, and the causes of language change. Examples from Indo-European languages (for example, Greek, English, and Spanish) and from Native American languages (for example, Quechua and Mayan) will be emphasized. Prerequisite: Ling 170D.

Same as L44 Ling 320

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: HUM EN: S

---

**L64 PNP 321 Philosophy of Science**

Pivotal concepts common to empirical sciences are examined and clarified. These include: explanation, confirmation, prediction, systematization, empirical significance, and the relationship of all these concepts to the structure of scientific theory. Examples may be drawn from both contemporary and historical science, including the social, biological, and physical sciences. Students with a background in science are particularly encouraged to consider this course. Priority given to majors in Philosophy & PNP.

Same as L30 Phil 321G

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L64 PNP 3211 Developmental Psychology**

This course concentrates on the cognitive and social development of the person from conception to adulthood. Topics covered include: infant perception, attachment, cognitive development from Piagetian and information processing perspectives, aggression and biological bases of behavior. PREREQ: Psych 100B.

Same as L33 Psych 321

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L64 PNP 3221 Music Cognition**

An introduction to modern research on music perception and cognition. The course covers four main topics: the perception of key, the psychoacoustics of dissonance, the relationship between attention and musical meter, and the process by which melodies establish, fulfill, and deny expectations. Students read and discuss research from both cognitive science and music theory, in addition to completing several projects.

Same as L27 Music 3221

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: HUM

---

**L64 PNP 330 Sensation and Perception**

What's involved in seeing and hearing? This course will cover perception from the physical stimuli (light and sound) that impinge upon the sensory receptors through the higher-level percepts that the stimuli generate. Demonstrations and illusions will be used as we learn about the anatomy and physiology of the sensory systems and study the brain mechanisms that are involved in vision and audition. Prerequisite: Psych 100B/1000.

Same as L33 Psych 330

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA, SCI

---

**L64 PNP 3401 Biological Psychology**

An introduction to biological mechanisms underlying behavior. Topics will include the physiology of nerve cells, anatomy of the nervous system, control of sensory and motor activity, arousal and sleep, motivation and higher mental processes. PREREQ: PSYCH 100B

Same as L33 Psych 3401

Credit 3 units. A&S IQ: NSM Arch: NSM BU: SCI

---

**L64 PNP 3411 Principles of the Nervous System**

This course will provide a broad introduction to neuroscience, starting at the level of cellular and molecular neuroscience, and ultimately ending at systems and theoretical neuroscience, with emphasis on the organization of the mammalian central nervous system. Topics will include neuronal structure, the action potential, information transmission between neurons, sensory/motor systems, emotion, memory, disease, drugs, behavior, and network dynamics. A fundamental goal of this course is to provide students with the ability to approach complex problems using the scientific method and to understand the limits of knowledge. This course will also expose students to some of the neuroscience community at WashU. Bio 2960, Bio 2970 recommended, Bio 3058 recommended or Psych 3401 and permission of instructor. (Biology Major Area B)

Same as L41 Biol 3411

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L64 PNP 3451 Genes, Environment, and Human Behavior**

This class will examine how genetic influences impact various dimensions of human behavior, ranging from traits (e.g. personality) to psychiatric disorders. Topics to be covered include methods used to study genetic influence, how genetic predispositions interact with the environment, and ethical implications. Modern methods for gene-identification, such as genomewide association studies, polygenic risk scores and epigenetic experiments will be examined in detail. Emphasis will be placed on understanding core concepts (e.g. what is identity-by-descent) as well as application (e.g. calculate heritability, interpretation of results from published studies). PREREQ: Psych 100B. 3 units. Same as L64 PNP 3451.

Same as L33 Psych 345

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: SCI EN: S

---

---

**L64 PNP 350 Physics of the Brain**

Concepts and techniques of physics are applied to study the functioning of neurons and neuronal circuits in the brain. Neurons and neural systems are modeled at two levels: (i) at the physical level, in terms of the electrical and chemical signals that are generated and transmitted and (ii) at the information-processing level, in terms of the computational tasks performed. Specific topics include: neuronal electrophysiology, neural codes, neural plasticity, sensory processing, neural network architectures and learning algorithms, and neural networks as dynamical and statistical systems. Course grade is based primarily on an individualized term project. Prerequisite: Phys 191-192 or Phys 193-194 or Phys 197-198 or Phys 205-206, or permission of the instructor.

Same as L31 Physics 350

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI EN: BME T, SU, TU

---

**L64 PNP 3531 Psychology of Personality**

What is personality, and how can we scientifically study it? How did we become who we are today? Is personality fixed, or can we change? How does personality shape our everyday experiences and consequential life outcomes? Do we know ourselves and others? This course will address such questions by providing a contemporary overview of the field of personality psychology that will help students better understand themselves and others. PREREQ: Psych 100B.

Same as L33 Psych 353

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L64 PNP 3541 Psychopathology and Mental Health**

This is an introductory course in psychopathology or the scientific study of mental health disorders. The course will include definitions, theories, and classification of Psychopathological behavior. Content will focus on symptoms, classification, prevalence, etiology, and treatment of mental health disorders, including mood, anxiety, eating, schizophrenia spectrum, substance use, and personality disorders. PREREQ: Psych 100B.

Same as L33 Psych 354

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L64 PNP 355 Physics of Vision**

How do the eyes capture an image and convert it to neural messages that ultimately result in visual experience? This lecture and demonstration course will cover the physics of how we see. The course is addressed to physics, premedical, and life-sciences students with an interest in biophysics. Topics include physical properties of light, evolution of the eyes, image formation in the eye, image sampling with an array of photoreceptors, transducing light into electrical signals, color coding, retinal organization, computing with nerve cells, compressing the 3-D world into optic nerve signals, inferring the 3-D world from optic nerve signals, biomechanics of eye movement, engineered vision in machines. The functional impact of biophysical mechanisms for visual experience will be illustrated with psychophysical demonstrations. Corequisite: Phys 117A, Phys 197 or permission of instructor. 3 units.

Same as L31 Physics 355

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI EN: BME T, TU

---

**L64 PNP 3581 Conceptual Foundations of Modern Science**

Where does modern science come from? This course examines the winding paths by which the dominant scientific world-views of the 20th century became established. We will discuss a variety of broad themes: scientific method or methods, revolutionary science, the relationship between science and society, and the aims of science. This course is not intended to be a comprehensive survey of the history of science. Instead, we will focus upon a few key figures - Galileo, Newton,

Darwin, - and we will read both primary and secondary literature on their significance to these broad themes. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Same as L30 Phil 358

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L64 PNP 360 Cognitive Psychology**

Introduction to the study of thought processing from an information-processing approach. Emphasis will be placed on theoretical models that are grounded in empirical support. Topics include pattern recognition, attention, memory, reasoning, language processes, decision making, and problem solving. PREREQ: Psych 100B.

Same as L33 Psych 360

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

---

**L64 PNP 361 Psychology of Learning**

The experimental analysis of behavior is presented with examination of Operant and Pavlovian conditioning, aversive control, theories of reinforcement, choice behavior, behavioral economics, etc. Theoretical and experimental approaches to the study of behavior as developed in the laboratory are emphasized. Consideration is given to applications from the laboratory to everyday behavior. PREREQ: Psych 100B. Enrollment limited to 30.

Same as L33 Psych 361

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L64 PNP 362 The Biological Basis of Human Behavior**

Infidelity, marriage customs, inner city violence, infanticide, intelligence...Are the behavioral patterns we see genetically fixed and racially variable? What is the evolutionary and biological basis of human behavior? This course offers a critical evaluation of these from an anthropological perspective.

Same as L48 Anthro 362

Credit 3 units. A&S IQ: LCD, NSM, SD Arch: NSM Art: NSM BU: BA

---

**L64 PNP 363 The Neuroscience of Movement: You Think, So You Can Dance?**

Although humans have expressed themselves through movement throughout time, only recently have neurophysiological investigative techniques allowed us to glimpse the complex neural processes that allow the coordination and integration of thought, action, and perception. This course introduces students to the nascent yet growing field of dance neuroscience. In part one of this course, we explore fundamental concepts of motor control, including how our central nervous system integrates information to allow us to maintain posture and balance, to coordinate our limbs to external rhythms, and to move our bodies gracefully and expressively through space and time. In part two, we explore theoretical frameworks of motor learning as they pertain to movement. We delve into the neuromechanisms underlying common tools that dancers and athletes use to improve motor performance and how dance training induces neuroplasticity in brain structure and function. In part three, we explore the neural underpinnings of aesthetic appreciation while watching dance, including the action observation network and affective responses to art. Required work includes short assignments, a final project and presentation on a topic of your choice related to the course focus, and a few movement workshops (for which dance training is not required). Prerequisite: introductory course in dance, biology, or neuroscience, or permission from the instructor.

Same as L29 Dance 363

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

---

#### L64 PNP 366 Art and the Mind-Brain

In recent years, there has been a growing interest in the bearing of cognitive science on the perception and understanding of art. This interest has roots in tradition: historically, art, aesthetics, and vision science have often been linked. But the growth of knowledge in cognitive science has opened up new opportunities for understanding art and addressing philosophical questions. The converse is also true. The production, perception, and understanding of art are human capacities that can shed light on the workings of the mind and brain. This course considers questions such as: What is art? How do pictures represent? Does art express emotion? Why does art have a history? Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Same as L30 Phil 366

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

#### L64 PNP 3662 Primate Biology

This course takes a multi-faceted introductory approach to the primates, the closest relatives of human beings, by investigating anatomy, growth and development, reproduction, behavioral adaptations, ecology, geographic distribution, taxonomy and evolution. Emphasis will be placed not only on the apes and monkeys, but also on the lesser-known lemurs, lorises, bushbabies, tarsiers, and many others. The importance of primate biology to the discipline of anthropology will be discussed. Intended for students who have already taken Anthro 150A, and recommended for students who wish to take the more advanced 400-level courses on primates. Prerequisite: Anthro 150A or permission of instructor.

Same as L48 Anthro 3661

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

---

#### L64 PNP 3701 Introduction to Hispanic Linguistics

An introduction to the scientific study of the Spanish language, this course focuses on each of the major linguistic subsystems, including the sound system (phonetics and phonology), word formation (morphology), formation of phrases and sentences (syntax), and the use of the language to convey meaning (semantics and pragmatics). At each level of analysis, selected comparisons are made between Spanish and English and between Spanish and other languages. The course also examines different historical, regional, and social varieties of Spanish and situations of Spanish in contact with other languages.

Same as L38 Span 370

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

---

#### L64 PNP 380 Human Learning and Memory

A survey of issues related to the encoding, storage and retrieval of information in humans. Topics include memory improvement strategies, people with extraordinary memories, memory illusions and distortions, among other topics. Limited to 25 students. Prerequisite: Psych 100B/1000.

Same as L33 Psych 380

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

---

#### L64 PNP 390 PNP Reading Class

Each time this course is offered a book will be selected that does an exemplary job of bringing together insights and results from multiple disciplines in targeting an important topic. We will read and discuss the book and possibly a small amount of supplementary reading. A short presentation and paper will be required. Prerequisite: PNP Major standing

Credit 2 units. A&S IQ: SSC EN: S

---

#### L64 PNP 396 Linguistics Seminar: Pragmatics in Second Language Learning

Readings on a selected topic in theoretical linguistics with an emphasis on discussion, presentation, and writing. Prerequisite: varies with topic. Same as L44 Ling 396

Credit 3 units. A&S IQ: SSC EN: S

---

#### L64 PNP 402 The Physiology and Biophysics of Consciousness

This course will explore the questions surrounding the search to understand the biophysical substrate of consciousness. Some areas to be explored: 1. Can consciousness be addressed like any other biological property in the sense that it has evolved by natural selection and that some elements of it are present in simple model systems, such as the fruit fly? Can insight be gained studying simple model systems? 2. Where in the brain is consciousness? What is the pattern of neurological events that occurs during consciousness? Is brain activity generating consciousness localized or distributed? Does it involve interacting brain regions? Does brain activity generating consciousness migrate to different brain regions? 3. How does the dynamic core hypothesis of Edelman relate to these questions? What can functional brain imaging add to these questions? Are Gamma waves involved in higher mental activity, and do they promote synchronized firing of neurons from different brain areas? How does this relate to the binding problem? 4. How does the brain's ability to function as a computer relate to consciousness? In many respects the brain functions as a computer using electrical signals called Action Potentials. Action potentials in neuronal networks function in an analogous way as DC electrical impulses function in computer circuits. What is the output of computation in an electrical device? What are the theoretical limitations regarding what computation can achieve and ask whether electrical activity in the brain also has a fundamentally different purpose in addition to computation. 5. Is our knowledge of the physical world too primitive and incomplete to understand consciousness? The brain is an electronic device and consciousness clearly depends on its electrical activity. Yet, electrical forces are poorly understood, both in the context of classical physics and quantum physics. Will understanding consciousness have to wait for a unified theory that more accurately describes electrical forces? Prerequisites: Bio3411 or equivalent. College level physics, Some knowledge of computers. Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### L64 PNP 404 Laboratory of Neurophysiology

Neurophysiology is the study of living neurons. Students record electrical activity of cells to learn principles of the nervous system including sensory transduction and coding, intercellular communication and motor control. The course meets for 9 hours each week. Students may leave the lab for up to 2 hours. Prereq: Bio 3411 or Psych 4411 AND PERMISSION of Student Coordinator, Erin Gerrity. Bio 3411 may be taken concurrently.

Same as L41 Biol 404

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

---

#### L64 PNP 4041 Math Logic II

Godel's Incompleteness Theorem: its proof, its consequences, its reverberations. Prerequisite: Philosophy 403 or a strong background in mathematics.

Same as L30 Phil 404

Credit 3 units. A&S IQ: HUM Art: HUM

---

#### L64 PNP 406 Primate Ecology and Social Structure

Survey of the ecology, individual and social behavior, adaptations, and interactions of the major groups of primates. Emphasis on studies designed to examine the relationships among ecology, morphophysiology, and behavior. Methods used in collecting data on primates in the field. Prerequisite: Anth 150A or one 100-level biology course.

Same as L48 Anthro 406  
Credit 3 units. A&S IQ: NSM Art: NSM

---

#### **L64 PNP 4065 Advanced Philosophy of Language**

An advanced-level treatment of basic topics in the philosophy of language as this discipline is understood in the analytic tradition. The main positions and the problems they pose will be surveyed; focal themes include meaning, reference, and truth. The aim of the course is to help students develop effective expository techniques and to provide them with the necessary conceptual resources to analyze and criticize different theoretical views. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Same as L30 Phil 4065

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

#### **L64 PNP 408 Psychology of Language**

This course surveys current research and theory in psycholinguistics, covering the biological bases, cognitive bases, and learning of language. We consider studies of normal children and adults, the performance of individuals with various types of language disorders, and computer simulations of language processes. Topics range from the perception and production of speech sounds to the management of conversations. Each student will carry out an original research project on some aspect of psycholinguistics. Prereq: Ling 170D and Psych 100B

Same as L33 Psych 433

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

#### **L64 PNP 4140 Topics in Embodied Communication**

This course is about listening. We will begin by mediated and unmediated listening with the human auditory system and continue into an exploration of multi-modal listening, focusing on vibration and on somatic attention. We will work in the "studio," which will include a music studio, a dance studio, and the environment. Our investigation will include the study of sensing in more-than-human organisms as well as theoretical perspectives from sound studies, critical improvisation and history of science. The course will encourage the perspective that the practice of listening is a political act of tending to the invisible, the non-normative, and the incomplete.

Same as L15 Drama 4140

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

---

#### **L64 PNP 4141 Advanced Epistemology**

Competing theories of knowledge and belief justification will be considered. Careful attention will be given to selected problems such as skepticism, certainty, foundations, coherence, perception, induction. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Same as L30 Phil 4141

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

#### **L64 PNP 4142 Advanced Metaphysics**

Through readings from both classical and contemporary sources, a single traditional metaphysical concern will be made the subject of careful and detailed analytic attention. Possible topics include such concepts as substance, category, cause, identity, reality, and possibility, and such positions as metaphysical realism, idealism, materialism, relativism, and irrealism. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Same as L30 Phil 4142

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

#### **L64 PNP 418 Current Controversies in Cognitive Science**

An advanced survey of current debates in cognitive science with an emphasis on the philosophical issues raised by these debates. Topics may include: evolutionary psychology; innateness and neural plasticity; perception and action; consciousness; connectionism; robotics; embodied cognition; moral reason; emergence and artificial life; concepts and content; animal cognition. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM EN: H

---

#### **L64 PNP 419 Philosophy of Psychology**

An investigation of the philosophical presuppositions and implications of various traditions in psychology, including behaviorism, Gestalt, and cognitivism, with a special emphasis on the development of the information processing approach of contemporary cognitivism. The conception of psychological phenomena, data, and explanation central to each of these traditions will be examined, and typical topics will include the debates between propositional and imagistic models of representation, different accounts of concepts and categorization, and the relation of psychology to ethics. Prerequisites: one previous course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Same as L30 Phil 419

Credit 3 units. A&S IQ: HUM Art: HUM

---

#### **L64 PNP 4190 Primate Behavior**

Discussion and analysis of recent research on the social behavior of nonhuman primates. Data from both field and laboratory study. Prerequisite: Anth 406, or permission of instructor.

Same as L48 Anthro 419

Credit 3 units. A&S IQ: NSM Art: NSM BU: BA

---

#### **L64 PNP 4192 Primate Cognition**

This course will investigate historical and current views regarding the cognitive capacities of non-human primates, and the extent to which these abilities are shared with humans. Topics for this class will include: social cognition, problem-solving, tool use, culture, communication, theory of mind, deception, self-recognition, imitation, and numerical cognition. The classes will involve discussion and critical evaluation of theory and methods in this challenging and exciting area of primate cognitive research.

Same as L48 Anthro 4191

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L64 PNP 4210 Topics in Advanced Philosophy of Science:**

##### **Scientific Explanation**

This course will vary in topics related to Philosophy of Science from semester to semester. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Same as L30 Phil 4210

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

#### **L64 PNP 426 Theories of Concepts**

Concepts are the building blocks of thought. They are implicated in just about every cognitive task. Beyond that, there is little consensus. What information do concepts encode? How are they acquired? How are they combined to form thoughts? How are they related to perception and imagery? Each of these questions has been answered in numerous ways. In this course, we will explore competing theories of concepts that have been proposed by philosophers, psychologists, and other cognitive scientists. No prior acquaintance with these issues is required. Prerequisites: one previous course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Same as L30 Phil 426

Credit 3 units. A&S IQ: HUM Art: HUM

---

**L64 PNP 4302 Cognitive Psychology Applied to Education**

This course is intended to cover topics in the cognitive psychology of human memory, conceptual learning, and comprehension with special focus on areas, theory, and research that have potential application to education. Thus, the course will provide selective coverage of theoretical and empirical work in cognitive psychology that provides potential to inform and improve educational practice. The applicability of these themes will be explicitly developed and evaluated through the primary research literature using educationally oriented experimental paradigms. The course is expected to be of interest and benefit to education majors and to psychology majors interested in cognitive psychology and its applications. PREREQ: Junior/Senior status, 9 units in Psychology and Psych 100B OR Junior/Senior status, 9 units in Education and Psych 100B.

Same as L33 Psych 4302

Credit 3 units. A&S IQ: SSC EN: S

---

**L64 PNP 4332 Cognition and Computation**

This course introduces students to some of the key frameworks for thinking about the mind in computational terms. We will be looking at some basic topics in the theory of computation, in addition to considering philosophical issues raised by computational models of cognitive processes. This course is required for graduate students in the PNP Ph.D. program. Prerequisites: At least two 400-level PNP courses crosslisted in Philosophy.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L64 PNP 466 Second Language Acquisition**

There are many ways in which a second language can be learned: from infancy as the child of bilingual parents, or later through formal instruction, immersion in a new culture, or in a particular work or social situation. This class is an inquiry into the processes by which acquisition occurs. Topics include the nature of language learning within the scope of other types of human learning; the relationship between first and second language acquisition; the role of linguistic, cognitive, and sociocultural factors; insights gained from analyzing learners' errors; key concepts such as interlanguage and communicative competence; bilingualism; the optimal age for second language acquisition; and a critical appraisal of different theories of second language acquisition. Both theoretical and instructional implications of second language acquisition research are considered. This course can be used towards certification in TESOL and is a required course for the Graduate Certificate in Language Instruction. Prerequisite: Ling 170D or equivalent is recommended, especially for undergraduates, but is not required.

Same as L44 Ling 466

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L64 PNP 467 Grammar and Vocabulary Acquisition**

This course examines theoretical and instructional implications of research on grammar and vocabulary acquisition. Topics include making form-meaning connections during language learning; developmental stages; the role of input and input processing; explicit and implicit methods of grammar instruction; pertinent factors in vocabulary acquisition, such a learning context and processing resource allocation; and comparisons of incidental and direct vocabulary instruction techniques. Major theories of language acquisition (e.g., nativism, emergentism) are critically examined in light of the research presented, and research findings are applied to instructional practices.

Same as L38 Span 467

Credit 3 units. A&S IQ: LCD BU: BA EN: H

---

**L64 PNP 4691 Second Language Reading and Writing: Theory, Research and Practice**

This course, taught in English, extends issues in second language literacy beyond pedagogy by examining the wide range of theoretical and research issues, both historical and current. Literacy acquisition among second language learners involves a number of variables including both cognitive and social factors. Topics to be discussed in class include literacy and social power, universal cognitive operations, individual learner differences, text types and literary forms, and the extent to which reading and writing are interrelated. Students will discuss how to bridge research and practice, and they will create reading and writing activities driven by theory and empirical investigations. This course is a required course for the for the undergraduate minor in Applied Linguistics and an elective for the Graduate Certificate in Language Instruction. This course carries the Social and Behavioral Sciences attribute.

Same as L38 Span 4691

Credit 3 units. A&S IQ: SSC EN: S

---

**L64 PNP 494 Behavioral Psychology Readings Group**

This weekly journal-style readings course provides the opportunity to read and discuss seminal as well as current writings on the conceptual aspects of behavioral psychology and relevant research. Points of contact among behaviorism, cognitivism, and neuroscience and the natural lines of fracture will be examined. Prerequisites: Psych 100B and one of the following: Psych 361, Psych 360, or a Philosophy course.

Same as L33 Psych 494

Credit 1 unit. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L64 PNP 495 PNP Seminar**

Subject varies per semester. Not always offered as writing intensive, refer to individual semester listing. Prerequisite: A 300 level Philosophy course (Phil/PNP 315 is recommended); and PNP Major standing or approval of Instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L64 PNP 495W PNP Seminar: Writing-Intensive**

Subject varies per semester. Fulfills Writing Intensive (WI) requirement. Prerequisite: A 300 level Philosophy course (Phil/PNP 315 is recommended); and PNP Major standing or approval of Instructor.

Credit 3 units. A&S IQ: SSC, WI EN: S

---

**L64 PNP 496 PNP Seminar**

Subject varies each semester. Prerequisites: One 300-level philosophy course (Phil 315 or PNP 315 is recommended) as well as PNP major standing or approval of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L64 PNP 499 Study for Honors**

Prerequisite: Senior standing, a grade point average of 3.50 overall, and permission of the department.

Credit 3 units. EN: S

# Philosophy- Neuroscience- Psychology Major, Cognitive Neuroscience Concentration

## Program Requirements

- **Total units required:**\* 29-32 for primary major, 24-26 for secondary major

\* Several courses required for this major have prerequisite courses, which are not included in the major's total units required. Students will need to plan accordingly to fulfill the necessary prerequisites.

## Required Courses

### Core Undergraduate Requirements for Philosophy-Neuroscience-Psychology

All PNP majors, regardless of concentration, complete an entry sequence and core requirements:

#### a. Entry Sequence

Students choose one of the following two sequences:

##### PNP Sequence

Code	Title	Units
PNP 200	Introduction Cognitive Science	3
PNP 201 or Psych 301	Inquiry in the Cognitive Sciences Experimental Psychology	3-4

##### Mind, Brain, Behavior Sequence (MBB) Sequence

Code	Title	Units
FYP 120A	Amp: Intro to Study of the Mind-Brain: Psychological, Biological, & Philosophical Perspectives	3
FYP 122 or PNP 200	Ampersand: Pathfinder - A Sense of Place: Discovering the Environment of St. Louis Introduction Cognitive Science	3

#### b. Core Philosophy Requirements

##### Prerequisite:

Code	Title	Units
Phil 100G or Phil 102 or Phil 120F or Phil 125C	Logic and Critical Analysis Introduction to Scientific Reasoning Problems in Philosophy Great Philosophers	3

#### Upper Division Requirements:

Majors must take two courses at the 300 or 400 level:

- One course must be either PNP 306 Philosophy of Language or PNP 315 Philosophy of Mind.
- One course must be chosen from the following list:

Code	Title	Units
Music 3221	Music Cognition	3
Phil 3001	Philosophy of Medicine	3
Phil 3113	Theory of Knowledge	3
Phil 339F	Philosophy of the Arts	3
Phil 3481	Introduction to Metaphysics	3
Phil 349C	Descartes to Hume	3
Phil 361	Philosophy of Emotions	3
Phil 366	Art and the Mind-Brain	3
Phil 390	Philosophical Writing (upon approval of subject matter, consult PNP office for each semester)	3
Phil 403	Mathematical Logic I	3
Phil 404	Mathematical Logic II	3
Phil 405	Philosophical Logic	3
Phil 4051	Philosophy of Logic	3
Phil 4061	Topics in the Philosophy of Language	3
Phil 410	Theories of Perception	3
Phil 4212	Philosophy of Neuroscience	3
Phil 423	Philosophy of Biological Science	3
PNP 301	Symbolic Logic	3
PNP 306	Philosophy of Language	3
PNP 315	Philosophy of Mind	3
PNP 316	Mind and Morals	3
PNP 321	Philosophy of Science	3
PNP 3581	Conceptual Foundations of Modern Science	3
PNP 4065	Advanced Philosophy of Language	3
PNP 4141	Advanced Epistemology	3
PNP 4142	Advanced Metaphysics	3
PNP 418	Current Controversies in Cognitive Science	3
PNP 419	Philosophy of Psychology	3
PNP 4210	Topics in Advanced Philosophy of Science: Scientific Explanation	3
PNP 426	Theories of Concepts	3
PNP 4332	Cognition and Computation	3
PNP 495	PNP Seminar	3
PNP 496	PNP Seminar	3
Phil 322	Philosophy of Biology	3

## c. Core Psychological & Brain Sciences Requirements

### Prerequisite:

Code	Title	Units
Psych 100B	Introduction to Psychology	3

### Upper Division Requirements:

Majors must take two courses at the 300 or 400 level:

- Unless the student has completed FYP 120A with a grade of B- or higher, they must take PNP 360 Cognitive Psychology or PNP 408 Psychology of Language
- One course must be chosen from the following list:

Code	Title	Units
PNP 3151	Introduction to Social Psychology	3
PNP 3211	Developmental Psychology	3
PNP 330	Sensation and Perception	3
PNP 3401	Biological Psychology	3
PNP 3451	Genes, Environment, and Human Behavior	3
PNP 3531	Psychology of Personality	3
PNP 3541	Psychopathology and Mental Health	3
PNP 360	Cognitive Psychology	3
PNP 361	Psychology of Learning	3
PNP 362	The Biological Basis of Human Behavior	3
PNP 380	Human Learning and Memory	3
PNP 408	Psychology of Language	3
PNP 4302	Cognitive Psychology Applied to Education	3
PNP 495	PNP Seminar	3
Psych 300	Introduction to Psychological Statistics	3
Psych 301	Experimental Psychology	4
Psych 326	Introduction to the Psychology of Aging	3
Psych 357	Introduction to Clinical Psychology	3
Psych 358	Language Acquisition	3
Psych 396	Psychological Dynamics of Empathy	3
Psych 4182	Perception, Thought, and Action	3
Psych 4301	Contemporary Topics in Cognitive Development	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 4651	History and Modern Systems of Psychology	3

## Courses Required for the Cognitive Neuroscience Concentration

### Prerequisites:

Code	Title	Units
Biol 2960	Principles of Biology I *	3-4
or Psych 3401	Biological Psychology	

\* Permission of the instructor may be required before registering for Psych 3401 Biological Psychology.

### Upper Division Requirements:

Students must take the following two courses:

Code	Title	Units
Biol 3411	Principles of the Nervous System	3
Psych 3604	Cognitive Neuroscience	3

## Capstone

The capstone is required for honors students and first majors; it is recommended for second majors. It consists of one of the following:

- A PNP honors project (PNP 499, 6 units; requires PNP honors form to be filled out and approved by honors coordinator)
- The 2-unit PNP 390 PNP Reading Class plus PNP 495 or PNP 496
- The 2-unit PNP 390 PNP Reading Class plus 3 advanced units of independent study (PNP 500 Independent Work). The independent study details are available on the PNP website.

# Philosophy- Neuroscience-Psychology Major, Language Cognition and Culture Concentration

## Program Requirements

- **Total units required:**\* 29-32 for primary major, 24-26 for secondary major
- Courses must be passed with at least a C-
- Up to 6 units can be transferred from other institutions and/or study abroad

\* Several courses required for this major have prerequisite courses, which are not included in the major's total units required. Students will need to plan accordingly to fulfill the necessary prerequisites.

## Required Courses

### Core Undergraduate Requirements for Philosophy-Neuroscience-Psychology

All PNP majors, regardless of concentration, complete an entry sequence and core requirements:

#### a. Entry Sequence

Students choose one of the following two sequences:

##### PNP Sequence

Code	Title	Units
PNP 200	Introduction Cognitive Science	3
PNP 201	Inquiry in the Cognitive Sciences	3-4
or Psych 301	Experimental Psychology	

##### Mind, Brain, Behavior Sequence (MBB) Sequence

Code	Title	Units
FYP 120A	Amp: Intro to Study of the Mind-Brain: Psychological, Biological, & Philosophical Perspectives	3
FYP 122	Ampersand: Pathfinder - A Sense of Place: Discovering the Environment of St. Louis	3
or PNP 200	Introduction Cognitive Science	

#### b. Core Philosophy Requirements

##### Prerequisite

Code	Title	Units
Phil 100G	Logic and Critical Analysis	3
or Phil 102	Introduction to Scientific Reasoning	
or Phil 120F	Problems in Philosophy	
or Phil 125C	Great Philosophers	

##### Upper Division Requirements

Majors must take two courses at the 300 or 400 level:

- One course must be either PNP 306 Philosophy of Language or PNP 315 Philosophy of Mind.
- One course must be chosen from the following list:

Code	Title	Units
Music 3221	Music Cognition	3
Phil 3001	Philosophy of Medicine	3
Phil 3113	Theory of Knowledge	3
Phil 339F	Philosophy of the Arts	3
Phil 3481	Introduction to Metaphysics	3
Phil 349C	Descartes to Hume	3

Phil 361	Philosophy of Emotions	3
Phil 366	Art and the Mind-Brain	3
Phil 390	Philosophical Writing (upon approval of subject matter, consult PNP office for each semester)	3
Phil 403	Mathematical Logic I	3
Phil 404	Mathematical Logic II	3
Phil 405	Philosophical Logic	3
Phil 4051	Philosophy of Logic	3
Phil 4061	Topics in the Philosophy of Language	3
Phil 410	Theories of Perception	3
Phil 4212	Philosophy of Neuroscience	3
Phil 423	Philosophy of Biological Science	3
PNP 301	Symbolic Logic	3
PNP 306	Philosophy of Language	3
PNP 315	Philosophy of Mind	3
PNP 316	Mind and Morals	3
PNP 321	Philosophy of Science	3
PNP 3581	Conceptual Foundations of Modern Science	3
PNP 4065	Advanced Philosophy of Language	3
PNP 4141	Advanced Epistemology	3
PNP 4142	Advanced Metaphysics	3
PNP 418	Current Controversies in Cognitive Science	3
PNP 419	Philosophy of Psychology	3
PNP 4210	Topics in Advanced Philosophy of Science: Scientific Explanation	3
PNP 426	Theories of Concepts	3
PNP 4332	Cognition and Computation	3
PNP 495	PNP Seminar	3
PNP 496	PNP Seminar	3
Phil 322	Philosophy of Biology	3

#### c. Core Psychological & Brain Sciences Requirements

##### Prerequisite

Code	Title	Units
Psych 100B	Introduction to Psychology	3

##### Upper Division Requirements

Majors must take two courses at the 300 or 400 level:

- Unless the student has completed FYP 120A with a grade of B- or higher, they must take PNP 360 Cognitive Psychology or PNP 408 Psychology of Language
- One course must be chosen from the following list:

Code	Title	Units
PNP 3151	Introduction to Social Psychology	3
PNP 3211	Developmental Psychology	3
PNP 330	Sensation and Perception	3
PNP 3401	Biological Psychology	3
PNP 3451	Genes, Environment, and Human Behavior	3
PNP 3531	Psychology of Personality	3
PNP 3541	Psychopathology and Mental Health	3
PNP 360	Cognitive Psychology	3
PNP 361	Psychology of Learning	3
PNP 362	The Biological Basis of Human Behavior	3
PNP 380	Human Learning and Memory	3
PNP 408	Psychology of Language	3
PNP 4302	Cognitive Psychology Applied to Education	3
PNP 495	PNP Seminar	3
Psych 300	Introduction to Psychological Statistics	3
Psych 301	Experimental Psychology	4
Psych 326	Introduction to the Psychology of Aging	3
Psych 357	Introduction to Clinical Psychology	3
Psych 358	Language Acquisition	3
Psych 396	Psychological Dynamics of Empathy	3
Psych 4182	Perception, Thought, and Action	3
Psych 4301	Contemporary Topics in Cognitive Development	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 4651	History and Modern Systems of Psychology	3

## Courses Required for the Language, Cognition and Culture Concentration Prerequisites

Code	Title	Units
Anthro 170D	Introduction to Linguistics	3
Anthro 150A	Introduction to Human Evolution	3

## Upper Division Requirements

Majors must take two courses at the 300 or 400 level, chosen from the following list:

Code	Title	Units
Anthro 3383	Cognition and Culture	3
Anthro 3386	Language, Culture and Society	3
Anthro 3660	Primate Ecology, Biology, and Behavior	3
Drama 4140	Topics in Embodied Communication	3
Ling 312	Phonetics	3
Ling 339	Introduction to Sociolinguistics	3
Ling 341	Linguistic Diversity in the United States	3

PNP 301	Symbolic Logic	3
PNP 306	Philosophy of Language	3
PNP 309	Syntactic Analysis	3
PNP 3111	Introduction to Semantics	3
PNP 313	Phonological Analysis	3
PNP 3171	Introduction to Computational Linguistics	3
PNP 320	Historical and Comparative Linguistics	3
PNP 362	The Biological Basis of Human Behavior	3
PNP 3662	Primate Biology	3
PNP 3701	Introduction to Hispanic Linguistics	3
PNP 396	Linguistics Seminar: Pragmatics in Second Language Learning	3
PNP 406	Primate Ecology and Social Structure	3
PNP 4065	Advanced Philosophy of Language	3
PNP 408	Psychology of Language	3
PNP 4192	Primate Cognition	3
PNP 466	Second Language Acquisition	3
PNP 467	Grammar and Vocabulary Acquisition	3
Psych 358	Language Acquisition	3
Psych 4099	Human Evolutionary Psychology	3
Psych 4631	Introduction to Computational Cognitive Science	3
Span 3202	Debating Cultures: How Spanish Works	3
Span 413	Linguistics and Language Learning	3
Span 416	Introduction to Hispanic Linguistics	3
Span 469	Reading and Writing in a Second Language	3

## Capstone

The capstone is required for honors students and first majors; it is recommended for second majors. It consists of one of the following:

- A PNP honors project (PNP 499, 6 units; requires PNP honors form to be filled out and approved by honors coordinator)
- The 2-unit PNP 390 PNP Reading Class plus PNP 495 or PNP 496
- The 2-unit PNP 390 PNP Reading Class plus 3 advanced units of independent study (PNP 500 Independent Work). The independent study details are available on the PNP website.

# Philosophy- Neuroscience-Psychology Minor

## Program Requirements

- **Total units required:** 15 units, 9 of which must be at the 300 level or above
- Courses must be passed with at least a C-

### Required Courses

- A 6-unit introductory sequence:

Code	Title	Units
PNP 200 & PNP 201	Introduction Cognitive Science and Inquiry in the Cognitive Sciences	6
--or--		
FYP 120A & FYP 122A	Amp: Intro to Study of the Mind-Brain: Psychological, Biological, & Philosophical Perspectives and Ampersand: Introduction to the Study of the Mind Brain II	6

- 3 units of Philosophy:

Code	Title	Units
PNP 306 or Phil 306G	Philosophy of Language	3
--or--		
PNP 315 or Phil 315	Philosophy of Mind	3

- 3 units of Neuroscience:

Code	Title	Units
PNP 3411 or Biol 3411	Principles of the Nervous System	3
--or--		
Psych 3604	Cognitive Neuroscience	3

- 3 units of Psychology:

Code	Title	Units
PNP 360 or Psych 360	Cognitive Psychology	3
--or--		
PNP 408	Psychology of Language	3

## Additional Information

Psych 100B is the prerequisite for all psychological & brain science courses at the 300 level and above. Note that no more than 6 units counted toward a minor in PNP may be transferred into Washington University or earned abroad.

Contact: PNP Office  
Phone: 314-935-4297  
Email: [pnp@wustl.edu](mailto:pnp@wustl.edu)  
Website: <http://pnp.artsci.wustl.edu>

## Physics

Physics is the discipline that deals with the most fundamental aspects of our universe, such as the properties of atoms, nuclei, and elementary particles; the nature of the forces between them; and the collective behavior of atoms in solids, liquids, and gases. It deals with the entire universe, from its birth to its ultimate fate. At the same time, physics provides the tools that help us to understand extremely complex everyday things, like the behavior of sand piles, the strength of materials, or processes in the brain. Physics seeks to discover and understand the mathematical rules that govern the behavior of things. Its early successes in comprehending motion, thermodynamics, electricity and magnetism provided a foundation upon which other physical sciences have grown.

For students planning a career in science and technology or intending to pursue graduate studies in physics, astronomy, Earth sciences, environmental sciences, medical physics, meteorology, or oceanography, a major in physics provides a solid foundation. The program is sufficiently flexible to allow students to combine a physics major with a second major in chemistry, mathematics, or engineering; with pre-medical studies; or with other disciplines in the humanities and social sciences. In addition to the fundamentals of physics, the program is designed to give students a broad range of skills in laboratory techniques, critical thinking, computer use, and teamwork, which will serve them well in their chosen careers. In consultation with a faculty advisor, students may design a program of study to meet individual goals and interests. Physics majors are strongly encouraged to participate in physics research projects directed by faculty members.

**Introductory Physics:** The Physics 191–Physics 192 and Physics 191L–Physics 192L sequence is a calculus-based introduction to physics intended for adequately prepared students interested in majoring in science or engineering or undertaking pre-medical studies. Physics 191 Physics I fulfills the requirements for the Sam Fox School. The sequence uses interactive, active-learning techniques. Calculus I (Math 131) is a corequisite, although previous or concurrent enrollment in Calculus II (Math 132) is strongly recommended.

**Focused Physics:** The Physics 193–Physics 194 and Physics 193L–Physics 194L sequence is an advanced calculus-based introduction to physics for students with previous or concurrent enrollment in Calculus II (Math 132). This sequence is particularly addressed to students considering a physics- or mathematics-heavy science or engineering major.

The department also offers several other courses of general interest to the nonscience student. In most cases, these courses have no prerequisites.

