maps, and other forms of representation-as well as responses by contemporary (20th- and 21st-century) artists to the conventions of "race-crafting" laid down in the early modern era. Geographically, the materials we study issue from western Europe and focus on encounters with Western Africa, but the seminar considers European engagement in the American colonies, Melanesia/Indonesia, the Atlantic and Brazil-and with the Islamic world. Prerequisites: One 100-level Art History course or permission of the instructor

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM EN: H

---

**L01 Art-Arch 370 The American West: The Image In History**

Examines representations of the American West and of the frontier encounter between Euro- and Native American cultures, from the early nineteenth to the early twentieth centuries. We will consider travel accounts, fiction painting, ledger drawings, photography, and film in order to analyze the ways in which historical circumstances have shaped artistic and literary representations. At the same time, we will look at how images and texts have shaped formative myths about the West that in turn leave their impact on history.

Credit 3 units. A&S IQ: HUM, LCD Art: AH BU: HUM

---

**L01 Art-Arch 371 American Art to 1900**

This course is a survey of the broad social, cultural, and nationalist themes in the visual arts from European contact with the New World to 1900. Topics include the encounter of New World cultures with European colonizers and the ongoing relationship between America and Europe; the changing image of the artist; and the role of art in the formation of national identity. Prerequisite: L01 113 or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

---

**L01 Art-Arch 3712 Art and Culture in America's Gilded Age**

This course covers developments in American culture from the end of the Civil War to the turn of the century, including the novels, buildings, images, and public and private spaces of this transitional period. The Gilded Age was a time of new class formation, of unparalleled social diversity, and of new urban forms. The connections between art, literature, and social experience will be addressed. Representative figures include Henry James, Henry Adams, Louis Sullivan, Stanford White, Thomas Eakins, and Louis Tiffany.

Credit 3 units. A&S IQ: HUM Art: AH BU: BA, HUM

---

**L01 Art-Arch 372 American Art to 1970**

From the beginnings of modernism in the visual arts of the United States, around 1900, to Abstract Expressionism and the Beat aesthetic. Focus on the cultural reception and spread of modernism, native currents of modernist expression, from organicism to machine imagery, the mural movement and the art of the WPA, the creation of a usable past, abstraction and figuration, regionalism and internationalism, photography and advertising.

Credit 3 units. A&S IQ: HUM Arch: SSC Art: AH, HUM BU: HUM EN: H

---

**L01 Art-Arch 376 American Modernism, 1900-1940**

American modernism: What is it? What is the nature of its encounter with mass culture? What happened to modernism as it migrated from its "high" European origins to its "middlebrow" version in America between the turn of the century and the eve of World War II? What was the rhetoric of modernism in everyday life, and what was its impact on design, photography, and advertising? In addition to the fine arts, we will look at popular media, film, and photography. Lecture/discussion. Prerequisite: L01 215 or permission of instructor.

Credit 3 units. A&S IQ: HUM, WI Art: AH, HUM BU: ETH, HUM

---

**L01 Art-Arch 3763 Bodymorph: Fantasy Worlds of American Visual Culture, Animation, and Product Design**

This lecture and discussion-based course engages students in media beyond the fine arts, which shaped in fundamental ways how ordinary Americans experienced life during decades of dynamic change and modernization over the first half of the 20th century. We consider cartooning and animation, film, advertising, product design, department stores and the visual strategies of consumer culture, jazz aesthetics, the skyscraper city, and more. We set these new forms within broad changes in the rhythms of everyday life driven by industrialization and new technologies, as well as how filmmakers, animators, and artists both expressed these new realities, as well as how they turned in response to the handmade, the "primitive," and the embodied. We look at the uneasy exchanges between high art and mass media; and at the open borders between surrealism, advertising, and art. Prerequisites: Any introductory or 300-level course in Art History or American Culture Studies, History, or literature  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM EN: H

---

**L01 Art-Arch 3782 Modern Art 1905-1960**

This course investigates topics in European painting, sculpture, architecture, photography, and film. Lectures and readings will address major artistic developments, including Cubism, De Stijl, Futurism, Expressionism, Dadaism, Constructivism, Surrealism, the Bauhaus, and Art Brut. Prerequisite: L01 215 or permission of instructor.  
Credit 3 units. A&S IQ: HUM Art: AH BU: HUM

---

**L01 Art-Arch 3783 The Modernist Project: Art in Europe and the United States, 1905-1980**

This course surveys major tendencies in painting and sculpture, from Fauvism in France and Expressionism in Germany to the beginnings of Postmodernism in photo-based work in the United States. About two thirds of the course will treat European art, and about one third will treat American art. Photography, architecture, and work in other forms will be considered selectively when pertinent to the individual class topics. Within the lecture topics, emphasis is on avant-garde innovation; the tension in modernist art between idealism and critique; reaction by artists to current events; the relationship between art and linguistics, philosophy, literature, economics, and science; the role of geopolitics in art production; the intersections of art and society; the role of mass culture; issues of race and gender in the production and reception of art; and the challenge to the concept of authorship and creativity posed by Postmodernism at the end of this period. Prerequisite: One course in Art History at the 100 or 200 level.  
Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM EN: H

---

**L01 Art-Arch 3785 Photography in America**

This course will consider the practice and use of photography in America, from its invention up to the present, and it will offer various ways of thinking about the medium and its relation to society and culture. Students will come to understand the ways photographic practices shape public perceptions of national identity, ethnicity and gender, nature, democratic selves, and a host of other concerns. We will discuss famous practitioners such as Matthew Brady, Jacob Riis, Lewis Hine, Walker Evans, and Robert Frank. We consider not only the social and public uses of the medium (through such episodes as the New Deal/FSA and photojournalism) but also the private explorations of "fine art" photographers and the everyday practices of the snapshot. Prerequisite: One course in Art History at the 100 or 200 level.  
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN: H

---

**L01 Art-Arch 3795 Global Contemporary Photography**

This course explores contemporary photographic traditions from around the world. We begin by grappling with a few of the theoretical issues that lie at the heart of the medium's power, such as the aura of a photograph and its potential evidentiary value. We examine how photography emerged as distinct from other artistic forms such as painting and was deployed in unique ways across the globe to assert power, counter claims of hegemony, and express identity. The scope of the class is not limited to high-art photography, but also explores the family photography and vernacular traditions, focusing on a range of genres including portraiture, narrative, and performance. Finally, we end by exploring how contemporary photographers have stretched the potential of the medium by experimenting with digital technology and non-traditional modes of display. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215), or permission of instructor.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

---

**L01 Art-Arch 3810 Mexican Visual Culture**

This course will explore the ways in which different aspects of visual culture were used to construct national, regional, political, social and cultural identities in Mexico. The omnipresence of the visual in the everyday life of Mexicans -including state-sponsored muralism, cinema, photography, graphic press, wide-circulating comic books and nationalist architecture- allows for the study of different ways in which citizens become embedded both in official national projects and in projects of political dissidence. The class will thus use the Mexico in the 20th and 21st centuries to introduce students to the study of the visual as a social practice, through theoretical discussions that will run parallel to the study of different visual manifestations. The course will discuss the changing social and political role of art, the influence that Mexican visual culture exerts in other parts of the world and the way in which visual culture allows Mexicans to think about their identity. Same as L45 LatAm 381  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM, VC EN: H

---

**L01 Art-Arch 3815 Rococo to Revolution: Art in Eighteenth-Century Europe**

The Long Eighteenth Century serves as a bridge between two fundamentally different times. The Europe of 1700 was dominated by absolutism and the ancien régime. The Europe of 1800 was in an age of revolution. This course will explore the dramatic shift in artistic representation and individual self-conception that occurred throughout the century to usher in our modern age. Important topics to be considered include: the rise of the Academy; the Enlightenment and the Encyclopédie; the Grand Tour; Art and Science; and the French Revolution. Focusing on the development of artistic trends, the course will address transformations in painting, sculpture and architecture throughout Europe.  
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

---

**L01 Art-Arch 3831 Art in the Age of Revolution: 1789-1848**

This course covers European painting, sculpture, and printmaking from the French Revolution to the mid-19th century. French, English, German, and Spanish artists are discussed in a social and aesthetic context, with a focus on links between art and ideology in times of

political turmoil. The styles of Classicism and Romanticism, the rise of history painting, and the development of Realism in both landscape and genre painting are also addressed. Prerequisite: L01 113 or permission of instructor.

Credit 3 units. Art: AH BU: HUM

---

#### **L01 Art-Arch 3833 Realism and Impressionism**

This course examines the development of European art from approximately 1848 to the mid-1880s, with a focus on the development of Realism and Impressionism in England and France. Issues to be explored include the breakdown of academic art, the rise of landscape and naturalist themes, the emergence of alternative exhibition spaces and new dealer systems, and the relationship between gender and avant-garde practice. Prerequisites: L01 113 and L01 215 or permission of instructor.

Credit 3 units. Art: AH BU: HUM

---

#### **L01 Art-Arch 3836 The Art Museum from the Louvre (Paris) to the Louvre Abu Dhabi**

This course explores the cultural politics of modern and contemporary art museums in the nexus of London-Paris-New York from the late 18th century to today. It analyzes important works of art collected, displayed, and studied in the museum context as well as the politics, philosophies, and people who shaped the history of modern and contemporary art via museums and exhibitions. Students will interrogate institutions and spaces that condition the experience and reception of modern and contemporary art. Prerequisites: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: HUM EN: H

---

#### **L01 Art-Arch 3838 Modern Art in Fin-de-Siecle Europe, 1880-1907**

This course examines artistic production at the turn of the century in France, Belgium, England, and Scandinavia. Beginning with the reevaluation of impressionism and naturalism in France, we examine Neo-Impressionism (Seurat and Signac) and Symbolism (Moreau, Van Gogh, Gauguin, the Nabis, Rodin, and Munch), as well as later careers of Impressionists (Cassatt, Monet, Degas, and Renoir). We will consider cross-national currents of Symbolism in Belgium and Scandinavia; the Aesthetic Movement in Britain; the rise of expressionist painting in French art (particularly with the Fauvism of Matisse and Derain), and the juncture of modernist primitivism and abstraction in early Cubism (Picasso). Prerequisite: L01 113 or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM

---

#### **L01 Art-Arch 3862 The Mediterranean and French Modernism**

This course will survey the development of the Mediterranean region as an important site of modernist artistic practice. Among the artists to be considered are Pierre-Auguste Renoir, Henri Matisse, Pablo Picasso, Marc Chagall and Yves Klein. Excursions to museums and other artistic sites.

Credit 1 unit. A&S IQ: HUM Art: AH BU: HUM, IS EN: H

---

#### **L01 Art-Arch 3874 The Modern and Contemporary Art Market, 1863 - Present**

The modern and contemporary art market is a strange and irrational entity, seemingly ungoverned by traditional economic laws of supply and demand. In 2019, *Rabbit*, a sculpture by Jeff Koons, sold for \$91.1 million at auction, setting a record for the most expensive artwork by a living artist ever sold. A few months later, at the Art Basel Miami Beach art fair, Maurizio Cattelan's *Comedian*, an installation artwork featuring a fresh banana duct-taped to a wall, sold for \$120,000. More than just a source for headlines, today's art market is also a growing art historical subfield, one that offers crucial insight into artistic production, shifts in the sociopolitical landscape, and even the practice of art history

itself. This course offers a historical overview of the modern and contemporary art market, from 1863 to the present. In this thematic survey, students will chart the art market's development by examining key concepts, personalities, and events, including the 1863 Paris Salon des Refusés, the Galerie Durand-Ruel and Impressionism, the avant-garde myth, Nazi-era art crime, the 1997 Sensation exhibition, and international biennials. Students will also become acquainted with basic art market research methods and resources. Prerequisites: Any 100- or 200-level course in art history; L01 215, Intro to Modern Art, recommended; or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM EN: H

---

#### **L01 Art-Arch 3875 Rejecting Reason: Dada and Surrealism in Europe and the United States**

In this multimedia interdisciplinary course, we will consider the history, theory, and practice of Dada and Surrealism, from its Symbolist and Expressionist roots at the end of the 19th century and the beginning of the 20th century through its late expressions in the beat culture and pop art of the 1950s and 1960s. Dada's emergence in Zürich and New York in the midst of World War I set the tone for its stress on irrationality as an oppositional strategy. Surrealist research into the domain of the unconscious continued this extreme challenge to dominant culture but in a revolutionary spirit that proposed new possibilities for personal and collective liberation. The international character of the movements -- with substantial cross-transmission between Europe and the United States -- will be emphasized. Prerequisites: L01 113, Intro to Western Art; L01 215, Intro to Modern Art; or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM EN: H

---

#### **L01 Art-Arch 3877 Cubism and Its Global Legacies**

During the early 20th century, Cubism marked a radical break in the European representation of three-dimensional space in painting through a bold reconsideration of atmospheric and linear perspective. Early Cubists such as Pablo Picasso achieved this formal breakthrough in part through studying African and Oceanic art. Between the summer of 1908 -- when Braque and Picasso developed the style collaboratively in France -- and the advent of WWI in the summer of 1914, Cubism became the most influential style in the international art world.

This course examines the development of Cubism in France, and it analyzes how artists throughout Europe and the world adapted Cubism for their own purposes. Of particular interest will be how artists from outside Europe and the United States have responded to Cubism's appropriation of non-Western art. Class format is lecture and discussion. Prerequisites: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

#### **L01 Art-Arch 388 Contemporary Art**

This course is a survey of global contemporary art from 1970 to the present. Topics include happenings, minimalism, body art, and neo-expressionism as well as their placement in their social and political contexts. Prerequisite: One course in Art History at the 100 or 200 level.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

---

#### **L01 Art-Arch 3884 Modern Design and Modern Culture**

This course explores key issues of modernity (industrialization, consumerism, mass culture, nationalism, etc.) through the study of material culture. Focusing primarily on modern design in Europe and North America from William Morris to Charles Eames and Aleksander Rodchenko to Bruce Mau, we will examine major developments in design thinking and practice as both reactive to and generative of broader political, economic, and social concerns. The course will be organized around important and influential exhibitions, from World's Fairs to storefront shows, where design professionals, institutions, and publics came together to reflect on topics of urgency, identify alternatives, and imagine the implications of design on everyday life.

Wherever possible, class discussions/lectures and assignments will make use of objects and archives in area collections. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215) or permission of instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

#### **L01 Art-Arch 3888 Museum Theory and Practice**

This course explores the history of fine art museums and related debates on the nature of collecting and modes of display. Using historical and theoretical texts as well as select case studies, we will focus on how the evolving structure and mission of the museum impact our understanding of art. Topics will include the Renaissance "cabinet of curiosities," the Salon controlled by the French Academy, the rise of the modern art museum, and the proliferation of contemporary curatorial strategies in today's global art world. In addition to the study of the history of exhibitions and the role of the museum, the course will investigate the various jobs and responsibilities that people hold within museums. Guest speakers will include members of the curatorial, publications, registration, education, and installation staff at the Mildred Lane Kemper Art Museum. We will also take advantage of exhibitions and permanent collection displays at the Kemper Art Museum, the Saint Louis Art Museum, the Pulitzer Foundation for the Arts, and the Contemporary Art Museum. Prerequisite: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

---

#### **L01 Art-Arch 3892 Modern Sculpture: Canova to Koons**

This course will survey sculpture in Europe and the United States from about 1800 to the present, with an emphasis on the period from 1890 to 1980. A rapid traverse of Neoclassicism, Realism, and the rage for statuary during the later 19th century will take us to the work of Rodin and to a more systematic exploration of developments in the sculpture of the 20th century. Particular emphasis will also be placed upon the work of Brancusi, Picasso, Matisse, Duchamp, Giacometti, Oppenheim, David Smith, Serra, Morris, Judd, Hesse, and Bourgeois. An important theme running through the course as a whole -- from an age of nationalism and manufacturing to our own time of networks and information -- is the changing definition of sculpture itself within its social and political context. We will also explore various new artistic practices (e.g., video, performance, installations, body art) and interrogate their relationship to sculptural tradition and innovation. Prerequisite: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

---

#### **L01 Art-Arch 3961 Art & Ecology**

This course provides an overview of the twentieth-century history and contemporary debates concerning art and ecology. It begins with the nuclear age in the postwar United States and the Pacific, on through the techno-utopian "hippie modernist," Land Art, and early ecological movements of the 1960s. We situate contemporary "eco art" within this longer historical context, as well as climate science and politics. This course takes a case study approach, with one "key" artwork each class period, around which we will build context and trace relevant connections. Students will be responsible for identifying key artworks and articulating their significance on the exams. We will also locate eco art discourse within our St. Louis context, undertaking a site-specific project during the course of the semester. Undergraduate Prerequisites: one introductory Art History course or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

#### **L01 Art-Arch 3972 Alterna-Art**

Can contemporary art be truly alternative? What does the term even mean, when the channels for distributing art are available to all? This course will present a survey of art created outside of institutions and official channels. Students will be exposed to a variety of different media, from graffiti and muralism to performance and Internet art. The

course will also deal with questions of agency, "authenticity," and co-optation of street art by commercial means. Classes will consist of a hybrid lecture/discussion format, with weekly readings. Prerequisites: Intro to Western, Intro to Modern or permission of the instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

#### **L01 Art-Arch 3973 New Media, New Technologies**

In the summer of 2013, Random International's "Rain Room" was installed at the Museum of Modern Art in New York. Lines to experience the sensation of being rained on without getting wet ranged up to seven hours at times. This merging of new technology with the gallery space proved irresistible, but it also raises questions as to the uses of technology in contemporary art and whether or not this could be much more than a gimmick. As one Yelp reviewer put it, "The Rain Room is definitely an experience. Let's be honest... I'm mostly upset that I didn't get a cool, new Facebook profile pic out of it." This course will consider technological developments in modern and contemporary art -- including photography, video and new media, and digital and Internet art -- as well as forays into new technology that blur the lines between art and science. Prerequisite: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

#### **L01 Art-Arch 3975 Art and Activism**

This course will examine political and social activism in art and visual culture, focusing on the role that visual representation has played in social movements and how artists/activists have employed visual media to challenge and resist dominant visual representations and political formations. We explore key theoretical developments in activist discourse as well as the role of art practices and aesthetic commitments in these developments. This course seeks to represent the development of the relation of art and activism in its broadest intellectual and cultural context within the 20th century and to encourage an appreciation of the complex array of disciplinary perspectives that are implicated in this development. Prerequisite: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, CPSC, HUM BU: HUM EN: H

---

#### **L01 Art-Arch 4000 Topics in Art History and Archaeology**

Prereqs: L01 113, L01 215; one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

#### **L01 Art-Arch 4002 The Decorative Aesthetic in Modernism, 1860-1960**

In the criticism of modern art, "decoration" and "decorative" have often been used as pejorative terms, designating art that has no intellectual basis but is merely pleasing, intended to fill space and delight the eye. However, in the late 19th century, these terms carried important cultural value and opened the door to significant experiments in abstraction. Moreover, the decoration of a public space or surface may have political implications. This course will investigate decoration and theories of "the decorative" in modern art in Europe and the United States, with special attention paid to the evolution of ideas of modernism in both two-dimensional and three-dimensional environments. We will also consider some of the political meanings that may be borne by both public mural painting and domestic decoration as well as easel painting that aspires to conditions of the decorative. Key figures include Puvis de Chavannes, Morris, the Nabis, Van de Velde, Monet, Matisse, the Mexican muralists, Pollock, and Shapiro. Prerequisites: L01 215; any 300-level course in Art History; or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM EN: H

---

**L01 Art-Arch 4013 The Digital Art Historian**

Within the digital humanities, it has often been asserted that art history lags behind other disciplines when it comes to technology adoption. But in fact, art historians are among the earliest adopters of technologically mediated academic practices, though the breadth of methodologies utilized within the digital humanities are not always suitable to or capable of fully accommodating the added layer of visual culture intrinsic to art history. While this course will explore all of the significant facets of the digital humanities and how they can be adapted to art history, it also more broadly aims to create technologically astute and nimble students and future professionals capable of "learning to learn" technologies as they emerge; determining when and how a technology may be useful in research, scholarship, instruction, and other professional work; assessing both data and the tools that represent it with a critical mind; and understanding how to effectively apply technology in a broad range of academic and professional contexts.

Credit 1 unit. A&S IQ: HUM Arch: HUM Art: AH, HUM EN: H

---

**L01 Art-Arch 4015 Theories of Modern Art and Architecture**

This course will present theories of art and architecture from the 19th to the 21st centuries in their historical contexts through a set of in-depth investigations of selected topics. Some knowledge of history and theory is integral to contemporary understandings of the disciplines of art, art history, and architecture. To foster a historical understanding of theories of modern art and architecture, we will discuss a selection of key texts, divided into three sections: theoretical sources of modern art and architectural history in the 19th century; theories of modernism, from the formalist to the Marxist; and postmodern critiques of modernism, in such areas as feminist theory and poststructuralism. Class visits to Sullivan and Adler's Wainwright Building (1890-91), Saarinen's Arch at the Jefferson National Expansion Memorial (completed 1964), Ando's Pulitzer Foundation for the Arts (2001), and Maki's Kemper Museum of Art (2006) will be integral to the work of the course. Prerequisite: Either L01 113 or L01 215 plus any 300-level course in art history, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 4045 Beyond Painting: Innovation in Prints and Sculpture in Early Modern Europe**

Prints and sculpture are frequently overlooked in the study of early modern European art, yet the issues they raise are critical to our understanding of the period. Both categories, too often seen as secondary to painting, entail frequently complex technical and intellectual innovations that were fundamental to their time. This course will focus on these two important media in order to offer a fuller and richer picture of how artists of the Renaissance and baroque periods reinterpreted and expanded their visual vocabularies in response to, and in participation with, changing technologies and ideologies. Beyond Painting is based on direct interaction with works of art with the aim of facilitating enhanced looking and evaluation skills essential to the study of art history. Held at the Saint Louis Art Museum, each session will focus on the Museum's collection as well as the objects in the exhibition "Learning to See: Renaissance and Baroque Masterworks from the Phoebe Dent Weil and Mark S. Weil Collection." Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM EN: H

---

**L01 Art-Arch 4230 The Reception of Egypt in the Graeco-Roman World**

Ancient Greeks and Romans found Egypt to be an exceptionally enthralling world, in terms not only of its physical features but also of its people, monuments, and traditions. This course will explore how different views of Egypt emerged in the Graeco-Roman world; it will

also investigate the possible reasons for the remarkable popularity and allure of Egypt and things Egyptian as reflected in the writings of Greek and Roman authors as well as in the art and architecture of the Mediterranean world in Classical antiquity. In this seminar, we will read primary literary sources (in translation) that focus on the reception of ancient Egypt and, more specifically, its history, religion, and customs. Several of these sources also offer a privileged viewpoint to investigate how the perception of notable Egyptian figures -- chiefly Cleopatra -- was shaped by Rome to suit a specific agenda. In addition to the written sources, we will look at the artistic and archaeological evidence that best showcases the impact of Egypt's legacy on Graeco-Roman traditions. The readings assigned for each class will also provide a broad sample of secondary sources, consisting of some of the most significant scholarship on the image of Egypt in Classical antiquity. Same as L08 Classics 4230

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

**L01 Art-Arch 4235 Rome in Egypt: The Archaeology of an Oasis City**

This seminar will focus on the results of the archaeological fieldwork carried out at Trimithis / Amheida, a Graeco-Roman city in Egypt's Western Desert. It will investigate the available documentary and archaeological evidence, including a wealthy house with paintings inspired by Classical themes, a public bath built in the Roman tradition, a rhetorical schoolroom, pyramid-shaped Roman tombs, remains of a temple, and one of the earliest churches discovered in Egypt so far. We will explore how this evidence compares with that from neighboring sites in Egypt's Western Desert as well as in the Nile Valley. The goal is to develop an appreciation and understanding of Romano-Egyptian architecture, Classical and late antique art in Egypt, and Egypt's religious, social, and cultural history. Students will also have the opportunity to familiarize themselves with notions of archaeological methods and practice, as adopted in the context of an Egyptian excavation project. Prerequisites: One course at the 100- or 200-level in Art History, Classics, or Archaeology recommended

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: IS EN: H

**L01 Art-Arch 428 The Invention of the Image: From Classical Art History to Modern Visual Studies**

The scholarly field of Image or Visual Studies has developed in response to the widespread proliferation of images, both still and moving, in contemporary life. It distinguishes itself from traditional art history by examining visual representations of all types, not only works of high art, and by concentrating on the role those representations play in the formation of culture. Though most of the scholarship produced in this field focuses on the modern world, it depends upon ideas first developed in Mediterranean antiquity. This course has two primary goals. We will conduct an historical examination of practices and theories of image making from Near Eastern antiquity to modernity. In so doing, we will also carry out an historiographical survey of the major works in Image/Visual Studies, thereby gaining an appreciation for the wide range of methods of inquiry employed in this important field of research. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN: H

### **L01 Art-Arch 429 Art and Death in Ancient Rome**

Perhaps more than any other phenomenon, death spurred the creation of art in the ancient Roman world. The practice of materially commemorating the deceased -- of perpetuating the memory of the dead through the creation of funerary monuments designed to appeal to both intimate familial relations and the public at large -- stretched across Roman social boundaries and endured for many centuries. But death also frequently provided the subject matter of art even outside the confines of the funerary realm. The goal of this course will be to explore the complex relationship between art and death in the Roman world. It will range from early Rome to the end of the empire and the changes brought about by widespread conversion to Christianity. In conjunction with historical readings, the course will also engage with theoretical texts in the anthropology and philosophy of death. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

### **L01 Art-Arch 4375 Ancient Greek Sculpture in Context**

Sculpture counts among one of the greatest artistic achievements of ancient Greece, and one that has had the greatest impact on the art of later periods. This course will focus on original works of art of the Archaic and Classical periods (600-300 BCE), placing emphasis on how study of their contexts - the places in which they were produced, displayed, and found - contributes to our understanding of their place in the ancient world. Background material, to be covered at the beginning of the semester, will include the origins of monumental Greek sculpture at the beginning of the Archaic period (late 7th-early 6th c. BCE), and the stylistic development of the Archaic and Classical periods. We will then proceed to discussion of various types of sculpture (architectural, cult statue, votive, commemorative, funerary) and how these works functioned within the context of the Panhellenic sanctuary, the city sanctuary, the secular center of the city, and the necropolis. In a different view of context, we will also consider sculpture recovered from ancient shipwrecks, looted art on its way to the ancient Roman art market. Prereqs: L01 331 or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

### **L01 Art-Arch 4376 Pictorial Illusion in the Ancient Mediterranean**

Among the many accomplishments in the history of Greco-Roman art, ancient writers especially valued the development of pictorial illusion. Pictorial illusion refers to the techniques of reproducing or approximating aspects of the visual perception of the material world on a two-dimensional surface. These include foreshortening, the application of highlights, and the indication of multiple points of depth in space relative to the picture plane. The purpose of the course is to explore the material, stylistic, and technical history of illusionistic painting practices in the ancient Mediterranean world from Classical Greece to Late Antique Rome and to seek to understand the cultural and social significance of those practices. In addition to examining specific historical questions in the development of ancient painting, the course will investigate trans-historical connections between vision, visuality, and methods of representation. Prerequisites: Either L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

### **L01 Art-Arch 439 Greek Art in Rome: Discourse, Dedication, and Reflection**

Throughout the modern period, Ancient Greek art has been perceived as a genuinely original and creative tradition in which both individual artists and regional schools made some of the most significant advances in the long development of European art. Roman art, by contrast, has been seen as derivative and secondary; Johann Joachim Winckelmann, the founder of modern art history, classified it among the "style of the imitators." However, this traditional dichotomy rests in large part on the Romans' own reactions to their encounters with the arts of Greece. Through the analysis of textual sources, architecture, statuary, and painting, this course will investigate the status and influence of Greek art in the city of Rome from the third-century BCE until the late Imperial period, and it will seek to understand how Roman responses to and uses of Greek art have come to shape the modern perception of both traditions. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred. Credit 3 units. A&S IQ: HUM Art: CPSC, GFAH, HUM BU: HUM EN: H

---

### **L01 Art-Arch 4395 Rome: The First 2,000 Years**

Weaving together the ancient and the early modern, this course offers students an overview of the history, topography, art, and architecture of the city of Rome. Rome has been continuously inhabited for more than three millennia, and its urban fabric both reveals and conceals a unique history of occupation, destruction, reconstruction, revival, and excavation. The course will move between the ancient and Renaissance periods of Roman history, and will examine the city's most important and lasting contributions to the history of art and architecture. It will center especially around a week-long trip to Rome over Spring Break, during which students will present on-site research reports. The trip, and the course as a whole, will be limited to fourteen students. Flights, lodging, ground transportation and two meals will be paid for by the Department's West Bay View Travel Seminar endowment. Travel plans are subject to change due to changing pandemic restrictions. The course is limited to graduate students, majors, and possibly minors in the Department of Art History & Archaeology, and admission is contingent on an interview with the faculty shortly after registration. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH EN: H

---

### **L01 Art-Arch 444 The Forbidden City**

Home to 24 emperors of the Ming and Qing dynasties (1368-1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of premodern architecture in China. This seminar examines the origins of the palace; its construction in the early Ming; the coded symbolisms of its plan and decoration; the rituals of court; and the lives of its denizens, from emperors (including Pu Yi, the "last emperor") to concubines and from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and a backdrop to major political events, as well as its role in the urban design and contemporary art of 21st-century Beijing. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred. Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH, HUM BU: HUM, IS EN: H

---

### **L01 Art-Arch 4482 Japanese Prints: Courtesans, Actors and Travelers**

Woodblock prints of the 18th and 19th centuries and their relationship to literature and popular culture. Topics include the life of the pleasure quarters, sexuality and the "erotic," parody, kabuki theater, and the representation of women. Prerequisite: 3 units in Japanese painting, or permission of instructor. Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

---

---

**L01 Art-Arch 4489 The Three Emperors: Redefining Chinese Art in the Golden Age**

Ruling imperial China during its last Golden Age, the Qing emperors Kangxi, Yongzheng, and Qianlong patronized the arts during an unprecedented period of prosperity and international exchange. Many of the works they commissioned are now icons of Chinese culture, but in their time these three Manchus redefined Chinese art with ideas and styles from Baroque Europe, Tibet, Mongolia, and even Islamic Central Asia. This seminar focuses on the ethnically and culturally diverse art, architecture, and material culture patronized by these three emperors to examine how they and their multi-ethnic empire changed the definition of Chinese art during the long eighteenth century. Prerequisites: Intro to Asian Art (L01 111); or one 300-level course in Asian Art History, History or Literature; or permission of instructor. Credit 3 units. A&S IQ: HUM, LCD EN: H

---

**L01 Art-Arch 4490 Art, Vision, and Science in China**

After China and Europe began sustained contact, the introduction of Western science, math, and technology often affected Chinese art more than anything else. New optical devices and ways of visually understanding the world produced a range of positive and negative responses. Often expressed in art, these works demonstrate how new ideas affected Chinese conceptions of vision, looking, cognition, and visibility. Covering the seventeenth through mid-twentieth centuries, this course discovers how Chinese art became entwined with vision and modern science, covering prints, paintings, objects, and photographs across medicine, astronomy, cartography, optics, and mathematics. Prerequisite: L01-111, one course in Art History or Asian Studies, or permission of instructor. Credit 3 units. A&S IQ: HUM, LCD Arch: HT Art: AH

---

**L01 Art-Arch 4494 East, Meet West: Asia Encounters Europe**

This seminar, which is grounded in cross-cultural aesthetics, examines East Asian visual responses to European art and science from the 16th through 19th centuries. The same Western ideas and works that were first introduced by Jesuit missionaries, that were continued by merchants, and that culminated with colonial enterprises left very different impressions on China and Japan. An introduction to cross-cultural aesthetics from both Western and East Asian perspectives lays the theoretical foundation to engage these works of art before the course proceeds thematically through time to cover painting, cartography, woodblock prints, ceramics, and photography within transregional and transcultural contexts. One upper-level course in Art History is recommended but not required before taking this course. Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

---

**L01 Art-Arch 4496 Porcelain and Lacquer Abroad: Europe Encounters Asia**

From 1500 to 1800, Europeans primarily used exported porcelains and lacquers to engage with China and Japan, which were neither under colonial control, nor easily accessible by travel. Collected first in *kunstkammern* by rulers and nobles as emblems of power, these initially rare, exotic luxuries retained their prestige even as they became more widely available and explicitly gendered. Combining deep object studies with collectors' case studies from across Europe, this course examines how early modern Europeans used porcelains and lacquers to satisfy their curiosity about and material desire for China and Japan. In addition to practical training in essential primary sources such as inventories, it will also introduce theories of luxury and consumption, gift exchange, cross-cultural interaction, material culture, and the global movement of objects. Prerequisites: L01 111 preferred; one art history course or permission of instructor. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

---

**L01 Art-Arch 4615 Caricature: The Culture and Politics of Satire**

This course examines the golden age of caricature. Beginning with the prints of William Hogarth, we will look at the caricatural traditions in France and England from the late 18th century through the early 20th century. Special emphasis will be placed on visual satire as a vehicle for social and political critique; on theories of humor (particularly Baudelaire and Bakhtin); and on the development of a mass market for this imagery. Other figures to be discussed include Rowlandson, Cruikshank, Daumier, Gavarni, Philipon, and Gil. We will take advantage of a major collection of French caricature in the Mildred Lane Kemper Art Museum at Washington University as well as collections available for study in Olin Library and at the Saint Louis Art Museum. Prerequisites: L01 113, L01 215, or a 300-level course in modern European history or literature; or permission of instructor. Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 4616 Lasting Impressions: Early Modern Print Culture**

The advent of movable type (the Gutenberg press) in western Europe heralded a new era, and this enabled the dissemination of information in text and image that was fundamental to the Renaissance and early modern culture in all sorts of ways, not least artistic. Alongside the use of the printing press for public ends, the early modern era witnessed some of the most remarkable artistic achievements in relief (woodblock) and intaglio (copper plate) printmaking. This seminar will study a series of charged moments in the production and consumption of printed artefacts, attending to the aesthetic, material, and epistemological significance of printed images between roughly 1480 and 1650. We will focus on the printed works of artists Lucas van Leyden, Albrecht Dürer, Marcantonio Raimondi, Hercules Segers, and Rembrandt as well as the role of printed images in the sciences. A variety of media and techniques—from early stipple engravings to chiaroscuro woodcuts and from *Naturselbstdruck* to sugar-lift—populate the course, as do theories of impression and the role of prints in transcultural, early modern global encounters. Students in this seminar will be directly involved in research towards an exhibition at the St. Louis Art Museum co-curated by Dr. Swan and Dr. Elizabeth Wyckoff, Curator at SLAM, slated for spring 2024. Class meetings will take place in the Study Room at the museum, where students will have ongoing access to works in the collection and discussions with museum professionals. Prerequisites: One 300-level art history course \*and\* permission of the instructor. Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

---

**L01 Art-Arch 4621 Leonardo da Vinci**

Leonardo da Vinci is universally recognized to be one of the greatest artists of all time. But who was Leonardo? Artist or scientist? Master, magus or myth? This seminar explores the reality and fiction of a fascinating, yet enigmatic genius, as well as placing this unique individual in the contexts of Renaissance Italy and the modern imagination. Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM EN: H

---

**L01 Art-Arch 4624 Michelangelo**

An examination of the life and works of Michelangelo. The most important developments in his architecture, painting, and sculpture; with special attention to his assistants, friends, family, and contemporaries. Prerequisite: Permission of instructor. Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM EN: H

---

**L01 Art-Arch 4625 Venice**

A seminar focusing on the art of Venice, in particular on Bellini, Giorgione, and Titian. Special attention to the international reputations of these three artists and to problems of patronage, connoisseurship, and interpretation. PREREQUISITE: ART-ARCH 361 or 362, OR PERMISSION OF THE INSTRUCTOR.

Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

---

**L01 Art-Arch 4629 Caravaggio: Master and Murderer**

Michelangelo Merisi (Michael Angelo Merigi or Amerighi) da Caravaggio (29 September 1571 - 18 July 1610) was one of the most important and influential painters of the Seventeenth Century, in Italy and throughout Europe. He was active in Rome, Naples, Malta, and Sicily between ~1592 and 1610. But who was Caravaggio? What do we really know about his tempestuous life, and how it factors in the art he created? Caravaggio was a powerful, brilliant, brutish, and hugely influential artist; a belligerent personality, brawler, and murderer. He was a man of contradictions: a devout Christian and bi-sexual sodomite; a Knight of Malta and a fugitive from the law. This seminar explores the reality and fiction of this fascinating and influential genius, and places him in his historical, social and artistic contexts -- from Baroque Italy to the modern imagination. Prerequisites: L01 113; one 300-level course in Art History; and permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HT Art: AH, GFAH BU: IS EN: H

---

**L01 Art-Arch 4652 Worldly Goods: Early Modern Art, Trade, Knowledge, Possession**

The history of the early modern era has in recent decades been reconceived and rewritten as a history of things and goods. Global trade vectors in particular have shaped new histories of the Renaissance and Baroque eras. Material goods -- many of them newly available on a global scale -- shaped aesthetics, scientific investigation, political relations, identity formation, and devotional practices. This seminar studies the circulation of worldly goods between approximately 1500 and 1700, charting encounters around the globe by studying objects and persons in circulation. In orientation, the seminar is European, with a focus on the Dutch Republic in the world. Through secondary source readings and encounters with primary source materials, students will gain an understanding of how early modern objects relate to a newly "global" economy and horizon. Works of art, luxury trade goods, and pirated treasures are the principal sorts of "worldly goods" under consideration. We will consider the movement of individuals and the slave trade in the context of early modern colonialism as well as how the biographies of objects involve shifts in status and value over geographical space and time. Prerequisites: L01 113 and one 300-level course in Art History or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

---

**L01 Art-Arch 4662 Michelangelo the Architect**

When, why, and how did the great Renaissance sculptor, painter, and poet Michelangelo Buonarroti become an architect? This seminar will survey Michelangelo's built and unbuilt architecture, his methods and extant drawings, and the process and influence of his creations.

Credit 3 units. Art: AH

**L01 Art-Arch 467 Topics in Baroque Art**

Credit 3 units. Art: AH BU: HUM

---

**L01 Art-Arch 4675 Picturing Race in the Early Modern World**

Many social and cultural roots of modern Western European and American conceptions of race and ethnicity lie in the early modern era, when enslavement came integrally to be linked with Blackness and conceptions-and representations-of power relied on a hierarchical politics of racialization and othering. Throughout the early modern era, in Renaissance and Baroque visual art, iterations of racialized identity took hold, in ways and by means this seminar will explore in depth. Through close analysis of paintings, sculptures, architectural and urban design, and the graphic arts, and with frequent reference to chronicles, literature, and legal language of the time, we will trace visual representations of racialized difference throughout the early modern

(European) world and to the present. How did early modern European images participate in and help to form a visual culture of race? This seminar will explore fifteenth-, sixteenth- and seventeenth-century European representations of racialized others by artists Albrecht Dürer, Hans Burgkmair, Hieronymus Bosch, Peter Paul Rubens, Rembrandt van Rijn, and others. We will also consider ethnographic imagery, maps, and other forms of representation-as well as responses by contemporary (20th- and 21st-century) artists to the conventions of "race-crafting" laid down in the early modern era. Geographically, the materials we study issue from western Europe and focus on encounters with Western Africa, but the seminar considers European engagement in the American colonies, Melanesia/Indonesia, the Atlantic and Brazil- and with the Islamic world. Prerequisites: One 300-level course in Art History or permission of the instructor

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: AH, HUM EN: H

---

**L01 Art-Arch 4677 Early Modern Art, Science, Collecting**

Encyclopedic or microcosmic early modern collections also known as Wunderkammers or Cabinets of Curiosities brought together all manner of artifact and natural object, and offered an arena for aesthetic contemplation and natural historical or scientific investigation alike. A space of knowledge-production and a highly socialized domain as well, the early modern collection responded to and activated the senses; some called the sorts of objects assembled in Wunderkammers-rhinoceros horns, ivory lathework carving, resins and gems, instruments, feather work, paintings, and carved coconuts and shells set in elaborate filigree-"sensualities." This seminar examines early modern collections in Spain and Portugal, at Hapsburg and Medici courts, and in Dutch and Flemish cities. Intended as both an introduction to the ways in which the practices of art and science depended on and informed one another in the early modern period in Europe, this seminar will also offer students the opportunity to engage with and make interventions in an ongoing scholarly discussion about art, science, wonder, and the social order of objects in early modern Europe. Prerequisites: One 100- or 200-level course, and one 300-level course in Art History; or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM EN: H

---

**L01 Art-Arch 4721 Hydrogen Jukebox: American Art and Culture, 1945-1960**

The rise and 'triumph' of Abstract Expressionism has long dominated the story of American art following World War II. This new seminar will put Abstract Expressionism into context with parallel developments in the arts, photography, and film. Among the topics we will consider: the conversation between émigré artists and American culture during and after the war; the emergence of a 'noir' aesthetic in film and literature; the early work of Jasper Johns and Robert Rauschenberg and the so-called 'aesthetic of indifference' in relation to Ab. Ex.; artistic collaborations at Black Mountain College; New York school photography and photojournalism; and the cultural impact of the A bomb. PREREQUISITES: A 300-LEVEL COURSE ON 20TH CENTURY ART, PHOTOGRAPHY, OR HISTORY, OR PERMISSION OF THE INSTRUCTOR.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN: H

---

**L01 Art-Arch 473 Art and Culture in Fin-de-Siècle America**

The particular climate of the fin-de-siècle and its expression in art, architecture, and letters. Concurrent development in Vienna, Paris, and London as basis for comparison. Themes include new theories of mind and perception, the fate of rationalism, the "crisis in bourgeois values," and redefinitions of gender. Prerequisite: permission of instructor.

Credit 3 units. Art: AH

---

**L01 Art-Arch 4744 TransAmerica: The United States and Mexico Between the Wars**

Many areas of 20th-century U.S. culture between World Wars I and II were inspired by postrevolutionary Mexico. The Mexican Revolution (1910-1917) profoundly reoriented modern Mexico, introducing new cultural and aesthetic forms and historical themes over subsequent decades. Mexican artists contributed to a new national consciousness drawing on indigenous Mexico and on the new politics of workers and peasants, which were given monumental expression in mural painting. The bidirectional exchange between U.S. and Mexican artists was of great importance for the cultural revitalization of the New Deal and after in the United States. Among artists, writers, anthropologists, and tourists, the vogue for things Mexican was fed by many sources, including increasing travel, diplomatic exchange, and a yearning for alternatives to U.S. modernity. This seminar will support travel to Mexico City, funded by the Department of Art History and Archaeology. Students in this course must be graduate students or undergraduate majors or minors in Art History and Archaeology or Latin American Studies. Recommended prerequisite courses include one 300- or 400-level course in 20th-century U.S. art or history or one relevant course in the Latin American Studies program.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: IS EN: H

---

**L01 Art-Arch 4745 Cahokia to Contemporary: Native American Arts, Past(s) and Future**

The arts of Native American communities demand a primary place in both American and global art histories. The historic depth, variety of cultural expression, and circumstances of the collection, exhibition and interpretation of native arts continue to demand our careful and critical attention. We are well situated in St Louis to consider both the indigenous artistic cultures of our own region, and to observe the vitality of native modern and contemporary art practice. Key concerns include the artists' relationship to space and place, their presentation of identities, politicized and activist dimensions of their practices, their negotiation of issues of race and gender, and their conscious relationships to both historic traditions and to contemporary culture. Through the study of local collections and special exhibitions on view in 2023, we will examine a significant range of works--from the Mississippian cultures exemplified by the nearby sites of Cahokia and Sugar Loaf Mound, to the collection of historic materials we will study at the Kemper Art Museum, to the modern and postmodern works on view locally by such artists as Fritz Scholder, Edgar Heap of Birds, Juane Quick-to-See Smith, Faye HeavyShield, Wendy Red Star, Rose Simpson, and others. Class field trips to Cahokia, to the CounterPublic Triennial in St. Louis, and on a spring weekend to Washington DC to visit the National Museum of the American Indian are funded by a generous grant from the Mark S. Weil and Joan M. Hall Endowment for Art History & Archaeology. Prerequisites: One 300-level course in Art History or permission of instructor

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: AH, HUM EN: H

---

**L01 Art-Arch 4746 California Dreamin': Los Angeles Culture and the Making of the 20th Century**

"California Dreamin'" delves into the many cultures of Los Angeles, a dynamic global city with its cultural origins in the early 20th century. Over its decades of development and transformation we will explore continuities and new directions. The region has always been an encounter zone: between indigenous cultures, colonizers from Mexico, Pacific rim, and Anglo settlers. How has this cultural richness taken different shapes over the course of the 20th century? LA offers an especially cogent site for understanding how a city with a very specific if layered urban identity has been constituted by and through representation. Over the semester we traverse a range of cultural texts--the arts and architecture, film, literature, and urbanism--where the image of the city has been shaped. The course asks how Los Angeles culture at various points struggled to find new articulations and avenues into the future, against the weight of its own defining histories.