## Faculty

### Chair

#### Henric Krawczynski

Wilfred R. and Ann Lee Konneker Distinguished Professor in Physics  
PhD, University of Hamburg  
Experimental high-energy astrophysics

### Associate Chair

#### Saori Pastore

Associate Professor  
PhD, Old Dominion University  
Theoretical nuclear physics

### Director of Graduate Studies

#### Alexander Seidel

Professor  
PhD, Massachusetts Institute of Technology  
Theoretical condensed matter physics

### Director of Undergraduate Studies

#### Manel Errando

Assistant Professor  
PhD, Universitat Autònoma de Barcelona  
High-energy astrophysics, black holes, active galactic nuclei

### Department Faculty

#### Mark Alford

Professor  
PhD, Harvard University  
Nuclear/particle physics

#### Sachiko Amari

Research Faculty  
PhD, Kobe University  
Cosmochemistry, presolar grains

#### Carl M. Bender

Professor Emeriti  
PhD, Harvard University

#### Claude W. Bernard

Professor Emeriti  
PhD, Harvard University

#### Thomas Bernatowicz

Professor Emeriti  
PhD, Washington University

#### Robert Binns

Professor Emeriti  
PhD, Colorado State University

#### James H. Buckley

Professor  
PhD, University of Chicago  
Experimental high-energy astrophysics

#### Anders E. Carlsson

Professor Emeriti  
PhD, Harvard University  
Biophysics

#### Yuran (Alex) Chen

Assistant Professor  
PhD, Columbia University  
High-energy astrophysics, neutron stars, black holes, and plasma physics

#### John W. Clark

Professor Emeriti  
PhD, Washington University

#### Mark S. Conradi

Professor Emeriti  
PhD, Washington University

#### Ramanath Cowsik

James S. McDonnell Professor of Space Sciences  
PhD, University of Bombay  
Astrophysics and space sciences

#### Tansu Daylan

Assistant Professor  
PhD, Harvard University  
Exoplanets, dark matter, and astrostatistics

#### Bhupal Dev

Associate Professor  
PhD, University of Maryland, College Park  
Theoretical astroparticle physics and cosmology

#### Willem H. Dickhoff

Professor  
PhD, Free University, Amsterdam  
Many-body theory

#### Francesc Ferrer

Associate Professor  
PhD, Universitat Autònoma de Barcelona  
Theoretical astroparticle physics and cosmology

#### Jeffrey Gillis-Davis

Research Professor  
PhD, Rice University  
Experimental astrophysics

#### Patrick C. Gibbons

Professor Emeriti  
PhD, Harvard University

#### Erik Henriksen

Associate Professor  
PhD, Columbia University  
Condensed matter and materials science

**Charles M. Hohenberg**

Professor Emeriti  
PhD, University of California, Berkeley

**Mairin Hynes**

Teaching Professor  
PhD, Washington University  
Physics education, Pedagogy, space sciences

**Martin H. Israel**

Professor Emeriti  
PhD, California Institute of Technology

**Jonathan I. Katz**

Professor  
PhD, Cornell University  
Theoretical astrophysics

**Kenneth Kelton**

Arthur Holly Compton Professor Physics Emeriti  
PhD, Harvard University  
Silicate Glasses, amorphous materials, metallic liquids

**Kazimierz Luszczynski**

Professor Emeriti  
PhD, University of London

**Augusto Medeiros da Rosa**

Lecturer  
PhD, Washington University  
Cosmology, particle physics

**Alexander Meshik**

Research Professor  
PhD, Vernadsky Institute of Cosmochemistry  
Astrophysics, solar winds, nano-diamonds

**James G. Miller**

Professor Emeriti  
PhD, Washington University

**Shankar Mukherji**

Assistant Professor  
PhD, Massachusetts Institute of Technology/Harvard Medical School  
Systems cell biology

**Kater Murch**

Charles M. Hohenberg Professor in Experimental Physics  
PhD, University of California, Berkeley  
Quantum information and materials

**Michael Nowak**

Research Professor  
PhD, Stanford University  
High energy astrophysics, compact objects

**Zohar Nussinov**

Professor  
PhD, University of California, Los Angeles  
Theoretical condensed matter physics

**Michael C. Ogilvie**

Professor  
PhD, Brown University  
Theoretical particle physics

**Ryan Ogliore**

Associate Professor  
PhD, California Institute of Technology  
Cosmochemistry and planetary science

**Maria Piarulli**

Associate Professor  
PhD, Old Dominion University  
Theoretical nuclear physics

**Olga Pravdivtseva**

Research Associate Professor  
PhD, Vernadsky Institute, Russian Academy of Sciences  
Cosmochemistry, early solar system chronology

**Sheng Ran**

Assistant Professor  
PhD, Iowa State University  
Condensed matter and quantum materials

**Brian Rauch**

Research Associate Professor  
PhD, Washington University  
Cosmic ray astrophysics, neutrinos, gamma rays

**James S. Schilling**

Professor Emeriti  
PhD, University of Wisconsin-Madison

**Lee G. Sobotka**

Joint Professor  
PhD, University of California, Berkeley  
(Chemistry)  
Experimental nuclear physics

**Stuart A. Solin**

Professor Emeriti  
PhD, Purdue University

**Wai Mo Suen**

Professor Emeriti  
PhD, California Institute of Technology

**Mikhail Tikhonov**

Assistant Professor  
PhD, Princeton University  
Microbiome, microbial ecology, and evolution

**Xi Wang**

Assistant Professor  
PhD, Florida State University  
Quantum Information and materials

**Ralf Wessel**

Professor  
PhD, University of Cambridge  
Biophysics

### Clifford Will

Professor Emeriti  
PhD, California Institute of Technology

### Li Yang

Albert Gordon Hill Professor in Physics  
PhD, Georgia Institute of Technology  
Condensed matter theory and computational materials physics

### Yajie Yuan

Assistant Professor  
PhD, Stanford University  
Theoretical high-energy astrophysics

### Chuanwei Zhang

Professor  
PhD, University of Texas at Austin  
Quantum Information

### Chong Zu

Assistant Professor  
PhD, Tsinghua University  
Atomic, molecular and optical physics; condensed matter; and quantum information

## Majors

- Astrophysics Major (p. 901)
- Physics Major (p. 903)
- Physics Major, Biophysics Specialization (p. 905)

## Minors

- Astrophysics and Astroparticle Physics Minor (p. 906)
- Biomedical Physics Minor (p. 907)
- Physics Minor (p. 907)

## Courses

---

### L31 Physics 1001 First-Year Seminar: All About Black Holes

Black holes are the Universe's most extreme objects: they are so massive and compact that gravity bends space and time into a knot. The signature property of a black hole is that you can get in, but not out. In this first-year seminar, we discuss what is currently known about black holes, starting from Einstein's theories about space, time, and gravity, through the first observational evidence for black holes, to the latest images of the shadows cast by black holes taken with the largest telescopes on earth. This class is designed to bend your mind when figuring out why clocks run slower when approaching the edge of a black hole, what could be at the center of a black hole or even at the other side. At the same time, we will discuss the inner workings of the most advanced telescopes that astronomers have developed to study black holes, and the strategies astronomers employ to develop ever more sensitive instruments. Also expect a fair bit of astronomy in this class, when we discuss how black holes form, when and how they grow, and which roles they play in cosmic eco-systems such as the Milky Way Galaxy. This first-year seminar adopts a flipped class/socratic discussion structure. The students are asked to read a wide variety

of texts, including texts from the current literature, and to present and to discuss some of the material in class. The class assumes no background in math; at the same time, we will discuss some of the math that brings Einstein's theories of space and time to life.  
Credit 3 units. A&S: FYS A&S IQ: NSM, AN Art: NSM

---

### L31 Physics 1210 Ampersand: Gateway Expeditions Into Exoplanets

Discovery and characterization of planets beyond our Solar System have transformed our view of the cosmos and our home planet, Earth. These alien worlds, referred to as exoplanets, are opportune cosmic laboratories for improving our understanding of the formation of planets and the origin of life. Many of these worlds are highly dissimilar to those in our Solar System, requiring significant paradigm shifts in modeling the physical processes that govern them. In line with this rigorous exploration, exoplanet research has recently become a significant branch of astrophysics. Gateway Expeditions into Exoplanets is a new introductory, non-calculus course that provides an introduction to exoplanets, covering their formation and evolution, diverse properties, and potential to support life. The course includes assignments and a class project featuring data analysis and modeling in exoplanet research, a student-led tournament between exoplanets called ExoCup, occasional Socratic discussions in an inverted classroom setting, and a trip to Yerkes Observatory to witness the history of developments in astronomy leading to the exoplanet revolution. The course will function as the first part of a new Ampersand Program, "Gateway Expeditions into Exoplanets and Black Holes". There is no prerequisite for taking this course.  
Credit 3 units. A&S: AMP A&S IQ: NSM, AN

---

### L31 Physics 125A Solar System Astronomy

Designed for the nonscience major, this course deals with the planets, their moons and rings, comets, meteorites and interplanetary dust particles. In order to understand both classical astronomy and the results obtained from modern telescopes and the space program, basic scientific ideas (including optics and the laws of motion) are reviewed first. There will also some discussion of astronomical history to show how we have arrived at our present ideas of the structure and evolution of the solar system. Prerequisite: High school algebra and trigonometry or concurrent enrollment in Math 131  
Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

### L31 Physics 126A Stars, Galaxies, and Cosmology

Intended as a general survey for the nonscience major. Topics include the structure and evolution of stars, such as red giants, white dwarfs, neutron stars, pulsars, and black holes; galaxies and quasars, cosmology and the big bang theory. Prerequisite: high school algebra and trigonometry, or concurrent enrollment in Math 131.  
Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

### L31 Physics 130 Introduction to Mathematical and Computational Methods in Physics

This is a learning by doing course whose objective is for the students to learn practical methods for solving physics problems using mathematical and computational tools. The course gives an introduction to applied mathematics and basic computational tools and techniques used in contemporary scientific fields of research. The format of the course is highly interactive. Each course unit will be devoted to a specific activity, including a lecture from the instructor, working groups on solving analytical problems, and working groups on coding with Python. Prerequisite: Previous or concurrent Calculus I is recommended.  
Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

---

### L31 Physics 141 Selected Topics in Physics I

Topics of special interest (e.g., superconductivity, quasicrystals, neural networks, chaos, etc.) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form <https://physics.wustl.edu/independent-study>

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L31 Physics 142 Selected Topics in Physics I

Topics of special interest (e.g., holography, relativity, nuclear power, computer applications in physics, etc.) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure the instructor's consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form <https://physics.wustl.edu/independent-study>

Credit variable, maximum 3 units. A&S IQ: NSM Art: NSM BU: SCI

---

### L31 Physics 173 Physics of Sustainable Energy

Introduction to the physics of climate change and sustainable energy. This course is intended for students with little previous exposure to science or math. We will learn about the value of rough estimates and simple calculations. We will apply this approach to energy and power; atoms and heat; the history and basic modeling of earth's climate; energy sources including fossil fuels, nuclear, and renewables. No prerequisites.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI EN: SU

---

### L31 Physics 191 Physics I

Calculus-based introduction to the concepts, laws, and structure of physics. Topics include kinematics, Newton's laws, energy, linear momentum, angular momentum, the conservation laws, gravitational force, harmonic motion, wave motion and interference, sound, and special relativity. A daily regimen of homework and reading as well as weekly homework assignments, small-group problem-solving exercises, and active class participation are integral parts of this course. Evening exams, at which attendance is required, will be given from 6-9 p.m. on Prerequisite: previous or concurrent enrollment in Calculus I (Math 131) is required; previous or concurrent enrollment in Calculus II (Math 132) strongly recommended. Taking Physics 191 as a first-year student is compatible with on-time completion of all pre-health requirements.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

### L31 Physics 191F Physics I - First-Years Only

This section of Physics 191 is for rising first-years only. Any non-first-year student enrolled in this section will be removed from the course. Non-first-year students should enroll in Physics 191U. Calculus-based introduction to the concepts, laws, and structure of physics. Topics include kinematics, Newton's laws, energy, linear momentum, angular momentum, the conservation laws, gravitational force, harmonic motion, wave motion and interference, sound, and special relativity. Two evening exams required, followed by a required final exam. Prerequisite: previous or concurrent enrollment in Calculus I (Math 131) is required; previous or concurrent enrollment in Calculus II (Math 132) strongly recommended. Taking Physics 191 as a first-year student is compatible with on-time completion of all pre-health requirements.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

### L31 Physics 191L Physics I Laboratory

Laboratory experience is an integral component of Introductory Physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Required prerequisite or co-requisite: Physics 191. Students may not receive credit for Physics 191L if they have already received credit for 117A or 197

Credit 1 unit. Arch: NSM

---

### L31 Physics 191U Physics I - Sophomores, Juniors, and Seniors Only

This section of Physics 191 is for rising seniors, juniors, and sophomores only. Any first-year student enrolled in this section will be removed from the course. First-year students should enroll in Physics 191F. Calculus-based introduction to the concepts, laws, and structure of physics. Topics include kinematics, Newton's laws, energy, linear momentum, angular momentum, the conservation laws, gravitational force, harmonic motion, wave motion and interference, sound, and special relativity. Two evening exams required, followed by a required final exam. Prerequisite: previous or concurrent enrollment in Calculus I (Math 131) is required; previous or concurrent enrollment in Calculus II (Math 132) strongly recommended. Combination of Physics 191 and Physics 191L is a replacement for Physics 197. Students may not receive credit for more than one of Physics 117A, Physics 191, and Physics 197. Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

### L31 Physics 192 Physics II

Continuation of Physics 191. Calculus-based introduction to concepts, laws, and structure of physics. Topics include electromagnetic forces and fields, direct current circuits, capacitance and inductance, electromagnetic radiation, light, physical optics, interference and diffraction, early quantum theory, and nuclear physics. A daily regimen of homework and reading as well as weekly homework assignments, small-group problem-solving exercises, and active class participation are integral parts of this course. Prerequisite: Physics 191, Physics 193 and Calculus I (Math 131); previous or concurrent enrollment in Calculus II (Math 132) is very strongly recommended. Taking Physics 192 as a first-year student is compatible with on-time completion of all pre-health requirements.

Credit 3 units. A&S IQ: NSM, AN BU: SCI

---

### L31 Physics 192L Physics II Laboratory

Laboratory experience is an integral component of Introductory Physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Prerequisite/Corequisite: Physics 192. Students who have taken Physics 118 or Physics 198 may not receive credit for Physics 192L.

Credit 1 unit.

---

### L31 Physics 193 Focused Physics I

Physics 193 is the first part of a two-semester calculus-based introduction to physics. The course is an advanced first-year course in classical mechanics, taught at a more sophisticated level than Physics 191. The approach is that of an upper-division physics course, with more emphasis on underlying formal structure rather than breadth of topics. The main goal is to provide in-depth coverage of the physical laws that govern the motion of objects, forces, and forms of energy in mechanical systems as well as an introduction to special relativity. The course is particularly addressed to students considering a physics- or mathematics-heavy science or engineering major. Corequisite: Math 132 or equivalent. Taking Physics 193 as a first-year student is compatible with on-time completion of all pre-health requirements.

Credit 4 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

---

### L31 Physics 193L Focused Physics I Laboratory

Laboratory experience is an integral component of Introductory Physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Required prerequisite or co-requisite: Physics 191. Students may not receive credit for Physics 191L if they have already received credit for 117A or 197  
Same as L31 Physics 191L  
Credit 1 unit. Arch: NSM

---

### L31 Physics 194 Focused Physics II

Physics 194 is the second part of a two-semester calculus-based introduction to physics, with a co-requisite of Calculus III (Math 233 or its equivalent). The course is an advanced first-year course in electricity and magnetism, taught at a more sophisticated level than Physics 192. The approach is that of an upper-division physics course, with more emphasis on the underlying formal structure, rather than breadth of topics. The main goal is to provide an in-depth coverage of electromagnetism, DC and AC circuits using complex variables, and optics. The course is particularly addressed to students considering a physics or mathematics heavy science/engineering majors. Taking Physics 194 as a first-year student is compatible with on-time completion of all pre-health requirements.  
Credit 4 units. A&S IQ: NSM, AN BU: SCI

---

### L31 Physics 194L Physics II Laboratory

Laboratory experience is an integral component of Introductory Physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Prerequisite/Corequisite: Physics 192. Students who have taken Physics 118 or Physics 198 may not receive credit for Physics 192L.  
Same as L31 Physics 192L  
Credit 1 unit.

---

### L31 Physics 205 General Physics I

This course is the first semester of a two-semester, calculus-based introductory physics course. In this semester, we will study the principles of Newtonian mechanics and their application to various physical systems. The material we learn this semester will serve as a basis for topics we will study in the second semester, such as electromagnetism. The aim of this course is to give you a robust introduction to the fundamentals of physics. Studying physics will also give you a better insight into other subjects like chemistry. The analytic techniques we develop will have a wide range of availability. Prerequisite: previous or concurrent enrollment in Calculus I.  
Credit 3 units. A&S IQ: AN BU: SCI

---

### L31 Physics 205L General Physics I Lab

The laboratory experience is an integral component of Introductory Physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Prerequisite or Corequisite: Physics 205.  
Credit 1 unit.

---

### L31 Physics 206 General Physics II

Phys 206 is the second semester of a two semester, calculus-based introductory physics course. In this semester, we build on what we learned in the first semester to explore more advanced topics like electromagnetism and optics. A strong understanding of the topics covered in Phys 205 is essential for this semester. The aim of this course is to give you a robust introduction to the fundamentals of physics.

Studying physics will also give you a better insight into other subjects like chemistry. The analytic techniques we develop will have a wide range of availability. Prerequisite - Physics 205. Previous or concurrent in Calc II is recommended.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

### L31 Physics 206L General Physics II Lab

Laboratory experience is an integral component of Introductory Physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Required prerequisite or co-requisite: General Physics II.  
Credit 1 unit. Arch: NSM Art: NSM BU: SCI

---

### L31 Physics 216 Introduction to Relativity: The Special Theory

Introduction to the special and general theories of relativity. Einstein's postulates of the principle of relativity and the constancy of the speed of light. Simple kinematics and dynamics: simultaneity, time dilation, space-time diagrams, twin and other "paradoxes,"  $E = mc^2$ , laws of motion. Elements of general relativity; curved spacetime, experimental tests, black holes, gravitational waves. Prerequisite: Phys 191, Phys 193, Phys 197, or permission of the instructor.  
Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L31 Physics 217 Introduction to Quantum Physics

Theoretical and experimental basis for quantum mechanics, following the historical development of 20th-century physics. Failure of classical physics; the Bohr theory of the atom; the Heisenberg uncertainty principle; the Schrodinger equation; atomic and molecular structure. Prerequisites: Phys 191-192 or Phys 193-194 or Phys 197-198 or Phys 205 - 206.  
Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

### L31 Physics 241 Selected Topics in Physics II

Topics of special interest (e.g., superconductivity, quasicrystals, neural networks, chaos, etc.) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form <https://physics.wustl.edu/independent-study>  
Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L31 Physics 242 Selected Topics in Physics II

Topics of special interest (e.g., holography, relativity, nuclear power, computer applications in physics, etc.) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure the instructor's consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form <https://physics.wustl.edu/independent-study>  
Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: IS

---

### L31 Physics 3068 Introduction to Quantum Information

A general introduction to the field of quantum information: physics of information processing, quantum logic, quantum algorithms, physical hardware for quantum computation, quantum communications, quantum error corrections, quantum sensing. Prerequisites: Math 131, Math 132 or equivalent, Math 429 (Linear Algebra) or equivalent.  
Credit 3 units. A&S IQ: NSM, AN Art: NSM

---

**L31 Physics 312 Introduction to Astrophysics**

This course covers the physics needed for higher level astrophysics courses, and is a requirement for those courses. Furthermore, it gives a first introduction to several topics in modern astrophysics, including stars (stellar structure and evolution), compact objects (neutron stars and black holes), galaxies (galactic structure), and cosmology. The course should be taken by everybody interested in astrophysics. Prerequisite: Physics 191 and 192 or Physics 193 and 194 or Physics 197 and 198 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L31 Physics 316 Optics and Wave Physics Laboratory**

Introduction to optics and to treatment of experimental data. Experiments and lectures on refraction, interference, diffraction, polarization, and coherence properties of waves with emphasis on light. Data analysis using statistical methods. Prerequisite: Physics 117A-118A or Physics 197-198.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L31 Physics 318 Introduction to Quantum Physics II**

Application of elementary quantum principles to atomic and molecular physics, solid-state physics, and nuclear and particle physics. Prerequisite: Physics 217.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

**L31 Physics 319 Quantum Theory of Matter**

Students will learn how to apply quantum mechanics principles to atomic and molecular physics, solid-state physics, nuclear physics, and particle physics. A portion of the course will also be devoted to introducing Dirac notation and discussing its applications to simple systems.

Credit 3 units. A&S IQ: NSM, AN

---

**L31 Physics 321 Electronics Laboratory**

Elements of linear and nonlinear circuits, amplifiers, feedback, with applications in experimental physics. Prerequisite: Phys 192 or Phys 194 or Phys 198 or Phys 206 or permission of instructor. Two three-hour laboratories and two one-hour lectures a week.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI EN: BME T, DU, SU, TU

---

**L31 Physics 322 Physical Measurement Laboratory**

A variety of classical and modern experiments in physics, including five experiments in nuclear radiation. Use of computers in experiment control, data acquisition, and data analysis. Development of skills in writing lab notebooks and formal reports and giving short oral presentations on experiments. Two laboratory periods each week. Prerequisite: Physics 217 or permission of instructor; junior or senior level standing

Credit 3 units. A&S IQ: NSM, AN, WI Arch: NSM Art: NSM BU: SCI EN: TU

---

**L31 Physics 3330 Planets and Life in the Universe**

In this course, we will explore the history, methods, outcomes, and broad impacts of exoplanet research and how these are connected to our search for life beyond planet Earth. Following an engaging contextual introduction at the beginning of the lectures, topics will be presented with an accessible mathematical treatment (e.g., geometrical derivations of the two-body transit problem). Prerequisite: Physics 191 and 192 or Physics 193 and 194.

Credit 3 units. A&S IQ: NSM, AN Art: NSM

---

**L31 Physics 341 Selected Topics in Physics III**

Topics of special interest (e.g., superconductivity, quasicrystals, neural networks, chaos, etc.) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form <https://physics.wustl.edu/independent-study>

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L31 Physics 342 Selected Topics in Physics III**

Topics of special interest (e.g., holography, relativity, nuclear power, computer application in physics, etc.) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure the instructor's consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form <https://physics.wustl.edu/independent-study>

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L31 Physics 350 Physics of the Brain**

Concepts and techniques of physics are applied to study the functioning of neurons and neuronal circuits in the brain. Neurons and neural systems are modeled at two levels: (i) at the physical level, in terms of the electrical and chemical signals that are generated and transmitted and (ii) at the information-processing level, in terms of the computational tasks performed. Specific topics include: neuronal electrophysiology, neural codes, neural plasticity, sensory processing, neural network architectures and learning algorithms, and neural networks as dynamical and statistical systems. Course grade is based primarily on an individualized term project. Prerequisite: Phys 191-192 or Phys 193-194 or Phys 197-198 or Phys 205-206, or permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI EN: BME T, SU, TU

---

**L31 Physics 351 Introduction to Biomedical Physics**

Principles and application of key physical methods used in the diagnosis and treatment of diseases, and in biomedical research.

Topics include interaction of radiation with living systems; fundamentals of optical and electron microscopy; imaging via X-rays, magnetic resonance, and ultrasound; and electrical properties of organs and cells. Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206.

Credit 3 units. Arch: NSM Art: NSM BU: SCI EN: BME T, TU

---

**L31 Physics 352 Physics of Biomolecules**

This course emphasizes the application of physical laws and concepts in understanding biomolecules and their interactions, and in developing tools to investigate their biological properties and functionalities. Topics include (1) a general introduction to biomolecules and cells, (2) physics of biopolymers as modeled by stochastic analyses, (3) transport processes in biological systems including diffusion, reaction kinetics, and "life at low Reynolds number," and (4) the physics of fluorescence and its contemporary applications to dynamics of biomolecules, such as optical tweezers. Prerequisite: Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206. Some familiarity with thermodynamics; Chemistry 111A-112A recommended.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM

---

### L31 Physics 354 Physics of Living Systems

One of the grand challenges in contemporary biophysics is placing our understanding of cellular systems on a firm quantitative footing. How does the collective activity of molecules enable the cell to sense its environment, make decisions, grow and develop? This course, aimed at physical and life science students, will serve as an introduction to the physical principles and mathematical techniques underlying the analysis of systems and synthetic biology. Topics will include modeling gene and signaling networks, the regulation of intracellular structures, and pattern formation in development. Students in this course can expect to learn both analytical and computer simulation approaches to fundamental problems in biology, biophysics, and biotechnology. Graduate students will explore the subject in more depth. Pre-requisites: Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206. or Math 217 or Math 309, or permission of instructor. 3 units

Credit 3 units. A&S IQ: NSM Arch: NSM BU: SCI EN: BME T, TU

---

### L31 Physics 355 Physics of Vision

How do the eyes capture an image and convert it to neural messages that ultimately result in visual experience? This lecture and demonstration course will cover the physics of how we see. The course is addressed to physics, premedical, and life-sciences students with an interest in biophysics. Topics include physical properties of light, evolution of the eyes, image formation in the eye, image sampling with an array of photoreceptors, transducing light into electrical signals, color coding, retinal organization, computing with nerve cells, compressing the 3-D world into optic nerve signals, inferring the 3-D world from optic nerve signals, biomechanics of eye movement, engineered vision in machines. The functional impact of biophysical mechanisms for visual experience will be illustrated with psychophysical demonstrations. Corequisite: Phys 117A, Phys 197 or permission of instructor. 3 units.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI EN: BME T, SU, TU

---

### L31 Physics 360 Biophysics Laboratory

This laboratory course consists of "table-top" experiments in biological physics that are designed to introduce the student to concepts, methods, and biological model systems in biophysics. Most experiments combine experimentation with computer simulations. The list of available experiments includes electrophysiology, human bioelectricity, optical tweezers, ultrasonic imaging, mass spectrometer, and viscosity measurements. Prior completion of Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206 or permission of instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

### L31 Physics 400 Physical Science in 12 Problems

Exercises related to general chemistry, classical mechanics, quantum mechanics, statistical mechanics, thermodynamics, and kinetics, will be solved with numerical software. Each exercise will be accompanied by a lecture, a software template solving a problem and presenting a related take-home problem. The software will allow us to focus on, and treat in a transparent fashion, physical problems without the unwieldy idealizations and contrivances found in textbooks. Prerequisites: Chem 106/112A and/or Physics 192/194, and prior or concurrent enrollment in either Chem 401 or Phys 217. The lectures will be in-person however a complete set of taped lectures will also be available. A remote help session will be scheduled at a mutually agreed to time. There are no quizzes, exams or a final.

Same as L07 Chem 400

Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

---

### L31 Physics 4080 Artificial Intelligence and Machine Learning Methods with Applications to Physics

The course will introduce key ideas of AI and machine learning from a statistical physics perspective. Essentials of statistical distributions, kernel methods, neural networks, large language models, diffusion models, and many other tools will be presented from this physics based approach. Students will apply these techniques to problems in physics. Apart from the very first assignments, nearly all homework problems will assume the use of Python. If you do not know Python, there will be an additional very brief introduction to Python that the instructor will give in addition to the course lectures. Prerequisites: L24 132 (Calculus III) and L24 429 (Linear Algebra)

Credit 3 units. A&S IQ: NSM, AN

---

### L31 Physics 411 Mechanics

Motion of a point particle, rotational motion, oscillation, gravitation and central forces, Lagrangian and Hamiltonian formulation. Prerequisite: Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206, Math 217, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L31 Physics 421 Electricity and Magnetism

Starting from Coulomb's law, the Biot-Savart law, and Faraday's law, the electrical and magnetic fields are defined and applied. Maxwell's equations are derived and their consequences, such as electromagnetic waves and relativity, are explored. Prerequisites: Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206., Math 217, or permission of instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI EN: BME T, DU, SU, TU

---

### L31 Physics 422 Electricity and Magnetism II

The second course in a two part series covering the classical theory of electricity and magnetism leading to the derivation and application of Maxwell's equation. Topics in electrodynamics including Faraday's law, the displacement current and Maxwell's equations in vacuum and in matter are covered. Electromagnetic waves and radiation, special relativity and relativistic electrodynamics will also be discussed. Prerequisites: Phys 421 or permission of instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM EN: BME T, DU, SU, TU

---

### L31 Physics 427 Introduction to Computational Physics

What does it mean to solve a research problem using a computer? What is the difference between "someone ran a simulation" and an interesting research result? And what skills does it take? Familiarity with a programming language is, of course, essential, but that is only the beginning. This course will focus on the methodology of computational research, touching also on topics in numerical analysis, statistics and visualization. The format will combine lectures and hands-on experience, with emphasis on research-style small-group projects. Prerequisites: Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206, Calculus, and familiarity with a programming language.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L31 Physics 435 Nuclear and Radiochemistry Lab

Application of radiochemistry to problems in chemistry, physics, and nuclear medicine, with emphasis on particle detectors and experimental techniques. Prerequisites: 3 units of physical chemistry or quantum mechanics, or permission of instructor. Five hours of laboratory a week.

Same as L07 Chem 435

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

---

**L31 Physics 436 Introduction to the Atomic Nucleus**

Introduction to the interaction of radiation with matter, the production and decay of radioactive nuclides, the structure and properties of nuclei, and various applications of nuclear science (including nuclear power) are all presented. Prerequisites: General Chemistry and/or Physics, and prior or concurrent enrollment in either Chemistry 401 or Physics 217. Lectures will be in-person but a complete set of taped lectures will also be available. A weekly, in-person or remote, help session will be scheduled at a mutually agreed to time. There will be about 6 timed quizzes, one midterm and one final, all of which must be taken in-person on mutually agreed dates.

Same as L07 Chem 436

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L31 Physics 441 Selected Topics in Physics IV**

Topics of special interest (e.g., holography, relativity, nuclear power, computer applications in physics, etc.) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure the instructor's consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form <https://physics.wustl.edu/independent-study>

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L31 Physics 442 Selected Topics in Physics IV**

Topics of special interest (e.g., holography, relativity, nuclear power, computer applications in physics, etc.) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure the instructor's consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form <https://physics.wustl.edu/independent-study>

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L31 Physics 446 Galactic Astrophysics**

In these lectures, the focus is on the dynamics and statistical mechanics of a collection of stars, which is treated as a collisionless system. The course begins with a discussion of potential theory and proceeds to discuss the density and phase distributions of stars in star clusters and galaxies, thus leading to an understanding of the equilibria and stability of these systems. Topics such as Chandrasekhar's dynamical friction, galaxy formation and dark matter will constitute the final topics of discussion.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L31 Physics 450 Physics of the Brain**

Contents are the same as Phys 350. Also intended for graduate students. Includes a more sophisticated term project than Phys 350. Prerequisite: Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI EN: BME T, SU, TU

---

**L31 Physics 453 Topics in Theoretical Biophysics**

Application of a range of physical models to biological systems. Topics include protein folding, self-assembling molecular systems, and mechanical properties of biological materials. Background material will be provided, but some exposure to statistical mechanics or thermodynamics is necessary. Prerequisite: experience with ordinary differential equations (as in Mathematics 217).

---

Credit 3 units. A&S IQ: NSM BU: SCI

---

**L31 Physics 454 Physics of Living Systems**

Contents are the same as Phys 354. Graduate students will explore the subject in more depth. Pre-requisites: Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206. or Math 217 or Math 309, or permission of instructor. 3 units

Credit 3 units. A&S IQ: NSM Arch: NSM EN: TU

---

**L31 Physics 455 Physics of Vision**

Contents are the same as Phys 355. Also intended for graduate students. Includes a more sophisticated term project than Phys 355. Corequisite: Prerequisite: Physics 191 or Phys 193 or Phys 197 or Phys 206 or permission of instructor. 3 units.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L31 Physics 456 Stellar Astrophysics**

In the second semester, the focus is on the dynamics and statistical mechanics of a collection of stars which is treated as a collisionless system. The course begins with a discussion of potential theory and proceeds to discuss the density and phase space distributions of stars in star clusters and galaxies, thus leading to an understanding of the equilibria and stability of these systems. Topics such as Chandrasekhar's dynamical friction and dark matter will constitute the final topics of discussion. This course is also available for advanced undergraduates, with the prerequisites as noted. Prerequisites: Physics 411, 421, and 463, or permission of the instructor.

Same as L31 Physics 556

Credit 3 units.

---

**L31 Physics 460 X-ray & Gamma-ray Astrophysics**

Observers started to use X-ray and gamma-rays in the sixties and seventies to explore the cosmos with high-energy photons. The sky looks dramatically different at these energies with bright flares from mass accreting black holes and gamma-ray bursts and large diffuse emission from supernova remnants and cosmic rays interacting with galactic matter and magnetic fields dominating the emission. This course gives a comprehensive overview of the underlying physics and observable phenomenology. Topics that will be covered include the history of X-ray and gamma-ray astronomy, high-energy radiation processes, particle heating and acceleration, accretion physics, blast waves and shocks, black holes, neutron stars, supernova remnants, gamma-ray bursts, and galaxy clusters. Prerequisite L31 312.

Credit 3 units. A&S IQ: NSM Arch: NSM

---

**L31 Physics 463 Statistical Mechanics and Thermodynamics**

Basic methods of classical and quantum statistical mechanics, thermodynamics, and transport theory. Prerequisite: Phys 217 or permission of instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

**L31 Physics 471 Quantum Mechanics**

Origins of quantum theory, wave packets and uncertainty relations, Schrodinger's equation in one dimension, step potentials and harmonic oscillators, eigenfunctions and eigenvalues, Schrodinger's equation in three dimensions, the hydrogen atom, symmetry, spin and the periodic table, approximation methods for time independent problems, quantum statistics. Prerequisite: Math 217, Physics 217, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM EN: BME T, SU, TU

---

**L31 Physics 472 Solid State Physics**

Crystal structures, binding energies, thermal properties, dielectrics, magnetism, free electron theory of metals, band theory, semiconductors, defects in solids. Prerequisite: Phys 471.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

**L31 Physics 474 Introduction to Particle Physics**

Introduction to the standard model of particle physics, including symmetries, conservation laws, the weak interaction, the strong interaction, quark confinement, and some more exotic ideas such as grand unified theories. Prerequisite: Phys 217.  
Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

**L31 Physics 476 Astrophysics**

This Astrophysics course focuses on cosmic rays. Victor Hess discovered in 1912 that ionizing radiation impinges on the top of Earth's atmosphere. Even though physicists have been studying cosmic rays (the ionizing radiation) for more than 100 years now with a fantastic repertoire of experimental and theoretical tools, cosmic rays never stop to surprise us and cosmic ray physicists are still pushing the frontier of cosmic exploration in many ways. This course gives an introduction into this exciting topic covering historical and recent cosmic ray measurements at all energies, particle and antiparticle observations, and neutrino observations. The presently favored models of cosmic ray acceleration and transport are discussed in detail, and some topics of current interest are highlighted (including the production of particles and antiparticles by dark matter). The course also covers radio astronomy and highlights the clues about the origin of the cosmic rays that can be obtained from radio observations. Prerequisite Physics 312 or permission of instructor.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

**L31 Physics 477 Physics of Finite and Infinite Nuclear Systems**

Quantum mechanics of finite and infinite systems of protons and neutrons. Interaction between nucleons. Independent-particle model of nuclei and shell structure. Contrast with atomic shell model. Isospin symmetry. Information from weakly and strongly interacting probes of nuclei. Nuclear decay properties and some historical context. Many-particle description of nuclear systems. Single-particle versus collective phenomena. Properties of excited states. Bulk properties of nuclei. Nuclear and neutron matter. Role of different energy scales in determining nuclear properties: influence of long-range, short-range, and medium-induced interactions. Pairing correlations in nuclear systems. Relevance of nuclear phenomena and experiments for astrophysics and particle physics. Prerequisites: Phys 318 or Phys 471, or permission of instructor  
Credit 3 units. A&S IQ: NSM Arch: NSM

**L31 Physics 478 From Black Holes to the Big Bang**

An introduction to general relativity. The goal will be to illustrate important features of general relativity without the full-blown mathematics of Einstein's equations by restricting attention to spherically symmetric spacetimes. Topics will include: principle of equivalence; curved spacetime; spherical stars and black holes; the Big Bang model, observational cosmology. Prereq: Physics 411 or permission of instructor.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

**L31 Physics 481 Critical Analysis of Scientific Data**

Data science is most commonly associated with topics in computer science. However, efficient algorithms, specific software packages, neural nets, and so on are only tools, and they are easily misused. In a research setting, working with data is primarily an exercise in critical thinking. The purpose of this interactive, hands-on course is to learn from mistakes by making them in a safe environment. After

covering/reviewing probability theory, Bayesian inference, elements of information theory, and random matrix theory, the course will focus on case studies of real-world biological data, such as quantitative imaging data, next-generation sequencing (metagenomics), and neural recordings. These modules will involve the critical reading of research papers and working through puzzle-based assignments. The primary modules will be supplemented by shorter presentations on topics chosen by students. Fair warning: This is explicitly not a course on "big data" or machine learning, although students may choose to explore some of these topics in their presentations (required for credit). Experience with MatLab or Python strongly encouraged or will need to be acquired during the course. Open to undergraduates with prior programming experience and a quantitative background (Phys 197/198, Math 203 or similar; contact instructor if unsure). Experience with data or statistics not required. Course mimics a research environment, and undergraduates considering an academic research track are especially encouraged.  
Credit 3 units. Arch: NSM Art: NSM BU: SCI

**L31 Physics 482 Research Seminar**

Designed to introduce students to current developments in physics and to research carried out by faculty. Topics vary each year. Each member of the department addresses their particular specialty. Interested undergraduates may take this seminar in their junior or senior year. Must be taken pass/fail.  
Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

**L31 Physics 499 Honors Program**

Prerequisites: junior standing, an average grade of B or better, and apply for approval using the Physics independent study web form <https://physics.wustl.edu/independent-study>. Program and credit to be determined; maximum 6 units.  
Credit variable, maximum 3 units.

## Astrophysics Major Program Requirements

- **Total units required:** 52-59

Students must complete all course work for the astrophysics major with a grade of at least a C-.

### Required Introductory Courses

Majors in astrophysics are required to complete a series of introductory courses.

They may take either:

Code	Title	Units
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1
<b>Total Units</b>		<b>8</b>

or (recommended for majors):

Code	Title	Units
Physics 193	Focused Physics I	4
Physics 193L	Focused Physics I Laboratory	1
Physics 194	Focused Physics II	4
Physics 194L	Physics II Laboratory	1
<b>Total Units</b>		<b>10</b>

## Required Courses

In addition, majors in astrophysics are required to complete the following courses:

Code	Title	Units
Physics 217	Introduction to Quantum Physics	3
Physics 312	Introduction to Astrophysics	3
Physics 322	Physical Measurement Laboratory	3
Physics 411	Mechanics	3
Physics 421	Electricity and Magnetism	3
<b>Total Units</b>		<b>15</b>

**One additional laboratory course** must be chosen from the following:

Code	Title	Units
Physics 316	Optics and Wave Physics Laboratory	3
Physics 321	Electronics Laboratory	3
Physics 427	Introduction to Computational Physics	3
Physics 435	Nuclear and Radiochemistry Lab	3

## Required Advanced Courses

In addition to the above requirements, students who are earning the astrophysics major are required to complete three advanced electives (300 level and above). Students who declare an astrophysics major *and* who complete both Physics 125A Solar System Astronomy and Physics 126A Stars, Galaxies, and Cosmology will be required to complete two advanced electives (300 level and above). They will choose courses from the following list. Students must receive letter grades for these advanced courses.

Code	Title	Units
Physics 446	Galactic Astrophysics	3
Physics 456	Stellar Astrophysics	3
Physics 460	X-ray & Gamma-ray Astrophysics	3
Physics 476	Astrophysics	3
Physics 478	From Black Holes to the Big Bang	3
Physics 3330	Planets and Life in the Universe	3

They must also complete one additional course from the preceding list of five courses or one from the following list of courses:

Code	Title	Units
EEPS 353	Earth Forces	4
EEPS 407	Remote Sensing	3
Physics 422	Electricity and Magnetism II	3
Physics 474	Introduction to Particle Physics	3
Physics 477	Physics of Finite and Infinite Nuclear Systems	3
Physics 547	Intro to Elementary Particle Physics	3
Physics 558	Relativistic Astrophysics	3
MEMS 3410	Fluid Mechanics	3

## Required Math Courses

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 217	Differential Equations	3
Math 233	Calculus III	3
<b>Total Units</b>		<b>12</b>

Students who have completed Math 203 Honors Mathematics I and Math 204 Honors Mathematics II will have fulfilled the requirement for Math 131 Calculus I, Math 132 Calculus II, and Math 233 Calculus III.

## Science-Breadth Requirement

Majors must select one of the following courses to satisfy the science-breadth requirement:

Code	Title	Units
Chem 105	Principles of General Chemistry I	3
Chem 106	Principles of General Chemistry II	3
Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 445	Instrumental Methods: Physical Chemistry	3
CSE 131	Introduction to Computer Science	3
CSE 132	Introduction to Computer Engineering	3
CSE 247	Data Structures and Algorithms	3
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3

Students who receive Advanced Placement credit or the equivalent of advanced placement credit (indicated with the use of CHEM 103 Advanced Placement Chemistry I and/or CHEM 104 Advanced Placement Chemistry II by the Chemistry department) may use those credits toward the science-breadth requirement.

## Additional Information

### Senior Honors

Students are encouraged to work toward Latin honors (p. 1130) (i.e., cum laude, magna cum laude, and summa cum laude). To qualify, students must meet the academic requirements of the College and successfully complete a suitable project under the supervision of a faculty member in the department. The project, whether experimental or theoretical, should demonstrate the student's capacity for independent work. Honors candidates must apply to the Undergraduate Studies Committee no later than the first day of classes of their senior year. The application should include a description of the proposed project, co-signed by the supervising professor. A written report of the completed work must be submitted to the committee by a March deadline. By enrolling in Physics 499, students may earn up to 6 units of credit for the honors project.

The physics department also offers physics majors the possibility to earn departmental distinctions. These distinctions require the same grade point average cutoffs as Latin honors (p. 1130) but are calculated exclusively from the grades in physics courses (i.e., all courses with the prefix L31). Three levels of distinction are offered: 1) highest distinction; 2) high distinction; and 3) distinction. The highest and high distinctions require at least one semester of undergraduate research and a senior thesis describing the results; these distinctions are limited to the top 15% (highest distinction) and the top 15% to 50% (high distinction) of the physics majors in their senior year as ranked by their GPA in the physics courses. Students who meet the GPA cutoff but who do not undertake undergraduate research and a senior thesis may only receive the third level of distinction.

### Transfer Credit and Study Abroad

Students may transfer up to 9 credits of advanced course work (300+ level) to satisfy major requirements by taking comparable physics courses at another institution. Prior approval by the department is needed. Online or other distance learning courses are not eligible for transfer credit.