A week-long trip to Los Angeles -supported through our dedicated travel fund in AHA-will give students an opportunity to see firsthand how the presentday city and its many sectors find expression in the arts and visual culture, or give evidence of different realities. Prerequisite: Minor or major status in AHA; Any course in 20th c. American arts, literature, or film. Or permission by instructor

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM EN: H

---

**L01 Art-Arch 475 The City in American Arts and Popular Culture**

From the mid-nineteenth century forward, artists, writers, sociologists, and cultural critics have identified the city as the primary site of a vast array of historical changes associated with modernization. This course will explore the range of cultural responses to the new 20th century city up to World War II. The American city was seen as both an incubator of difference, and of mass conformity and manipulation; a dynamic space in which to form fluid networks that catalyzed new forms of creativity, and a place of strangers and social alienation. We will trace the history of these polarized responses in the 20th century arts and literature of the city, looking at the vibrant popular culture of film, vaudeville, and cross-dressing; new aesthetic forms such as collage and expressionism; and new urban subjects. Prereqs: 300-level course in American 20th c. Cultural History, American Art, Literature, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, CPSC, GFAH, HUM BU: HUM EN: H

---

**L01 Art-Arch 4770 Native and Cosmopolitan Modernisms: American and European Art Between the Two World Wars**

This seminar focuses on two contrasting currents within American and European modernism between the two world wars: native and cosmopolitan. Alternating between the United States and France, the content of this course begins in the years before World War I and concludes with the rise of virulent forms of cultural nationalism during the late 1930s. We consider the subjects, personalities, aesthetic strategies, and political and social investments associated with these alternative modernisms, which are linked to a search for roots on the one hand and to a desire for forms of spatial and social mobility on the other. By comparing the "homegrown" and expatriate experiences, we will consider divergent attitudes toward identity, gender, nation, time, and nature, analyzing these two fundamental responses to modernity in relation to one another. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM, IS EN: H

---

**L01 Art-Arch 4774 The Age of Gatsby: American Art and Culture from World War I to the Great Crash**

Mass consumption and the expansion of mass culture; mechanization; and the birth of a new visual culture that turned on animation, advertising, photography, and film. Taking our cues from the cultural contradictions and historical tensions embedded in F. Scott Fitzgerald's great novel of 1925, and the 2013 film inspired by it, this seminar will trace what many at the time called the "Rediscovery of America" and its tribulations. American artists, writers, and cultural theorists embraced the possibilities and pitfalls of American modernity, the nation's mythic promise and its historical dilemmas in the face of growing commercialization and standardization. This seminar is an interdisciplinary look at the art, visual culture, music, literature, and cultural essays of the 1920s through the lens of nation, race, region, and cultural identit(ies). Prerequisite: 300-level 20th-century American art, history, or literature course, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 4776 The Arts of Cultural Democracy: America in the 1930s**

What does democratic access to the arts look like? Over the past decade the question of distributive justice has taken on new urgency in our nation. This seminar will look at an earlier period in the nation's history--the 1930s, from the stock market crash of 1929 to the beginning of World War II--when the ideal of cultural democracy was put into practice on a variety of fronts, from dance to the fine arts to public murals and the collecting and inventorying of the nation's material and cultural legacies. We will also consider the possibilities and limits of political art, the impact of John Dewey on future generations of artists and culture-makers; the relationship between leftist politics and modernism; regionalism and internationalism; debates over the nature of documentary photography, and efforts to create a 'useable past.' Prerequisite: one 300-level course in European or American twentieth-century art, literature, or cultural history; or permission of the instructor. Credit 3 units. A&S IQ: HUM, SC Art: AH, HUM EN: H

---

**L01 Art-Arch 4782 Modern Architecture in St. Louis**

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 4785 Art and Culture in 1920s America**

This interdisciplinary seminar examines the relationship between art and 1920s culture in the United States, including how artists and critics thought about the nature of our cultural heritage (both its rich possibilities and its limitations); the potential of technology and urbanization as well as the threats they pose to older cultural values; the nature of a multicultural society and the contributions of minority traditions to the evolution of American culture; the lure of the Southwest; early criticism of popular media; and the conversation between popular culture and high art. Prerequisite: L01 113 or permission of instructor. Credit 3 units. Art: AH

---

**L01 Art-Arch 4800 Roman Coins and Their Stories**

This course will provide insights into everyday life in Rome and its territories through the evidence of the coins minted from the Roman Republic until the collapse of the Western Roman Empire in AD 476 and beyond. We will discuss general numismatics, starting with the history of coins and coinage, and we will understand how these small objects became an intrinsic part of the Roman way of life and what evidence they provide for daily life in Rome, from ideology to religion and from politics and culture. Same as L08 Classics 480. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM EN: H

---

**L01 Art-Arch 481 Topics in Modern Art**

The sources, styles, influences, and content of the art of such artists as Gauguin and Cézanne examined in the context of contemporary movements in art and literature. Prerequisite: art history major, or permission of instructor. Credit 3 units. Art: AH

---

**L01 Art-Arch 4815 Constructing the Canons of Modern Art: 1860-1960**

From textbooks to museums to private collections, we experience histories of modern art through selections that present narratives of which art matters the most -- to artists, to critics, to the general public, and, supposedly, to history as a whole. How have established canons come to be, who are they for, and how do they resist or engage revision over time? This course examines narratives of modernism and its relationship to rhetorics of criticism, the power of the art market, sensationalized biographies, the practices of collectors and museums,

nationalistic interests, and histories of exclusion. Who rises to the top in significance? In what ways have women artists, artists of color, and LGBTQ artists been included or excluded? Key art critics and art historians include Fry, Barr, Pollock, Nochlin and Saslow. Artists may include but are not limited to Manet, Monet, Morisot, Cassatt, Van Gogh, Gauguin, Cézanne, Bell, Modersohn-Becker, Claudel, Tanner, Sickert, Valadon, Duchamp, Cahun, Picasso, Beckmann and Krasner. Students will research comparative case studies and create their own alternative timelines of modern art from 1870-1950. Prerequisites: L01 215, Intro to Modern Art; and one 300-level Art History course. Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, CPSC, GFAH, HUM BU: HUM, IS EN: H

---

**L01 Art-Arch 4816 Art and Culture in Fin-de-Siecle Europe**

This course presents an examination of painting, photography, and the decorative arts in France during the period between the two World's Fairs of 1889 and 1900. Artistic movements include Symbolism (Van Gogh, Gauguin, and Redon), later Impressionism (Monet and Morisot), Neo-Impressionism (Seurat and Signac), and Art Nouveau. Thematics include urban leisure and cafe culture, the agrarian ideal, the promises and threats of science and technology, the lure of the primitive, and the impact of nationalism and feminism on the arts. Prerequisites: L01 215 and any 300-level course in 19th-century art, literature, or history; or permission of instructor. Credit 3 units. Art: AH

---

**L01 Art-Arch 4817 Paris ca. 1900: Art, Leisure and Spectacle**

Paris at the turn of the 20th century was a vibrant international center for the development of the visual arts, including painting, photography, film, and the graphic arts, particularly in the exploding domains of posters and illustrated journals. In this seminar, we study the period from 1880 to 1910, and we examine how diverse modes of urban visuality were at the heart of the development of French modern art. The place of graphic arts in promoting popular entertainments (e.g., ballet, opera, café concerts) is considered. Another focus is the powerful role of Parisian satirical journals and caricature in debating matters of class, race, and national identity. We examine diverse modes of displaying and selling the visual arts, particularly in the spheres of World's Fairs, annual salons, and in the avant-garde spaces of gallery and café exhibitions. Artists of central concern include Lautrec, Cheret, Mucha, Degas, Pissarro, the Nabis, Vallotton, and early filmmakers such as the Lumière brothers and Méliès. Prerequisite: L01 215 or permission of instructor. One 300-level course in modern art history or a course in modern French history or literature is preferred. French language reading skills are not required. Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 4818 Matisse and Modernisms**

Certain artists generate enormous interest during their lifetimes and long after. Over time, the work of such artists is subjected to a variety of interpretive approaches in light of changing trends in art criticism and art history; the influence of contemporary art; the ebb and flow of interest in different aspects of the artist's production; changes in the political landscape; and the changing sense of how the artist's work intersects with contemporary cultural developments. This set of intersecting concerns is especially fluid in the modern period, when there is no single dominant idea of the role of art in society. The variety of interpretive strategies developed from and applied to the work of Henri Matisse demands a critical reading of the extensive literature on the artist as well as an understanding of the variety of modernisms through which to assess his artistic project. Students will gain a thorough familiarity with the work of one of the most influential artists of the 20th century, and they will engage aspects of the historiography of 20th-century art through a survey of developments in the Matisse literature. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 4819 The Century of Picasso**

The art of Pablo Picasso (1881-1973) spanned three-quarters of the 20th century, and posthumous critical response to his work shows no sign of abating. Picasso was a leading figure in the European primitivist trends at the beginning of the last century, and with Georges Braque, he developed the aesthetic system of Cubism, which rewrote the rulebook of artistic representation. Although he was not an activist, his art routinely engaged momentous political events. Toward the end of his career, he strove to shape his legacy through artistic dialogues with artists of the past by appropriating their styles or subjects, and making them his own. Such eclectic activity, coupled with his creativity and prolific output, has ensured his place among the most influential artists of his century. Prerequisites: one 300-level course in modern art or permission of instructor; junior, senior or graduate standing.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM EN: H

---

**L01 Art-Arch 4850 Romanticism to Realism: French Art 1830-1871**

This course traces the flourishing of romanticism and the emergence of various forms of Realism in nineteenth-century French modernism, opening with the Revolution of 1830. Artistic tendencies ranging from the official and the academic to emergent romantic and avant-garde alternatives are addressed, as well as the unresolved social and aesthetic tensions that support the demand for an art that addresses modern times. The political idealism and the rhetoric of Republicanism in the Second Republic (1848 to 1852) intertwine with the emergence of a critical modernism that seeks truth in form, in materiality, and in political philosophy. Under the authoritarian regime of the Second Empire (1852-1870), the mandates of realism and idealism continue to vie in a period that sees both the flourishing of the academic system and the art dealer system, and the emergence of a critical avant-garde. The course closes with the emergence of Impressionism and the crisis of the Franco-Prussian war. Artists to be discussed include Delacroix, Ingres, Millet, Daumier, Courbet, Corot, Manet, Bonheur, Bayre, Clesinger, and the early careers of Bazille, Degas, Monet, Renoir, Pissarro, Degas, Morisot and Cassatt. Pre-requisites: limited to graduate students in Art History); advanced undergrads only with permission of instructor. Some prior knowledge of French modernism required; some facility with French language useful but not required.

Credit 3 units. A&S IQ: HUM EN: H

---

**L01 Art-Arch 4854 Gauguin In Polynesia: The Late Career**

This seminar focuses on the late career of Paul Gauguin, in Tahiti and the Marquesas. This course examines closely the colonial context of fin-de-siecle French Polynesia, Gauguin's response to indigenous culture, his ongoing interests in European currents of theosophy and anarchism, the development of his primitivist style in response to the French avant-garde, and Gauguin's legacy to modern art and culture in the early twentieth century. Readings will range from primary texts (literature and journals read by the artist, his letters, his satirical articles and caricatures produced for a Tahitian newspaper, his treatises on religion), to post-colonial theory and recent critiques of primitivism. French reading skills are useful, but not required for the course. We will visit the St. Louis Art Museum to view both the Oceanic collection, and prints and paintings by Gauguin. PRE-REQUISITE: AT LEAST ONE UPPER-LEVEL COURSE IN MODERN ART HISTORY, OR PERMISSION OF THE INSTRUCTOR.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 4856 French Art and Politics in the Belle Epoque**

This interdisciplinary seminar addresses the rich intersection of politics, fine arts and visual culture in modern France from the Franco-Prussian War (1870) to the First World War (1914). We will study the political trends, historical events, and cultural conditions of the era, and their direct influence on the production and reception of a wide range of

visual arts, ranging from official paintings and monuments to popular culture such as tourist and documentary photography, commercial posters and political caricature. We also examine the question of what it meant in the Belle Epoque to be an avant-garde artist, and how such artists expressed political sentiment in their work. Prerequisites: permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 4859 Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000**

This seminar examines film and modern art within the framework of "Orientalism" Reading foundational texts by Said, and incorporating theory and historical discourse concerned with race, nationalism, and colonialism, we explore artistic practice in European photography, painting, and decorative arts from 1850 to recent times and European and Hollywood Film. We study how power and desire have been inscribed in western visual culture across the bodies of nations and peoples through conventions such as the harem, the odalisque, the desert, and the mysteries of ancient Egypt. To that end, we will look at artists such as Delacroix, Ingres, Gérôme, Beardsley, and Matisse and will screen films such as *The Sheik*, *The Mummy*, *Salome*, *Cleopatra*, *Pepe le Moko*, *Naked Lunch*, *Shanghai Gesture*, *Thief of Bagdad*, *Princess Tam Tam* and *The Sheltering Sky*. Subjects include the representation of gender, sexuality, desire, race, and identity as well as the cultural impact of stereotype and "exotic" spectacle. Students will study methods of visual analysis in film studies and art history. All students must attend film screenings. 3 credits Same as L53 Film 485

Credit 3 units. A&S IQ: HUM, LCD, SD EN: H

---

**L01 Art-Arch 4860 Van Gogh: Creativity, Mythology, and Commodity**

Among the most famous artists of the canon of European modern art is Vincent van Gogh, known for his expressive paintings, his famous letters that chart his tumultuous career, and a short creative life marked by intense work, passionate interests in the modern art and literature of his time, and the challenges of a mental illness. This seminar will examine his art and literature in three sections: the first devoted to studying the art itself throughout his short career; the second devoted to the mythologies surrounding his art and its relationship to such notions as genius and madness; and the third looking at how his art has become a popular commodity, reproduced internationally by methods varying from precise painted replicas to commercially popular goods marked with his most famous paintings. The history and theory of modern commodity culture on a global scale and its intersection with a burgeoning art market for postimpressionist art will be explored in this final section. Prerequisites: L01 113 or L01 215 and one advanced course in art history, or permission of the instructor

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM EN: H

---

**L01 Art-Arch 4861 Gauguin Then and Now: Art, Myth, and Controversy**

This course is an examination of the art and career of Paul Gauguin (1848-1903) and the artistic, social, and political milieu of colonialism in which he worked in France, Polynesia, and the Caribbean. Topics include avant-garde Impressionist and Symbolist cultures, the power of the art market/dealer system, the artist's writings (in translation), French colonial culture and pervasive myths of island paradise, and the pressing critiques offered today by postcolonial and feminist theory. The final third of the course will focus on the varied global reception of his work in the 20th and 21st centuries as well as controversies surrounding his art, writings, and legacies, particularly among

contemporary Pacific Islander artists and artists of color. We will consult local museum collections as possible and perhaps take a class trip to Chicago to see essential collections. Prerequisite: L01 215 or any 300-level course in art history, or permission of instructor.  
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM EN: H

---

**L01 Art-Arch 4863 The Photographic Muse: The Modern Artist and the Camera**

An examination of the interplay of photography with painting and sculpture in European art from 1850 to the First World War, with an emphasis on the fin-de-siècle. Readings address the history of the medium; the critical debates (starting with Baudelaire) over photography as a tool of science or of art; the rise of ethnographic photography; the Symbolist ambivalence toward technology; and the development of Pictorialism at the turn of the century. Artists to be studied include Nadar, Moreau, Degas, Rodin, Steichen, Gauguin, Munch, the Nabis, Brancusi and Picasso. Prerequisite, graduate standing.  
Credit 3 units. Art: AH

---

**L01 Art-Arch 4864 Exoticism and Primitivism in Modern Art**

An interdisciplinary investigation of the development of exoticism and primitivism in European and American Art from the Enlightenment to the Second World War. Topics include exoticist representations of non-western cultures; the links between colonialism and orientalism; the intersection of discourses on race and gender with exoticism; and the anti-modernist impulse of modernist primitivism. Sample artists and authors include Delacroix, Flaubert, Gauguin, LaFarge, Segalen, Picasso, and Matisse. PREREQUISITE: ANY 300 LEVEL COURSE IN ART HISTORY, PERMISSION OF THE INSTRUCTOR.  
Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 4867 The Impressionist Landscape: Style, Place and Global Legacies 1870-1920**

We will consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism, but soon expanded into an avant-garde style that objectified sensation and emotion in the name of truth in representation. We will examine the place of individual perception, the physiology of sight, and theories of the natural in the development of the Impressionist landscape, through the consideration of style, genre, artistic theory, and these artists' investment in particular sites. Furthermore, the social, commercial and critical networks that supported the movement will be analyzed. Particular attention will be given to Monet, and a special exhibition of his water lily paintings on view at the St Louis Art Museum. Other key artists include Degas, Morisot, Renoir, and Cassatt. We will also discuss the relationship of the Impressionist landscape to the development of modernist abstraction, and the aesthetic and nationalist motivations for its appropriation across the globe. Prerequisite: Introduction to Western Art; Introduction to Modern Art, or permission of instructor.  
Credit 3 units. A&S IQ: HUM, LCD Art: AH EN: H

---

**L01 Art-Arch 4868 Impressionism and the Nation in France and Beyond: Painting and Photography 1860-1920**

We will consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism, but expanded into an avant-garde style that objectified sensation and emotion in the name of truth in representation. Our central question will be the relationship of individual perception, the physiology of sight, and theories of the natural in relation to the importance of place-both region and nation -- in the political imagination of the era. We also address the relationship of the Impressionist landscape

to the development of modernist abstraction, and the aesthetic and nationalist motivations of its adaptation as a modernist style around the globe. Prerequisite: senior major in art history, or graduate student standing and permission of instructor.  
Credit 3 units. A&S IQ: HUM EN: H

---

**L01 Art-Arch 4869 Global Impressionism**

How and why Impressionism has achieved its global reputation -- both positive and negative, as well as the nuanced positions between those poles -- has not been thoroughly or systematically interrogated. However, this is precisely what this seminar proposes to do. This course maps the global dissemination, exhibition, reception, and publication of French Impressionism in tandem with the rise of local Impressionisms worldwide. Globalization must be understood as concomitant with localization. This course attends to especially critical exhibitions, publications, and places that must be understood to underscore that there always remains more work to be accomplished in the production of a truly global art history. It scrutinizes how the physical translation of French Impressionist art works foreshadowed, coincided with, and fostered its stylistic translation into local Impressionisms and its literary translation into histories of Impressionism. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: IS EN: H

---

**L01 Art-Arch 4877 Critical Studies in Portraiture, Ancient to Contemporary**

To study portraiture is to confront the complexity of human identity. The central theoretical question of this course is how identity can be expressed in a portrait. Following the consideration of theories of portraiture, identity, and artistic representation, we will treat specific historical and cultural instances of portrait-making, from ancient Greece to the present. Non-Western cultural examples will broaden the scope beyond the conventional conceptions of portraiture. We will conclude by trying to understand the continuing allure of the portrait today as digital media challenge our conventional ideas of visibility and perhaps even the urgency of portraiture in the post-human age. Prerequisites: L01 113 or L01 215; or permission of instructor. One 300-level course in art history preferred.  
Credit 3 units. A&S IQ: HUM Art: AH, GFAH EN: H

---

**L01 Art-Arch 4879 Marking History: Painting and Sculpture After World War II in the U.S., France, and Germany**

This seminar focuses on the aesthetic, cultural, and philosophical reactions to the devastating events surrounding World War II and its later reception. We consider artistic developments within a network of international exchange -- biennials as well as gallery and museum exhibitions -- in which France, Germany, and the United States participated equally within a field of visually similar aesthetic responses to a seismic shift in historical consciousness. What distinctive artistic languages emerged after the war to express transformations in historical consciousness and in older ideas about an unfettered subjectivity? In what ways did concepts of trauma with which we live today reshape collective memory and leave their trace on painting and sculpture? Looking at abstraction and semi-abstract works in painting and sculpture, we analyze the works of Jackson Pollock, Willem de Kooning, Alberto Giacometti and Jean Dubuffet, Wols, K.O. Götz, Emil Schuhmacher, and Hans Hartung. Students with reading skills in German or French are encouraged. Prerequisite: L01 215 or permission of instructor.  
Credit 3 units. A&S IQ: HUM EN: H

---

**L01 Art-Arch 4900 Independent Study and Research**

Credit variable, maximum 3 units.

---

### L01 Art-Arch 4905 Greenberg Curatorial Study

The Arthur Greenberg program offers undergraduate students the experience of curating an exhibition. A small team of two or three is selected through a competitive application process the year before enrollment in the course. Under the supervision of a faculty mentor in the Art History & Archaeology Department and a curator in the Mildred Lane Kemper Art Museum, students plan and curate an exhibition for the museum's Teaching Gallery. They also research and write a short brochure, prepare educational materials, and offer related programs for the exhibition, which usually opens in April. The fall 3-unit course fulfills a departmental capstone requirement for the major; 1 unit of additional course work is completed in the spring.

Credit variable, maximum 4 units. A&S IQ: HUM EN: H

---

### L01 Art-Arch 4914 Beyond Limits: Transgression, Controversy, and Censorship in Modern Art

This course will examine some of the public controversies that surrounded the development of modern art over the last 150 years to probe the question of the social and political functions of transgressive art. After reviewing key theories of the avant-garde, we analyze both the persona of the modern artist (e.g., Van Gogh, Picasso, Pollock) and the place of women artists in the revolutions of modernism (e.g., Cassatt, Hoch, Kahlo). A key issue to address is how modernism tests limits by asking what is (and is not) art (e.g., Duchamp, Brancusi). Some of the most controversial exhibitions in this time frame, from the Salon des Refusés in 1863 to *Mirroring Evil* in 2002, highlight the challenges raised by modern artists' treatment of the body. Controversies over public funding of contemporary art, debates waged over public art in St. Louis, and the recent episodes of iconoclasm with respect to Confederate monuments and memorials will close the course. Prerequisites: L01 215 and any 300-level course in Art History or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, CPSC, GFAH, HUM BU: HUM EN: H

---

### L01 Art-Arch 4918 Modern War in Art

Art and war have always been intertwined, whether in glory or revulsion. But modern art and modern war are qualitatively different from their counterparts in the past in ways that ensured that their relationship would become more problematic and oppositional. The challenge of finding new artistic languages to express the new conditions of mechanized combat led many artists to explore abstraction, fragmentation, absurdity or arbitrariness to convey the energy, impersonality and nihilism of modern war. When the British soldier and poet Wilfred Owen (1893-1918) wrote of the human devastation of World War I as "obscene as cancer, bitter as the cud," he strained for metaphoric language appropriate to its magnitude. We will consider the same challenge to visual artists throughout the modern period. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM EN: H

---

### L01 Art-Arch 4922 From the Death of the Author to the Birth of YouTube: Identity in Contemporary Art

What constitutes an artist today, when anyone can upload his or her musings to the entire world? Is the question even relevant? This course will introduce students to the construction of artistic identity in contemporary art. Students will consider major themes governing the production of contemporary art. We will cover such topics as the death of the author and the end of art, identity politics and "authenticity," and the effects of new media on the construction of artistic persona. This course assumes a basic familiarity with the methods of art history, as well as general knowledge of art history before 1960. Prerequisites: Introduction to Western Art or Introduction to Modern Art and one 300-level course in art history, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

### L01 Art-Arch 4923 Globalization and Contemporary Art

What does globalization mean for contemporary art? And what do we even mean when we use the term? This upper-level seminar course considers recent art (1985-present) in the context of theories of development, postcolonialism, and globalization. We will focus on the tensions between the global and the local, as well what it means for an artist to be national or international. We will also consider the impact of neoliberal economic policies on art production and the art market, as well as role museums play in this international context. Finally, we will consider the Internet and social networks as globalizing influences that affect the production and distribution of contemporary art. Prerequisites: Introduction to Western Art or Introduction to Modern Art and one 300-level course in art history, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM EN: H

---

### L01 Art-Arch 4924 1968 and Its Legacy

The events of 1968 -- including the May riots in Paris, the Tucuman Arde exhibition in Argentina, the Tlatelolco Massacre in Mexico City, and the Prague Spring (and Russian winter) in the Czech Republic, just to name a few -- ushered in a new political and social imperative for artists. This course will start with 1968 and trace its legacy to the social and cultural movements of the 1980s, 1990s, and early 2000s. We will seek to understand the historical underpinnings of contemporary activist art and determine the roles of socially motivated art in the current political and intellectual climate. Prerequisites: L01 113; L01 215; or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, CPSC, GFAH, HUM EN: H

---

### L01 Art-Arch 4926 Contemporary Art of the U.S.-Mexico Border and Beyond

The question of the materiality of borders has attained new urgency with the resurgence of nationalist and anti-globalist movements. Calls for a "big, beautiful wall" on the U.S.-Mexico border are but one striking example of this phenomenon. A wall, a fence, a line, or a zone may focus attention on a narrow space, but it does so at the expense of broader narratives of structural inequality, the lingering violence of colonialism, and the rapid scale of climate change. The simplicity of a barrier is a particularly damaging fiction, one that avoids examinations of the larger forces that divide us. This upper-level and graduate seminar will delve into the history of "border art" as a category -- whether public art, sculpture, installation, new media, or performance -- using the U.S.-Mexico border as an extended in-depth case study. Analysis will not be limited to this region, as the course encourages a comparative approach that places disparate regions into dialogue with each other. In addition, we will also consider the issue of divides and borders locally, within the St. Louis area and its suburbs. Prerequisites: Intro to Western Art or Intro to Modern Art, plus one 300-level course in Art History.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, CPSC, GFAH, HUM BU: HUM, IS EN: H

---

### L01 Art-Arch 4930 Picturing the Anthropocene: Landscape, Land Art, and Eco Art

Without a doubt, questions concerning environmental crisis and the habitability of our planet are among the most pressing of our time. This course will cover the history of 19th-century landscape and its legacy today, the 1960s Land Art movement and its relationship to modern environmentalism, and the nuances of contemporary eco art. In addition, we will go in depth into some of the most prolific media within eco-art, including photography and film, and we will explore the contemporary debates specific to these fields. There will be a required field trip to the Western U.S. desert (UT, NV) to visit key sites of land art prior to the start of classes (4-5 days, approximately the third week of August). Possible visits may include Spiral Jetty, Sun Tunnels, Double Negative, Las Vegas Piece and the Center for Land Use Interpretation.

The trip will be limited to eight students. Flights, lodging, ground transportation and some meals for graduate students and majors in the Department of Art History and Archaeology will be paid for by the West Bay View Travel Seminar endowment. Travel plans are subject to change due to changing pandemic restrictions. The course is limited to graduate students, majors, and possibly minors in art history and archaeology. Prerequisites: L01 113, Intro to Western Art; plus one 300-level Art History course.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: HUM EN: H

---

**L01 Art-Arch 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories**

This seminar examines the theory and the cultural history of the collecting of art objects and artifacts from a range of cultures and periods, and it considers how and why both individuals and institutions create collections. What social and psychological factors drive this passion? What are the various cultural, political, and aesthetic priorities that have driven this practice historically? How is cultural patrimony defined, and how do law, the art market, and cross-cultural ethics impact the placement, study, and display of a culture's material heritage? We will build the seminar around the history of collecting in America, with a focus on Midwestern examples and particularly important case studies in St. Louis. We will consider, for example, the significant local collections built by Joseph and Emily Rauh Pulitzer (modern art) and Morton May (modern and Oceanic art), as well as the histories of both modern European and non-Western collections now owned by St. Louis-area museums. This course will be complemented by various local field trips, including to the Saint Louis Art Museum, the Pulitzer Arts Foundation, the Mildred Lane Kemper Art Museum, and Cahokia Mounds State Historic Site. Prerequisites: L01 113; L01 215; or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 4977 Mapping Art, Race, & Community in the US-Mexico Borderlands**

This upper-level undergraduate seminar will delve into the history of "border art" as a category, whether in terms of public art, sculpture, installation, new media, or performance, using the U.S.-Mexico border as an extended in-depth case study. Students will collaborate to add to an ongoing mapping project of community engaged art on the border and create multimedia materials to augment or interpret the data as they see fit. As such, this course builds Digital Humanities practices and methodologies throughout the semester. Students in the course will also work to map race and population data along with their chosen artworks. In doing so, the course challenges students to think beyond U.S.-centric concepts of race and ethnicity and explore how the "third space" of the border shapes artistic practices and approaches to community. Prerequisites: One introductory Art History course or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L01 Art-Arch 4982 Public Art: History, Practice, Theory**

The course will consider the history and functions of public art, with special attention to public art in St. Louis. We will survey not only the obvious forms of public art in urban sculpture and mural painting but also less traditional intersections of art and public in such sites as the internet. We will also examine the operations of institutions -- national and local arts agencies, international exhibitions, nonprofit centers and the like -- that foster a public engagement with contemporary art. Finally, we will consider new priorities and projects in public art, especially socially oriented and environmentally sustainable initiatives. Prerequisites: L01 113, Intro to Western Art; or L01 215, Intro to Modern Art; one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 499 Honors Art History and Archaeology**

A major research paper acceptable to the department. Prerequisite: permission of the department. Max. 6 units.

---

**L01 Art-Arch 5000 Topics in Art History: Rethinking Matisse**

Prereqs: L01 113, L01 215; one 300-level course in Art History preferred; or permission of instructor.

Same as L01 Art-Arch 4000

Credit 3 units. A&S IQ: HUM Art: AH EN: H

---

**L01 Art-Arch 5001 Writing Intensive Topics: The Age of Augustus: Ancient Rome from Republic to Empire**

TBD

Same as L01 Art-Arch 3001

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

---

**L01 Art-Arch 505 Graduate Internship in the St. Louis Art Community**

Graduate students will work on advanced research projects under the joint supervision of a curator at the Saint Louis Art Museum or the Mildred Lane Kemper Art Museum and a Washington University faculty member. Prior agreement on a research project and internship duties required. Permission of instructor required.

Credit variable, maximum 3 units.

---

**L01 Art-Arch 510 Graduate Seminar: Methods in Art History**

The purpose of this seminar is to introduce graduate students to some of the most important methodological approaches to the study of works of art. Students will acquire an enhanced understanding of these methods in historical terms as well as insight into how such methods can be applied in the research questions posed by art historians today. The course may include guest presentations by a range of faculty in the department. Prerequisite: Graduate standing in Art History and Archaeology.

Credit 3 units.

---

**L01 Art-Arch 513 The Digital Art Historian**

Within the humanities, the perceptions exists that art history lags behind other disciplines when it comes to technology adoption. And while the "digital humanities" are now widely embraced, the definition of the field remains mutable and even contested. Is it practical, theoretical, or a combination of approaches and methodologies? This course operates under the premise that what constitutes digital art history is less about rigid interpretations and practices, and more about creating a technologically astute and nimble professional capable of "learning to learn" technologies as they emerge; determining when and how a technology may be useful in research, instruction, and other professional work; and understanding how to effectively apply technology in a broad range of contexts. "The Digital Art Historian" will emphasize experiential learning through the use of digital tools and analysis of a range of digital projects, grounded in a rubric of critical reflection. By the end of the course, students will have a significantly more thorough understanding of how to be an art historian in an increasingly digital world. Meets for 8 sessions, typically held every other week. Prereq: Graduate standing in Art History and Archaeology Dept.

Credit 1 unit.

**L01 Art-Arch 5212 Art and Archaeology of Cleopatra's Egypt**

This course is an introduction to the art and archaeology of Egypt from its conquest by Alexander the Great (332 BCE) to the early fourth century CE. It will examine the rich and multi-faceted history and artistic legacy of Egypt under the Ptolemies and their last queen Cleopatra, followed by the Roman conquest under Emperor Augustus up to the flourishing of Egyptian Christianity. Students will become familiar with a wide range of ancient sources, including documentary and literary texts, coins, architecture, paintings and sculpture. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215), or permission of instructor.

**L01 Art-Arch 5230 The Reception of Egypt in the Graeco-Roman World**

Ancient Greeks and Romans found Egypt to be an exceptionally enthralling world, in terms not only of its physical features but also of its people, monuments, and traditions. This course will explore how different views of Egypt emerged in the Graeco-Roman world; it will also investigate the possible reasons for the remarkable popularity and allure of Egypt and things Egyptian as reflected in the writings of Greek and Roman authors as well as in the art and architecture of the Mediterranean world in Classical antiquity. In this seminar, we will read primary literary sources (in translation) that focus on the reception of ancient Egypt and, more specifically, its history, religion, and customs. Several of these sources also offer a privileged viewpoint to investigate how the perception of notable Egyptian figures -- chiefly Cleopatra -- was shaped by Rome to suit a specific agenda. In addition to the written sources, we will look at the artistic and archaeological evidence that best showcases the impact of Egypt's legacy on Graeco-Roman traditions. The readings assigned for each class will also provide a broad sample of secondary sources, consisting of some of the most significant scholarship on the image of Egypt in Classical antiquity.

**L01 Art-Arch 5235 Rome in Egypt: The Archaeology of an Oasis City**

This seminar will focus on the results of the archaeological fieldwork carried out at Trimithis / Amheida, a Graeco-Roman city in Egypt's Western Desert. It will investigate the available documentary and archaeological evidence, including a wealthy house with paintings inspired by Classical themes, a public bath built in the Roman tradition, a rhetorical schoolroom, pyramid-shaped Roman tombs, remains of a temple, and one of the earliest churches discovered in Egypt so far. We will explore how this evidence compares with that from neighboring sites in Egypt's Western Desert as well as in the Nile Valley. The goal is to develop an appreciation and understanding of Romano-Egyptian architecture, Classical and late antique art in Egypt, and Egypt's religious, social, and cultural history. Students will also have the opportunity to familiarize themselves with notions of archaeological methods and practice, as adopted in the context of an Egyptian excavation project. Prerequisites: One course at the 100- or 200-level in Art History, Classics, or Archaeology recommended

**L01 Art-Arch 526 Archaeology of Roman Slavery**

Slavery was a fundamental part of the ancient Roman world. In this course, we will survey various ways in which the institution of slavery played a critical role in shaping Roman society. Through an exploration of social, economic, legal, and cultural aspects of Roman slavery, we will pose questions of what it means to be a slave society, how the ubiquity of forced labor impacted the lives of ancient Romans, and the extent to which we can recover the experiences and subjectivities

of enslaved people. Throughout the course, we will confront the interpretive problems posed by biased and/or scarce evidence and by assumptions we may carry as the inheritors of modern slaveries. A recurring theme we will explore is the extent to which evidence of slavery and the material traces of enslaved people's lives are visible in the archaeological record. At the end of the term, we will contextualize Roman slavery by comparing it with modern examples and by considering the legacy of ancient slavery in modern visual culture and representations of enslaved people. Prerequisites: Any 100- or 200-level course in art history or archaeology; or permission of instructor.

**L01 Art-Arch 5330 Greek and Roman Painting**

This course provides a survey of the major achievements of ancient Greek and Roman painting, broadly understood and encompassing wall painting, panel painting, painted pottery, and mosaic. We will study monuments ranging over a millennium in time and located throughout the ancient Mediterranean. Particular attention will be paid to the social, political, and religious aspects of ancient Greco-Roman painting and to questions of innovation in artistic practice. Special emphasis will be placed on students' cultivation of the tools of art-historical analysis and of the presentation of that analysis in written form. Prerequisite: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215) or permission of instructor.

**L01 Art-Arch 5415 Early Chinese Art: From Human Sacrifice to the Silk Road**

How does ancient and medieval Chinese art inspire contemporary artists? This course examines Chinese art, architecture, and material culture from the prehistoric period through the end of the medieval Tang dynasty to demonstrate how the past continues to affect contemporary Chinese art and the art of its future. Topics covered include Neolithic ceramics and jades, the early bronzecasting tradition, the Terracotta Army and its predecessors, early brush arts and Buddhist sites, and the varied exotica of the Silk Road. Each class teaches early and contemporary works side by side to demonstrate how artists today continue to look to the past as they create the art of the future.

Prerequisite: One course in Art History at the 100 or 200 level or permission of instructor.

### L01 Art-Arch 5422 Art of the Islamic World

This course surveys the art and architecture of societies in which Muslims were dominant or in which they formed significant minorities from the seventh through the 20th centuries. It examines the form and function of architecture and works of art as well as the social, historical, and cultural contexts; patterns of use; and evolving meanings attributed to art by the users. The course follows a chronological order, and selected visual materials are treated along chosen themes. Themes include the creation of a distinctive visual culture in the emerging Islamic polity; the development of urban institutions; key architectural types such as the mosque, madrasa, caravanserai, palace, and mausoleum; art objects and the art of the illustrated book; cultural interconnections along trade and pilgrimage routes; and Westernization and modernization in art and architecture.

### L01 Art-Arch 5444 The Forbidden City

Home to 24 emperors of the Ming and Qing dynasties (1368-1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of premodern architecture in China. This seminar examines the origins of the palace; its construction in the early Ming; the coded symbolisms of its plan and decoration; the rituals of court; and the lives of its denizens, from emperors (including Pu Yi, the "last emperor") to concubines and from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and a backdrop to major political events, as well as its role in the urban design and contemporary art of 21st-century Beijing. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

### L01 Art-Arch 5533 Pilgrimage and the Medieval City

In this course we will explore one of the primary ways people traversed Europe and beyond: pilgrimage. Specifically, this course will explore the material culture of pilgrimage in the context of the urban environment, considering the role of art in guiding, encouraging, and visualizing pilgrimage to and through some of the important religious centers in the medieval Christian world. We will begin in Jerusalem and move outwards to Constantinople as a gateway to holy sites across the Byzantine Empire. We will then move to Paris and London to

explore the different ways that pilgrimage could be undertaken, both physically and in the mind's eye. Finally, we will move to the conceptual, considering how the Heavenly Jerusalem was manifested in art and architecture across the medieval world. This course will investigate this subject through engagement with primary sources, object-focused study, and visits to the Saint Louis Art Museum. The overarching goal is to foster strong critical reading and thinking skills, while also developing specialized knowledge in the history of medieval art. Emphasis will lie in critical interpretation and analysis, in engaging in rigorous class discussion, and in writing coherently at a high academic level. Prerequisite: any 100- or 200-level course in art history

Same as L01 Art-Arch 3533

### L01 Art-Arch 5549 The Art of Mexico: From Aztec to Contemporary

This survey course draws from selected examples of art and architecture to tell the changing story of Mexico. Beginning with the Aztec and ending with contemporary works, this course chronologically traces artistic manifestations of beliefs, politics, and placemaking. Through movements, revolutionary moments, individuals, and trends, the course creates a portrait of Mexico that is multicultural, dynamic, and creative. Course themes include international relationships, diversity, identity, and politics. Prerequisites: L01 113, Intro to Western Art; L01 215, Intro to Modern Art; L45 165; or permission of instructor. ### L01 Art-Arch 5602 Italian Renaissance and Baroque Architecture

This course will survey the development of architecture in Italy from 1400 to 1700. From long-established medieval models, we will explore the reintroduction and reinterpretation of Antiquity from the late 14th century onward. The course will then explore how these foundational Renaissance ideals evolved to become Mannerism and found their ultimate expression in Bernini's Baroque. Following a chronological progression, the course will address the structures and theories of the period through its leading architects: Brunelleschi, Alberti, Michelangelo, Palladio, and Bernini, among others. The course will explore a wide range of architectural types, from the centralized church to private palaces and villas. Further themes to be considered will include the development of the architect as a professional, regional styles and their relationship with antiquity, patterns of patronage, and the interior. Prerequisite: L01 113.

### L01 Art-Arch 5616 Lasting Impressions: Early Modern Print Culture

The advent of movable type (the Gutenberg press) in western Europe heralded a new era, and this enabled the dissemination of information in text and image that was fundamental to the Renaissance and early modern culture in all sorts of ways, not least artistic. Alongside the use of the printing press for public ends, the early modern era witnessed some of the most remarkable artistic achievements in relief (woodblock) and intaglio (copper plate) printmaking. This seminar will study a series of charged moments in the production and consumption of printed artefacts, attending to the aesthetic, material, and epistemological significance of printed images between roughly 1480 and 1650. We will focus on the printed works of artists Lucas van Leyden, Albrecht Dürer, Marcantonio Raimondi, Hercules Segers, and Rembrandt as well as the role of printed images in the sciences. A variety of media and techniques—from early stipple engravings to chiaroscuro woodcuts and from *Natureselfdruck* to sugar-lift—populate the course, as do theories of impression and the role of prints in transcultural, early modern global encounters. Students in

this seminar will be directly involved in research towards an exhibition at the St. Louis Art Museum co-curated by Dr. Swan and Dr. Elizabeth Wyckoff, Curator at SLAM, slated for spring 2024. Class meetings will take place in the Study Room at the museum, where students will have ongoing access to works in the collection and discussions with museum professionals. Prerequisites: One 300-level art history course \*and\* permission of the instructor

#### **L01 Art-Arch 5627 By Sea and Sand: Modern Art in the Mediterranean**

This course surveys the representation of Mediterranean spaces and cultures in the visual arts from the late eighteenth to the mid-twentieth century during which time transformations across economies, governance, society, and technology took place alongside the expansion and subsequent deterioration of French and British colonial rule in the Middle East and North Africa. In this course, the modern Mediterranean will be viewed from multiple vantage points along its shores and through a range of media, including popular culture, visual culture, material culture, and fine art. In addition to obtaining a strong grasp of the artistic phenomena associated with the Mediterranean during the modern era, students will come to understand the region as a place possessing a remarkably diverse and polymorphous identity, and as a place of fracture, confrontation, mutual incomprehension, innovation, and exchange.