Website: <http://physics.wustl.edu>

## Physics Major

### Program Requirements

- **Total units required:** 42-44

### Required Introductory Courses

Majors in physics are required to complete a series of introductory courses. They may take either:

Code	Title	Units
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1

or (recommended for majors):

Code	Title	Units
Physics 193	Focused Physics I	4
Physics 193L	Focused Physics I Laboratory	1
Physics 194	Focused Physics II	4
Physics 194L	Physics II Laboratory	1

### Required Courses

In addition, **majors in physics are required to complete the following courses:**

Code	Title	Units
Physics 217	Introduction to Quantum Physics	3
Physics 322	Physical Measurement Laboratory	3
Physics 411	Mechanics	3
Physics 421	Electricity and Magnetism	3
<b>Total Units</b>		<b>12</b>

They must also complete **one additional upper-level laboratory course**, chosen from the following:

Code	Title	Units
Physics 316	Optics and Wave Physics Laboratory	3
Physics 321	Electronics Laboratory	3
Physics 360	Biophysics Laboratory	3
Physics 427	Introduction to Computational Physics	3
Physics 435	Nuclear and Radiochemistry Lab	3

**Upper-level courses:** Majors are required to complete a minimum of 21 units of advanced courses (300 level or higher) in Physics, excluding Physics 341, Physics 342, Physics 441, Physics 442, Physics 499 and Physics 500. These 21 units may include courses listed above and may also include *one* upper level engineering class chosen from the following:

Code	Title	Units
ESE 351	Signals and Systems	3
ESE 429	Basic Principles of Quantum Optics and Quantum Information	3
ESE 436	Semiconductor Devices	3
ESE 438	Applied Optics	3
ESE 441	Control Systems	3
ESE 482	Digital Signal Processing	3
ESE 531	Nano and Micro Photonics	3

ESE 532	Introduction to Nano-Photonic Devices	3
ESE 582	Fundamentals and Applications of Modern Optical Imaging	3
MEMS 3410	Fluid Mechanics	3

Students must receive letter grades for these advanced courses, and the course must be completed with a grade of at least a C-.

**Math courses required for the physics major:**

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 217	Differential Equations	3
Math 233	Calculus III	3
<b>Total Units</b>		<b>12</b>

Students who have completed Math 203 Honors Mathematics I and Math 204 Honors Mathematics II will have fulfilled the requirement for Math 131 Calculus I, Math 132 Calculus II, and Math 233 Calculus III.

**Math courses recommended for the physics major:**

- Math 308 Mathematics for the Physical Sciences **or** ESE 318 Engineering Mathematics A (We recommend that this course precede Physics 421 Electricity and Magnetism.)
- Math 309 Matrix Algebra (We recommend that this course precede Physics 474 Introduction to Particle Physics.)
- Physics 501 Theoretical Physics/Math 501C Theoretical Physics and Physics 502 Methods of Theoretical Physics II/Math 502C Methods of Theoretical Physics II also are recommended.

**Science-breadth requirement:** Majors must select three of the following courses to satisfy the science-breadth requirement. One of the three courses must be Chem 103 Advanced Placement Chemistry I, Chem 104 Advanced Placement Chemistry II, Chem 105 Principles of General Chemistry I, Chem 106 Principles of General Chemistry II, Chem 111A General Chemistry I, Chem 112A General Chemistry II, Chem 401 Physical Chemistry I or Chem 402 Physical Chemistry II.

Code	Title	Units
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
Chem 103	Advanced Placement Chemistry I	3
Chem 104	Advanced Placement Chemistry II	3
Chem 105	Principles of General Chemistry I	3
Chem 106	Principles of General Chemistry II	3
Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 445	Instrumental Methods: Physical Chemistry	3
CSE 131	Introduction to Computer Science	3

CSE 132	Introduction to Computer Engineering	3
CSE 247	Data Structures and Algorithms	3
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3

Students who have received credit for Chem 103 Advanced Placement Chemistry I and Chem 104 Advanced Placement Chemistry II can use them toward the science-breadth requirement.

## Additional Information

### Senior Honors

Students are encouraged to work toward Latin honors (p. 1130) (i.e., cum laude, magna cum laude, and summa cum laude). To qualify, students must meet the academic requirements of the College and successfully complete a suitable project under the supervision of a faculty member in the department. The project, whether experimental or theoretical, should demonstrate the student's capacity for independent work. Honors candidates must apply to the Undergraduate Studies Committee no later than the first day of classes of their senior year. # Physics Major, Biophysics Specialization

## Program Requirements

- **Total units required:** 46-48

### Required Introductory Courses

Majors in physics are required to complete a series of introductory courses. They may take either:

Code	Title	Units
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1

or (recommended for majors):

Code	Title	Units
Physics 193	Focused Physics I	4
Physics 193L	Focused Physics I Laboratory	1
Physics 194	Focused Physics II	4
Physics 194L	Physics II Laboratory	1

### Required Courses

Majors in physics are required to complete the following courses:

Code	Title	Units
Physics 217	Introduction to Quantum Physics	3
Physics 322	Physical Measurement Laboratory	3
Physics 411	Mechanics	3
Physics 421	Electricity and Magnetism	3
<b>Total Units</b>		<b>12</b>

They must also complete **one additional upper-level laboratory course**, chosen from the following:

Code	Title	Units
Physics 316	Optics and Wave Physics Laboratory	3
Physics 321	Electronics Laboratory	3
Physics 360	Biophysics Laboratory	3
Physics 427	Introduction to Computational Physics	3
Physics 435	Nuclear and Radiochemistry Lab	3

**Upper-level courses:** Majors are required to complete a minimum of 21 units of advanced courses (300 level or higher) in Physics, excluding Physics 341, Physics 342, Physics 441, Physics 442, Physics 499 and Physics 500. These 21 units may include courses listed above and may also include *one* upper level engineering class chosen from the following:

Code	Title	Units
ESE 351	Signals and Systems	3
ESE 429	Basic Principles of Quantum Optics and Quantum Information	3
ESE 436	Semiconductor Devices	3
ESE 438	Applied Optics	3
ESE 441	Control Systems	3
ESE 482	Digital Signal Processing	3
ESE 531	Nano and Micro Photonics	3
ESE 532	Introduction to Nano-Photonic Devices	3
ESE 582	Fundamentals and Applications of Modern Optical Imaging	3
MEMS 3410	Fluid Mechanics	3

Students must receive letter grades for these advanced courses, and the course must be completed with a grade of at least a C-.

**Math courses required for the physics major:**

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 217	Differential Equations	3
Math 233	Calculus III	3
<b>Total Units</b>		<b>12</b>

Students who have completed Math 203 Honors Mathematics I and Math 204 Honors Mathematics II will have fulfilled the requirement for Math 131 Calculus I, Math 132 Calculus II, and Math 233 Calculus III.

**Math courses recommended for the physics major:**

- Math 308 Mathematics for the Physical Sciences **or** ESE 318 Engineering Mathematics A (We recommend that this course precede Physics 421 Electricity and Magnetism.)
- Math 309 Matrix Algebra (We recommend that this course precede Physics 474 Introduction to Particle Physics.)
- Physics 501 Theoretical Physics/Math 501C Theoretical Physics and Physics 502 Methods of Theoretical Physics II/Math 502C Methods of Theoretical Physics II also are recommended.

**Science-breadth requirement:** Majors must select three of the following courses to satisfy the science-breadth requirement. One of the three courses must be Chem 103 Advanced Placement Chemistry I, Chem 104 Advanced Placement Chemistry II, Chem 105 Principles of General Chemistry I, Chem 106 Principles of General Chemistry II, Chem 111A General Chemistry I, Chem 112A General Chemistry II, Chem 401 Physical Chemistry I or Chem 402 Physical Chemistry II.

Code	Title	Units
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
Chem 103	Advanced Placement Chemistry I	3
Chem 104	Advanced Placement Chemistry II	3
Chem 105	Principles of General Chemistry I	3
Chem 106	Principles of General Chemistry II	3

Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 445	Instrumental Methods: Physical Chemistry	3
CSE 131	Introduction to Computer Science	3
CSE 132	Introduction to Computer Engineering	3
CSE 247	Data Structures and Algorithms	3
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3

Students who have received credit for Chem 103 Advanced Placement Chemistry I and Chem 104 Advanced Placement Chemistry II can use them toward the science-breadth requirement.

## Requirements for the Biophysics Specialization

Physics majors may concentrate in the subfield of biophysics by taking the following courses (as part of their distribution requirements):

### Physics requirement:

Code	Title	Units
Physics 463	Statistical Mechanics and Thermodynamics	3

### One of the following:

Code	Title	Units
Physics 350 or Physics 450	Physics of the Brain	3
Physics 355 or Physics 455	Physics of Vision	3

### One of the following:

Code	Title	Units
Physics 354 or Physics 454	Physics of Living Systems	3
Physics 453	Topics in Theoretical Biophysics	3
Physics 481	Critical Analysis of Scientific Data	3
Physics 509	Nonlinear Dynamics	3
Physics 563	Topics in Theoretical Biophysics	3

### Biology requirements:

Code	Title	Units
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
<b>Total Units</b>		<b>8</b>

**Note:** Students who want to have the biophysics track displayed on their transcript must inform the Department of Physics at least one semester before their graduation date. Contact the Director of Undergraduate Studies ([dus@physics.wustl.edu](mailto:dus@physics.wustl.edu)) with any questions.

## Additional Information

### Senior Honors

Students are encouraged to work toward Latin honors (p. 1130) (i.e., cum laude, magna cum laude, and summa cum laude). To qualify, students must meet the academic requirements of the College and successfully complete a suitable project under the supervision of a faculty member in the department. The project, whether experimental or theoretical, should demonstrate the student's capacity for independent work. Honors candidates must apply to the Undergraduate Studies Committee no later than the first day of classes of their senior year. The application should include a description of the proposed project, co-signed by the supervising professor. A written report of the completed work must be submitted to the committee by a March deadline. By enrolling in Physics 499, students may earn up to 6 units of credit for the honors project.

The physics department also offers physics majors the possibility to earn departmental distinctions. These distinctions require the same grade point average cutoffs as Latin honors (p. 1130) but are calculated exclusively from the grades in physics courses (i.e., all courses with the prefix L31). Three levels of distinction are offered: 1) highest distinction; 2) high distinction; and 3) distinction. The highest and high distinctions require at least one semester of undergraduate research and a senior thesis describing the results; these distinctions are limited to the top 15% (highest distinction) and the top 15% to 50% (high distinction) of the physics majors in their senior year as ranked by their GPA in the physics courses. Students who meet the GPA cutoff but who do not undertake undergraduate research and a senior thesis may only receive the third level of distinction.

### Transfer Credit and Study Abroad

Students may transfer up to 9 credits of advanced course work (300+ level) to satisfy major requirements by taking comparable physics courses at another institution. Prior approval by the department is needed. Online or other distance learning courses are not eligible for transfer credit.

## Astrophysics and Astroparticle Physics Minor

### Program Requirements

- **Total units required:** 20-22

## Required Courses

### Required Introductory Courses

Minors in astrophysics and astroparticle physics are required to complete a series of introductory courses.

They may take either:

Code	Title	Units
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1
<b>Total Units</b>		<b>8</b>

or:

Code	Title	Units
Physics 193	Focused Physics I	4
Physics 193L	Focused Physics I Laboratory	1
Physics 194	Focused Physics II	4
Physics 194L	Physics II Laboratory	1
<b>Total Units</b>		<b>10</b>

### Other Required Courses

In addition, minors in astrophysics and astroparticle physics are required to complete the following courses:

Code	Title	Units
Physics 217	Introduction to Quantum Physics	3
Physics 312	Introduction to Astrophysics	3
<b>Total Units</b>		<b>6</b>

Minors must also take two of the following eight courses:

Code	Title	Units
Physics 319	Quantum Theory of Matter	3
Physics 446	Galactic Astrophysics	3
Physics 456	Stellar Astrophysics	3
Physics 460	X-ray & Gamma-ray Astrophysics	3
Physics 474	Introduction to Particle Physics	3
Physics 476	Astrophysics	3
Physics 478	From Black Holes to the Big Bang	3
Physics 3330	Planets and Life in the Universe	3

Website: <http://physics.wustl.edu>

## Biomedical Physics Minor

### Program Requirements

- **Total units required:** 17-19

This minor is for students interested in the discussion and application of methods and techniques from physics to topics in the areas of biology and medicine. The program may be of interest to the pre-medicine student or the research-oriented science major.

**Required courses:** Minors in biomedical physics are required to complete a series of introductory courses.

They may take either:

Code	Title	Units
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1

or:

Code	Title	Units
Physics 193	Focused Physics I	4
Physics 193L	Focused Physics I Laboratory	1
Physics 194	Focused Physics II	4
Physics 194L	Physics II Laboratory	1

**Elective courses:** Minors must take two of the following five courses:

Code	Title	Units
Physics 350	Physics of the Brain	3
Physics 354	Physics of Living Systems	3
Physics 355	Physics of Vision	3
Physics 453	Topics in Theoretical Biophysics	3
Physics 481	Critical Analysis of Scientific Data	3

They must also take one of the following four laboratory courses:

Code	Title	Units
Physics 316	Optics and Wave Physics Laboratory	3
Physics 321	Electronics Laboratory	3
Physics 322	Physical Measurement Laboratory	3
Physics 360	Biophysics Laboratory	3

Website: <http://physics.wustl.edu>

## Physics Minor

### Program Requirements

- **Total units required:** 17-19

### Required Introductory Courses

Minors in physics are required to complete a series of introductory courses. They may take either:

Code	Title	Units
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1

or:

Code	Title	Units
Physics 193	Focused Physics I	4
Physics 193L	Focused Physics I Laboratory	1
Physics 194	Focused Physics II	4
Physics 194L	Physics II Laboratory	1

## Required Courses

Minors in physics are required to complete the following courses:

Code	Title	Units
Physics 217	Introduction to Quantum Physics	3
Physics 318 or Physics 319	Introduction to Quantum Physics II Quantum Theory of Matter	3

## Elective Courses

Minors must take at least one additional course at the 300 level or above (with the exception of Physics 341 Selected Topics in Physics III, Physics 342 Selected Topics in Physics III, Physics 441 Selected Topics in Physics IV, Physics 442 Selected Topics in Physics IV, Physics 499 Honors Program and Physics 500 Independent Work) with a grade of C- or better.

Website: <http://physics.wustl.edu>

## Political Science

The Department of Political Science offers undergraduates the opportunity to study all aspects of politics using cutting-edge technical and theoretical tools. Our courses are animated by long-standing problems related to the use of power, its rightful exercise by governments and individual actors, and the institutions that affect how that power is exercised. Reflecting the breadth of the discipline, we offer a range of classes, including courses on elections and electoral politics; international political economy; justice and the state; and comparative analyses of political institutions across states.

A major in political science thus exposes students to the primary themes of the discipline: American politics, comparative politics, international politics, judicial politics, political methodology, and political theory. A major in political science can prepare students well for professional training and advanced study in law, business, education, journalism, policy analysis, political science, public administration, social work, and urban planning. Political science graduates enter careers in business; federal, state, and local government; the media; and nonprofit organizations.

Because political science is a broad discipline, students often choose to combine the major with such related fields as African and African-American studies; American culture studies; anthropology; economics; environmental policy; history; international studies; Jewish, Islamic, and Middle Eastern studies; Latin American studies; philosophy; psychology; and women, gender, and sexuality studies.

### L32 Pol Sci 101B American Politics

In a polarized era of American politics, it is critical to have a working knowledge of the American political process and the analytical skills with which to interpret contemporary events. This course is designed to accomplish these dual objectives. In the first few weeks of the semester, we will explore both the key principles of social scientific thinking and trace the evolution of the fundamental characteristics of American government. We will use this foundation throughout the remainder of the semester to assess the contemporary challenges to American institutions and the context in which they, and the general public, make decisions. At the end of the semester, students should be able to understand and critically engage with information about American politics, as well as actively engage with the American political system (should they choose to do so).

---

### L32 Pol Sci 1021 The Business of Elections

This course will focus on understanding the primary and presidential elections -- particularly the 2024 election -- through a multidisciplinary approach that primarily involves political science and business. Campaigns are start-ups that rely on strategy, branding, influencing consumers (voters), financing and other concepts to achieve the election of their candidate. At the same time, American politics is highly polarized, with voters who are increasingly hostile to listening to the other side. Given this context, how does a campaign succeed as an entrepreneurial venture? This course will allow students to compare and contrast how different candidates' policies and platforms may affect different constituencies/sectors of the business/labor world as well as the economy, how the media portrays them, and what role they will play in the general election. This course is for first-year (non-transfer) students only. Students who are not first-year students will be automatically unenrolled from this course.

---

### L32 Pol Sci 102B Introduction to Comparative Politics

One of the primary goals of a course in comparative politics is to familiarize students with a broad array of political systems. The approach taken in this course can best be characterized as the active acquisition and use of a set of tools for looking at the political world. In other words, instead of putting emphasis on what textbook writers think political scientists know, in this course the emphasis is on "how we know what we know" and on building knowledge. This approach equips students with a set of tools to use long after the course is over. These comparative tools are focused on historical, recent, and current events, and students are provided the opportunity to delve more deeply into a study of the parts of the world most they find most interesting.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA, IS EN: S UColl: PSC

### L32 Pol Sci 103B International Politics

This is an introductory survey course. Its goal is to familiarize students with the basic concepts of International Relations (IR) as a subfield of political science and to introduce them to important issues, such as cooperation and conflict, independence, in the era of globalization, human rights and human development, and the environment.

### L32 Pol Sci 1041 First Year Seminar: Introduction to Political Theory I

Why is democracy a good form of government? What if a benevolent dictator arose who wrote and enforced laws that were just and equitable? What if she honored the sanctity of human life and its flourishing, guaranteed a full range of liberties to her citizens-including political ones, like the right of free speech and organization (but not including the right to rule)? Given the problems of most living democracies, why wouldn't this be a better regime than a democratic one? And are people really capable of governing themselves anyway; why should we trust them so? In short, what's so special about "democracy" and its corresponding idol, "public opinion" that people bow to them as hallowed virtues of a good society? In this class we will provide a framework in which these and other central questions of political theory have been and can be addressed. This course is designed to introduce students to the main theoretical issues of western political theory, including but not limited to the following concepts: justice, legitimacy, equality, democracy, liberty, sovereignty and the role of history in the political and social world. In short, the questions are meant to explore the underlying assumptions and themes of contemporary politics and political science research today. The course is designed around the careful reading of primary text materials and engagement with contemporary problems of politics available on the front pages of any daily newspaper. Although designed as a two semester class, students may enroll in either one or both. In this first semester we will lay out the fundamental themes of political theory in Plato's Republic and Aristotle's Politics asking, among other things, what justice is and what place democracy has among other forms of government. Passing briefly on Augustine and Aquinas's struggle with religion and civil society, we will emerge in modernity with Machiavelli's Prince and question whether the "good" and the "political" are or ought to be different aims. We conclude the semester with the social contract theory of Hobbes and Locke in which political legitimacy is based on the terms familiar to citizens of modernity: the right to rule is somehow related to a citizen's consent to be governed. In the Spring semester we will turn to the struggle that modernity and the Enlightenment raised for issues of politics including that of history, nature, institution building, and economics, guided by the texts of Rousseau, Hamilton and Madison, Tocqueville, Mill, Marx, Nietzsche and Weber.

Credit 3 units. A&S: FYS EN: S

---

### L32 Pol Sci 106 Introduction to Political Theory

This course offers an undergraduate level introduction to the field of political theory. We will focus on three major themes-social justice, power and freedom, and democracy-reading some canonical texts, such as Bentham's Introduction to the Principles of Morals and Legislation and Marx's Capital, but emphasizing contemporary works, such as those of John Rawls, Michael Walzer, Michel Foucault, and Robert Dahl.

---

### L32 Pol Sci 2010 Introduction to Environmental Policy

This course provides an introduction to and overview of environmental policy. Subjects covered include the policy process, the behavior of interest groups and political parties, and the actions of policymakers like Congress and the President. We will also examine issues such as pollution control, climate change, and biodiversity.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L32 Pol Sci 2100 Introduction to Migration Policy and Politics

Migration is a phenomenon in which people, individually or in groups, move from one territory to another. In this course, we will trace the process of migration and discuss the impact of migration on sending and host societies as well as on the migrants themselves. What drives people to migrate from their home communities? What challenges do they face along migration routes? As humans move, languages, ideas, and ways of life diffuse across territories. This diffusion can be integrated into host societies, or it can become a source of tension within the society. What political, social, and economic conditions facilitate this integration or tension? In this course, we will begin to answer these questions through the lens of two primary systems: 1. Central and North America, and 2. the Middle East, North Africa, and Europe. As we study the process of migration, you will work towards a research paper that critically analyzes the migration process using a case of your choice.

Credit 3 units. A&S IQ: SSC EN: S

---

### L32 Pol Sci 2123 Sophomore Seminar in Ethnic Violence

This course introduces students to the principal concepts, questions and answers in the study of ethnic conflict. The goal of the course is to build foundational knowledge on the study of ethnic politics and ethnic conflict. The course begins by addressing why, how and when ethnicity matters. We will study different theories of ethnically-based identification and mobilization. We will then move on to examine different types of ethnic conflict, ranging from ethnic violence in civil war to ethnic riots. In addition, we will study consequences of and alternative solutions to ethnic conflict. This course counts towards the distribution requirement for the Political Science major.

### L32 Pol Sci 2202 Disagreement, Extremism & Polarization

Americans are increasingly skeptical about the future of their democracy and about our ability to pursue equality and social justice within the existing political system, and many people identify irresolvable disagreement, political extremism, and partisan polarization as causes of the current crisis in American democracy. In this course, we will study disagreement, extremism, and polarization using insights and methods from philosophy, political science, and empirical psychology, with the aim of understanding these phenomena and the social and political challenges they pose. Our questions will include whether it is possible for reasonable people to disagree, whether democratic deliberation requires a background of agreement or "shared facts," how our moral psychology shapes our political beliefs, whether prejudice and bias can be eliminated from political

thinking, and whether there are some political positions that are so extreme they should not be taken seriously. There are no prerequisites for this course and no background in philosophy, political science, or psychology will be assumed

### L32 Pol Sci 227 Just Do It! Skills That Turn Passion Into Policy

The course will focus on skills related to the democratic expression of political rights and responsibilities. The course will balance background knowledge of the issues with application. Students will explore how to use coalition building and advocacy skills to relate to personal issues to public issues. Students will research a current Missouri bill, create a strategic plan for its passage or failure, and prepare to give testimony on such bill in a mock House of Representatives committee hearing. Students will also learn about ethical dilemmas in policy and politics and create a plan for turning their passions into policy.

Credit 1 unit. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L32 Pol Sci 240 Jewish Political Thought

The question of Jewish belonging in the Christian West has played a defining role in the formation of the modern state, and the afterlives of "the Jewish question" in Europe, America, and Israel continue to have significant influence on how political life is understood and evaluated. This course begins with classical Jewish sources on politics--including the nature of authority, national belonging, and territory--and then moves to a consideration of several crucial modern Jewish thinkers likely including Spinoza, Marx, and Arendt. The course will consistently consider topical contemporary questions about liberal democracy, totalitarianism, nationalism, Zionism, race, and secularism.

---

### L32 Pol Sci 2490 Reproducible Data Skills for Political Scientists

Reproducibility and open scientific practices are increasingly required of scientists and researchers. Training on how to apply these practices in data analysis has not kept up with demand. During this course, students will develop skills to meet this demand. This course uses a practical approach based on iterative application assignments that provide students with practical experience with real data problems.

Credit 3 units. A&S IQ: SSC, AN Arch: SSC Art: SSC EN: S

---

### L32 Pol Sci 2500 Zionism

Zionism is often thought of as a commitment to the principle that the Jewish People, as a distinct "people," has a right to self-determination in its own historical land of the biblical Palestine. Yet the history of the term and the set of ideologies show a much more complex understanding. In this course we trace the emergence of a number of different "Zionisms" that would lead to the creation of the modern state of Israel. And we explore how the political principles at the core of these ideologies have fared in the 65 years since the founding of the modern Jewish state. The course is at its heart applied political theory: a case study of the way that ideas emerge from historical events, take on a life of their own, and then shape real outcomes in the world. The readings will weave together history, philosophy, literature and government.

Same as L57 RelPol 250

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L32 Pol Sci 258 Law, Politics, and Society

This course is an introduction to the functions of law and the legal system in American society. The course material will stress the realities of the operation of the legal system (in contrast to legal mythology), as well as the continuous interaction and feedback between the legal and political systems. There are four specific objectives to the course: (1) to introduce you to legal concepts and legal theories; (2) to analyze the operation of the appellate courts, with particular emphasis on the U.S. Supreme Court; (3) to analyze the operation of American trial courts, especially juries and the criminal courts; and (4) to examine the linkages between culture and law. Not open to students who have previously taken L32 358.

Credit 3 units. A&S IQ: SSC Arch: SEM EN: S

---

### L32 Pol Sci 263 Data Science for Politics

We are on the doorstep of a new era of social science. Never before have political scientists had access to so much data about the attitudes and actions of individuals, institutions, and nations. Data on everything from the votes of members of the U.S. Senate in 1855 to terrorist attacks from around the globe are only a few clicks away. This class is designed to make you an active participant in this new data-rich world. The goal is to introduce you to the methods and practices by which you can use this data to answer questions that are important to us as political scientists and citizens. How many citizens currently approve of the president, and how do we know? What policies are most effective at reducing poverty? Which campaign ads are most effective at persuading voters? Can we affect the behavior of our Facebook friends just by sharing our opinions?

### L32 Pol Sci 3005 Fast Fashion and the Environment

Students will leave this term with a greater understanding of not just this phenomenon, but the policies that created and now maintain it. Students will have an opportunity to identify and evaluate fast fashion brand performance relative to their environmental obligations. They will also have an opportunity to design an international treaty mechanism to address the increased waste and harmful environmental consequences of the industry. Note: This course counts toward the undergraduate XXX subfield.

Credit 3 units. A&S IQ: SSC EN: S

---

### L32 Pol Sci 3008 The Stories that Win

We all know them. From fairy tales to bestsellers, legends of oral tradition to trend-setting points in the U.S. and global literary marketplace, they are the stories that win. These stories are rooted in a collective literary imagination that binds individual and community hopes + struggles. They are novels, or memoirs of political coming of age, tales of creative sparks that have led to iconic global brands and products, or narrative analyses that become collective origin stories. They speak to the relationship between expectations of justice and our varied political identities; they provide communal reference points during marked moments in history. These stories win by transcending the limits of time or through the entanglements of commercial success. This semester we delve into political memoirs; origin stories of athletes, iconic products, and CEOs; community narrative histories; fairy tales; and myths of national beginnings. We want to understand how power and the uses of history are central to making certain stories, especially "origin stories," the ones public figures deploy to represent their

identity, the stories we as a nation tell about ourselves over and over, and the ones that become our collective points of reference-that is, the stories that win. And we want to know why other stories-and the people they're about-are so often left out of our collective imagination.

Credit 3 units. A&S IQ: HUM EN: H

---

### L32 Pol Sci 3010 Gender, Politics, and Policy in the United States

This course surveys central topics in the study of gender and politics, covering such issues as women's participation in political parties and social movements, women as voters and candidates in political elections, feminism and the state, and gender and international politics. It will draw on examples from various world regions and time periods to analyze similarities and differences across cases around the globe.

### L32 Pol Sci 3011 Computational Modeling in the Social Sciences

This course will introduce students to the theory and practice of computational modeling in social science. Computational modeling allows us to explore topics - including complexity, emergence, and dynamics - that are difficult to study using traditional analytic methods. This course will cover the theoretical foundations behind computational modeling in addition to offering an introduction to the design and programming of such models.

Credit 3 units. A&S IQ: SSC EN: S

---

### L32 Pol Sci 3012 Advanced Modeling in the Social Sciences

This course explores advanced topics and issues in the building and validation of models in the social sciences. The principal component of the course is the design and development of an individual research project by each student. The conclusion of the course involves a public research symposium with a poster session in which all students will present their models and findings to the broader campus community. PREREQUISITES: L32 Political Science 3011 Computational Modeling in Social Science.

Credit 3 units. A&S IQ: SSC EN: S

---

### L32 Pol Sci 3016 African American Politics

Race has been a central issue in United States politics since the country's founding. From debates about the South's "peculiar institution" to the Civil Rights Movement to contemporary discussions about a post-racial America, political discourse in the United States has often revolved around issues of race. In this course, we will examine the major political issues, struggles, and ideologies of African Americans in order to better understand U.S. Politics. Topics will include early and contemporary African American political thought, racism and segregation, inequality, the politics of the Civil Rights Movement, African American participation in electoral politics, and other contemporary issues. By the end of this course, students should be able to: examine current events related to race through the lens of political science concepts; understand the historical causes of ongoing conflicts and debates related to race in the United States; understand the arguments made by Black political thinkers; read and apply political science literature to major questions in the field of race.

Credit 3 units. A&S IQ: SSC, SC Arch: SSC Art: SSC EN: S

---

### L32 Pol Sci 3017 It's U.S. Against Them

The term "American Exceptionalism" is often used to refer to the special character of the United States as a uniquely free nation based on democratic ideals and personal liberty. Sometimes this special character is thought to be institutionalized in the American political system. In this course, we put the United States in comparative perspective, examining how it compares with other countries in

terms of -- among other things -- constitutional provisions, parties and elections, and the functioning of its branches of government. A major component of the course will involve data exploration and visualization.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, IS EN: S

---

### L32 Pol Sci 3024 International Organizations

This course surveys in an historically and theoretically informed fashion the role of various international institutions in international relations. It addresses the fundamental question of the contribution of international institutions to world order. The course first traces the historical evolution of international organizations before turning to international institutions since World War II. It then focuses on the following: the most important regional international organization, the European Union; the most important international organizations dealing with the issues of peace and security, the United Nations and NATO; and the major international economic institutions, the WTO, the IMF, and the World Bank. Prerequisite: L32 103B.

---

### L32 Pol Sci 3031 Race and Ethnicity in American Politics

This seminar will discuss the continuing importance of race and ethnicity in American politics and the politics of racial minority groups in America. It will examine the disadvantage minorities have in the American political structure including problems with political participation. It will examine how the structure and functions of the branches of government and its bureaucracy affect the aspirations of minorities. The roll of pressure groups on political structure will be discussed. Additional discussion will focus on urban politics and tensions.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

---

### L32 Pol Sci 3044 Foundations of American Democracy

Since its founding, the United States of America has been strongly identified with principles of democratic rule. This course provides an introduction to some philosophical and historical foundations of American democracy. Over the course of the semester, we will ask what democracy means, and what it requires. We will examine thinking about political rights and liberty at the American founding. We will ask what democratic inclusion and political equality entail. We will ask what democracy means, and what it should mean, in the American context, and whether and to what extent American institutions embody democratic ideals.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

### L32 Pol Sci 3055 The Comparative Study of Legislative Institutions

This course focuses on understanding the variation in legislative institutions around the world.

Credit 3 units. A&S IQ: SSC BU: IS EN: S

---

### L32 Pol Sci 306 American Political Thought

This is a course on American political and constitutional thought. The main theme is the problem of freedom: how it should be understood, and the constitutional and other conditions which sustain it. We will also touch on questions of leadership, class, and foreign policy as they relate to the main theme. We begin with the political thought of the American colonists, then turn to the Federalist/Anti-Federalist debate on the constitution, and trace these lines of thinking to a point just before the outbreak of the Civil War. Apart from writings of prominent American political thinkers such as Madison, Jefferson, Adams, Hamilton, and Calhoun, we will also consider the work of the foreign observer of American life and honorary American, Alexis de Tocqueville.

Credit 3 units.

---

### L32 Pol Sci 3070 Politics and Policymaking in the American States

The American federal system is often overlooked in discussions about politics in the United States; however, state governments unquestionably touch the lives of Americans everyday. As such, an education in American politics is not complete without serious examination of state governments and their political institutions. This course illuminates the importance of the American states in US politics and policymaking by critically examining topics such as : intergovernmental relations, the historical evolution of American federalism, the organization and processes associated with state legislative, executive, and judicial branches, state elections, political parties, interest groups and specific state policy areas such as - budgeting, welfare, education, and the environment. Prerequisites: Political Science L32 101B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L32 Pol Sci 3073 Global War on Terrorism

This course presents an historical assessment of the Global War on Terrorism (GWOT) from the perspective of its major participants: militant Sunni Islamist jihadists, especially the Al-Qaeda network, and the nation states that oppose them, particularly the United States and its allies. The course then concludes by analyzing the current state and future of Islamist jihad and the GWOT.

### L32 Pol Sci 3074 United Nations Institutions and Processes

How do countries and non-state actors cooperate on issues that transcend international borders? What are the unique opportunities and challenges to addressing global issues in international organizations, especially the United Nations (UN)? In this course, we will examine the historical foundations of the UN, the structure of the UN, and the nature of representation in the United Nations. We will analyze the conditions under which the UN is likely to succeed or fail at addressing a range of security, economic and social, and human rights issues. To facilitate this analysis, we will examine historical and contemporary UN work to address climate change, conflict, humanitarian assistance, and human rights. This class is part of a Model United Nations program at Washington University in St. Louis, which will travel to the National Model United Nations conference in New York in the spring. It is the first course in a two-course series. Students must complete both the fall and the spring course to be eligible for the New York conference team.

Credit 3 units. A&S IQ: SSC EN: S

---

### L32 Pol Sci 3090 Civil War and Peace

This course examines the causes and consequences of intra-state conflict, as well as the potential solutions to it, drawing on examples from countries throughout the world, including Bosnia-Herzegovina, India, Iraq, Russia, Rwanda, Spain, et cetera. We will consider many potential causes of intra-state violence, including ethnic and religious identities, economic and security concerns, elite manipulation, and international diffusion. In order to understand the challenges countries face recovering from violence, we will subsequently examine different ways in which conflicts are conducted, as well as their consequences, including economic underdevelopment, rape, child soldiers, and disease. Finally, using what we have learned about the causes and consequences of conflict, we will analyze the utility of different tools for managing intra-state conflict, including, but not limited to, minority representation, consociationalism, decentralization and partition.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, IS EN: S

---

**L32 Pol Sci 3093 Politics of the European Union**

This course is designed to introduce undergraduates at the junior and senior level to the history and politics of the European Union (EU) and European integration. In the first part of the course, students will learn about the interplay of theory and practice in the history of European integration. In the second part, they will study the institutions and decision-making processes with reference to the theoretical concepts developed earlier in the course. From there, we will examine some of the key EU policies and their implementation during the third part of the course. In the final two sections of the course, we will look at constitutional politics and some of the more recent policies and developments.

Credit 3 units. A&S IQ: LCD, SSC BU: IS EN: S

---

**L32 Pol Sci 3104 Political Psychology**

Political psychology is a rapidly growing field of research located at the intersection of psychology and political science. Broadly, political psychology helps us understand how individuals think and feel about politics, and how these psychological factors shape political behavior. This course is designed to examine the major areas of research on how psychological factors explain important political phenomena, such as political participation, vote choice, polarization, partisanship, media consumption, political knowledge, political communication, and policy preferences. This course will also equip students with skills in information literacy that will improve their ability to conduct research, interrogate information sources, and evaluate biases in information processing that shape political decision-making

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L32 Pol Sci 3172 Sports, Policy, and Politics**

The students participating in this class should expect to learn the ways in which sport and politics intersect; how sport is both the cause, and result, of political processes; how society's attachment to teams is linked to our identities, both social and political; how sport defines us physically, reflects class, and reproduces shared history. This is primarily a political science course, and no prior knowledge of sport in general, or any sport in particular, is necessary.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L32 Pol Sci 3180 Democracy: Causes & Consequences**

This course will examine the major international and domestic causes and consequences of democracy worldwide.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L32 Pol Sci 3193 Politics of Migration in the European Union**

As the European Union has expanded both in membership and policy scope, so too have its physical borders and political constructions of membership. Migration patterns - both within the European Union and from outside of it - are closely connected to this deepening integration and changing patterns of multi-level governance. In this course, we will trace the process of migration and discuss the impact of migration on sending and host societies as well as on the migrants themselves. What drives people to migrate from their home communities? What challenges do they face along migration routes? As humans move, languages, ideas, and ways of life diffuse across territories. This diffusion can be integrated into host societies, or it can become a source of tension within the society. What political, social, and economic conditions facilitate this integration or tension? After discussing general frameworks and theories from the scholarship of migration, we will focus our inquiries on specific cases from within and near the European Union.

Credit 3 units. A&S IQ: SSC, SC Arch: SSC Art: SSC EN: S

---

---

**L32 Pol Sci 3199 Teaching Practicum in Political Science**

This course is an opportunity for students to assist in course instruction, tutoring, and preparation of problems, readings, and exam materials with permission and under supervision of instructor. Class hours to be arranged. Prerequisite: permission of instructor. Must be enrolled through department. See department for approval form.

Credit 3 units.

---

**L32 Pol Sci 321 Comparative European Politics**

This course is designed to provide students with an introduction to politics in Europe, with a focus on national politics. The course has two main goals. One goal is that students acquire a general understanding of the institutions of democratic governance and how they affect how voters preferences are translated into government policy. As most European states are variations of parliamentary democracies, we will pay particular attention to the connection between voters and policy-makers through parliamentary institutions. The second goal is that students achieve a basic understanding of specific political systems in Europe and appreciate current political issues particularly those related to democratic transitions in Eastern Europe. PREREQUISITES: L32 102B Intro to Comparative Politics, L32 363 Quantitative Political Methodology (can be taken concurrently)

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, IS

---

**L32 Pol Sci 3211 Public Opinion and American Democracy**

This course is about the salience of public opinion and its influence on American Politics. Topics to be covered include many of the theories developed to explain how public opinion is formed, if and why it changes, and the relationship between public opinion and the political behavior of citizens and elites. Therefore, the course will describe and analyze many of the factors that influence the formation, structure and variation in public opinion: information processing, education, core values, racial attitudes, political orientation (ideology and party identification), political elites, social groups, the media and religion. Additional topics include presidential approval, congressional approval, and the relationship between public opinion and public policy. The course will also train students in several concepts of statistical analysis (assuming no prior knowledge) so that students can use these tools as part of their own research projects. Prerequisites: Previous coursework in American politics or communications.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

---

**L32 Pol Sci 3240 The Political Economy of Public Goods**

This course explores the nature of public goods by investigating the economic and political rationales for providing them. We will explore the endogenous creation of public goods, such as the formation of mutually-agreed upon Constitutions to protect property rights and the exogenous imposition of public goods, such as the regulatory framework that provides clean air. Through the use of efficiency analysis, we will explore the costs and benefits to alternative institutional arrangements, such as private property or market exchanges, to the government or voluntary provision of public goods.

Credit 3 units.

---

**L32 Pol Sci 3255 Development of the American Constitution**

The U.S. Constitution has been so long maintained because it has adapted to new circumstances. Contrary to common mythology, this adaptation goes far beyond formal amendment and court interpretation. But past performance is no guarantee of future results. The course examines the processes through which American constitutional democracy has developed, considers its successes and failures, and assesses some of its most pressing challenges. In doing so the course treats topics such as: the Electoral College; the justice system; executive powers in war and peace; Congress versus the president; regulation and taxation; civil rights and Reconstructions; amendment politics; and constitutional rhetoric and beliefs.

### L32 Pol Sci 326B Latin-American Politics

This course is an introduction to the politics in Latin America, focusing on the trend toward the establishment of democracy. We examine the impact of political culture, economic development, and the legacy of authoritarian regimes on contemporary politics. The course also reviews many of the most pressing challenges confronting governments Latin American governments: the role of the military in politics, the reform of political institutions, threats from radical guerrillas and drug traffickers, debt and economic restructuring, and relations with the United States. Country studies focus on Argentina, Brazil, Chile, Peru, Mexico, and Nicaragua. Prerequisites: 100-level introductory course in Political Science or its equivalent in History or IAS.

### L32 Pol Sci 3292 Topics in Politics: Modern South Asian Politics

This course will focus on the recent political history and development of South Asia. It will begin with a review of the British colonial period and the Independence movement. The remainder of the course will examine different political issues in India, Pakistan, Bangladesh, and Sri Lanka. Topics will include political mobilization, land reform, law and politics, social movements, religious and caste politics, the rise of religious nationalism, and political control of the economy. Course website: <http://artsci.wustl.edu/~polisci/parikh/asian/>

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS

---

### L32 Pol Sci 3296 Race and Ethnicity in the United States

This course is designed to explore relations within and between the racial and ethnic groups of the United States. Students examine the social, economic, and political similarities and differences of African Americans, Asian-Americans, Latinos, and New Immigrants that distinguish their American experience. Of particular interest are their respective experiences in relation to one another and the majority population for understanding the origins of conflict and unanimity within and between the different groups. Students will pay specific attention to events in Ferguson, Missouri and the tensions between political leaders, policing and minorities more generally, the disproportionate levels of poverty experienced by African Americans and Mexican-Americans, and the vilifying of certain minorities by the majority population.

---

### L32 Pol Sci 3300 Terrorism and Counterterrorism

What is terrorism, when is it used, and how can we stop it? This course will tackle these challenging questions, examining both the use of terrorism in political conflict and the ways in which states have responded to these threats. Crucially, we will engage in critical discussions about the definition of terrorism - is one person's terrorist really another person's freedom fighter, as the saying goes? We will also explore the strategic logic of terrorism - why do individuals choose to engage in this practice and why it is an effective or ineffective tactic of political violence? Importantly, we will also examine the psychology of terrorism, investigating how the mass public and state leaders react to and cope with terrorist violence. Specific examples of potential topics include: the use of terrorism in anti-colonial and separatist movements, the history of terrorism in the United States from the Ku Klux Klan to jihadism, the post 9/11 "War on Terror," and the resurgence of white nationalist terrorism around the world. By the end of this course,

students should have a clear understanding of what terrorism is, why groups choose this strategy, how citizens and political leaders respond to this violence, and the implications this has for countering terrorism and extremism around the globe today.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L32 Pol Sci 3302 Politics and Policies of Immigration in the United States

This class examines the history and politics of American immigration from colonial times to the present. It begins with an overview of the colonial period, then discusses the immigration waves of the 19th and early 20th centuries, and concludes with an examination of current topics and debates about immigration. Issues include racial, ethnic and class relations among groups; changes in immigration policies over time; comparative group experiences; transnational issues in immigration; and the impact of immigration on other American social and political processes and events. This class is a WI and modified version of L32-226/AMCS L98-202. If you have taken this course, then students should \*not\* take this course. Because this is a WI class, we also will spend time studying research paper design and writing.