#### **L01 Art-Arch 5634 Pleasure and Pain: European Fashion as (Art) History**

In the words of Louis XIV, "Fashion is the mirror of history. It reflects political, social and economic changes, rather than mere whimsy." This course will survey the history of dress in early modern Europe, using art and material culture to explore the relationship between society and style. Beginning with the Renaissance, we will explore what fashion in (art) history can tell us about gender, sexuality, class, race, and revolution. To incorporate a global perspective (although concentrating primarily on the West), further themes to be considered include the textile trade, commerce and empire, identity politics, and nation-building. From the chopine to the corset, the pannier to the Pompadour pump, we will incorporate surviving examples as we explore the art and history of European fashion from the 15th to the early 19th century. This course is open to students who have previously taken or are currently enrolled in Intro to Western Art. Prerequisite: One course in Art History at the 100 or 200 level.  
Same as L01 Art-Arch 3634

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: BA, HUM, IS EN: H

---

#### **L01 Art-Arch 5652 Worldly Goods: Early Modern Art, Trade, Knowledge, Possession**

The history of the early modern era has in recent decades been reconceived and rewritten as a history of things and goods. Global trade vectors in particular have shaped new histories of the Renaissance and Baroque eras. Material goods -- many of them newly available on a global scale -- shaped aesthetics, scientific investigation, political relations, identity formation, and devotional practices. This seminar studies the circulation of worldly goods between approximately 1500 and 1700, charting encounters around the globe by studying objects and persons in circulation. In orientation, the seminar is European, with a focus on the Dutch Republic in the world. Through secondary source readings and encounters with primary source materials, students will gain an understanding of how early modern objects relate to a newly "global" economy and horizon. Works of art, luxury trade goods, and pirated treasures are the principal sorts of "worldly goods" under consideration. We will consider the movement of individuals and the slave trade in the context of early modern colonialism as well as how the biographies of objects involve shifts in status and value over geographical space and time. Prerequisites: L01 113 and one 300-level course in Art History or permission of instructor.  
Same as L01 Art-Arch 4652  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

---

#### **L01 Art-Arch 5654 Baroque Art: Materiality and Experience**

The materiality of art is evident-and central to how art looks, how it means, and how it endures. This course is intended as an introduction to the materiality of objects and works of art made during the Baroque era (c. 1550-1700) and to concepts for understanding and interpreting them. Works in a variety of materials-ivory, wax, woods, feathers, shells and mother-of-pearl, oil paint, lacquer, metal, fresco, stone, porcelain and earthenware-populate a series of case studies drawn from European, Mesoamerican, and East Asian workshops. In addition to learning about what goes into making these works, students will trace the geographies of materials, and the ways in which materials, format, and durability all affect the viewer's experience. Students will read, analyze, and discuss current research on the makings of art, on theories of the materiality of art, and problems in art conservation-and will participate in close examination of works in local museums and special collections. This course will introduce students to some of the central topics in early modern art history as it is practiced by scholars/historians \*and\* by archaeologists, museum curators, archivists, and conservators. Students will be introduced to a wide data set of objects and art works, and will learn how to analyze, articulate, discuss, and research aspects of their materiality. Rather than focusing on memorization, this course encourages using concepts from a set of assigned readings to reflect on the objects we discuss together. Students will work in small groups and as a class to advance their own vocabulary for and understanding of early modern materiality and experience. Prerequisites: L01 113, L01 215, or permission of instructor  
Same as L01 Art-Arch 3654  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM EN: H

---

#### **L01 Art-Arch 5682 Mirrors of Nature, Dreams of Art: Northern Renaissance Art**

This course surveys the visual culture of the Netherlands and Germany from approximately 1400 to 1550: from Burgundian court culture around the time of Jan van Eyck to the fantastic works of Hieronymous Bosch to the international renown of imperial artist Albrecht Durer and later Flemish urban culture as represented by Pieter Brueghel the Elder. Works in a variety of media will be presented in light of broader consideration of the role of art within devotional practice and the

Reformation, courtly culture and the cultivation of artistic imagination, and the rise of print and "popular" culture. We will consider the power of images to mediate religious experience; the representation of folly and death; the social position of the artist; and the relevance of naturalism. We will also survey the predominant interpretive models that have been developed to analyze the significance of these works. Prerequisite: One course in Art History at the 100 or 200 level.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: GFAH, HUM BU: HUM, IS EN: H

---

### L01 Art-Arch 5683 Global Baroque: Art and World-Making

Europe and along Eurasian contact routes between 1500 and 1700 is a primary focus. The course will open with an examination of the significance of the early modern category of "the exotic" and the role of the exotic or foreign in shaping artistic and collecting practices during a period that tends to be studied with Europe at the center of the world. Throughout the semester, we will explore different modalities of "otherness," and the political stakes of representations of self and other within the context of early modern empire- and nation-building. We will analyze paintings, prints, drawings, sculptural objects, naturalia, featherwork, ceramics, porcelain, and textiles alongside primary sources, early modern history and art history, cultural and material history, the history of science, and maritime and diplomatic history. The course attends to the atrocities of slavery in the early modern world and trace the relationship of enslavement to procuring and appreciation of exotic materials. Lectures will incorporate contemporary art (installations, photography, collage, and painting) that actively engages the modern era. The course involves close study of works of art in local collections, and will include visits to the Saint Louis Art Museum, where students will be introduced to the extraordinary holdings, in particular the Phoebe Dent Weil and Mark S. Weil collection of early modern prints, drawings, and sculpture. Prerequisites: One 100- or 200-level course in Art History; or permission of the instructor

Same as L01 Art-Arch 3683

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, HUM BU: HUM, IS EN: H

### L01 Art-Arch 5684 Picturing Race in the Early Modern World

Many social and cultural roots of modern Western European and American conceptions of race and ethnicity lie in the early modern era, when enslavement came integrally to be linked with Blackness and ideas-and representations-of power relied on a hierarchical politics of racialization and othering. Throughout the early modern era, in Renaissance and Baroque visual art, iterations of racialized identity took hold, in ways and by means this seminar will explore in depth. Through close analysis of paintings, sculptures, architectural and urban design, and the graphic arts, and with frequent reference to chronicles, literature, and legal language of the time, we will trace visual representations of racialized difference throughout the early modern (European) world and to the present. How did early modern European images participate in and help to form a visual culture of race? This seminar will explore fifteenth-, sixteenth- and seventeenth-century European representations of racialized others by artists Albrecht Dürer, Hans Burgkmair, Hieronymus Bosch, Peter Paul Rubens, Rembrandt van Rijn, and others. We will also consider ethnographic imagery, maps, and other forms of representation-as well as responses by contemporary (20th- and 21st-century) artists to the conventions of "race-crafting" laid down in the early modern era. Geographically, the materials we study issue from western Europe and focus on encounters with Western Africa, but the seminar considers European engagement in the American colonies, Melanesia/Indonesia, the Atlantic and Brazil-and with the Islamic world. Prerequisites: One 100-level Art History course or permission of the instructor

### L01 Art-Arch 5720 Hydrogen Jukebox: American Art and Culture, 1945-1960

The rise and 'triumph' of Abstract Expressionism has long dominated the story of American art following World War II. This new seminar will put Abstract Expressionism into context with parallel developments in the arts, photography, and film. Among the topics we will consider: the conversation between émigré artists and American culture during and after the war; the emergence of a 'noir' aesthetic in film and literature; the early work of Jasper Johns and Robert Rauschenberg and the so-called 'aesthetic of indifference' in relation to Ab. Ex.; artistic collaborations at Black Mountain College; New York school photography and photojournalism; and the cultural impact of the A bomb. PREREQUISITES: A 300-LEVEL COURSE ON 20TH CENTURY ART, PHOTOGRAPHY, OR HISTORY, OR PERMISSION OF THE INSTRUCTOR. Same as L01 Art-Arch 4721

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN: H

### L01 Art-Arch 5746 California Dreamin': Los Angeles Culture and the Making of the 20th Century

"California Dreamin' delves into the many cultures of Los Angeles, a dynamic global city with its cultural origins in the early 20th century. Over its decades of development and transformation we will explore continuities and new directions. The region has always been an encounter zone: between indigenous cultures, colonizers from Mexico, Pacific rim, and Anglo settlers. How has this cultural richness taken different shapes over the course of the 20th century? LA offers an especially cogent site for understanding how a city with a very specific if layered urban identity has been constituted by and through representation. Over the semester we traverse a range of cultural texts--the arts and architecture, film, literature, and urbanism--where the image of the city has been shaped. The course asks how Los Angeles culture at various points struggled to find new articulations and avenues into the future, against the weight of its own defining histories. A week-long trip to Los Angeles -supported through our dedicated travel fund in AHA-will give students an opportunity to see firsthand how the presentday city and its many sectors find expression in the arts and visual culture, or give evidence of different realities. Prerequisite: Minor or major status in AHA; Any course in 20th c. American arts, literature, or film. Or permission by instructor

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM EN: H

---

### L01 Art-Arch 5763 Bodymorph: Fantasy Worlds of American Visual Culture, Animation, and Product Design

This lecture and discussion-based course engages students in media beyond the fine arts, which shaped in fundamental ways how ordinary Americans experienced life during decades of dynamic change and modernization over the first half of the 20th century. We consider cartooning and animation, film, advertising, product design, department stores and the visual strategies of consumer culture, jazz aesthetics, the skyscraper city, and more. We set these new forms within broad changes in the rhythms of everyday life driven by industrialization and new technologies, as well as how filmmakers, animators, and artists both expressed these new realities, as well as how they turned in response to the handmade, the "primitive," and the embodied. We look at the uneasy exchanges between high art and mass media; and at the open borders between surrealism, advertising, and art. Prerequisites: Any introductory or 300-level course in Art History or American Culture Studies, History, or literature

Same as L01 Art-Arch 3763

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM EN: H

---

**L01 Art-Arch 5783 The Modernist Project: Art in Europe and the United States, 1905-1980**

This course surveys major tendencies in painting and sculpture, from Fauvism in France and Expressionism in Germany to the beginnings of Postmodernism in photo-based work in the United States. About two thirds of the course will treat European art, and about one third will treat American art. Photography, architecture, and work in other forms will be considered selectively when pertinent to the individual class topics. Within the lecture topics, emphasis is on avant-garde innovation; the tension in modernist art between idealism and critique; reaction by artists to current events; the relationship between art and linguistics, philosophy, literature, economics, and science; the role of geopolitics in art production; the intersections of art and society; the role of mass culture; issues of race and gender in the production and reception of art; and the challenge to the concept of authorship and creativity posed by Postmodernism at the end of this period. Prerequisite: One course in Art History at the 100 or 200 level. Same as L01 Art-Arch 3783  
Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM EN: H

---

**L01 Art-Arch 5785 Photography in America**

This course will consider the practice and use of photography in America, from its invention up to the present, and it will offer various ways of thinking about the medium and its relation to society and culture. Students will come to understand the ways photographic practices shape public perceptions of national identity, ethnicity and gender, nature, democratic selves, and a host of other concerns. We will discuss famous practitioners such as Matthew Brady, Jacob Riis, Lewis Hine, Walker Evans, and Robert Frank. We consider not only the social and public uses of the medium (through such episodes as the New Deal/FSA and photojournalism) but also the private explorations of "fine art" photographers and the everyday practices of the snapshot. Prerequisite: One course in Art History at the 100 or 200 level. Same as L01 Art-Arch 3785  
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN: H

---

**L01 Art-Arch 5815 Rococo to Revolution: Art in Eighteenth-Century Europe**

The Long Eighteenth Century serves as a bridge between two fundamentally different times. The Europe of 1700 was dominated by absolutism and the ancien régime. The Europe of 1800 was in an age of revolution. This course will explore the dramatic shift in artistic representation and individual self-conception that occurred throughout the century to usher in our modern age. Important topics to be considered include: the rise of the Academy; the Enlightenment and the Encyclopédie; the Grand Tour; Art and Science; and the French Revolution. Focusing on the development of artistic trends, the course will address transformations in painting, sculpture and architecture throughout Europe. Same as L01 Art-Arch 3815  
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

---

**L01 Art-Arch 5860 Van Gogh: Creativity, Mythology, and Modern Art**

Among the most famous artists of the canon of European modern art is Vincent van Gogh, known for his expressive paintings, his famous letters that chart his tumultuous career, and a short creative life marked by intense work, passionate interests in the modern art and literature of his time, and the challenges of a mental illness. This seminar will examine his art and literature in three sections: the first devoted to studying the art itself throughout his short career; the second devoted to the mythologies surrounding his art and its relationship to such notions as genius and madness; and the third looking at how his art has become a popular commodity, reproduced internationally by methods varying from precise painted replicas to commercially popular goods marked with his most famous paintings. The history and theory of

modern commodity culture on a global scale and its intersection with a burgeoning art market for postimpressionist art will be explored in this final section. Prerequisites: L01 113 or L01 215 and one advanced course in art history, or permission of the instructor  
Same as L01 Art-Arch 4860

---

**L01 Art-Arch 5875 Rejecting Reason: Dada and Surrealism in Europe and the U.S.**

In this multimedia interdisciplinary course, we will consider the history, theory, and practice of Dada and Surrealism, from its Symbolist and Expressionist roots at the end of the 19th century and the beginning of the 20th century through its late expressions in the beat culture and pop art of the 1950s and 1960s. Dada's emergence in Zürich and New York in the midst of World War I set the tone for its stress on irrationality as an oppositional strategy. Surrealist research into the domain of the unconscious continued this extreme challenge to dominant culture but in a revolutionary spirit that proposed new possibilities for personal and collective liberation. The international character of the movements -- with substantial cross-transmission between Europe and the United States -- will be emphasized. Prerequisites: L01 113, Intro to Western Art; L01 215, Intro to Modern Art; or permission of instructor. Same as L01 Art-Arch 3875  
Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM EN: H

---

**L01 Art-Arch 588 Contemporary Art**

This course is a survey of global contemporary art from 1970 to the present. Topics include happenings, minimalism, body art, and neo-expressionism as well as their placement in their social and political contexts. Prerequisite: One course in Art History at the 100 or 200 level. Same as L01 Art-Arch 388  
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

---

**L01 Art-Arch 5892 Modern Sculpture**

This course will survey sculpture in Europe and the United States from about 1800 to the present, with an emphasis on the period from 1890 to 1980. A rapid traverse of Neoclassicism, Realism, and the rage for statuary during the later 19th century will take us to the work of Rodin and to a more systematic exploration of developments in the sculpture of the 20th century. Particular emphasis will also be placed upon the work of Brancusi, Picasso, Matisse, Duchamp, Giacometti, Oppenheim, David Smith, Serra, Morris, Judd, Hesse, and Bourgeois. An important theme running through the course as a whole -- from an age of nationalism and manufacturing to our own time of networks and information -- is the changing definition of sculpture itself within its social and political context. We will also explore various new artistic practices (e.g., video, performance, installations, body art) and interrogate their relationship to sculptural tradition and innovation. Prerequisite: L01 113, L01 215, or permission of instructor. Same as L01 Art-Arch 3892  
Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

---

**L01 Art-Arch 5914 Beyond Limits: Transgression, Controversy, and Censorship in Modern Art**

This course will examine some of the public controversies that surrounded the development of modern art over the last 150 years to probe the question of the social and political functions of transgressive art. After reviewing key theories of the avant-garde, we analyze both the persona of the modern artist (e.g., Van Gogh, Picasso, Pollock) and the place of women artists in the revolutions of modernism (e.g., Cassatt, Hoch, Kahlo). A key issue to address is how modernism tests limits by asking what is (and is not) art (e.g., Duchamp, Brancusi). Some of the most controversial exhibitions in this time frame, from the Salon des Refusés in 1863 to *Mirroring Evil* in 2002, highlight the challenges raised

by modern artists' treatment of the body. Controversies over public funding of contemporary art, debates waged over public art in St. Louis, and the recent episodes of iconoclasm with respect to Confederate monuments and memorials will close the course. Prerequisites: L01 215 and any 300-level course in Art History or permission of instructor.

Same as L01 Art-Arch 4914

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, CPSC, GFAH, HUM BU: HUM EN: H

---

### L01 Art-Arch 5918 Modern War in Art

Art and war have always been intertwined, whether in glory or revulsion. But modern art and modern war are qualitatively different from their counterparts in the past in ways that ensured that their relationship would become more problematic and oppositional. The challenge of finding new artistic languages to express the new conditions of mechanized combat led many artists to explore abstraction, fragmentation, absurdity or arbitrariness to convey the energy, impersonality and nihilism of modern war. When the British soldier and poet Wilfred Owen (1893-1918) wrote of the human devastation of World War I as "obscene as cancer, bitter as the cud," he strained for metaphorical language appropriate to its magnitude. We will consider the same challenge to visual artists throughout the modern period. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Same as L01 Art-Arch 4918

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM EN: H

---

### L01 Art-Arch 595 Qualifying Papers for the MA degree

Every student fulfilling the requirements of the MA degree in the Department of Art History and Archaeology will prepare two Qualifying Papers (QP), each 25-30 pages. Together the QPs will constitute the capstone experience of the MA degree, and a demonstration of potential for more advanced graduate work. Prereq: Art History graduate status in good standing.

Credit 3 units.

---

### L01 Art-Arch 5961 Art & Ecology

This course provides an overview of the twentieth-century history and contemporary debates concerning art and ecology. It begins with the nuclear age in the postwar United States and the Pacific, on through the techno-utopian "hippie modernist," Land Art, and early ecological movements of the 1960s. We situate contemporary "eco art" within this longer historical context, as well as climate science and politics. This course takes a case study approach, with one "key" artwork each class period, around which we will build context and trace relevant connections. Students will be responsible for identifying key artworks and articulating their significance on the exams. We will also locate eco art discourse within our St. Louis context, undertaking a site-specific project during the course of the semester. Undergraduate Prerequisites: one introductory Art History course or permission of the instructor.

Same as L01 Art-Arch 3961

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L01 Art-Arch 5973 New Media, New Technologies

In the summer of 2013, Random International's "Rain Room" was installed at the Museum of Modern Art in New York. Lines to experience the sensation of being rained on without getting wet ranged up to seven hours at times. This merging of new technology with the gallery space proved irresistible, but it also raises questions as to the uses of technology in contemporary art and whether or not this could be much more than a gimmick. As one Yelp reviewer put it, "The Rain Room is definitely an experience. Let's be honest... I'm mostly upset that I didn't get a cool, new Facebook profile pic out of it." This course will consider technological developments in modern and contemporary

art -- including photography, video and new media, and digital and Internet art -- as well as forays into new technology that blur the lines between art and science. Prerequisite: L01 113, L01 215, or permission of instructor.

Same as L01 Art-Arch 3973

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L01 Art-Arch 5975 Art and Activism

This course will examine political and social activism in art and visual culture, focusing on the role that visual representation has played in social movements and how artists/activists have employed visual media to challenge and resist dominant visual representations and political formations. We explore key theoretical developments in activist discourse as well as the role of art practices and aesthetic commitments in these developments. This course seeks to represent the development of the relation of art and activism in its broadest intellectual and cultural context within the 20th century and to encourage an appreciation of the complex array of disciplinary perspectives that are implicated in this development. Prerequisite: L01 113, L01 215, or permission of instructor.

Same as L01 Art-Arch 3975

Credit 3 units. A&S IQ: HUM Art: AH, CPSC, HUM BU: HUM EN: H

---

### L01 Art-Arch 5977 Mapping Art, Race, & Community in the US-Mexico Borderlands

This upper-level undergraduate seminar will delve into the history of "border art" as a category, whether in terms of public art, sculpture, installation, new media, or performance, using the U.S.-Mexico border as an extended in-depth case study. Students will collaborate to add to an ongoing mapping project of community engaged art on the border and create multimedia materials to augment or interpret the data as they see fit. As such, this course builds Digital Humanities practices and methodologies throughout the semester. Students in the course will also work to map race and population data along with their chosen artworks. In doing so, the course challenges students to think beyond U.S.-centric concepts of race and ethnicity and explore how the "third space" of the border shapes artistic practices and approaches to community. Prerequisites: One introductory Art History course or permission of the instructor.

Same as L01 Art-Arch 4977

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

## Art History and Archaeology Major Program Requirements

- **Total units required:** 30 (33 for those students undertaking Senior Honors)

The Department of Art History & Archaeology welcomes students who wish to pursue a major in Art History & Archaeology. Students who declare the major must satisfy the requirements listed below to qualify for graduation.

## Introductory Courses

All majors must take two courses from a menu of introductory courses at the 100 and 200 levels. These courses are recommended foundations for upper-level lecture courses and seminars. The courses may be taken at any time and in any order. First-Year Seminars and Sophomore Seminars can be counted among these two introductory courses.\* No specific course is mandatory for students in Arts & Sciences.\*\*

- Art-Arch 113 History of Western Art, Architecture & Design\*\*\* and Art-Arch 215 Introduction to Modern Art, Architecture and Design will be offered every fall and spring, respectively.
- Art-Arch 111 Introduction to Asian Art, Art-Arch 232 Myths and Monuments of Antiquity, or Art-Arch 236 Cities and Towns of the Ancient World will be offered at least once every other year.
- This list will be augmented by a rotation of 100-level First-Year Seminars and 200-level Sophomore Seminars as well as other 200-level courses with broad regional, temporal, or topical coverage.\*

\* Students will be allowed to count only one First-Year Seminar or one Sophomore Seminar toward this requirement.

\*\* Art-Arch 113 History of Western Art, Architecture & Design and Art-Arch 215 Introduction to Modern Art, Architecture and Design are mandatory only for students in the Sam Fox School.

\*\*\* A score of 4 or 5 on the AP Art History exam may be substituted for Art-Arch 113. To receive this college credit, the score must appear on the student's Washington University student record, and the student must also earn at least a B in a related upper-division departmental course.

## Major Credit Units

All majors must take at least 24 additional Art History & Archaeology units:

- Students must complete at least 21 units of upper-level (300-level and above) Art History and Archaeology course work. At least two of these courses must be at the 400 level and taken with different faculty members.
- 3 of the 24 units may be at the 200 level or above. Non-Sam Fox students may instead substitute one studio art course at any level of 3 or more credits (taken at Washington University or at another institution with prior permission). The studio course option, which can be taken Pass/Fail at Washington University, is meant to encourage a student's exploration and understanding of the practice of making art. We strongly encourage students to take studio art courses above and beyond all requirements for the art history major.
- Any course taken outside the university, including study abroad courses, must receive preliminary approval from the study abroad advisor, as appropriate. Only two courses (6 credits) can be transferred into the major.

- No internship credit may be applied to the major (internship credits do count toward graduation, however).
- Courses for the major may not be taken with the Pass/Fail credit option (with the exception of the one studio art course).

## Distribution and Credit

Majors must take at least one upper-level course in three of the following seven broad areas:

- Ancient and Medieval (AM)
- Renaissance and Baroque (RB)
- Modern European and American (MEA)
- Non-Western (NW)
- Architecture (A)
- Archaeology (ARC)
- Cross-Cultural Exchange (CCE)

All 200-level lecture courses may count toward distribution requirements.

Courses for the major may not be taken with the Pass/Fail credit option. Students must earn a grade of C- or better in all courses for them to apply toward major requirements.

## Capstone Experience

Seminars are considered the capstone experience for majors in Art History & Archaeology. Seminars are listed as 400-level courses. They consist of small enrollments, and they focus on discussion and research projects. Majors must take two seminars that are home-based in the Department of Art History & Archaeology (cross-listed courses based in other departments or schools, even if they are listed as 400-level courses, may count toward the major but will not count as seminars for this purpose). Lecture courses at the 300 level usually serve as prerequisites for seminars. The two required seminars should be taken with different faculty members; although, the courses may both be in the same distribution area. Seminars are usually taken during the senior year, but they may also be taken during the junior year if the student has the preparation appropriate for the course. We recommend that only one seminar be taken at a time. **Note:** Neither Art-Arch 4900 Independent Study and Research nor Art-Arch 499 Honors Art History and Archaeology fulfill the seminar requirement.

## Languages and Fine Arts

Students contemplating graduate study in Art History & Archaeology are urged to complete significant course work in foreign languages. There is no specific language requirement for the undergraduate major; however, we encourage minors in foreign languages or double majors in foreign languages and Art History & Archaeology.

## Additional Information

### Internships

Internships in the curatorial and education departments of local museums, arts organizations, and commercial galleries are available to undergraduate Art History & Archaeology majors. Students may enroll in up to 6 credit units of a voluntary or paid internship. Such internships provide invaluable experience and may help lead to employment opportunities after graduation. These internship credits are Pass/Fail and cannot be counted toward the major, but they do count toward general graduation credits. Students seeking academic credit should make arrangements with the department before the internship begins. Students may pursue up to 6 units of internship credit working in the arts community. Please review the Guidelines for Art History & Archaeology Majors Considering Internships (PDF) for further details.

### Study Abroad

Students interested in a study abroad program should consult with both the departmental study abroad advisor and Overseas Programs as early as possible. Summer, semester, and year-long programs are all possible. Majors are expected to take their two capstone seminars on campus, usually during the senior year. On occasion, a seminar of exceptional rigor — such as those at University College London and Utrecht University, in particular — may be proposed as a substitute. However, the credit will only be granted once the course is complete and the syllabus and research paper(s) have been reviewed and approved by the study abroad advisor (and perhaps by relevant faculty). Students are advised that they should not assume that any seminar course taken while on study abroad will count toward this requirement when planning their course program. Students are further reminded that at least 15 credits of their major course work must be completed in residence at Washington University and that the final 30 units of their AB degree must be earned on campus as well.

### Latin Honors

Exceptional students may be considered for Latin Honors in the major. Honors in Art History & Archaeology will be awarded to seniors who have completed the major with a grade point average of 3.65 or better in advanced (300- and 400-level) courses in the major; who have achieved at least a 3.65 overall cumulative GPA; and who have satisfactorily completed the honors thesis outlined in the Guidelines for Latin Honors in Art History & Archaeology. Interested students should begin discussing topics with potential faculty advisors before the end of their junior year. Latin Honors are assigned by the College of Arts & Sciences and not by the department. For details, please consult the Undergraduate Honors Guidelines on the departmental website.

The Senior Honors Thesis is conducted over the course of the academic year under the supervision of a faculty member and entails the completion of two independent courses. In the fall, the student enrolls in Art-Arch 499 Honors Art History and Archaeology. With the permission of the student's thesis advisor, the student will complete the thesis in the spring, enrolling again in Art-Arch 499. Only one semester of Art-Arch 499 (3 units) counts toward the 24 upper-level

credit requirements, and it does not fulfill either of the two capstone seminar courses. The second semester of Art-Arch 499 is taken as an additional course beyond the usual major requirements; students writing the Honors Thesis complete a total of 33 credits for the major rather than the typical 30 credits. Students planning to write a Senior Honors Thesis should make every effort to complete one 400-level seminar course by the end of their junior year.

## Art History and Archaeology Minor Program Requirements

- **Total units required:** 18

The Department of Art History & Archaeology welcomes students who wish to pursue a minor in Art History & Archaeology. Students who choose the minor must complete two courses at the introductory level and four courses at the advanced level. These courses may not be taken with the Pass/Fail grading option. Students must earn a grade of C- or better in all courses.

### Introductory Courses

All minors must take two courses from a menu of Introductory Courses at the 100 and 200 levels. These courses are recommended foundations for upper-level lecture courses and seminars. The courses may be taken at any time and in any order. First-Year Seminars and Sophomore Seminars can be counted among these two introductory courses.\* No specific course is mandatory for students in Arts & Sciences.\*\*

- Art-Arch 113 History of Western Art, Architecture & Design\*\*\* and Art-Arch 215 Introduction to Modern Art, Architecture and Design will be offered every fall and spring, respectively.
- Art-Arch 111 Introduction to Asian Art, Art-Arch 232 Myths and Monuments of Antiquity, or Art-Arch 236 Cities and Towns of the Ancient World will be offered at least once every other year.
- This list will be augmented by a rotation of 100-level First-Year Seminars and 200-level Sophomore Seminars (currently in development) as well as other 200-level courses with broad regional, temporal, or topical coverage.\*

\* Students will be allowed to count only one First-Year Seminar or one Sophomore Seminar toward this requirement.

\*\* Art-Arch 113 History of Western Art, Architecture & Design and Art-Arch 215 Introduction to Modern Art, Architecture and Design are mandatory only for students in the Sam Fox School.

\*\*A score of 4 or 5 on the AP Art History exam may be substituted for Art-Arch 113. To receive this college credit, the score must appear on the student's Washington University student record, and the student must also earn at least a B in a related upper-division departmental course.

## Upper-Level Courses

Minors must take at least four upper-level (300- or 400-level) Art History & Archaeology courses (12 credits); 200-level courses may not substitute for upper-level courses and so do not count toward distribution requirements. At least one upper-level course must be taken in two of the following seven broad areas:

- Ancient and Medieval (AM)
- Renaissance and Baroque (RB)
- Modern European and American (MEA)
- Non-Western (NW)
- Architecture (A)
- Archaeology (ARC)
- Cross-Cultural Exchange (CCE)

## Additional Information

- Students may opt to take a seminar at the 400 level, but it should build upon a 300-level course in a related field. Alternatively, students should complete the proper prerequisites or have the permission of the instructor. In cases of over-enrollment in seminars, priority will be given to majors over minors, including majors who have been waitlisted.
- Courses in other departments (including courses in the Sam Fox School) do not count toward the minor unless they are cross-listed as Art History & Archaeology courses at the 300 level or above.
- At least two of the 300-level courses must be completed in residence at Washington University.
- Any course taken outside the university, including study abroad courses, must receive preliminary approval from the study abroad advisor or as appropriate. Only one class (three credits) may be transferred from approved study abroad programs.
- No internship credit may be applied to the minor. (Internship credits do count toward graduation, however.)

## Biology

Biology is an exciting, diverse field that ranges from the molecular biology of individual cells to interactions among entire populations of organisms. Members of the biology faculty are recognized internationally for their research, and they bring a variety of strengths and teaching styles into the classroom. The major program in biology

provides a thorough education in the history of scientific discovery in biology, the logical and statistical procedures used to formulate and test biological hypotheses, and the technical skills needed to conduct contemporary biological research.

The biology major program emphasizes the hierarchical nature of biological complexity and the major structures and functions that emerge at the molecular, cellular, organismal, populational and ecosystem levels. Each student masters at least one dimension of contemporary research in sufficient detail to describe the major hypotheses currently being tested and to demonstrate techniques used to test those hypotheses. Mastery of this material is evident in a student's ability to critique published data, to identify ambiguities and uncertainties in the conclusions drawn from those data, and to evaluate the societal importance of the research. Biology majors are prepared to make creative contributions to biology.

The biology major program provides a wide range of research opportunities. Because more than 400 faculty members conduct research in biology and biomedical sciences at Washington University, it is easy to find a project that suits a student's main interests. Many students complete their research projects at the Washington University School of Medicine, one of the top-ranked medical schools in the country. Summer research fellowship programs are available, funded by sources including the Howard Hughes Medical Institute, the Children's Discovery Institute, the National Science Foundation, and the Washington University Office of Undergraduate Research. Detailed information about finding a research mentor is available online.

---

**L41 Biol 112 First-Year Seminar: Introduction to Problem-based Learning in Biology**

In this course, students take responsibility for their own active, inquiry-based learning on biological problems. Instructors will guide small groups of 8-10 students in researching issues of biological importance using primary literature as their principal resource. Learning to read and interpret research articles from scientific literature is emphasized. Topics covered in this class have included: neurological disorders, infectious diseases, CRISPR, cancer, and stem cell therapy among others. Students should have a strong background in general biology. They will be challenged to use critical and creative thinking in both independent and group work. Enrollment limited. Intended for but not limited to prospective biology majors. Prerequisite: high school biology, preferably an Honors or AP class. Course is for first-year, non-transfer students only.

**L41 Biol 1122 First Year Seminar: Introduction to Critical Thinking**

Official description: This course is for first-year, non-transfer students only. This course uses thought-provoking questions in biology to develop analytical skills, at the same time understanding what level of content is needed to address such questions. Each class will involve discussion of the questions as well as lecture material as background. It will thus provide an early exposure and springboard into the translation of biology content to problem-solving. The skills learned will be applicable to future challenges. The course focuses on molecular biology and processes central to all organisms on earth. The last component of the course will focus on microbiological research, gaining knowledge of the research enterprise to generate new knowledge and the primary literature (published manuscripts). Prerequisite: Limited to 10 students. Freshman with an interest in biology career (e.g. graduate or health professions). The course is also designed to help students prepare for Biology 2960, which is offered each spring semester. Intended for students without strong AP Biology preparation, which is helpful for success in Biology 2960. Credit 3 units. Credit 3 units. A&S IQ: NSM Art: NSM

---

**L41 Biol 1260 First-Year Seminar: The Secret Lives of Plants**

This course is designed to familiarize undergraduate students with the fascinating lives of plants, their evolution, their remarkable structural and morphological diversity, how they grow, and how they have been modified to feed the planet. Topics include: how plants can survive with just water, minerals and light, how they transport water astonishing distances, their unusual sex lives, why they make seeds, how they can grow nearly forever, how plants survive extreme environments without running to hide, why they synthesize caffeine, nicotine, THC and opiates, how they defend themselves from pathogens without an immune system, how they sense their environment without dedicated sensory organs, how plants have been modified by humans to provide food, fiber and fuel, and how genetically modified (GMO) crops are made and their implications to the environment and society. Overall goals are to enhance an understanding and appreciation of the plant kingdom, to help young scientists understand the primary scientific literature, and as a starting point for possible careers in plant biology. Class includes field trips to the Missouri Botanical Gardens and a local plant biotech company/institute. Where appropriate, the class will also emphasize key differences between plants and animals. This course is primarily for first-year students interested in majoring in biology, with a possible emphasis on plants. This course is also for those that want to know more about where their food comes from, how these amazing creatures survive and flourish, and how GMO crops are engineered. Upper-level students with an interest in food and sustainable agriculture but not necessarily focusing on plants will also be welcome. Course will be lecture/discussion/hands-on format for 2 of the 3 hours per week. Students will present 20-minute papers discussing topics relevant to their interests for the remaining 1 hour (two students per class). Prerequisites: Students must have taken both

biology and chemistry in high school and at least one at the AP or IP levels; or have taken Bio 2960 or Chem 111/112. This course can be taken by both first-year and upper-level undergraduates with a preference given to first-year students.

---

**L41 Biol 131 Biology in the News**

Students explore a number of biology topics that are frequently discussed in the media. We begin with an investigation into how to evaluate scientific claims reported in written (e.g., news articles, blogs, social media posts), visual (e.g., YouTube videos, Instagram posts) and audio media (e.g., podcasts). We then explore the topics of genetic modification, GMOs, cloning, and direct-to-consumer home DNA testing kits. Finally, we investigate medical topics, including cancer, vaccines and antibiotic resistance. We emphasize critical thinking and reasoning as it applies to the acceptance or rejection of scientific claims presented in popular media formats. This course is intended for students not majoring in biology and who would like to learn more about scientific topics portrayed in the media as controversial and under debate.

**L41 Biol 144 Ampersand: The Biology of Cancer Part I**

Cancer is the second-leading cause of death worldwide. In spite of focused research efforts, cancer still poses a unique biomedical puzzle as it is now recognized that cancer is not a single disease, but rather a collection of many disorders with underlying mechanistic complexities that can affect most tissues in the human body. This interactive 1st-semester course provides an introductory overview of the biology of human cancers. We touch upon background topics in DNA structure and replication, gene regulation and transcription, protein synthesis, mutations and DNA repair, but the primary focus is on the genetic and molecular changes that normal cells undergo during transformation into malignant tumors. Part I highlights the first three (of eight) central characteristics of cancer (known as the "hallmarks of cancer") - sustained proliferation, evasion of growth suppression, and replicative immortality. The course is a mix of lectures, student-led discussions/presentations, and activities. Lectures provide an overview of each topic, while activities and discussions of cutting-edge oncology topics in the news and primary literature familiarize students with current trends in cancer research as well as enhance reading and critical analysis skills. Students choose a specific topic/theme within the cancer paradigm for further study and near the end of the semester prepare a presentation to the class on the implications for cancer survivorship. Midterm Exams, which attendance is required, will be administered on Wednesday, October 19, 6:30 - 8:30 pm & Wednesday, November 16, 6:30 - 8:30 pm. Prerequisite: High school biology and chemistry, while completing AP or Honors biology is highly recommended. Enrollment is limited to 20 students and restricted to first-year students in the "Hallmarks of Cancer & Patient Care" program. Credit 4 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

**L41 Biol 1441 Ampersand: Frontiers in Cancer Research and Treatment**

Cancer as a disease has touched countless people in every country and every lifestyle. Cancer is not one single disease; rather, it is a collective scourge of many underlying disorders. Over the years, biomedical research has led to a fuller understanding of cancer etiology and spawned new diagnostic and treatment strategies to better manage and treat this condition. More recently, the launch of the Precision Medicine Initiative by the National Cancer Institute has led to unprecedented insights into the cellular signaling pathways that drive

the development and progression of cancer. Furthermore, the current onset of "omics" technology and high-throughput biological readouts has opened the possibility of precisely identifying molecular changes and affected metabolic pathways in individual cancers, paving the way for precision medicine and patient care. In this second semester, we will build upon our foundational understanding of cancer and explore recent and groundbreaking advances in cancer research and therapies. The course is driven largely by student-led presentations and discussions with a mix of faculty lectures and guest seminars. Students work in teams and take responsibility for their own active, inquiry-based learning by examining various cancer topics using primary literature as the principle resource. Learning to read, interpret, and assemble a presentation from scientific literature and biomedical research is emphasized. Student teams choose a hypothesis-driven topic of interest in the field of oncology for further study and, near the end of the semester, prepare a written report and oral presentation to the class outlining its background, central hypothesis-driven question(s), experimental rationale/strategy, research data, scientific conclusion, and future direction. Prerequisite: BIOL 144. Enrollment is limited to students in the Hallmarks of Cancer & Patient Care program. Limited to 20 students.

#### **L41 Biol 1500 First-Year Opportunity: Molecular Biology of Genetic Disease**

This course is for first-year, non-transfer students only. Students gain a fluency in biological language, methods, and reasoning as applied to human health. We study the molecular, cellular, and physiological perspectives for each health-related topic, and examine data and methods that support this knowledge. We emphasize problem-solving and reasoning as it applies to understanding biological processes. The content and problem-solving work are designed to help students prepare for Biology 2960, which is offered each spring semester. Intended for students without strong AP Biology preparation, which is helpful for success in Biology 2960

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L41 Biol 171 First-Year Opportunity: Neuroscience Futures 1: How do we learn about the brain?**

In this seminar course for first-year students, students learn about how neurobiologists conduct and communicate research. We focus our discussion on primary research papers written by neurobiologists. Discussion then focuses on the formulation of scientific questions, evaluation of evidence, and interpreting data within the context of a broader field. Course is for first-year, non-transfer students only. Must be taken Credit/No Credit.

Credit 1 unit. A&S: FYO Arch: NSM Art: NSM

---

#### **L41 Biol 1770 First-Year Opportunity: The Biology of Dog Breeds**

This freshman seminar uses the topic of dog behavior and genetics to teach fundamental scientific tools and to engage students in contributing to the building of an online public resource that summarizes the scientific literature on breeds. Our first task is learning to read and dissect primary scientific literature. We parse out the difference between scientific questions, hypotheses, and predictions through a guided case-study exercise. We then apply the experience to outlining primary research articles, identifying the key components of the author's arguments and summarizing the results and implications. The second half of the semester is spent searching the scientific literature, sorting information into the new dog breed resource, and presenting results to peers around the seminar table. Course is for first-year, non-transfer students only.

Credit 2 units. A&S: FYO A&S IQ: NSM Arch: NSM Art: NSM

#### **L41 Biol 1771 Special Topics in Biology: Plant-Microbe Interactions**

This is a research-based laboratory course offered by Dr. Barbara Kunkel in the Biology Department. The small class size and laboratory setting of the course is intended to foster development of student-professor mentoring relationships. Time commitment (weekly): 2 hours in lab, 1 hour of discussion (1 unit, P/F). Class size: 4 students Prerequisite: Permission of Instructor Research Question. Microbial organisms play very important roles in the lives of plants and animals. For example, in nature as well as in agricultural settings, the communities of microorganisms that grow near or on plants influence the growth and overall health of these plants. These plant-associated microbial communities are highly complex, and are comprised of thousands of different species, including bacteria and fungi. However, neither the role of individual microbial species within the larger microbial community, nor how such a community is beneficial to plants, is well understood. Each year the students in Bio1771 explore a different topic related to interactions between plants and their associated microbes. During the 2020/2021 academic year our research will focus on virulence mechanisms used by the plant pathogen *Pseudomonas syringae* to promote disease in plants. Recent research in the Kunkel lab has revealed that the plant hormone auxin promotes disease development in interactions between *P. syringae* strain PtoDC3000 and one of its host, *Arabidopsis thaliana*, a weedy plant in the mustard family. Auxin acts through at least two different mechanisms to promote disease, including 1) suppressing defense responses in the plant and 2) regulating gene expression in the pathogen. We will investigate this second activity by screening for and characterizing PtoDC3000 mutants that do not properly respond to auxin. Students will spend two hours per week in lab carrying out bacteriological and molecular biology experiments. Over the course of the semester, students will be exposed to a variety of fundamental topics in biology, including: bacteriology, plant growth and development, pathogenic plant-microbe interactions, and key concepts in genetics, molecular biology and biochemistry. The students will also meet with Dr. Kunkel for one hour per week to discuss a variety of topics chosen to explore: i) basic concepts in chemistry, biochemistry and molecular biology, ii) learning and study strategies, and iii) other topics related to thriving at WUSTL.

**L41 Biol 181 First-Year Opportunity: Introduction to Cutting-Edge Research in Biology**

A lecture course intended for first-year students that focuses on the practice and culture of biological research. Active researchers describe the biological context of their research, the specific questions they have formulated, the means by which they pursue the answers, and their data and conclusions. The focus is on process: how biologists pursue their profession, what goes on in a research setting. Additional topics of clinical and contemporary interest are often included. Students are expected to attend all lectures. Enrollment is restricted to first-year, non-transfer students.. Must be taken Credit/No Credit.  
Credit 1 unit. A&S: FYO A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 1811 First-Year Opportunity: Research and Conservation in Zoos and Botanical Gardens**

An introduction to the world of zoos and botanical gardens. Students will learn of the diverse and cutting-edge ways in which scientists and conservationists study the world's biological diversity and work to conserve it. Taking advantage of two world-class institutions a short distance from the Danforth campus, the class will meet every week at an off-campus site (primarily the Saint Louis Zoo and Missouri Botanical Garden, but also several other institutions) to hear lectures from leading authorities at these institutions, as well touring facilities to see first-hand how research is conducted and how these institutions work to preserve endangered species. Students will write three short papers; each paper will be based upon a class lecture and its associated readings. Must be taken Credit/No Credit. Credit 2.0 units. Fall Semester, Wednesdays, 2:00PM-5:00PM. Course is for first-year, non-transfer students only.  
Credit 2 units. A&S: FYO A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 191 Ampersand: Phage Hunters**

A research-based laboratory class for first years. Students join a national experiment organized by HHMI, with the goal of isolating and characterizing bacteriophage viruses found in the soil in the St. Louis area. Laboratory work includes isolation and purification of your own phage, DNA isolation and restriction mapping, and EM characterization of your phage. Several WU phage are selected for genome sequencing over winter break, and are annotated in the spring in Bio 192, Phage Bioinformatics. Students who successfully isolate and annotate a phage may become co-authors on a scientific paper. Prereqs: High school courses in biology and chemistry, at least one at the AP or International Baccalaureate level; permission of the instructor. One hour lecture, one hour discussion, and 3 hrs lab per week. Course is for first-year students in the Phage Hunters Program only.  
Same as L61 FYP 1910  
Credit 3 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L41 Biol 192 Ampersand: Phage Bioinformatics**

A research-based laboratory class for freshmen. Students join a national experiment organized by HHMI, with the goal of genomic characterization of a local phage. Laboratory work focuses on learning computer-based tools for genome analysis followed by annotation and comparative analysis of the genome of a phage (bacterial virus) that was isolated fall semester at WU and sequenced over winter break. Prerequisites: High school courses in biology, chemistry, and physics, at least one at the AP or International Baccalaureate level; permission of the instructor. Limited to 40 students; preference given to those completing Bio 191, Phage Hunters. One hour lecture, one hour discussion, and 3 hrs lab per week.  
Same as L61 FYP 1920  
Credit 3 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L41 Biol 200 Introduction to Research**

An introduction to laboratory and field research in biology for first and second year students. Students work under the supervision of a mentor in a setting of established, ongoing research. Prerequisite: less than 60 units completed, permission of mentor and the department. For on-line enrollment instructions see: [https://pages.wustl.edu/Bio\\_200-500\\_independent\\_research/register](https://pages.wustl.edu/Bio_200-500_independent_research/register) Students are registered by the department after approval is granted. Registration may not appear in Webstac until mid-semester. Credit/No credit only. Course may not be taken for a letter grade.  
Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 200N Introduction to Research in Neuroscience**

This course provides an introduction to research in neuroscience under the supervision of a faculty mentor. Students work under the supervision of a mentor in a setting of established, ongoing research. Prerequisite: less than 60 units completed and permission of the mentor and the department. For online enrollment instructions, visit <https://sites.wustl.edu/bio200500independentresearch/>. Students are registered by the department after approval is granted. Registration may not appear in WebSTAC until mid-semester. Credit/No credit only. Course may not be taken for a letter grade.  
Credit variable, maximum 3 units.

---

**L41 Biol 200S Summer Introduction to Research**

Summer research under the supervision of a faculty mentor. Prerequisites: first-year or sophomore standing and permission of mentor and the department. Credit to be determined in each case, usually 3 units/summer; may be repeated for credit in different summers. Credits are received in the fall semester following the summer research. The application deadline and registration information can be found on the Bio 200/500 course website: [https://pages.wustl.edu/Bio\\_200-500\\_independent\\_research](https://pages.wustl.edu/Bio_200-500_independent_research) Credit/No Credit. Course may not be taken for a letter grade. 1-3 units  
Credit variable, maximum 3 units. A&S IQ: NSM

---

**L41 Biol 200U Summer Introduction to Research in Neuroscience**

Summer research in neuroscience under the supervision of a faculty mentor. Prerequisites: first-year or sophomore standing and permission of the mentor and the department. Credit to be determined in each case, usually 3 units/summer. Course may be repeated for credit in different summers. Credits are received in the fall semester following the summer research. The application deadline and registration information can be found on the Biol 200/500 course website: <https://sites.wustl.edu/bio200500independentresearch>. Credit/no credit. Course may not be taken for a letter grade.  
Credit variable, maximum 3 units.

---

#### **L41 Biol 2010 Ampersand: The Science of Biotechnology**

Biotechnology is truly interdisciplinary, incorporating a myriad of pieces from biology, chemistry, engineering, physics, computer sciences, management, public policy, and law that apply the scientific process to societal challenges. This course introduces topics for science and engineering majors with an interest in biotech, and it teaches scientific concepts to business students considering careers in biotech management and entrepreneurship. Students who complete Biol 2010 understand key science concepts, how discoveries lead to applications addressing global challenges, how to effectively use a variety of resources to explore connections between science and biotech business, how to synthesize information from different fields, and how to exhibit strong teamwork skills and communicate information in written and oral forms. This course also provides a gateway for students interested in the two-year Biotech Explorers Program (BEP). The first two weeks of the course introduce students to the history of biotechnology, the BEP, and the use of case studies. The remainder of the course uses a series of four three-week units that combine lecture material, in-class group assignments, and readings to introduce the science and scope of biotechnology. For each unit, student teams also develop short case studies of St. Louis biotech companies and present their findings to the class. A series of site visits introduce students to the vibrant St. Louis biotech community. This course is for students in the Biotech Explorers Program only.

Credit 3 units. A&S: AMP A&S IQ: NSM BU: SCI

---

#### **L41 Biol 2020 Ampersand: Biotechnology Entrepreneurs Seminar**

Although the biotech industry is science-based, the risks of product and technology development, legal issues, and market pressures make the landscape full of uncertainty. Lectures and textbooks fall short of delivering true insight about the process and challenges of bringing ideas to real-world products. This second semester freshman seminar course is designed to develop an appreciation of how biotech companies achieve their goals by engaging students through interactions with experienced executives and entrepreneurs, whose shared knowledge and stories add depth and context to the learning process. This 1 credit seminar course introduces students to the basics of innovation and entrepreneurship as a framework for marketable discoveries, builds an appreciation of how biotech companies start, obtain funding, and navigate intellectual property, provides an overview of career options in biotech, and insight on the hiring process. Pre-requisite: Students need to have completed Bio2010: The Science of Biotechnology for enrollment in this course and be currently enrolled in Bio2960: Principles of Biology I. Limited to 20 students.

Credit 1 unit. A&S: FYS

---

#### **L41 Biol 2111 Nutrition**

This introductory course examines nutrition as an interdisciplinary science. Topics include the chemistry, function, and metabolism of nutrients; regulations of food intake; food habits; digestion and absorption of nutrients; methods of determining the nutrient content of foods and nutrient requirements for humans and animals; comparative nutrition; problems of human malnutrition; relation of nutrition to disease; toxic materials in foodstuffs; economic, nutritional, and social problems involved in feeding the world population; and future possibilities for meeting nutritional needs of the world's population.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 212 uSTAR Seminar**

This seminar course is designed for students who are part of the uSTAR Program at Washington University. The course will provide a formal setting to guide this population into becoming successful researchers in the academic community, with an additional goal of increasing their PhD pursuits. Students in the course will be exposed to scholarly discussions through student-selected journal readings. The course will discuss the different approaches taken to scientific

inquiry and the dissemination of knowledge, in addition to the topic of integrity in research and important ethical issues that impact scientific investigation. Students will be exposed to topics relating not only to their area of study but to that of their peers as well. Student presentations on both scholarly journal readings and their own research will enable them to develop the ability to effectively communicate research to a broad audience. From this course, the uSTAR students will develop the skills to read, understand and critically evaluate publications, and they will build a broad understanding of research in multiple fields within the natural sciences. Students will also come away with a greater understanding of the ethical issues that face the scientific community on a daily basis.

Credit 1 unit.

---

#### **L41 Biol 2121 Research Seminar for Vagelos Fellows**

The course will orient Fellows to the specific research environment of their labs and provide them tools to succeed. It will feature short seminars from world-renowned DBBS faculty and DBBS alumni. Speakers will emphasize both their science and their career route into academic research, including challenges. This will expose students to multiple paths into and academic careers associated with biosciences graduate training. Diverse speakers will emphasize the desirability and attainability of research training and careers. This course will also include information on the research enterprise, mentorship expectations, rigorous experimental design, quantitative thinking, techniques, rigorous analysis, posing a scientific question, and communication skills. 2.0 units

Credit 2 units. A&S IQ: NSM

---

#### **L41 Biol 2431 Ampersand: Pathfinder - A Sense of Place: Discovering Missouri's Natural Heritage**

This is the first course in the Pathfinder program, and it will introduce students to their new home for the next four years. This interdisciplinary course will cover Missouri geology, climate, archaeology, and native megafauna. We will explore many of the habitats found in Missouri (prairie, forest, glade, and stream) and the biology of our diverse plant and animal wildlife (arthropods, mollusks, fish, salamanders, lizards, birds, and mammals). This will provide a foundation that will inform the study of ecology, policy and management in other courses. In addition to weekly lectures and discussions, students in this course will visit sites across the state during three weekend camping trips and two one-day trips. Attendance on field trips is an essential component of the course. Course enrollment is open only to students admitted into the Pathfinder Fellowship program.

Same as L61 FYP 121

---

#### **L41 Biol 244 Ampersand: The Oncology Healthcare Team**

It's news no one wants to hear: "You have cancer." A cancer diagnosis can be overwhelming. The physical and emotional effects that come with this disease and its treatment can be significant. People often need the experience and skills of several different medical specialists to navigate and treat cancer. The various medical professionals involved in cancer care make up the oncology healthcare team. In this third-semester course, we will partner with Siteman Cancer Center and its affiliates to explore the multitude of professions that constitute the oncology healthcare team. In bi-weekly rotations, students will be introduced to various aspects of cancer-patient care and treatment through members of the oncology healthcare team, including oncologists, pathologists, surgeons, clinical geneticists, nurses, psychologists, and public health professionals. The course is a mix of guest lectures, discussions, site visits, activities, and shadowing healthcare professionals. Students will reflect on their experiences in weekly journal entries and must submit a final reflection paper that is

due at the end of the semester, synthesizing semester experiences with core competencies for individuals desiring to enter a health profession. Prerequisites: Biol 144 and Biol 1441. Enrollment is limited to students in the "Hallmarks of Cancer & Patient Care" program.  
Credit 4 units. A&S IQ: NSM

---

#### **L41 Biol 265 Experience in the Life Sciences**

Earn credit for non-classroom learning in the life sciences in a variety of activities arranged by the student: accompany a WU Faculty physician on rounds and prepare a paper on an organ system or disease, participate in a clinical or applied ecological study and report on it, participate in science outreach teaching, etc. Participants must meet regularly with a supervisor and commit at least 140 hours over two semesters. A work plan is approved prior to registration. A progress report is due after one semester and a final paper after two semesters. Does not count toward the major. Credit: 1.5 units per semester, contingent upon completion of two semesters. For more information on registration, please see: <https://sites.wustl.edu/bio265/>. Students are registered by the department after approval is granted. Credit/No Credit only. Course Master: Dr. Joan Downey  
Credit 1.5 units.

---

#### **L41 Biol 2651 MedPrep I - The Lecture Series**

MedPrep I (Bio 2651) is a unique lecture series taught by a physician, former medical school course master and member of the Committee on Admissions for the School of Medicine. Through a weekly 2-hour lecture, this course gives students accurate, honest, and detailed information regarding every step of the application and admissions process to medical school, the entire educational process including medical school and residency training and pros and cons of life of a physician. MedPrep I is particularly useful for first-year students and sophomores in that it reviews the common pitfalls encountered by unsuccessful applicants to medical school and outlines the steps to take in each year of college to be a successful applicant when the time comes. There is no outside course work and no exams. Attendance at all classes is required. There is a \$10 course fee used for guest speakers stipends, guest speaker travel to St. Louis, AV needs and other course-related items. For more information, please see the MedPrep website: [medprep.wustl.edu](http://medprep.wustl.edu)  
Credit 1 unit.

---

#### **L41 Biol 2652 Pediatric Emergency Medicine Research Associates Program: Experiences in Life Sciences**

The Pediatric Emergency Medicine Research Associates Program (PEMRAP) offers undergraduate pre-medical students an opportunity to participate in clinical, patient-oriented research projects in a hospital setting. Students have the opportunity to work in the St. Louis Children's Hospital Emergency Department, a nationally recognized pediatric emergency medicine and trauma care facility. A number of research projects are currently underway in various areas of pediatric emergency medicine. Research Associates are expected to work two 4-hour shifts per week in the St. Louis Children's Hospital Emergency Department and to attend a weekly 2-hour lecture on Tuesdays from 1:30-3:30pm in Conference Room 10A of the Northwest Tower Building (across from Children's Hospital). Lectures are given by Emergency Department faculty members. This program offers students the unique opportunity to be a vital part of the ED research team. In addition, the RA's experience in the ED may help him/her determine if medicine is truly the career path he/she wishes to choose. Prerequisite: Sophomore level or higher, and approval of Instructor. Registration is done through this website: <http://pediatrics.wustl.edu/pemrap>. May not be taken concurrently with Bio 2654: MEDPREP II.  
Credit 3 units.

---

#### **L41 Biol 2654 MedPrep II - The Shadowing Experience: Emergency Medicine**

MedPrep II (Bio 2654) offers students a real world, behind-the-scenes experience of a life in medicine. For three hours every other week, students shadow physicians in the Charles F. Knight Emergency and Trauma Center of Barnes-Jewish Hospital, the main teaching hospital of the Washington University School of Medicine. In addition to the shadowing, there is a required class session every Wednesday from 5:30-6:20 pm. Because of the orientation material presented, excused absences will not be granted for the first two sessions for any reason whatsoever, including illness or emergency. There is no outside course work and no exams. A \$25 course fee for MedPrep shirt and other course related items (e.g. AV items and other course-related items) as well as HIPAA training and PPD testing are required. For more information and to register for this course, please see the MedPrep website at [medprep.wustl.edu](http://medprep.wustl.edu). Registration is done through the website, NOT through WebSTAC. Successful completion of Bio 2651, and sophomore standing or above are required to take Bio 2654. During the summer semester students may take both Bio 2651 and Bio 2654 concurrently.  
Credit 1 unit.

---

#### **L41 Biol 2656 Introduction to Health Professions: Audiology, Occupational Therapy, Pharmacy, and Physical Therapy**

This course provides students interested in health professions with an overview of occupational therapy, physical therapy, audiology, and pharmacy. Students gain a better understanding of the scope of practice, markets, and skills required to succeed in these professions. Students learn about graduate and professional education options and how to build a competitive application for these programs. Finally, students participate in self-directed learning experiences (which may include in-person or virtual shadowing, attending professional presentations, meeting with health care professionals or graduate students, or sitting in on graduate-level classes) and culminate their study with an inter-professional education session with a panel of faculty from the different health professions. Students finish the course with a better understanding of whether a career in health professions is right for them.  
Credit 1 unit.

---

#### **L41 Biol 2658 Pediatric Emergency Medicine Research Associates Program - Experiences in Life Sciences (PEMRAP II)**

PEMRAP II is a continuation of Bio 2652, Pediatric Emergency Medicine Research Associates Program - Experiences in Life Sciences. Returning PEMRAP Research Associates (RAs) actively participate in new and ongoing research projects in various areas of pediatric emergency medicine. RAs assist during the active period of patient enrollment through screening of ED patients for study eligibility, reading information about the studies to the patients, collecting data regarding patient history and certain physical examination findings, and generally facilitating the study enrollment process. PEMRAP Returning RAs are vital members of the Emergency Department research team in the St. Louis Children's Hospital Emergency Department. Returning RAs assist in training and mentoring incoming PEMRAP students (BIO 2652) in ED protocol, work approximately one 4-hour shift per week in the ED, record shift activities and hours worked on a daily Shift Log form, and participate in the physician shadowing program (as offered). Returning RAs are responsible to meet hospital non-appointee requirements and stay current with new study protocols by attending or viewing new study presentations for PEMRAP students. These lectures are given by Pediatric Department faculty members introducing the basics of the clinical research process, specific studies, as well as pediatric illness. The RA position carries with it important responsibility requiring maturity, initiative, diligence and excellent interpersonal skills. There is no outside course work and no exams. Full participation is required. 45

shift hours = 1 credit Students may repeat this course for a maximum of 6 credits. Course may not be taken concurrently with Bio 2651, 2652, or 2654. Enrollment with permission of instructor Prerequisite: Bio 2652 (PEMRAP I) Pass/Fail 1-2 units/semester.  
Credit variable, maximum 2 units.

---

#### **L41 Biol 2659 Medprep III - Emergency Care Technician**

MedPrep III (Bio 2659) is a new shadowing course that will take place on the inpatient wards of Barnes- Jewish Hospital, the main teaching hospital of the Washington University School of Medicine. For four hours every other week, students shadow physicians on a specialty service and will remain with that service for the duration of the semester. Students will have the opportunity to rank order their preference of specialty but will be assigned based on availability. No guarantees can be made to place a student in their most preferred specialty. In order to participate, students must have one morning a week that they are completely free between 6 am-12 pm. In addition to shadowing, there is a required class session every Wednesday from 6:30-7:30 pm. Because of the orientation material presented, excused absences will not be granted for the first two sessions for any reason whatsoever, including illness or emergency. There is no outside course work and no exams. A \$25 course fee as well as HIPAA training and TB testing are required. For more information and to register for this course, please see the MedPrep website at [pages.wustl.edu/medprep](https://pages.wustl.edu/medprep). Registration is done through the MedPrep website, NOT through WebSTAC. Successful completion of MedPrep I (Bio 2651) and sophomore standing or above are required to take Bio 2659. This course is only offered during the Fall and Spring semesters.  
Credit 1 unit.

---

#### **L41 Biol 265S Summer Experiences in Life Sciences**

Earn credit for clinical research and other non-classroom learning in the life sciences during the summer. The variety of activities arranged by the student with their WashU faculty mentor have included but are not limited to: participation in clinical research or applied ecological research and report on it; shadow a physician on rounds or in clinic; prepare a paper on an organ system or disease; participate in science outreach teaching, etc. Participants must meet regularly with the faculty mentor or designee and commit to at least 140 hours over two semesters. An application is required each semester which includes a work plan, that must be approved prior to registration. A semester Summary Report is due after one semester and a Final Summary Report after two semesters. Bio 265 does not count toward the Biology major/minor. Credit: 1.5 units per semester, contingent upon completion of two semesters. For more information and to access the application, please go to: <https://sites.wustl.edu/bio265/>. Students are registered by the Biology department after faculty mentor and course master approval is granted. Summer Application Deadline - First Friday of June. Credit/No Credit only.  
Credit variable, maximum 1.5 units.

---

#### **L41 Biol 2950 Introduction to Environmental Biology**

Introduction to Environmental Biology is designed to teach important principles of environmental biology and general science literacy skills. We cover the foundational biological principles and contemporary issues within four main topics: human population growth, transfer of energy and carbon in the ecosystem, biodiversity, and food production. We focus on the biological principles involved as we examine these topics in the context of some contentious and confusing issues related to environmental biology in everyday life. The science literacy skills that you master in this course will help you address the issues you face in your everyday life regarding scientific and pseudoscientific claims about the environment and society and will form the foundation for your development as a critical consumer of science information in the media. This course is required for all environmental biology majors and

environmental studies minors. We recommend you take this course in your first- or second-year if possible. If your interests align and your schedule allows, we recommend co-enrolling in INST 215: Introduction to Environmental Humanities.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 2960 Principles of Biology I**

An introduction to biological molecules and biochemical strategies employed by the three domains of life. The flow of genetic information within cells is discussed in the context of cellular structure, organization, and function. Investigation and manipulation of genetic information by molecular genetic technologies, such as recombinant DNA, forms the final phase of the course. Labs reinforce concepts from lectures and explore common laboratory techniques and computer-based resources. Prerequisites: Chem 111 and Chem 112 (concurrently).  
Credit 4 units. A&S IQ: NSM Arch: ETH, S, NSM Art: NSM BU: SCI

---

#### **L41 Biol 2963 Biology Team Learning for Biol 2960 (BTL)**

Biol 2960, Principles of Biology I, focuses on critical thinking, analysis and problem solving for biology topics. Many students have not approached biology this way in high school courses. Participation in BTL is designed to help students learn and practice the course material using concept building and critical thinking. Group work on problem solving is emphasized. In-person instruction. Corequisite: Biol 2960. Pass/Fail.  
Credit 1 unit.

---

#### **L41 Biol 2970 Principles of Biology II**

A broad overview of genetics, including Mendelian assortment, linkage, chromosomal aberrations, variations in chromosome number, mutation, developmental genetics, quantitative genetics, population genetics, mechanisms of evolution, and phylogenetics. Three lecture/problem solving sections and one laboratory period per week. Does not fulfill the laboratory requirement of the biology major. Prereq: Bio 2960, or permission of instructor. This course must be taken for a grade to count towards the Biology major.  
Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3010 Biotechnology Project**

: This second year Biotech Explorers Pathway (BEP) course introduces students to the process used to generate project ideas, write proposals, and evaluate concepts, with peer evaluation applied at all steps of the process. Students completing Bio3010 will gain experience in science proposal writing with peer review, public speaking, team building, and leadership training. The first four weeks of the course will focus on individual pre-proposal brainstorming, writing, and pitching, while the remainder of the course will be dedicated to the development of full proposals by teams of students. This 3-credit project development course complements introductory courses by making connections between fields and building teams of students with experience in the process that nurtures ideas to products. Pre-requisites: Students need to have completed Bio2010: The Science of Biotechnology and Bio2020: Biotech Entrepreneurs Seminar for enrollment in this course. Credit only. 3.0 units. Writing Intensive. Limited to 20 students.  
Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 303A Human Biology**

How did Elvis, Socrates, and Babe Ruth die? How did David Letterman and Dick Cheney survive? In this course we work towards understanding the biology behind human health and disease. We examine cases from the news, literature and history. We work like detectives to understand how and why the characters were affected, and healed or died. This course is designed for students who do not

plan to major in science and no prior science background is expected. Prerequisite: Sophomore standing or permission of instructor. A student may not receive credit for both Bio 303A and Bio 100A, 2960, 2970, or UCollege B320, B3201, B321, B3211.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3041 Plant Biology and Genetic Engineering**

A 4 credit lecture course that provides an introduction to plant development, genetics, physiology and biochemistry with emphasis on processes that can be manipulated or better understood through genetic engineering. The course is divided into 3 sections. The first section of the course discusses basic plant biology, development and genetics. The second part of the course emphasizes gene structure, expression, and cloning as well as methods for introducing foreign DNA into plant cells and regenerating fertile plants in tissue culture. During the third part of the course we will discuss a variety of examples of genetically engineered traits, including: herbicide resistance; fruit ripening; pathogen and/or insect resistance; the use of plants for production of industrial and pharmaceutical compounds. Friday discussion sections focus on critical reading of the primary literature related to the material covered in lecture. Prerequisites: Bio 2960 and Bio 2970.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3057 Physiological Control Systems**

Systems physiology with emphasis on human physiology. Prereqs: Bio 2960 and either Chem 106 or Chem 112A. Must be taken for a letter grade.

Credit 3 units. A&S IQ: NSM Art: NSM

---

#### **L41 Biol 307A Human Variation**

A survey of human biological diversity, considering its adaptive and taxonomic significance from the perspective of origins and distribution of traits and adaptation. Prerequisite: Anthro 150A or introductory biology.

Same as L48 Anthro 307A

Credit 3 units. A&S IQ: NSM, AN, SD Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3100 R Workshop in Biology**

Biologists in all areas increasingly find that they have the need and opportunity to work with large data sets. The goal of this 1-credit course is to provide students with an opportunity to gain skills in data analysis and presentation using R, a free software environment for statistical computing and graphics (<http://www.r-project.org>). Topics include an introduction to basic programming in R, data types and manipulation, graphics, hypothesis testing and statistics, and applications to various fields of biology ranging from ecology to genomics. The course consists of ten, two-hour workshops that include a brief introduction to key concepts in R and applications in biology, followed by interactive, hands-on tutorials. Prerequisites: concurrent or prior course in statistics (Math 2200 or Math 3200) or permission of instructor.

Credit 1 unit.

---

#### **L41 Biol 3110 Vertebrate Structure Laboratory**

A lecture/laboratory course designed to provide an integrative framework for how vertebrate form and function evolved. Weekly lectures emphasize development and the relationship between the structural and functional design of organ systems, the importance of these relationships in maintaining homeostasis while providing opportunity for adaptation, and examples of how vertebrate organ systems communicate to accomplish functional and physiological integration. 1.5 hr lecture and 5 hrs lab each week. Prereq: Bio 2970.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3151 Endocrinology**

An overview of mammalian endocrine systems with an emphasis on human physiology and development. The interplay between systemic, local cell, and tissue interactions as well as the cell and molecular events associated with hormone action discussed. Examples of endocrine evolution and pathological conditions related to endocrine imbalances also included. Prerequisite: Bio 2970.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3160 Beyond the Evidence**

This class is about the science of science communication. Why, when all evidence points to the growing threats of climate change, is it so difficult to create movement toward addressing it? Why, when we have so much evidence that vaccines reduce illness and death and are extremely safe, do individuals still choose not to vaccinate their children? What if I told you that the scientific evidence does not matter? Over the last few decades, not better education, nor guilt, nor fear has worked to produce change on important environmental and public health issues. In this class, we will explore how values, beliefs, emotions and identity shape how we receive and process information and make decisions. We will explore themes of moral world view, cognitive linguistics and framing, cognitive dissonance, risk perception, empathy, habit changes, and difficult dialoguing through the case studies of climate change and vaccination. Course activities will consist of regular reading, some online research, reflective journaling at home, and engaging in conversation during class. There are no prerequisites, but the class is designed for fourth-year students in environmental majors and pre-health studies. Upper-level environmental majors and minors will receive priority enrollment from the waitlist.

Same as L82 EnSt 316

Credit 3 units. A&S IQ: SSC Arch: ETH, S, SSC Art: SSC BU: BA EN: S

---

#### **L41 Biol 3171 Biology for Climate Change Solutions**

Human-induced climate change poses a pressing and pervasive threat to both human populations and to the biological world. The challenges of climate change are manifest and well known, increasing temperatures, greater variability of weather, sea level rise, leading to a host of consequences. Adapting to and mitigating climate change are essential activities for confronting the threats of climate change. The biological sciences offer great potential for addressing these threats. This course focus on efforts in biological research to adapt and to mitigate climate change. Topics will range across the biological sciences from microbial engineering and biotechnology to zoonotic diseases and one health, to ecosystem function and conservation of biodiversity. The course consists of lectures, discussion of assigned readings, and class projects. Class projects focus on science topics that addresses new approaches to climate adaptation and mitigation and constitute both of a written paper and class presentation. The goals of this class are: (1) to develop an understanding of basic climate science and the biological aspects of climate change, (2) to develop knowledge of the biological efforts towards adaption and mitigation for climate solutions. The class is open to both non-science and science majors. The course does not count for the biology major. 3 units credit. Class cannot be taken pass fail. Small class. Not for biology major credit

Credit 3 units. A&S IQ: NSM

---

#### **L41 Biol 3180 Domestication: The Evolution of Our Multispecies Family**

This course explores the evolution of the plants, animals, and microbes in human-mediated ecosystems. We call these evolutionary relationships domestication and they are at the heart of humanity's successful adaptation to nearly every ecosystem on Earth. From our millennia-deep friendship with gregarious wolves, to corn's continental conquests, to 'the industrial microbiome,' this course will ask how

other species have evolved in response to human societies, and how societies have been shaped by these relationships. We will primarily draw on concepts and data from anthropology and evolutionary biology to understand the process of domestication.

Same as L48 Anthro 3180

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

---

#### L41 Biol 3183 A History of Genetics in the 20th Century

After a brief survey of pre-twentieth-century theories of heredity, this course examines the work of Gregor Mendel and its rediscovery in 1900, and its expansion as an interfield theory in combination with the chromosome theory, pioneered beginning in 1910 by T.H. Morgan at Columbia and R.A. Emerson at Cornell, and led to the expansion of classical genetics up to World War II. The beginnings of biochemical and molecular genetics in the 1920s and 1930s developed rapidly after the war with the double-helix theory of DNA and the rise of molecular genetics. The course ends with examination of the Human Genome Project (Initiative) and the ramifications of genetic biotechnology. Throughout, emphasis is placed not only on the technical and theoretical developments comprising genetics as an epistemic field, but also on the economic, social, political and philosophical interconnections between genetics and society. Agriculture, medicine and the ideology of social control (including such movements as eugenics and Nazi race hygiene) both influenced, and were influenced by genetics, and played an integral part in the construction of the science itself. Readings are drawn from the primary and secondary literature. There is a mid-term, final and periodic student reports.

Prereq: Bio 2960 and Bio 2970.

Credit 3 units. A&S IQ: NSM, WI Art: NSM

---

#### L41 Biol 3220 Woody Plants of Missouri

Washington University's Danforth Campus is home to more than 4000 trees and is now a registered arboretum. This urban forest ecosystem has been carefully curated and managed to provide habitat diversity, shade, rainwater mitigation, and aesthetic beauty. In this course, students will study the biology of woody plants in the classroom and in our arboretum. Specifically, students will learn woody plant systematics, physiology, and ecology as well as applied and hands-on techniques. Students will learn to collect forestry data and to identify trees by leaf, bud, bark, fruit and crown. They will learn to plant, propagate, and care for trees and other woody plants. They will also contribute to the ongoing research in our arboretum and to the education of their peers and campus visitors by adding new trees to the arboretum collection and by monitoring the campus trees as they learn to collect data on growth and phenology. Students who successfully complete this course will be eligible to join the Danforth Arboretum "Loraxes" for the remainder of their time at Washington University. Loraxes will be arboretum ambassadors and will be called upon from time to time to lead tours of the arboretum for prospective students, science outreach, or members of the campus community. Prerequisite: Biol 2960. (Biology Major Area C)

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### L41 Biol 3221 Research and Public Education in the Arboretum

Washington University's Danforth Campus is home to more than 4000 trees and is now a registered level II arboretum. This urban forest ecosystem has been carefully curated and managed to provide habitat diversity, shade, rainwater mitigation, as well as aesthetic beauty. The arboretum is also an institutional structure to support education, research and public service. This course combines theory and hands-on practice. In this course you will: Learn about the history and philosophy of public natural history museums, botanical gardens, arboreta, and zoos Learn about arboreta and public gardens around the world Learn field techniques for monitoring the growth and assessing the health of trees o Apply those techniques by contributing to the bio-monitoring and tracking of the trees in the Danforth Campus Arboretum Learn about the pedagogy of public education in museums,

zoos and arboreta o Apply the pedagogic practices to development of public education campaigns in the Danforth Campus Arboretum o Apply those practices by serving as an outreach ambassador and leading tours through the Danforth Campus Arboretum Prerequisite: Biology 3220

Credit 3 units. A&S IQ: NSM

---

#### L41 Biol 324 Human Genetics

Broad coverage of the role of genetics in medicine, with a focus on the application of genomic technologies to the understanding of human disease. Areas covered include the identification of human disease genes, modern cytogenetics, risk assessment in pedigrees, biochemical genetics, imprinting, mitochondrial genetics, gene therapy, complex inheritance, assisted reproduction, prenatal diagnosis, immunity, cancer, and pharmacogenetics. The profound ethical and legal considerations raised by modern genetic technologies are also discussed. (Biology Major Area A)

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### L41 Biol 328 Principles in Human Physiology

This course is designed to provide students with an understanding of the function, regulation, and integration of the major organ systems of the body. Course content includes neural and hormonal homeostatic mechanisms, and study of the circulatory, respiratory, digestive, urinary, musculoskeletal, nervous, endocrine, immune and reproductive organ systems. Mechanisms of exercise physiology are integrated throughout the course. Prerequisites: Bio 3058, or equivalent.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### L41 Biol 334 Cell Biology

Eukaryotic cell structure and function viewed from the perspective of modern cell biology. Lectures cover such topics as membrane transport, endocytosis and secretion, intracellular trafficking, hormones and signal transduction, extracellular matrix and tissue formation, cytoskeleton and motility, cell cycle, apoptosis, and the cellular basis of disease. Prerequisite: Bio 2970.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### L41 Biol 3371 Eukaryotic Genomes

An advanced exploration of the structure and function of DNA within the eukaryotic nucleus. Lecture and discussion cover topics of chromatin and chromosome structure, control of gene transcription, RNA processing, and DNA replication and repair. The relevance of these topics to the genetic basis of human disease is discussed. Throughout, the experimental data that shape our current understanding are emphasized. Course grades based on exams, problem sets and short papers. Lecture 3 hours per week plus required discussion section meeting every other week. Prerequisites: Bio 2970, Chem 261 (may be taken concurrently). Offered every other fall in even numbered years.

Credit 4 units. A&S IQ: NSM Art: NSM BU: SCI

---

#### L41 Biol 3411 Principles of the Nervous System

This course will provide a broad introduction to neuroscience, starting at the level of cellular and molecular neuroscience, and ultimately ending at systems and theoretical neuroscience, with emphasis on the organization of the mammalian central nervous system. Topics will include neuronal structure, the action potential, information transmission between neurons, sensory/motor systems, emotion, memory, disease, drugs, behavior, and network dynamics. A fundamental goal of this course is to provide students with the ability to approach complex problems using the scientific method and

to understand the limits of knowledge. This course will also expose students to some of the neuroscience community at WashU. Bio 2960, Bio 2970 recommended, Bio 3058 recommended or Psych 3401 and permission of instructor. (Biology Major Area B)  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3421 Introduction to Neuroethology**

The neural mechanisms of animal behavior from an evolutionary and ecological perspective. Topics include: contributions of model systems to understanding fundamental properties of nervous system structure and function; electrical signals of sensory cells, neurons, and muscle; neural processing of sensory input; neural control of behavioral output; anatomy and physiology of sensory and motor systems; learning and memory; evolution of neural circuits. Prerequisite one of the following courses: Biol 3058, Biol 3411, Psych 3401.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3422 Genes, Brains, and Behavior**

Genetic studies of physiological systems underlying animal behavior, including the genetic basis for normal and abnormal behaviors in animals and humans. Topics include: history of behavioral genetics; the ongoing debate about "nature vs. nurture"; contributions of genetic model systems including the nematode *Caenorhabditis elegans*, the fruit fly *Drosophila melanogaster*, zebrafish, the mouse *Mus musculus*, and other animal models; molecular mechanisms underlying the evolution of behavioral phenotypes; the emerging role of epigenetics in regulating nervous-system functions and behavior; the use of genetic and genomic analyses in studies of human behavior and psychiatric disorders. Prereq: Bio 2970  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3423 Behavioral Genetics Laboratory**

This course introduces students to fundamental concepts of how genes govern behavior by using the model system *Drosophila melanogaster*. Students learn modern and classic laboratory techniques, including fly crossing, genetic screens, behavioral assays, microscopy, and electrophysiology. Specifically, we use the GAL4/UAS system to assess the role of microRNAs in a variety of fly behaviors. A primary goal of the course is to develop real-world research skills by having students design, propose, and execute a set of novel research questions. Statistical analysis and interpretation of student data are emphasized. To build a solid conceptual background, lectures are given once per week, and students read, analyze, and discuss primary research articles. Understanding is assessed through journal club reports and presentations, research reports, and a final presentation of experimental results. This course is designed for upper-level students who have taken Biol 2960 and Biol 2970.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3424 Great Discoveries in Neuroscience**

A discussion-based course for advanced undergraduates in neuroscience that focuses on discoveries with major impacts on our understandings of how brains function. Readings include: Gordon Shepherd's book "Creating Modern Neuroscience: The Revolutionary 1950s"; papers in neuroscience of Nobel Laureates, Kavli Neuroscience Prize winners, and Brain Prize winners; and papers of great discoveries with the potential to inspire future revolutions in the field. Attendance at class meetings is required. Weekly written assignments include descriptions of course readings and summaries of discussions at class meetings. Prerequisite: Biology 3411. Course must be taken for a letter grade. Counts toward the Advanced Biology Elective requirement of the Biology: Neuroscience major.  
Credit 3 units. A&S IQ: NSM Art: NSM

---

#### **L41 Biol 343A Plants, Environment and Civilization**

Human life, health, and civilization depend on plants. This course introduces basic plant biology, the role of plants in natural ecosystems, and the various uses of plants in both traditional cultures and in developed countries. Topics include the medicinal uses of plants, domestication of plants for agriculture, biotechnology and plant conservation. Prerequisite: Junior standing or permission of instructor. Does not count toward upper-division credits required for the major.  
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

---

#### **L41 Biol 347 Darwin and Evolutionary Controversies**

Focus is on controversies in evolutionary biology from Darwin's day to the present. Most of the controversies concern scientific issues such as Kelvin's estimate of age of the earth, Jenkin's argument against blending inheritance, neutral variations, effects of isolation on the role of selection, mass extinction and "nemesism," but some address social issues such as evolutionary ethics and "scientific creationism." Emphasis in the readings is on primary sources, including Darwin's *Origin of Species*. Writing Intensive. (Biology Major Area C)  
Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3481 Parasitology**

This course introduces students to the fundamentals of parasitism. Throughout the semester, students not only learn about parasite biology (examples: parasite life cycles, host immune responses, parasite evasion mechanisms), but also how parasites make a broader impact (examples: co-evolution of hosts and parasites, parasites as indicators of environmental health, the challenge of parasite control). Topics include, but are not limited to, parasite diversity and classification, life cycles, host evasion mechanisms, pathology, disease, control, types of hosts and their immune responses, and the impact that parasites have on ecology and conservation biology. 3.0 Credit Hours. Prerequisites: Principles of Biology I (Biol 2960) and II (Biol 2970) (Biology Major Area A)  
Credit 3 units. A&S IQ: NSM Art: NSM

---

#### **L41 Biol 349 Microbiology**

This four credit lecture course focuses on the molecular biology of bacteria, archaea, and viruses. Topics include: the bacterial cell cycle, gene regulation, stress response, cell-cell communication, viral and bacterial pathogenesis, microbial ecology, and metabolic diversity. Friday tutorials stress analysis of the primary literature with an emphasis on current research related to material covered in lecture. Prerequisites: Biology 2960, and 2970, or permission of instructor.  
Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3491 Microbiology Laboratory**

After introducing students to the basics of bacterial growth and maintenance, this laboratory class employs microscopy, genetics, cell biology, and genomics to explore various aspects of bacterial physiology, structure, and identification. Students will present findings throughout the semester in both written and oral format. Roughly one hour lecture and five hours of laboratory per week. Fulfills the upper-level laboratory requirement for the Biology major. Prerequisite: Bio 2970, Bio 349 recommended.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3492 Laboratory Experiments with Eukaryotic Microbes**

This research-intensive course provides an introduction to diverse molecular and cell biology techniques used in model experimental organisms to explore fundamental biological questions. Experiments are performed using selected fungi and protozoans commonly used in major research efforts. Emphasis is placed on choosing the appropriate organism for the question posed using the most current technologies. Each semester, one cellular process is studied in detail and original

research is carried out. Prerequisites: Bio 2960 and 2970 and permission of instructor-- contact early to ensure enrollment. One hour of lecture and six hours of laboratory a week. Fulfills the upper-level laboratory requirement for the Biology major. Enrollment limited to 12. Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3493 Bacterial Bioprospecting and Biotechnology**

Many bacteria are essential in food industry (fermentation of meats, cheeses, and beverages), agriculture (crop protection against weeds, pathogenic bacteria, and fungi), biotechnology (producing fine chemicals, cofactors, amino acids, and industrial enzymes) and the pharmaceutical industry (producing clinical antibiotics, anticancer, antiviral, veterinary, and immunomodulatory drugs). This laboratory course examines how basic biological understanding can lead to discovery of bacterial products, enzymes and activities useful to humankind. We combine core concepts from biochemistry, bacterial genetics, bioinformatics, chemistry and enzymology to study bacteria from the genus *Streptomyces* and close relatives. Lines of inquiry include environmental isolations, molecular toolbox and host development, plus bioinformatic and laboratory-based analyses of secreted proteins and antibiotics. Prerequisites: Bio 2960 and 2970. One hour of lecture and six hours of laboratory per week. This course fulfills the laboratory requirement for the Biology major. Enrollment limited to 16. Credit 3 units. J. Blodgett  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 3494 Microbes and the Environment**

From the origins of life to global biogeochemical cycling. An examination of microbes (archaea, bacteria, fungi, yeasts, protist and viruses) in the vast array of environments in which they occur, from wetlands and lake sediments, aquifers and deep crustal settings, to polar ice and desert surfaces. Emphasis on the roles that microbes play in biogeochemical cycles, redox processes, contaminant mobility, biodegradation, and ecosystem productivity. The emphasis will be placed on case studies and students will be expected to participate in-class discussions. Prerequisites: Bio 2970: Principles of Biology II (students with only Bio 2960 can contact the instructor for permission to take the course), Chem 106: Introductory General Chemistry II or Chem 112: General Chemistry II, graduate standing, or permission of Dr. Bose. Chem 252: Organic Chemistry II strongly recommended. Credit 4 units. A&S IQ: NSM

---

#### **L41 Biol 3501 Evolution**

A general survey of evolutionary biology, covering both micro- and macroevolution. Topics include natural selection, genetic drift, gene flow, sexual selection, kin selection, pathogen evolution, speciation, phylogenetics, molecular evolution and evolutionary-developmental biology. Weekly discussion sections focus on analysis of recent studies related to lecture topics. Prerequisite: Bio 2970. (Biology Major Area C) Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 354 Physics of Living Systems**

One of the grand challenges in contemporary biophysics is placing our understanding of cellular systems on a firm quantitative footing. How does the collective activity of molecules enable the cell to sense its environment, make decisions, grow and develop? This course, aimed at physical and life science students, will serve as an introduction to the physical principles and mathematical techniques underlying the analysis of systems and synthetic biology. Topics will include modeling gene and signaling networks, the regulation of intracellular structures, and pattern formation in development. Students in this course can expect to learn both analytical and computer simulation approaches to fundamental problems in biology, biophysics, and

biotechnology. Graduate students will explore the subject in more depth. Pre-requisites: Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206. or Math 217 or Math 309, or permission of instructor. 3 units  
Same as L31 Physics 354  
Credit 3 units. A&S IQ: NSM Arch: NSM BU: SCI EN: BME T, TU

---

#### **L41 Biol 360 Biophysics Laboratory**

This laboratory course consists of "table-top" experiments in biological physics that are designed to introduce the student to concepts, methods, and biological model systems in biophysics. Most experiments combine experimentation with computer simulations. The list of available experiments includes electrophysiology, human bioelectricity, optical tweezers, ultrasonic imaging, mass spectrometer, and viscosity measurements. Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206 or permission of instructor. Same as L31 Physics 360  
Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

#### **L41 Biol 363 The Neuroscience of Movement: You Think, So You Can Dance?**

Although humans have expressed themselves through movement throughout time, only recently have neurophysiological investigative techniques allowed us to glimpse the complex neural processes that allow the coordination and integration of thought, action, and perception. This course introduces students to the nascent yet growing field of dance neuroscience. In part one of this course, we explore fundamental concepts of motor control, including how our central nervous system integrates information to allow us to maintain posture and balance, to coordinate our limbs to external rhythms, and to move our bodies gracefully and expressively through space and time. In part two, we explore theoretical frameworks of motor learning as they pertain to movement. We delve into the neuromechanisms underlying common tools that dancers and athletes use to improve motor performance and how dance training induces neuroplasticity in brain structure and function. In part three, we explore the neural underpinnings of aesthetic appreciation while watching dance, including the action observation network and affective responses to art. Required work includes short assignments, a final project and presentation on a topic of your choice related to the course focus, and a few movement workshops (for which dance training is not required). Prerequisite: introductory course in dance, biology, or neuroscience, or permission from the instructor. Same as L29 Dance 363  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 370 Animal Behavior**

This course examines animal behavior from an evolutionary perspective and explores the relationships between animal behavior, ecology, and evolution. Topics include foraging behavior, mating systems, sexual selection, predator-prey relationships, cooperation and altruism, competition and parental care. A student may not receive credit for more than one of the courses Biol 370, Biol 372 and Biol 472. Prerequisite: Biol 2970 or permission of instructor. (Biology Major Area C) Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 373W Laboratory on the Evolution of Animal Behavior (Writing Intensive)**

This course explores the costs, benefits and constraints that drive the evolution of animal behavior. It is divided into four modules that cover a range of common empirical and numerical tools in modern evolutionary biology (no prior experience in any of the following topics is necessary): (1) a brief overview of basic statistics and a tutorial in R; (2) an experimental lab on agonistic behavior in crickets; (3) a computer

simulation lab on the evolution of animal communication; and (4) a phylogenetic comparative analysis lab exploring the topic of sexual selection. Laboratory modules are hands-on and student driven. They begin with an overview of relevant literature and a discussion of key questions that have been addressed experimentally in that field. Students are then encouraged (and guided) to apply these concepts to the design, execution, and analysis of individual and/or collaborative research projects. In the process, they learn how to apply some of the latest numerical and/or empirical research tools in evolutionary biology. A majority of class time is devoted to active learning through the collection and analysis of data (each lab module lasts four weeks). The course also includes weekly presentations by the instructor and class discussions on topics that help place the students' work into the broader context of evolutionary theory. Prerequisites: Biol 2970 and Psych 100B or permission of instructor. This course is Writing Intensive. Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 381 Introduction to Ecology**

This course explores the central theories and principles in ecology and evolution, and the use of these principles to study and predict human-induced environmental changes. It emphasizes understanding species interactions and population dynamics in biological communities, and the relationships between communities and their environment. It regularly touches on applications of these principles such as ecological responses to global climate change, consequences of habitat fragmentation, disease ecology, and conservation medicine. Principles of experimental design, quantitative data analysis and interpretation, and mathematical models are critical to the field of ecology and are also emphasized throughout the course. Class meetings will include lectures, class activities, computer simulation labs, and smaller group discussions to familiarize students with peer-reviewed journals, scientific writing, and current issues in ecology. Assignments include regular homework reading, occasional problem sets, participation in tutorials/discussions, and a small term-paper. Prerequisite: Bio 2970 or Bio 2950 or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 387 Undergraduate Teaching**

Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given a semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology office. Prerequisite: permission of instructor. Credit /No Credit only. Credit variable, maximum 3 units. A&S IQ: NSM

---

#### **L41 Biol 388 Undergraduate Teaching**

Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit /No Credit only. Credit variable, maximum 3 units. A&S IQ: NSM Art: NSM

---

#### **L41 Biol 3900 Science for Agriculture and Environmental Policy**

Government policies at the local, state, and national levels determine and regulate activities that range from local farmers markets to U.S. membership in the Paris Climate Agreement. Science can and should play a critical role in developing policy. This course focuses on the biological science behind policies for climate change and agricultural practice as well as the role of various organizations in providing science for policy. Now is a particularly interesting time for science-based policy with the election of a new U.S. President and the elevation of the President's science advisor to Cabinet level. This course is divided into

three parts. First, we review how policy is developed and how various agencies and actors affect policy. The next section looks at biological topics that have policy implications. These case studies are presented by expert speakers who have had experience in various science-related roles in the federal government, foundations, professional associations, advisory organizations, and scientific publications. Finally, students conduct individual research projects on a science topic that affects current legislative efforts, either state or national. Students investigate the basic science of their chosen topic and how this could affect proposed legislation. As part of the research project, students give a class presentation, lead a class discussion, and write a term paper on the foundational biological science. The goals of this course are as follows: (1) to develop an understanding of how science is used to develop policy by examining case studies presented by experts; and (2) to critique a proposed science-based policy either at the state or federal level.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L41 Biol 4023 How Plants Work: Physiology, Growth, and Metabolism**

This course introduces students to the fundamentals of how plants grow, metabolize and respond to their environment. Topics to be covered include the conversion of light energy into chemical energy through photosynthesis and carbon fixation, nitrogen assimilation, water and mineral uptake and transport, source-sink relationships and long-distance transport of carbon and nitrogen, cell growth and expansion, hormone physiology and physiological responses to a changing environment. Prerequisite: Bio 2960 and Bio 2970, or permission of instructors. (Biology Major Area B) Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 4030 Biological Clocks**

Biological clocks are the endogenous oscillators that coordinate physiological and behavioral rhythms in nearly all organisms. This course examines how these rhythms are generated and regulated. The material includes molecular, cellular and systems physiology and the relevance of biological timing to ecology and health in everything from protozoans to plants to people. Credit 3 units. A&S IQ: NSM Art: NSM

---

#### **L41 Biol 404 Laboratory of Neurophysiology**

Neurophysiology is the study of living neurons. Students record electrical activity of cells to learn principles of the nervous system including sensory transduction and coding, intercellular communication and motor control. The course meets for 9 hours each week. Students may leave the lab for up to 2 hours. Prereq: Bio 3411 or Psych 4411 AND PERMISSION of Student Coordinator, Erin Gerrity. Bio 3411 may be taken concurrently. Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

---

#### **L41 Biol 4071 Developmental Biology**

An introduction to the molecular and cell biology of animal development. The course is divided into three broad sections, which cover 1) an introduction to the major cell-cell signaling systems used during development and their study in model organisms, 2) molecular studies of early vertebrate development, and 3) the biology of stem cells. The focus is on molecular approaches applied to important model systems, but framed in classical concepts. Prereqs.: Principles of Biology II (Biol 2970); Cell Biology (Biol 334) and/or a course in biochemistry recommended. Small Class. Credit 3 units. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L41 Biol 4072 Regenerative and Stem Cell Biology**

Regeneration is a very complex, post-embryonic developmental phenomenon, where organisms replace lost body parts and organs upon injury. However, we still know very little about why some animals are so successful at regenerating whole bodies and organs, while other animals (like humans) have limited or no capacity to do so. This course covers regeneration and stem cell biology across different levels of biological organization (e.g. cell, organ, limb regeneration.) and across the animal phylogeny. Students learn about mechanisms of regeneration at the cellular and molecular level, and how these mechanisms vary among organisms. In addition to the general principles of stem cells and regenerative biology, the course will be a good introduction to animal diversity and evolutionary developmental biology (evo-devo). Students will read and discuss primary literature, and write up their own experimental design to test hypotheses. Prerequisites: Bio 2970 (Principles of Biology 2 - Genetics) (Biology Major Area B)

Credit 3 units. A&S IQ: NSM Art: NSM

---

#### **L41 Biol 4073 Human Reproductive Physiology**

This course is designed to give students a comprehensive foundation in human reproductive physiology through a variety of learning modalities. The course focuses primarily on normal physiology of human reproductive systems, although some lecturers will introduce pathologies as a way to strengthen subject matter understanding. This course aims to deepen student knowledge of reproductive systems down to the cellular and molecular level in order to 1) connect them with their own physiology, and 2) broaden their understanding of the biological systems integral to the human experience. The course material will provide students with foundational knowledge in reproductive physiology that will help prepare them for medical school, biomedical research, and careers in the field of reproductive sciences. This course is intended for students in the master of reproductive sciences program, DBBS and BME graduate students, and advanced biology/pre-health undergraduate students with an interest in reproductive physiology.

Credit 4 units.

---

#### **L41 Biol 4132 Plant Diversity and Evolution**

This course is an in-depth exploration of the diversity and evolution of vascular plants. The course focuses mainly on flowering plants because of their dominant role on our planet, but lycophytes, ferns, and gymnosperms are studied as well. A phylogeny of vascular plants provides the framework for their evolution and diversification. Related subjects, including phylogenetics, biogeography, herbaria, nomenclature, species concepts, and pollination biology are also presented. The weekly lectures/discussions and (three hour) lab function in tandem and it is the responsibility for the student to integrate information from the lectures with the abundant materials presented in lab. The lecture will take place on main campus at WashU, and the lab sessions will make use of the abundant and exceptional living and preserved materials at the Missouri Botanical Garden. The intended audience is advanced undergraduates and graduate students. Prerequisite: Bio 2970 or Permission of Instructor. Small Class. Credit. Credit 3 units. A&S IQ: NSM

---

#### **L41 Biol 4150 Environmental Medicine**

Environmental Medicine explores the interactions between the environment and human health, focusing on the role of the environment in causing or mediating disease. Environmental hazards are examined in terms of toxicology, epidemiology, exposure assessment, risk assessment, individual susceptibility, adaptation/maladaptation, and the total load concept. Students enrolled in the 500-level must also complete a term paper and oral presentation. Prerequisites: General Biology I or permission of instructor. Same as L41 Biol 5150

Credit 3 units.

---

#### **L41 Biol 4181 Population Genetics**

An introduction to the basic principles of population and ecological genetics. Mechanisms of microevolutionary processes; integrated ecological and genetic approach to study the adaptive nature of the evolutionary process. Prerequisite: Bio 2970.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L41 Biol 4182 Macroevolution**

An advanced introduction to the study of macroevolutionary patterns and processes with emphasis on the systematic methodology employed. Topics: theories of classification, phylogenetic reconstruction, testing of historical hypotheses, hierarchy theory, adaptation, extinction, speciation, developmental mechanisms of organismal evolution, biogeography. Prerequisite: permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L41 Biol 4183 Molecular Evolution**

A rigorous introduction to the study of evolution at the molecular level. Topics include the origin, amount, distribution and significance of molecular genetic variation within species, and use of molecular data in systematics and in testing macroevolutionary hypotheses. Prerequisite: Bio 2970, or permission of instructor.