Credit 3 units. A&S IQ: SSC, WI EN: S

---

### L32 Pol Sci 3313 Theories of Social Justice

This course overviews the leading contemporary conceptions of social justice, including utilitarian, liberal, libertarian, communitarian, and deliberative-democratic theories, and their implications for the design of political, economic, and social institutions. In addition, this course will examine special topics such as justice between generations, global justice, and the rights of resistance or disobedience.

Credit 3 units. A&S IQ: SSC EN: S

---

### L32 Pol Sci 331B Gender and American Politics

This course examines the ways in which issues pertaining to gender are salient in U.S. politics. The course is divided into four parts. First, we will examine theoretical approaches to the study of gender and politics, including the use of gender as an analytical category, and the relationship between gender, race, ethnicity and power. Second, we will study gender-based social movements, including the suffrage and woman's rights movements, women's participation in the civil rights movement, the contemporary feminist and anti-feminist movements, the gay rights/queer movement and the women's peace movement. Third, we will examine the role of gender in the electoral arena, in terms of how it affects voting, running for office and being in office. Finally, we will examine contemporary debates about public policy issues, including the integration of women and gays in the military, sexual harassment, pornography and equal rights.

---

### L32 Pol Sci 3323 The Democracy Lab

The U.S. states are often called laboratories of democracy because the lessons learned from an "experiment" in one state or city can inform other governments. This course embraces the idea that we can act as scientists in the laboratories of local government. The course teaches students about research design. We also help them design their own experiments and then give students the opportunity to work with local officials to help design, conduct, and analyze an experiment relating to governance.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L32 Pol Sci 3326 Topics in Politics: Legal and Political**

This course is designed to be a readings and discussion course in Supreme Court decisions. The focus is on extensive coverage of the court's decisions in particular subject areas and their relationship to political and social factors and to public policies. The purpose of the course is to expose students in the social sciences to the decisions of the U.S. Supreme Court as indicators of political and sociological phenomena. PREREQUISITE: PERMISSION OF INSTRUCTOR ONLY. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L32 Pol Sci 332B Energy Politics**

This course considers the major issues in these increasingly important areas of public policy. We will discuss the importance of political processes and actors on such phenomenon as pollution, global warming and wilderness protection. This course emphasizes the American experience but also considers international implications. Two lectures and one section meeting each week. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: ETH EN: S

---

**L32 Pol Sci 333B Individual and Community**

What social, political, and cultural forces shape the individuality of people and yet make them part of not just one community but many, each of which is greater than the sum of the individuals that comprise it? What role do families and friends fill in this process? Students explore answers to these questions by reading theories and case studies that try to explain the foundations of individuals' sense of self and the interdependence and responsibilities of individuals, families, and communities to one another. Cases students read highlight (1) how family and communal experiences (like school) influence individuals and (2) how virtual (online) and non-virtual communities are structured and sustained as social entities. In addition to readings, the class will rely on guests from the "real world" as well as field trips into virtual and non-virtual communities. AMCS Majors may count this course for Fieldwork credit with permission of instructor; a supplemental assignment might be required. Same as L98 AMCS 301B. Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC BU: BA, ETH, IS EN: S

---

**L32 Pol Sci 3341 Topics in Politics: Free Speech on Campus**

Credit 1 unit.

---

**L32 Pol Sci 335A International Organizations**

The students participating in this course will have an opportunity to answer some of the most pressing questions about governance in the international system today. Why did the U.K. leave the European Union, and what does it mean for the remaining members? Is there a chance for international governance to address the climate crisis? How does NGO advocacy affect the behavior of nations? The course will resemble a graduate-level seminar; we will spend most of the class period in discussion of the weekly readings. Students will have an opportunity to independently study an issue or organization of their choosing, thus gaining a measure of expertise in an area of personal interest. Credit 3 units.

---

**L32 Pol Sci 336 Topics: American Elections and Voting Behavior**

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests. Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

---

**L32 Pol Sci 3363 Interchangeables, Influentials, and Essentials**

Do you want to know how to obtain power? How to influence the powerful? Or even how to unseat those in power? In this course, we will focus on how leaders, of all types, get and keep their jobs. Regardless of setting - democratic or dictatorial (or corporate, for that matter) - it is all about those whom the leader finds to be interchangeable, those the leader finds influential, and those who are essential. You will learn the "Rules to Rule By" and why, when leaders follow them, they often behave badly causing those they govern to suffer. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L32 Pol Sci 3399 Political Violence**

This course studies the ways non-state groups use violence in pursuit of political goals. During the semester we will engage with contemporary research on political violence, including civil war, ethnic conflict, terrorism and communal riots. The goal of the course is to introduce students to major questions related to the study of political violence. What explains the onset of violence? Why do individuals choose to join violent movements? Is non-violent protest more effective than the use of violent tactics? During the semester, we will read a large volume of within-country and cross-national quantitative research on political violence and also examine several cases in detail, including ethnic riots in India, Rwandan genocide, and Kurdish conflict in Turkey. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L32 Pol Sci 3400 Social and Political Philosophy**

Study of certain fundamental issues concerning government, society, and culture. For example: what are the nature and limits of legitimate political authority? Are ordinary human beings capable of governing themselves justly? Do citizens have a duty to obey the state? If so, to what extent, if at all, is that duty grounded in consent or contract? Should the state limit or regulate the personal relationships of citizens, such as marriage, family, and sexuality? How should social institutions rectify a history of political or social injustice against oppressed groups? Readings from historical and contemporary sources. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP. Same as L30 Phil 340F. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, HUM EN: H

---

**L32 Pol Sci 3401 Topics in Political Thought**

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests. Credit 3 units. A&S IQ: SSC Art: SSC BU: ETH

---

**L32 Pol Sci 3403 The Politics of Congressional Elections**

This course will introduce students to the study of American legislative elections. The first part of the course will focus on congressional election campaigns, in which we discuss who runs for office, the incumbency advantage, campaign finance, congressional primaries, electoral competition, voter turnout, and vote choice. The second part of the course examines how electoral factors affect legislative politics, focusing on questions involving representation, accountability, and lawmaking. PREREQ: L32 101B Intro to American Politics. Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

**L32 Pol Sci 342 The American Presidency**

Consideration of part played by the president in American politics and public policy. The powers of the president; the staffing and organization of the executive office; the relations of the president with Congress, the bureaucracy, and other participants in American politics; presidential elections. Recommended: Pol Sci 101B. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L32 Pol Sci 3431 Constitutional Law

Introduction to constitutional law and practice in the United States. Emphasis on the role of the U.S. Supreme Court as an interpreter of the Constitution.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L32 Pol Sci 344 Courts and Civil Liberties

This course focuses on constitutional law principles in the Bill of Rights, and examines how Supreme Court decisions influence these principles in everyday life. We explore how the courts, and particularly the Supreme Court, have interpreted these rights in light of changing times and emerging issues. Topics include the First Amendment; free exercise of religion and the establishment clause; freedom of speech, assembly and association; freedom of the press; the Fourth Amendment and the rights of those accused and convicted of crimes; the right to privacy, including reproductive freedom and the right to die; equal protection and civil rights, including race, gender, sexual orientation; immigrants' rights and voting rights; and civil liberties after September 11. Recommended for the Liberal Arts and Business (LAB) Certificate.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, ETH, HUM

---

### L32 Pol Sci 3441 Defendant's Rights

This course explores the operations of the American criminal justice system. Substantial emphasis on the constitutional rights accorded to the criminally accused. Readings consist primarily, but not exclusively, of Supreme Court cases.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA, ETH EN: S

---

### L32 Pol Sci 345 The Legislative Process

Structure and behavioral patterns of American legislative bodies. Primary emphasis on the U.S. Congress, with attention to state legislatures for comparative purposes. Representation, internal patterns of influence, and policy-making processes. Prerequisite: junior standing.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

### L32 Pol Sci 3462 The Politics of Privacy in the Digital Age

This course explores the changing nature of privacy in contemporary society.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: ETH EN: S UColl: PSA, PSC

---

### L32 Pol Sci 3470 Representation and Political Accountability

Political representation deals with the correspondence between citizen preferences and public policies. This course examines the critical role elections play in linking the two. Topics to be covered include the influence of interest groups, the media, and political parties on elections and policymaking. We will also explore how variation in the electoral rules, such as the rules governing campaign finance and methods of conducting party primaries, influence electoral politics. Finally, we will examine how separation of powers potentially attenuates the electoral connection between voters and elected officials.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L32 Pol Sci 349 Politics in Bureaucracies

Focuses on politics and political conflicts involving bureaucratic organizations, primarily but not exclusively those of the federal government. Attention given to the characteristics of bureaucratic organizations and their members; their relations with one another as well as with other participants in policy making also considered.

Major activities within bureaucracies--planning, program development, organizing, budgeting, and service delivery--discussed with a view to clarifying their political implications and consequences; problems associated with controlling and changing bureaucracies.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

---

### L32 Pol Sci 3490 Survey Design and Analysis

Survey research is an important method that political scientists often use to understand people in the world around us. By asking a standardized set of questions to a random sample of respondents, we can make inferences regarding the opinions and behavior of the larger population from which it was drawn. Surveys also offer numerous opportunities for experimental research, allowing scholars to make confident causal claims about the determinants of public opinion and behavior. In recent years, the advent of Internet-based surveying and online recruitment of respondents has "democratized" survey research, allowing many researchers and scholars with limited resources to design and conduct their own surveys from scratch. Surveys are also increasingly conducted around the world, outside of the context of advanced democracies where this method originated. Yet these developments have introduced new challenges in terms of ensuring that inferences drawn from survey research are valid. Topics include sampling, survey modes, questionnaire design, survey experiments, pre-analysis plans, ethics and the Institutional Review Board, and analyzing survey data. Prerequisites: L32 263, L32 363 or equivalent or with instructor permission.

Credit 3 units. A&S IQ: SSC, AN Arch: SSC Art: SSC EN: S

---

### L32 Pol Sci 3507 Legal Conflict in Modern American Society

Thousands of lawsuits are filed daily in the state and federal courts of the United States. The disputes underlying those lawsuits are as messy and complex as the human, commercial, cultural and political dynamics that trigger them, and the legal processes for resolving those disputes are expensive, time-consuming and, for most citizens, seemingly impenetrable. At the same time law and legal conflict permeate public discourse in the United States to a degree that is unique in the world, even among the community of long-established democracies. The overarching objective of the course is to prepare our undergraduate students to participate constructively in that discourse by providing them with a conceptual framework for understanding both the conduct and resolution of legal conflict by American legal institutions, and the evolution of - - and values underlying - - the substantive law American courts apply to those conflicts. This is, at core, a course in the kind of legal or litigation "literacy" that should be expected of the graduates of first-tier American universities. Some of the legal controversies that will be used to help develop that "literacy" include those surrounding the permissible use of lethal force in self-defense, the constitutionality of affirmative action in university admissions, contracts that are unconscionably one-sided, sexual harassment in the workplace, the duty of landlords to prevent criminal assaults on their tenants, groundwater pollution alleged to cause pediatric cancers, and warrantless searches of cellphone locator data by police.

### L32 Pol Sci 3510 Topics in American Politics: The Supreme Court

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA

---

### **L32 Pol Sci 3511 The Politics of the US Supreme Court**

The principal purpose of this course is to provide students with a systematic understanding of the U.S. Supreme Court. After discussing the social scientific study of the Court, we will examine theoretical issues regarding judicial process and politics. This course, unlike the constitutional law classes, does not focus on legal doctrine; rather, it examines political aspects of the Supreme Court, with an emphasis on the social scientific literature on law and politics. We will seek to understand phenomena such as the following: (1) Why does the Court change law? (2) Under what circumstances does the Court overrule precedent? (3) Do elected politicians (such as members of congress) influence how the Court decides cases (4) How does bargaining among the Justices influence the development of legal doctrine? One of the themes in this course is how we can understand the judiciary in terms of a political "game." That is, we will examine how the various participants in the judiciary attempt to achieve their goals within the constraints of the institution and its surrounding environment. Additionally, students will write a major research paper in which they will explain a specific set of judicial behaviors or events. The paper requires each student to undertake original research (i.e., the gathering of original evidence) in an effort to test their explanation.  
Credit 3 units. A&S IQ: SSC EN: S

---

### **L32 Pol Sci 3512 The Supreme Court, Law, and Public Policy**

Learning how courts interpret policy has become an important component of the policymaker's toolkit. This course aims to introduce policy-oriented students to how Constitutional interpretation touches upon pressing policy questions. Students will engage with what courts expect to see from policymakers, while also learning how to read cases from a lawyer's perspective. Topics covered include federalism, LGBT rights, race and ethnicity, criminal justice issues, voting rights, and political questions and official immunity. Texts will include cases decided by the Supreme Court (including cases from recent terms), and also contemporary scholarship on judicial politics and decision making. Although our focus will be on the Supreme Court, the pedagogical emphasis will be on what policy makers can expect from the courts in terms of federal and state policy implementation. Our goal is that by the end of this course you will be able to: 1. Understand when federal courts will and will not intervene, particularly with regard to key policy and political issues 2. Think critically and assess the ability of courts to be used as instruments of social change 3. Understand what oversight, if any, the courts exercise over federal policy making, including by administrative agencies The course content is divided into four broad units, all of which are essential for understanding the courts' role in the promotion and interpretation of national policy. These are (1) federal courts, their nature, and their limited powers, (2) the courts' role in social movements and as "protectors" of individual rights and liberties, (3) political questions and immunity, and (4) the complicated relationship between courts and administrative agencies. Note: This course counts toward the undergraduate American Politics subfield.  
Credit 3 units. A&S IQ: SSC EN: S

---

### **L32 Pol Sci 3551 The Welfare State and Social Policy in America**

How can we understand the recent debate about fundamental health care reform? Should social security be partially or wholly privatized? Was the 1996 welfare reform a success? Contemporary political questions frequently focus on the American welfare state and the social policies that comprise it. The first half of this course describes the American welfare state broadly construed, places it in a comparative context, and elucidates major political science explanations for the size and scope of American social policy. We touch on several areas of social policy while constructing the generalized lenses through which particular political outcomes can be understood. The second part of the course then focuses on three major aspects of the American welfare state: health care, old age pensions, and policies related to work, poverty, and inequality.  
Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

### **L32 Pol Sci 3552 Political Economy of Democracy**

In the last few years a number of important books have appeared that combine elements of economics reasoning and political science, in an effort to understand the wide variation in economic development in the world. This course will deal with the logic apparatus underpinning these books. In addition, the course will introduce the student to the theoretical apparatus that can be used to examine democratic institutions in the developed world, and the success or otherwise of moves to democratization in the less developed world.  
Credit 3 units. A&S IQ: SSC EN: S

---

### **L32 Pol Sci 3561 Topics in Politics**

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S

---

### **L32 Pol Sci 3565 Understanding Political Protest and Violence**

Collective action in the political sphere ranges from nonviolent demonstrations to violent conflict. We will study a range of cases of political protest, from historical to contemporary, using theories and evidence from political science and other disciplines, to identify individual motivations, political contexts, and patterns across time and space. We will analyze a handful of cases in depth, using previously collected data that ranges from interviews to social media accounts and applying techniques suitable to non-quantitative data.  
Credit 3 units. A&S IQ: SSC EN: S

---

### **L32 Pol Sci 357B Gender and Politics in Global Perspective**

This course surveys central topics in the study of gender and politics, covering such issues as women's participation in political parties and social movements, women as voters and candidates in political elections, feminism and the state, and gender and international politics. It will draw on examples from various world regions and time periods to analyze similarities and differences across cases around the globe.  
Credit 3 units. A&S IQ: SSC, SD Arch: SEM, SSC Art: SSC BU: HUM

---

### **L32 Pol Sci 358 Law, Politics and Society**

This course is an introduction to the functions of law and the legal system in American society. The course material will stress the realities of the operation of the legal system (in contrast to legal mythology) as well as the continuous interaction and feedback between the legal and political systems. There are four specific objectives of this course: (1) to introduce students to legal concepts and legal theories; (2) to analyze the operation of the appellate courts, with particular emphasis on the U.S. Supreme Court; (3) to analyze the operation of American trial courts, especially juries and the criminal courts; and (4) to examine the linkages between culture and law.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### **L32 Pol Sci 358A Conscience and Religion in American Politics**

Conscience is as American as apple pie and baseball, but its meaning and implications are deeply contested in American religion and politics. What is conscience? To what extent is conscience laden with theological -- and, more specifically, Christian -- commitments? What role should conscience, whether religious or ethical, play in political life? By considering what conscience means and what vision of politics it implies, we will reflect on what it means to be American: how religion should relate to politics, how individuals should engage with democratic laws and norms, and how religious and political dissenters might oppose American politics. We will focus on key moments in the history of American religion and politics through the lens of conscience, from the Interwar Period, the perceived threat of communism during

the Cold War, the Civil Rights Movement, and the Vietnam War to the "culture wars" on abortion, marriage equality, LGBTQ rights, and the death penalty. This course draws on interdisciplinary sources from religious studies, political theory, law, and history in 20th- and 21st-century American politics.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH EN: H

---

### L32 Pol Sci 359 The Mathematics of Elections

Voting procedures provide the commonest means of aggregating the preferences of individuals into societal outcomes. These procedures play an integral role in our daily lives; from having a show of hands to decide which type of pizza to order for a club meeting, to electing a president. This course will examine the effects that different voting procedures have on how groups make decisions. We will evaluate electoral systems mathematically, by considering the various properties that procedures may or may not satisfy. A classic example is Arrow's Impossibility Theorem, which tells us that every electoral system must fail to satisfy one or more criteria of fairness or sensibility. In addition to Arrow's claim we will examine other legislative paradoxes, and learn why the choice of electoral procedure is critical to our understanding of how "good" and "bad" decisions can be made. We will also discuss the comparative properties of electoral systems in operation, such as fairness, proportionality, representativeness, and legitimacy.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

### L32 Pol Sci 3610 Legislative Politics

This course is an introduction to the politics of the U.S. Congress and the federal lawmaking process. We will focus on the behavior of individual legislators and the role that they play in crafting federal legislation in policy areas such as healthcare, civil rights and the environment. In general we examine questions such as: Why do legislators behave as they do? Whose interests are being represented?

Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

### L32 Pol Sci 362 Politics and the Theory of Games

This course is intended to cover through analytical discussion and illustrations the basic concepts and major achievements of Game Theory in different sub-fields of research in the social sciences today. We will discuss examples of the usefulness of cooperative and non-cooperative game theory to the study of human behavior in general and political science and political economy in particular.

Credit 3 units. A&S IQ: SSC, AN Arch: SSC Art: SSC BU: BA EN: S

---

### L32 Pol Sci 363 Quantitative Political Methodology

This is an introduction to research methodology and quantitative analysis for social scientists. Students will be introduced to the logic of social scientific inquiry, and to the basic statistical tools used to study politics. Students will learn and apply the following to answer substantive questions: measurement, descriptive analysis, correlation, graphical analysis, hypothesis testing, confidence intervals, analysis of variance, and regression analysis. Major components of the course include learning how to collect, manage, and analyze data using computer software, and how to effectively communicate to others results from statistical analyses. Students will work collaboratively on research projects where they pose their own questions, design a study, collect and analyze the data, and present their findings in a research paper.

Credit 3 units. A&S IQ: SSC, AN Arch: SSC Art: SSC EN: S

---

### L32 Pol Sci 3690 Politics of International Trade

In this course we will study the relationship between international trade and domestic politics. We will cover the basic models of international trade, the distributional consequences of international trade, the relationship between trade and economic development, an analysis of the trade protectionism (causes and consequences) and an analysis of international organizations related to international trade (special focus on the World Trade Organization). Prerequisites: L32 103B.

### L32 Pol Sci 372 Topics in International Politics

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Credit 3 units. A&S IQ: SSC BU: IS EN: S

---

### L32 Pol Sci 3722 International Politics, Trust and Public Health

Trust in government shapes a range of important political and social behaviors. In general, low trust in government reduces individuals' willingness to engage and comply with its institutions and policies. Consequently, low levels of trust in government hinder the state's ability to effectively lead during crises, as citizens with a wary view of the state are unlikely to comply with state directives that have direct impact on their personal lives. The COVID-19 pandemic highlighted the potentially devastating consequences of low levels of trust in government, as individuals around the globe with lower levels of trust were less likely to follow government public health recommendations meant to slow infections and deaths. Furthermore, the adverse consequences of trust deficits extend well beyond the recent COVID-19 pandemic to perceptions of health services more generally. This course analyzes the links between trust and public health outcomes, paying special attention to the different sources of low trust. For example, low trust in government can stem from perceptions of recent performance, and thus be amenable to public relations campaigns to improve citizens' perceptions. This view is consistent with the approach of international organizations such as the Organization for Economic Cooperation and Development (OECD) and the United Nations (UN), who have focused on short-term programs to promote public trust in government as a means to achieve widespread vaccination. Alternatively, trust may result from the lingering effects of influential and traumatic historical events, such as armed conflicts or systematic repression against a particular group or geographic area. Indeed, prominent research in political science and economics indicates that trust in government has enduring geographic variation and is, at least in part, a product of deeply historical factors. We explore how the sources of low trust among different groups of citizens influences possible policy solutions to improving levels of trust and, consequently, key public health outcomes. We also explore factors other than trust that influence individuals' adherence to public health recommendations.

Credit 3 units. A&S IQ: SSC EN: S

---

### L32 Pol Sci 373 International Political Economy

Analysis of the interplay of economics and politics in the world arena, focused primarily on the political basis of economic policies in both advanced and less developed societies. Treating differing perspectives on the international economy, production, trade and finance, and international economic relations. Prerequisite: junior standing, or permission of instructor.

Credit 3 units. A&S IQ: SSC BU: IS

### L32 Pol Sci 374 Contemporary American Foreign Policy

This course surveys post-War American foreign policy in historical perspective. It begins by evaluating the rise of the United States as a world power during the twentieth century, its current position of primacy and its consequences in the post Cold period, and the distinctive traditions and institutions shaping the making of

American foreign policy. It then examines the origins of the strategy of containment in the early Cold War period before considering how these debates animated the changing course of American foreign policy through the various phases of the Cold War conflict. The course concludes by analyzing American foreign policy since the end of the Cold War, up to and including debates about the consequences of September 11th 2001 for the United States' position of primacy, the Bush Doctrine and the American led intervention in and subsequent occupation of Iraq.

---

**L32 Pol Sci 3760 Globalization, Urbanization, and the Environment**

Urbanization was a dominant trend in the twentieth century and globalization only acted to accelerate it. The consequence has been a multitude of ecological and social challenges that policy makers and citizens continue to confront. The students participating in this course should expect to learn about these challenges, their relationship to our present environmental emergency, and the potential policy solutions being debated. Students will have an opportunity to propose and defend their own solutions to these challenges.

**L32 Pol Sci 381 The Politics of Electoral Systems**

It is impossible to appreciate the variety of electoral systems used to select legislative bodies without taking a comparative perspective. We will begin this course with a brief consideration of what goals political founders and reformers are pursuing when they design an electoral system. Then we will define the conceptual dimensions along which electoral rules can vary. With these basic concepts in hand we can then study specific national cases to assess the impact of electoral laws on party systems, legislator behavior, and interbranch relations. After completing a series of case studies, we will return to a comparative perspective to discuss recent scholarly research in this field. This research conceives of electoral systems as incentive structures for voters, candidates, parties, and politicians. To wrap up the course, we will return to the question of what founders and reformers can hope to achieve when selecting electoral systems.

**L32 Pol Sci 389 Power, Justice, and the City**

This course examines normative theoretical questions of power and justice through the lens of the contemporary city, with a particular focus on American urban life. It explores urban political economic problems, questions of racial hierarchy and racial injustice in the modern metropolis, and the normative and practical dilemmas posed by "privatism" in cities and their suburbs. In addition, the course devotes considerable attention to honing students' writing skills, through class assignments that stress rewriting and revising, and also through four in-class writing workshops devoted to formulating a thesis and making an argument, revising and rewriting, writing with style, and peer consultation.

**L32 Pol Sci 391 History of Political Thought I: Justice, Virtue, and the Soul**

This course offers a critical introduction to the main issues and debates in western political theory, including but not limited to the topics of justice, legitimacy, equality, democracy, liberty, sovereignty, and the role of history in the political and social world. This course is designed to be the first in a three-semester sequence on the history of political thought, and students are encouraged, but not required, to take the courses in chronological sequence. The first semester begins with ancient Greek political thought, and follows its development up to the early 16th century.

**L32 Pol Sci 391A Democracy and Citizenship Seminar II**

What does it mean to be a citizen in a democratic society? What are the rights of citizenship and what are its responsibilities? How are the answers to these questions different for citizens of the United States of America, with its particular history, values, and status in the world? Enrollment in this seminar is limited to freshmen who have been admitted to the "Democracy and Citizenship" Focus Program.

Credit 1 unit.

---

**L32 Pol Sci 392 History of Political Thought II: Legitimacy, Equality, and the Social Contract**

Government is often justified as legitimate on the grounds that it is based on the consent of the governed. In History of Political Thought II, "Legitimacy, Equality, and the Social Contract," we examine the origins of this view, focusing our attention on canonical works in the social contract tradition, by Thomas Hobbes (1588-1679), John Locke (1632-1704), Jean-Jacques Rousseau (1712-1778), David Hume (1711-1776), and Immanuel Kant (1724-1804). This course is the second in a three-semester sequence on the history of political thought. Students are encouraged but not required to take all three courses. Prerequisite: One previous course in political theory or political philosophy.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L32 Pol Sci 393 History of Political Thought III: Liberty, Democracy, and Revolution**

How, if at all, should the political institutions of the modern state express and secure the liberty and equality of citizens? What is the political significance of private property? Is world history to be understood as progress towards one best form of government - capitalist democracy, perhaps, or communism? What forces drive history? We shall address these and other timeless political questions through close reading and rigorous analysis of classic texts in the history of Western political thought. Authors to be studied will include Kant, Hegel, Marx, Tocqueville, John Stuart Mill, and Nietzsche. Prerequisite: one previous course in political theory or political philosophy. The course is designed to be the third in a three-semester sequence on the history of political thought, and students are encouraged but not required to take the courses in chronological sequence.

This course is part of the Semester in DC Program

Credit 3 units. EN: S

---

**L32 Pol Sci 4010 Pluralism, Liberalism, and Education**

How should liberal democratic states respond to religious and cultural pluralism? In what ways is pluralism different from mere disagreement, and what normative implications does pluralism have for public policy? How can liberal states justify using their coercive power against a background of pluralism and in ways that systematically disadvantage certain religious and cultural groups in society? In particular, what is to be done when religious parents and the liberal state make conflicting judgments about the proper education of children? When should the state defer to parental judgments and what are the grounds for legitimately refusing to do so? Readings are taken from contemporary political philosophy. Prerequisites: Poli Sci 106, Poli Sci 107, Phil 340, or permission of instructor.

Credit 3 units. A&S IQ: SSC EN: S

---

**L32 Pol Sci 4013 Negotiating Major Legislation in Congress**

This course examines the outcomes of the legislative process in the United States. The first third of the course will examine key concepts and major determinants of the negotiation process: majority rule instability, agenda control, political parties, the amendment process, and the uncovered set. The rest of the course will examine the negotiations that led to some of the most significant legislation in the past 100 years, from the Federal Reserve Act of 1913 through the Voting Rights Act of 1965 to the immigration bill of 2006. Along with other assignments, each student will write several drafts of a major research project on a major piece of legislation. Each research project will examine the amendments offered, the strategic intentions of the amendments' sponsors, the agenda process, and the role of party. Prerequisite: Poli Sci 101B.

Credit 3 units. A&S IQ: SSC

---

**L32 Pol Sci 4030 Political Theory of Education**

This course explores issues of authority, legitimacy, citizenship, freedom, and equality through contemporary readings in the political theory of education. What is to be done when parents, citizens, and educational experts make conflicting judgments about the proper education of children? When should the state defer to parental judgments and what are the grounds for legitimately refusing to do so? How should public schools aim to equip their students for the responsibilities of citizenship in a diverse liberal democratic state? What do the concepts of equality and equality of opportunity mean in the context of education, and (how) should governments pursue these values through education policy? We shall explore these issues through contemporary works of political theory as well as through considering a number of important U.S. court cases, including those dealing with the schooling of children from minority religious and cultural groups, affirmative action in university admissions, and school desegregation plans. Prerequisite: one previous course in political theory or political philosophy.

Credit 3 units. A&S IQ: SSC BU: ETH EN: S

---

**L32 Pol Sci 4040 Capstone Seminar in International Politics: Public Policy Responses to Global Poverty**

This course is designed for senior political science majors with a background in international politics (see prerequisites). In this course we will examine the theoretical and empirical literature on the causes of global poverty, and evaluate public policy responses from the international community. topics will include: foreign aid (including micro-finance), debt relief, trade reform, global health initiatives, and private-public partnerships. Students are expected to have a strong

theoretical background in the tools and concepts in political science and a strong interest in development topics. As a capstone class the teaching style will focus on a student centered classroom, where students will run the class and help moderate discussions with outside speakers. Prerequisites: L32 103B, one advanced course in international politics, and a second advanced course in either international or comparative politics.

Credit 3 units. A&S IQ: SSC EN: S

---

**L32 Pol Sci 4043 Public Policy Analysis, Assessment and Practical Wisdom**

This course provides an introduction to the study, professional practice, ex-ante and ex-post assessment of public policy and the professional practice of public analysis. We will rely heavily on David L. Weimer and Aidan R. Vining's text, *Policy Analysis: Concepts and Practice*. This course covers a series of critical concepts in the understanding of practicing, analyzing and assessing public policy.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L32 Pol Sci 4046 Forced Displacement and the Politics of Seeking Refuge**

In the last decade, the number of people who are forcibly displaced has more than doubled, and today the United Nations High Commissioner for Refugees estimates that 108.4 million people are forcibly displaced. Among this group, people face distinct legal, social, economic, and political challenges according to their status as refugees, asylum seekers, internally displaced persons, and others who do not fit these categories. In this course, we will examine the political conditions that forcibly displace people across and within countries including persecution, conflict, and environmental disasters exacerbated by climate change as well as their experiences of seeking refuge. How do international, state, local, and non-governmental institutions cooperate to manage the needs of forcibly displaced persons? In what ways do political pressures create opportunities for and barriers to effective policies to address refugee issues? How do these structural challenges affect forcibly displaced persons, and what strategies do advocates use to improve the human rights of these populations? Throughout the course, we will bear in mind the interconnectedness of macro-level policy-making and micro-level issues that affect the daily lives of individual humans experiencing forced displacement.

---

**L32 Pol Sci 4050 Political Representation**

In this class we will study the concept of representation. Historically, how has representation been conceived? Conceptually, what should count as political representation, and must it always be democratic? As a normative problem what should representatives do? And how should institutions be designed to foster these normative ends? Readings will provide a broad overview of the subject, and address enduring questions including problems of minority representation, voting rights, and redistricting. Prerequisites: Political Science L32 106 or L32 107.

Credit 3 units. A&S IQ: SSC BU: ETH EN: S

---

**L32 Pol Sci 4053 Citizenship: Historical, Cross-Cultural, and Interdisciplinary Perspectives**

Although some have posited that citizenship may become obsolete in an increasingly globalizing and interconnected world, citizenship has never been more relevant. Discussions of migration, statelessness, naturalization policies, borders, and so many other contemporary topics hinge on questions of citizenship. In this course, we will be taking an interdisciplinary approach to the study of citizenship, drawing on a wide range of work from historians, social scientists, journalists, and

writers. This is an interdisciplinary and transnational course intended for advanced undergraduate and graduate students. Examples will draw from around the world and from a variety of disciplines. Assigned materials include the work of historians, anthropologists, political scientists, sociologists, and journalists as well as novels, films, and audio and visual sources.

---

**L32 Pol Sci 4060 Senior Seminar: Religion, Politics, and Community**

Religion is a powerful social, economic, and political force across the globe. Its formal authorities and informal influences have changed over time and across space and traditions. Yet even where regular religious practice has become less common, religion remains a means of constructing communities, be it a diaspora, a unique nation within a state, or state-wide national identity or nationalism. Religion intersects with race, gender, and other important social identities, and it overlaps with organized political power from the grassroots to the government. Human relationships with the divine have influenced everyday norms and values, have marked key moments in our life cycle, and have provided material and social psychological resources for communities. In this course, we will examine the political relationships between religion and community from a variety of social scientific perspectives. As a core part of this inquiry, you will conduct an original research paper on a topic of your choice relating to religion, politics, and community. We will work through each step of the scientific method over the course of the semester using religion and community as a lens and set of thematic examples and hold guided workshops to facilitate your research process. Prereq: L32 263 OR L32 363 OR department approved equivalent

Credit 3 units. A&S IQ: SSC EN: S

---

**L32 Pol Sci 4070 Global Justice**

This course examines contemporary debates and controversies regarding global justice. Seminar discussions will be arranged around significant issues in the current literature. For example: What (if anything) do we owe to the distant needy? Do we have special obligations to our compatriots? Do political borders have normative significance? And so on. This course will be of interest not only to political theorists, but also students in other fields interested in social justice or international relations generally.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

---

**L32 Pol Sci 4080 Voting Rights**

This course will study legal concepts of voting rights and election law that impact the ability of citizens to access and participate in the democratic process. It will include the opportunity for students to directly engage in observing, monitoring, or advancing the right to vote during the 2008 elections. Election law changes rapidly and is the subject of legal and political dispute in a number of areas that will affect the franchise during the 2008 elections. This course will examine federal constitutional and statutory law governing the right of suffrage and assess current controversies in these areas. While there is no specific "right to vote" explicitly stated in the U.S. Constitution, over time, it has been amended or interpreted to protect the right of franchise from being abridged based on race, gender, property ownership, age and other qualifications. Legislative enactments have also established rights with respect to voting. Each extension of voting rights has been a product of and resulted in social and political change. This course will examine the interplay of law and politics in the right to vote. The course will begin with the study of constitutional foundations, statutory protections and case law. We will then apply these principles

to current issues in voting rights, including voter registration, voter identification, provisional ballots, voting machines, access for people with disabilities, felony disenfranchisement, voter suppression and voter fraud. Students will apply this knowledge to voting rights during the 2008 elections through hands-on involvement in voter education, monitoring or advocacy. The course will conclude with an assessment of the current issues in light of observations made by students during the 2008 elections, with an eye toward the advancement of election law and full enfranchisement in the future. The course involves the study of fundamental Supreme Court cases, interactive discussion of contemporary debates, and review of current litigation and legislative proposals. The course will be supplemented by occasional guest visits by election officials, lawyers, legislators, voting rights advocates or others.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

### **L32 Pol Sci 4100 Fascism and the Far Right in Europe**

Across Europe and beyond, parties on the far right have become a substantial force in contemporary politics. Some analysts have raised questions about these parties' ties to fascism, as characterized regimes such as Mussolini's Italy, Franco's Spain, and Hitler's Germany. How do today's far right actors compare to those of the past, and what can we learn from the comparison of the present moment to history? In this class, we will study both the extreme and radical right in Europe over time through the lens of three cases: Italy, Spain, and Germany. We will analyze both the conditions for popular support (demand) and political opportunity structures (supply) that allow(ed) far right actors to gain and maintain authority. We will also assess the strategies of these actors through themes of race and migration, security and foreign policy, gender, and religion. As we develop this discussion, you will conduct further research into a single topic that interests you, in the course cases or another case of your choice. Since an essential element of far right politics is the rejection of either the liberal elements of democracy (e.g. minority rights) or the principles of democracy entirely (including the electoral process), you will present your research through a creative medium aimed at a public audience, with the goal of promoting civic engagement. Prereqs: Intro to Comparative Politics OR Intro to International Politics

### **L32 Pol Sci 415 Senior Thesis Research**

Intensive research. To be conducted under the supervision and guidance of a faculty sponsor of the thesis.

Credit 3 units.

---

### **L32 Pol Sci 419 Teaching Practicum in Political Science**

This course is an opportunity for undergraduates to assist in course instruction, tutoring, and preparation of problems, readings, and exam materials with permission and under supervision of instructor. This course will count towards up to 6 hours of credit in an advanced field for the Political Science Major.

Credit variable, maximum 3 units.

---

### **L32 Pol Sci 4212 Elections**

This course examines how politicians and policies are selected by citizens in democracies. The literature exploring the rules and procedures that govern elections is perhaps the most theoretically and empirically sophisticated body of knowledge in the study of politics. We will explore how differences in these institutional rules across a variety of democracies shape the types of strategic choices voters make, the coalitions that legislators form, whose interests are represented, the structure of parties, the career paths of politicians, and the policies that governments pursue. We will further investigate how, when, and why electoral rules are changed with reference to several recent cases of electoral reform.

Credit 3 units. A&S IQ: SSC EN: S

---

### **L32 Pol Sci 4231 Contemporary Issues in Latin America**

How do the institutional designs of contemporary democratic governments help us understand the nature and quality of representation? We will concentrate on variations in the powers granted presidents by constitutions as well as the institutional determinants of whether executives are likely to find support for their policies in the legislature. In addition, we will explore how incentives established by electoral laws influence the priorities of members of congress. Given all these variations in democratic institutional design, can voters go to the polls with the confidence that politicians will implement the economic policies for which their parties have long stood or which they promised in their campaigns?

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS

---

### **L32 Pol Sci 4241 Topics in American Politics: Race and Politics**

From the moment enslaved Africans were brought to American shores, race and racism has been central to the American political project. In this class we will examine how notions of race and racism inform conceptions of citizenship, the allocation of state resources, the development of political parties, and political participation. We will also examine the way that race and racism influence public opinion.

Credit 3 units.

---

### **L32 Pol Sci 425 Law, Religion, and Politics**

What is the role of religious argument in politics and law? What kinds of arguments are advanced, and how do they differ from one another? Are some of these arguments more acceptable than others in a liberal democracy? This course will explore these questions through the work of legal scholars, theologians, and political theorists. Our topics include the nature of violence and coercion in the law, constraints on public reason, the relationship between religion and government, and the nature of religious practice and tradition.

Credit 3 units. BU: BA

---

**L32 Pol Sci 428 Topics in Comparative Politics: Politics and Identity**

In this course, we will examine the relationship between politics and identity and the consequences for political stability and cohesion as a result of those relationships. We will consider different cases and explanations for the United States and, in comparative perspective, for how identity works with respect to gender, race, ethnicity, class and sexual orientation in the pursuit of political or social goals. How do these different identities impact social and political conflict, local and national cohesiveness, and political participation?  
Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC EN: S

---

**L32 Pol Sci 4280 Political Intolerance in World Politics**

This course is an investigation into the meaning, causes, and consequences of political intolerance. My goal is to expose you to contemporary research on a) how political intolerance is conceptualized and understood, especially within the context of theories of democracy; b) how political intolerance can be measured, both at the level of the individual and the institution/society; c) where intolerance originates, both in terms of individual psychology and system-level politics; and d) what consequences flow from intolerance, especially in terms of legal and extra-legal political repression, as well cultural consequences (e.g., a "culture of conformity"). The course makes little distinction between American politics and politics in other parts of the world (although no knowledge of specific non-U.S. systems is required as a prerequisite).

Credit 3 units. A&S IQ: SSC Arch: SSP Art: SSP BU: BA EN: S

---

**L32 Pol Sci 4281 Comparative Political Parties**

An introduction to theories and concepts used in the analysis of political parties in democratic regimes, with emphasis on the classic literature covering West European advanced industrial democracies and the more recent scholarship on Latin American party systems. The course illuminates the complex aims consequences, and characteristics of modern party politics.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

---

**L32 Pol Sci 4291 Topics in Politics: Polarization in American Politics**

This course examines the political polarization of the American political parties and explores its effects on the mass public and American democracy more generally. We will examine what exactly is polarization, how it is measured, historical changes, potential causes, and its potential effects on the mass public and governance. PREREQUISITES: L32 101B Intro to American Politics, L32 363 Quantitative Political Methodology or equivalent  
Credit 3 units.

---

**L32 Pol Sci 4299 Feminist Political Theory**

This course asks how feminist thinkers from various political and intellectual traditions critique, adopt and transform political theories of justice, citizenship, property and the state. To uncover how different feminist theories have been adopted in the struggle for political transformation and social justice, we will pursue two main lines of inquiry. The first asks how feminist thinkers from various traditions critique and engage the history of political thought within the social contract tradition. We will ask, in particular, how gender, race, slavery, colonialism and empire shape conceptions of citizenship and property. We will also examine transnational feminist critiques of the public/private division in the Western political theory canon as it impacts the role of women and the social construction of women's bodies. During the second half of the semester, we will ask how various transnational social movements have engaged and adopted feminist theories in efforts to resist state violence, colonialism, labor exploitation and resource extraction. In following these lines of inquiry we will draw from postcolonial, decolonial, liberal, Black, radical, Marxist and Chicana feminist perspectives. Part of our goal will be to uncover how various feminist theories treat the relationship between politics and embodied experience, how gendered conceptions of family life affect notions of political power and how ideas about sexuality and sexual conquest intersect with empire-building. Majors and minors in WGSS receive first priority. Other students will be admitted as course enrollment allows. Same as L77 WGSS 429

**L32 Pol Sci 4402 Topics in Political and Social Theory: Constitutionalism**

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

**L32 Pol Sci 440A Religion, Politics, and the University**

This course explores in depth current issues related to pluralism, difference, and belonging in matters pertaining to religion and other important issues, with a particular focus on how these play out in the university context. The instructors, John Inazu and Eboo Patel, are two of the leading national commentators on these issues. Prerequisite: Students enrolling in this class must submit a brief statement of interest to Professor John Inazu. Details on how and where to submit this statement can be found at <http://law.wustl.edu/COURSES/INAZU/seminar1/summaries/>.

---

**L32 Pol Sci 4451 Contemporary Politics in India**

This seminar will examine current topics and controversies in contemporary Indian politics. The course will have three main foci: the links between politics and economic liberalization over the last two decades; the links between ascriptive identities such as religion, caste and gender and contemporary political processes, including ethnic and gender quotas; and the changes in party politics at the national and state levels that have accompanied the decline of Congress party dominance. Specific topics include the role of caste and religion in contemporary politics; the rise of state parties and its effects on federal relations; the effects of economic reform and globalization on economy and society; urbanization and migration flows; the rise of modern Hindu nationalism; and the links between collective violence and electoral politics.

---

**L32 Pol Sci 450 Topics in American Politics**

Credit 3 units.

---

**L32 Pol Sci 4504 Contemporary Democratic Theory**

Contemporary debates in democratic theory have produced a number of challenging and provocative accounts of how democratic institutions can and should work. In this course we will analyze a number of competing theories of democracy and assess the similarities and differences among them. Although the course focuses primarily on theoretical issues, special attention will be given to how empirical research in the social sciences on democratic institutions and procedures informs and clarifies these debates.

Credit 3 units.

---

**L32 Pol Sci 4505 American Political Parties**

This seminar will introduce students to core literature on political parties with a strong bias towards recent research.

Credit 3 units. A&S IQ: SSC EN: S

---

**L32 Pol Sci 451 Topics in American Politics: Supreme Court**

This seminar has two purposes: to introduce students to the state of the art in studies of the Supreme Court and to cover a series of particular topics with emphasis on the major controversies within the field of law and the courts.

Credit 3 units.

---

**L32 Pol Sci 4513 Topics in Politics: Criminal Law and Criminal Justice: Homicide**

Seminar investigates current controversies surrounding the homicide laws. Topics include the definitions of homicide and claims of self-defense, the controversies about admissions of evidence at various stages of prosecution, and the debates about the use of capital punishment (including the capital punishment of youths). Includes general academic readings, readings of recent court opinions, and guest discussants from the legal community.

Credit 3 units. A&S IQ: SSC, WI Art: SSC BU: BA

---

**L32 Pol Sci 4522 Topics in American Politics**

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Credit 3 units.

---

**L32 Pol Sci 4551 Seminar in Political Economy**

This research seminar will introduce the student to recent work on the political economy of democracy. We shall start with a historical account of the development of democratic institutions in Britain and the United States, and then continue with recent work on modeling elections. We shall compare elections in countries that make use of proportional electoral systems, such as Israel, with those like the United States and Britain that are highly majoritarian. Finally we shall discuss the forces of democratization and globalization. The required work for the seminar is a research paper approximately 20pp (double spaced) in length.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L32 Pol Sci 4552 Comparative Political Economy**

This seminar will introduce the student to aspects of social choice theory, applied to themes to do with the economic origins of democracy, democratization and the stability of social orders. We shall read and discuss a number of recent books: Acemoglu and Robinson on Economic Origins; North, Weingast and Wallis on Violence and Social Order; Przeworski on Democracy and Development; Ferguson on Money; Collier on Wars Guns and Votes. If time permits I also hope to discuss recent work by Stern on the Economics of Climate Change. Students will be expected to work on two short research paper, either empirically or theoretically based, and make a presentation of their work near the end of the semester.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L32 Pol Sci 4621 Politics and the Theory of Games**

This course covers basic primitives and more sophisticated tools of game theory as they are used in contemporary political science. It will cover some issues of the forefront of contemporary research in game theory as the central analytical tool in studying the science of politics. The main substantive issues will be the emergence of law and order in society, markets versus political mechanisms and the distinctive characteristics of parliamentary versus presidential democratic systems. The course also includes some real case studies, basic experiments and, in general, a lot of fun.

Credit 3 units. A&S IQ: SSC Art: SSC

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

---

**L32 Pol Sci 464 Topics in American Politics: The United States in Vietnam: Origins, Developments, and Consequences**

This course will focus on America's involvement in Vietnam from the era of French colonialism through the collapse of United States intervention. Special attention will be given to political, military, economic, and cultural aspects, as well as to international relationships, and the significance of the experience and subsequent developments upon both American and Vietnamese societies.

Same as L22 History 4894

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

**L32 Pol Sci 4646 Democracy: Theory and Practice**

What does it mean to govern democratically? Why value democratic government? What role, if any, should notions of rights, representation, and deliberation play in theorizing about and empirical research into problems of democratic governance? What lessons can we learn about democracy from scholars writing in the traditions of feminist theory and critical race theory? What is the relation between democracy and knowledge? Should democracy extend beyond the boundaries that define the nation-state? Should (some aspects of) the economy be democratized? During the fall of 2018, we will have the opportunity to ask these and related questions in the context of the U.S. midterm election. We will engage in debates about contemporary democratic theory while we follow developments in the campaigns leading up to the November election.

Credit 3 units. A&S IQ: SSC EN: S

---

**L32 Pol Sci 4652 Democracy and Inequality in an Age of Globalization**

This is a course on comparative political economy that explores whether open, liberal democratic societies can provide relative economic equality while at the same time guaranteeing untrammelled flows of goods and services across borders. The course is based on close reading of recent research in economics and political science.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L32 Pol Sci 4731 Global Political Economy**

This course will borrow on the insights of international relations scholarship and economic theory to develop a broad understanding of international economic relations. Specifically, this course attempts to address the following two sets of questions: 1) How do global economic relations fit into the broader category of international relations? How do the existing theories in international relations (liberalism, realism, and Marxism) help us understand international economic relations between nation-states? 2) What are the effects of these international economic forces (trade, finance, and multinational production) on domestic governments and societies?

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS EN: S

---

**L32 Pol Sci 4755 Psychology of War**

Why does war occur? Why does it last so long? What are its long-term effects on the people that lived through them? This course is designed to shed light on these questions, examining the interaction of psychological and strategic processes in international war and conflict. We will critically examine how psychological factors such as emotions, identity, cognition, and motivation impact (and are impacted by) political violence. We will examine these processes in the context of crisis diplomacy, national security policy, war, post-conflict reconstruction, and more. Specific examples of potential topics include: the global "War on Terror," ongoing intractable conflicts such as the Israeli-Palestinian conflict, diplomatic standoffs between the US and adversaries such as North Korea and Russia, and refugee and migration

crises around the globe. By the end of this course, students should have a clear understanding of how political conflict both affects and is affected by human psychology, and the implications this has for addressing a host of political problems and challenges.

Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC EN: S

---

**L32 Pol Sci 4761 Politics of International Finance**

In this course we will examine the complex relationship between international finance, economic development, and domestic politics by drawing on the recent scholarly literature in economics, political science, and finance. The focus will be on the theoretical literature on both the determinants of international financial flows and its effects on domestic societies. Specially, we focus on five forms of international finance: 1) international equity markets (stocks), 2) flows of foreign direct investment (multinational corporations), 3) currency markets (with a special focus on currency crisis), 4) international debt, 5) and international aid.

**L32 Pol Sci 480 Topics in International Politics: Growth and Development**

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

---

**L32 Pol Sci 4861 Seminar on American Election and Voting**

Survey of major contributions to the study of American elections and voting behavior; patterns of voting through time as well as contemporary cross-sectional patterns.

Credit 3 units.

---

**L32 Pol Sci 489 Politics of Regulation**

Events such as the Gulf oil spill and the economic meltdown have dramatized the importance of regulation in the United States, and at the same time called into question the most fundamental beliefs about the nature of the regulatory process. This course reviews the notion of market failure as basic to understanding the rationale for government regulation; it also examines theories of governmental failure as a source of skepticism and concern regarding impediments to effective regulation. Much of the course will review the development of regulatory machinery in the twentieth century. We will examine the political forces that have resulted in expansion of the institutions of regulation-interest groups, partisan conflict, legislative negotiation, and executive leadership. We will examine these forces in detail in examining the political and legislative response to recent financial and environmental crises.

Credit 3 units. A&S IQ: SSC, WI EN: S

---

**L32 Pol Sci 491 Collection and Analysis of Qualitative Data**

This course will cover basic techniques for collecting, interpreting, and analyzing qualitative data. Students will select a research project, collect appropriate qualitative data, and conduct a preliminary analysis. Students will learn how to gather several types of qualitative data, including participant observation and open- and closed-ended interviews. In addition, they will evaluate and analyze primary data collected by others including oral histories, archival records, interview transcripts. We will consider the advantages and disadvantages of non-randomly collected data, such as those gathered through ethnographic and archival methods. We will assess the utility of building statistical datasets from such data, and students will learn the basic techniques of using computer programs for qualitative data such as Nvivo and Atlas.ti. Biweekly assignments that focus on different aspects of collection and analysis are designed to help students produce a research paper as a final project.

Credit 3 units. A&S IQ: SSC EN: S

### L32 Pol Sci 495 Research Design and Methods

This course provides an introduction to qualitative and quantitative research methods in political science. Topics address issues related to theory building as well as theory testing. Technical issues related to these methods are not the focus of this course, as are theoretical issues regarding the advantages and disadvantages of the different approaches. Ultimately, the goal of this course is twofold: (1) to instruct students to critically analyze scholarly articles with particular attention to research design, and (2) to guide students in how to design an original research project. Both the reading assignments, including methodological and applied readings, and the written assignments are directed toward these goals.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

### L32 Pol Sci 496 Game Theory and Collective Choice

An introduction to models of collective choice important in political science, including game theory, the spatial voting model, and axiomatic social choice theory. The course concentrates primarily on noncooperative game theory, whose main topics include: strategic and sequential forms, Nash equilibrium, solution by backward induction, imperfect information, repeated games; and applications to voting, campaigning, public goods, agenda design, bargaining, and collective action. With noncooperative games as a foundation, the course then examines cooperative game theory (games in coalition form), voting as a social choice mechanism (including the median voter theorem and global cycling theorems), and social-choice possibility theorems, and social-choice possibility theorems (such as Arrow's Theorem). Prerequisites: MATH 131 (Calculus I) or Pol Sci 5052 (Mathematical Modeling) or equivalent

Credit 3 units. A&S IQ: SSC EN: S

### L32 Pol Sci 49PK The Founding Fathers' Government in an Electronic Age

This is a research seminar that examines how Americans sought to translate their notions of government into a realistic set of priorities and a functioning set of public institutions. Extending from 1789 through the 1820s, this course investigates how the federal government came into being, what it did, and who populated the civilian and military rank of American officialdom. This is also a course in digital history. Students will create new knowledge through their own contributions to an ongoing digital project that seeks to reconstitute the early federal workforce. In the process, students will learn a variety of digital techniques, ranging from encoding languages to electronic systems to software packages.

Same as L22 History 49PK

## Environmental Policy Major

### Program Requirements

- **Total units required:** 39 units with a C or better; 18-27 of the total units must be at the 300 or 400 level

## Required Courses

- 18 units from required foundation courses
  - **Intro to Political Science:** Pol Sci 101B American Politics; Pol Sci 102B Introduction to Comparative Politics; Pol Sci 103B International Politics; or Pol Sci 106 Introduction to Political Theory (**Note:** Students scoring a 4 or 5 on AP US Government and Politics or AP Comparative Government and Politics may place out of the introductory requirement and replace it with a 300- or 400-level Political Science course in the subfield related to the AP course.)
  - **Intro to Environmental Policy:** Pol Sci 2010 Introduction to Environmental Policy
  - **Natural Science on Enviro:** Biol 2950 Introduction to Environmental Biology
  - **Research Methods:** Pol Sci 263 Data Science for Politics or Pol Sci 363 Quantitative Political Methodology
  - **Policy Analysis:** Pol Sci 4043 Public Policy Analysis, Assessment and Practical Wisdom
  - **Normative:** Pol Sci 3313 Theories of Social Justice

## Elective Courses

- 15 units of 300- or 400-level electives with an environmental focus (from a preapproved list or by petition in advance), 6 units of which must be in Political Science or cross-listed with Political Science

## Capstone

- 6 units of capstone experiences; any combination of the following:
  - Internship (credits following Political Science rules)
  - Experiential Learning Course
  - Directed Research Project/Independent Study
  - Honors Thesis (following Political Science rules)

## Additional Information

### Senior Thesis

The department encourages students to pursue independent research by working toward a senior thesis. Students admitted to this program work closely with a faculty advisor for a full calendar year, beginning at the end of their junior year. Students writing a senior thesis receive 6 units of credit for two semesters of work by enrolling in Pol Sci 415 Senior Thesis Research. This credit counts toward the capstone requirement. Although there is no grade point average requirement for writing a senior thesis, an application is required. For more information, contact the department office. All majors may apply.

To qualify to write a senior thesis, students must do the following:

- Complete the methodology course requirement by the fall of their junior year (all majors are strongly urged to complete this requirement during their sophomore year).
- Complete Pol Sci 495 Research Design and Methods prior to their senior year.
- Apply during their junior year for admission into the program.

## Limitations

No more than 6 units from the following may count toward the major: study abroad, summer school, the School of Continuing & Professional Studies, or transfer credit.

No more than 6 units from the following may count toward the major: internship, directed reading, directed research, or teaching practicum.

# Political Science Major

## Program Requirements

- **Total units required:** 30

Students who major in political science are required to complete 30 graded units (10 courses) in political science with a C or better, distributed as follows:

## Required Courses

### Substantive Introductory Courses

6 graded units must come from two 100-level introductory courses. (**Note:** Students scoring a 4 or 5 on the AP US Government and Politics exam and/or the AP Comparative Government and Politics exam may place out of the associated introductory course and replace it with a 300- or 400-level course in a related subfield.)

### Methodology Course

3 graded units must come from either Pol Sci 263 Data Science for Politics or Pol Sci 363 Quantitative Political Methodology. All majors are urged to complete this requirement during their sophomore year. (**Note:** Some statistics courses offered in other departments will allow students to opt out of this class, but those credits will not count toward their political science major. See the department website for more information.)

## Elective Courses

### Distribution Requirement

Students must complete at least one 3-unit course at the 200-, 300-, or 400-level in three of the following subfields: American politics, comparative politics, international politics, political methodology, or political theory.

## Upper-Level Requirement

18 graded units must come from any six 300- or 400-level courses, including at least one 400-level capstone course (see below).

### Other Courses

A student's remaining graded units may be earned by any political science course or independent study. However, credits given for writing a senior thesis (detailed in the Senior Thesis section below) do not count toward the major. In addition, a student may complete an internship for Political Science credit.

## Capstone

All majors must complete at least one 400-level class, home-based in political science, as a capstone experience. Students writing a senior thesis satisfy this requirement by completing Pol Sci 495 Research Design and Methods.

## Limitations

**No more than 6 units from the following may count toward the major:** internship, directed reading, directed research, or teaching practicum.

**No more than 6 units from the following may count toward the major:** study abroad, summer school, the School of Continuing & Professional Studies, or transfer credit.

## Additional Information

## Specializations

Political science majors may specialize in a subfield of political science by taking (as part of their distribution requirement) three courses with the same subfield distribution in any one of the five subfields (American politics, comparative politics, international politics, political methodology, or political theory). Students may earn specializations in up to two subfields. The successful completion of a subfield specialization will be listed on the student's transcript.

## Senior Thesis

The department encourages students to pursue independent research by working toward a senior thesis. Students admitted to this program work closely with a faculty advisor for a full calendar year, beginning at the end of their junior year. Students writing a senior thesis receive 6 units of credit for two semesters of work by enrolling in Pol Sci 415 Senior Thesis Research. However, this credit does not count toward the completion of the political science major. Although there is no grade point average requirement for writing a senior thesis, an application is required. For more information, contact the department office. All majors may apply.

To qualify to write a senior thesis, students must do the following:

- Complete the methodology course requirement by the fall of their junior year (all majors are strongly urged to complete this requirement during their sophomore year).
- Complete Pol Sci 495 Research Design and Methods prior to their senior year.
- Complete a subfield specialization (detailed in the Specializations section above) by the end of the fall of their senior year in the subfield appropriate for their senior thesis. At least two thirds of the specialization must be completed by the end of their junior year.
- Apply during their junior year for admission into the program.

## Senior Honors

To graduate with Latin Honors, students must successfully complete a senior thesis project and meet a GPA requirement set by the College of Arts & Sciences.

Phone: 314-935-5810  
Email: [polisci@wustl.edu](mailto:polisci@wustl.edu)

The department encourages students to pursue independent research by working toward a senior thesis. Students admitted to this program work closely with a faculty advisor for a full calendar year, beginning at the end of their junior year. Students writing a senior thesis receive 6 units of credit for two semesters of work by enrolling in Pol Sci 415 Senior Thesis Research. However, this credit does not count toward the

completion of the political science major. Although there is no grade point average requirement for writing a senior thesis, an application is required. For more information, contact the department office. All majors may apply.

To qualify to write a senior thesis, students must do the following:

- Complete the methodology course requirement by the fall of their junior year (all majors are strongly urged to complete this requirement during their sophomore year).
- Complete Pol Sci 495 Research Design and Methods prior to their senior year.
- Complete a subfield specialization (detailed in the Specializations section above) by the end of the fall of their senior year in the subfield appropriate for their senior thesis. At least two thirds of the specialization must be completed by the end of their junior year.
- Apply during their junior year for admission into the program.

## Senior Honors

To graduate with Latin Honors, students must successfully complete a senior thesis project and meet a GPA requirement set by the College of Arts & Sciences.

# Political Science Major, International Politics Specialization

## Program Requirements

- **Total units required:** 30

Students who major in political science are required to complete 30 graded units (10 courses) in political science with a C or better, distributed as follows:

## Required Courses

### Substantive Introductory Courses

6 graded units must come from two 100-level introductory courses. (**Note:** Students scoring a 4 or 5 on the AP US Government and Politics exam and/or the AP Comparative Government and Politics exam may place out of the associated introductory course and replace it with a 300- or 400-level course in a related subfield.)

## Methodology Course

3 graded units must come from either Pol Sci 263 Data Science for Politics or Pol Sci 363 Quantitative Political Methodology. All majors are urged to complete this requirement during their sophomore year. (**Note:** Some statistics courses offered in other departments will allow students to opt out of this class, but those credits will not count toward their political science major. See the department website for more information.)

## Elective Courses

### Distribution Requirement

Students must complete at least one 3-unit course at the 200-, 300-, or 400-level in three of the following subfields: American politics, comparative politics, international politics, political methodology, or political theory.

## Upper-Level Requirement

18 graded units must come from any six 300- or 400-level courses, including at least one 400-level capstone course (see below).

### Other Courses

A student's remaining graded units may be earned by any political science course or independent study. However, credits given for writing a senior thesis (detailed in the Senior Thesis section below) do not count toward the major. In addition, a student may complete an internship for Political Science credit.

## Capstone

All majors must complete at least one 400-level class, home-based in political science, as a capstone experience. Students writing a senior thesis satisfy this requirement by completing Pol Sci 495 Research Design and Methods.

## Limitations

**No more than 6 units from the following may count toward the major:** internship, directed reading, directed research, or teaching practicum.

**No more than 6 units from the following may count toward the major:** study abroad, summer school, the School of Continuing & Professional Studies, or transfer credit.

## Requirements for the International Politics Specialization

Students may specialize in International Politics by completing three courses within the International Politics subfield. Consult the department or review the details of a course in the Course Listings to learn about subfield designations.

Code	Title	Units
Pol Sci 3024	International Organizations	3
Pol Sci 3090	Civil War and Peace	3
Pol Sci 3093	Politics of the European Union	3
Pol Sci 3180	Democracy: Causes & Consequences	3
Pol Sci 3292	Topics in Politics: Modern South Asian Politics	3
Pol Sci 3690	Politics of International Trade	3
Pol Sci 372	Topics in International Politics	3
Pol Sci 374	Contemporary American Foreign Policy	3
Pol Sci 378	Topics in International Politics	3
Pol Sci 4731	Global Political Economy	3
Pol Sci 4761	Politics of International Finance	3

## Additional Information

### Specializations

Political science majors may specialize in a subfield of political science by taking (as part of their distribution requirement) three courses with the same subfield distribution in any one of the five subfields (American politics, comparative politics, international politics, political methodology, or political theory). Students may earn specializations in up to two subfields. The successful completion of a subfield specialization will be listed on the student's transcript.

### Senior Thesis

The department encourages students to pursue independent research by working toward a senior thesis. Students admitted to this program work closely with a faculty advisor for a full calendar year, beginning at the end of their junior year. Students writing a senior thesis receive 6 units of credit for two semesters of work by enrolling in Pol Sci 415 Senior Thesis Research. However, this credit does not count toward the completion of the political science major. Although there is no grade point average requirement for writing a senior thesis, an application is required. ## Psychological & Brain Sciences

The field of Psychology encompasses a large and diverse area of study that is empirical, theoretical, and practical. As the science concerned with the study of behavior, psychology includes such areas as: biological bases of behavior; brain-behavior interactions; learning; memory; cognition; motivation; sensation and perception; the study of social interactions, persuasion, and attitudes; aging and development; personality; clinical, abnormal, and health psychology; and leisure and work experiences. These areas may appear quite distinct from one another, but the study of one provides important implications and insights for the understanding of the others. As an example, knowledge of brain-behavior interactions, sensory processes, and

learning processes all are involved in identifying, understanding, and treating certain psychopathologies. A major aspect of all the sub-disciplines is their emphasis on research and the development and expansion of knowledge concerning behavior.

An undergraduate education in psychology cannot hope to cover all aspects and areas of the discipline in a substantive way. At the very least, however, it should provide specific tools that allow the student of psychological thought to appraise knowledgeably the logic and evidence that underlie the ongoing evolution of psychological science. This is provided by either the major in Psychological & Brain Sciences or the major in Psychological & Brain Sciences: Cognitive Neuroscience.

Completion of either of the two Psychological & Brain Sciences majors, that is Psychological & Brain Sciences, or Psychological & Brain Sciences: Cognitive Neuroscience, should provide students with the content of psychology, including breadth and depth. It also should provide students with the tools needed to evaluate critically psychological information, independent of specific content.

The student needs to learn how to gather data, conduct literature reviews, and write proficiently and scientifically. Our curriculum aims to accomplish these goals. We strive to ensure that our students understand the importance and become critical evaluators of empirical psychological research.

Psychology is a multi-purpose, valuable discipline in which to major. It has relevance for those considering careers in law, medicine, the health professions, education, and business. In addition, it provides important skills and knowledge for those who may not be planning additional schooling.

The Department of Psychological & Brain Sciences at Washington University has particular strengths in the following areas:

- Aging
- Behavioral economics
- Human development
- Diversity science
- Cognitive neuroscience
- Emotion
- Judgment and decision-making
- Learning and operant conditioning
- Neuropsychology
- Personality and individual differences
- Adult psychopathology
- Sensory processes in vision and audition
- Social theories of self and social processes
- Human emotion

There are also many opportunities for undergraduates in this department:

- Research involvement with faculty members
- Supervised internships with community service agencies
- Practicum in Applied Behavior Analysis: Autism Spectrum Disorder
- Study abroad

- Specializations within the majors
- Senior honors
- Membership in Psi Chi, the national honor society in psychology

## Faculty

### Chair

#### Jeffrey M. Zacks

Edgar James Swift Professor in Arts & Sciences  
Professor of Psychological & Brain Sciences; Radiology  
PhD, Stanford University

### Associate Chair

#### Denise P. Head

Professor of Psychological & Brain Sciences  
Associate Professor of Radiology  
PhD, University of Memphis

### Directors of Graduate Studies

#### Julie M. Bugg

Professor of Psychological & Brain Sciences  
PhD, Colorado State University  
Director of the Behavior, Brain and Cognition

#### Brian D. Carpenter

Professor of Psychological & Brain Sciences  
PhD, Case Western Reserve University  
Interim Director of Clinical Training

### Director of Undergraduate Studies

#### Leonard Green

Professor of Psychological & Brain Sciences; Economics  
PhD, State University of New York–Stony Brook

### Department Faculty

#### Richard A. Abrams

Professor of Psychological & Brain Sciences  
PhD, University of Michigan

#### Deanna M. Barch

Gregory B. Couch Professor of Psychiatry  
Professor of Psychological & Brain Sciences; Radiology  
PhD, University of Illinois at Urbana-Champaign

#### John Baugh

Margaret Bush Wilson Professor in Arts & Sciences  
Professor of Psychological & Brain Sciences; Anthropology; Education;  
English; Linguistics; African and African-American Studies  
PhD, University of Pennsylvania

#### Brian Bergstrom

Senior Lecturer of Psychological & Brain Sciences  
PhD, Washington University

#### Ryan Bogdan

Dean's Distinguished Professor of Psychological & Brain Sciences  
PhD, Harvard University

#### Tim Bono

Lecturer of Psychological & Brain Sciences  
PhD, Washington University

#### Pascal R. Boyer

Luce Professor of Collective and Individual Memory  
Professor of Sociological Anthropology; Psychological & Brain Sciences

PhD, University of Paris

#### Todd Braver

William R. Stuckenberg Professor in Human Values and Moral  
Development  
Professor of Psychological & Brain Sciences; Radiology; Neuroscience  
PhD, Carnegie Mellon University

#### Andrew Butler

Associate Professor of Education; Psychological & Brain Sciences  
PhD, Washington University

#### Emily Cohen-Shikora

Senior Lecturer of Psychological & Brain Sciences  
PhD, Washington University

#### Shelly Cooper

Lecturer of Psychological & Brain Sciences  
PhD, Washington University

#### Rebecca Cox

Assistant Professor of Psychological & Brain Sciences  
PhD, Vanderbilt University

#### Ian G. Dobbins

Professor of Psychological & Brain Sciences  
PhD, University of California, Davis

#### Tammy English

Associate Professor of Psychological & Brain Sciences  
PhD, University of California, Berkeley

#### Ellen Fitzsimmons-Craft

Associate Professor of Psychological & Brain Sciences; Psychiatry  
PhD, University of North Carolina at Chapel Hill

#### Sandra S. Hale

Professor of Psychological & Brain Sciences  
PhD, University of Wisconsin–Milwaukee

**Alexander Hatoum**

Assistant Research Professor of Psychological & Brain Sciences  
PhD, University of Colorado Boulder

**Patrick Hill**

Professor of Psychological & Brain Sciences  
PhD, University of Notre Dame

**Derek Isaacowitz**

Professor of Psychological & Brain Sciences  
PhD, University Pennsylvania

**Joshua Jackson**

Saul and Louise Rosenzweig Associate Professor of Personality  
Science; Psychological & Brain Sciences  
PhD, University of Illinois at Urbana-Champaign

**Wouter Kool**

Assistant Professor of Psychological & Brain Sciences  
PhD, Princeton University

**Alan J. Lambert**

Associate Professor of Psychological & Brain Sciences  
PhD, University of Illinois at Urbana-Champaign

**Seanna Leath**

Assistant Professor of Psychological & Brain Sciences  
PhD, University of Michigan, Ann Arbor

**Lori Markson**

Professor of Psychological & Brain Sciences  
PhD, University of Arizona

**Kathleen B. McDermott**

Professor of Psychological & Brain Sciences; Radiology  
PhD, Rice University

**Joel Myerson**

Research Professor of Psychological & Brain Sciences  
PhD, Arizona State University

**John Nestojko**

Senior Lecturer of Psychological & Brain Sciences  
PhD, University of California, Los Angeles

**Josh Oltmanns**

Assistant Professor of Psychological & Brain Sciences  
PhD, University of Kentucky

**Zachariah Reagh**

Assistant Professor of Psychological & Brain Sciences  
PhD, University of California, Irvine

**Henry L. Roediger III**

James S. McDonnell Distinguished University Professor; Professor of  
Psychological & Brain Sciences  
PhD, Yale University

**Mitchell Sommers**

Professor of Psychological & Brain Sciences  
PhD, University of Michigan

**Michael J. Strube**

Professor of Psychological & Brain Sciences; Education; Physical  
Therapy  
PhD, University of Utah

**Jessie Sun**

Assistant Professor of Psychological & Brain Sciences  
PhD, University of California, Davis

**Renee J. Thompson**

Associate Professor of Psychological & Brain Sciences  
PhD, University of Illinois at Urbana-Champaign

**Kristin Van Engen**

Associate Professor of Psychological & Brain Sciences; Linguistics  
PhD, Northwestern University

**Emily Willroth**

Assistant Professor of Psychological & Brain Sciences  
PhD, University of California, Berkeley

## Affiliated Faculty

**Arpana Agrawal**

Professor of Psychiatry  
PhD, Virginia Commonwealth University

**Joe Barcroft**

Professor of Spanish and Second Language Acquisition  
PhD, University of Illinois at Urbana-Champaign

**Cindy Brantmeier**

Professor of Applied Linguistics; Global Studies  
Romance Languages and Literatures (by courtesy)  
PhD, Indiana University

**Robert Carney**

Professor Emeritus of Psychiatry  
PhD, Washington University

**Maurizio Corbetta**

Norman J. Stupp Professor of Neurology; Professor of Radiology;  
Anatomy; Neurobiology  
MD, University of Pavia

**Emma Covey Johnson**

Assistant Professor of Psychiatry  
PhD, University of Colorado Boulder

**Nico Dosenbach**

Associate Professor of Neurology  
MD, PhD, Washington University School of Medicine  
(Neurology, Pediatrics, Radiology, Occupational Therapy)

**James DuBois**

The Steven J. Bander Professorship in Medical Ethics and  
Professionalism; Professor of Medicine  
PhD, International Academy of Philosophy, Liechtenstein

**Hillary Elfenbein**

Professor of Organization Behavior  
PhD, Harvard University

**Kenneth Freedland**

Professor of Psychiatry  
PhD, University of Hawaii

**Robert Fucetola**

Professor of Psychiatry  
PhD, Washington University  
(Neurology)

**Kirsten Gilbert**

Assistant Professor of Psychiatry  
PhD, Yale University  
(Child Psychiatry)

**Brian Gordon**

Assistant Professor of Radiology  
PhD, University of Illinois

**Jason Hassenstab**

Associate Professor of Neurology  
PhD, Fordham University

**Andrew Heath**

Spencer T. Olin Professor of Psychology in Psychiatry; Professor of  
Psychiatry; Genetics  
DPhil, Oxford University

**Tamara Hershey**

James S McDonnell Professor of Cognitive Neuroscience; Professor of  
Psychiatry; Radiology  
PhD, Washington University

**Barry Hong**

Professor Emeritus of Psychiatry  
PhD, Saint Louis University

**Brett Hyde**

Associate Professor of Philosophy; Philosophy-Neuroscience-  
Psychology; Linguistics  
PhD, Rutgers University

**Brenda Kirchhoff**

Research Scientist  
PhD, Boston University  
(Psychological & Brain Sciences)

**Patrick Lustman**

Professor of Psychiatry  
PhD, Michigan State University

**Ilya Monosov**

Associate Professor of Neuroscience  
PhD, Brown University

**Alvitta Ottley**

Assistant Professor of Computer Science and Engineering  
PhD, Tufts University

**John Pruett**

Professor of Psychiatry (Child); Radiology  
PhD, Washington University

**Marcus E. Raichle**

Professor of Radiology; Neurology; Neurobiology; Biomedical  
Engineering  
MD, University of Washington

**Christopher Rozek**

Professor of Education  
PhD, University of Wisconsin–Madison

**Lawrence Snyder**

Professor of Neurobiology  
MD, PhD, University of Rochester

**David Van Essen**

Professor of Anatomy; Neurobiology  
PhD, Harvard University

**Robinson Welch**

Professor of Psychiatry  
PhD, University of Missouri-Columbia

**James V. Wertsch**

Marshall S. Snow Professor in Arts & Sciences; Professor of  
Anthropology; International and Area Studies; Education  
PhD, University of Chicago

**Denise E. Wilfley**

Scott Rudolph University Professor; Professor of Psychiatry; Medicine;  
Pediatrics  
PhD, University of Missouri

**David Wozniak**

Professor Emeritus of Psychiatry  
PhD, Washington University

## Faculty Emeritus

**David A. Balota**

Professor Emeritus of Psychological & Brain Sciences; Neurology  
PhD, University of South Carolina

**Janet M. Duchek**

Associate Professor Emerita of Psychological & Brain Sciences;  
Occupational Therapy  
PhD, University of South Carolina

**Stanley Finger**

Professor Emeritus of Psychological & Brain Sciences  
PhD, Indiana University Bloomington

**Larry Jacoby**

Professor Emeritus of Psychological & Brain Sciences  
PhD, Southern Illinois University Carbondale

**Brett Kessler**

PhD, Stanford University

**Mark A. McDaniel**

Professor Emeritus of Psychological & Brain Sciences  
PhD, University of Colorado

**Michael Merbaum**

Professor Emeritus of Psychological & Brain Sciences  
PhD, University of North Carolina at Chapel Hill

**Thomas F. Oltmanns**

Edgar James Swift Professor Emeritus of Arts & Sciences; Professor of  
Psychiatry  
PhD, State University of New York–Stony Brook

**Steven E. Petersen**

James S. McDonell Professor of Cognitive Neuroscience in Neurology;  
Professor of Radiology  
PhD, California Institute of Technology

**Anthony Schuham**

Associate Professor Emeritus of Psychological & Brain Sciences  
PhD, Washington University

**Martha Storandt**

Professor Emerita of Psychological & Brain Sciences  
PhD, Washington University

**Rebecca A. Treiman**

Burke and Elizabeth High Baker Professor Emerita of Child  
Developmental Psychology  
PhD, University of Pennsylvania

**Desirée A. White**

Professor Emerita of Psychological & Brain Sciences; Professor of  
Pediatrics in Psychiatry  
PhD, Washington University

---

### L33 Psych 100B Introduction to Psychology

A survey and analysis of concepts, theory, and research covering the areas of biological psychology, human development, learning, memory, social psychology, and mental disorders and their treatment. This is a general survey course designed to introduce students to the diversity of topics, research methods, and theories that comprise the study of mind and behavior. Psych 100B is required of all majors and is a prerequisite to all upper-level courses in Psychological & Brain Sciences. Open to first-year students and above. NOTE: For first-year students with AP/IB exemption, and first- and second-year students enrolled in Psych 100B who are interested in exploring a few areas of Psychology within a seminar format, see Psych 102, First-Year Opportunity: Contemporary Issues in Psychology. Credit 3 units. A&S IQ: SSC Arch: SEM, SSC Art: SSC BU: BA EN: S

---

### L33 Psych 102 First-Year Opportunity: Contemporary Issues in Psychology

This seminar enables students to explore several of the ideas and issues in contemporary psychology. Each week a different issue is discussed, and students familiarize themselves with critical aspects of the issue and discuss and critically evaluate the pros and cons of each side. Open to First-Year students who are concurrently enrolled in or who have completed (or are exempt from) Psych 100B/1000. Also open to Sophomores who are concurrently enrolled in Psych 100B/1000. Sections are limited to 15 students. Credit 1 unit. A&S: FYO A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L33 Psych 105 First-Year Opportunity: Psychology of Young Adulthood

This course will cover selected topics relevant to the developmental, social, personal, and cognitive issues confronting young adults during their college years. Material will be drawn mainly from the field of psychology, and the emphasis will be on the scientific basis of concepts and on empirically supported strategies for growth and development. The knowledge gained may contribute to academic success, personal development, and a more rewarding social and academic experience over the course of college and beyond. This one-unit course is only open to first-year students. Credit/No Credit only.

Credit 1 unit. A&S: FYO

---

### L33 Psych 109 First-Year Opportunity: Research in Psychology

Weekly one-hour presentations by the Psychological & Brain Sciences Department faculty. Each week a member of the faculty will present a lecture in an area of interest. The seminar will introduce students to research areas and issues of current interest. The seminar is highly recommended for those individuals with an interest in Psychology. Open to First-Years and Sophomores only. Credit/No Credit option only. Credit 1 unit. A&S: FYO A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L33 Psych 111 First-Year Opportunity: Mindfulness Science & Practice

Mindfulness is a term that is becoming increasingly used in popular culture to refer to a set of skills associated with increased attentional focus, successful stress-management, and improved health, sleep, and emotional well-being. This course will expose students to the various facets of mindfulness from both an applied and scientific perspective, by teaching mindfulness skills through a set of easy-to-learn practices and exercises, and by surveying of empirical research regarding mindfulness effects on cognition, emotion, brain function, and health. The goal of the seminar will be to provide practical skills that can contribute to personal development, emotional well-being, and academic success, while also developing critical thinking skills in learning how to read and evaluate primary scientific literature on mindfulness. Open to freshman only. Credit 1 unit. A&S: FYO

---

### L33 Psych 219 The Infant Mind: Sophomore Seminar

What goes on inside the mind of an infant? In this course we will explore a variety of hot topics concerning how babies experience the world around them. We will cover topics such as temperament (Do babies get mad?), language and communication (How do infants learn words and what if a baby is exposed to more than one language?), the effects of poverty on the developing brain (Does it matter?), social categories and relationships (Do babies notice differences across people?), and morality (Do babies have a sense of justice?). We will also discuss how to put child development research into practice, for example, by considering research relevant to policies concerning vaccination, early childhood education, and whether screen time is okay for babies. Students will have ample opportunity to interact with children at a local childcare center, where they can experience first-hand the research they are learning about in class. If you are curious about the developing mind, human nature, or considering a career in a field that involves children (e.g., education, medicine, public policy) this course is for you. PREREQ: Sophomore standing, and is open to students from all majors. Enrollment is restricted to 20 sophomores or permission of instructor. Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

### L33 Psych 221 First-Year Seminar: Introduction to Memory Studies

This course focuses on memory not only as an individual phenomenon but also how our memories for historical events can be determined by the groups to which we belong (collective memory). We will survey such topics as experimental methods and findings in the study of individual memory; questions of accuracy and vividness of memory; false and illusory memories; eyewitness memory reports that are used in trials; methods to greatly enhance learning and memory; and people with extraordinary memories; . We then transition to the study of collective memory, or how our memories and identities are shaped by the groups to which we belong. The topics will include transmission of memories and identity through narratives; shared historical memories; battles over how the past is to be remembered; and revision of the memories of the past to meet concerns of the present. We also consider how memory is used in political arguments. Enrollment is restricted to first-year students..

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 225 Internship in Psychology

An opportunity to gain practical, applied experience in a non-academic, community service agency. For description of prerequisites, course goals, agency selection, registration policies, and course requirements, obtain a copy of "Internships in Psychology" available in room 207B in Somers Family Hall or on the P&BS website: <http://psychweb.wustl.edu/undergraduate>. This course can be taken only once, open to junior and senior P&BS majors only. Credit/No Credit only. Permission of Instructor Required. Credit 3 units.

---

### L33 Psych 235 Practicum in Applied Behavior Analysis: Autism Spectrum Disorder

An opportunity to be trained in applied behavior analytic techniques and to work with a child with autism spectrum disorder. Training and supervision will be arranged and coordinated by the family of the child and/or their consultant/agency. Students must complete the minimum number of hours of training and therapy, and attend regular therapy meetings. In addition, there is a required seminar for discussion of assigned readings and presentations on autism and therapy. Completion of a paper in the second semester also is required. For further information and petition form, pick up the Practicum brochure from the Department. Credit/No Credit only. Enrollment through the practicum coordinator only. Credit variable, maximum 3 units.