Credit 3 units. A&S IQ: NSM Art: NSM

---

#### **L41 Biol 419 Community Ecology**

Community ecology is an interdisciplinary field that bridges concepts in biodiversity science, biogeography, evolution and conservation. This course provides an introduction to the study of pattern and process in ecological communities with an emphasis on theoretical, statistical and experimental approaches. Topics include: ecological and evolutionary processes that create and maintain patterns of biodiversity; biodiversity and ecosystem function; island biogeography, metacommunity dynamics, niche and neutral theory; species interactions (competition, predation, food webs), species coexistence and environmental change. The class format includes lectures, discussions, and computer labs focused on analysis, modeling and presentation of ecological data using the statistical program R. Prereq: Bio 2970 required, Bio 381 recommended, or permission of instructor. (Biology Major Area C)

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L41 Biol 4193 Experimental Ecology Laboratory**

The goal of this course is to provide skills in the design, interpretation, and written presentation of ecological and evolutionary experiments, with emphasis on sampling methodology, hypothesis testing, and data analysis. A key objective of this course is to familiarize students with the importance of statistics and experimental design as unified tool, rather than two separate processes. We will practice how to abstract theories, hypotheses, predictions, mathematically, how to contrast them with data, and interpret the results. The course does not seek to be exhaustive of all experimental designs or statistical techniques, nor intensive in any given one. Rather, its focus is on providing the tools and concepts for the critical evaluation, choice, interpretation and further independent learning of the experimental and statistical tools needed for research. Practical analysis of data will be taught in program R, but no prior knowledge is required. During the course, students will plan and execute their own ecological studies, within the limitations of the current pandemic. This is a writing intensive course and grades are based on written assignments, including final projects, and in-class participation. This course fulfills the upper-level laboratory requirement for the Biology major. Prereq: Permission of instructor and at least one of the following: Bio Bio 3501, Bio 372, Bio 381, Bio 419, or Bio 472. Enrollment is limited to 10 students. Credit 4 units.

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

---

#### L41 Biol 4195 Disease Ecology

Disease ecology is an interdisciplinary field that bridges concepts from fields including population ecology, community ecology, landscape ecology, and evolutionary biology. This course provides an introduction to the study of infectious diseases with an emphasis on theoretical, experimental, and quantitative approaches. The course will integrate studies of infectious diseases from across disciplines including human epidemiology, veterinary medicine, wildlife epidemiology, plant pathology, parasitology, and ecology. Principles of Biology II (Bio 2970) required, Introduction to Ecology (Bio 381) recommended, or permission of instructor.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### L41 Biol 4202 Anthropological Genetics

This course will examine the principles of evolutionary genetics as applied to complex characters such as morphology, behavior, life history, and disease. Mathematical models of quantitative inheritance and evolution will be discussed. Special topics include kin selection, sexual dimorphism and conservation genetics. Prerequisite: Anthro 150A or introductory biology.

Same as L48 Anthro 4202

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### L41 Biol 4220 Practical Bioinformatics

From medicine to genomics to ecology, all fields of biology are now generating large and complex datasets that can only be analyzed using computational approaches. This course introduces computational techniques and perspectives to biologists that are new to computational thinking. Students will learn how to design research workflows, decompose complex problems into simpler solvable units, and apply scientific computing principles to research. In addition, students will practice foundational computing skills, such as using the UNIX operating system on research clusters, writing custom analysis programs with shell scripts and with Python, and summarizing and visualizing analysis output. The laboratory exercises build on one another, culminating in the construction of a bioinformatics pipeline that can process and analyze molecular data. Students will apply their newly learned computational skills and use their pipeline to analyze virus sequence evolution and explore evolutionary models. Prerequisites: Biol 2970; Math 132 (Calculus II); Math 223 (Calculus III) or Math 2200 (Elementary Probability); CSE 131 (Computer Science I; suggested course); permission of instructor. Credit/no credit.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### L41 Biol 424 Immunology

Basic molecular and cellular aspects of the vertebrate immune system with emphasis upon the interrelationships of non-specific and specific host defense against disease, the nature of immunological specificity and its underlying molecular biology. Includes complement systems, immunochemistry, the nature of cellular activation and effector generation, immunodeficiency, tolerance, tissue transplantation, hypersensitivity, immune regulation and specific diseases illustrative of the successes and failures of the immune system. Case studies will be presented by the students on an array of immune system disease. Prerequisites: Bio 2970 and Chem 262. Interested Juniors in their second semester are particularly encouraged to register for this course.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### L41 Biol 4242 Virology

Viruses are all around us and play key roles in health, evolution, ecology, agriculture, and can even completely disrupt societies. In this course, we explore the wide array of viruses, the basics of their structure, the infection cycle, their role in human health, and how we

can adapt viruses for uses in research, agriculture, and biotechnology. Emphasis is on animal viruses, specifically medically relevant viruses, including HIV and SARS-CoV-2, and recent advances in virology. While primarily a lecture-based course, students present on a relevant virus and read primary literature. Prerequisite(s): Either BIOL349 (Fundamentals of Microbiology) or BIOL334 (Cell Biology).

Credit 3 units. A&S IQ: NSM Art: NSM

---

#### L41 Biol 4244 Advances in Immunology

One of life's greatest challenges is how do we best survive in a world that is constantly challenging us to survive the many and varied types of infections that would threaten our survival. The main way in which we survive is the immune system that we possess. As a consequence, this course covers basic molecular and cellular aspects of the vertebrate immune system emphasizing specific and nonspecific host defense against disease. In so doing, we will discuss the nature of immunological specificity, and its underlying molecular genetics. We also cover how our immune system responds to foreign invaders by describing the nature of cell activation, the results of such activation in the form of both cellular activities and the impact of factors released by these cells. Finally, we will consider the role that the immune response plays in tolerance, autoimmunity, allergic reactions, transplantation reactions, immunodeficiency, and how it responds to cancer. In so doing, you will have a better understanding as to how we respond to the world in which we live. Prerequisites: it is recommended, but not required, that you have some knowledge of: Biochemistry, Cell Biology, Molecular Biology/Nucleic Acids, Microbiology/Virology, Pathology/Pathobiology.

Same as L41 Biol 5244

Credit 3 units.

---

#### L41 Biol 4270 Problem Based Learning in Biomedical Sciences

Groups of 5-8 students are presented with medical case studies that are then researched and discussed under faculty guidance. Students take major responsibility for their own learning within their team. Prerequisite: Bio 2970; some experience in molecular biology. A biology or science background is required. Same content as discontinued course Bio 427, but not Writing Intensive. Not available to students who have credit for Bio 427.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### L41 Biol 4271 The Science of Cats

This capstone-style course will give students the opportunity to apply what they've learned in topics as diverse as speciation, molecular evolution, community ecology and animal behavior to investigate and analyze questions concerning the biology of a species near and dear to the hearts of many, *Felis catus*, the domestic cat. Over the last several decades, scientists have studied cats in the same way they have studied lizards, birds, flies and many other species. This cat research allows questions of broad scientific interest to be addressed using cutting-edge methods, including (but not limited to): what is a species? How do new species arise? How do we determine when, where and from what species the cat evolved? How do we determine if a trait (e.g., response to catnip) evolved as an adaptation driven by natural selection? How do we determine the impact of an invasive species on local ecosystems? How does domestication occur and is the cat actually domesticated? Is the behavior of domestic cats a legacy of their evolutionary past or does it represent adaptation to living with humans? What role, if any, can genetic engineering play in decreasing feral cat populations and developing new breeds of cats with desirable traits.

Credit 3 units. A&S IQ: NSM

---

#### **L41 Biol 4310 Biology of Aging**

This course provides concepts and examples of the biology of aging. We discuss current literature with emphasis on theoretical causes of aging and the practical implications of these theories. Major topics include the biochemical processes of aging, cell cycle senescence, age-related organ dysfunction, interventions to alter the aging process, and medical illnesses associated with aging (e.g., Alzheimer's disease, the dementias). We also study animal and human models for extending longevity, and current approaches for dealing with the aging process are included. Prerequisites: Biol 2960 and Biol 2970 or equivalent; Chem 105 and Chem 106 or equivalent are recommended.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 4342 Research Explorations in Genomics**

A collaborative laboratory investigation of a problem in comparative genomics, utilizing a variety of bioinformatics tools to manage and investigate large data sets (currently including genomic sequences, gene predictions, sequence conservation, gene expression). In spring '18 the research problem involves improving the sequence of a region of the *Drosophila eugracilis* genome, and working with one of these sequences to examine patterns of genome organization, gene structure and gene regulation. Prerequisites: Bio 297A, Chemistry 111/112, 151/152. While Bio 3371 or Bio 437, and some familiarity with computers would be advantageous, this is NOT required. Fulfills the upper-level laboratory requirement for the Biology major.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L41 Biol 4344 Epigenetics**

Introductory course in epigenetics - the layer of chemical information that sits on top of the genome - that switch genes 'on' or 'off'. Will introduce how the epigenome, in collaboration with the genome, controls versatile biological processes and cell fates. Will also cover the latest advances of how humans can control their own epigenetic destiny by lifestyle, diet, and other environmental factors. Learning Objectives: Recognize and summarize the difference between genetics and epigenetics, Apply the basic knowledge of epigenetic mechanism and illustrate how their misregulations cause abnormal development and diseases, Critically review and discuss epigenetic literature, Design epigenetic experiments and interpret the results of those experiments, Graduate student specific: Demonstrate the ability to clearly communicate epigenetic research in both oral and written formats. Prerequisite: Biology 2960 and Biology 2970 (or consent of instructor) (Biology Major Area A)

Credit 3 units. A&S IQ: NSM Art: NSM

---

#### **L41 Biol 434W Research Explorations in Genomics (Writing-Intensive)**

Content equivalent to Bio 4342. Students electing the writing option are required to revise each of three papers (on finishing of their fosmid; gene finding in a human/chip comparison; and annotating their fosmid) at least once.

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

---

#### **L41 Biol 4360 Neural Basis of Behavior**

This course provides an overview of how the nervous system works from a biological perspective. We will begin by studying how nerve cells function, focusing on how they transmit signals and communicate with one another through specialized connections called synapses. We will further examine the anatomy of the nervous system to discover how nerve cells are organized into circuits and how these circuits develop. We will investigate how the specialized properties of our nerve cells allow us to interact with our environment through an in-depth study of our motor and sensory systems. In our 500 level course, we will apply our learning objectives to a scientific research presentation using peer reviewed literature.

Same as L41 Biol 5360

Credit 3 units.

---

#### **L41 Biol 437 Laboratory on DNA Manipulation**

This course provides investigation-driven research on experimental manipulation of DNA and RNA molecules. This includes the construction, isolation and analysis of plasmids, RNA, PCR products and DNA sequencing. Molecular cloning (genetic engineering), gene knockouts (mutants), RNA isolation, RT-PCR, and microarray projects are performed. Prerequisite: Bio 2960 and Bio 2970. One hour of lecture and six hours of laboratory each week. This course fulfills the upper-level laboratory requirement for the Biology major. Enrollment is limited to 12. A laboratory fee is required for students who are not full-time Washington University undergraduates.

Credit 4 units. A&S IQ: NSM Art: NSM

---

#### **L41 Biol 4381 Cell-Based Tissue Engineering and Regenerative Medicine**

This course focuses on how new directions in cellular, molecular and developmental biology are interfacing with advances in biomaterials tissue engineering, innovative devices, and advanced technologies (such as 3D printing and CRISPR) to replace, restore, and/or correct genetic, acquired, or damaged tissues and organs. Coverage includes the rapidly expanding use of types of stem cells and their preparation alone or in concert with biomaterial scaffolds, nanomaterials, and growth factors. Tissue engineered therapies for cancer, diabetes, autoimmune disorders and other conditions are reviewed. Examples of tissue engineering approaches for regeneration of nerves, cardiovascular, kidney, cartilage, bone, ligament, tendons, and skin are discussed in some detail. Regulatory issues, ethical guidelines, and commercial perspectives will be woven into our discussions. Prerequisites: Biol 2970, Biol 3058, Biol 334. (Biology Major Area B)

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L41 Biol 4492 Infectious Diseases: History, Pathology, and Prevention**

Leveraging the primary research literature, this course examines the history and pathology of infectious disease, the development of antibiotics and vaccines, the rise of antibiotic resistance, and the emergence and reemergence of diseases including Zika virus, Malaria, and Tuberculosis. In addition to gaining insights into the underlying causes and treatment of infectious disease, students will hone their ability to identify important biological questions, develop testable hypotheses, design experiments tailored to particular questions, and evaluate results. Through a series of written and oral assignments, students develop the skills to communicate about science effectively to both the research community and the general public. Prerequisites: One semester of Biology 500: Independent Research or equivalent is REQUIRED. Preference will be given to students who have completed Biology 349, Fundamentals of Microbiology. Area A. 3.0 units. Writing Intensive. P. Levin.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 451 General Biochemistry**

A study of structure-function relationships as applied to carbohydrates, proteins, and lipids; intermediary metabolism of principal cellular components; and general aspects of regulation. Prereqs: Biol 2970 and Chem 262 and permission of department. Recommended for students who have achieved grades of B or better in the prerequisites. Students may not receive credit for both Biol 4801 and Biol 451.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L41 Biol 4522 Laboratory in Protein Analysis, Proteomics, and Protein Structure**

In this laboratory course, students learn principles and methods of protein quantitation, protein purification, assessment of purity using SDS-polyacrylamide gel electrophoresis, separation of complex protein mixtures by two-dimensional gel electrophoresis, definition of units of enzymatic activity, and identification of proteins using antibodies and/or mass spectrometry. The final part of the course introduces students to concepts of structural biology including protein crystallization, x-ray crystallography and computer modeling of protein structures. Fulfills the upper-level laboratory requirement for the Biology major. Prerequisites: Chem 252 and either Bio 451 or Bio 4501/Chem 456. Permission of instructor required. Limit: 8 students. Eight hours of laboratory/lecture per week.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L41 Biol 4523 Molecular Methods in Enzyme Analysis**

Understanding enzyme structure and function is essential for many important drug-design projects. This course focuses on common methods used to investigate enzyme active sites to elucidate binding interactions between small molecules and enzymes. Students use three-dimensional protein viewing software to design and model modifications to an enzyme active site, and they then perform those modifications using recombinant DNA technology and site-directed mutagenesis. This course also introduces other commonly used methods to assay active-site metals, characterize inhibitors, overexpress and purify proteins, and use ultraviolet spectroscopy to analyze enzyme activity. This is an investigative course in which students complete collaborative research projects in small groups. It fulfills the upper-level laboratory requirement for the generic biology major and the biochemistry track; intended for students who have no other courses that fulfill these requirements. Prerequisite: Biol 2970. Limit 12 students.

Credit 4 units. A&S IQ: NSM Arch: NSM BU: SCI

---

**L41 Biol 4525 Structural Bioinformatics of Proteins (Writing Intensive)**

In this investigative laboratory course, students will be given high-quality, experimentally determined, three-dimensional structural coordinates and will use cutting-edge bioinformatics tools and methods to evaluate and analyze these datasets. Some topics include: structural validation, protein-structure prediction, domain and motif recognition, secondary structure prediction, protein-protein and protein-ligand interactions, protein and structure-based sequence alignments, inferring protein function from structure, electrostatic interactions, and threading and homology modeling. Upon completing their analyses, students will be responsible for writing a manuscript that will be submitted to a scientific journal for publication. Prerequisites: Bio 2960 and Chem 262. Fulfills upper-level laboratory requirement for the biology major.

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

---

**L41 Biol 4540 Physics of Living Systems**

Contents are the same as Phys 354. Graduate students will explore the subject in more depth. Pre-requisites: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206. or Math 217 or Math 309, or permission of instructor. 3 units  
Same as L31 Physics 454

Credit 3 units. A&S IQ: NSM Arch: NSM EN: TU

---

**L41 Biol 4580 Principles of Human Anatomy and Development**

This course will discuss the anatomy of most of the functional systems of the human body. Topics covered will include the peripheral nervous system, respiration, circulation, the skeletal system, the gastro-intestinal tract, the urogenital system, the male and female

reproductive systems, locomotion, manipulation, mastication, vocalization, the visual system, the auditory system and the olfactory system. Selected topics in human embryology will also be introduced. The course provides valuable preparation for any student interested in human biology, anthropology, medicine or the health sciences.

Same as L48 Anthro 4581

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L41 Biol 4582 The Physiology and Biophysics of Consciousness**

This course will explore the questions surrounding the search to understand the biophysical substrate of consciousness. Some areas to be explored: 1. Can consciousness be addressed like any other biological property in the sense that it has evolved by natural selection and that some elements of it are present in simple model systems, such as the fruit fly? Can insight be gained studying simple model systems? 2. Where in the brain is consciousness? What is the pattern of neurological events that occurs during consciousness? Is brain activity generating consciousness localized or distributed? Does it involve interacting brain regions? Does brain activity generating consciousness migrate to different brain regions? 3. How does the dynamic core hypothesis of Edelman relate to these questions? What can functional brain imaging add to these questions? Are Gamma waves involved in higher mental activity, and do they promote synchronized firing of neurons from different brain areas? How does this relate to the binding problem? 4. How does the brain's ability to function as a computer relate to consciousness? In many respects the brain functions as a computer using electrical signals called Action Potentials. Action potentials in neuronal networks function in an analogous way as DC electrical impulses function in computer circuits. What is the output of computation in an electrical device? What are the theoretical limitations regarding what computation can achieve and ask whether electrical activity in the brain also has a fundamentally different purpose in addition to computation. 5. Is our knowledge of the physical world too primitive and incomplete to understand consciousness? The brain is an electronic device and consciousness clearly depends on its electrical activity. Yet, electrical forces are poorly understood, both in the context of classical physics and quantum physics. Will understanding consciousness have to wait for a unified theory that more accurately describes electrical forces? Prerequisites: Bio3411 or equivalent. College level physics, Some knowledge of computers. Same as L64 PNP 402

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 4715 Basic Cancer Biology**

More than two thirds of all people know someone who has cancer. This course provides students with a more extensive understanding of what cancer is and how it affects the human body. We will discuss the history of cancer research, the many different types of human cancers, and basic chemotherapeutics. The topics will be presented in a basic scientific nature, with an emphasis on gaining a broad understanding of the subjects. Prerequisite: Biol 2960 or equivalent. Not available to students who have credit for Biol 144 or Biol 1440.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L41 Biol 4716 Advanced Cancer Biology**

This advanced course provides students with a more in-depth understanding of the molecular mechanisms of cancer. We will discuss tumor suppressors, oncogenes, signaling pathways, animal models in cancer, and novel targeted cancer therapies being developed by biotechnology and pharmaceutical companies. Prerequisite: Biol 144, Biol 1440 or Biol 4715.

Credit 3 units. A&S IQ: NSM BU: SCI

---

**L41 Biol 472 Behavioral Ecology**

This course examines animal behavior from an evolutionary perspective and explores the relationships between animal behavior, ecology, and evolution. Topics include mating systems, sexual selection, parental care, kin selection, and cooperation. There is a strong active-learning component. Prerequisite: Bio 2970 or permission of instructor.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 4810 General Biochemistry I**

Topics include the properties and structures of biomolecules, including amino acids, nucleotides, lipids, carbohydrates, proteins and nucleic acids. Additional topics include enzyme kinetics and mechanisms, membrane structure and properties, protein folding, an introduction to metabolism, oxidative phosphorylation and photosynthesis. This course is the first semester of an integrated two-semester sequence. The second course is Chem 482. Prerequisites: Biol 2970, Chem 262. Same as L07 Chem 481

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 4820 General Biochemistry II**

Biochemistry explores the chemistry of life processes at the molecular level. This course is the second semester of a two-semester General Biochemistry sequence (Chem481/482 or Bio4810/4820). Prerequisites include Chem481/Bio4810 and Chem262 or instructor permission. The first semester of the Biochemistry sequence covered the basics of the topic with an emphasis on the structures, functions, and interactions of biomolecules including proteins, nucleic acids, carbohydrates, and lipids. This second semester course will emphasize metabolism, the biosynthetic (anabolism) and degradation (catabolism) pathways that provide the energy of life and define the molecules associated with healthy and disease states.

Same as L07 Chem 482

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 4833 Protein Biochemistry**

The focus of this course is protein biochemistry, and is intended to build upon General Biochemistry (Chem 481). In this course we will focus on protein structure, folding, and techniques to purify and characterize protein activity. We will progress from initial studies to first understand protein fold and function to current efforts to better characterize protein structure-function relationships. We will also highlight human diseases that are underpinned by protein misfolding. This course will focus on reading and understanding primary literature, including landmark papers along with more recent work. During the second half of the semester, each student will select a paper and prepare a written analysis of that paper. The student will then present the paper and lead a journal club style discussion of the paper. Prerequisites: Chem 481 or instructor's permission

Same as L07 Chem 483

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L41 Biol 487 Undergraduate Teaching**

Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit /No Credit only.

Credit variable, maximum 3 units.

---

**L41 Biol 488 Undergraduate Teaching**

Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit /No Credit only.

Credit variable, maximum 3 units.

---

**L41 Biol 493 Seminar in Advanced Biology**

In special cases, credit may be given for individual study. Topics of study and credit must be arranged with a faculty sponsor and approved by the Department.

Credit variable, maximum 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 4933 Molecular Biology on the Cutting Edge**

Recent biomedical discoveries have been greatly advanced through the development of innovative, state-of-the-art techniques. For example, Nuclear Magnetic Resonance (NMR) has proved to be an invaluable tool in both efforts to determine the atomic structure of proteins and small molecules as well as in clinical settings, as MRI to identify tumors that would otherwise go unnoticed. This course will introduce students to a variety of cutting-edge laboratory techniques, and discuss the impact of these techniques on biology and medicine. Students will have the unique opportunity to learn from graduate students employing these approaches in their doctoral studies. Topics to be covered include: high-throughput sequencing of genetic disorders, x-ray crystallography, and single molecule force spectroscopy by AFM. Weekly classes will consist of a 30-45 minute presentation on a particular technique, followed by 60-minute discussion of the assigned readings. Prerequisites: Biology 2960 and 2970 and at least one semester of BIO500 or equivalent research experience approved by the course master.

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 4934 Neuroscience Futures 2**

Students in this course engage with the neuroscience community both at WUSTL and beyond by attending, summarizing, and discussing neuroscience seminars on campus throughout the semester. Specifically, students are expected to attend three neuroscience seminars over the course of the semester, and submit summaries of each seminar. Students meet twice during the semester, in week 5 and week 11, for guided discussion of the science in the seminars they attended. Additionally, students in this seminar attend two combined classes with Neuroscience Futures 1 during the first and last weeks of the semester. In both meetings, students have an opportunity to give brief presentations on their own research. The last class combines short student presentations with a keynote address from an invited speaker from within or outside the WUSTL neuroscience community.

Credit 1 unit.

---

**L41 Biol 4935 Research Perspectives**

Critical reading, writing, statistics, and effective communication are all part of research and are the focus of this course, with topics changing each semester but always including a poster presentation and weekly writing. Enrollment is by permission only from Joan Strassmann. 2 credits. Credit. Joan Strassmann, David Queller, and selected postdoctoral fellows

Credit variable, maximum 2 units. A&S IQ: NSM

---

---

#### **L41 Biol 4936 Seminars in Ecology and Evolution**

What: At least once a week there are seminars from researchers in ecology or evolution. These seminars are given by local people and by visitors. This semester there are also a number of presentations by job candidates. The point of these seminars is to learn about exciting research. What questions are they asking? What are they discovering? What new scientific stories can we hear about ecology or evolution? What makes up these fields anyway? The seminars are often followed by receptions which are a chance to get to know each other better and to ask questions. This course invites undergraduates to listen to these presentations and write about them. After all, this is a major part of the ideas climate at Wash U. It would be a great idea to get in the habit of going to seminars, with this course, or without. In addition to attending seminars, we will meet three times during the semester, early on and a couple of times later. When: Most seminars are 4:00 on Thursdays, though some are on other days. The three meetings will be arranged at a time that works for the students in the course. Small class. No final. Credit 1.0 units  
Credit 1 unit.

---

#### **L41 Biol 4937 Journal Club on Current Topics in Microbiology and Infectious Disease**

We read, analyze, and discuss recent primary literature drawn from the field of microbiology. These papers represent the seven broad "Topics" of microbiology, as defined by the American Society for Microbiology (<https://asm.org/>): -Antimicrobial Agents & Resistance -Applied & Environmental Microbiology -Clinical & Public Health Microbiology -Clinical Infections & Vaccines -Ecology, Evolution, & Biodiversity -Host-Microbe Biology -Molecular Biology & Physiology Each week we discuss a single primary research paper, with special emphasis placed on analyzing and interpreting data and figures. Some assignments include supplementary videos or readings to provide the background knowledge required to understand a particular paper. To ensure that students have sufficient prior exposure to microbiological concepts, Biology 349: Foundations of Microbiology is a prerequisite for this course. At the conclusion of the semester, students should have achieved the following objectives: 1. Gain insight into the breadth of research performed within the field of microbiology. 2. Develop skills required to comprehend and to analyze primary research literature. Credit 1 unit.

---

#### **L41 Biol 500 Independent Research**

Research under the supervision of a faculty mentor. Prerequisites: junior or senior standing and permission of mentor and the department. Credit/No Credit or Audit grade options; credit to be determined in each case, usually 3 units/semester and not to exceed 3 units/semester; may be repeated for credit. Because this course has a large number of sections, some sections are listed and enrolled as Bio 500A. If work is to be submitted for Latin honors, see p. 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program. The handbook can be found online at: <https://wustl.app.box.com/s/d63rx5o0kygqtsv899eyhax5v31gvy1a>. Arrangements for registration should be completed during the preregistration period through the Bio 500 course website [https://pages.wustl.edu/Bio\\_200-500\\_independent\\_research](https://pages.wustl.edu/Bio_200-500_independent_research). Credit variable, maximum 3 units.

---

#### **L41 Biol 500A Independent Research**

Research under the supervision of a faculty mentor. Prerequisites: junior or senior standing and permission of mentor and the department. Credit/No Credit or Audit grade options; credit to be determined in each case, usually 3 units/semester and not to exceed 3 units/semester; may be repeated for credit. 500A is equivalent to Bio 500. If work is to be submitted for Latin honors, see p. 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program. The handbook can be found online at:

<https://wustl.app.box.com/s/d63rx5o0kygqtsv899eyhax5v31gvy1a>. Arrangements for registration should be completed during the preregistration period through the Bio 500 course website: [https://pages.wustl.edu/Bio\\_200-500\\_independent\\_research](https://pages.wustl.edu/Bio_200-500_independent_research). Credit variable, maximum 3 units.

---

#### **L41 Biol 500N Independent Research in Neuroscience**

Research in neuroscience under the supervision of a faculty mentor. Prerequisites: junior or senior standing and permission of mentor and the department. Credit/No Credit or Audit grade options; credit to be determined in each case, usually 3 units/semester and not to exceed 3 units/semester; may be repeated for credit. If work is to be submitted for Latin honors, see p. 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program. The handbook can be found online at: <https://wustl.app.box.com/s/d63rx5o0kygqtsv899eyhax5v31gvy1a>. Arrangements for registration should be completed during the preregistration period through the Bio 500 course website: [https://pages.wustl.edu/Bio\\_200-500\\_independent\\_research](https://pages.wustl.edu/Bio_200-500_independent_research). Credit variable, maximum 3 units.

---

#### **L41 Biol 500S Summer Independent Research**

Summer research under the supervision of a faculty mentor. Prerequisites: junior or senior standing and permission of mentor and the department. Credit to be determined in each case, usually 3 units/summer; may be repeated for credit in different summers. Because this course has a large number of sections, some sections are listed and enrolled as Bio 500T. Credits are received in the fall semester following the summer research. If work is to be submitted for Latin honors, see p. 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program. The handbook can be found online at: <https://wustl.app.box.com/s/d63rx5o0kygqtsv899eyhax5v31gvy1a>. Arrangements for registration should be completed no later than the end of Summer Session I through the Bio 500 course website: [https://pages.wustl.edu/Bio\\_200-500\\_independent\\_research](https://pages.wustl.edu/Bio_200-500_independent_research). Credit/No Credit or Audit grade options. Course may not be taken for a letter grade. 1-3 units  
Credit variable, maximum 3 units.

---

#### **L41 Biol 500U Summer Independent Research in Neuroscience**

Summer research in neuroscience under the supervision of a faculty mentor. Prerequisites: junior or senior standing and permission of mentor and the department. Credit to be determined in each case, usually 3 units/summer; may be repeated for credit in different summers. Credits are received in the fall semester following the summer research. If work is to be submitted for Latin honors, see p. 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program. The handbook can be found online at: <https://wustl.app.box.com/s/d63rx5o0kygqtsv899eyhax5v31gvy1a>. Arrangements for registration should be completed no later than the end of Summer Session I through the Bio 500 course website: [https://pages.wustl.edu/Bio\\_200-500\\_independent\\_research](https://pages.wustl.edu/Bio_200-500_independent_research). Credit/No Credit or Audit grade options. Course may not be taken for a letter grade. 1-3 units  
Credit variable, maximum 3 units.

---

#### **L41 Biol 501 Human Anatomy & Development**

Study of the human body primarily by dissection; extensive use of X-rays and CT scans. Emphasis on functional and clinical aspects of anatomy. Prerequisite: This course is restricted to first year medical students. Same as L48 Anthro 502 and M05 AnatNeuro 501A. Credit 6 units.

---

---

#### **L41 Biol 5011 Ethics & Research Science**

Exploration of ethical issues which research scientists encounter in their professional activities. Topics will include, but are not limited to: student-mentor relationships, allegations of fraud, collaborators' rights and responsibilities, conflicts of interest, confidentiality, publications. Case study and scenario presentations will provide focus for discussions. Prerequisite, open to graduate students engaged in research. Six 90 minute sessions.

Credit 1 unit.

---

#### **L41 Biol 5014 Biotech Industry Innovators**

Late one Friday afternoon in April 1976, the late venture capitalist Robert Swanson met with biochemist Herb Boyer, PhD, at his UCSF lab. Swanson had requested 10 minutes of Boyer's time; when the meeting ended, three hours later, the foundations had been laid for the formation of Genentech, the first biotechnology company, and the beginnings of the biotechnology industry. This course, The Basics of Bio-Entrepreneurship, investigates issues and choices that inventor/scientists encounter when considering the applications and commercialization of early stage scientific discoveries. This course is intended for anyone interested in working in the medical device, life-, bio-, or pharma-sciences industries as a founder, scientist, entrepreneur, manager, consultant, or investor. It focuses on the decision processes and issues that researchers and their business partners face when considering how a discovery might best be moved from academia to successful commercialization.

Credit 3 units.

---

#### **L41 Biol 502 General Physiology**

This course applies the fundamental physiological mechanisms of cell biology to the functions of the major organ systems of the body, namely, the cardiovascular, renal, respiratory, gastrointestinal, and endocrine systems. The course is intended primarily for first-year medical students. The Physiology and Microscopic Anatomy courses are closely coordinated within the same schedule. Course continues into the spring semester with a different schedule. Prerequisite, Biol 5061 or the equivalent and permission of course director.

Credit 6 units.

---

#### **L41 Biol 5053 Immunobiology I**

Immunobiology I and II are a series of two courses taught by the faculty members of the Immunology Program. These courses cover in depth modern immunology and are based on Janeway's Immunobiology 8th Edition textbook. In Immunobiology I, the topics include: basic concepts in immunology, innate immunity: the first lines of defense, the induce responses of innate immunity, antigen recognition by B-cell and T-cell receptors, the generation of lymphocyte antigen receptors, antigen presentation to T lymphocytes and signaling through immune system receptors. In Immunobiology II the topics include: the development and survival of lymphocytes, T cell-mediated immunity, the humoral immune response, dynamics of adaptive immunity, the mucosal immune system, failures of host defense mechanisms, allergy and allergic diseases, autoimmunity and transplantation, and manipulation of the immune response. These courses are open to graduate students. Advanced undergraduate students may take these courses upon permission of the coursemaster. Prereq: DBBS students and advanced undergraduates with permission.

Credit 4 units.

---

#### **L41 Biol 5054 Immunobiology II**

Immunobiology I and II are a series of two courses taught by the faculty members of the Immunology Program. These courses cover in depth modern immunology and are based on Janeway's Immunobiology 8th Edition textbook. In Immunobiology I, the topics include: basic concepts in immunology, innate immunity: the first lines of defense, the induce responses of innate immunity, antigen recognition by

B-cell and T-cell receptors, the generation of lymphocyte antigen receptors, antigen presentation to T lymphocytes and signaling through immune system receptors. In Immunobiology II the topics include: the development and survival of lymphocytes, T cell-mediated immunity, the humoral immune response, dynamics of adaptive immunity, the mucosal immune system, failures of host defense mechanisms, allergy and allergic diseases, autoimmunity and transplantation, and manipulation of the immune response. These courses are open to graduate students. Advanced undergraduate students may take these courses upon permission of the coursemaster. Prereq: DBBS students and advanced undergraduates with permission.

Credit 4 units.

---

#### **L41 Biol 5068 Fundamentals of Molecular Cell Biology**

This is a core course for incoming graduate students in Cell and Molecular Biology programs to learn about research and experimental strategies used to dissect molecular mechanisms that underlie cell structure and function, including techniques of protein biochemistry. Enrolling students should have backgrounds in cell biology and biochemistry, such as courses comparable to L41 Biol 334 and L41 Biol 4501. The format is two lectures and one small group discussion section per week. Discussion section focuses on original research articles. Same as M15 5068 and M04 5068.

Credit 4 units.

---

#### **L41 Biol 5075 Fundamentals of Biostatistics for Graduate Students**

This course is designed for first-year DBBS students who have had little to no prior experience in programming or statistics. The course will cover common statistical practices and concepts in the life sciences, such as error bars, summary statistics, probability and distributions, and hypothesis testing. The class will also teach students basic programming skills for statistical computation, enabling them to retrieve and analyze small and large data sets from online databases and other sources.

Credit 2 units.

---

#### **L41 Biol 5077 Pharmaceutical Research and Development: Case Studies**

The course will provide an overview of the history of pharmaceutical research and development activities, with emphasis upon understanding a blend of the scientific, public health, regulatory and business decisions that have shaped the pharmaceutical industry over the past eight decades. Particular emphasis will be placed on understanding how past trends have raised questions about the sustainability of the enterprise. Although no prerequisites are formally required, the course will blend basic understanding of scientific and medical terminology with an understanding of the commercial and policy decision-making processes that govern the pharmaceutical and biotechnology enterprises. The course will provide an overview of the history of pharmaceutical research and development activities, with emphasis upon understanding a blend of the scientific, public health, regulatory and business decisions that have shaped the pharmaceutical industry over the past eight decades. Particular emphasis will be placed on understanding how past trends have raised questions about the sustainability of the enterprise. Although no prerequisites are formally required, the course will blend basic understanding of scientific and medical terminology with an understanding of the commercial and policy decision-making processes that govern the pharmaceutical and biotechnology enterprises.

Credit 2 units.

---

**L41 Biol 5079 The Science, Medicine and Business of Drugs & Vaccines**

The course will provide an overview of the history of research and development in the biotechnology and pharmaceutical industries, with emphasis upon understanding a blend of the scientific, public health, regulatory and business decisions that have shaped the pharmaceutical industry over the past eight decades. Particular emphasis will be placed on understanding how past and ongoing trends have raised questions about the sustainability of the enterprise. Although no prerequisites are formally required, the course will blend basic understanding of scientific and medical terminology with an understanding of the commercial and policy decision-making processes that govern the pharmaceutical and biotechnology enterprises.

Credit 2 units.

---

**L41 Biol 5084 Single Molecule Biophysics Journal Club**

Molecular motors in the cell harness chemical energy to generate mechanical work in a host of processes including cell motility, DNA replication and repair, cell division, transcriptional regulation, and intracellular transport. The purpose of this course is to discuss recent advances in the field of molecular motors. Special emphasis will be placed on understanding and critically evaluating single molecule studies. The course will consist of both journal club presentations and small group discussions.

Credit 1 unit.

---

**L41 Biol 5098 Graduate Research Fundamentals**

This course introduces first-year Ph.D. students to the foundational skills, knowledge, and habits of mind required of successful independent biological scientists: 1) Social dynamics in the scientific research enterprise 2) Epistemology and ethics of bioresearch methods 3) Development and communication of research questions and results 4) Interdisciplinary scientific thinking. Class sessions and homework introduce these topics; major assignments prompt student to connect them with the broader scope of graduate training in lab rotations, course work, and interdisciplinary scientific seminars. The interactive, student-driven class structure facilitates autodidactic development while integrating small group activities and peer mentoring from advanced DBBS students. Prerequisite: Students must be enrolled in a graduate program through the Division of Biology & Biomedical Sciences.

Credit 0.5 units.

---

**L41 Biol 5123 Experimental Hematopoiesis Journal Club**

Journal club in which papers that describe significant advances in the field of experimental hematopoiesis are discussed. Students are expected to present one paper per semester and attend the weekly (1 hour) session. No prerequisites.

Credit 1 unit.

---

**L41 Biol 5128 Cell Biology of Extracellular Matrix Journal Club**

This journal club covers a broad range of topics related to extracellular matrix and cell-cell communication, including the fields of biochemistry, molecular biology, cell biology, and developmental biology. Speakers give a brief background to introduce the topic and then focus on one paper from the current literature. Presentations are given by students, faculty, and post-doctorates. Students receive 1 unit of credit for regular participation and for making one presentation.

Credit 1 unit.

---

**L41 Biol 5130 Plant Diversity and Evolution**

This course is an in-depth exploration of the diversity and evolution of vascular plants. The course focuses mainly on flowering plants because of their dominant role on our planet, but lycophytes, ferns, and gymnosperms are studied as well. A phylogeny of vascular plants provides the framework for their evolution and diversification. Related subjects, including phylogenetics, biogeography, herbaria, nomenclature, species concepts, and pollination biology are also presented. The weekly lectures/discussions and (three hour) lab function in tandem and it is the responsibility for the student to integrate information from the lectures with the abundant materials presented in lab. The lecture will take place on main campus at WashU, and the lab sessions will make use the abundant and exceptional living and preserved materials at the Missouri Botanical Garden. The intended audience is advanced undergraduates and graduate students. Prerequisite: Bio 2970 or Permission of Instructor. Small Class. Credit. Same as L41 Biol 4132

Credit 3 units. A&S IQ: NSM

---

**L41 Biol 5137 Ion Channels Journal Club**

Weekly presentations of recent papers on mechanisms of ion channel function and membrane excitability, as well as the role of channel defects in human and model diseases, with lively group discussions the norm! Once per semester, each participant will choose a paper and present it to the group.

Credit 1 unit.

---

**L41 Biol 5138 Journal Club for the Molecular Mechanism of Aging**

Why do we age? What causes aging? How is our life span determined? This journal club will address such fundamental, but challenging questions of aging and longevity. Recent studies on aging and longevity are now unveiling regulatory mechanisms of the complex biological phenomenon. We'll cover the latest progress in this exciting field and stimulate discussions on a variety of topics including aging-related diseases. One hour of paper presentation or research talk and discussion per every two weeks. Prerequisite: Basic knowledge of molecular biology and genetics of model organisms, such as yeast, *C. elegans*, *Drosophila* and mouse. Registered students are expected to have at least one presentation for 1 unit credit.

Credit 1 unit.

---

**L41 Biol 5146 Principles and Applications of Biological Imaging**

Principles and Applications of Biological Imaging will introduce the interdisciplinary nature of the imaging sciences and conduct a comprehensive survey of the array of interrelated topics that define biological imaging. The course will cover the basics of the optical, magnetic resonance, CT, SPECT and PET imaging modalities, and microscopy, while focusing on applications of imaging to different disease states, such as oncology, neurology, cardiology and pulmonary diseases. Prereqs. One year each of Biology, Chemistry, Physics and Calculus.

Credit 3 units.

---

**L41 Biol 5147 Contrast Agents for Biological Imaging**

Contrast Agents in Biological Imaging will build the chemistry foundations for the design and use of contrast agents in imaging applications such as nuclear medicine, magnetic resonance imaging (MRI) and optical imaging. The course will include lectures on the design of radiopharmaceuticals for gamma scintigraphy and positron emission tomography, MRI contrast agents and agents for optical imaging, including bioluminescence and fluorescence microscopy. Prereqs: one year of general chemistry, one semester of organic chemistry.

Credit 3 units.

---

---

**L41 Biol 5148 Metabolism Journal Club**

The purpose of the Metabolism Journal Club is to introduce the graduate students to advanced topics spanning the biochemistry, cell biology and genetics of cellular and whole body metabolism. Under the guidance of the course directors (Drs. Ory and Schaffer), students will select recent topical articles for discussion in the weekly journal club. Students will be expected to provide a succinct introduction to the topic and lead discussion of the data presented in the journal article. Students will be evaluated on the basis of their presentation and their participation in the seminar throughout the semester. Prerequisites: Successful completion of Fundamentals of Molecular Cell Biology (Bio 5068) and Nucleic Acids and Protein Biosynthesis (Bio 548).  
Credit 1 unit.

---

**L41 Biol 5150 Environmental Medicine**

Environmental Medicine explores the interactions between the environment and human health, focusing on the role of the environment in causing or mediating disease. Environmental hazards are examined in terms of toxicology, epidemiology, exposure assessment, risk assessment, individual susceptibility, adaptation/maladaptation, and the total load concept. Students enrolled in the 500-level must also complete a term paper and oral presentation. Prerequisites: General Biology I or permission of instructor.  
Credit 3 units.

---

**L41 Biol 5151 RNA Biology Journal Club**

The purpose of the RNA Biology Journal Club is to introduce the graduate students to advanced topics spanning the bioinformatics, biochemistry, cell biology and genetics of RNA biology. Under the guidance of the course directors (Drs. Ory and Schaffer), students will select recent topical articles for discussion in the weekly journal club. Students will be expected to provide a succinct introduction to the topic and lead discussion of the data presented in the journal article. Students will be evaluated on the basis of their presentation and their participation in the seminar throughout the semester. Prerequisites: Successful completion of Fundamentals of Molecular Cell Biology (Bio 5068) and Nucleic Acids and Protein Biosynthesis (Bio 548).  
Credit 1 unit.

---

**L41 Biol 5152 RAD Journal Club (Regeneration, Aging, and Development)**

Focuses on developing a dialog around current topics in developmental and regenerative biology at the molecular, cellular and systems levels.  
Credit 1 unit.

---

**L41 Biol 5171 Medical Immunology**

An introduction to basic concepts in immunology and immunopathology. Lectures focus on antigen-antibody interactions, immunoglobulin structure and genetics, the cellular basis of the immune response and immune regulation, T cell effector mechanisms, the inflammatory response, complement, the positive and negative roles of hypersensitivity, and immune deficiency. Prerequisite, some background in biochemistry and genetics helpful. Restricted to medical students only except in unusual circumstances, with permission of coursemaster. Offered during the first half of the second medical semester. Three-four lecture hours a week, two 2-hour lab periods, four 1-hour clinical discussion groups.  
Credit variable, maximum 3 units.

---

**L41 Biol 5181 Population Genetics**

An introduction to the basic principles of population and ecological genetics. Mechanisms of microevolutionary processes; integrated ecological and genetic approach to study the adaptive nature of the evolutionary process. Prerequisite: Bio 2970.

Same as L41 Biol 4181

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 5190 Community Ecology**

Community ecology is an interdisciplinary field that bridges concepts in biodiversity science, biogeography, evolution and conservation. This course provides an introduction to the study of pattern and process in ecological communities with an emphasis on theoretical, statistical and experimental approaches. Topics include: ecological and evolutionary processes that create and maintain patterns of biodiversity; biodiversity and ecosystem function; island biogeography, metacommunity dynamics, niche and neutral theory; species interactions (competition, predation, food webs), species coexistence and environmental change. The class format includes lectures, discussions, and computer labs focused on analysis, modeling and presentation of ecological data using the statistical program R. Prereq: Bio 2970 required, Bio 381 recommended, or permission of instructor. (Biology Major Area C)  
Same as L41 Biol 419

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 5191 Pathobiology of Human Disease States**

Three human disease states will be discussed in detail. Topics will include background clinical and epidemiological information, followed by a detailed examination of the molecular and cellular events that underlie the disease state. Examples of pertinent topics include Alzheimer's disease, AIDS, leukemia, cystic fibrosis, sickle cell anemia, diabetes, etc. Prerequisite: Must be a Markey Pathway student.  
Credit 2 units.

---

**L41 Biol 5192 Cancer Biology Journal Club**

This journal club covers current papers in molecular oncology, cancer genetics and contemporary molecular biology. Presentations will be given by students, post-docs and faculty, then discussed.  
Credit 1 unit.

---

**L41 Biol 5195 Disease Ecology**

Disease ecology is an interdisciplinary field that bridges concepts from fields including population ecology, community ecology, landscape ecology, and evolutionary biology. This course provides an introduction to the study of infectious diseases with an emphasis on theoretical, experimental, and quantitative approaches. The course will integrate studies of infectious diseases from across disciplines including human epidemiology, veterinary medicine, wildlife epidemiology, plant pathology, parasitology, and ecology. Principles of Biology II (Bio 2970) required, Introduction to Ecology (Bio 381) recommended, or permission of instructor.