---

### L33 Psych 261 Applying the Science of Learning

This course is intended to cover the science of human learning, with special focus on areas, theory, and research that have potential to improve how students learn. Thus, the course will provide selective coverage of theoretical and empirical work in the science of learning that can inform and improve student learning. The applicability of these themes to the students in this course will be explicitly developed through students' explicit translation of the experimental findings from the literature to their own learning challenges. The course will be organized around three major integrated goals. First, the relevant basic theory and findings in select topics in the science of learning will be covered. Second, the implications of this work for improving learning outcomes in authentic educational contexts will be considered. Third, together we will develop concrete techniques and examples of how the principles that emerge can be adopted to significantly enhance outcomes of lifelong learning challenges. Prerequisite: Psych 100B. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 300 Introduction to Psychological Statistics

Descriptive statistics including correlation and regression. Inferential statistics including nonparametric and parametric tests of significance through two-way analysis of variance. Course emphasizes underlying logic and is not primarily mathematical, though knowledge of elementary algebra is essential. Psych 300 is required of all P&BS majors. PREREQ: Psych 100B. Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

### L33 Psych 301 Experimental Psychology

This course provides training in the logic and techniques of psychological research so as to provide students with experience in the design of psychology experiments and interpretation of results. Topics include experimental design and control, library research, quantitative treatment of data, graphical presentation of results, and clarity of scientific writing. Lectures focus on general principles of experimentation, whereas the laboratory sections provide an

introduction to a range of psychological phenomena through hands-on experience in experimentation. Each student also completes an independent research project. Declared P&BS majors will have priority. Limited to 15 students per section. PREREQ: Psych 100B and 300. Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L33 Psych 3011 Experimental Psychology

Psych 3011 is limited to students who have not taken Psych 300 and want to enroll in Psych 300 and Experimental Psychology concurrently. Therefore, students who enroll in Psych 3011 must also register for Psychology 300. Psych 3011 fulfills the Psychology 301 requirement for the major. Topics in the two courses (i.e., Psych 300 and Psych 3011) will be coordinated in order to integrate the concepts from Statistics with those from Experimental Psychology. Experimental Psychology provides training in the logic and techniques of psychological research so as to provide students with experience in the design of psychology experiments and interpretation of results. Topics include experimental design and control, library research, quantitative treatment of data, graphical presentation of results, and clarity of scientific writing. Lectures focus on general principles of experimentation while the laboratory component provides an introduction to a range of psychological phenomena through hands-on experience in experimentation. Each student also completes an independent research project of his or her own design under supervision of a faculty member. Enrollment limited to 15 students. Declared P&BS majors will have priority. PREREQ: Psych 100B and concurrent enrollment in Psy 300. Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA, SCI

---

### L33 Psych 304 Educational Psychology

This is a course in psychological concepts relevant to education that is organized around four basic issues: (1) how humans think and learn; (2) how children, adolescents, and adults differ in their cognitive and moral development; (3) the sense in which motivation and intention explain why people act as they do; and (4) how such key human characteristics as intelligence, motivation, and academic achievement can be measured. Offered fall and spring semesters. Enrollment Note: Undergraduate students must enroll in Educ. 304. Graduate students must obtain approval of instructor and their advisor before enrolling in Educ. 5004. Same as L12 Educ 304. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 305 Health Psychology

Review and discussion of psychobiological approaches to health, as well as psychological aspects of physical illness. Topics: stress and coping, psychosocial factors in the etiology and progression of chronic illness, and psychological sequelae of chronic illness. There will be an emphasis on research methodology and results. PREREQ: Psych 100B. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 315 Introduction to Social Psychology

An introduction to the scientific study of social influence. Topics include person perception, social cognition, attitudes, conformity, group behavior, aggression, altruism, prejudice and psychology's interface with law, health, and climate change. PREREQ: Psych 100B/1000. Credit 3 units. A&S IQ: SSC Arch: SEM, SSC Art: SSC BU: BA EN: S

---

### L33 Psych 3175 Applied Statistical Analysis with R

This course is designed to introduce R as both a means of applied statistical analysis as well as a window into data organization and programming. The goal of the course is to teach the tools needed to take a raw dataset and not only perform a statistical test in R, but also learn how to arrange the dataset to perform a variety of tests, to

choose the appropriate test, and to visualize the results. Students will gain practical knowledge of how to use statistics in research. Please note that this is an introductory course and knowledge of R prior to enrollment is not expected. PREREQ: Psych 300. Credit 3 units. A&S IQ: NSM Art: NSM

---

### L33 Psych 3195 Abnormal Child Psychology

This course will familiarize students with current perspectives on the nature, causes, assessment, treatment, and prevention of child psychiatric disorders and related family dysfunction. Theoretical perspectives and research findings will be discussed pertaining to anxiety, depression, conduct disorder, attention-deficit/hyperactivity disorder, autism, learning impairments, and parent-child conflict. PREREQ: Psych 100B. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 321 Developmental Psychology

This course concentrates on the cognitive and social development of the person from conception to adolescence. Topics covered include: infant perception, attachment, cognitive development from Piagetian and information processing perspectives, aggression and biological bases of behavior. PREREQ: Psych 100B. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 3211 Music Cognition

An introduction to modern research on music perception and cognition. The course covers four main topics: the perception of key, the psychoacoustics of dissonance, the relationship between attention and musical meter, and the process by which melodies establish, fulfill, and deny expectations. Students read and discuss research from both cognitive science and music theory, in addition to completing several projects. Same as L27 Music 3221. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: HUM

---

### L33 Psych 325 Psychology of Adolescence

This course concentrates on brain, cognitive, and social development during adolescence. This period of development is marked by transition and change. Special topics will include the vulnerability of the adolescent brain and the development of sexual orientation. Prerequisite: Psych 100B. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 326 Introduction to the Psychology of Aging

Study of the processes of aging in the individual in terms of their behavioral effects. Age changes in biological functions, sensation, perception, intelligence, learning, memory, and creativity studied to understand the capacities and potentials of the mature and older person. PREREQ: Psych 100B. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 330 Sensation and Perception

What's involved in seeing and hearing? This course will cover perception from the physical stimuli (light and sound) that impinge upon the sensory receptors through the higher-level percepts that the stimuli generate. Demonstrations and illusions will be used as we learn about the anatomy and physiology of the sensory systems and study the brain mechanisms that are involved in vision and audition. Prerequisite: Psych 100B/1000. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA, SCI

---

### **L33 Psych 333 Independent Study in Psychological and Brain Sciences**

PREREQ: Psych 100B and permission of a member of the faculty of the department (or other approved supervisor) who agrees to supervise the student's work. Credit to be arranged. A maximum of 6 units may be applied toward the major. The electronic Petition for Supervision of Independent Study form is available at the URL, <http://eyes.wustl.edu/psych333>. Students will be enrolled only after their form is approved by the faculty supervisor and forwarded to the Undergraduate Coordinator. Credit/ No Credit only. Credit variable, maximum 3 units.

---

### **L33 Psych 3401 Biological Psychology**

An introduction to biological mechanisms underlying behavior. Topics will include the physiology of nerve cells, anatomy of the nervous system, control of sensory and motor activity, arousal and sleep, motivation and higher mental processes. PREREQ: PSYCH 100B. Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

---

### **L33 Psych 344 Principles of the Nervous System**

This course will provide a broad introduction to neuroscience, starting at the level of cellular and molecular neuroscience, and ultimately ending at systems and theoretical neuroscience, with emphasis on the organization of the mammalian central nervous system. Topics will include neuronal structure, the action potential, information transmission between neurons, sensory/motor systems, emotion, memory, disease, drugs, behavior, and network dynamics. A fundamental goal of this course is to provide students with the ability to approach complex problems using the scientific method and to understand the limits of knowledge. This course will also expose students to some of the neuroscience community at WashU. Bio 2960, Bio 2970 recommended, Bio 3058 recommended or Psych 3401 and permission of instructor. (Biology Major Area B) Same as L41 Biol 3411. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### **L33 Psych 345 Genes, Environment, and Human Behavior**

This class will examine how genetic influences impact various dimensions of human behavior, ranging from traits (e.g. personality) to psychiatric disorders. Topics to be covered include methods used to study genetic influence, how genetic predispositions interact with the environment, and ethical implications. Modern methods for gene-identification, such as genomewide association studies, polygenic risk scores and epigenetic experiments will be examined in detail. Emphasis will be placed on understanding core concepts (e.g. what is identity-by-descent) as well as application (e.g. calculate heritability, interpretation of results from published studies). PREREQ: Psych 100B. 3 units. Same as L64 PNP 3451. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: SCI EN: S

---

### **L33 Psych 3501 Psychotherapy: Introduction to Practice and Research**

This is an introductory course in psychotherapy: The treatment of psychological problems through the application of interventions grounded in psychological theory and focusing on behavior or mental processes. Students will become familiar with the more popular schools of psychotherapy, including their historical context, characteristic techniques, theoretical underpinnings, and current research support. Students will also gain an appreciation of the problems and solutions in researching psychotherapy, as well as emerging variations on psychotherapy procedures. Prerequisite: Psych 100B. Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

### **L33 Psych 353 Psychology of Personality**

What is personality, and how can we scientifically study it? How did we become who we are today? Is personality fixed, or can we change? How does personality shape our everyday experiences and consequential life outcomes? Do we know ourselves and others? This course will address such questions by providing a contemporary overview of the field of personality psychology that will help students better understand themselves and others. PREREQ: Psych 100B. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### **L33 Psych 354 Psychopathology and Mental Health**

This is an introductory course in psychopathology or the scientific study of mental health disorders. The course will include definitions, theories, and classification of Psychopathological behavior. Content will focus on symptoms, classification, prevalence, etiology, and treatment of mental health disorders, including mood, anxiety, eating, schizophrenia spectrum, substance use, and personality disorders. PREREQ: Psych 100B. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA

---

### **L33 Psych 357 Introduction to Clinical Psychology**

A survey of clinical psychology. Emphasis is placed on historical and recent developments in the field (e.g., managed care), as well as the consideration of the roles, functions, and techniques of clinical psychologists including psychological testing and psychotherapy. Prerequisite: Psych 100B and either Psych 353 or Psych 354. Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

---

### **L33 Psych 358 Language Acquisition**

This course examines the development of language skills in children, asking how children so rapidly learn their first language. Topics include; biological bases of language development; development of phonology, syntax, and morphology; language development in atypical populations; childhood bilingualism; and development of written language skills. Prerequisite: Psych 100B and Ling 170D. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### **L33 Psych 358W Language Acquisition**

This course examines the development of language skills in children, asking how children so rapidly learn their first language. Topics include: biological bases of language development; development of phonology, syntax, and morphology; language development in atypical populations; childhood bilingualism; and development of written language skills. PREREQ: Psych 100B and Ling 170D and junior or senior standing. Writing intensive. Credit 3 units. A&S IQ: SSC, WI EN: S

---

### **L33 Psych 360 Cognitive Psychology**

Introduction to the study of thought processing from an information-processing approach. Emphasis will be placed on theoretical models that are grounded in empirical support. Topics include pattern recognition, attention, memory, reasoning, language processes, decision making, and problem solving. PREREQ: Psych 100B. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

---

### **L33 Psych 3604 Cognitive Neuroscience**

A general introduction to the underlying principles and mechanisms of brain function that give rise to complex human cognitive behavior. Emphasis will be placed on how emerging methods and approaches from both neuroscience and cognitive psychology have been integrated to yield new insights into the organization and structure of higher mental processes. Topics include perception, attention, memory, language, and executive control. Prerequisite: Psych 100B/1000. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

---

### L33 Psych 361 Psychology of Learning

The experimental analysis of behavior is presented with examination of Operant and Pavlovian conditioning, aversive control, theories of reinforcement, choice behavior, behavioral economics, etc. Theoretical and experimental approaches to the study of behavior as developed in the laboratory are emphasized. Consideration is given to applications from the laboratory to everyday behavior. PREREQ: Psych 100B. Enrollment limited to 30.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L33 Psych 3645 Understanding Emotions

Emotions both shape and are shaped by our subjective experiences, physiology, behaviors, cognitions, social interactions, and health. Their complexity and significance make the study of emotions particularly exciting and challenging. This course offers an overview of theory and research on emotions with content stretching across psychological disciplines, including personality, social, clinical, developmental, and neuropsychology. Course content will include definitions of emotions, physiological changes associated with emotions, and individual differences in emotional experience. The course will also examine how culture, cognitions, and relationships affect and are affected by emotions and how emotion is related to physical and mental health. PREREQ: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 380 Human Learning and Memory

A survey of issues related to the encoding, storage and retrieval of information in humans. Topics include memory improvement strategies, people with extraordinary memories, memory illusions and distortions, among other topics. Limited to 25 students. Prerequisite: Psych 100B/1000.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

---

### L33 Psych 386 Psychology of Black Women

This course is designed to provide a critical analysis of the distinctive experiences of Black women through a psychological lens. We will explore topics relating to Black women's experiences in home, school, and community contexts, such as identity development, socialization experiences, and misogyny. The class will also consider how Black women draw on individual strengths and cultural assets to support their personal wellbeing. This course will heavily center the narratives of Black women, and focus on mixed methods and qualitative research approaches. We will draw upon interdisciplinary frameworks (e.g., intersectionality, Black feminist thought, and liberation psychology) to help us understand Black women's experiences. PREREQ: L33 Psych 100B

Credit 3 units. A&S IQ: SSC, SC Arch: SSC Art: SSC EN: S

---

### L33 Psych 3865 Community Psychology

Community psychology goes beyond an individual focus and integrates social, cultural, economic, political, environmental, and international influences to promote positive change, health, and empowerment at individual and systemic levels. In this course, we will focus on identifying the root causes of various social problems and become familiar with community-defined priorities for addressing them. We will discuss how to use psychology as a scientific foundation to better understand social determinants of health and wellness, and discuss best practices on how to build collaborative relationships with community members, groups, and organizations to solve social problems.

Credit 3 units. A&S IQ: SSC EN: S

---

### L33 Psych 3885 The Mental Health Crisis in Higher Education

During the last decade, college campuses have seen unprecedented increases in the proportion of students suffering from mental health problems. Many institutions have responded by increasing the number of mental health counselors available in student health centers, making the accommodations at disability resource centers more robust, and providing safe spaces for students to process incidents and events that have triggered them. Are such interventions improving the well-being of today's students, or might they actually be further encumbering students' psychological health? This discussion-based course will explore arguments made on all sides of this provocative debate and examine research on the nature of today's college students and what resources and services most contribute to their psychological health and well-being. Enrollment is limited to 15 students. Prerequisite: at least 6 units of advanced home-based psychology courses.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 3890 Advanced Psychological Statistics: The General Linear Model and Beyond

The General(ized) Linear Model (GLM) refers to a common family of statistical techniques popular in the social sciences such as ANOVA, regression, and logistic regression. The primary goal of this course is for students to understand the basics and nuances of the GLM. We will also explore and introduce students to extensions of the GLM common in psychology and neuroscience research. These frameworks include multilevel modeling, generalized linear models, Bayesian analyses, machine learning, etc. Students will analyze data using each of these methods using R statistical software, therefore improving their advanced computing skills. By the end of the course, students will understand the general framework used in most statistical tests employed by psychological and neuroscientific researchers. Students will not be expected to know every detail of every test, but will instead have a conceptual understanding of these tools and practice in deploying these tools. PREREQ: L33 Psych 300, Mth 2200, Mth 3200, or DAT 120 and Fluency or proficiency with R statistical software (e.g., Psych 4175).

Credit 3 units. A&S IQ: NSM, AN Art: NSM

---

### L33 Psych 395 Prejudice, Stereotyping, & Discrimination

This course will trace prejudice, stereotyping, and discrimination from its ordinary origins in social cognition to its most extreme consequences in war and genocide. Topics include prejudice, the causes of stereotyping and discrimination, the development of prejudice in children, subtle and overt prejudice and stereotyping, group conflict, the role of social norms, the experience of being a target of discrimination, and interventions to reduce prejudice and discrimination. Areas covered include racism, sexism, ageism, homophobia, ableism, colorism, and religious discrimination. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 396 Psychological Dynamics of Empathy

In this course, we will explore the antecedents and consequences of empathic motivation, defined broadly. Along the way, we consider answers to several interesting questions: Why are some people generally more empathic than others? Are there cultural differences in levels of this trait? To what extent is empathy an "emotional" or "cognitive" phenomenon? We will also consider the conditions under which empathy is associated with prosocial outcomes (e.g., reducing racial prejudice) but with recognition that empathy has a "darker" side, one that can ironically exacerbate people's preexisting biases. The approach to empathy will be highly interdisciplinary as we consider research and theory within several fields within psychology (e.g., social, personality, cognitive) as well as areas that draw from other scholarly disciplines (e.g. social neuroscience, social anthropology). Prerequisite: Psych 100B/1000.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L33 Psych 4075 Advanced Research Methods & Design

This course is an advanced foray into research design and methods used in psychological science. This course is project-based, writing intensive, and will be supplemented heavily with readings and discussions of topics of broad importance to psychological research (e.g., reliability, validity, signal detection theory, philosophy of science). These readings will enhance your abilities to think critically about psychological research design and methods, as both a consumer and creator of psychological research. During the course of the semester you will complete two original research projects (e.g., an observation study and an experimental study). Together with your classmates you will devise research questions, design studies to test your research questions, collect data, and statistically analyze your results. Individually, you will write-up, and then revise, each research project in an APA-style paper. The writing requirements for this course build on the skills you acquired in Experimental Psychology and will further your abilities to communicate scientific ideas more skillfully, clearly, and accurately. Prerequisite: L33 Psych 301 or 3011  
Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: BA

---

### L33 Psych 4099 Human Evolutionary Psychology

How did evolution by natural selection shape the way human beings think and behave? Does evolution explain human cooperation and friendship, human morality, reproductive decisions and social interactions? What sex differences in cognition or behavior are caused by evolution? This course introduces the concepts and findings of evolutionary psychology, mostly through reading of primary sources--articles from psychology and biology journals--and discussion and presentation of empirical cases. PREREQ: At least 6 units of upper-level, home-based Psychology coursework, OR Anthro 3383.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L33 Psych 413 Contemporary Topics in Social Psychology

Consideration of selected contemporary topics in social psychology. Participation in a research project of appropriate scope. Prerequisite: Psych 315.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC

---

### L33 Psych 4182 Perception, Thought, and Action

This course focuses on current topics in visual perception, visual attention, and the control of action. Readings consist of recent journal articles. Class meetings emphasize presentation and discussion of the material in the readings. Limited to 15 students. PREREQ: Psych 100B/1000 and one of the following: Psych 301/3010, Psych 330/3300, Psych 3401, Psych 344/3440, Psych 360/3600, Psych 361/3610, Psych 3604, Psych 380/3800, Psych 433/4330, or Psych 4604.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

---

### L33 Psych 427 Social Gerontology

This course provides an introduction to aging and growing old, from an interdisciplinary perspective. Specific attention is paid to demographics, physical health and illness, mental health, interpersonal relations, work issues, living arrangements, ethics, and death and dying. PREREQ: Junior or Senior standing and completion of 6 advanced units in Psychology.  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L33 Psych 4301 Contemporary Topics in Cognitive Development

Cognitive Developmental topics to be covered will include: Piagetian abilities (e.g., conservation, formal reasoning), basic cognitive abilities (e.g., processing speed), executive functions (e.g., working memory), and other current topics (e.g., processing facial stimuli). Prerequisite: Psych 321 or 360.  
Credit 3 units.

---

### L33 Psych 4302 Cognitive Psychology Applied to Education

This course is intended to cover topics in the cognitive psychology of human memory, conceptual learning, and comprehension with special focus on areas, theory, and research that have potential application to education. Thus, the course will provide selective coverage of theoretical and empirical work in cognitive psychology that provides potential to inform and improve educational practice. The applicability of these themes will be explicitly developed and evaluated through the primary research literature using educationally oriented experimental paradigms. The course is expected to be of interest and benefit to education majors and to psychology majors interested in cognitive psychology and its applications. PREREQ: Junior/Senior status, 9 units in Psychology and Psych 100B OR Junior/Senior status, 9 units in Education and Psych 100B.  
Credit 3 units. A&S IQ: SSC EN: S

---

### L33 Psych 4305 Psychological Science: Fact and Fiction

Skeptical analysis of psychological science as practiced and popularized in the media. Analysis of discrepancies between media and scientific claims regarding areas such as repressed memory, brain imaging, heritability, and psychotherapy. Additional examination of scientific career demands such as peer review, journal publication, and research funding. These topics are interwoven with a review of common errors in reasoning particularly with respect to probabilistic reasoning and the public misperception of the practice and principles of scientific psychology. PREREQ: Psych 100B, Junior or Senior standing, and completion of 6 units of advanced home-based psychology.  
Credit 3 units. A&S IQ: SSC, WI Arch: HUM Art: SSC EN: S

---

### L33 Psych 433 Psychology of Language

This course surveys current research and theory in psycholinguistics, covering the biological bases, cognitive bases, and learning of language. We consider studies of normal children and adults, the performance of individuals with various types of language disorders, and computer simulations of language processes. Topics range from the perception and production of speech sounds to the management of conversations. Each student will carry out an original research project on some aspect of psycholinguistics. Prereq: Ling 170D and Psych 100B  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L33 Psych 4355 Personality Development Across the Life Span

This seminar examines how individual differences develop over the lifespan. Or, in other words, how we become who we are. The scope of the class covers a multitude of individual differences constructs (e.g., happiness, intelligence, goals), but a particular focus will be on personality traits. Questions that will be examined include: How early in the lifespan does one's personality emerge? How much do parents matter in shaping who you become? Does your personality change across the lifespan? Readings will cover theories of development at different life stages and empirical research from childhood to older adulthood. PREREQ: Psych 100B and Psych 353  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

---

### L33 Psych 4367 Seminar in Positive Psychology

This course focuses on scientific research relevant to the pursuit of happiness and well-being. Topics include the nature and measurement of happiness, the biological basis of positive emotions, an overview of positive trait theories, self-esteem, gratitude, mindset, the mind-body connection, physical activity, emotional intelligence, resilience, prosocial behavior, decision-making, willpower, mindfulness meditation, and the characteristics of successful relationships. As an advanced seminar on these topics, students will parlay their course of study into real-world proposals that universities could use to address the mental health crisis. PREREQS: Intro Psych 100B, and at least 6 units of either upper-level home based psychology coursework OR upper-level coursework from other departments related to well-being.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L33 Psych 4412 Advanced Cognitive Neuroscience

An intensive, case-study based approach to the underlying principles and mechanisms of brain function that give rise to complex human cognitive behavior. Emphasis will be placed on understanding and evaluating cutting-edge neuroscience research that has yielded new insights into the organization and structure of higher mental processes. Students will develop critical thinking via a strong class participation component. Topics include perception, attention, memory, language, emotion, and executive control. Declared Psychology majors will be given priority over others to enroll. PREREQ: Psych 100B/1000, and either Psych 3401 or Psy 344/Bio 3411 or Psych 3604.

Credit 3 units. A&S IQ: NSM Art: NSM

---

### L33 Psych 4413 Advanced Cognitive Neuroscience (Writing Intensive)

This course presents an intensive, case-study based approach to the underlying principles and mechanisms of brain function that give rise to complex human cognitive behavior. Emphasis will be placed on understanding and evaluating cutting-edge neuroscience research that has yielded new insights into the organization and structure of higher mental processes. Students will develop critical thinking and writing skills via a strong class participation component and a writing-intensive format. Topics include perception, attention, memory, language, emotion, and executive control. Writing Intensive. Declared psychology majors will be given priority over others to enroll. Prerequisite: Psych 3401, Psych 344/Biol 3411, or Psych 3604.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

---

### L33 Psych 444B Independent Study for the Major in P&BS: Cognitive Neuroscience

PREREQ: Acceptance into the P&BS Cognitive Neuroscience major. Permission of a member of the faculty of the department (or other approved supervisor) who agrees to supervise the student's work. In addition to the approved research in the area of cognitive neuroscience, an APA-style research paper must be satisfactorily completed to obtain credit. Petition for Supervision of P&BS 444B are available in Somers Family Hall, room 207B. Students will be enrolled only after they have completed the petition and returned it to the Undergraduate Coordinator in Psychology 207B. Open only to P&BS:CN majors and with prior approval only.

Credit 3 units. A&S IQ: SSC EN: S

---

### L33 Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences

PREREQ: Acceptance into a Concentration in Psychological and Brain Sciences. Written permission (Petition for Supervision of P&BS 444C) of a member of the faculty of the department (or other approved supervisor) who agrees to supervise the student's work is also required. In addition to the approved research for the concentration, an APA-style research paper must be satisfactorily completed to obtain

credit. Petition for Supervision of P&BS 444C are available in Somers Family Hall, room 207B. Students will be enrolled only after they have completed both the Petition for a Concentration in P&BS and the Petition for Supervision of P&BS 444C, and returned them to the Undergraduate Coordinator in 207B. Open only to P&BS majors and with prior approval.

Credit 3 units.

---

### L33 Psych 4512 Neurobiology of Learning & Memory

The brain is the most complex object in the known universe, and among its most incredible attributes is its ability to acquire and store vast amounts of information to guide behavior. Over a lifetime, our experiences shape our brains and our behavior, ultimately making each of us unique. What "information" is encoded by the brain? How is it stored? How is it retrieved? How does this occur at different spatial and temporal scales? Does stored information change over time? How do learning and memory change across the lifespan, and with neurological disorders? Can you trust your memories?

Credit 3 units. A&S IQ: NSM BU: BA

---

### L33 Psych 4555 Emotion Regulation

The purpose of this course is to provide an introduction to the field of emotion regulation. We will discuss theoretical and empirical work on emotion regulation from various areas of psychology, including social, personality, developmental, clinical, and neuroscience. Example topics include definitional issues, goals and strategies, personal and interpersonal consequences, sociocultural influences, life-span development, health and psychopathology. PREREQ: Psych 301.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L33 Psych 4557 Biopsychosocial Aspects of Eating Disorders and Obesity

This seminar examines the epidemiology, etiology, prevention, and treatment of body image, eating disorders, and obesity. An emphasis will be placed on understanding the characteristic symptoms of excessive dieting, body image disturbance, and binge eating, not only as formal psychiatric syndromes, but as a representation of dysregulatory processes reflecting social-cultural, psychological, and biological disturbances. Students will also learn about the clinical characteristics, medical sequelae, and physical aspects of eating disorders and obesity. PREREQ: Psych 100B and junior or senior standing, plus 6 units of advanced home-based psychology courses.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L33 Psych 4591 The Development of Social Cognition

This course will explore what is known about the development of social cognition. Our starting point will be infants' capacity to navigate the social world, for instance, detecting agents, identifying social partners, and learning from those around us. We will consider what happens when the human ability to reason about others breaks down (as with autism), and what this can teach us about typical development. Each week we will cover one topic and a related set of readings. Class meetings will be devoted to active discussion and debate about the content of the readings. Students are required to write a weekly reaction paper to the readings to promote class discussion, and will give an in-class presentation on a novel research topic at the end of the semester. Graduate students may have additional course requirements. PREREQ: Psych 100B and one of the following: Psych 315 or 321 or 360.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

---

**L33 Psych 4592 Development of Social Cognition (Writing Intensive)**

This course explores current hot topics in social cognitive development. We will study this in children by examining the development of social groups/categories and identity in children, with a focus on language, race, and ethnicity. We will also explore the emergence and development of bias and prejudice and approaches to reducing its development in children. We will explore these issues in the context of innate knowledge and the effects of the environment on children's development. Each week we will cover a topic by reading one book chapter and two journal articles. Class time will be devoted to active discussion of these readings, with lecture and class activities as needed, to complement the readings and set the stage for discussion. This is a writing intensive course, so a second goal is to improve student writing. There will be several writing assignments that will receive extensive feedback from the instructor, and then students will write an improved final version. Students will also give class presentations: one that directly addresses writing and another on a research topic of their choice that is relevant to social cognitive development. Prerequisites: Psych 100B and either Psych 315, Psych 321, or Psych 360. Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC EN: S

---

**L33 Psych 4593 Psychology of the Good Life**

What is the good life, and how can people achieve it? This discussion-based seminar class explores two aspects of the "good life": (1) "good" for oneself (living a personally fulfilled life), and (2) "good" for others (living an ethical life, being a good person). We will consider how psychological science can be used to conceptualize, uncover the causes of, and promote well-being for oneself and for others. There will be a particular focus on the ways in which these two aspects of the good life are in alignment or in conflict with each other. Classes will focus on critically evaluating research and integrating and connecting the weekly readings to students' personal research interests and lives, primarily through student-led discussions. PREREQ: Psych 100B, Psych 301/3011, and either Psych 315 or Psych 353 or Psych 367. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L33 Psych 461 Seminar in Selected Topics in Learning & Memory: Cognitive Illusions**

This course will consider illusions of perceiving, attending, remembering and, more broadly, thinking. The reading will be concentrated on three books - Blink, The Invisible Gorilla, and Thinking Fast and Slow - as well as selected journal articles. We will consider how processes that lead us astray in some situations are the same ones that aid us in other situations, which is why these processes exist. Students will write essays and a term paper on one illusion or class of illusions. Prerequisites: Psych 100B and either Psych 360 or Psych 380. Credit 3 units. BU: BA

---

**L33 Psych 4615 The Science of Paying Attention**

What processes underlie humans' ability to "pay" attention? This course will introduce students to theories of attention and cognitive control. Students will develop an understanding of empirical approaches to studying the control of attention, and examine factors that facilitate and impair humans' ability to pay attention. A final section will examine attention and cognitive control challenges that accompany aging and select psychological disorders such as ADHD, and applications of attention and cognitive control research to the classroom, driving, and other contexts. PREREQ: Psych 100B and Psych 301. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L33 Psych 4631 Introduction to Computational Cognitive Science**

How does the mind work? Over the last few decades, cognitive psychologists have become increasingly interested in using computational models. These models are designed to describe cognitive processes and the behavior that is produced by them. This computational approach has several advantages. Computational theories of cognition are more specific than verbal theories. Therefore, they do not only afford precisely quantifying certain aspects of cognition, but they also make it possible to simulate cognitive processes. This course provides an introduction to several leading computational methods for understanding cognition, including model fitting and comparison, reinforcement learning, neural networks and Bayesian modeling. These methods will be applied to a wide range of cognitive phenomena, such as short-term memory, reinforcement learning, decision making, cognitive control, concept learning and visual perception. Prerequisites: Psych 100B and Psych 301/3011. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

---

**L33 Psych 4651 History and Modern Systems of Psychology**

An introduction to the history of psychology. This course begins with a brief consideration of forces leading to the development of psychology in the mid-1800s. It then examines the birth of modern psychology in Germany and the schools of psychology that emerged early in the 20th century. Newer orientations and ideas are considered in the final segment of the course. We also consider the impact of psychology on American public life during the 20th century. Prerequisite: Psych 100B, junior or senior standing, and 6 units of advanced home-based psychology courses. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L33 Psych 4746 Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior**

This seminar will introduce students to methods and recent empirical literature evaluating links between genes, brain, and behavior. This research is beginning to illuminate specific biological pathways shaping risk for psychopathology. In particular, the course focuses on the design, analysis, and interpretation of multimodal research (e.g., fMRI, PET, EEG, pharmacology, molecular genetics, environmental assessment/manipulation) examining the biological underpinnings of behavior relevant to psychopathology. Primary journal articles, reviews, and book chapters are the readings for this seminar. PREREQ: Psych 100B and one of the following: Genes, Environment, and Human Behavior (Psych 345), Biological Psychology (Psych 3401), or Principles of Biology II (Biol 2970); OR Graduate Standing (prior coursework in psychology, neuroscience, and genetics is advised). Credit 3 units. A&S IQ: NSM Arch: SSC Art: SSC

---

**L33 Psych 4765 Inside the Disordered Brain: Biological Bases of the Major Mental Disorders**

How do subtle disturbances in brain circuits lead to abnormal behavior and psychopathology? This course provides students with a working knowledge of our rapidly evolving understanding of brain circuits that create order in our social, emotional and cognitive worlds, and how disorder within these circuits leads to a broad range of psychopathology including depression, anxiety, phobias, PTSD, OCD, addiction, schizophrenia, psychopathy and violence. PREREQ: Psych 100B and one of the following: Biological Psychology (Psych 3401), Abnormal Psych (Psych 354), or a basic Biology/Neuroscience course. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L33 Psych 494 Behavioral Psychology Readings Group**

This weekly journal-style readings course provides the opportunity to read and discuss seminal as well as current writings on the conceptual aspects of behavioral psychology and relevant research. Points of contact among behaviorism, cognitivism, and neuroscience and the natural lines of fracture will be examined. Prerequisites: Psych 100B and one of the following: Psych 361, Psych 360, or a Philosophy course. Credit 1 unit. A&S IQ: SSC Arch: SSC Art: SSC EN: S

**L33 Psych 498 Study for Honors**

Acceptance into the Honors Program is based on superior performance as evidenced by the student's record in undergraduate course work and the written agreement (Petition for Permission to Enroll) of a member of the faculty of the Department (or other approved supervisor) to supervise an Honors project. The student must complete 6 units of Honors work (3 units of Psych 498 and 3 units of Psych 499), submit an acceptable written thesis, and be recommended by the Department. Recommendation for an Honors degree will be based on the evaluation of the written thesis and the student's overall performance as an undergraduate. Students in the Honors Program meet regularly in the Honors Seminar to discuss their research and become acquainted with the work of the other students. Psych 498 is a writing intensive course. Permission of Instructor is required for this course. All students must meet with Dr. Sommers prior to registering. Prerequisite: Psych 301 or 3011. Credit 3 units. A&S IQ: SSC, WI EN: S

**L33 Psych 499 Study for Honors**

Acceptance into the Honors program is based on superior performance as evidenced by the student's record in undergraduate course work and the written agreement (Petition for Permission to Enroll) of a member of the faculty of the Department (or other approved supervisor) to supervise an Honors project, as well as the Honors Coordinator, Dr. Mitch Sommers. The student must complete 6 units of Honors work (3 units of Psych 498 and 3 units of Psych 499), submit an acceptable written thesis, and be recommended by the department. Recommendation for an Honors degree will be based on the evaluation of the written thesis and the student's overall performance as an undergraduate. All students must meet with Dr. Sommers prior to registering. Students in the Honors Program will meet regularly in the Honors Seminar to discuss their research and become acquainted with the work of the other students. PREREQ: Psych 498. Credit 3 units. A&S IQ: SSC Art: SSC EN: S

# Psychological & Brain Sciences Major

## Program Requirements

- **Total units required:** 43-46 units (34, at least 25 of which must be at the 300 level or above, for the major requirements plus 9-12 units for the specialization)

## Required Courses

- Psych 100B Introduction to Psychology is a prerequisite for all upper-level courses (300 level and above). Exemption from Psych 100B Introduction to Psychology is possible in the following circumstances:

- Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
- An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A.
- Psych 300 Introduction to Psychological Statistics
  - SDS 2200, SDS 3200, or DAT 120 may substitute for Psych 300 Introduction to Psychological Statistics but earn no units of credit toward the major. No AP math course can substitute for Psych 300 Introduction to Psychological Statistics.
- Psych 301 Experimental Psychology or Psych 3011 Experimental Psychology

In cases where an exemption is granted (e.g., Psych 100B, Psych 300), no credits are earned toward the major, so exempt courses must be made up with additional P&BS content electives (approved by the major advisor).

## Core Requirements

Students must complete at least one course from each of the following five categories:\*

*Social/Personality:*

Code	Title	Units
Psych 305	Health Psychology	3
Psych 315	Introduction to Social Psychology	3
Psych 353	Psychology of Personality	3
Psych 396	Psychological Dynamics of Empathy	3
Psych 4099	Human Evolutionary Psychology	3

*Mental Health/Affective:*

Code	Title	Units
Psych 3195	Abnormal Child Psychology	3
Psych 354	Psychopathology and Mental Health	3
Psych 3645	Understanding Emotions	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

*Biological/Neurological Bases of Behavior:*

Code	Title	Units
Psych 330	Sensation and Perception	3
Psych 3401	Biological Psychology	3
Psych 345	Genes, Environment, and Human Behavior	3
Psych 3604	Cognitive Neuroscience	3
Psych 4182	Perception, Thought, and Action	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

*Behavior and Cognition:*

Code	Title	Units
Psych 360	Cognitive Psychology	3
Psych 361	Psychology of Learning	3
Psych 358	Language Acquisition	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 433	Psychology of Language	3

*Lifespan Development:*

Code	Title	Units
Psych 219	The Infant Mind: Sophomore Seminar (this course can fulfill the Lifespan Development Core, but the credit counts in the "6 units Rule")	3
Psych 321	Developmental Psychology	3
Psych 325	Psychology of Adolescence	3
Psych 326	Introduction to the Psychology of Aging	3
Psych 358	Language Acquisition	3
Psych 427	Social Gerontology	3

\* If a course falls into more than one category, it can be used to fulfill only one of those categories (i.e., no double-counting).

## Elective Courses

Students must complete an additional 9 units of Psychology & Brain Sciences (P&BS) course work.

## 6-Units Rule

No more than 6 units from the following course types may be used to satisfy the minimum requirements for the P&BS major:

- 100-/200-level courses (other than Psych 100B Introduction to Psychology)
- Psych 333 Independent Study in Psychological and Brain Sciences
- Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences
- Psych 498 Study for Honors and Psych 499 Study for Honors
- Approved School of Continuing & Professional Studies psychology classes
- Approved psychology study abroad courses from a non-psychology study abroad program
- Cross-listed courses not home-based in P&BS
- Approved transfer credits (students transferring from another college should refer to the Transfer Credit section below)

## Additional Information

### Transfer Credit

If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward either major in P&BS.

### Senior Honors Program in Psychological & Brain Sciences

The primary goal of the honors program in P&BS is to provide students who have achieved a superior academic record with the opportunity to conduct a comprehensive empirical investigation under the direction of a faculty member.

To be admitted into the honors program, students must meet the following requirements:

- Have overall and P&BS grade point averages of at least 3.65
- Complete both Psych 300 and Psych 301 (or Psych 3011)
- Have an approved honors research advisor

Contact: Shelley Kohlman  
Phone: 314-935-5169  
Email: [skohlman@wustl.edu](mailto:skohlman@wustl.edu)  
Website: <https://psych.wustl.edu/undergraduate-program>

## Psychological & Brain Sciences: Cognitive Neuroscience Major

### Program Requirements

- **Total units required:** 45-49 units (36-37, as well as prerequisites, for the major requirements plus 9-12 units for the specialization)

How does the brain think? Cognitive neuroscience refers to how mental functions are linked to the operation of the brain and nervous system. The goal of cognitive neuroscience is to provide an understanding of psychological processes such as attention, memory, thinking, and emotion in terms of physical principles and biological components. At the same time, cognitive neuroscience aims to provide an understanding of the psychological constraints on how the brain functions, computes, and generates behavior. Students who pursue the undergraduate major in Psychological & Brain Sciences: Cognitive Neuroscience (P&BS:CN) will gain a strong foundation in how to study the brain and mind at various levels of analysis, including cellular biology, brain systems, cognitive and affective function, and neural computation. In addition, they will gain an appreciation of the relation

between healthy cognitive and brain function and its breakdown in various disease states and disorders. The P&BS:CN major provides excellent preparation for a career in health and medical professions, scientific research, computer fields, education, and law.

## Prerequisites

Students must complete the following courses outside of Psychological & Brain Sciences:

Code	Title	Units
Math 132	Calculus II	3
Biol 2960	Principles of Biology I	4
<b>Total Units</b>		<b>7</b>

**Note:** Each of these prerequisites has its own prerequisites: Math 132 Calculus II requires Math 131; for Biol 2960 Principles of Biology I, taking Chem 111A and Chem 112A (concurrently) is strongly recommended. These courses are biology and pre-med prerequisites as well, and they are typically completed during a student's first year. They may alternatively be satisfied through AP credit or any other mechanism approved by the respective department or the College. These prerequisites do not earn credit toward the P&BS:CN major, but must be completed with a passing grade (C- or above) by the end of the student's third-year to remain in good standing for the major.

## Required Courses

Code	Title	Units
Psych 100B	Introduction to Psychology	3
Psych 300	Introduction to Psychological Statistics	3
Psych 301 or Psych 3011	Experimental Psychology	4
Psych 3401 or Psych 344	Biological Psychology Principles of the Nervous System	3
Psych 360	Cognitive Psychology	3
Psych 3604	Cognitive Neuroscience	3
<b>Total Units</b>		<b>19</b>

**Note:** The first three requirements (i.e., Psych 100B Introduction to Psychology, Psych 300 Introduction to Psychological Statistics, and Psych 301 Experimental Psychology/Psych 3011 Experimental Psychology) are the same as those for the regular P&BS major. Psych 344 Principles of the Nervous System is home-based in Biology; students should register under the cross-listed Psych L33 course designation, not Biol 3411 Principles of the Nervous System.

Exemption from Psych 100B Introduction to Psychology is possible in the following circumstances:

- Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
- An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A.
- SDS 2200, SDS 3200, or DAT 120 may substitute for Psych 300 Introduction to Psychological Statistics. No AP math course can substitute for Psych 300 Introduction to Psychological Statistics.

In cases where an exemption is granted (e.g., Psych 100B, Psych 300), no credits are earned toward the major, so exempt courses must be made up with additional P&BS content electives (approved by the major advisor).

## Additional Cognitive and Biological Distributions

Students must complete two courses — one each from the Distribution A and B lists:

*Distribution A eligible courses:\**

Code	Title	Units
Psych 321	Developmental Psychology	3
Psych 330	Sensation and Perception	3
Psych 358	Language Acquisition	3
Psych 361	Psychology of Learning	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 4182	Perception, Thought, and Action	3
Psych 433	Psychology of Language	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 3890	Advanced Psychological Statistics: The General Linear Model and Beyond	3

*Distribution B eligible courses:\**

Code	Title	Units
Psych 345	Genes, Environment, and Human Behavior	3
Biol 3057	Physiological Control Systems	3
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains, and Behavior	3
Biol 363	The Neuroscience of Movement: You Think, So You Can Dance?	3
Physics 350	Physics of the Brain	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 3890	Advanced Psychological Statistics: The General Linear Model and Beyond	3

**Note:** Psych 3175 Applied Statistical Analysis with R or Psych 3890 Advanced Psychological Statistics: The General Linear Model and Beyond can be allowed to fulfill either Distribution A or B; students must complete at least one non-statistics course for the Additional Cognitive and Biological Distributions requirement.

## Computation Requirement

Students must complete one of the following courses:\*

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 5007	Statistics and Data Analysis in MATLAB	2

With prior approval, another course involving a significant computational/programming component may be substituted.

## Capstone/Depth Requirement

Students must complete three of the following courses:\*

*Capstone/Depth eligible courses:*

Code	Title	Units
Psych 4182	Perception, Thought, and Action	3
Psych 4412	Advanced Cognitive Neuroscience (or Psych 4413 Advanced Cognitive Neuroscience (WI))	3
Psych 4512	Neurobiology of Learning & Memory	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4030	Biological Clocks	3
Biol 4580	Principles of Human Anatomy and Development	3
Biol 4582	The Physiology and Biophysics of Consciousness	2
Phil 4212	Philosophy of Neuroscience	3

*Additional Capstone/Depth eligible courses:*

- Psych 333 (all 3 units must be completed in one semester and in one lab to be considered for approval; taken Credit/No-Credit) can be used satisfy up to 3 units of the Capstone/Depth requirement.
- FYP 3001 Ampersand: Research in Mind, Brain, Behavior (two consecutive semesters must be completed; 3 units total) can substitute for Psych 333.