Same as L41 Biol 4195

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L41 Biol 5196 Special Emphasis Pathway in Cancer Biology**

This course is designed to present pre- and postdoctoral trainees with an organized educational format to explore major contemporary topics in cancer biology. The elective will provide an integrated view of cancer research including basic science, translational science, and clinical investigation. Approximately 60 minutes will be devoted to a didactic presentation by a faculty member with interaction by the participants. The remaining 30 minutes will be used to discuss a pivotal research paper from this field, preselected by the faculty member. Outside reading (30-60 min/week) will be required.  
Credit 2 units.

---

#### **L41 Biol 5201 Membrane Protein Biophysics Journal Club**

Cells are encapsulated by lipid bilayers providing a physical barrier for the passage of charged molecules and ions in and out of the cell. The proteins that reside within this layer of oil are called membrane proteins, and they act as the molecular gatekeepers, controlling the passage of ions, nutrients, waste products and signaling elements, across cell membranes. This journal club focuses on examining key literature in the field that investigates how membrane proteins fold, adopt certain structures, and how they function inside of the strange environment of the lipid membrane. The papers will be selected from biophysical studies that combine new and notable research with key historical work, for a broad perspective of the science being conducted in this complex and emerging field. Special emphasis will be placed on emerging topics, such as regulation of protein function by lipid composition, membrane protein synthesis and folding, cutting-edge developments in membrane biophysics. The course will consist of both journal club presentations, as well as small group discussions in the form of "chalk-talks."

Credit 1 unit.

---

#### **L41 Biol 5217 Special Topics in Microbial Pathogenesis**

Primarily for graduate and MSTP students, this course involves oral presentation and discussion of current research articles on pathogenic microorganisms (bacteria, viruses, parasites, and fungi). Discussion will include design of specific aims for research proposals. Emphasis will be on literature that addresses the cellular and molecular basis of host-pathogen interactions. Students are expected to prepare all articles covered and to participate actively in each discussion. Prerequisite: advanced elective course "Molecular Microbiology and Pathogenesis" or permission of instructors. Class meets twice per week for 1.5 hours each.

Credit 2 units.

---

#### **L41 Biol 5224 Molecular, Cell and Organ Systems**

This course will introduce Ph.D. and MSTP students to fundamental problems in cell and molecular biology at the systems level. The course is divided into 5 themes: 1) microbial systems; 2) organ development and repair; 3) cardiovascular system and disease; 4) tumor & host systems; and 5) metabolic systems and disease. Topics within each theme highlight current research concepts, questions, approaches and findings at the molecular, cellular and physiological levels. Students will write an original research grant proposal on a topic of their choosing in one of the 5 themes. Students will critique proposals anonymously in an NIH-like study section. Prereqs: Fundamentals of Molecular Cell Biology and Nucleic Acids and Protein Synthesis.

Credit 3 units.

---

#### **L41 Biol 5235 Genetics Journal Club**

This journal club will be focused on the Genetics department seminar series. Students will present one or a few recent papers by the seminar speaker scheduled for that week. Students will provide a brief written evaluation (on a form that will be provided) of their peers' presentations, and the faculty advisors will meet with each student after the presentation to provide feedback.

Credit 1 unit.

---

#### **L41 Biol 5241 Immunology**

Basic molecular and cellular aspects of the vertebrate immune system with emphasis upon the interrelationships of non-specific and specific host defense against disease, the nature of immunological specificity and its underlying molecular biology. Includes complement systems, immunochemistry, the nature of cellular activation and effector generation, immunodeficiency, tolerance, tissue transplantation, hypersensitivity, immune regulation and specific diseases illustrative

of the successes and failures of the immune system. Case studies will be presented by the students on an array of immune system disease. Prerequisites: Bio 2970 and Chem 262. Interested Juniors in their second semester are particularly encouraged to register for this course. Same as L41 Biol 424

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L41 Biol 5244 Advances in Immunology**

One of life's greatest challenges is how do we best survive in a world that is constantly challenging us to survive the many and varied types of infections that would threaten our survival. The main way in which we survive is the immune system that we possess. As a consequence, this course covers basic molecular and cellular aspects of the vertebrate immune system emphasizing specific and nonspecific host defense against disease. In so doing, we will discuss the nature of immunological specificity, and its underlying molecular genetics. We also cover how our immune system responds to foreign invaders by describing the nature of cell activation, the results of such activation in the form of both cellular activities and the impact of factors released by these cells. Finally, we will consider the role that the immune response plays in tolerance, autoimmunity, allergic reactions, transplantation reactions, immunodeficiency, and how it responds to cancer. In so doing, you will have a better understanding as to how we respond to the world in which we live. Prerequisites: it is recommended, but not required, that you have some knowledge of: Biochemistry, Cell Biology, Molecular Biology/Nucleic Acids, Microbiology/Virology, Pathology/Pathobiology.

Credit 3 units.

---

#### **L41 Biol 5246 Coding and Statistical Thinking in the Neurosciences**

Students will learn common programming constructs and how to visualize and analyze data. Coding will be integrated into a statistics curriculum introducing summary statistics, probability distributions, simulation and hypothesis testing, and power analysis for experimental design.

Credit 1 unit.

---

#### **L41 Biol 5255 Experimental Skeletal Biology Journal Club**

The journal club, which meets weekly, focuses on cellular and molecular biology of the skeleton. Emphasis is placed on gaining insights into normal skeletal homeostasis as well as systemic disorders of bone. Papers presented for review are selected from the most competitive journals. Participants are encouraged to "think outside of the box" and discuss novel molecular discoveries that may impact bone cell function. Prerequisite, permission of instructor.

Credit 1 unit.

---

#### **L41 Biol 5265 The Science of Cats**

This capstone-style course will give students the opportunity to apply what they've learned in topics as diverse as speciation, molecular evolution, community ecology and animal behavior to investigate and analyze questions concerning the biology of a species near and dear to the hearts of many, *Felis catus*, the domestic cat. Over the last several decades, scientists have studied cats in the same way they have studied lizards, birds, flies and many other species. This cat research allows questions of broad scientific interest to be addressed using cutting-edge methods, including (but not limited to): what is a species? How do new species arise? How do we determine when, where and from what species the cat evolved? How do we determine if a trait (e.g., response to catnip) evolved as an adaptation driven by natural selection? How do we determine the impact of an invasive species on local ecosystems? How does domestication occur and is the cat actually domesticated?

Is the behavior of domestic cats a legacy of their evolutionary past or does it represent adaptation to living with humans? What role, if any, can genetic engineering play in decreasing feral cat populations and developing new breeds of cats with desirable traits.

Same as L41 Biol 4271

Credit 3 units. A&S IQ: NSM

---

#### **L41 Biol 5272 Advanced Topics in Immunology**

This course uses a journal club format to discuss contemporary issues in the cell and molecular biology of the immune system. Discussions focus on the use of current approaches to analyze the cellular and molecular basis of immunity. Topics include mechanisms of antigenic specificity, diversity, cell communication, differentiation, activation, and effector activity. Prerequisite, Bio 5051 and permission of instructor.

Credit 2 units.

---

#### **L41 Biol 5282 Chromatin Structure and Gene Expression**

This special topics course will use "Epigenetics" ed. By Allis, Jenuwein, Reinberg, and Caparros (2007, Cold Spring Harbor Laboratory Press) as the organizing text. Each week a faculty member will provide a background lecture on an important topic or model system, and a student will present and lead discussion of a paper from the current scientific literature related to the previous week's background lecture. Topics to be considered will include background on chromatin structure, histone modifications and histone variants; epigenetic regulation in yeast, other fungi, ciliates, flies, mammals and plants; dosage compensation in different systems; DNA methylation and imprinting in mammals; stem cells, nuclear transplantation and reprogramming; and the epigenetics of cancer and other human diseases (some variation in topics in different years). Students enrolled in the course will be required to present one paper and to come prepared to each session, with a question for discussion. Prerequisite, BIO 548 Nucleic Acids and Protein Biosynthesis.

Credit 2 units.

---

#### **L41 Biol 5284 Current Research in Chromatin, Epigenetics and Nuclear Organization**

This journal club considers papers from the current literature on chromatin structure and function, with an emphasis on regulation of transcription, epigenetics and genomics. Presentations are given by students, postdocs and faculty, with discussion by all. Students enrolled for credit are expected to attend regularly, and to present a minimum of one paper during the term, with consultation and critique from the faculty.

Credit 1 unit.

---

#### **L41 Biol 5285 Current Topics in Human and Mammalian Genetics**

This course aims to provide both biologists and those with mathematical backgrounds with a basis in mammalian genetics. The course will include the following modules: Nucleic acid biochemistry; Gene and chromosome organization; Introduction to Human Genetics; Mutations and DNA repair; Cancer Genetics; Genomic methodologies; Biochemical genetics; Murine Genetics; Epigenetics; Neurodegenerative diseases; Mitochondrial disorders; Pharmacogenetics; Introduction to human population genetics; Applications of modern human genetics; Introduction to web-based informatics tools for molecular genetics. One of the required courses in the Quantitative Human Statistical Genetics graduate program.

Credit 3 units.

---

#### **L41 Biol 5288 Special Topics in Molecular Genetics**

A special topics course with lectures and discussion on the molecular basis of cancer including cell cycle regulation, tumor suppressor genes, tumor invasion, angiogenesis, immune evasion, resistance to apoptosis, signaling, imaging, gene expression, chromosomal translocations, and viral oncology.

Credit 2 units.

---

#### **L41 Biol 5303 Protein NMR Journal Club**

This journal club covers the recent literature on protein NMR with a focus on using NMR to study protein function, NMR dynamics, and novel methods that expand the range of systems accessible to solution NMR studies. Students, postdocs and faculty discuss a recent paper and present background information on the relevant technical aspects of NMR. Students receive 1 credit for participation and presenting one paper.

Credit 1 unit.

---

#### **L41 Biol 5304 Introduction to Biomedical Data Science I**

This course is designed primarily for individuals who wish to learn the research tools and approaches required for biomedical informatics-based research and who have little or no computational experience using command line shells, programming, and databases.

Credit 4 units.

---

#### **L41 Biol 5310 Biology of Aging**

This course provides concepts and examples of the biology of aging. We discuss current literature with emphasis on theoretical causes of aging and the practical implications of these theories. Major topics include the biochemical processes of aging, cell cycle senescence, age-related organ dysfunction, interventions to alter the aging process, and medical illnesses associated with aging (e.g., Alzheimer's disease, the dementias). We also study animal and human models for extending longevity, and current approaches for dealing with the aging process are included. Prerequisites: Biol 2960 and Biol 2970 or equivalent; Chem 105 and Chem 106 or equivalent are recommended.

Same as L41 Biol 4310

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### **L41 Biol 5311 Dynamics in Mesoscopic Molecular Systems**

This course will provide a background in the theory of the dynamics of mesoscopic systems and introduction to methods for measuring the dynamics of these systems. It will include measurement methods, some of which are in common use and others that have only recently been introduced. This course would be useful for biophysics students and others that are interested in molecular processes and mechanisms in small systems such as cells. Prerequisites, Physical Chemistry.

Credit 3 units.

---

#### **L41 Biol 5312 Macromolecular Interactions**

This course will cover equilibria, kinetics and mechanisms of macromolecular interactions from a quantitative perspective. Thermodynamics, multiple binding equilibria (binding polynomials), linkage phenomena, cooperativity, allostery, macromolecular assembly, analysis of binding isotherms, enzyme catalysis and mechanism, steady-state and pre-steady-state kinetics, kinetic simulation, and isotope effects. Prerequisite, physical chemistry, biochemistry, calculus, and organic chemistry. 3 class hours per week.

Credit 3 units.

---

#### **L41 Biol 5318 DNA Repair**

This course is an advanced graduate course that explores all aspects of DNA damage and the cellular responses to DNA damage. It is designed for graduate students who have a working knowledge of Chemistry, Molecular Biology and Cellular Biology, and for interested postdocs and researchers. Specific topics that will be covered are: The chemical basis of DNA damage, specific DNA repair mechanisms, cell cycle responses to damage, translesion DNA replication and mutagenesis, and human diseases related to defects in DNA damage response. The course consists of a lecture module, open to all, and a discussion module for registered students. In addition, several invited speakers in the field of DNA repair will give seminars and meet with registered students for discussion. Students will present and discuss research papers. Grades will be given based on student presentation and participation. Prerequisite: Permission of instructor.  
Credit 2 units.

---

#### **L41 Biol 5319 Molecular Foundations of Medicine**

This course will cover fundamental aspects of biochemistry and cell biology from a medical perspective. The course begins with a treatment of protein structure and the function of proteins in the cytoskeleton and cell motility. The principles of enzyme kinetics and regulation are then discussed and basic pathways for the synthesis and metabolism of carbohydrates and lipids are introduced. This leads in to a discussion of membrane structure and the function cellular organelles in biological processes including energy production, protein degradation and protein trafficking. Prerequisite: Two semesters of organic chemistry. Coursemaster approval is required. Please note: This course is given on the medical school schedule and so it begins 8 days before the grad school schedule.  
Credit 3 units.

---

#### **L41 Biol 5327 Optical Spectroscopy: Theory and Applications**

Spectroscopic methods to be covered include fluorescence, both ensemble and single molecule, and absorption (circular dichroism); fluorescence correlation spectroscopy will also be discussed. The quantum chemistry /physics behind these methods will be reviewed. Prerequisite: Consent of instructor.  
Credit 2 units.

---

#### **L41 Biol 5328 Structural Biology Journal Club**

Multi-laboratory research colloquia for DBBS graduate students focused on structural biology and complementary biophysical techniques. Course credit requires student presentation for credit.  
Credit 1 unit.

---

#### **L41 Biol 5335 Linkage Theory and Experiment**

The course will cover basic concepts of linkage and their application to the analysis of protein function and interactions. The course is meant to expose students in Biochemistry to the conceptual framework behind current approaches to the study of protein function and interactions, using a very simple mathematical treatment (no knowledge of calculus required) and the discussion of specific biological systems. Topics to be covered include: 1. Linkage cycles; 2. Allostery and cooperativity; 3. Site-specific linkage; 4. Epitope mapping using Ala-scanning mutagenesis; 5. Double-mutant cycles; and 6. Rational protein engineering. Prerequisite: Basic knowledge of protein structure and function.  
Credit variable, maximum 1.5 units.

---

#### **L41 Biol 5336 Computational Biophysics Journal Club**

This course covers a combination of classic and recent publications on computational methods for studying biomolecules. Students participating for credit will be required to present at least once.  
Credit 1 unit.

---

#### **L41 Biol 5344 Epigenetics**

Introductory course in epigenetics - the layer of chemical information that sits on top of the genome - that switch genes 'on' or 'off'. Will introduce how the epigenome, in collaboration with the genome, controls versatile biological processes and cell fates. Will also cover the latest advances of how humans can control their own epigenetic destiny by lifestyle, diet, and other environmental factors. Learning Objectives: Recognize and summarize the difference between genetics and epigenetics, Apply the basic knowledge of epigenetic mechanism and illustrate how their misregulations cause abnormal development and diseases, Critically review and discuss epigenetic literature, Design epigenetic experiments and interpret the results of those experiments, Graduate student specific: Demonstrate the ability to clearly communicate epigenetic research in both oral and written formats. Prerequisite: Biology 2960 and Biology 2970 (or consent of instructor) (Biology Major Area A)  
Same as L41 Biol 4344  
Credit 3 units. A&S IQ: NSM Art: NSM

---

#### **L41 Biol 5352 Developmental Biology**

Analysis of a selected set of key processes in development, such as pattern formation, cell-cell signaling, morphogenesis, etc. The focus is on molecular approaches applied to important model systems, but framed in classical concepts. The discussion section provides instruction in presenting a journal club and writing a research proposal. Prerequisites, Molecular Cell Biology (Bio 5068) and Nucleic Acids (548).  
Credit 3 units.

---

#### **L41 Biol 5357 Chemistry and Physics of Biomolecules**

This course covers three major types of biomolecular structures: proteins, nucleic acids, and membranes. Basic structural chemistry is presented as well as the biophysical techniques used to probe each type of structure. Selected topics covered include protein folding, protein design, X-ray crystallography, NMR spectroscopy, nucleic acid bending and supercoiling, nucleic acid:protein interactions, RNA folding, membrane organization, fluidity, permeability and transport, and membrane channels. The weekly discussion section will cover problem sets and present current research papers. This is one of the required courses for the biochemistry and for the molecular biophysics graduate programs. Prior course work in biochemistry and physical chemistry is recommended but not required.  
Credit 3 units.

---

#### **L41 Biol 5358 Biochemical and Biophysical Investigations of Infectious Diseases Journal Club**

Biochemical and biophysical approaches continue to advance as powerful approaches to the understanding of human disease processes. This journal club covers recent papers in which these approaches address aspects of infectious diseases or inflammation. Students who enroll for credit will be expected to participate in weekly presentations and to present one to two papers along with accompanying background information. Prerequisites: Graduate standing in DBBS; prior introductory course work in biochemistry, physical chemistry, or Chemistry and Physics of Biomolecules (Biol 5357). Course work in microbiology or immunology is not required.  
Credit 1 unit.

---

#### **L41 Biol 5360 Neural Basis of Behavior**

This course provides an overview of how the nervous system works from a biological perspective. We will begin by studying how nerve cells function, focusing on how they transmit signals and communicate with one another through specialized connections called synapses. We will further examine the anatomy of the nervous system to discover how nerve cells are organized into circuits and how these circuits develop.

We will investigate how the specialized properties of our nerve cells allow us to interact with our environment through an in-depth study of our motor and sensory systems. In our 500 level course, we will apply our learning objectives to a scientific research presentation using peer reviewed literature.

Credit 3 units.

---

**L41 Biol 5392 Molecular Microbiology & Pathogenesis**

Course is devoted to studying microorganisms, particularly those that cause disease, with an emphasis on the molecular interactions between pathogens and hosts. First third of the course focuses on virology, second third on bacteriology and the last third on eukaryotic pathogens. Prereq, first semester core curriculum for Programs in Cell and Molecular Biology.

Credit 3 units.

---

**L41 Biol 5393 Molecular Virology Journal Club**

Journal club covering a broad range of topics in virology with an emphasis on pathogenesis or molecular biology of medically important viruses. A minimum of one student presentation with faculty critique. Prerequisite: Permission of instructor.

Credit 0.5 units.

---

**L41 Biol 5397 Current Literature in Microbiology**

Presentations by students on a broad range of topics of current interest in microbiology. The course will emphasize presentations and discussion skills. Credit requires attendance and participation at all sessions and one presentation. Prerequisites: L41 Biology and Biomedical Science Microbiology (349) and laboratory (3491).

Credit 1 unit.

---

**L41 Biol 5401 Introduction to Bioinformatics I**

This year-long course for first-year BIDS PhD students introduces a broad spectrum of biomedical informatics theories and methods that support and enable translational research and, ultimately, precision health care. The course is organized into modules spanning levels of inquiry from biomolecules to patients to populations. For each module, a relevant set of biomedical informatics frameworks will be introduced and then demonstrated via experiential learning involving the analysis of a variety of biological, clinical, and population-level data sets.

Credit 4 units.

---

**L41 Biol 5403 Introduction to Biomedical Data Science I**

This course provides a hands-on introduction to fundamental principles of informatics and data analysis tools and methods. It is designed primarily for individuals who wish to learn the research tools and approaches required for biomedical informatics-based research and who have little or no computational experience using command line shells, programming, and databases.

Credit 4 units.

---

**L41 Biol 5412 Tropical and Molecular Parasitology**

Graduate level seminar course focusing on current scientific literature in molecular parasitology. The journal club will meet biweekly during the Fall and Spring semesters. Students will attend both semesters in order to receive one credit. The seminar series will run jointly with a research conference in Tropical and Molecular Parasitology. Outside speakers will be invited for the seminar series to emphasize important developments in tropical medicine and molecular parasitology. In advance of the invited speakers, topics will focus on their previous research publications. Prerequisites, BIO 5392 Molecular Microbiology & Pathogenesis.

Credit 0.5 units.

---

**L41 Biol 5417 Hematology Division Journal Club: Current Topics in Biochemistry, Cellular, and Molecular Biology**

This journal club covers a broad range of topics of current interest, including the fields of biochemistry, molecular biology, cell biology, developmental biology, and immunology. Speakers usually give a brief background to introduce the topic and then focus on one-two papers from the current literature. Presentations are given by graduate students, post-doctorates, and faculty. Each attendee presents two-three times per year. Participants are expected to attend all the sessions. This journal club was founded in 1966.

Credit 1 unit.

---

**L41 Biol 5420 Membrane Protein Biophysics Journal Club**

Cells are encapsulated by lipid bilayers providing a physical barrier for the passage of charged molecules and ions in and out of the cell. The proteins that reside within this layer of oil are called membrane proteins, and they act as the molecular gatekeepers, controlling the passage of ions, nutrients, waste products and signaling elements, across cell membranes. This journal club focuses on examining key literature in the field that investigates how membrane proteins fold, adopt certain structures, and how they function inside of the strange environment of the lipid membrane. The papers will be selected from biophysical studies that combine new and notable research with key historical work, for a broad perspective of the science being conducted in this complex and emerging field. Special emphasis will be placed on emerging topics, such as regulation of protein function by lipid composition, membrane protein synthesis and folding, and cutting-edge developments in membrane biophysics. The course will consist of both journal club presentations, as well as small group discussions in the form of "chalk-talks."

Credit 1 unit.

---

**L41 Biol 5425 Immunology of Infectious Diseases Journal Club**

The goal of this Journal Club (JC) is to provide 2nd year students in MMAP program a platform to discuss new and emerging concepts on mechanisms by which host immune responses mediate protection against infectious diseases. This exercise will also enable the student who attend the fundamental Immunology course to apply their knowledge to understand the basis for immunology of infectious diseases. The format will include faculty who will select cutting-edge papers and head the discussion during the JC session.

Credit 1 unit.

---

**L41 Biol 5426 ID Gateway: Translational and Public Health Aspects of Basic Infectious Disease Research**

This course provides an opportunity for students, postdoctoral fellows, infectious disease fellows and faculty to explore issues at the interface between patient care, public health and basic research in the area of microbial pathogenesis. Prerequisites, Application and L41 Bio 5392 or M30 526, or permission of instructor.

Credit 2 units.

---

**L41 Biol 5445 DNA Metabolism Journal Club**

Presentation of current research papers in DNA replication, DNA repair, and DNA recombination, with an emphasis on basic biochemical and biophysical approaches.

Credit 1 unit.

---

**L41 Biol 5456 Advanced Crystallography**

The advanced course in Protein Crystallography will address all aspects of modern protein crystallography including fundamentals of crystallography, the derivation of the structure factor and electron density equation, symmetry and space groups, direct methods,

isomorphous replacement, molecular replacement, data collection, and crystal growing theory and techniques. Prerequisite, Physical Chemistry & Bio 5325 Protein Structure and Function. Two class hours per week.

Credit 2 units.

---

#### **L41 Biol 5466 Current Topics in Biochemistry**

Special topics course offered every other week involving the discussion of research papers covering a broad range of topics in the field of biochemistry. Papers selected from the primary literature will be presented and discussed by students with guidance from the instructor. Emphasis will be placed on papers that illustrate the application of chemical approaches to important biological processes. Designed primarily for first- and second-year graduate students in the Biochemistry Ph.D. program. Prerequisites: coursemaster permission. Credit 0.5 units.

---

#### **L41 Biol 5469 Biochemistry, Biophysics, and Structural Biology Seminar**

Student presentation of Biochemistry, Biophysics or Structural Biology topic. Second Year Students present from literature; senior students give formal research seminar. Attendance required of all BBSB Graduate Students. Prerequisites: BBSB Graduate Student. Credit 0.5 units.

---

#### **L41 Biol 548 Nucleic Acids & Protein Biosynthesis**

Fundamental aspects of the structure, biosynthesis, and function of nucleic acids and the biosynthesis of proteins. Emphasis on mechanisms involved in the biosynthetic processes and the regulation thereof. Lecture course supplemented with student discussions of research papers. Prerequisites: Biol 3371, Biol 451, Chem 481 or equivalent, or permission of instructor. Credit 3 units.

---

#### **L41 Biol 5483 Human Genetic Analysis**

Basic Genetic concepts: meiosis, inheritance, Hardy-Weinberg Equilibrium, Linkage, segregation analysis; Linkage analysis: definition, crossing over, map functions, phase, LOD scores, penetrance, phenocopies, liability classes, multi-point analysis, non-parametric analysis (sibpairs and pedigrees), quantitative trait analysis, determination of power for mendelian and complex trait analysis; Linkage Disequilibrium analyses: allelic association (case control designs and family based studies), QQ and Manhattan plots, whole genome association analysis; population stratification; Quantitative Trait Analysis: measured genotypes and variance components. Hands-on computer lab experience doing parametric linkage analysis with the program LINKAGE, model free linkage analyses with Genehunter and Merlin, power computations with SLINK, quantitative trait analyses with SOLAR, LD computations with Haploview and WGAViewer, and family-based and case-control association analyses with PLINK and SAS. The methods and exercises are coordinated with the lectures and students are expected to understand underlying assumptions and limitations and the basic calculations performed by these computer programs. Auditors will not have access to the computer lab sessions. Prerequisite: M21-515 Fundamentals of Genetic Epidemiology. For details, to register and to receive the required permission of the Coursemaster contact the MSIBS Program Manager (biostat-msibs@email.wustl.edu or telephone 362-1384).

Credit 3 units.

---

#### **L41 Biol 5484 Genetics and Development of *C. elegans* Journal Club**

Students will present a research paper (or present their current thesis research) and the appropriate background material.

Credit 1 unit.

---

#### **L41 Biol 5487 Genetics and Genomics of Disease**

The course will cover the use of genomic and genetic information in the diagnosis and treatment of disease, with an emphasis on current practice and existing gaps to be filled to achieve precision medicine. Areas of discussion include: bioinformatics methods; assessment of pathogenicity; use and curation of disease variant databases; discovery of incidental findings; genomics applications in Mendelian disease, complex traits, cancer, pharmacogenomics, and infectious disease; design of clinical trials with genetic data; ethical and policy issues. Prerequisites: Genomics (Bio 5488), Advanced Genetics (Bio 5491), or Fundamentals of Mammalian Genetics (Bio 5285) or equivalent (permission from instructor)

Credit 2 units.

---

#### **L41 Biol 5488 Genomics**

This course is designed for beginning students who want to become familiar with the basic concepts and applications of genomics. The course covers a wide range of topics including how genomes are mapped and sequenced as well as the latest computational and experimental techniques for predicting genes, splice sites, and promoter elements. High throughput techniques for ascribing function to DNA, RNA, and protein sequences including microarrays, mass spectrometry, interspecies genome comparisons and genome-wide knock-out collections will also be discussed. Finally, the use of genomic techniques and resources for studies of human disease will be discussed. A heavy emphasis will be put on students acquiring the basic skills needed to navigate databases that archive sequence data, expression data and other types of genome-wide data. Through problem sets the students will learn to manipulate and analyze the large data sets that accompany genomic analyses by writing simple computer scripts. While students will become sophisticated users of computational tools and databases, programming and the theory behind it are covered elsewhere, in Michael Brent's class, Bio 5495 Computational Molecular Biology. Because of limited space in our teaching lab, enrollment for lab credit will be limited to 24 students. Priority will be given to students in the DBBS program. Others interested in the course may enroll for the lectures only. If you have previous experience in computer programming, we ask that you do not enroll for the laboratory credit. Prerequisites, Molecular Cell Biology (Bio 5068), Nucleic Acids (Bio 548) or by permission of instructor. Lecture 3 units of credit; lab 1 additional unit, space limited. Credit variable, maximum 4 units.

---

#### **L41 Biol 5489 Human Genetics Journal Club**

In this biweekly journal club on Human Genetics we will present and discuss current cutting edge papers in human and mammalian molecular genetics. Students learn presentation skills, how to critique a paper and how to interact with a very active and critical audience. Prerequisites; Any person interested in the current state of the art in Human Genetics may attend this course. It is a requirement that all students wishing to earn credit in this course must present a 1.5 hour journal club talk and must regularly attend and participate in the journal club throughout the year. Credit 0.5 units.

---

#### **L41 Biol 5491 Advanced Genetics**

Fundamental aspects of organismal genetics with emphasis on experimental studies that have contributed to the molecular analysis of complex biological problems. Examples drawn from bacteria, yeast, nematodes, fruit flies and mammalian systems. Prerequisite, graduate standing or permission of instructor.

Credit 3 units.

---

**L41 Biol 5495 Computational Molecular Biology**

This course is a survey of algorithms and mathematical methods in biological sequence analysis (with a strong emphasis on probabilistic methods) and systems biology. Sequence analysis topics include introduction to probability, probabilistic inference in missing data problems, hidden Markov models (HMMs), profile HMMs, sequence alignment, and identification of transcription-factor binding sites. Systems biology topics include the discovery of gene regulatory networks, quantitative modeling of gene regulatory networks, synthetic biology, and (in some years) quantitative modeling of metabolism. Prerequisite: CSE 131 or CSE 501N.

Credit 3 units. EN: BME T, TU

---

**L41 Biol 5496 Seminar in Computational Molecular Biology**

Students present current research papers and the appropriate background material in the field of Computational Biology. \*\*Arts and Sciences students must take this course for credit; Engineering students must take this course Pass/Fail.\*\*

Credit 1 unit.

---

**L41 Biol 5499 Cancer Informatics Journal Club**

This journal club will explore current topics in cancer informatics. Current literature will be reviewed for advanced cancer genome analysis methods, statistics, algorithms, tools, databases, and other informatics resources.

Credit 1 unit.

---

**L41 Biol 550 Medical Genetics**

A significant portion of the first-year course in basic medical genetics devoted to human and clinical genetics, with emphasis on how genomic information will transform the practice of medicine. Topics covered include population genetics; molecular basis of mutations; human functional genomics; mouse models of human disease; pharmacogenomics; metabolic defects. Lectures, small group discussions, patient information session. Prereq, an introductory genetics course and permission of the instructor.

Credit 2 units.

---

**L41 Biol 5501 The Biology and Pathology of the Visual System**

The purpose of the course is to provide a fascinating view of vertebrate eye development, anatomy, physiology and pathology. Topics to be covered include the molecules that control eye formation, ocular stem cells, the physiology of transparency, hereditary ocular diseases, phototransduction, the neurobiology of the retina and central visual pathways, age-related eye diseases, and many others. The course is open to all second year graduates students and above. Ophthalmology residents and postdocs with an interest in vision are strongly encouraged to attend.

Credit 3 units.

---

**L41 Biol 5502 Molecular Aspects of Vision**

Seminar on useful research strategies used to elucidate the molecular basis of light detection including the biochemical, biophysical and electrophysiological events. Discussions of the molecular basis of inherited ocular cancer, color blindness and retinitis pigmentosa included. Prerequisite, 3 units of biochemistry.

Credit 3 units.

---

**L41 Biol 5504 Algorithms for Biosequence Comparison**

This course surveys algorithms for comparing and organizing discrete sequential data, especially nucleic acid and protein sequences. Emphasis is on tools to support search in massive biosequence databases and to perform fundamental comparison tasks such as DNA short-read alignment. Prerequisite: CSE 347 or permission of

instructor. These techniques are also of interest for more general string processing and for building and mining textual databases. Algorithms are presented rigorously, including proofs of correctness and running time where feasible. Topics include classical string matching, suffix array string indices, space-efficient string indices, rapid inexact matching by filtering (including BLAST and related tools), and alignment-free algorithms. Students complete written assignments and implement advanced comparison algorithms to address problems in bioinformatics. This course does not require a biology background. Prerequisites: CSE 347 or instructor permission Revised: 2019-02-21 Same as E81 CSE 584A

Credit 3 units. EN: BME T, TU

---

**L41 Biol 5505 Independent Study in Fundamentals of Molecular and Microbial Genetics**

This literature-based course will introduce students to seminal and current studies in molecular and microbial genetics. Students will read and present a minimum of 12 landmark papers that helped shape our understanding of molecular and microbial genetics. Emphasis will be placed on students' ability to comprehend and explain these studies via chalk talks. All presentations will be given by students. Prerequisites: L41 5491 Advanced Genetics and permission from instructor.

Credit 2 units.

---

**L41 Biol 5507 Genome Engineering Methods and Applications**

This course will cover the basic principles of genome engineering with emphasis on Cas9/CRISPR technology. It will consist of discussion sessions in which students will present assigned manuscripts followed by a general discussion of the topic directed by the instructor. The course will cover the mechanisms of genome editing using host DNA repair systems, the function of Cas9, and how Cas9 can be harnessed to introduce defined mutations into almost any genome. The use of Cas9 to activate or repress genes, alter chromatin modifications, and the application of these Cas9 systems to conducting genome-scale screens in mammalian cells as well as its use in studying cell fate will be highlighted. Finally, we will study how Cas9 methodologies can be used to introduce disease-associated variants into pluripotent stem cells (e.g. iPSCs) that can be differentiated into disease-relevant cell for use in functional genomic studies.

Credit 1 unit.

---

**L41 Biol 5508 ITVS Advanced Techniques**

The Advanced Methods in Vision Science course provides ITVS students the opportunity to learn about advanced methods utilized in studies of the visual systems from the experts who perform the studies. These methods emerged from different disciplines (molecular biology, imaging, electrophysiology, machine learning), but provide critical details for understanding how the visual systems focuses and processes light stimuli. The course has two components. 1) A series of 90-minute structured discussions of advanced methods via foundational papers and recent applications of these methods. 2) A choice of two hands-on experiences with these methods in the instructor laboratories. We open the discussion section of the course to all students, postdocs, and faculty members (in this order) but cap the class size at 12 participants to facilitate interactions. Hands-on experiences are restricted to ITVS students. For hands-on experiences, each ITVS student chooses two techniques and spends a day in the laboratory of the respective instructor to gain practical experience with the experiments and analysis pipelines and discuss pitfalls and applications of the methods in detail. Through these components, the Advanced Methods in Vision Science course tries to accomplish three goals: 1) enable students to critically assess the literature through an understanding of strengths and limitations of advanced methods, 2) help students plan experiments involving these methods, and 3) facilitate collaborations with experts in the field that could enhance the science of the ITVS students.

Credit 3 units.

---

#### **L41 Biol 5509 ITVS Project Building**

The overall goal is to have intense guidance to construct a grant/fellowship application. Students should expect to have a near completed F30/F31 application by the end of this course. Students will study previous F30/F31 applications and sit on a mock panel to review real world grants from their peers. They will use this experience to understand the reviewers perspective when writing fellowships and grants in the future. Students will draft all portions of a research proposal with feedback from their peers, the course instructor and faculty mentors.

Credit 1 unit.

---

#### **L41 Biol 5512 Diseases of Membrane Transport & Excitability**

Classes will consider the molecular basis of the disease as well as animal models and current clinical studies. Addressing studies from the level of basic biophysical and molecular properties of the underlying ion channels/transporters, to the cellular defects, to organ and animal outcomes and therapies, which will encourage and force students to develop their ability to integrate understanding at multiple levels. Students will be introduced to emerging ideas in clinical diagnosis, management and treatment, when appropriate, clinical specialists will allow student participants to directly observe and participate in the clinical experiences. Prerequisites, Bio 5068 Fundamentals of Molecular Cell Biology.

Credit 2 units.

---

#### **L41 Biol 554 Neural Sciences**

An integrated course dealing with the structure, function and development of the nervous system. The course will be offered in the Spring of the first year Medical School calendar. Prerequisite: Biol 3411 or Biol 501 and approval of the instructor.

Credit 5 units.

---

#### **L41 Biol 5565 Oral Presentation of Scientific Data**

Practical course on how to prepare and present scientific data to an audience. Prerequisite: First year neuroscience program courses. Meets once a week for 90 minutes.

Credit 1 unit.

---

#### **L41 Biol 5571 Cellular Neurobiology**

This course will present a fully integrated overview of nerve cell structure, function and development at the molecular and cellular level. Broad topics to be covered include gene structure and regulation in the nervous system, quantitative analysis of voltage- and chemically-gated ion channels, presynaptic and postsynaptic mechanisms of chemical neurotransmission, sensory transduction, neurogenesis and migration, axon guidance and synapse formation. Two lectures plus one hour of discussion per week for 14 weeks. There will be three exams, as well as homework problems and summaries of discussion papers. Prerequisites: graduate standing or permission of the instructor.

Credit 6 units.

---

#### **L41 Biol 5572 Regenerative and Stem Cell Biology**

Regeneration is a very complex, post-embryonic developmental phenomenon, where organisms replace lost body parts and organs upon injury. However, we still know very little about why some animals are so successful at regenerating whole bodies and organs, while other animals (like humans) have limited or no capacity to do so. This course covers regeneration and stem cell biology across different levels of biological organization (e.g. cell, organ, limb regeneration.) and across the animal phylogeny.

Credit 3 units.

---

#### **L41 Biol 5577 Synapses Journal Club**

Synaptic function and malleability are fundamental to nervous system function and disease. This is an advanced seminar in the development, structure, and function of the synapse in health and disease. It is a natural extension of topics covered in Bio 5571. It may be primarily of interest to students in the Neurosciences Program, but also to students in MCB, Development, Biochemistry, Computational Biology, and Molecular Biophysics. Generally a topic for the semester helps focus the group; past topics have included Synapses and Disease, Neurotransmitter Transporters, Glutamate Receptors, Dendrites, GABA receptors. Participants (students, postdocs, and faculty) alternate responsibility for leading critical discussion of a current paper. Active participation offers the opportunity for students to hone their critical thinking and presentation skills. Students enrolling for credit will be expected to attend each week, to lead discussion once per semester and to provide written critiques (1-2 pages each) of two papers. Prerequisites, Graduate standing in DBBS; Bio 5571 preferred.

Credit 1 unit.

---

#### **L41 Biol 5582 Macroevolution**

An advanced introduction to the study of macroevolutionary patterns and processes with emphasis on the systematic methodology employed. Topics: theories of classification, phylogenetic reconstruction, testing of historical hypotheses, hierarchy theory, adaptation, extinction, speciation, developmental mechanisms of organismal evolution, biogeography. Prerequisite: permission of instructor.

Same as L41 Biol 4182

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L41 Biol 560A Special Topics in Nuclear Chemistry: Radiochemistry for the Life Sciences**

This course will provide an introduction to nuclear science (e.g. radioactive decay, nuclear stability, interactions of radiation with matter) and followed by an overview of how radiochemistry is used in the life sciences. Lectures on radiolabeling chemistry with radionuclides used in medical imaging (single photon emission computed tomography (SPECT) and positron emission tomography (PET) and their applications will be presented. In addition, lectures on radiochemistry with tritium (H-3) and C-14 will also be included. Additional applications include environmental radiochemistry as applied to nuclear waste disposal and biofuels.

Same as L07 Chem 536

Credit 2 units.

---

#### **L41 Biol 5617 Development Biology PhD Program Seminar**

In response to student feedback for additional training in Developmental Biology obtained from surveys and group meetings, we propose a new seminar course in Developmental Biology. This once a week course will introduce student in the Developmental, Regenerative, and Stem Cell Biology PhD Program both to the classical embryological experiments that defined key concepts in developmental biology, such as cellular fields, equivalence groups, cytoplasmic determinants, and the more modern experiments that uncovered the genetic and molecular basis of these processes. In general, the classes will be individual sessions on professional development, such as scientific presentation, how to navigate graduate school, etc.

Credit 1 unit.

---

**L41 Biol 5619 Advanced Cognitive, Computational, and Systems Neuroscience**

This course will develop critical thinking and analysis skills with regard to topics in Cognitive, Computational and Systems Neuroscience. Course format will be a series of modules composed of intensive, faculty-led case studies on interdisciplinary topics at the intersection of psychology, computation and neuroscience. The goal will be to highlight the benefits of integrative, interdisciplinary approaches, by delving into a small set of topics from a variety of perspectives, rather than providing a survey-level introduction to a broader set of topic areas. Modules will involve a combination of lectures and student-led discussion groups, with students further expected to complete a multi-disciplinary integrative final review paper. Case-study topics will vary somewhat from year to year, but are likely to include some of the following: temporal coding as a mechanism for information processing, coordinate transformations in sensory-motor integration, mechanisms of cognitive control, motor control strategies including application to neural prosthetics, and memory systems in health and disease. Same as L33 Psych 519  
Credit 3 units.

---

**L41 Biol 5621 Computational Statistical Genetics**

This course covers the theory and application of both classical and advanced algorithms for statistical modeling in genetics. Students learn how to derive, design and implement their own statistical genetics models through computer labs by writing their own software program from the basic model equations up to analyze one of four major term project datasets. Didactic lectures cover a wide range of important topics including: Maximum Likelihood theory, Frequentist vs. Bayesian approaches, Information Theory, Model Selection techniques, analysis methods for pedigrees vs. unrelated individuals, rare vs. common variant approaches, the E-M Algorithm, mixed model approaches, MCMC methods, Hidden Markov Models, Coalescent Theory, Haplotyping Algorithms, Epigenetic Analysis methods, Genetic Imputation Algorithms, Graphical Models, Decision Trees and Random Forests, Permutation/Randomization Tests, classification and Data Mining Algorithms, Population Stratification and Admixture Mapping Methods, Multiple comparisons corrections, and Power and Monte-Carlo simulation experiments. Same as M21-621  
Credit 3 units.

---

**L41 Biol 5622 Cognitive, Computational, and Systems Neuroscience Project Building**

The goal of this course is to help students in the CCSN Pathway develop the critical thinking skills necessary to develop and implement high quality, interdisciplinary research projects. Throughout the course of the semester, each student will develop a research plan in their chosen area of interest. The plan will be developed in consultation with at least two faculty members (from at least two different subdisciplines within the pathway) as well as the other students and faculty participating in the course. The culmination of this course will be for each student to produce an NIH-style grant proposal on the research project of their choosing. For most students, this will serve either as their thesis proposal or a solid precursor to the thesis proposal. The course will be designed to help facilitate the development of such a research plan through didactic work, class presentations, class discussion, and constructive feedback on written work. The course will begin with a review of written examples of outstanding research proposals, primarily in the form of grant submissions similar to those that the students are expected to develop (i.e., NRSA style proposals, R03 proposals). Review of these proposals will serve as a stimulus to promote discussion about the critical elements of good research proposals and designs in different areas. Each student will be expected to give three presentations throughout the semester that will provide opportunities to receive constructive feedback on the development and implementation of research aims. The first presentation (towards the beginning of the semester) will involve presentation of the student's

general topic of interest and preliminary formulation of research questions. Feedback will emphasize ways to focus and develop the research hypotheses into well-formulated questions and experiments. The second presentation will involve a more detailed presentation of specific research questions (along the lines of NIH-style Specific Aims) and an initial outline of research methods. The final presentation will involve a fuller presentation of research questions and proposed methods. Feedback, didactic work, and group discussion throughout the semester will include guidance on critical components of the development of a research plan, including how to perform literature searches, formulate testable hypotheses, write critical literature summaries, and design experiments and analyses. The course will meet once a week, with faculty members from different tracks within the Pathway present at each meeting. This will allow students to receive feedback from several perspectives. Prerequisite: Member of CCSN Pathway, permission of instructor.  
Credit 3 units.

---

**L41 Biol 5624 Bioinformatics for Genomics I**

This course is designed to follow Applied Bioinformatics for Genomics I, in the fall semester. The fall semester course is not required as a prerequisite. Students who need fundamental skills for computational genomics can access the fall semester lectures online. This course is for those who want to 1) expand fundamentals skills for computational genomics, 2) use this information to improve and expedite their research and 3) improve their knowledge by hearing from experts in specific technologies and practices. The course meets once a week throughout the Spring semester, covering a variety of best practices methods, technology, and knowledge in focused short lectures coupled with hands-on exercises.  
Credit 1 unit.

---

**L41 Biol 5625 Applied Bioinformatics for Genomics II**

This course is designed to follow Applied Bioinformatics for Genomics I, in the fall semester. The fall semester course is not required as a prerequisite. Students who need fundamental skills for computational genomics can access the fall semester lectures online. This course is for those who want to 1) expand fundamentals skills for computational genomics, 2) use this information to improve and expedite their research and 3) improve their knowledge by hearing from experts in specific technologies and practices. The course meets once a week throughout the Spring semester, covering a variety of best practices methods, technology, and knowledge in focused short lectures coupled with hands-on exercises.  
Credit 1 unit.

---

**L41 Biol 5646 First-Year Fundamentals**

This course will provide a two-part introduction to neuroscience research fundamentals. Namely, it will introduce elementary statistical analysis for neuroscience research as well as grant writing to support neuroscience-related research. Enrollment is limited to first-year neuroscience students.  
Credit 0.5 units.

---

**L41 Biol 5648 Coding and Statistical Thinking in the Neurosciences**

Students are introduced to scientific programming in Python. Students will learn common programming constructs and how to visualize and analyze data. Coding will be integrated into a statistics curriculum introducing summary statistics, probability distributions, simulation and hypothesis testing, and power analysis for experimental design.  
Credit 3 units.

---

---

#### **L41 Biol 5651 Neural Systems**

The course will consist of lectures and discussions of the sensory, motor and integrative systems of the brain and spinal cord, together with a weekly lab. The lectures will present aspects of most neural systems, and will be given by faculty members who have specific expertise on each topic. The discussions will include faculty led group discussions and papers presented and discussed by students. The labs will include human brain dissections, examination of histological slides, physiological recordings, behavioral methods, computational modeling, and functional neural imaging.  
Credit 4 units.