- Psych 444B (3 units; taken for a letter grade and requiring a final paper) can be used to satisfy up to 6 units of the Capstone/Depth requirement.
- The Honors Program in Psychology (Psych 498/Psych 499 can be used to satisfy up to 3 units total of the Capstone/Depth requirement).

In total, no more than 6 units of the above may be applied toward the Capstone/Depth requirement.

**Note:** Unless a student explicitly petitions for an exception and is granted written prior approval, only the above Capstone/Depth eligible courses can be counted toward the Capstone/Depth requirement. Contact [skohlman@wustl.edu](mailto:skohlman@wustl.edu) for the petition.

\* If a course falls into more than one category, it can be used to fulfill only one of those categories (i.e., no double-counting).

## Acceptance Into the Psychological & Brain Sciences: Cognitive Neuroscience Major

Acceptance into the major is contingent upon an application and then approval by the major committee. As part of this application, the student will meet with an appropriate advisor who will carefully review the requirements and oversee the student's progress. A brief, one-page statement from the student about why they feel the cognitive neuroscience major is appropriate for them will be requested as part of the application.

Washington University students will be considered for admission to the P&BS:CN major no sooner than during their third semester (sophomore year). Decisions are based on the student's statement and academic record as well as the interview with the advisor. A minimum GPA of 2.0 is required for admission into the major.

Email: [skohlman@wustl.edu](mailto:skohlman@wustl.edu)  
Website: <https://psych.wustl.edu/undergraduate-program>

## Psychological & Brain Sciences Major, Cognition in Children Specialization

### Program Requirements

- **Total units required:** 43-46 units (34, at least 25 of which must be at the 300 level or above, for the major requirements plus 9-12 units for the specialization)

## Required Courses

- Psych 100B Introduction to Psychology is a prerequisite for all upper-level courses (300 level and above). Exemption from Psych 100B Introduction to Psychology is possible in the following circumstances:
  - Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
  - An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A.
- Psych 300 Introduction to Psychological Statistics
  - SDS 2200, SDS 3200, or DAT 120 may substitute for Psych 300 Introduction to Psychological Statistics but earn no units of credit toward the major. No AP math course can substitute for Psych 300 Introduction to Psychological Statistics.
- Psych 301 Experimental Psychology or Psych 3011 Experimental Psychology

In cases where an exemption is granted (e.g., Psych 100B, Psych 300), no credits are earned toward the major, so exempt courses must be made up with additional P&BS content electives (approved by the major advisor).

## Core Requirements

Students must complete at least one course from each of the following five categories:\*

### *Social/Personality:*

Code	Title	Units
Psych 305	Health Psychology	3
Psych 315	Introduction to Social Psychology	3
Psych 353	Psychology of Personality	3
Psych 396	Psychological Dynamics of Empathy	3
Psych 4099	Human Evolutionary Psychology	3

### *Mental Health/Affective:*

Code	Title	Units
Psych 3195	Abnormal Child Psychology	3
Psych 354	Psychopathology and Mental Health	3
Psych 3645	Understanding Emotions	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

### *Biological/Neurological Bases of Behavior:*

Code	Title	Units
Psych 330	Sensation and Perception	3
Psych 3401	Biological Psychology	3
Psych 345	Genes, Environment, and Human Behavior	3

Psych 3604	Cognitive Neuroscience	3
Psych 4182	Perception, Thought, and Action	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

### *Behavior and Cognition:*

Code	Title	Units
Psych 360	Cognitive Psychology	3
Psych 361	Psychology of Learning	3
Psych 358	Language Acquisition	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 433	Psychology of Language	3

### *Lifespan Development:*

Code	Title	Units
Psych 219	The Infant Mind: Sophomore Seminar (this course can fulfill the Lifespan Development Core, but the credit counts in the "6 units Rule")	3
Psych 321	Developmental Psychology	3
Psych 325	Psychology of Adolescence	3
Psych 326	Introduction to the Psychology of Aging	3
Psych 358	Language Acquisition	3
Psych 427	Social Gerontology	3

- \* If a course falls into more than one category, it can be used to fulfill only one of those categories (i.e., no double-counting).

## Elective Courses

Students must complete an additional 9 units of Psychology & Brain Sciences (P&BS) course work.

## 6-Units Rule

No more than 6 units from the following course types may be used to satisfy the minimum requirements for the P&BS major:

- 100-/200-level courses (other than Psych 100B Introduction to Psychology)
- Psych 333 Independent Study in Psychological and Brain Sciences
- Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences
- Psych 498 Study for Honors and Psych 499 Study for Honors
- Approved School of Continuing & Professional Studies psychology classes
- Approved psychology study abroad courses from a non-psychology study abroad program
- Cross-listed courses not home-based in P&BS
- Approved transfer credits (students transferring from another college should refer to the Transfer Credit section below)

## Cognition in Children Specialization

To augment the major in Psychological & Brain Sciences, the department offers the option of a specialization for students who wish to engage more intensively with a specific area within the discipline.

A specialization may be a valuable experience for students planning on graduate study in psychology or related fields or for those who have a particular interest or want to gain expertise in one of the approved specializations. It may provide a useful preparation for the Honors program in psychology, or it may serve as a substitute for the Honors experience for those students who may not qualify for Honors.

Completion of a specialization entails 12 units:

- Three courses (9 units), at least one of which must be an advanced, 400-level course; and
- A semester of research in an appropriate, approved lab consisting of Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences, which requires the successful completion of an American Psychological Association–style research paper or an approved Honors project. In some cases, a relevant internship or practicum may be an appropriate alternative to research experience. (**Note:** Students may be required to complete a preliminary semester [3 units] of Psych 333 Independent Study in Psychological and Brain Sciences, depending on the nature of the project intended for Psych 444C; the additional independent research is at the discretion of the research mentor and will not be counted toward the completion of the specialization requirements.)

One course taken for a specialization may be used to fulfill no more than one of the core categories or distribution requirements of a Psychological & Brain Sciences major (i.e., one course could double-count for the major and the specialization). None of the units for a specialization can be counted for any other major or minor (i.e., there is no double counting with another major or minor). For those pursuing the Psychological & Brain Sciences: Cognitive Neuroscience major, the Cognitive Neuroscience Specialization is not an option.

Each specialization has a Psychological & Brain Sciences faculty advisor/coordinator who will meet with interested students to help ensure the successful and appropriate completion of the specialization and who serves as the liaison with the Psychological & Brain Sciences Undergraduate Studies Committee. A student may pursue only one specialization.

Students should contact Shelley Kohlman (skohlman@wustl.edu) in Somers Family Hall, Room 207B, to arrange a specialization. Forms are available from Shelley, and completed forms must be returned to her in order for a specialization to be considered officially "in progress."

Recognition of the specialization will appear on the student's academic record under *Milestones* once all requirements have been met.

## Requirements for the Cognition in Children Specialization

This specialization allows students to acquire deeper knowledge of cognitive and social-cognitive processes that occur during infancy and early childhood. The courses for this specialization consider child development more generally and then explore in more depth the development of cognitive, conceptual, linguistic, and social abilities.

*Advisor/coordinator:* Professor Lori Markson

*Course work required:*

Code	Title	Units
Psych 321	Developmental Psychology	3

*Electives* (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 219	The Infant Mind: Sophomore Seminar	3
Psych 358	Language Acquisition	3
Psych 4099	Human Evolutionary Psychology	3
Psych 4591	The Development of Social Cognition	3

*Research mentorship:* Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (i.e., Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences or Psych 498 Study for Honors/Psych 499 Study for Honors)

*Relevant faculty:* Lori Markson and Seanna Leath (other potential faculty mentors from the Division of Child Psychiatry at Washington University School of Medicine may be approved)

## Additional Information

### Transfer Credit

If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward either major in P&BS.

### Senior Honors Program in Psychological & Brain Sciences

The primary goal of the honors program in P&BS is to provide students who have achieved a superior academic record with the opportunity to conduct a comprehensive empirical investigation under the direction of a faculty member.

To be admitted into the honors program, students must meet the following requirements:

- Have overall and P&BS grade point averages of at least 3.65
- Complete both Psych 300 and Psych 301 (or Psych 3011)
- Have an approved honors research advisor

Contact: Shelley Kohlman

Website: <https://psych.wustl.edu/undergraduate-program>

# Psychological & Brain Sciences Major, Cognitive Neuroscience Specialization

## Program Requirements

- **Total units required:** 43-46 units (34, at least 25 of which must be at the 300 level or above, for the major requirements plus 9-12 units for the specialization)

## Required Courses

- Psych 100B Introduction to Psychology is a prerequisite for all upper-level courses (300 level and above). Exemption from Psych 100B Introduction to Psychology is possible in the following circumstances:
  - Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
  - An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A.
- Psych 300 Introduction to Psychological Statistics
  - SDS 2200, SDS 3200, or DAT 120 may substitute for Psych 300 Introduction to Psychological Statistics but earn no units of credit toward the major. No AP math course can substitute for Psych 300 Introduction to Psychological Statistics.
- Psych 301 Experimental Psychology or Psych 3011 Experimental Psychology

In cases where an exemption is granted (e.g., Psych 100B, Psych 300), no credits are earned toward the major, so exempt courses must be made up with additional P&BS content electives (approved by the major advisor).

## Core Requirements

Students must complete at least one course from each of the following five categories:

*Social/Personality:*

Code	Title	Units
Psych 305	Health Psychology	3
Psych 315	Introduction to Social Psychology	3
Psych 353	Psychology of Personality	3
Psych 396	Psychological Dynamics of Empathy	3
Psych 4099	Human Evolutionary Psychology	3

*Mental Health/Affective:*

Code	Title	Units
Psych 3195	Abnormal Child Psychology	3
Psych 354	Psychopathology and Mental Health	3
Psych 3645	Understanding Emotions	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

*Biological/Neurological Bases of Behavior:*

Code	Title	Units
Psych 330	Sensation and Perception	3
Psych 3401	Biological Psychology	3
Psych 345	Genes, Environment, and Human Behavior	3
Psych 3604	Cognitive Neuroscience	3
Psych 4182	Perception, Thought, and Action	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

*Behavior and Cognition:*

Code	Title	Units
Psych 360	Cognitive Psychology	3
Psych 361	Psychology of Learning	3
Psych 358	Language Acquisition	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 433	Psychology of Language	3

*Lifespan Development:*

Code	Title	Units
Psych 219	The Infant Mind: Sophomore Seminar (this course can fulfill the Lifespan Development Core, but the credit counts in the "6 units Rule")	3
Psych 321	Developmental Psychology	3
Psych 325	Psychology of Adolescence	3
Psych 326	Introduction to the Psychology of Aging	3
Psych 358	Language Acquisition	3
Psych 427	Social Gerontology	3

\* If a course falls into more than one category, it can be used to fulfill only one of those categories (i.e., no double-counting).

## Elective Courses

Students must complete an additional 9 units of Psychology & Brain Sciences (P&BS) course work.

## 6-Units Rule

No more than 6 units from the following course types may be used to satisfy the minimum requirements for the P&BS major:

- 100-/200-level courses (other than Psych 100B Introduction to Psychology)
- Psych 333 Independent Study in Psychological and Brain Sciences
- Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences
- Psych 498 Study for Honors and Psych 499 Study for Honors
- Approved School of Continuing & Professional Studies psychology classes
- Approved psychology study abroad courses from a non-psychology study abroad program
- Cross-listed courses not home-based in P&BS
- Approved transfer credits (students transferring from another college should refer to the Transfer Credit section below)

## Cognitive Neuroscience Specialization

To augment the major in Psychological & Brain Sciences, the department offers the option of a specialization for students who wish to engage more intensively with a specific area within the discipline.

A specialization may be a valuable experience for students planning on graduate study in psychology or related fields or for those who have a particular interest or want to gain expertise in one of the approved specializations. It may provide a useful preparation for the Honors program in psychology, or it may serve as a substitute for the Honors experience for those students who may not qualify for Honors.

Completion of a specialization entails 12 units:

- Three courses (9 units), at least one of which must be an advanced, 400-level course; and
- A semester of research in an appropriate, approved lab consisting of Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences, which requires the successful completion of an American Psychological Association–style research paper or an approved Honors project. In some cases, a relevant internship or practicum may be an appropriate alternative to research experience. (**Note:** Students may be required to complete a preliminary semester [3 units] of Psych 333 Independent Study in Psychological and Brain Sciences, depending on the nature of the project intended for Psych 444C; the additional independent research is at the discretion of the research mentor and will not be counted toward the completion of the specialization requirements.)

One course taken for a specialization may be used to fulfill no more than one of the core categories or distribution requirements of a Psychological & Brain Sciences major (i.e., one course could double-count for the major and the specialization). None of the units for a specialization can be counted for any other major or minor (i.e., there is no double counting with another major or minor). For those pursuing the Psychological & Brain Sciences: Cognitive Neuroscience major, the Cognitive Neuroscience Specialization is not an option.

Each specialization has a Psychological & Brain Sciences faculty advisor/coordinator who will meet with interested students to help ensure the successful and appropriate completion of the specialization and who serves as the liaison with the Psychological & Brain Sciences Undergraduate Studies Committee. A student may pursue only one specialization.

Students should contact Shelley Kohlman (skohlman@wustl.edu) in Somers Family Hall, Room 207B, to arrange a specialization. Forms are available from Shelley, and completed forms must be returned to her in order for a specialization to be considered officially "in progress."

Recognition of the specialization will appear on the student's academic record under *Milestones* once all requirements have been met.

## Requirements for the Cognitive Neuroscience Specialization

This specialization allows students to acquire deeper knowledge of the relationship between the mind and the brain. The courses for the specialization consider the neurobiological basis of psychological function at a more general level and then explore, in greater depth, specialized topics related to how higher cognitive processes (e.g., memory, attention, perception, emotion) emerge from brain function.

*Advisor/coordinator:* Professor Todd Braver

*Course work required:*

Code	Title	Units
Psych 3604	Cognitive Neuroscience	3

*Electives* (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 330	Sensation and Perception	3
Psych 3401	Biological Psychology	3
Psych 345	Genes, Environment, and Human Behavior	3
Psych 4182	Perception, Thought, and Action	3
Psych 4412	Advanced Cognitive Neuroscience	3
Psych 4631	Introduction to Computational Cognitive Science	3

Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior (Biological Pathways to Psychopathology)	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders (Inside the Disordered Brain)	3

*Research mentorship:* Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (i.e., Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences or Psych 498 Study for Honors/Psych 499 Study for Honors)

*Relevant faculty:* Todd Braver, Deanna Barch, Ryan Bogdan, Ian Dobbins, Denise Head, Wouter Kool, Zachariah Reagh, and Jeff Zacks (other potential faculty mentors may be approved)

## Additional Information

### Transfer Credit

If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward either major in P&BS.

### Senior Honors Program in Psychological & Brain Sciences

The primary goal of the honors program in P&BS is to provide students who have achieved a superior academic record with the opportunity to conduct a comprehensive empirical investigation under the direction of a faculty member.

To be admitted into the honors program, students must meet the following requirements:

- Have overall and P&BS grade point averages of at least 3.65
- Complete both Psych 300 and Psych 301 (or Psych 3011)
- Have an approved honors research advisor

# Psychological & Brain Sciences Major, Experimental Psychopathology Specialization

## Program Requirements

- **Total units required:** 43-46 units (34, at least 25 of which must be at the 300 level or above, for the major requirements plus 9-12 units for the specialization)

## Required Courses

- Psych 100B Introduction to Psychology is a prerequisite for all upper-level courses (300 level and above). Exemption from Psych 100B Introduction to Psychology is possible in the following circumstances:
  - Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
  - An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A.
- Psych 300 Introduction to Psychological Statistics
  - SDS 2200, SDS 3200, or DAT 120 may substitute for Psych 300 Introduction to Psychological Statistics but earn no units of credit toward the major. No AP math course can substitute for Psych 300 Introduction to Psychological Statistics.
- Psych 301 Experimental Psychology or Psych 3011 Experimental Psychology

In cases where an exemption is granted (e.g., Psych 100B, Psych 300), no credits are earned toward the major, so exempt courses must be made up with additional P&BS content electives (approved by the major advisor).

## Core Requirements

Students must complete at least one course from each of the following five categories:\*

*Social/Personality:*

Code	Title	Units
Psych 305	Health Psychology	3
Psych 315	Introduction to Social Psychology	3
Psych 353	Psychology of Personality	3
Psych 396	Psychological Dynamics of Empathy	3
Psych 4099	Human Evolutionary Psychology	3

*Mental Health/Affective:*

Code	Title	Units
Psych 3195	Abnormal Child Psychology	3
Psych 354	Psychopathology and Mental Health	3
Psych 3645	Understanding Emotions	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

*Biological/Neurological Bases of Behavior:*

Code	Title	Units
Psych 330	Sensation and Perception	3
Psych 3401	Biological Psychology	3
Psych 345	Genes, Environment, and Human Behavior	3
Psych 3604	Cognitive Neuroscience	3
Psych 4182	Perception, Thought, and Action	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

*Behavior and Cognition:*

Code	Title	Units
Psych 360	Cognitive Psychology	3
Psych 361	Psychology of Learning	3
Psych 358	Language Acquisition	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 433	Psychology of Language	3

*Lifespan Development:*

Code	Title	Units
Psych 219	The Infant Mind: Sophomore Seminar (this course can fulfill the Lifespan Development Core, but the credit counts in the "6 units Rule")	3
Psych 321	Developmental Psychology	3
Psych 325	Psychology of Adolescence	3
Psych 326	Introduction to the Psychology of Aging	3
Psych 358	Language Acquisition	3
Psych 427	Social Gerontology	3

\* If a course falls into more than one category, it can be used to fulfill only one of those categories (i.e., no double-counting).

## Elective Courses

Students must complete an additional 9 units of Psychology & Brain Sciences (P&BS) course work.

## 6-Units Rule

No more than 6 units from the following course types may be used to satisfy the minimum requirements for the P&BS major:

- 100-/200-level courses (other than Psych 100B Introduction to Psychology)
- Psych 333 Independent Study in Psychological and Brain Sciences
- Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences
- Psych 498 Study for Honors and Psych 499 Study for Honors
- Approved School of Continuing & Professional Studies psychology classes
- Approved psychology study abroad courses from a non-psychology study abroad program
- Cross-listed courses not home-based in P&BS
- Approved transfer credits (students transferring from another college should refer to the Transfer Credit section below)

## Experimental Psychopathology Specialization

To augment the major in Psychological & Brain Sciences, the department offers the option of a specialization for students who wish to engage more intensively with a specific area within the discipline.

A specialization may be a valuable experience for students planning on graduate study in psychology or related fields or for those who have a particular interest or want to gain expertise in one of the approved specializations. It may provide a useful preparation for the Honors program in psychology, or it may serve as a substitute for the Honors experience for those students who may not qualify for Honors.

Completion of a specialization entails 12 units:

- Three courses (9 units), at least one of which must be an advanced, 400-level course; and
- A semester of research in an appropriate, approved lab consisting of Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences, which requires the successful completion of an American Psychological Association-style research paper or an approved Honors project. In some cases, a relevant internship or practicum may be an appropriate alternative to research experience. (**Note:** Students may be required to complete a preliminary semester [3 units] of Psych 333 Independent Study in Psychological and Brain Sciences, depending on the nature of the project intended for Psych 444C; the additional independent research is at the discretion of the research mentor and will not be counted toward the completion of the specialization requirements.)

One course taken for a specialization may be used to fulfill no more than one of the core categories or distribution requirements of a Psychological & Brain Sciences major (i.e., one course could double-count for the major and the specialization). None of the units for a specialization can be counted for any other major or minor (i.e., there is no double counting with another major or minor). For those pursuing the Psychological & Brain Sciences: Cognitive Neuroscience major, the Cognitive Neuroscience Specialization is not an option.

Each specialization has a Psychological & Brain Sciences faculty advisor/coordinator who will meet with interested students to help ensure the successful and appropriate completion of the specialization and who serves as the liaison with the Psychological & Brain Sciences Undergraduate Studies Committee. A student may pursue only one specialization.

Students should contact Shelley Kohlman (skohlman@wustl.edu) in Somers Family Hall, Room 207B, to arrange a specialization. Forms are available from Shelley, and completed forms must be returned to her in order for a specialization to be considered officially "in progress."

Recognition of the specialization will appear on the student's academic record under *Milestones* once all requirements have been met.

## Requirements for the Experimental Psychopathology Specialization

This specialization allows students to acquire more advanced knowledge of the ways in which psychologists study mental disorders. Current research demonstrates the importance of integrating psychological and biological variables to better understand the classification, etiology, and treatment of a wide variety of mental disorders, including schizophrenia, mood disorders, anxiety disorders, substance use disorders, and eating disorders. Students who pursue this specialization will develop a broad-based appreciation for conceptual and methodological issues that are central to research in psychopathology.

*Advisor/coordinator:* Professor Deanna Barch

*Course work required:*

Code	Title	Units
Psych 354	Psychopathology and Mental Health	3

*Electives* (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 345	Genes, Environment, and Human Behavior	3
Psych 4557	Biopsychosocial Aspects of Eating Disorders and Obesity	3
Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior (Biological Pathways to Psychopathology)	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders (Inside the Disordered Brain)	3

*Research mentorship:* Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (i.e., Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences or Psych 498 Study for Honors/Psych 499 Study for Honors)

*Relevant faculty:* Deanna Barch, Ryan Bogdan, Josh Jackson, Renee Thompson, and Denise Wilfley (other potential faculty mentors may be approved)

## Additional Information

### Transfer Credit

If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward either major in P&BS.

### Senior Honors Program in Psychological & Brain Sciences

The primary goal of the honors program in P&BS is to provide students who have achieved a superior academic record with the opportunity to conduct a comprehensive empirical investigation under the direction of a faculty member.

To be admitted into the honors program, students must meet the following requirements:

- Have overall and P&BS grade point averages of at least 3.65
- Complete both Psych 300 and Psych 301 (or Psych 3011)
- Have an approved honors research advisor

Contact: Shelley Kohlman  
Phone: 314-935-5169  
Email: skohlman@wustl.edu  
Website: <https://psych.wustl.edu/undergraduate-program>

## Psychological & Brain Sciences Major, Lifespan Development Specialization

### Program Requirements

- **Total units required:** 43-46 units (34, at least 25 of which must be at the 300 level or above, for the major requirements plus 9-12 units for the specialization)

### Required Courses

- Psych 100B Introduction to Psychology is a prerequisite for all upper-level courses (300 level and above). Exemption from Psych 100B Introduction to Psychology is possible in the following circumstances:

- Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
- An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A.
- Psych 300 Introduction to Psychological Statistics
  - SDS 2200, SDS 3200, or DAT 120 may substitute for Psych 300 Introduction to Psychological Statistics but earn no units of credit toward the major. No AP math course can substitute for Psych 300 Introduction to Psychological Statistics.
- Psych 301 Experimental Psychology or Psych 3011 Experimental Psychology

In cases where an exemption is granted (e.g., Psych 100B, Psych 300), no credits are earned toward the major, so exempt courses must be made up with additional P&BS content electives (approved by the major advisor).

## Core Requirements

Students must complete at least one course from each of the following five categories:\*

### *Social/Personality:*

Code	Title	Units
Psych 305	Health Psychology	3
Psych 315	Introduction to Social Psychology	3
Psych 353	Psychology of Personality	3
Psych 396	Psychological Dynamics of Empathy	3
Psych 4099	Human Evolutionary Psychology	3

### *Mental Health/Affective:*

Code	Title	Units
Psych 3195	Abnormal Child Psychology	3
Psych 354	Psychopathology and Mental Health	3
Psych 3645	Understanding Emotions	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

### *Biological/Neurological Bases of Behavior:*

Code	Title	Units
Psych 330	Sensation and Perception	3
Psych 3401	Biological Psychology	3
Psych 345	Genes, Environment, and Human Behavior	3
Psych 3604	Cognitive Neuroscience	3
Psych 4182	Perception, Thought, and Action	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

### *Behavior and Cognition:*

Code	Title	Units
Psych 360	Cognitive Psychology	3
Psych 361	Psychology of Learning	3
Psych 358	Language Acquisition	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 433	Psychology of Language	3

### *Lifespan Development:*

Code	Title	Units
Psych 219	The Infant Mind: Sophomore Seminar (this course can fulfill the Lifespan Development Core, but the credit counts in the "6 units Rule")	3
Psych 321	Developmental Psychology	3
Psych 325	Psychology of Adolescence	3
Psych 326	Introduction to the Psychology of Aging	3
Psych 358	Language Acquisition	3
Psych 427	Social Gerontology	3

\* If a course falls into more than one category, it can be used to fulfill only one of those categories (i.e., no double-counting).

## Elective Courses

Students must complete an additional 9 units of Psychology & Brain Sciences (P&BS) course work.

## 6-Units Rule

No more than 6 units from the following course types may be used to satisfy the minimum requirements for the P&BS major:

- 100-/200-level courses (other than Psych 100B Introduction to Psychology)
- Psych 333 Independent Study in Psychological and Brain Sciences
- Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences
- Psych 498 Study for Honors and Psych 499 Study for Honors
- Approved School of Continuing & Professional Studies psychology classes
- Approved psychology study abroad courses from a non-psychology study abroad program
- Cross-listed courses not home-based in P&BS
- Approved transfer credits (students transferring from another college should refer to the Transfer Credit section below)

## Lifespan Development Specialization

To augment the major in Psychological & Brain Sciences, the department offers the option of a specialization for students who wish to engage more intensively with a specific area within the discipline.

A specialization may be a valuable experience for students planning on graduate study in psychology or related fields or for those who have a particular interest or want to gain expertise in one of the approved specializations. It may provide a useful preparation for the Honors program in psychology, or it may serve as a substitute for the Honors experience for those students who may not qualify for Honors.

Completion of a specialization entails 12 units:

- Three courses (9 units), at least one of which must be an advanced, 400-level course; and
- A semester of research in an appropriate, approved lab consisting of Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences, which requires the successful completion of an American Psychological Association–style research paper or an approved Honors project. In some cases, a relevant internship or practicum may be an appropriate alternative to research experience. (**Note:** Students may be required to complete a preliminary semester [3 units] of Psych 333 Independent Study in Psychological and Brain Sciences, depending on the nature of the project intended for Psych 444C; the additional independent research is at the discretion of the research mentor and will not be counted toward the completion of the specialization requirements.)

One course taken for a specialization may be used to fulfill no more than one of the core categories or distribution requirements of a Psychological & Brain Sciences major (i.e., one course could double-count for the major and the specialization). None of the units for a specialization can be counted for any other major or minor (i.e., there is no double counting with another major or minor). For those pursuing the Psychological & Brain Sciences: Cognitive Neuroscience major, the Cognitive Neuroscience Specialization is not an option.

Each specialization has a Psychological & Brain Sciences faculty advisor/coordinator who will meet with interested students to help ensure the successful and appropriate completion of the specialization and who serves as the liaison with the Psychological & Brain Sciences Undergraduate Studies Committee. A student may pursue only one specialization.

Students should contact Shelley Kohlman (skohlman@wustl.edu) in Somers Family Hall, Room 207B, to arrange a specialization. Forms are available from Shelley, and completed forms must be returned to her in order for a specialization to be considered officially "in progress."

Recognition of the specialization will appear on the student's academic record under *Milestones* once all requirements have been met.

## Requirements for the Lifespan Development Specialization

Many introductory courses in developmental psychology focus on the changes that occur from birth to adolescence. The specialization in lifespan development provides students with an understanding of the cognitive and physiological changes that occur over the lifespan, with a primary focus on older adulthood. A major goal of the specialization is to provide students with an understanding of the similarities and differences in development at different stages of the lifespan.

*Advisor/coordinator:* Professor Mitchell Sommers

*Course work required:*

Code	Title	Units
Psych 326	Introduction to the Psychology of Aging	3

*Electives:*

Code	Title	Units
Psych 321	Developmental Psychology	3
Psych 427	Social Gerontology	3
Psych 4355	Personality Development Across the Life Span	3

*Research mentorship or internship experience related to Lifespan*

*Development:* Students can complete this aspect of the specialization with either a prior approved research mentorship or an approved internship related to older adults (i.e., Psych 225 Internship in Psychology, Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences, or Psych 498 Study for Honors/Psych 499 Study for Honors). Successful completion of a paper is required in all cases.

*Relevant faculty for research mentorship:* Mitchell Sommers, Brian Carpenter, Sandra Hale, Denise Head, Patrick Hill, Derek Isaacowitz, Josh Jackson, and Lori Markson (other potential faculty mentors may be approved)

*Possible internships:* Students may complete a prior approved internship related to older adults as well as a paper about the internship experience. Options may include work in an assisted-living facility or another community-based program designed to assist older adults. Other internships are available; consult the Psychological & Brain Sciences department website for information about internship opportunities in psychology.

## Additional Information

### Transfer Credit

If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward either major in P&BS.

### Senior Honors Program in Psychological & Brain Sciences

The primary goal of the honors program in P&BS is to provide students who have achieved a superior academic record with the opportunity to conduct a comprehensive empirical investigation under the direction of a faculty member.

To be admitted into the honors program, students must meet the following requirements:

- Have overall and P&BS grade point averages of at least 3.65
- Complete both Psych 300 and Psych 301 (or Psych 3011)
- Have an approved honors research advisor

Contact: Shelley Kohlman  
Phone: 314-935-5169  
Email: 314-935-5169  
Website: <https://psych.wustl.edu/undergraduate-program>

# Psychological & Brain Sciences Major, Personality and Individual Differences Specialization

## Program Requirements

- **Total units required:** 43-46 units (34, at least 25 of which must be at the 300 level or above, for the major requirements plus 9-12 units for the specialization)

## Required Courses

- Psych 100B Introduction to Psychology is a prerequisite for all upper-level courses (300 level and above). Exemption from Psych 100B Introduction to Psychology is possible in the following circumstances:
  - Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
  - An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A.
- Psych 300 Introduction to Psychological Statistics
  - SDS 2200, SDS 3200, or DAT 120 may substitute for Psych 300 Introduction to Psychological Statistics but earn no units of credit toward the major. No AP math course can substitute for Psych 300 Introduction to Psychological Statistics.
- Psych 301 Experimental Psychology or Psych 3011 Experimental Psychology

In cases where an exemption is granted (e.g., Psych 100B, Psych 300), no credits are earned toward the major, so exempt courses must be made up with additional P&BS content electives (approved by the major advisor).

## Core Requirements

Students must complete at least one course from each of the following five categories:\*

*Social/Personality:*

Code	Title	Units
Psych 305	Health Psychology	3
Psych 315	Introduction to Social Psychology	3
Psych 353	Psychology of Personality	3
Psych 396	Psychological Dynamics of Empathy	3
Psych 4099	Human Evolutionary Psychology	3

*Mental Health/Affective:*

Code	Title	Units
Psych 3195	Abnormal Child Psychology	3
Psych 354	Psychopathology and Mental Health	3
Psych 3645	Understanding Emotions	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

*Biological/Neurological Bases of Behavior:*

Code	Title	Units
Psych 330	Sensation and Perception	3
Psych 3401	Biological Psychology	3
Psych 345	Genes, Environment, and Human Behavior	3
Psych 3604	Cognitive Neuroscience	3
Psych 4182	Perception, Thought, and Action	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

*Behavior and Cognition:*

Code	Title	Units
Psych 360	Cognitive Psychology	3
Psych 361	Psychology of Learning	3
Psych 358	Language Acquisition	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 433	Psychology of Language	3

*Lifespan Development:*

Code	Title	Units
Psych 219	The Infant Mind: Sophomore Seminar (this course can fulfill the Lifespan Development Core, but the credit counts in the "6 units Rule")	3
Psych 321	Developmental Psychology	3
Psych 325	Psychology of Adolescence	3
Psych 326	Introduction to the Psychology of Aging	3
Psych 358	Language Acquisition	3
Psych 427	Social Gerontology	3

\* If a course falls into more than one category, it can be used to fulfill only one of those categories (i.e., no double-counting).

## Elective Courses

Students must complete an additional 9 units of Psychology & Brain Sciences (P&BS) course work.

## 6-Units Rule

No more than 6 units from the following course types may be used to satisfy the minimum requirements for the P&BS major:

- 100-/200-level courses (other than Psych 100B Introduction to Psychology)
- Psych 333 Independent Study in Psychological and Brain Sciences
- Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences
- Psych 498 Study for Honors and Psych 499 Study for Honors
- Approved School of Continuing & Professional Studies psychology classes
- Approved psychology study abroad courses from a non-psychology study abroad program
- Cross-listed courses not home-based in P&BS
- Approved transfer credits (students transferring from another college should refer to the Transfer Credit section below)

## Personality and Individual Differences Specialization

To augment the major in Psychological & Brain Sciences, the department offers the option of a specialization for students who wish to engage more intensively with a specific area within the discipline.

A specialization may be a valuable experience for students planning on graduate study in psychology or related fields or for those who have a particular interest or want to gain expertise in one of the approved specializations. It may provide a useful preparation for the Honors program in psychology, or it may serve as a substitute for the Honors experience for those students who may not qualify for Honors.

Completion of a specialization entails 12 units:

- Three courses (9 units), at least one of which must be an advanced, 400-level course; and
- A semester of research in an appropriate, approved lab consisting of Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences, which requires the successful completion of an American Psychological Association–style research paper or an approved Honors project. In some cases, a relevant internship or practicum may be an appropriate alternative to research experience. (**Note:** Students may be required to complete a preliminary semester [3 units] of Psych 333 Independent Study in Psychological and Brain Sciences, depending on the nature of the project intended for Psych 444C; the additional independent research is at the discretion of the research mentor and will not be counted toward the completion of the specialization requirements.)

One course taken for a specialization may be used to fulfill no more than one of the core categories or distribution requirements of a Psychological & Brain Sciences major (i.e., one course could double-count for the major and the specialization). None of the units for a specialization can be counted for any other major or minor (i.e., there is no double counting with another major or minor). For those pursuing the Psychological & Brain Sciences: Cognitive Neuroscience major, the Cognitive Neuroscience Specialization is not an option.

Each specialization has a Psychological & Brain Sciences faculty advisor/coordinator who will meet with interested students to help ensure the successful and appropriate completion of the specialization and who serves as the liaison with the Psychological & Brain Sciences Undergraduate Studies Committee. A student may pursue only one specialization.

Students should contact Shelley Kohlman (skohlman@wustl.edu) in Somers Family Hall, Room 207B, to arrange a specialization. Forms are available from Shelley, and completed forms must be returned to her in order for a specialization to be considered officially "in progress."

Recognition of the specialization will appear on the student's academic record under *Milestones* once all requirements have been met.

## Requirements for the Personality and Individual Differences Specialization

This specialization allows students to acquire deeper knowledge of how and why individuals differ from one another and the ways in which individual (e.g., personality) and group (e.g., gender) differences influence behavior, emotion, experience, identity, and psychopathology. The core course for the specialization (Psych 353) considers personality more generally. The seminars explore, in depth, specific aspects of personality and individual differences, including biological bases of individual differences (i.e., genetics), the interpersonal processes associated with personality and personality judgment, individual differences in self and identity, group differences, and personality pathology.

*Advisor/coordinator:* Professor Tammy English

*Course work required:*

Code	Title	Units
Psych 353	Psychology of Personality	3

*Electives* (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 345	Genes, Environment, and Human Behavior	3
Psych 3645	Understanding Emotions	3
Psych 413	Contemporary Topics in Social Psychology (with prior approval only)	3

Psych 4355	Personality Development Across the Life Span	3
Psych 4367	Seminar in Positive Psychology	3
Psych 4555	Emotion Regulation	3
Psych 4593	Psychology of the Good Life	3

*Research mentorship:* Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (i.e., Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences or Psych 498 Study for Honors/Psych 499 Study for Honors)

*Relevant faculty:* Tammy English, Patrick Hill, Derek Isaacowitz, Josh Jackson, Michael Strube, Jesse Sun, Renee Thompson, and Emily Willroth (other potential faculty mentors may be approved)

## Additional Information

### Transfer Credit

If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward either major in P&BS.

### Senior Honors Program in Psychological & Brain Sciences

The primary goal of the honors program in P&BS is to provide students who have achieved a superior academic record with the opportunity to conduct a comprehensive empirical investigation under the direction of a faculty member.

To be admitted into the honors program, students must meet the following requirements:

- Have overall and P&BS grade point averages of at least 3.65
- Complete both Psych 300 and Psych 301 (or Psych 3011)
- Have an approved honors research advisor

Contact: Shelley Kohlman  
Phone: 314-935-5169

Website: <https://psych.wustl.edu/undergraduate-program>

# Psychological & Brain Sciences: Cognitive Neuroscience Major, Cognition in Children Specialization

## Program Requirements

- **Total units required:** 45-49 units (36-37, as well as prerequisites, for the major requirements plus 9-12 units for the specialization)

How does the brain think? Cognitive neuroscience refers to how mental functions are linked to the operation of the brain and nervous system. The goal of cognitive neuroscience is to provide an understanding of psychological processes such as attention, memory, thinking, and emotion in terms of physical principles and biological components. At the same time, cognitive neuroscience aims to provide an understanding of the psychological constraints on how the brain functions, computes, and generates behavior. Students who pursue the undergraduate major in Psychological & Brain Sciences: Cognitive Neuroscience (PB&S:CN) will gain a strong foundation in how to study the brain and mind at various levels of analysis, including cellular biology, brain systems, cognitive and affective function, and neural computation. In addition, they will gain an appreciation of the relation between healthy cognitive and brain function and its breakdown in various disease states and disorders. The PB&S:CN major provides excellent preparation for a career in health and medical professions, scientific research, computer fields, education, and law.

## Prerequisites

Students must complete the following courses outside of Psychological & Brain Sciences:

Code	Title	Units
Math 132	Calculus II	3
Biol 2960	Principles of Biology I	4
<b>Total Units</b>		<b>7</b>

**Note:** Each of these prerequisites has its own prerequisites: Math 132 Calculus II requires Math 131; for Biol 2960 Principles of Biology I, taking Chem 111A and Chem 112A (concurrently) is strongly recommended. These courses are biology and pre-med prerequisites as well, and they are typically completed during a student's first year. They may alternatively be satisfied through AP credit or any other mechanism approved by the respective department or the College. These prerequisites do not earn credit toward the P&BS:CN major, but must be completed with a passing grade (C- or above) by the end of the student's third-year to remain in good standing for the major.

## Required Courses

Code	Title	Units
Psych 100B	Introduction to Psychology	3
Psych 300	Introduction to Psychological Statistics	3
Psych 301 or Psych 3011	Experimental Psychology	4
Psych 3401 or Psych 344	Biological Psychology Principles of the Nervous System	3
Psych 360	Cognitive Psychology	3
Psych 3604	Cognitive Neuroscience	3
<b>Total Units</b>		<b>19</b>

**Note:** The first three requirements (i.e., Psych 100B Introduction to Psychology, Psych 300 Introduction to Psychological Statistics, and Psych 301 Experimental Psychology/Psych 3011 Experimental Psychology) are the same as those for the regular P&BS major. Psych 344 Principles of the Nervous System is home-based in Biology; students should register under the cross-listed Psych L33 course designation, not Biol 3411 Principles of the Nervous System.

Exemption from Psych 100B Introduction to Psychology is possible in the following circumstances:

- Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
- An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A.
- SDS 2200, SDS 3200, or DAT 120 may substitute for Psych 300 Introduction to Psychological Statistics. No AP math course can substitute for Psych 300 Introduction to Psychological Statistics.

In cases where an exemption is granted (e.g., Psych 100B, Psych 300), no credits are earned toward the major, so exempt courses must be made up with additional P&BS content electives (approved by the major advisor).

## Additional Cognitive and Biological Distributions

Students must complete two courses — one each from the Distribution A and B lists:

*Distribution A eligible courses:\**

Code	Title	Units
Psych 321	Developmental Psychology	3
Psych 330	Sensation and Perception	3
Psych 358	Language Acquisition	3
Psych 361	Psychology of Learning	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 4182	Perception, Thought, and Action	3

Psych 433	Psychology of Language	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 3890	Advanced Psychological Statistics: The General Linear Model and Beyond	3

*Distribution B eligible courses:\**

Code	Title	Units
Psych 345	Genes, Environment, and Human Behavior	3
Biol 3057	Physiological Control Systems	3
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains, and Behavior	3
Biol 363	The Neuroscience of Movement: You Think, So You Can Dance?	3
Physics 350	Physics of the Brain	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 3890	Advanced Psychological Statistics: The General Linear Model and Beyond	3

**Note:** Psych 3175 Applied Statistical Analysis with R or Psych 3890 Advanced Psychological Statistics: The General Linear Model and Beyond can be allowed to fulfill either Distribution A or B; students must complete at least one non-statistics course for the Additional Cognitive and Biological Distributions requirement.

## Computation Requirement

Students must complete one of the following courses:\*

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 5007	Statistics and Data Analysis in MATLAB	2

With prior approval, another course involving a significant computational/programming component may be substituted.

## Capstone/Depth Requirement

Students must complete three of the following courses:\*

*Capstone/Depth eligible courses:*

Code	Title	Units
Psych 4182	Perception, Thought, and Action	3
Psych 4412	Advanced Cognitive Neuroscience (or Psych 4413 Advanced Cognitive Neuroscience (WI))	3
Psych 4512	Neurobiology of Learning & Memory	3
Psych 4631	Introduction to Computational Cognitive Science	3

Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4030	Biological Clocks	3
Biol 4580	Principles of Human Anatomy and Development	3
Biol 4582	The Physiology and Biophysics of Consciousness	2
Phil 4212	Philosophy of Neuroscience	3

*Additional Capstone/Depth eligible courses:*

- Psych 333 (all 3 units must be completed in one semester and in one lab to be considered for approval; taken Credit/No-Credit) can be used satisfy up to 3 units of the Capstone/Depth requirement.
- FYP 3001 Ampersand: Research in Mind, Brain, Behavior (two consecutive semesters must be completed; 3 units total) can substitute for Psych 333.
- Psych 444B (3 units; taken for a letter grade and requiring a final paper) can be used to satisfy up to 6 units of the Capstone/Depth requirement.
- The Honors Program in Psychology (Psych 498/Psych 499 can be used to satisfy up to 3 units total of the Capstone/Depth requirement).