---

#### **L41 Biol 5657 Biological Neural Computation**

This course will consider the computations performed by the biological nervous system with a particular focus on neural circuits and population-level encoding/decoding. Topics include, Hodgkin-Huxley equations, phase-plane analysis, reduction of Hodgkin-Huxley equations, models of neural circuits, plasticity and learning, and pattern recognition & machine learning algorithms for analyzing neural data. Note: Graduate students in psychology or neuroscience who are in the Cognitive, Computational, and Systems Neuroscience curriculum pathway may register in L41 5657 for three credits. For non-BME majors, conceptual understanding, and selection/application of right neural data analysis technique will be stressed. Hence homework assignments/examinations for the two sections will be different, however all students are required to participate in a semester long independent project as part of the course. Calculus, Differential Equations, Basic Probability and Linear Algebra Undergraduates need permission of the instructor. L41 5657 prerequisites: Permission from the instructor  
Same as E62 BME 572  
Credit 3 units. EN: TU

---

#### **L41 Biol 5663 Neurobiology of Disease**

This is an advanced graduate course on the pathology of nervous system disorders. This course is primarily intended to acquaint Neuroscience graduate students with a spectrum of neurological diseases, and to consider how advanced neuroscientific approaches may be applied to promoting recovery in the brain. Topics will be presented by Washington University faculty members and include: neurooncology, stroke, retinal disease, perinatal brain injury, neurodegenerative disorders, neuroinflammation, epilepsy, and psychiatric disorders. The class will meet for 2 hours each week. Each session will be led by a faculty guest with expertise in a specific neurological or psychiatric disease. In the first hour, the speaker will discuss clinical manifestations and pathophysiology. Where possible, the clinical presentation will be supplemented with a patient demonstration or videotape. After a 30 minute break for pizza and soda, the second hour will follow a journal club format. Two or three students will review current papers assigned by the speaker or course director. This course is offered in alternate years. Prerequisite: Introductory neuroscience course at the graduate or medical school level.  
Credit 2 units.

---

#### **L41 Biol 5665 The Science of Behavior**

The primary function of nervous systems is to control behavior. Understanding the links between brain and behavior requires an understanding of cognition-the computations performed by the brain, as well as the algorithms underlying those computations and the physical substrates that implement those algorithms. The goal of this course is to introduce students to the tools, concepts, and techniques for the experimental study of cognition and behavior in humans and nonhuman animals. We will focus on cognitive capacities that are well-developed in humans and can be compared with those of other species, to develop an understanding of how evolution shapes cognition and behavior. Students who complete this course will be

able to ask questions and form hypotheses about the computations and algorithms underlying cognition and behavior, and to design experiments that test these hypotheses. PREREQ: Graduate standing or permission of the instructor  
Same as L33 Psych 5665  
Credit 3 units.

---

#### **L41 Biol 5678 Clocksclub**

Clocksclub focuses on recent advances in the study of biological timing including sleep and circadian rhythms. Participants discuss new publications and data on the molecules, cells and circuits underlying daily rhythms and their synchronization to the local environment. Students registered for this journal club will lead a discussion once during the semester. Prerequisites: BIO 2970 or permission of instructor.  
Credit 1 unit.

---

#### **L41 Biol 5702 Current Approaches in Plant and Microbial Research**

This course is designed to introduce graduate students and upper-division undergraduates to contemporary approaches and paradigms in plant and microbial biology. The course includes lectures, in-class discussions of primary literature and hands-on exploration of computational genomic and phylogenetic tools. Evaluations include short papers, quizzes, and oral presentations. Over the semester, each student works on conceptualizing and writing a short NIH-format research proposal. Particular emphasis is given to the articulation of specific aims and the design of experiments to test these aims, using the approaches taught in class. Students provide feedback to their classmates on their oral presentations and on their specific aims in a review panel. Prereq: Bio 2970 or permission of the instructor.  
Credit 4 units.

---

#### **L41 Biol 5703 Experimental Design and Analysis in Biological Research**

In-depth exploration of landmark and current papers in genetics, molecular and cell biology, with an emphasis on prokaryotes and eukaryotic microbes. Class discussions will center on such key discoveries as the chemical nature of genetic material, the genetic code, oxygen producing light-spectrum, cell-cell signaling, transcriptional regulation, the random nature of mutation, and cell cycle regulation. Emphasis will be placed on what makes a good question or hypothesis, expedient ways to address scientific problems, and creative thinking. The last third of the course will consist of student-run seminars on selected topics to increase proficiency in the synthesis of new material and public presentation skills.  
Credit 2 units.

---

#### **L41 Biol 5715 Basic Cancer Biology**

More than two thirds of all people know someone who has cancer. This course provides students with a more extensive understanding of what cancer is and how it affects the human body. We will discuss the history of cancer research, the many different types of human cancers, and basic chemotherapeutics. The topics will be presented in a basic scientific nature, with an emphasis on gaining a broad understanding of the subjects. Prerequisite: Biol 2960 or equivalent. Not available to students who have credit for Biol 144 or Biol 1440.  
Same as L41 Biol 4715  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L41 Biol 5723 Seminar in Plant and Microbial Bioscience**

This course emphasizing presentation skill and critical analysis counts towards the PMB Graduate Program's journal club course requirement. Students will be responsible for dividing and presenting 30 current research publications selected by the course masters. In addition to assembling brief PowerPoint presentations providing background and significance for their assigned articles, students are expected to provide classmates with a 1 page primer and short list of relevant references. Credit 2 units.

---

**L41 Biol 5772 Behavioral Ecology**

This course examines animal behavior from an evolutionary perspective and explores the relationships between animal behavior, ecology, and evolution. Topics include mating systems, sexual selection, parental care, kin selection, and cooperation. There is a strong active-learning component. Prerequisite: Bio 2970 or permission of instructor.

Same as L41 Biol 472

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L41 Biol 580 Seminar in Population Biology**

This weekly seminar, covering different topics each semester, should be taken by graduate students in the program. Prerequisite: graduate standing or permission of the instructors.

Credit variable, maximum 3 units.

---

**L41 Biol 5801 Biochemistry & Molecular Biophysics Seminar Journal Club**

This will be a journal club-based seminar course mirroring the topics covered by Biochemistry and Molecular Biophysics (BMB) seminar speakers during the concurrent semester. Students will present a paper published by one of the BMB seminar speakers one-week ahead of that speaker's seminar. This will allow students and faculty to become more familiar with the research programs of BMB invited speakers, likely stimulating discussion within the Q&A period after the seminar, as well as during informal meet-the-speaker lunch sessions. Students will be evaluated on their journal club presentation, attendance and class participation.

Credit 1 unit.

---

**L41 Biol 584 Climate Change Reading Group**

The Climate Change Reading Group is made up of multi-disciplinary faculty and students from multiple institutions in St Louis: WUSTL, UMSL, SLU, Missouri Botanical Garden, Danforth Center, and more. Many of us in different labs, departments, and institutions around STL are actively investigating aspects and effects of climate change; this reading group provides a venue for interacting with others in the community. Subject matter within the context of Climate Change will be chosen each week by a different presenter. Students can join this reading group for 1 credit if they agree to read all papers, actively participate in discussions, find and present one high quality scientific paper on climate change in the field of their choice and moderate the discussion of this paper. The students will be evaluated on their participation, their understanding of the issues, and their presentation. Prerequisites: Contact the course coordinator.

Credit 1 unit.

---

**L41 Biol 585 Seminar in Floristic Taxonomy**

This weekly seminar provides an introduction to/overview of Plants, each semester progressively covering orders and families in a sequence derived from the Angiosperm Phylogeny Website (<http://www.mobot.org/MOBOT/Research/APweb/welcome.html>); in Spring 2015, the seminar will cover several crown orders of the monocots, including grasses and relatives. Weekly presentations include a summary of all relevant information (molecular, chemical, anatomical,

embryological, morphological, ecological, geographical, historical/paleontological, etc.) about the plant group under consideration, review of the classification/phylogeny of the group, examination of fresh and/or preserved specimens, and discussion of relationships, human uses, and other relevant aspects of the biology of that group. Credit will be contingent on one (or two) seminar presentation(s) per student, regular attendance and active participation in group discussions.

Credit 1 unit.

---

**L41 Biol 5862 Seminar on Professional Development for Graduate Students in Ecology, Evolution & Population Biology**

This is a weekly discussion seminar course in which advanced graduate students and postdocs in STEM will discuss the practices of scientific teaching and basic professional development skills. Topics covered will include scientific teaching, active learning, assessment driven instruction, creation inclusive classrooms, preparing for job interviews, preparing grant proposals, and balancing family and work. There will be several panel discussions with invited speakers on a range of potential career options to STEM PhDs. Students will prepare or revise their professional portfolio materials over the course of the semester. The course is open to all DBBS graduate students and is required for GAANN fellows. Prerequisite: Graduate student status in the DBBS or permission of instructor.

Credit 1 unit.

---

**L41 Biol 5866 Communicating Science: Writing for Multiple Audiences**

This course introduces strategies for writing effectively and communicating scientific research to a variety of audiences. Students will learn to reduce jargon, explain scientific concepts in common language, write clearly and concisely, and use sentence structure to maximum efficiency. Written assignments emphasize the significance and innovation in scientific research that appeal to broad audiences, including: the general public, students, policy makers, grant reviewers, and journal editors. This course meets biweekly and consists of lectures and small group sessions. You must enroll in both the lecture session (section 1) and a small group (section A, B, C, or D).

Credit 1 unit.

---

**L41 Biol 5867 Career Planning for Biological Scientists**

This course will guide you through nationally recognized and evidence-based career exploration curricula. It is intended for DBBS Ph.D. students and bioscience postdocs who want to jump-start career planning and professional skills needed for a broad range of scientific careers. Topics include self-assessment, career exploration, and goal-setting for long-term success. You will work on a team to research the scientific career path of your choice. Each team will study the specific required knowledge, skills, and attributes of their career interest or employment sector. As part of this research project, you will complete a simulated job exercise and network with alumni or local leaders in your chosen field, gaining valuable real-world insights and creating essential professional connections.

Credit 1 unit.

---

**L41 Biol 590 Research**

Credit to be arranged.

Credit variable, maximum 12 units.

---

**L41 Biol 5901 Biomolecular Condensates Journal Club**

Biomolecular condensates are non-stoichiometric assemblies of protein and nucleic acids that provide a means for cellular spatiotemporal organization. Over the last decade, a growing appreciation has emerged than many such condensates (which include nucleoli, stress granules, paraspeckles, or even transcriptional

assemblies) may form in part via liquid-liquid phase separation, although this does not preclude other assembly mechanisms. A challenge for those new to this field reflects the need to apply ideas from condensed matter physics, biochemistry, physical chemistry, and cell biology. In this journal club we will focus on developing an understanding of the core concepts surrounding biomolecular condensates and phase transitions in biology by reading a mixture of cutting edge and more 'classic' (i.e. mid 2010s) literature.

Credit 1 unit.

---

#### **L41 Biol 5902 Introduction to the Scholarship of Teaching and Learning**

In this course, advanced graduate students and postdocs in STEM will 1) learn the fundamentals of the Scholarship of Teaching and Learning (SoTL)-which is the practice of developing, reflecting on, and evaluating teaching methods to improve student learning, 2) Develop a working knowledge of SoTL, which draws on research in education, STEM education, and cognitive science, 3) Understand how SoTL can lead to the dissemination of new knowledge to a broad audience of educators through publication and presentations., and 4) Develop the central elements of a SoTL project. These elements include articulating questions about classroom teaching that can be addressed in a SoTL research project; developing working hypotheses in response to the questions; designing an evaluative plan, including specific research methods, the type of data to be collected, and how the data will be analyzed in relation to the hypotheses; identifying and understanding necessary procedures to obtain IRB approval for the research. Prereqs: Must be an advanced graduate student or a postdoctoral appointee with some teaching experience, and must have completed 4 STEM Pedagogies workshops (2 are foundational topics) offered by The Teaching Center or received approval from one of the instructors. Same as U29 Bio 4902.

Credit 1 unit.

---

#### **L41 Biol 5911 Seminar in Biology & Biomedical Sciences**

These seminars cover the recent literature in various areas not included in other courses, or in more depth than other courses. Prerequisite: permission of instructor. Credit to be arranged.

Credit variable, maximum 12 units.

---

#### **L41 Biol 5920 Foundations in Cancer Biology**

This basic cancer biology class is designed to provide a didactic foundation into cancer biology principles. These will include tumor suppressors & oncogenes, DNA damage pathways, protein modifications, tumor progression, metastasis, tumor microenvironment and numerous other topics relevant to cancer biology.

Credit 3 units.

---

#### **L41 Biol 5922 Entering Mentoring**

This course is a series of facilitated discussions aimed at developing and improving mentoring skills for those involved in supervising undergraduate research experiences. It is designed for postdocs and graduate students who are or will be 'bench mentors' for undergraduates doing Bio 500 and/or Summer Research. Participants will receive "Entering Mentoring" materials, including articles and worksheets to facilitate mentoring interactions with their mentee, plus several resource books relevant to mentoring. They will develop a mentoring philosophy statement, work on specific assignments designed to improve their relationship with their mentee and share their present and past mentoring experiences as mentors and mentees. Bench mentors will be eligible for a travel award to help defray expenses for attending a meeting with their mentee, if that student wins one of the HHMI SURF travel awards (4-5 awarded annually) or is otherwise being supported to present at a scientific meeting. Prerequisite: open to graduate students and postdocs, with priority for those who plan to mentor undergraduates in summer research experiences. Graduate

students and postdocs do NOT need to be mentoring a student at the time of the course; it is open to all with an interest in mentoring now or in the future. Note: The sessions will be held either at the beginning of the day or the end of the day at the Danforth campus. Once registration closes, an email will be sent to those registered to poll for the best days & times.

Credit 1 unit.

---

#### **L41 Biol 5929 Experimental Cancer Biology**

This basic cancer biology class is meant to coincide with the Foundation course. Topics will be discussed in parallel with Foundation course topics but from the perspective of the laboratory experimentalist. Experimental details will provide the basis for understanding how to ask and answer important questions in the cancer biology laboratory.

Credit 3 units.

---

#### **L41 Biol 5930 Advanced Topics in Neuroscience**

This course will expose upper level students and postdocs to advanced topics and methods in Neuroscience. The course will rapidly fill gaps in student knowledge in areas that may be relevant to new directions in thesis work or interest areas. Each section of the course will be offered asynchronously, sometimes in coordination with existing journal clubs and other seminars. Each section will meet for 2-hours per week for 3-weeks. Sections may start with a didactic component or review paper, but will quickly delve into discussion of primary papers curated by faculty and covering a focused topic. It is expected that papers will cover historical and current contexts. Some sections will be techniques-focused; others conceptually focused. Each section will be led by a faculty member drawn from the Neuroscience program in an area of their expertise. Objectives include deepening critical thinking, statistical knowledge, experimental design, and technical prowess.

Credit 0.5 units.

---

#### **L41 Biol 5940 Foundations in Cancer Biology and Experimental Cancer Biology**

This advanced course will teach the clinical perspective of cancer biology using topics from oncology, radiation biology, radiology, pathology, immunology and surgery. Students will learn to write a grant proposal that includes a clinical trial element while also shadowing physicians in a real cancer clinical setting.

Credit 3 units.

---

#### **L41 Biol 598 Topics in Evolution, Ecology and Population Biology**

This course will meet weekly to discuss ongoing research and future directions of the Evolution, Ecology, and Population Biology (EPPB) graduate program. A different EPPB faculty member will present each week. This course introduces new EPPB students to the diversity of research questions and approaches undertaken by laboratories in the EPPB program; it will also introduce new students to faculty and vice versa. The course will educate the students about the breadth of research in evolution, ecology, and behavior. It will also provide knowledge that students can use when choosing lab rotations and interdisciplinary exposure to enhance creativity in research.

Credit 1 unit.

---

#### **L41 Biol 5989 Advanced Topics in Neuroscience**

This course will expose upper-level and postdoctoral students to advanced topics and methods in neuroscience. The course will rapidly fill gaps in student knowledge in areas that may be relevant to new directions in thesis work or interest areas. Each section of the course will be offered asynchronously, sometimes in coordination with existing journal clubs and other seminars. Each section will meet for two hours per week for three weeks. Sections may start with a didactic component or a review paper, but they will quickly delve into

the discussion of primary papers curated by faculty and covering a focused topic. It is expected that papers will cover both historical and current contexts. Some sections will focus on technique; others will be conceptually focused. Each section will be led by a faculty member drawn from the Neuroscience program in an area of their expertise. Objectives include deepening critical thinking, statistical knowledge, experimental design, and technical prowess.  
Credit 0.5 units.

#### L41 Biol 5991 Decision Neuroscience

This is an advanced, reading-intensive graduate course. We will meet once a week for 3 hrs and focus primarily on discussing the literature on decision making from various perspectives. Decision making is a central object of study in multiple disciplines including neuroscience, cognitive psychology, and economics. Within systems neuroscience, research in the past 20 years has developed in two main areas - namely perceptual decisions and economic (value-based) decisions. Each week we will discuss a specific topic and/or research question. Discussion topics will originate from perceptual decisions or economic decisions, and often be relevant to both. Readings will include experimental papers and computational/theoretical papers. Every week, students are expected to read the assigned papers and to write a short comment before class. In class, we will discuss the papers and the weekly topic in a journal-club format. Participation of PhD students from different programs is encouraged, pending permission from the instructor. The goal of the class is to bring graduate students from different disciplines up-to-date on the current debate(s) in decision neuroscience, and to inspire and support their future research.  
Credit 3 units.

#### L41 Biol 5999 Independent Work

This course is designed for individual students wishing to explore in-depth specialized areas of literature or technology with one or more faculty members. Credit will vary with the amount of work and discussion, but cannot be more than 3 credits.  
Credit variable, maximum 3 units.

## Biology Major Program Requirements

- **Total units required:** 58

### Required Courses

Code	Title	Units
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
Chem 111A	General Chemistry I	3
or Chem 105	Principles of General Chemistry I	
Chem 112A	General Chemistry II	3
or Chem 106	Principles of General Chemistry II	
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Chem 262	Organic Chemistry II with Lab	4
Math 132	Calculus II	3
SDS 2200	Elementary Probability and Statistics	3

or Math 233	Calculus III	
or SDS 3200	Elementary to Intermediate Statistics and Data Analysis	
Physics 191	Physics I	3
or Physics 193	Focused Physics I	
Physics 191L	Physics I Laboratory	1
or Physics 193L	Focused Physics I Laboratory	
Physics 192	Physics II	3
or Physics 194	Focused Physics II	
Physics 192L	Physics II Laboratory	1
or Physics 194L	Physics II Laboratory	
<b>Total Units</b>		<b>40</b>

Students may substitute Chem 401 Physical Chemistry I for Chem 262 Organic Chemistry II with Lab. Students who plan to take physical chemistry must take Math 233 Calculus III. SDS 2200 Elementary Probability and Statistics (required for the tracks in ecology and evolution and in genomics and computational biology) and Math 233 Calculus III are valuable, particularly for students interested in research. Students who have taken Math 233 may take SDS 3200 Elementary to Intermediate Statistics and Data Analysis rather than SDS 2200 Elementary Probability and Statistics for a more advanced treatment of statistics.

At least 18 units in advanced biology courses (numbered 300 or above) are required. These 18 units may not include Biol 303A, Biol 307A, Biol 3160, Biol 3180, Biol 343A, Biol 363, Biol 387, Biol 388, Biol 3900, Biol 4202, Biol 4582, Biol 487, or Biol 488; cross-listed courses originating in other departments (except Biol 354, Biol 360, Biol 4540, Biol 4580, Biol 4810, Biol 4820, and Biol 4833, which count as biology major credit despite external origins); courses in the School of Continuing & Professional Studies; or more than 3 units of history-of-science courses. Up to 6 units of Biol 500 may be counted toward the 18 advanced biology units, and up to 3 units of Biol 49XX seminar courses may be counted toward the 18 advanced biology units.

**Majors are required to take at least one course from each of the following three areas:**

*Area A: Cellular and Molecular Biology*

Code	Title	Units
Biol 324	Human Genetics	3
Biol 334	Cell Biology	3
Biol 3371	Eukaryotic Genomes	4
Biol 3481	Parasitology	3
Biol 349	Microbiology	4
Biol 424	Immunology	4
Biol 4344	Epigenetics	3
Biol 4492	Infectious Diseases: History, Pathology, and Prevention	3
Biol 451	General Biochemistry	4
Biol 4810	General Biochemistry I	3
Biol 4820	General Biochemistry II	3

Area B: Organismal Biology

Code	Title	Units
Biol 3057	Physiological Control Systems	3
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 3411	Principles of the Nervous System	3
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains, and Behavior	3
Biol 3424	Great Discoveries in Neuroscience	3
Biol 4023	How Plants Work: Physiology, Growth, and Metabolism	3
Biol 4030	Biological Clocks	3
Biol 4071	Developmental Biology	3
Biol 4072	Regenerative and Stem Cell Biology	3
Biol 4381	Cell-Based Tissue Engineering and Regenerative Medicine	3
Biol 4580	Principles of Human Anatomy and Development	3

Area C: Evolution, Ecology and Population Biology

Code	Title	Units
Biol 3220	Woody Plants of Missouri	3
Biol 3221	Research and Public Education in the Arboretum	3
Biol 347	Darwin and Evolutionary Controversies	3
Biol 3494	Microbes and the Environment	4
Biol 3501	Evolution	4
Biol 370	Animal Behavior	3
Biol 381	Introduction to Ecology	3
Biol 4181	Population Genetics (and Microevolution)	3
Biol 4182	Macroevolution	3
Biol 4183	Molecular Evolution	3
Biol 419	Community Ecology	3
Biol 4195	Disease Ecology	4
Biol 472	Behavioral Ecology	4

Majors also must take an advanced laboratory course from the following list:

Code	Title	Units
Biol 3110	Vertebrate Structure Laboratory	4
Biol 3423	Behavioral Genetics Laboratory	3
Biol 3491	Microbiology Laboratory	3
Biol 3492	Laboratory Experiments with Eukaryotic Microbes	3
Biol 3493	Bacterial Bioprospecting and Biotechnology	3
Biol 360	Biophysics Laboratory	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4193	Experimental Ecology Laboratory	4

Biol 4220	Practical Bioinformatics	4
Biol 4342	Research Explorations in Genomics	4
Biol 434W	Research Explorations in Genomics (Writing-Intensive)	4
Biol 4522	Laboratory in Protein Analysis, Proteomics, and Protein Structure	3
Biol 4523	Molecular Methods in Enzyme Analysis	4
Biol 4525	Structural Bioinformatics of Proteins (Writing Intensive)	4

All courses to be counted toward a major in biology must be taken for a letter grade if a letter grade is offered. A grade of C- or better must be earned in all of these courses.

In special cases, students may earn credit for graduate courses offered by the Division of Biology & Biomedical Sciences.

## Additional Information

### Research

Research opportunities are available during the student's first and second years through Biol 200; such opportunities are available during the third and fourth years through Biol 500. A research emphasis in the major requires at least 6 credits (two semesters) of Biol 500 research and an approved senior thesis on this research, which is presented at the undergraduate symposium. The research emphasis is acknowledged on the degree as a research milestone.

### Senior Honors

Biology majors are encouraged to work for senior honors, which require a 3.30 grade point average in biology, a 3.30 GPA in nonbiological sciences (mathematics, chemistry and physics courses), and a 3.65 overall GPA at the time of graduation. Also required are 6 units of Biol 500 research and an approved thesis from this work, equivalent to the research emphasis described in the preceding paragraph. Students interested in senior honors should begin Biol 500 no later than the spring of their junior year.

The Department of Biology awards the Marian Smith Spector Prize to an undergraduate who has an excellent academic record and who submits an outstanding honors thesis; it also awards the Ralph S. Quatrano Prize to the student whose thesis shows the greatest evidence of creativity in design, research methodology and/or broader scientific implications. The Harrison D. Stalker Prize is awarded to a graduating senior whose college career is distinguished by scholarship, service and breadth of interest.

In special cases, students may earn credit for graduate courses offered by the Division of Biology & Biomedical Sciences.

## Specialization Requirements

- **Total units required (including the biology major requirements): 65**

Additional requirements include SDS 2200 or SDS 3200. Students whose main interest is ecology must take at least two ecology electives and one evolution elective; students whose main interest is evolution must take at least two evolution electives and one ecology elective (evolution electives: Biol 3501, Biol 4181, Biol 4182, and Biol 4183; ecology electives: Biol 370, Biol 381, Biol 419, Biol 4195, and Biol 472). Also required are one elective in analytical methodology

(CSE 131 or SDS 322) and one elective in Earth, environmental, and planetary sciences (EEPS 201, EEPS 202, or EEPS 323). The course used to fulfill the advanced laboratory requirement for the major must be Biol 4193, Biol 4342, or Biol 434W.

## Additional Information

### Research

Research opportunities are available during the student's first and second years through Biol 200; such opportunities are available during the third and fourth years through Biol 500. All courses to be counted toward a major in biology must be taken for a letter grade if a letter grade is offered. A grade of C- or better must be earned in all of these courses.

In special cases, students may earn credit for graduate courses offered by the Division of Biology & Biomedical Sciences.

## Specialization Requirements

- **Total units required (including the biology major requirements): 64**

Additional requirements include an advanced genomics/computational biology elective (Biol 324, Biol 4183, Biol 4344, Biol 548, or Biol 5488); statistics (SDS 2200 or SDS 3200); and two outside electives (CSE 131 and CSE 247). CSE 240 is strongly recommended as well. The course used to fulfill the advanced laboratory requirement for the major must be Biol 3492, Biol 3493, Biol 4220, Biol 4342, Biol 434W, or Biol 4525. Biology courses recommended for students in this track include Biol 334, Biol 3422, Biol 349, Biol 3491, Biol 4030, Biol 4181, Biol 4183, and Biol 4810. Recommended mathematics electives include Math 217 and Math 309.

## Additional Information

### Research

Research opportunities are available during the student's first and second years through Biol 200; such opportunities are available during the third and fourth years through Biol 500. A research emphasis in the major requires at least 6 credits (two semesters) of Biol 500 research and an approved senior thesis on this research, which is presented at the undergraduate symposium. The research emphasis is acknowledged on the degree as a research milestone.

### Senior Honors

Biology majors are encouraged to work for senior honors, which require a 3.30 grade point average in biology, a 3.30 GPA in nonbiological sciences (mathematics, chemistry and physics courses), and a 3.65 overall GPA at the time of graduation. Also required are 6 units of Biol 500 research and an approved thesis from this work, equivalent to the research emphasis described in the preceding paragraph. Students interested in senior honors should begin Biol 500 no later than the spring of their junior year.

Physics 192	Physics II	3
or Physics 194	Focused Physics II	
Physics 192L	Physics II Laboratory	1
or Physics 194L	Physics II Laboratory	
<b>Total Units</b>		<b>40</b>

Students may substitute Chem 401 Physical Chemistry I for Chem 262 Organic Chemistry II with Lab. Students who plan to take physical chemistry must take Math 233 Calculus III. SDS 2200 Elementary Probability and Statistics (required for the tracks in ecology and evolution and in genomics and computational biology) and Math 233 Calculus III are valuable, particularly for students interested in research. Students who have taken Math 233 may take SDS 3200 Elementary to Intermediate Statistics and Data Analysis rather than SDS 2200 Elementary Probability and Statistics for a more advanced treatment of statistics.

At least 18 units in advanced biology courses (numbered 300 or above) are required. These 18 units may not include Biol 303A, Biol 307A, Biol 3160, Biol 3180, Biol 343A, Biol 363, Biol 387, Biol 388, Biol 3900, Biol 4202, Biol 4582, Biol 487, or Biol 488; cross-listed courses originating in other departments (except Biol 354, Biol 360, Biol 4540, Biol 4580, Biol 4810, Biol 4820, and Biol 4833, which count as biology major credit despite external origins); courses in the School of Continuing & Professional Studies; or more than 3 units of history-of-science courses. Up to 6 units of Biol 500 may be counted toward the 18 advanced biology units, and up to 3 units of Biol 49XX seminar courses may be counted toward the 18 advanced biology units.

**Majors are required to take at least one course from each of the following three areas:**

*Area A: Cellular and Molecular Biology*

Code	Title	Units
Biol 324	Human Genetics	3
Biol 334	Cell Biology	3
Biol 3371	Eukaryotic Genomes	4
Biol 3481	Parasitology	3
Biol 349	Microbiology	4
Biol 424	Immunology	4

Biol 4344	Epigenetics	3
Biol 4492	Infectious Diseases: History, Pathology, and Prevention	3
Biol 451	General Biochemistry	4
Biol 4810	General Biochemistry I	3
Biol 4820	General Biochemistry II	3

*Area B: Organismal Biology*

Code	Title	Units
Biol 3057	Physiological Control Systems	3
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 3411	Principles of the Nervous System	3
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains, and Behavior	3

Biol 4522	Laboratory in Protein Analysis, Proteomics, and Protein Structure	3
Biol 4523	Molecular Methods in Enzyme Analysis	4
Biol 4525	Structural Bioinformatics of Proteins (Writing Intensive)	4

All courses to be counted toward a major in biology must be taken for a letter grade if a letter grade is offered. A grade of C- or better must be earned in all of these courses.

In special cases, students may earn credit for graduate courses offered by the Division of Biology & Biomedical Sciences.

## Specialization Requirements

- **Total units required (including the biology major requirements): 68**

Additional requirements include Biol 349, which should be taken during the spring of the sophomore year, and either Biol 451 or the pair of courses Biol 4810 and Biol 4820. The advanced laboratory course used to fulfill major requirements must be one of the following: Biol 3491, Biol 3492, or Biol 3493. At least one of the following must be taken as an advanced microbiology elective: Biol 3481, Biol 4242, Biol 4492, or Biol 5426. At least one of the following must be taken as an allied elective: the pair of courses Biol 191 and Biol 192, Biol 424, Chem 453, or EEPS 323. Students should select one course each from biology major areas B and C. Biol 3501 is highly recommended as the course used to fulfill biology major area C. The total number of upper-level credits earned in major-track biology courses and allied electives must be at least 24 (6 units in addition to the 18 units required for the biology major).

## Additional Information

### Research

Research opportunities are available during the student's first and second years through Biol 200; such opportunities are available during the third and fourth years through Biol 500. A research emphasis in the major requires at least 6 credits (two semesters) of Biol 500 research and an approved senior thesis on this research, which is presented at the undergraduate symposium. The research emphasis is acknowledged on the degree as a research milestone.

### Senior Honors

Biology majors are encouraged to work for senior honors, which require a 3.30 grade point average in biology, a 3.30 GPA in nonbiological sciences (mathematics, chemistry and physics courses), and a 3.65 overall GPA at the time of graduation. Also required are 6 units of Biol 500 research and an approved thesis from this work, equivalent to the research emphasis described in the preceding paragraph. Students interested in senior honors should begin Biol 500 no later than the spring of their junior year.

The Department of Biology awards the Marian Smith Spector Prize to an undergraduate who has an excellent academic record and who submits an outstanding honors thesis; it also awards the Ralph S. Quatrano Prize to the student whose thesis shows the greatest evidence of creativity in design, research methodology and/or broader scientific implications. The Harrison D. Stalker Prize is awarded to a graduating senior whose college career is distinguished by scholarship, service and breadth of interest.

All courses to be counted toward a major in biology must be taken for a letter grade if a letter grade is offered. A grade of C- or better must be earned in all of these courses.

In special cases, students may earn credit for graduate courses offered by the Division of Biology & Biomedical Sciences.

## Specialization Requirements

- **Total units required (including the biology major requirements):** 60

Biology major requirements must be met with the following courses: Biol 3057, area A (Biol 334, Biol 451, Biol 4810, or Biol 4820), area B (Biol 3411), and any course in area C. Students must then choose one of the following laboratory pathways: (1) Laboratory Pathway 1: one of the following courses: Biol 3423, Biol 360, or Biol 404; or (2) Laboratory Pathway 2: any other upper-level biology laboratory course on the list of approved laboratory courses for the biology major plus 6 credits of Biol 500N and/or Biol 500U (Independent Research in Neuroscience). Students must select at least one biology elective (Biol 3110, Biol 3151, Biol 328, Biol 3421, Biol 3422, Biol 3424, Biol 4030, or Biol 4580) and one outside elective either in physics (Physics 350, Physics 355, or Physics 360) or psychology (Psych 330, Psych 360, or Psych 3604). SDS 2200 or SDS 3200 is recommended. Optional seminar courses in neuroscience include Biol 171 and Biol 4934. Physics 360 may count either as the advanced laboratory requirement or the outside elective course but not for both requirements.

## Additional Information

### Research

Research opportunities are available during the student's first and second years through Biol 200; such opportunities are available during the third and fourth years through Biol 500. A research emphasis in the major requires at least 6 credits (two semesters) of Biol 500 research and an approved senior thesis on this research, which is presented at the undergraduate symposium. The research emphasis is acknowledged on the degree as a research milestone.

### Senior Honors

Biology majors are encouraged to work for senior honors, which require a 3.30 grade point average in biology, a 3.30 GPA in nonbiological sciences (mathematics, chemistry and physics courses), and a 3.65 overall GPA at the time of graduation. Also required are 6 units of

Biol 500 research and an approved thesis from this work, equivalent to the research emphasis described in the preceding paragraph. Students interested in senior honors should begin Biol 500 no later than the spring of their junior year.

The Department of Biology awards the Marian Smith Spector Prize to an undergraduate who has an excellent academic record and who submits an outstanding honors thesis; it also awards the Ralph S. Quatrano Prize to the student whose thesis shows the greatest evidence of creativity in design, research methodology and/or broader scientific implications. The Harrison D. Biol 4181	Population Genetics	3
Biol 4182	Macroevolution	3
Biol 419	Community Ecology	3
Biol 4195	Disease Ecology	4
Biol 472	Behavioral Ecology	4

**One additional Biol 300+ major-track course (may include Biol 500):**

Please refer to the Biology Course Listings (p. 346) in this *Bulletin*.

**One of the following EnSt or EEPS 300+ courses:**

Code	Title	Units
EEPS 317	Soil Science	3
EEPS 323	Biogeochemistry (only if not already taken for chemistry requirement)	3
EEPS 340	Minerals, Rocks, Resources and the Environment	4
EEPS 353	Earth Forces	4
EEPS 385	Earth History	3
EEPS 409	Surface Processes	3
EEPS 428	Hydrology	3
EEPS 442	Aqueous Geochemistry	3
EEPS 486	Paleoclimatology	3
EnSt 364	Field Methods for Environmental Science	3
EnSt 365	Applied Conservation Biology	3

## Additional Information

### Research

Research opportunities are available during the student's first and second years through Biol 200; such opportunities are available during the third and fourth years through Biol 500. A research emphasis in the major requires at least 6 credits (two semesters) of Biol 500 research and an approved senior thesis on this research, which is presented at the undergraduate symposium. The research emphasis is acknowledged on the degree as a research milestone.

## Senior Honors

Biology majors are encouraged to work for senior honors, which require a 3.30 grade point average in biology, a 3.30 GPA in nonbiological sciences (mathematics, chemistry and physics courses), and a 3.65 overall GPA at the time of graduation. Also required are 6 units of Biol 500 research and an approved thesis from this work, equivalent to the research emphasis described in the preceding paragraph. Students interested in senior honors should begin Biol 500 no later than the spring of their junior year.

The Department of Biology awards the Marian Smith Spector Prize to an undergraduate who has an excellent academic record and who submits an outstanding honors thesis; it also awards the Ralph S. Quatrano Prize to the student whose thesis shows the greatest evidence of creativity in design, research methodology and/or broader scientific implications. The Harrison D. Stalker Prize is awarded to a graduating senior whose college career is distinguished by scholarship, service and breadth of interest.

## Bioinformatics Minor Program Requirements

- **Total units required:** 23-24 units

Mindful of the emerging opportunities at the interface of biology and computer science, the Department of Biology and the Department of Computer Science & Engineering have fashioned the minor in bioinformatics.

### Core Courses

Code	Title	Units
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
CSE 131	Introduction to Computer Science	3
CSE 247	Data Structures and Algorithms	3
ESE 326	Probability and Statistics for Engineering	3
or SDS 2200	Elementary Probability and Statistics	
or SDS 3200	Elementary to Intermediate Statistics and Data Analysis	
or SDS 3211	Statistics for Data Science I	
or DAT 120 & DAT 121	Managerial Statistics I and Managerial Statistics II	
<b>Total Units</b>		<b>17</b>

### Advanced Biology Elective

Choose one of the following:

Code	Title	Units
Biol 3492	Laboratory Experiments with Eukaryotic Microbes	3
Biol 3493	Bacterial Bioprospecting and Biotechnology	3
Biol 4181	Population Genetics	3
Biol 4220	Practical Bioinformatics	4
Biol 4342	Research Explorations in Genomics	4
Biol 437	Laboratory on DNA Manipulation	4
Biol 4525	Structural Bioinformatics of Proteins (Writing Intensive)	4

### Computer Science & Engineering Elective

Choose one of the following:

Code	Title	Units
CSE 514A	Data Mining	3
CSE 584A	Algorithms for Biosequence Comparison	3
or Biol 5504	Algorithms for Biosequence Comparison	
CSE 587A	Algorithms for Computational Biology	3

### Additional Information

It is anticipated that, for certain students, some portion of the introductory sequence will overlap with the courses required for the major and that these courses will be applicable to both the major and the minor. Upper-level courses used to fulfill the minor requirements may not be used to fulfill the requirements of another major or minor in Arts & Sciences.

Arts & Sciences students should declare the minor within Arts & Sciences. They will be assigned an advisor in Biology. Per Arts & Sciences policy, students with a major in the Department of Biology are not eligible to declare this minor. Per Arts & Sciences policy, Arts & Sciences students must complete 9 units of upper-level course work toward the minor.

McKelvey, Olin, and Sam Fox students should declare the minor within the McKelvey School of Engineering. They will be assigned an advisor in Computer Science & Engineering.

A minimum grade of C- is required for all courses to count toward the minor. Students may apply no more than one course taken outside of Washington University toward the minor requirements. Courses earned through Washington University-approved study abroad programs are considered to be resident units and may count toward this minor where applicable with no limit.

Website: http://wubio.wustl.edu

## Biology Minor

### Program Requirements

- **Total units required:** 32 (18 units of biology and 14 units of chemistry)

### Required Courses

Code	Title	Units
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
Chem 111A or Chem 105	General Chemistry I Principles of General Chemistry I	3
Chem 112A or Chem 106	General Chemistry II Principles of General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
<b>Total Units</b>		<b>22</b>

### Elective Courses

The minor requires 10 advanced units in biology selected from the following:

Code	Title	Units
Biol 3010	Biotechnology Project	3
Biol 3057	Physiological Control Systems	3
Biol 3100	R Workshop in Biology	1
Biol 3110	Vertebrate Structure Laboratory	4
Biol 3151	Endocrinology	3
Biol 3220	Woody Plants of Missouri	3
Biol 3221	Research and Public Education in the Arboretum	3
Biol 324	Human Genetics	3
Biol 328	Principles in Human Physiology	4
Biol 334	Cell Biology	3
Biol 3411	Principles of the Nervous System	3
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains, and Behavior	3
Biol 3423	Behavioral Genetics Laboratory	3
Biol 347	Darwin and Evolutionary Controversies	3
Biol 3481	Parasitology	3
Biol 349	Microbiology	4
Biol 3491	Microbiology Laboratory	3
Biol 3492	Laboratory Experiments with Eukaryotic Microbes	3
Biol 3493	Bacterial Bioprospecting and Biotechnology	3
Biol 3494	Microbes and the Environment	4

Biol 3501	Evolution	4
Biol 354	Physics of Living Systems	3
Biol 360	Biophysics Laboratory	3
Biol 370	Animal Behavior	3
Biol 381	Introduction to Ecology	3
Biol 4023	How Plants Work: Physiology, Growth, and Metabolism	3
Biol 4030	Biological Clocks	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4071	Developmental Biology	3
Biol 4072	Regenerative and Stem Cell Biology	3
Biol 4181	Population Genetics	3
Biol 4182	Macroevolution	3
Biol 4183	Molecular Evolution	3
Biol 419	Community Ecology	3
Biol 4193	Experimental Ecology Laboratory	4
Biol 4195	Disease Ecology	4
Biol 4220	Practical Bioinformatics	4
Biol 424	Immunology	4
Biol 4242	Virology	3
Biol 4270	Problem Based Learning in Biomedical Sciences	3
Biol 4271	The Science of Cats	3
Biol 4310	Biology of Aging	3
Biol 4342	Research Explorations in Genomics	4
Biol 434W	Research Explorations in Genomics (Writing-Intensive)	4
Biol 4344	Epigenetics	3
Biol 4381	Cell-Based Tissue Engineering and Regenerative Medicine	3
Biol 4492	Infectious Diseases: History, Pathology, and Prevention	3
Biol 451	General Biochemistry	4
Biol 4522	Laboratory in Protein Analysis, Proteomics, and Protein Structure	3
Biol 4523	Molecular Methods in Enzyme Analysis	4
Biol 4525	Structural Bioinformatics of Proteins (Writing Intensive)	4
Biol 4540	Physics of Living Systems	3
Biol 4580	Principles of Human Anatomy and Development	3
Biol 4715	Basic Cancer Biology	3
Biol 4716	Advanced Cancer Biology	3
Biol 472	Behavioral Ecology	4
Biol 4810	General Biochemistry I	3
Biol 4820	General Biochemistry II	3
Biol 4833	Protein Biochemistry	3

## Additional Information

All courses used for the biology minor must be taken for a letter grade. A grade of C- or better must be earned in all of these courses. A student may not receive credit for both Biol 370 and Biol 472 or for both Biol 4342 and Biol 434W.

## Chemistry

For students interested in discovering insights into nature, exploring new ways to meet the needs of our technological society, and learning new methods for creating novel compounds and useful materials, chemistry is an excellent major to pursue.

Chemistry is a multifaceted science that extends into biology, medicine, physics, mathematics, business, and commerce. Studying chemistry provides students with the opportunity to explore the structure and constitution of the microworlds of atoms and molecules, the chemical and physical transformations that occur there, and the principles that govern these changes.

Our program provides a strong foundation in the core areas of chemistry: organic, physical, inorganic, nuclear, and theoretical. Special emphases in the department include such emerging interdisciplinary fields as organometallic, bioorganic, biophysical, macromolecular, polymer, environmental, and materials chemistry. The department has close research ties with the departments of Physics; Earth, Environmental, and Planetary Sciences; Biology; Biomedical Engineering; Energy, Environmental & Chemical Engineering; and Mechanical Engineering & Materials Science. It also works closely with various departments at the Washington University School of Medicine.

Undergraduate majors in chemistry study with renowned scientists who are teacher-scholars dedicated to the students' learning experiences. The department is small and has world-class instruments and facilities, which allow students to receive individualized instruction and to participate in cutting-edge science. Each student works closely with a faculty member to design and carry out an original research project. Students may participate in interdisciplinary research at the School of Medicine or the McKelvey School of Engineering. Research internships at local companies can also be arranged.

A variety of creative and productive careers are available to graduates with a degree in chemistry. Graduates may pursue a career in chemistry or in such related professions as biochemistry, medicine, and chemical engineering. Most students continue on to graduate or medical school, and some students go on to business or law school. Positions in government, industry, and education are also feasible career paths.

## Faculty

### Chair

**Jennifer Heemstra**  
Charles Allen Thomas Professor  
PhD, University of Illinois, Urbana-Champaign

### Director of Graduate Studies

**Timothy Wencewicz**  
Associate Professor  
PhD, University of Notre Dame

### Director of Undergraduate Studies

**Richard Mabbs**  
Associate Professor  
PhD, University of Nottingham (UK)

### Department Faculty

**Thomas Bakupog**  
Lecturer  
PhD, University of Wyoming, Laramie

**Jonathan Barnes**  
Associate Professor  
PhD, Northwestern University

**Cory Berklund**  
Joint Professor of Biomedical Engineering and Chemistry  
PhD, University of Illinois

**Vladimir B. Birman**  
Associate Professor  
PhD, University of Chicago

**John R. Bleeke**  
Professor  
PhD, Cornell University

**William Buhro**  
George E. Pake Professor of Chemistry and Emeritus Department Chair  
PhD, University of California, Los Angeles

**Rong Chen**  
Senior Lecturer  
PhD, University of Southern California

**Maria de la Cruz**  
Senior Lecturer  
PhD, University of Missouri, Saint Louis

**Megan Daschbach**  
Teaching Professor  
PhD, Washington University

**Joseph Fournier**  
Assistant Professor  
PhD, Yale University

**Michael L. Gross**

Professor  
PhD, University of Minnesota

**Richard W. Gross**

Joint Professor of Medicine and Developmental Biology and Chemistry  
PhD, Washington University

**Julie Hamdi**

Senior Lecturer  
PhD, University of California, Los Angeles

**Sophia E. Hayes**

Professor  
PhD, University of California, Santa Barbara

**John Heemstra**

Senior Lecturer  
PhD, University of Illinois, Urbana-Champaign

**J. Dewey Holten**

Professor  
PhD, University of Washington

**Alfred Holtzer**

Professor Emeritus  
PhD, Harvard University

**Alfred Hortmann**

Professor Emeritus  
PhD

**Meredith Jackrel**

Assistant Professor  
PhD, Yale University

**Chenfeng Ke**

Associate Professor  
PhD, Nankai University (China)

**Richard A. Loomis**

Professor  
PhD, University of Pennsylvania

**Ronald Lovett**

Professor Emeritus  
PhD, University of Rochester

**Jia Luo**

Senior Lecturer  
PhD, Washington University

**Bryn Lutes**

Senior Lecturer  
PhD, Washington University

**Kevin D. Moeller**

Professor  
PhD, University of California, Santa Barbara

**Yusuke Okuno**

Assistant Professor  
PhD, University of Wisconsin at Madison

**Gary J. Patti**

Michael and Tana Powell Professor of Chemistry  
PhD, Washington University

**Jay Ponder**

Professor  
PhD, Harvard University

**Kelly Powderly**

Assistant Professor  
PhD, Princeton University

**Courtney Reichardt**

Assistant Professor  
PhD, Stanford University

**Bryce Sadtler**

Associate Professor  
PhD, University of California, Berkeley

**Demetrios Sarantites**

Professor Emeritus  
PhD, Massachusetts Institute of Technology

**Lee G. Sobotka**

Professor  
PhD, University of California, Berkeley

**William Spees**

Lecturer  
PhD, Washington University

**John-Stephen Taylor**

Professor  
PhD, Columbia University

**Robert Wexler**

Assistant Professor  
PhD, University of Pennsylvania

**Mark Wrighton**

Professor and Chancellor Emeritus and James and Mary Wertsch  
Distinguished University Professor  
PhD, California Institute of Technology

## Courses

Visit online course listings to view semester offerings for L07 Chem.