In total, no more than 6 units of the above may be applied toward the Capstone/Depth requirement.

**Note:** Unless a student explicitly petitions for an exception and is granted written prior approval, only the above Capstone/Depth eligible courses can be counted toward the Capstone/Depth requirement. Contact [skohlman@wustl.edu](mailto:skohlman@wustl.edu) for the petition.

\* If a course falls into more than one category, it can be used to fulfill only one of those categories (i.e., no double-counting).

## Acceptance Into the Psychological & Brain Sciences: Cognitive Neuroscience Major

Acceptance into the major is contingent upon an application and then approval by the major committee. As part of this application, the student will meet with an appropriate advisor who will carefully review the requirements and oversee the student's progress. A brief, one-page statement from the student about why they feel the cognitive neuroscience major is appropriate for them will be requested as part of the application.

Washington University students will be considered for admission to the P&BS:CN major no sooner than during their third semester (sophomore year). Decisions are based on the student's statement and academic record as well as the interview with the advisor. A minimum GPA of 2.0 is required for admission into the major.

## Cognition in Children Specialization

To augment the major in Psychological & Brain Sciences, the department offers the option of a specialization for students who wish to engage more intensively with a specific area within the discipline.

A specialization may be a valuable experience for students planning on graduate study in psychology or related fields or for those who have a particular interest or want to gain expertise in one of the approved specializations. It may provide a useful preparation for the Honors program in psychology, or it may serve as a substitute for the Honors experience for those students who may not qualify for Honors.

Completion of a specialization entails 12 units:

- Three courses (9 units), at least one of which must be an advanced, 400-level course; and
- A semester of research in an appropriate, approved lab consisting of Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences, which requires the successful completion of an American Psychological Association-style research paper or an approved Honors project. In some cases, a relevant internship or practicum may be an appropriate alternative to research experience. (**Note:** Students may be required to complete a preliminary semester [3 units] of Psych 333 Independent Study in Psychological and Brain Sciences, depending on the nature of the project intended for Psych 444C; the additional independent research is at the discretion of the research mentor and will not be counted toward the completion of the specialization requirements.)

One course taken for a specialization may be used to fulfill no more than one of the core categories or distribution requirements of a Psychological & Brain Sciences major (i.e., one course could double-count for the major and the specialization). None of the units for a specialization can be counted for any other major or minor (i.e., there is no double counting with another major or minor). For those pursuing the Psychological & Brain Sciences: Cognitive Neuroscience major, the Cognitive Neuroscience Specialization is not an option.

Each specialization has a Psychological & Brain Sciences faculty advisor/coordinator who will meet with interested students to help ensure the successful and appropriate completion of the specialization and who serves as the liaison with the Psychological & Brain Sciences Undergraduate Studies Committee. A student may pursue only one specialization.

Students should contact Shelley Kohlman ([skohlman@wustl.edu](mailto:skohlman@wustl.edu)) in Somers Family Hall, Room 207B, to arrange a specialization. Forms are available from Shelley, and completed forms must be returned to her in order for a specialization to be considered officially "in progress."

Recognition of the specialization will appear on the student's academic record under *Milestones* once all requirements have been met.

## Requirements for the Cognition in Children Specialization

This specialization allows students to acquire deeper knowledge of cognitive and social-cognitive processes that occur during infancy and early childhood. The courses for this specialization consider child development more generally and then explore in more depth the development of cognitive, conceptual, linguistic, and social abilities.

*Advisor/coordinator:* Professor Lori Markson

*Course work required:*

Code	Title	Units
Psych 321	Developmental Psychology	3

*Electives* (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 219	The Infant Mind: Sophomore Seminar	3
Psych 358	Language Acquisition	3
Psych 4099	Human Evolutionary Psychology	3
Psych 4591	The Development of Social Cognition	3

*Research mentorship:* Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (i.e., Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences or Psych 498 Study for Honors/Psych 499 Study for Honors)

*Relevant faculty:* Lori Markson and Seanna Leath (other potential faculty mentors from the Division of Child Psychiatry at WUSM may be approved)

## Additional Information

### Transfer Credit

If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward either major in P&BS.

### Senior Honors Program in Psychological & Brain Sciences

The primary goal of the honors program in P&BS is to provide students who have achieved a superior academic record with the opportunity to conduct a comprehensive empirical investigation under the direction of a faculty member.

To be admitted into the honors program, students must meet the following requirements:

- Have overall and P&BS grade point averages of at least 3.65
- Complete both Psych 300 and Psych 301 (or Psych 3011)
- Have an approved honors research advisor

Contact: Shelley Kohlman  
Phone: 314-935-5169  
Email: skohlman@wustl.edu  
Website: <https://psych.wustl.edu/undergraduate-program>

## Psychological & Brain Sciences: Cognitive Neuroscience Major, Experimental Psychopathology Specialization

### Program Requirements

- **Total units required:** 45-49 units (36-37, as well as prerequisites, for the major requirements plus 9-12 units for the specialization)

How does the brain think? Cognitive neuroscience refers to how mental functions are linked to the operation of the brain and nervous system. The goal of cognitive neuroscience is to provide an understanding of psychological processes such as attention, memory, thinking, and emotion in terms of physical principles and biological components. At the same time, cognitive neuroscience aims to provide an understanding of the psychological constraints on how the brain functions, computes, and generates behavior. Students who pursue the undergraduate major in Psychological & Brain Sciences: Cognitive Neuroscience (PB&S:CN) will gain a strong foundation in how to study the brain and mind at various levels of analysis, including cellular biology, brain systems, cognitive and affective function, and neural computation. In addition, they will gain an appreciation of the relation between healthy cognitive and brain function and its breakdown in various disease states and disorders. The PB&S:CN major provides excellent preparation for a career in health and medical professions, scientific research, computer fields, education, and law.

### Prerequisites

Students must complete the following courses outside of Psychological & Brain Sciences:

Code	Title	Units
Math 132	Calculus II	3
Biol 2960	Principles of Biology I	4
<b>Total Units</b>		<b>7</b>

**Note:** Each of these prerequisites has its own prerequisites: Math 132 Calculus II requires Math 131; for Biol 2960 Principles of Biology I, taking Chem 111A and Chem 112A (concurrently) is strongly recommended. These courses are biology and pre-med prerequisites as well, and they are typically completed during a student's first year. They may alternatively be satisfied through AP credit or any other mechanism

approved by the respective department or the College. These prerequisites do not earn credit toward the P&BS:CN major, but must be completed with a passing grade (C- or above) by the end of the student's third-year to remain in good standing for the major.

## Required Courses

Code	Title	Units
Psych 100B	Introduction to Psychology	3
Psych 300	Introduction to Psychological Statistics	3
Psych 301	Experimental Psychology	4
or Psych 3011	Experimental Psychology	
Psych 3401	Biological Psychology	3
or Psych 344	Principles of the Nervous System	
Psych 360	Cognitive Psychology	3
Psych 3604	Cognitive Neuroscience	3
<b>Total Units</b>		<b>19</b>

**Note:** The first three requirements (i.e., Psych 100B Introduction to Psychology, Psych 300 Introduction to Psychological Statistics, and Psych 301 Experimental Psychology/Psych 3011 Experimental Psychology) are the same as those for the regular P&BS major. Psych 344 Principles of the Nervous System is home-based in Biology; students should register under the cross-listed Psych L33 course designation, not Biol 3411 Principles of the Nervous System.

Exemption from Psych 100B Introduction to Psychology is possible in the following circumstances:

- Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
- An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A.
- SDS 2200, SDS 3200, or DAT 120 may substitute for Psych 300 Introduction to Psychological Statistics. No AP math course can substitute for Psych 300 Introduction to Psychological Statistics.

In cases where an exemption is granted (e.g., Psych 100B, Psych 300), no credits are earned toward the major, so exempt courses must be made up with additional P&BS content electives (approved by the major advisor).

## Additional Cognitive and Biological Distributions

Students must complete two courses — one each from the Distribution A and B lists:

*Distribution A eligible courses:\**

Code	Title	Units
Psych 321	Developmental Psychology	3
Psych 330	Sensation and Perception	3
Psych 358	Language Acquisition	3
Psych 361	Psychology of Learning	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3

Psych 4182	Perception, Thought, and Action	3
Psych 433	Psychology of Language	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 3890	Advanced Psychological Statistics: The General Linear Model and Beyond	3

*Distribution B eligible courses:\**

Code	Title	Units
Psych 345	Genes, Environment, and Human Behavior	3
Biol 3057	Physiological Control Systems	3
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains, and Behavior	3
Biol 363	The Neuroscience of Movement: You Think, So You Can Dance?	3
Physics 350	Physics of the Brain	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 3890	Advanced Psychological Statistics: The General Linear Model and Beyond	3

**Note:** Psych 3175 Applied Statistical Analysis with R or Psych 3890 Advanced Psychological Statistics: The General Linear Model and Beyond can be allowed to fulfill either Distribution A or B; students must complete at least one non-statistics course for the Additional Cognitive and Biological Distributions requirement.

## Computation Requirement

Students must complete one of the following courses:\*

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 5007	Statistics and Data Analysis in MATLAB	2

With prior approval, another course involving a significant computational/programming component may be substituted.

## Capstone/Depth Requirement

Students must complete three of the following courses:\*

*Capstone/Depth eligible courses:*

Code	Title	Units
Psych 4182	Perception, Thought, and Action	3
Psych 4412	Advanced Cognitive Neuroscience (or Psych 4413 Advanced Cognitive Neuroscience (WI))	3
Psych 4512	Neurobiology of Learning & Memory	3
Psych 4631	Introduction to Computational Cognitive Science	3

Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4030	Biological Clocks	3
Biol 4580	Principles of Human Anatomy and Development	3
Biol 4582	The Physiology and Biophysics of Consciousness	2
Phil 4212	Philosophy of Neuroscience	3

*Additional Capstone/Depth eligible courses:*

- Psych 333 (all 3 units must be completed in one semester and in one lab to be considered for approval; taken Credit/No-Credit) can be used satisfy up to 3 units of the Capstone/Depth requirement.
- FYP 3001 Ampersand: Research in Mind, Brain, Behavior (two consecutive semesters must be completed; 3 units total) can substitute for Psych 333.
- Psych 444B (3 units; taken for a letter grade and requiring a final paper) can be used to satisfy up to 6 units of the Capstone/Depth requirement.
- The Honors Program in Psychology (Psych 498/Psych 499 can be used to satisfy up to 3 units total of the Capstone/Depth requirement).

In total, no more than 6 units of the above may be applied toward the Capstone/Depth requirement.

**Note:** Unless a student explicitly petitions for an exception and is granted written prior approval, only the above Capstone/Depth eligible courses can be counted toward the Capstone/Depth requirement. Contact [skohlman@wustl.edu](mailto:skohlman@wustl.edu) for the petition.

\* If a course falls into more than one category, it can be used to fulfill only one of those categories (i.e., no double-counting).

## Acceptance Into the Psychological & Brain Sciences: Cognitive Neuroscience Major

Acceptance into the major is contingent upon an application and then approval by the major committee. As part of this application, the student will meet with an appropriate advisor who will carefully review the requirements and oversee the student's progress. A brief, one-page statement from the student about why they feel the cognitive neuroscience major is appropriate for them will be requested as part of the application.

Washington University students will be considered for admission to the P&BS:CN major no sooner than during their third semester (sophomore year). Decisions are based on the student's statement and academic record as well as the interview with the advisor. A minimum GPA of 2.0 is required for admission into the major.

## Experimental Psychopathology Specialization

To augment the major in Psychological & Brain Sciences, the department offers the option of a specialization for students who wish to engage more intensively with a specific area within the discipline.

A specialization may be a valuable experience for students planning on graduate study in psychology or related fields or for those who have a particular interest or want to gain expertise in one of the approved specializations. It may provide a useful preparation for the Honors program in psychology, or it may serve as a substitute for the Honors experience for those students who may not qualify for Honors.

Completion of a specialization entails 12 units:

- Three courses (9 units), at least one of which must be an advanced, 400-level course; and
- A semester of research in an appropriate, approved lab consisting of Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences, which requires the successful completion of an American Psychological Association–style research paper or an approved Honors project. In some cases, a relevant internship or practicum may be an appropriate alternative to research experience. (**Note:** Students may be required to complete a preliminary semester [3 units] of Psych 333 Independent Study in Psychological and Brain Sciences, depending on the nature of the project intended for Psych 444C; the additional independent research is at the discretion of the research mentor and will not be counted toward the completion of the specialization requirements.)

One course taken for a specialization may be used to fulfill no more than one of the core categories or distribution requirements of a Psychological & Brain Sciences major (i.e., one course could double-count for the major and the specialization). None of the units for a specialization can be counted for any other major or minor (i.e., there is no double counting with another major or minor). For those pursuing the Psychological & Brain Sciences: Cognitive Neuroscience major, the Cognitive Neuroscience Specialization is not an option.

Each specialization has a Psychological & Brain Sciences faculty advisor/coordinator who will meet with interested students to help ensure the successful and appropriate completion of the specialization and who serves as the liaison with the Psychological & Brain Sciences Undergraduate Studies Committee. A student may pursue only one specialization.

Students should contact Shelley Kohlman ([skohlman@wustl.edu](mailto:skohlman@wustl.edu)) in Somers Family Hall, Room 207B, to arrange a specialization. Forms are available from Shelley, and completed forms must be returned to her in order for a specialization to be considered officially "in progress."

Recognition of the specialization will appear on the student's academic record under *Milestones* once all requirements have been met.

## Requirements for the Experimental Psychopathology Specialization

This specialization allows students to acquire more advanced knowledge of the ways in which psychologists study mental disorders. Current research demonstrates the importance of integrating psychological and biological variables to better understand the classification, etiology, and treatment of a wide variety of mental disorders, including schizophrenia, mood disorders, anxiety disorders, substance use disorders, and eating disorders. Students who pursue this specialization will develop a broad-based appreciation for conceptual and methodological issues that are central to research in psychopathology.

*Advisor/coordinator:* Professor Deanna Barch

*Course work required:*

Code	Title	Units
Psych 354	Psychopathology and Mental Health	3

*Electives* (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 345	Genes, Environment, and Human Behavior	3
Psych 4557	Biopsychosocial Aspects of Eating Disorders and Obesity	3
Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior (Biological Pathways to Psychopathology)	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders (Inside the Disordered Brain)	3

*Research mentorship:* Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (i.e., Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences or Psych 498 Study for Honors/Psych 499 Study for Honors)

*Relevant faculty:* Deanna Barch, Ryan Bogdan, Josh Jackson, Renee Thompson, and Denise Wilfley (other potential faculty mentors may be approved)

## Additional Information

### Transfer Credit

If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward either major in P&BS.

## Senior Honors Program in Psychological & Brain Sciences

The primary goal of the honors program in P&BS is to provide students who have achieved a superior academic record with the opportunity to conduct a comprehensive empirical investigation under the direction of a faculty member.

To be admitted into the honors program, students must meet the following requirements:

- Have overall and P&BS grade point averages of at least 3.65
- Complete both Psych 300 and Psych 301 (or Psych 3011)
- Have an approved honors research advisor

Contact: Shelley Kohlman  
Phone: 314-935-5169  
Email: [skohlman@wustl.edu](mailto:skohlman@wustl.edu)  
Website: <https://psych.wustl.edu/undergraduate-program>

## Psychological & Brain Sciences: Cognitive Neuroscience Major, Lifespan Development Specialization

### Program Requirements

- **Total units required:** 45-49 units (36-37, as well as prerequisites, for the major requirements plus 9-12 units for the specialization)

How does the brain think? Cognitive neuroscience refers to how mental functions are linked to the operation of the brain and nervous system. The goal of cognitive neuroscience is to provide an understanding of psychological processes such as attention, memory, thinking, and emotion in terms of physical principles and biological components. At the same time, cognitive neuroscience aims to provide an understanding of the psychological constraints on how the brain functions, computes, and generates behavior. Students who pursue the undergraduate major in Psychological & Brain Sciences: Cognitive Neuroscience (PB&S:CN) will gain a strong foundation in how to study the brain and mind at various levels of analysis, including cellular biology, brain systems, cognitive and affective function, and neural computation. In addition, they will gain an appreciation of the relation between healthy cognitive and brain function and its breakdown in various disease states and disorders. The PB&S:CN major provides excellent preparation for a career in health and medical professions, scientific research, computer fields, education, and law.

## Prerequisites

Students must complete the following courses outside of Psychological & Brain Sciences:

Code	Title	Units
Math 132	Calculus II	3
Biol 2960	Principles of Biology I	4
<b>Total Units</b>		<b>7</b>

**Note:** Each of these prerequisites has its own prerequisites: Math 132 Calculus II requires Math 131; for Biol 2960 Principles of Biology I, taking Chem 111A and Chem 112A (concurrently) is strongly recommended. These courses are biology and pre-med prerequisites as well, and they are typically completed during a student's first year. They may alternatively be satisfied through AP credit or any other mechanism approved by the respective department or the College. These prerequisites do not earn credit toward the P&BS:CN major, but must be completed with a passing grade (C- or above) by the end of the student's third-year to remain in good standing for the major.

## Required Courses

Code	Title	Units
Psych 100B	Introduction to Psychology	3
Psych 300	Introduction to Psychological Statistics	3
Psych 301 or Psych 3011	Experimental Psychology	4
Psych 3401 or Psych 344	Biological Psychology	3
Psych 360	Cognitive Psychology	3
Psych 3604	Cognitive Neuroscience	3
<b>Total Units</b>		<b>19</b>

**Note:** The first three requirements (i.e., Psych 100B Introduction to Psychology, Psych 300 Introduction to Psychological Statistics, and Psych 301 Experimental Psychology/Psych 3011 Experimental Psychology) are the same as those for the regular P&BS major. Psych 344 Principles of the Nervous System is home-based in Biology; students should register under the cross-listed Psych L33 course designation, not Biol 3411 Principles of the Nervous System.

Exemption from Psych 100B Introduction to Psychology is possible in the following circumstances:

- Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
- An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A.
- SDS 2200, SDS 3200, or DAT 120 may substitute for Psych 300 Introduction to Psychological Statistics. No AP math course can substitute for Psych 300 Introduction to Psychological Statistics.

In cases where an exemption is granted (e.g., Psych 100B, Psych 300), no credits are earned toward the major, so exempt courses must be made up with additional P&BS content electives (approved by the major advisor).

## Additional Cognitive and Biological Distributions

Students must complete two courses — one each from the Distribution A and B lists:

*Distribution A eligible courses:\**

Code	Title	Units
Psych 321	Developmental Psychology	3
Psych 330	Sensation and Perception	3
Psych 358	Language Acquisition	3
Psych 361	Psychology of Learning	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 4182	Perception, Thought, and Action	3
Psych 433	Psychology of Language	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 3890	Advanced Psychological Statistics: The General Linear Model and Beyond	3

*Distribution B eligible courses:\**

Code	Title	Units
Psych 345	Genes, Environment, and Human Behavior	3
Biol 3057	Physiological Control Systems	3
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains, and Behavior	3
Biol 363	The Neuroscience of Movement: You Think, So You Can Dance?	3
Physics 350	Physics of the Brain	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 3890	Advanced Psychological Statistics: The General Linear Model and Beyond	3

**Note:** Psych 3175 Applied Statistical Analysis with R or Psych 3890 Advanced Psychological Statistics: The General Linear Model and Beyond can be allowed to fulfill either Distribution A or B; students must complete at least one non-statistics course for the Additional Cognitive and Biological Distributions requirement.

## Computation Requirement

Students must complete one of the following courses:\*

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 5007	Statistics and Data Analysis in MATLAB	2

With prior approval, another course involving a significant computational/programming component may be substituted.

## Capstone/Depth Requirement

Students must complete three of the following courses:\*

*Capstone/Depth eligible courses:*

Code	Title	Units
Psych 4182	Perception, Thought, and Action	3
Psych 4412	Advanced Cognitive Neuroscience (or Psych 4413 Advanced Cognitive Neuroscience (WI))	3
Psych 4512	Neurobiology of Learning & Memory	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4030	Biological Clocks	3
Biol 4580	Principles of Human Anatomy and Development	3
Biol 4582	The Physiology and Biophysics of Consciousness	2
Phil 4212	Philosophy of Neuroscience	3

*Additional Capstone/Depth eligible courses:*

- Psych 333 (all 3 units must be completed in one semester and in one lab to be considered for approval; taken Credit/No-Credit) can be used satisfy up to 3 units of the Capstone/Depth requirement.
- FYP 3001 Ampersand: Research in Mind, Brain, Behavior (two consecutive semesters must be completed; 3 units total) can substitute for Psych 333.
- Psych 444B (3 units; taken for a letter grade and requiring a final paper) can be used to satisfy up to 6 units of the Capstone/Depth requirement.
- The Honors Program in Psychology (Psych 498/Psych 499 can be used to satisfy up to 3 units total of the Capstone/Depth requirement).

In total, no more than 6 units of the above may be applied toward the Capstone/Depth requirement.

**Note:** Unless a student explicitly petitions for an exception and is granted written prior approval, only the above Capstone/Depth eligible courses can be counted toward the Capstone/Depth requirement. Contact skohlman@wustl.edu for the petition.

\* If a course falls into more than one category, it can be used to fulfill only one of those categories (i.e., no double-counting).

## Acceptance Into the Psychological & Brain Sciences: Cognitive Neuroscience Major

Acceptance into the major is contingent upon an application and then approval by the major committee. As part of this application, the student will meet with an appropriate advisor who will carefully review the requirements and oversee the student's progress. A brief, one-page statement from the student about why they feel the cognitive neuroscience major is appropriate for them will be requested as part of the application.

Washington University students will be considered for admission to the P&BS:CN major no sooner than during their third semester (sophomore year). Decisions are based on the student's statement and academic record as well as the interview with the advisor. A minimum GPA of 2.0 is required for admission into the major.

## Lifespan Development Specialization

To augment the major in Psychological & Brain Sciences, the department offers the option of a specialization for students who wish to engage more intensively with a specific area within the discipline.

A specialization may be a valuable experience for students planning on graduate study in psychology or related fields or for those who have a particular interest or want to gain expertise in one of the approved specializations. It may provide a useful preparation for the Honors program in psychology, or it may serve as a substitute for the Honors experience for those students who may not qualify for Honors.

Completion of a specialization entails 12 units:

- Three courses (9 units), at least one of which must be an advanced, 400-level course; and
- A semester of research in an appropriate, approved lab consisting of Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences, which requires the successful completion of an American Psychological Association-style research paper or an approved Honors project. In some cases, a relevant internship or practicum may be an appropriate alternative to research experience. (**Note:** Students may be required to complete a preliminary semester [3 units] of Psych 333 Independent Study in Psychological and Brain Sciences, depending on the nature of the project intended for Psych 444C; the additional independent research is at the discretion of the research mentor and will not be counted toward the completion of the specialization requirements.)

One course taken for a specialization may be used to fulfill no more than one of the core categories or distribution requirements of a Psychological & Brain Sciences major (i.e., one course could double-count for the major and the specialization). None of the units for a specialization can be counted for any other major or minor (i.e., there is no double counting with another major or minor). For those pursuing the Psychological & Brain Sciences: Cognitive Neuroscience major, the Cognitive Neuroscience Specialization is not an option.

Each specialization has a Psychological & Brain Sciences faculty advisor/coordinator who will meet with interested students to help ensure the successful and appropriate completion of the specialization and who serves as the liaison with the Psychological & Brain Sciences Undergraduate Studies Committee. A student may pursue only one specialization.

Students should contact Shelley Kohlman (skohlman@wustl.edu) in Somers Family Hall, Room 207B, to arrange a specialization. Forms are available from Shelley, and completed forms must be returned to her in order for a specialization to be considered officially "in progress."

Recognition of the specialization will appear on the student's academic record under *Milestones* once all requirements have been met.

## Requirements for the Lifespan Development Specialization

Many introductory courses in developmental psychology focus on the changes that occur from birth to adolescence. The specialization in lifespan development provides students with an understanding of the cognitive and physiological changes that occur over the lifespan, with a primary focus on older adulthood. A major goal of the specialization is to provide students with an understanding of the similarities and differences in development at different stages of the lifespan.

*Advisor/coordinator:* Professor Mitchell Sommers

*Course work required:*

Code	Title	Units
Psych 326	Introduction to the Psychology of Aging	3

*Electives:*

Code	Title	Units
Psych 321	Developmental Psychology	3
Psych 427	Social Gerontology	3
Psych 4355	Personality Development Across the Life Span	3

*Research mentorship or internship experience related to Lifespan Development:* Students can complete this aspect of the specialization with either a prior approved research mentorship or an approved internship related to older adults (i.e., Psych 225 Internship in Psychology, Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences, or Psych 498 Study for Honors/Psych 499 Study for Honors). Successful completion of a paper is required in all cases.

*Relevant faculty for research mentorship:* Mitchell Sommers, Brian Carpenter, Sandra Hale, Denise Head, Patrick Hill, Derek Isaacowitz, Josh Jackson, and Lori Markson (other potential faculty mentors may be approved)

*Possible internships:* Prior approved internship related to older adults and successful completion of a paper. Options may include work in an assisted-living facility or another community-based program designed to assist older adults. Other internships are available; consult the P&BS website for internship opportunities in psychology.

## Additional Information

### Transfer Credit

If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward either major in P&BS.

### Senior Honors Program in Psychological & Brain Sciences

The primary goal of the honors program in P&BS is to provide students who have achieved a superior academic record with the opportunity to conduct a comprehensive empirical investigation under the direction of a faculty member.

To be admitted into the honors program, students must meet the following requirements:

- Have overall and P&BS grade point averages of at least 3.65
- Complete both Psych 300 and Psych 301 (or Psych 3011)
- Have an approved honors research advisor

Phone: 314-935-5169  
Email: skohlman@wustl.edu  
Website: <https://psych.wustl.edu/undergraduate-program>

## Psychological & Brain Sciences: Cognitive Neuroscience Major, Personality and Individual Differences Specialization

### Program Requirements

- **Total units required:** 45-49 units (36-37, as well as prerequisites, for the major requirements plus 9-12 units for the specialization)

How does the brain think? Cognitive neuroscience refers to how mental functions are linked to the operation of the brain and nervous system. The goal of cognitive neuroscience is to provide an understanding of psychological processes such as attention, memory, thinking, and emotion in terms of physical principles and biological components. At the same time, cognitive neuroscience aims to provide an understanding of the psychological constraints on how the brain functions, computes, and generates behavior. Students who pursue the undergraduate major in Psychological & Brain Sciences: Cognitive Neuroscience (PB&S:CN) will gain a strong foundation in how to study the brain and mind at various levels of analysis, including cellular biology, brain systems, cognitive and affective function, and neural computation. In addition, they will gain an appreciation of the relation between healthy cognitive and brain function and its breakdown in various disease states and disorders. The PB&S:CN major provides excellent preparation for a career in health and medical professions, scientific research, computer fields, education, and law.

## Prerequisites

Students must complete the following courses outside of Psychological & Brain Sciences:

Code	Title	Units
Math 132	Calculus II	3
Biol 2960	Principles of Biology I	4
<b>Total Units</b>		<b>7</b>

**Note:** Each of these prerequisites has its own prerequisites: Math 132 Calculus II requires Math 131; for Biol 2960 Principles of Biology I, taking Chem 111A and Chem 112A (concurrently) is strongly recommended. These courses are biology and pre-med prerequisites as well, and they are typically completed during a student's first year. They may alternatively be satisfied through AP credit or any other mechanism approved by the respective department or the College. These prerequisites do not earn credit toward the P&BS:CN major, but must be completed with a passing grade (C- or above) by the end of the student's third-year to remain in good standing for the major.

## Required Courses

Code	Title	Units
Psych 100B	Introduction to Psychology	3
Psych 300	Introduction to Psychological Statistics	3
Psych 301	Experimental Psychology	4
or Psych 3011	Experimental Psychology	
Psych 3401	Biological Psychology	3
or Psych 344	Principles of the Nervous System	
Psych 360	Cognitive Psychology	3
Psych 3604	Cognitive Neuroscience	3
<b>Total Units</b>		<b>19</b>

**Note:** The first three requirements (i.e., Psych 100B Introduction to Psychology, Psych 300 Introduction to Psychological Statistics, and Psych 301 Experimental Psychology/Psych 3011 Experimental Psychology) are the same as those for the regular P&BS major. Psych 344 Principles of the Nervous System is home-based in Biology; students should register under the cross-listed Psych L33 course designation, not Biol 3411 Principles of the Nervous System.

Exemption from Psych 100B Introduction to Psychology is possible in the following circumstances:

- Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
- An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A.
- SDS 2200, SDS 3200, or DAT 120 may substitute for Psych 300 Introduction to Psychological Statistics. No AP math course can substitute for Psych 300 Introduction to Psychological Statistics.

In cases where an exemption is granted (e.g., Psych 100B, Psych 300), no credits are earned toward the major, so exempt courses must be made up with additional P&BS content electives (approved by the major advisor).

## Additional Cognitive and Biological Distributions

Students must complete two courses — one each from the Distribution A and B lists:

*Distribution A eligible courses:\**

Code	Title	Units
Psych 321	Developmental Psychology	3
Psych 330	Sensation and Perception	3
Psych 358	Language Acquisition	3
Psych 361	Psychology of Learning	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 4182	Perception, Thought, and Action	3
Psych 433	Psychology of Language	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 3890	Advanced Psychological Statistics: The General Linear Model and Beyond	3

*Distribution B eligible courses:\**

Code	Title	Units
Psych 345	Genes, Environment, and Human Behavior	3
Biol 3057	Physiological Control Systems	3
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains, and Behavior	3
Biol 363	The Neuroscience of Movement: You Think, So You Can Dance?	3

Physics 350	Physics of the Brain	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 3890	Advanced Psychological Statistics: The General Linear Model and Beyond	3

**Note:** Psych 3175 Applied Statistical Analysis with R or Psych 3890 Advanced Psychological Statistics: The General Linear Model and Beyond can be allowed to fulfill either Distribution A or B; students must complete at least one non-statistics course for the Additional Cognitive and Biological Distributions requirement.

## Computation Requirement

Students must complete one of the following courses:\*

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Psych 3175	Applied Statistical Analysis with R	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 5007	Statistics and Data Analysis in MATLAB	2

With prior approval, another course involving a significant computational/programming component may be substituted.

## Capstone/Depth Requirement

Students must complete three of the following courses:\*

*Capstone/Depth eligible courses:*

Code	Title	Units
Psych 4182	Perception, Thought, and Action	3
Psych 4412	Advanced Cognitive Neuroscience (or Psych 4413 Advanced Cognitive Neuroscience (WI))	3
Psych 4512	Neurobiology of Learning & Memory	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4030	Biological Clocks	3
Biol 4580	Principles of Human Anatomy and Development	3
Biol 4582	The Physiology and Biophysics of Consciousness	2
Phil 4212	Philosophy of Neuroscience	3

*Additional Capstone/Depth eligible courses:*

- Psych 333 (all 3 units must be completed in one semester and in one lab to be considered for approval; taken Credit/No-Credit) can be used satisfy up to 3 units of the Capstone/Depth requirement.
- FYP 3001 Ampersand: Research in Mind, Brain, Behavior (two consecutive semesters must be completed; 3 units total) can substitute for Psych 333.
- Psych 444B (3 units; taken for a letter grade and requiring a final paper) can be used to satisfy up to 6 units of the Capstone/Depth requirement.
- The Honors Program in Psychology (Psych 498/Psych 499 can be used to satisfy up to 3 units total of the Capstone/Depth requirement).

In total, no more than 6 units of the above may be applied toward the Capstone/Depth requirement.

**Note:** Unless a student explicitly petitions for an exception and is granted written prior approval, only the above Capstone/Depth eligible courses can be counted toward the Capstone/Depth requirement. Contact [skohlman@wustl.edu](mailto:skohlman@wustl.edu) for the petition.

- \* If a course falls into more than one category, it can be used to fulfill only one of those categories (i.e., no double-counting).

## Acceptance Into the Psychological & Brain Sciences: Cognitive Neuroscience Major

Acceptance into the major is contingent upon an application and then approval by the major committee. As part of this application, the student will meet with an appropriate advisor who will carefully review the requirements and oversee the student's progress. A brief, one-page statement from the student about why they feel the cognitive neuroscience major is appropriate for them will be requested as part of the application.

Washington University students will be considered for admission to the P&BS:CN major no sooner than during their third semester (sophomore year). Decisions are based on the student's statement and academic record as well as the interview with the advisor. A minimum GPA of 2.0 is required for admission into the major.

## Personality and Individual Differences Specialization

To augment the major in Psychological & Brain Sciences, the department offers the option of a specialization for students who wish to engage more intensively with a specific area within the discipline.

A specialization may be a valuable experience for students planning on graduate study in psychology or related fields or for those who have a particular interest or want to gain expertise in one of the approved specializations. It may provide a useful preparation for the Honors program in psychology, or it may serve as a substitute for the Honors experience for those students who may not qualify for Honors.

Completion of a specialization entails 12 units:

- Three courses (9 units), at least one of which must be an advanced, 400-level course; and
- A semester of research in an appropriate, approved lab consisting of Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences, which requires the successful completion of an American Psychological Association–style research paper or an approved Honors project. In some cases, a relevant internship or practicum may be an appropriate alternative to research experience. (**Note:** Students may be required to complete a preliminary semester [3 units] of Psych 333 Independent Study in Psychological and Brain Sciences, depending on the nature of the project intended for Psych 444C; the additional independent research is at the discretion of the research mentor and will not be counted toward the completion of the specialization requirements.)

One course taken for a specialization may be used to fulfill no more than one of the core categories or distribution requirements of a Psychological & Brain Sciences major (i.e., one course could double-count for the major and the specialization). None of the units for a specialization can be counted for any other major or minor (i.e., there is no double counting with another major or minor). For those pursuing the Psychological & Brain Sciences: Cognitive Neuroscience major, the Cognitive Neuroscience Specialization is not an option.

Each specialization has a Psychological & Brain Sciences faculty advisor/coordinator who will meet with interested students to help ensure the successful and appropriate completion of the specialization and who serves as the liaison with the Psychological & Brain Sciences Undergraduate Studies Committee. A student may pursue only one specialization.

Students should contact Shelley Kohlman (skohlman@wustl.edu) in Somers Family Hall, Room 207B, to arrange a specialization. Forms are available from Shelley, and completed forms must be returned to her in order for a specialization to be considered officially "in progress."

Recognition of the specialization will appear on the student's academic record under *Milestones* once all requirements have been met.

## Requirements for the Personality and Individual Differences Specialization

This specialization allows students to acquire deeper knowledge of how and why individuals differ from one another and the ways in which individual (e.g., personality) and group (e.g., gender) differences influence behavior, emotion, experience, identity, and psychopathology. The core course for the specialization (Psych 353) considers personality more generally. The seminars explore, in depth, specific aspects of personality and individual differences, including biological bases of individual differences (i.e., genetics), the interpersonal processes associated with personality and personality judgment, individual differences in self and identity, group differences, and personality pathology.

*Advisor/coordinator:* Professor Tammy English

*Course work required:*

Code	Title	Units
Psych 353	Psychology of Personality	3

*Electives* (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 345	Genes, Environment, and Human Behavior	3
Psych 3645	Understanding Emotions	3
Psych 413	Contemporary Topics in Social Psychology (with prior approval only)	3
Psych 4355	Personality Development Across the Life Span	3
Psych 4367	Seminar in Positive Psychology	3
Psych 4555	Emotion Regulation	3
Psych 4593	Psychology of the Good Life	3

*Research mentorship:* Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (i.e., Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences or Psych 498 Study for Honors/Psych 499 Study for Honors)

*Relevant faculty:* Tammy English, Patrick Hill, Derek Isaacowitz, Josh Jackson, Michael Strube, Jesse Sun, Renee Thompson, and Emily Willroth (other potential faculty mentors may be approved)

## Additional Information

### Transfer Credit

If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward either major in P&BS.

### Senior Honors Program in Psychological & Brain Sciences

The primary goal of the honors program in P&BS is to provide students who have achieved a superior academic record with the opportunity to conduct a comprehensive empirical investigation under the direction of a faculty member.

To be admitted into the honors program, students must meet the following requirements:

- Have overall and P&BS grade point averages of at least 3.65
- Complete both Psych 300 and Psych 301 (or Psych 3011)
- Have an approved honors research advisor

## Psychological & Brain Sciences Minor

### Program Requirements

- **Total units required:** 15

For those students who have a broad or general interest in Psychological & Brain Sciences (P&BS), we recommend taking several courses from the five core areas of psychology: Social/Personality; Mental Health/Affective; Biological/Neurological Bases of Behavior; Behavior and Cognition; and Lifespan Development.

For those students who want to focus in a more specific area, courses can reflect the area of interest. For example, a student interested in the helping professions or counseling may wish to select from such courses as Psych 353 Psychology of Personality, Psych 354 Psychopathology and Mental Health, Psych 361 Psychology of Learning, and Psych 321 Developmental Psychology. A student wishing to focus on experimental psychology/neuroscientific bases of behavior may select from such courses as Psych 3401 Biological Psychology, Psych 361 Psychology of Learning, Psych 330 Sensation and Perception, Psych 360 Cognitive Psychology, and Psych 3604 Cognitive Neuroscience and may also consider doing independent study (Psych 333).

### Required Course

Code	Title	Units
Psych 100B	Introduction to Psychology	3

### Elective Courses

Four additional courses (i.e., a minimum of 12 units of additional course work) in P&BS, all of which must be at the 300 level or above

### Additional Information

Students may receive exemption from the Psych 100B Introduction to Psychology requirement only if they have an AP psychology score of 5, an IB score of 6 or 7, or a British A-Level grade of A. For exemption, no credit will be given; therefore, five applicable courses must be completed.

No more than 3 units of an approved cross-listed course originating outside of P&BS, an approved psychology course taken in the School of Continuing & Professional Studies, an approved psychology course taken at another institution (including transfer from a study abroad program), or an independent study-type course (e.g., Psych 333) may count toward the minor.

### Transfer Credit

If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward the minor in P&BS. Transfer students must complete at least 9 advanced units of home-based P&BS courses at Washington University.

### Public Health & Society

Public health is a critical field of research and practice around the world, including in undergraduate education. Public health scholarship emphasizes protecting and improving the population health of communities — locally, nationally, and around the globe. The Public Health & Society program is a well-integrated interdisciplinary program with enriched and amplified connections between public health and foundational and theoretical issues in humanistic, biological, ecological, sociocultural, and historical perspectives on health and society. Students will learn to read critically, communicate effectively, and think broadly about the complexities of public health and its social contexts in the past, present, and future. The program emphasizes ethical training in public health science, highlighting the social determinants of health, particularly the development of a foundational understanding of how issues of equity, inclusion, and diversity influence health outcomes.

All core program courses will be co-taught by Arts & Sciences faculty alongside Public Health faculty. Students will gain access to and experience from people working across diverse communities and will blend theory and research with relevant practice.

### LPH LPHS 1000 Foundations in Public Health

This course examines the foundations in public health using an equity and social justice approach emphasizing the interconnectedness of population and individual health. The course will cover the history and impact of public health, including the importance of health equity, social justice, and human rights, as well as the essential role of ethics in public health. The course will expose students to various public health professionals working on inter-professional teams to explore careers in public health, we will invite public health and community health experts from the St. Louis region as well as national and international guest speakers.

Credit 3 units. A&S IQ: SSC EN: S

### LPH LPHS 2000 Introduction to Public and Global Health

Welcome to Intro to Public and Global Health, a course designed to provide a comprehensive introduction to the multifaceted dimensions of public health both within the United States and internationally. Throughout this course, students will embark on a journey to understand how health has been defined within the global context, exploring the historical evolution of public and global health disciplines as well as contemporary issues within the field. Delving into the ethical landscape of global health research, programming, and policy, students will articulate human rights issues and examine approaches ensuring ethical interventions. The course will shed light on the intricate interplay of social determinants of health, unraveling their impact on well-being and the emergence of health inequities. By examining both successes and failures in global health interventions, students

will gain a nuanced understanding of the challenges inherent in the field. Furthermore, the course will foster a comparative analysis of the organization, structure, and function of diverse healthcare systems across international settings. Finally, with a focus on morbidity and mortality, students will explore major causes, trends, and measures of infectious and chronic disease, as well as some underappreciated and emerging issues, providing a holistic perspective on the critical issues shaping the landscape of public and global health today. We will engage with class topics through a range of mediums, including book chapters, scientific papers, media pieces, podcasts, guest lectures from leaders in the field, and TED talks. It may be a big class, but students will have the opportunity to voice their opinions on key class topics during small, weekly discussion groups. Get ready to be captivated, challenged, and inspired - because global health has never been this thrilling!

### LPH LPHS 3000 Public Health Theories, Models, and Frameworks

This course will provide an overview of social and behavioral science and humanistic theories and frameworks that are currently used to: 1) understand health related behaviors; and 2) guide development of interventions and policies designed to promote positive health behavior including those that prevent, reduce or eliminate major public health problems. We will also explore the history of these theories and frameworks and the cultural and artistic approaches to change health and health related behaviors. We will use an ecological framework to examine theories at multiple levels of the culture and social ecology from individual to policy level, focusing on applications that will impact health at the population level.