---

### L07 Chem 105 Principles of General Chemistry I

This course traces the development of chemistry from early atomic theory to modern descriptions of structure, bonding, and intermolecular interactions. Over the course of the semester, the students learn how macroscopic observations of stoichiometry, chemical reactions, the properties of elements and compounds, and chemical periodicity developed into the microscopic understanding of molecular structure and bonding. The semester begins with fundamentals related to stoichiometry, chemical reactions, solution chemistry, and gas properties, with an emphasis on quantitative problem solving. The octet rule, Lewis structures, and valence-shell-electron-pair repulsion (VSEPR) theory are then introduced as early efforts to describe the stability and structures of molecules. The localized electron model (LEM) and molecular-orbital theory (MOT) are next described as modern descriptions of chemical bonding. The course concludes with intermolecular forces such as hydrogen bonding and van der Waals interactions. This course will be a serious introductory series that requires and develops algebraic-computation and problem-solving skills. Pre-requisite: One year of high-school chemistry or physics, or by permission of the instructors.

Credit 3 units. A&S IQ: NSM, AN Arch: ETH, S, NSM Art: NSM BU: SCI

---

### L07 Chem 106 Principles of General Chemistry II

This course covers chemical equilibrium, thermodynamics, and kinetics at a fundamental level, with an emphasis on in-class problem solving. Gas-phase reactions, heterogeneous (multi-phase) reactions, acid-base reactions, and solubility equilibria are introduced first. Chemical thermodynamics is then taught in its relation to chemical equilibrium. The course finishes with chemical kinetics and rate laws. The content is similar to that of Chem 112A, but advanced applications are omitted. Prerequisites: Chem 105 or Chem 111A, or by permission of the instructors.

Credit 3 units. A&S IQ: NSM, AN BU: SCI

---

### L07 Chem 111A General Chemistry I

Systematic treatment of fundamental chemical and physical principles and their applications to the properties and transformations of materials, including the concept of energy and its uses, atomic and molecular structure, periodic classification of the elements, chemical bonding, gas laws, and laws of chemical combination. Pre-requisite: AP Chemistry, or two years of high-school chemistry, or one school of high school chemistry and one year of high school physics. Students can also enroll by permission of the instructors.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

### L07 Chem 111P Peer-Led Team-Learning: General Chemistry I

This is an elective one-credit course that can only be taken concurrently with L07 Chem 111A General Chemistry I. The purpose of the course is to encourage students to work in small groups, supervised by a trained peer leader, on problems from the course that are designed to require a collaborative effort and to enhance understanding. PLTL sessions guide students to become conscious of the problem-solving process and to rigorously evaluate and revise those processes in light of the reasonableness of their results rather than an answer key.

Credit 1 unit.

---

### L07 Chem 112A General Chemistry II

An introduction to the principles of chemical equilibrium and chemical change. Topics include chemical equilibria, acid/base chemistry, and other ionic equilibria, electrochemistry, elementary chemical thermodynamics and kinetics. Three lecture hours and a problem-solving subsection. Prerequisite, Chemistry 111A and prior completion (or concurrent registration in) Math 131 (Calculus I) or permission of the instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

### L07 Chem 112P Peer-Led Team Learning: General Chemistry II

This is an elective one-credit course that can only be taken concurrently with Chem 112A General Chemistry II. The purpose of the course is to encourage students to work in small groups, supervised by a trained peer leader, on problems from the course that are designed to require a collaborative effort and to enhance understanding. Peer-led team learning sessions guide students to become conscious of the problem-solving process and to rigorously evaluate and revise that process in light of the reasonableness of their results rather than an answer key.

Credit 1 unit. BU: SCI

---

### L07 Chem 125 Introductory General Chemistry I PB

This course covers the systematic treatment of fundamental chemical principles and their applications. Emphasis is on atomic and molecular theories, laws of chemical combination, periodic classification of the elements, and properties of gases, liquids, solids, and solutions. Prerequisites: Math U20 141 and Math U20 142 or equivalent, one year of high school chemistry, or permission of department. This course is restricted to students admitted to the Post-Baccalaureate Premedical Program or in University College. All other students should enroll in Chem 105 or Chem 111.

Credit 3 units. BU: SCI

---

### L07 Chem 126 Introductory General Chemistry II PB

Continuation of L07-125 General Chemistry I PB. Considers oxidation-reduction, chemical equilibria, electro-chemical cells, and the chemistry of representative elements. Prerequisite: L07-125. Students desiring to satisfy lab science requirements must also enroll in L07-156. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or the School of Continuing & Professional Studies. Others may register with instructor permission, and on a space available basis.

Credit 3 units. BU: SCI

---

### L07 Chem 151 General Chemistry Laboratory I

This course provides an introduction to basic laboratory techniques, the experimental method, and the presentation of scientific data, as well as direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in the Chem 105/111A lecture course.

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 152 General Chemistry Laboratory II

Continuation of Chem 151. Topics and experiments complement material covered in Chem 106/112A lecture course.

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 155 General Chemistry Laboratory I PB

This course provides an introduction to basic laboratory techniques and the experimental method as well as direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in Chem 125. Prerequisite: Concurrent enrollment in Chem 125 or permission of instructor. The first two lab lectures will be longer than the regular lectures, but without lab session. The lab sessions will convene for the first time beginning with the third class meeting. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or in the School of Continuing & Professional Studies. All other students should enroll in Chem 151.

Credit 2 units. Arch: NSM Art: NSM

---

**L07 Chem 156 General Chemistry Laboratory II PB**

Continuation of L07-155 Chem Lab I PB. Topics and experiments complement the material covered in the L07-126 lecture course. Students attend a three-hour laboratory session and a one-hour laboratory lecture. Prerequisite: concurrent enrollment in L07-126, or permission of the instructor. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or the School of Continuing & Professional Studies. Others may register with instructor permission, and on a space available basis. Credit 2 units.

---

**L07 Chem 181 First-Year Opportunity: Why is Chemistry Called "the Central Science"?**

In this course, we seek to answer that question by showing how chemistry is a thread that runs through many disciplines, including biology, physics, astronomy, geology, medicine and environmental science. We will learn about the many types of chemistry-oriented research that are conducted at WashU, along with presentations by several chemists who have gone on to use their chemistry degree in industry or in other adjacent fields. This is a terrific way to gain exposure about how to prepare your own academic pathway through many diverse fields, through using chemistry as a platform. In this first year opportunity seminar style course, we rely on active dialogue in the classroom, through questions and discussion. You can expect to learn about science communication tools and gain some practice with translating difficult science concepts to a broader audience. This will include short written assignments, but also can include graphical depictions of information and data (tools that may be understood well for science outreach or for professional uses of social media.)

Credit 1 unit. A&S: FYO A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 182 Chemistry for Concerned Citizens: Topics in Energy, the Environment, and More**

This course is designed to provide an overview of chemistry as it relates to problems in environmental science, energy, and related topics. It is constructed such that all students, irrespective of their major area of study, can learn about chemistry in these contexts. The course is intended to be highly interdisciplinary; therefore, it will cover subjects including chemistry, physics, engineering, geology, biology, environmental policy, and others.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

---

**L07 Chem 183 First-Year Opportunity: Chemistry and Energy**

This seminar is intended for first-year undergraduates to learn about the role that chemistry can play in addressing one of the greatest challenges we face: climate change. Chemistry has played a vital role in providing the energy needs of society, and advances in chemistry can help to develop abundant and economically viable energy technologies that do not have adverse consequences on the environment. Chemistry has long been central to the use of fossil fuel, and there remain opportunities to improve the efficiency of fossil energy resources, thereby contributing to lower carbon dioxide emission per unit of energy generated. Chemistry is critical to the development of renewable energy resources, especially solar energy for the generation of electricity and fuels. Material covered will include the challenges associated with meeting the world's increasing energy needs while reducing the emission of carbon dioxide. This class will cover the role of chemistry in energy technologies, including the storage of energy.

Credit 1 unit. A&S: FYO

---

**L07 Chem 225 Introduction to Medicinal Chemistry PB**

This is an introductory course covering the basic concepts of drug structure, interactions and metabolism relevant to medicinal chemistry. The course will provide an understanding of the structure and physicochemical properties of drugs and their targets and how these determine the drug's mechanism of action and the body's response. In addition, basic concepts of drug design and development will be covered. Prerequisites: A background in general chemistry is required. Knowledge of organic or biochemistry is not required. Organic and biochemistry concepts needed for an understanding of the material will be taught as part of the course. Priority given to students enrolled in the Post-Baccalaureate Premedical program or in the School of Continuing & Professional Studies.

Credit 3 units. BU: SCI

---

**L07 Chem 261 Organic Chemistry I with Lab**

This is the first part of a two-semester survey of organic chemistry. The course will include an introduction to organic structures, reactions, and reaction mechanisms. The laboratory will meet on alternate weeks and include an introduction to laboratory methods in organic chemistry, including separation and methods of purification of organic compounds. Prerequisites: Chem 106 or Chem 112 and Chem 152.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L07 Chem 262 Organic Chemistry II with Lab**

A course covering certain areas of organic chemistry in more detail than the prerequisite course, with special emphasis on the mechanisms and the synthetic applications of organic reactions and on the organic chemistry of biological compounds. The laboratory will meet eight times and include organic synthesis and spectroscopic techniques. Required course for chemistry majors. Prerequisite, Chem 261.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 265 Organic Chemistry I With Lab PB**

This is the first part of a two-semester survey of organic chemistry. The course will include an introduction to organic structures, reactions, and reaction mechanisms. The laboratory portion of the course will have eight experiments and include an introduction to laboratory methods in organic chemistry, including separation and methods of purification of organic compounds. Prerequisites: Chem 126 and Chem 156. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or in University College. All other students should enroll in Chem 261.

Credit 4 units. Arch: NSM Art: NSM BU: SCI

---

**L07 Chem 2651 Organic Chemistry I PB (Lecture Only)**

This is the lecture-only version of the first part of a two-semester survey of organic chemistry. The course will include an introduction to organic structures, reactions, and reaction mechanisms. Prerequisites: Chem 126 and Chem 156. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or in University College.

Credit 3 units. Arch: NSM Art: NSM BU: SCI

---

**L07 Chem 266 Organic Chemistry II w/ Lab PB**

A course covering certain areas of organic chemistry in more detail than the prerequisite course, with special emphasis on the mechanisms and synthetic applications of organic reactions and on the organic chemistry of biological compounds. The laboratory meets eight times and includes organic synthesis and spectroscopic techniques. Prerequisite: Chem 265. This course is restricted to students admitted to the Post-Baccalaureate Premedical Program or in University College. All other students should enroll in Chem 262.

Credit 4 units. BU: SCI

---

**L07 Chem 2661 Organic Chemistry II PB (Lecture Only)**

This course is the lecture-only version of Chem 266, covering certain areas of organic chemistry in more detail than the prerequisite course, with special emphasis on the mechanisms and synthetic applications of organic reactions and on the organic chemistry of biological compounds. Prerequisites: Chem 265 or Chem 2651. This course is restricted to students admitted to the Post-Baccalaureate Premedical Program or in University College.

Credit 3 units. BU: SCI

---

**L07 Chem 290 First-Year and Sophomore Research**

This course presents an introduction to research for first- and second-year students. Students are mentored by a faculty advisor. Prerequisite: Permission of the sponsor and the Department of Chemistry. Credit/no credit only.

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 358 Advanced Organic Laboratory**

Initially, problem solving in organic chemistry is emphasized through an introduction to the methods of qualitative organic analysis, including the use of chromatographic and spectroscopic techniques. Each student then selects an independent synthetic project to perform. Prerequisite, Chem 262. Six laboratory hours per week. Lectures held three hours a week for the first half of the semester.

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

---

**L07 Chem 400 Physical Science in 12 Problems**

Exercises related to general chemistry, classical mechanics, quantum mechanics, statistical mechanics, thermodynamics, and kinetics, will be solved with numerical software. Each exercise will be accompanied by a lecture, a software template solving a problem and presenting a related take-home problem. The software will allow us to focus on, and treat in a transparent fashion, physical problems without the unwieldy idealizations and contrivances found in textbooks. Prerequisites: Chem 106/112A and/or Physics 192/194, and prior or concurrent enrollment in either Chem 401 or Phys 217. The lectures will be in-person however a complete set of taped lectures will also be available. A remote help session will be scheduled at a mutually agreed to time. There are no quizzes, exams or a final.

Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 401 Physical Chemistry I**

Introduction to quantum chemistry with applications to electronic structure and elementary spectroscopy. Prerequisites: Chem 106/112A and Math 233; prior completion of Physics 191 and 192 is strongly encouraged (but concurrent enrollment in Physics I will be accepted); or permission of instructor. Required course for all Chemistry majors.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L07 Chem 402 Physical Chemistry II**

This course presents an introduction to chemical thermodynamics, statistical mechanics, and transport phenomena, and it is a required course for all Chemistry majors. Prerequisites: Chem 401, and Math 233; or permission of instructor. Prior completion of Physics 192/194 is strongly encouraged, but prior completion of Physics 191/193 and concurrent enrollment in Physics 192/194 will be accepted.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L07 Chem 403 Chemical Kinetics**

This lecture course will provide an introduction to the kinetics of chemical reactions for graduate and upper-level undergraduate science and engineering students. Bulk and molecular-level considerations will be discussed and provide a foundation for the understanding of chemical reaction mechanisms and the techniques used for their

study. Students will gain an understanding of the importance and significance of the rate laws of reactions and in particular the reaction rate constant. Details of how the environment in which reactions occur (i.e., gas phase, solution phase, and surface reactions) and molecular structure are reflected in the rate constant will be discussed. Examples such as catalytic loss cycles in the atmosphere, enzyme catalysis, combustion systems, chain reactions, and explosions are presented in detail to illustrate how the fundamental principles of chemical kinetics can be applied to predict reaction rates, chemical reactivity, and the outcomes of particular processes. Prerequisites: Chem 106/112A and/or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

**L07 Chem 4050 Computational Problem Solving in the Chemical Sciences**

Have you ever wondered how molecular interactions shape the world around us? Why do certain materials exhibit unique properties? How can we predict and manipulate chemical reactions at the atomic level? These are the mysteries at the heart of chemistry, where understanding the unseen world of atoms and molecules can unlock groundbreaking advances in science and technology. However, one needs specialized numerical methods and computational chemistry skills to explore these questions. This course is designed to bridge this gap. It provides a comprehensive introduction to the mathematical and computational skills necessary to model chemical phenomena at the atomic level. We start by building a strong foundation in mathematical representations of chemical problems, utilizing open-source software tools for problem-solving, data interpretation, and visualization of materials and molecular structures. In the second part of the course, we delve into the fascinating world of atomic-level computer modeling. You'll learn various methodologies, such as Monte Carlo and molecular dynamics. We'll analyze static (thermodynamic and structural) and dynamic properties and their statistical errors. Don't worry if you're new to coding - we'll cover the basics of Python programming in the first few lectures, setting you up for success. By the end of this course, you will be proficient in using computational tools, understanding atomic interactions, and approaching chemical problems with a structured and strategic thought process. Join us to unlock the secrets of the molecular world and transform the way you see chemistry! Prerequisites: Chem 106/112A, Math 132, Physics 191, Chem 261.

Credit 3 units. A&S IQ: NSM

---

**L07 Chem 410 Special Topics in Physical Chemistry**

This course is an overview of instrumentation and techniques that are found in modern chemistry laboratories. We shall cover the design of experiments, including basic electronics, signal-to-noise considerations and signal handling. We shall also discuss the applications of a wide variety of spectroscopies, imaging techniques, surface analytical techniques, mass spectrometry and NMR. This course will be of interest to students who expect to pursue chemical research involving modern photosec measurements and who wish to understand the fundamental principles behind complex analytical instrumentation. Prerequisite: Chem 401, 402, or permission of the instructor. In detail, topics covered will be: 1. Physical Chemistry of Spectroscopy: Electromagnetic Spectrum; Molecular Energy Levels. 2. Signal-to-Noise: Different sources e.g. Shotky, Flicker, Johnson, interference, background radiation. 3. Basic Electronics: Kirchoff's Laws, impedance, capacitance, diodes, op-amps, filters, oscilloscopes. 4. Experimental Considerations: Light sources, magnetic fields, detectors, signal handling, vacuums. 5. CW Spectroscopies: IR, Raman, Rayleigh Scattering, fluorescence, UV-Vis. 6. Lasers: types, Q-switching, laser spectroscopies. 7. Imaging: SEM, TEM, NSOM. 8. Surface techniques: AES, WPS, RAIRS, HREELS, STM, AFM. 9. Mass Spectrometry. 10. NMR.

Credit 3 units. Arch: NSM Art: NSM

---

**L07 Chem 426 Inorganic Electrochemistry and Photochemistry**

An understanding of electrochemical processes is critical in describing the behavior of batteries, fuel cells, and other important devices used in energy conversion and environmental remediation. This course will cover modern inorganic electrochemistry, photochemistry, and photoelectrochemistry from a microscopic perspective of solid-electrolyte interfaces. The course material will start with the thermodynamics of solid-electrolyte interfaces and the kinetics of electron transfer across these interfaces. Electroanalytical techniques, including cyclic voltammetry and potential-step experiments, will be described to understand the mechanism of electrochemical and photochemical reactions. Lectures will include applications of electrochemical cells in catalysis, materials synthesis, and solar-fuel generation. Prerequisites: Chem 461, or Chem 465, or consent of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 435 Nuclear and Radiochemistry Lab**

Application of radiochemistry to problems in chemistry, physics, and nuclear medicine, with emphasis on particle detectors and experimental techniques. Prerequisites: 3 units of physical chemistry or quantum mechanics, or permission of instructor. Five hours of laboratory a week.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 436 Introduction to the Atomic Nucleus**

Introduction to the interaction of radiation with matter, the production and decay of radioactive nuclides, the structure and properties of nuclei, and various applications of nuclear science (including nuclear power) are all presented. Prerequisites: General Chemistry and/or Physics, and prior or concurrent enrollment in either Chemistry 401 or Physics 217. Lectures will be in-person but a complete set of taped lectures will also be available. A weekly, in-person or remote, help session will be scheduled at a mutually agreed to time. There will be about 6 timed quizzes, one midterm and one final, all of which must be taken in-person on mutually agreed dates.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 445 Instrumental Methods: Physical Chemistry**

A course providing direct hands-on experience with the principles of physical chemistry (thermodynamics, quantum, kinetics) and associated experimental methods and instrumentation, including optical, infrared, and nuclear and electron spin resonance, electrochemistry, calorimetry, laser kinetics, and basic electronics. Prerequisite: Chem 401 or concurrent enrollment in Chem 402.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

---

**L07 Chem 450 Physical Organic Chemistry**

The goal of physical organic chemistry (formerly called mechanistic organic chemistry) is to understand the details of reaction mechanisms, and gain insight into structures and reactivity common to organic chemicals and of high-energy chemical intermediates. This course focuses on the structure of any intermediates, the extent of a reaction from the perspective of the transition state, and identifying the relative energies of reactants, products, intermediates, and transition states. Students will learn concepts needed to solve mechanistic organic problems encountered in research, covering common organic reaction mechanisms, experimental techniques, and theoretical approaches. After the course, students will be able to design experiments to probe mechanistic questions and propose reasonable mechanisms and intermediates to explain experimental observations. Prerequisite: CHEM 262 or permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L07 Chem 451 Organic Chemistry III**

A lecture course that builds on the material in Chem 261/262, covering in more detail certain topics in those courses while also introducing new topics. A transition to graduate-level study in organic chemistry; recommended for chemistry, biochemistry, and biology majors.

Prerequisite: Chem 262.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 452 Synthetic Polymer Chemistry**

This course that describes various methods for the synthesis and characterization of polymers. Copolymers, control of architecture, polymer reactivity, polymer properties, structure/property relationships, and applications of polymers will be discussed. Current topics of interest from the recent literature will also be covered.

Prerequisite: Chem 262 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 453 Bioorganic Chemistry**

This course presents a molecule-centered perspective on the current state of the art in antibiotic drug discovery and natural products chemistry. The molecular mechanisms of antibiotic drug action and pathogen resistance will be covered along with the biosynthetic origins of antibiotics from plants and microbes. The course is taught from the perspective of understanding how organic chemistry plays out in biological systems, with an emphasis on small organic molecules and enzymes. Curved arrow mechanisms will be used frequently in learning activities and assignments. Thus, Chem 262 (Organic Chemistry 2) is a mandatory prerequisite for this course. A working knowledge of protein structure and function is helpful. Students are encouraged (but not required) to take Chem 481 (General Biochemistry 1) and/or Chem 482 (General Biochemistry 2) in preparation for this course. Students will be responsible for writing a review article on an assigned antibiotic molecule and presenting their paper to the class.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 453W Bioorganic Chemistry -- Writing intensive**

A molecule-centered perspective is presented on the current state of the art in antibiotic drug discovery and natural products chemistry. The molecular mechanisms of antibiotic drug action and pathogen resistance will be covered along with the biosynthetic origins of antibiotics from plants and microbes. The course is taught from a perspective of understanding how organic chemistry plays out in biological systems, with an emphasis on small organic molecules and enzymes. Curved arrow mechanisms will be used frequently in learning activities and assignments. Thus, Chem 262 (Organic Chemistry 2) is a mandatory prerequisite for this course. A working knowledge of protein structure and function is helpful. Students are encouraged but not required to take Chem 481 (General Biochemistry 1) and/or Chem 482 (General Biochemistry 2) in preparation for this course. Students will be responsible for writing a review article on an assigned antibiotic molecule and presenting their paper to the class. This course satisfies the Writing Intensive requirement.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

---

**L07 Chem 458 Chemical Reaction Mechanism Journal Club**

This seminar meets for one hour each week. During the meetings, student participants are responsible for presenting topics from the current literature. The format of the presentation varies from informal talks to student-authored problem sets. Attendance at meetings is strongly recommended for all students who are currently taking the organic cumulative examinations. Prerequisite: Chem 262.

Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

---

---

**L07 Chem 459 Organometallic Chemistry**

Survey of organometallic compounds with discussion of their synthesis, structure, spectroscopy, and reactivity. Prerequisite: Chem 262.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 460 Organic & Inorganic Reaction Mechanisms**

This course covers the fundamentals of the study of the mechanisms of reactions of organic, organometallic, and inorganic molecular compounds, primarily in the solution phase, and it surveys examples through case studies. A basic knowledge of organic chemistry is assumed. Prerequisites: Grade of B- or better Chem 261 and Chem 262 or the equivalent.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L07 Chem 461 Inorganic Chemistry**

Inorganic chemistry encompasses the structure, properties, and reactivity of inorganic molecules and solids and it is a required course for all Chemistry majors. This course will focus on the symmetry, bonding, electronic structure, spectroscopy, and reactivity of inorganic coordination complexes in which ligands are bound to one or more metal centers. The course will start with using group theory to classify molecules based on the symmetry elements they possess. A series of different bonding models including VSEPR, valence bond theory, molecular orbital theory, crystal field theory, and ligand field theory will be used to describe the structure and bonding of inorganic molecules, coordination complexes, and organometallic compounds. These models will serve as a basis for interpreting and predicting the electronic and vibrational spectra of inorganic compounds. Prerequisites: Chem 106 or 112, and Chem 152.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 462 Synthetic Polymer Chemistry Laboratory**

Chem 462 is an upper-level undergraduate laboratory course that complements Chem 452 Synthetic Polymer Chemistry. This twice-a-week lab provides hands-on training in the design, synthesis, and characterization of polymers and polymeric materials through four standard experiments (each one week) and one independent project (over five to six weeks). The independent project involves using an article from the literature as the basis for developing a short proposal. At the end of the course, students give oral presentations of their proposals, which are reviewed by their classmates. Prerequisite or Concurrent: Chem 452 or permission from instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L07 Chem 462W Synthetic Polymer Chemistry Laboratory -- Writing Intensive**

Chem 462W is an upper-level undergraduate and graduate level laboratory course that complements Chem 452, Synthetic Polymer Chemistry. This twice-a-week lab provides hands-on training in the design, synthesis, and characterization of polymers and polymeric materials through four standard experiments (each one week) and one independent project (over five to six weeks). The independent project involves using an article from the literature as the basis for developing a short proposal. At the end of the course, students give oral presentations of their proposals, which are reviewed by their classmates. Prerequisite or Corequisite: Chem 452 or permission of instructor. This course satisfies the writing-intensive requirement.

Credit 3 units. A&S IQ: NSM, WI BU: SCI

---

**L07 Chem 464 Inorganic Biochemistry**

A class in biological chemistry that emphasizes the role of metals in electron transfer and enzymatic catalysis. After a brief survey of essential concepts from biology, coordination chemistry, and spectroscopy, topics will include: electron transfer systems; oxygen

transport and activation; metal ion acquisition, transport, and homeostasis; enzymes catalyzing atom transfer reactions and radical-mediated processes. Prerequisite: Chem 262; Chem 461 recommended but not required.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 465 Solid-State and Materials Chemistry**

A description of how the structures of crystalline solids at different length scales control their chemical and physical properties is critical for understanding how these materials are applied in a variety of technologies ranging from solar cells to lithium batteries. This course begins with basic crystallography and introduces common inorganic structure types as well as common defects in crystalline solids. With the aid of computer models, students will learn to analyze and index x-ray powder-diffraction patterns that provide a fingerprint to identify a crystal. The relation between the crystal structure of a solid and its resulting electronic structure, chemical reactivity, and physical properties (e.g., optical, electrical, and mechanical) will be discussed throughout the semester with an emphasis on how crystal defects alter these properties. The course will conclude with the use of phase diagrams to assess the composition and microstructure of metals and ceramics. Prerequisite: Chem 105/111A or permission of instructor

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 470 Inorganic Chemistry Laboratory**

A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises will introduce novel synthetic techniques including high-temperature synthesis and vacuum-line manipulations. Compounds will be spectroscopically characterized by UV-visible absorption, gas-phase infrared, and multinuclear and dynamic NMR spectroscopies. Measurements of electrochemical behavior, magnetic susceptibility, and electrical conductivity will be performed. Prereq: Chem 461 or consent of the instructor. A Writing Intensive option is available with the permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 470W Inorganic Chemistry Laboratory -- Writing Intensive**

A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises will introduce novel synthetic techniques including high-temperature synthesis and vacuum-line manipulations. Compounds will be spectroscopically characterized by UV-visible absorption, gas-phase infrared, and multinuclear and dynamic NMR spectroscopies. Measurements of electrochemical behavior, magnetic susceptibility, and electrical conductivity will be performed. Prereq: Chem 461 or consent of the instructor. This course satisfies the Writing Intensive requirement.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

---

**L07 Chem 475 Chemical Biology**

This course is a survey of modern chemical biology focusing on the application of a broad array of chemical tools to biological problems. The course is roughly divided into four sections; biopolymers, computational methods and bioinformatics, tools for chemical biology, and applications of chemical biology. A mandatory discussion section accompanies the course and is used to review current and classical literature in the field. Prereqs: Chem 262 and Biol 2970, or permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

---

### L07 Chem 481 General Biochemistry I

Topics include the properties and structures of biomolecules, including amino acids, nucleotides, lipids, carbohydrates, proteins and nucleic acids. Additional topics include enzyme kinetics and mechanisms, membrane structure and properties, protein folding, an introduction to metabolism, oxidative phosphorylation and photosynthesis. This course is the first semester of an integrated two-semester sequence. The second course is Chem 482. Prerequisites: Biol 2970, Chem 262. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 482 General Biochemistry II

Biochemistry explores the chemistry of life processes at the molecular level. This course is the second semester of a two-semester General Biochemistry sequence (Chem481/482 or Bio4810/4820). Prerequisites include Chem481/Bio4810 and Chem262 or instructor permission. The first semester of the Biochemistry sequence covered the basics of the topic with an emphasis on the structures, functions, and interactions of biomolecules including proteins, nucleic acids, carbohydrates, and lipids. This second semester course will emphasize metabolism, the biosynthetic (anabolism) and degradation (catabolism) pathways that provide the energy of life and define the molecules associated with healthy and disease states.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 483 Protein Biochemistry

The focus of this course is protein biochemistry, and is intended to build upon General Biochemistry (Chem 481). In this course we will focus on protein structure, folding, and techniques to purify and characterize protein activity. We will progress from initial studies to first understand protein fold and function to current efforts to better characterize protein structure-function relationships. We will also highlight human diseases that are underpinned by protein misfolding. This course will focus on reading and understanding primary literature, including landmark papers along with more recent work. During the second half of the semester, each student will select a paper and prepare a written analysis of that paper. The student will then present the paper and lead a journal club style discussion of the paper. Prerequisites: Chem 481 or instructor's permission

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L07 Chem 485 Nucleic Acids

This course presents the structure, synthesis, properties, and interactions of nucleic acids and the design and synthesis of nucleic acid-based and/or targeted drugs, probes, and tools. Topics include primary, secondary, and tertiary structure; topological and thermodynamic properties; biological and chemical synthesis; DNA chips; PCR; site-directed natural and unnatural mutagenesis; chemical evolution (SELEX); ribozymes; phage display; carcinogen, drug, and protein interactions; affinity cleaving; ultraviolet light and ionizing radiation damage; DNA repair of mutagenesis; and the design and synthesis of anti-sense and anti-gene probes and drugs. Extensive use is also made of molecular modeling and the protein databank of nucleic acid structures. Prerequisites: Chem 261 and Chem 262 or equivalents.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 488 Modern Spectroscopy

This course will focus on the fundamental principles and methodologies associated with numerous optical spectroscopy techniques that are commonly utilized in physical and life sciences research laboratories. In order to develop a solid understanding of the material as well as best practices, and the strengths and limitations of the techniques, this course will combine lectures with laboratory experiments. Students will also learn how to analyze and interpret data and succinctly describe their results. During one lecture each week the underlying principles of a specific type of spectroscopy will be presented. The second lecture each week will be spent covering

the general details of the instrumentation and methods for acquiring spectra on different types of samples. The students will then acquire spectra using the spectroscopic methods presented during the laboratory session. The students will independently analyze the data, and write brief reports of their findings. During the last two weeks of class, pairs of students will be given an unknown, and they will need to identify and characterize the sample. Students will then write and submit a final report describing this independent research and their findings.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 490 Introduction to Research

Third- and fourth-year students register for this course to perform research on a selected topic in chemistry. A student planning to register for Chem 490 with a Department of Chemistry research mentor MUST obtain approval from that faculty member before registering, but a formal proposal is not required. For research experiences with mentors outside of the chemistry department, the student must submit the Chem 490 Project Proposal Form, which identifies the faculty mentor and includes a short description of the proposed chemical research. The Chem 490 Project Proposal Form, which is available on the chemistry department website, should be submitted to the director of undergraduate studies in the chemistry department for approval.

Credit/no credit only.

Credit variable, maximum 6 units. A&S IQ: NSM

---

### L07 Chem 495 Advanced Undergraduate Research in Chemistry

Registration for this course allows for advanced research mentored by a Department of Chemistry faculty member. Chemical research with a faculty member outside of the chemistry department may be allowed with prior approval. At the end of the semester, the mentor will chair a faculty committee to evaluate an oral presentation by the student, and a letter grade will be assigned. A concise written report may also be requested by the mentor or committee in addition to the oral examination. Before registration can be allowed, the student must fill out the Chem 495 Application Form, available on the chemistry department website, and submit it to the director of undergraduate studies. This form, which is required for all Chem 495 registrants, includes a short description of the proposed research and a list of the committee members. This course may provide a Capstone Experience, but it does not fulfill the Writing Intensive requirement. The units earned may be applied as elective advanced credits toward a chemistry major with Latin honors eligibility. The course may be taken only once for credit. Prerequisite: Chem 490 and/or other advanced electives or research experience as specified by the mentor.

Credit 3 units. A&S IQ: NSM

---

### L07 Chem 500 Independent Work

Independent mentored work in Chemistry, such as (but not limited to) a detailed literature search and report on a topic of current interest. Prerequisite: Permission of the faculty mentor.

Credit variable, maximum 6 units.

---

### L07 Chem 5001 Physical Science in 12 Problems

Exercises related to general chemistry, classical mechanics, quantum mechanics, statistical mechanics, thermodynamics, and kinetics, will be solved with numerical software. Each exercise will be accompanied by a lecture, a software template solving a problem and presenting a related take-home problem. The software will allow us to focus on, and treat in a transparent fashion, physical problems without the unwieldy idealizations and contrivances found in textbooks. Prerequisites: Chem 106/112A and/or Physics 192/194, and prior or concurrent enrollment in either Chem 401 or Phys 217. The lectures will be in-person however a complete set of taped lectures will also be available. A remote help session will be scheduled at a mutually agreed to time. There are no quizzes, exams or a final.

Same as L07 Chem 400  
Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 5010 Physical Chemistry I

Introduction to quantum chemistry with applications to electronic structure and elementary spectroscopy. Prerequisites: Chem 106/112A and Math 233; prior completion of Physics 191 and 192 is strongly encouraged (but concurrent enrollment in Physics I will be accepted); or permission of instructor. Required course for all Chemistry majors. Same as L07 Chem 401  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L07 Chem 5020 Physical Chemistry II

This course presents an introduction to chemical thermodynamics, statistical mechanics, and transport phenomena, and it is a required course for all Chemistry majors. Prerequisites: Chem 401, and Math 233; or permission of instructor. Prior completion of Physics 192/194 is strongly encouraged, but prior completion of Physics 191/193 and concurrent enrollment in Physics 192/194 will be accepted. Same as L07 Chem 402  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L07 Chem 5030 Chemical Kinetics

This lecture course will provide an introduction to the kinetics of chemical reactions for graduate and upper-level undergraduate science and engineering students. Bulk and molecular-level considerations will be discussed and provide a foundation for the understanding of chemical reaction mechanisms and the techniques used for their study. Students will gain an understanding of the importance and significance of the rate laws of reactions and in particular the reaction rate constant. Details of how the environment in which reactions occur (i.e., gas phase, solution phase, and surface reactions) and molecular structure are reflected in the rate constant will be discussed. Examples such as catalytic loss cycles in the atmosphere, enzyme catalysis, combustion systems, chain reactions, and explosions are presented in detail to illustrate how the fundamental principles of chemical kinetics can be applied to predict reaction rates, chemical reactivity, and the outcomes of particular processes. Prerequisites: Chem 106/112A and/or permission of instructor.  
Same as L07 Chem 403  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 5035 Nuclear and Radiochemistry Lab

Application of radiochemistry to problems in chemistry, physics, and nuclear medicine, with emphasis on particle detectors and experimental techniques. Prerequisites: 3 units of physical chemistry or quantum mechanics, or permission of instructor. Five hours of laboratory a week.  
Same as L07 Chem 435  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 5036 Introduction to the Atomic Nucleus

Introduction to the interaction of radiation with matter, the production and decay of radioactive nuclides, the structure and properties of nuclei, and various applications of nuclear science (including nuclear power) are all presented. Prerequisites: General Chemistry and/or Physics, and prior or concurrent enrollment in either Chemistry 401 or Physics 217. Lectures will be in-person but a complete set of taped lectures will also be available. A weekly, in-person or remote, help session will be scheduled at a mutually agreed to time. There will be about 6 timed quizzes, one midterm and one final, all of which must be taken in-person on mutually agreed dates.  
Same as L07 Chem 436

### L07 Chem 5050 Computational Problem Solving in the Chemical Sciences

Have you ever wondered how molecular interactions shape the world around us? Why do certain materials exhibit unique properties? How can we predict and manipulate chemical reactions at the atomic level? These are the mysteries at the heart of chemistry, where understanding the unseen world of atoms and molecules can unlock groundbreaking advances in science and technology. However, one needs specialized numerical methods and computational chemistry skills to explore these questions. This course is designed to bridge this gap. It provides a comprehensive introduction to the mathematical and computational skills necessary to model chemical phenomena at the atomic level. We start by building a strong foundation in mathematical representations of chemical problems, utilizing open-source software tools for problem-solving, data interpretation, and visualization of materials and molecular structures. In the second part of the course, we delve into the fascinating world of atomic-level computer modeling. You'll learn various methodologies, such as Monte Carlo and molecular dynamics. We'll analyze static (thermodynamic and structural) and dynamic properties and their statistical errors. Don't worry if you're new to coding - we'll cover the basics of Python programming in the first few lectures, setting you up for success. By the end of this course, you will be proficient in using computational tools, understanding atomic interactions, and approaching chemical problems with a structured and strategic thought process. Join us to unlock the secrets of the molecular world and transform the way you see chemistry! Prerequisites: Chem 106/112A, Math 132, Physics 191, Chem 261. Same as L07 Chem 4050  
Credit 3 units. A&S IQ: NSM

---

### L07 Chem 5051 Methods of Biophysical Chemistry

The course provides an overview of key methodologies of contemporary biophysics and biophysical chemistry, covering: 1) Spectroscopic methods routinely used in biochemistry, including absorption, fluorescence, and circular dichroism; 2) Biophysical methods to study intra- and intermolecular protein interactions including solution-state NMR, FCS, and FRET; 3) Cutting-edge biophysical techniques to study transient protein-protein/protein-nucleic acids interactions. A significant emphasis is placed on the principles of quantum mechanics, which underpin all the techniques discussed. The course begins with an introduction to the basics of quantum mechanics, laying a foundation for understanding the core physical principles that govern each method. Throughout the course, we will derive and analyze key formulae essential for comprehending and applying these advanced biophysical techniques effectively.  
Credit 3 units.

---

### L07 Chem 5064 NMR for Biological Solids

The course will cover theoretical and practical aspects of nuclear magnetic resonance (NMR) spectroscopy. Specific focus will be given to solid-state NMR and its application for studying amorphous biological solids. Prerequisites: undergraduate-level course in quantum mechanics.  
Credit 3 units.

---

### L07 Chem 5070 Instrumental Methods: Physical Chemistry

A course providing direct hands-on experience with the principles of physical chemistry (thermodynamics, quantum, kinetics) and associated experimental methods and instrumentation, including optical, infrared, and nuclear and electron spin resonance, electrochemistry, calorimetry, laser kinetics, and basic electronics. Prerequisite: Chem 401 or concurrent enrollment in Chem 402. Same as L07 Chem 445  
Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

---

**L07 Chem 510 Chemical Dynamics of Biological Pathways**

This course will provide a highly advanced evaluation of cellular metabolism. The course will interrogate metabolic pathways and associated enzymatic mechanisms by tracking stable isotope labeling patterns as measured by liquid chromatography/mass spectrometry. The course will not contain any background treatment of mass spectrometry or basic metabolism. To be enrolled, students must already have an in-depth understanding of these topics. Major objectives of the course are: (1) to learn how to use labeling patterns qualitatively to understand chemical mechanisms at the arrow-pushing level as well as metabolic regulation, (2) to learn metabolic flux analysis, (3) to understand the complex metabolic interactions between cells and organs, and (4) to understand how metabolic reprogramming of specific cell types supports physiologic coordination at the organismal level. Pre-reqs: Chem 482/Chem 5820/Biol 4820 AND permission of instructor.

Credit 3 units.

---

**L07 Chem 5147 Contrast Agents for Biological Imaging**

Contrast Agents in Biological Imaging will build the chemistry foundations for the design and use of contrast agents in imaging applications such as nuclear medicine, magnetic resonance imaging (MRI) and optical imaging. The course will include lectures on the design of radiopharmaceuticals for gamma scintigraphy and positron emission tomography, MRI contrast agents and agents for optical imaging, including bioluminescence and fluorescence microscopy. Prereqs: one year of general chemistry, one semester of organic chemistry.

Same as L41 Biol 5147

Credit 3 units.

---

**L07 Chem 515 Biological Chemistry Seminar**

This course is required for all graduate students following the biological chemistry track. The course will consist of tutorials for first year graduate students and research presentations by second year students. Prerequisites: enrollment in the biological chemistry track or permission of the instructor.

Credit 1 unit.

---

**L07 Chem 533 Time-Dependent Quantum Mechanics & Spectroscopy**

This graduate-level course lays the foundations of time-dependent quantum mechanics and applications to contemporary optical spectroscopies, particularly ultrafast techniques. Formal theoretical descriptions for nonlinear spectroscopic techniques including transient absorption, photon echo, and two-dimensional spectroscopies will be developed. Practical aspects of these experiments including modern laser systems, instrument design, data collection, data processing, and data analysis will also be discussed. Discussion of current literature in the field will be an important component of the course. Prerequisite courses: Chem 401 or permission from the instructor.

Credit 3 units.

---

**L07 Chem 536 Radiochemistry for the Life Sciences**

This course will provide an introduction to nuclear science (e.g. radioactive decay, nuclear stability, interactions of radiation with matter) and followed by an overview of how radiochemistry is used in the life sciences. Lectures on radiolabeling chemistry with radionuclides used in medical imaging (single photon emission computed tomography (SPECT) and positron emission tomography (PET) and their applications will be presented. In addition, lectures on radiochemistry with tritium (H-3) and C-14 will also be included. Additional applications include environmental radiochemistry as applied to nuclear waste disposal and biofuels.

Credit 2 units.

---

**L07 Chem 540 Inorganic/Organometallic Chemistry Seminar**

Students present informal seminars on topics of current interest from the chemical literature or from their own dissertation research.

Credit 1 unit.

---

**L07 Chem 541 Advanced Inorganic Chemistry**

Study of physical inorganic concepts with an emphasis on modern experimental methods applied to inorganic and bioinorganic systems. The spectral and magnetic properties of inorganic and bioinorganic compounds will be discussed. Topics in group theory will be covered, including symmetry of molecules and ions, the application of group theory in molecular structure determination, chemical bond theory and spectroscopy for inorganic materials as molecular species and in crystal lattices. Prerequisite: Chem 461, or consent of instructor.

Credit 3 units.

---

**L07 Chem 542 Special Topics in Inorganic Chemistry**

This course focuses on an important current topic in inorganic chemistry. Open to undergraduates with permission of the instructor. Chemistry 461 recommended.

Credit 3 units.

---

**L07 Chem 543 Physical Properties of Quantum Nanostructures**

This course will explore the physical properties of semiconductor nanomaterials with dimensions that are small enough to give rise to quantum-confinement effects. These effects strongly influence the electronic structures, absorption/emission behavior, and charge-carrier dynamics within quantum wells, rods, wires, dots, and nanotubes. The course begins with an overview of the electronic structure of bulk semiconductors. The theoretical and experimental bases for quantum-confinement effects, which are of considerable fundamental and applied interest, will then be developed. A significant emphasis will be placed on the optical absorption and photoluminescence properties of semiconductor quantum nanostructures. Recent advances and observations as reported in the literature will be emphasized throughout the semester. Prerequisites: Chem 461/Chem 5610 and Chem 465/Chem 5620, or permission of the instructor. While the course is steered to graduate students in the Chemistry Department, Chemistry undergraduate students, graduate or undergraduate students in Physics, Electrical & Systems Engineering, Energy, Environmental & Chemical Engineering, Mechanical Engineering & Materials Science may also find this course valuable.

Credit 3 units.

---

**L07 Chem 550 Mass Spectrometry**

The first focus of the course is an overview of the subject and its history. The second covers the fundamentals of ionization to produce molecular ions. Ionization methods include electron ionization, chemical ionization, electrospray, and matrix-assisted laser desorption. Thermodynamic principles of ionization including ionization energies, proton affinities, and gas-phase acidities provide a fundamental basis for ionization. The third major focus is interpretation of EI and product-ion spectra from MS/MS. Mechanisms of gas-phase ion decomposition reactions, rates and thermodynamics of gas-phase ion processes, and ion-molecule reactions are discussed in terms of interpreting spectra. A major emphasis is the spectra of peptides and proteins, providing a basis for the field of proteomics and related "omics" areas. The fourth focus is the fundamentals of instrumentation design and implementation: quadrupole, time-of-flight, ion trap, orbitraps, and Fourier transform instruments. Combined or hyphenated GC/MS, LC/MS, and tandem mass spectrometry are also discussed. Applications in a variety of areas are worked in as the course progresses: structure determination of synthetic, natural products, metabolites, and

biomolecules, exact mass measurements (high resolution MS), peptide and protein and other biomolecule sequencing, sensitive detection, trace analysis, and mixture analysis. Prerequisite: Chem 262 or permission of instructor.  
Credit 3 units.

---

#### L07 Chem 5510 Organic Chemistry III

A lecture course that builds on the material in Chem 261/262, covering in more detail certain topics in those courses while also introducing new topics. A transition to graduate-level study in organic chemistry; recommended for chemistry, biochemistry, and biology majors.  
Prerequisite: Chem 262.  
Same as L07 Chem 451  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### L07 Chem 5511 Synthetic Polymer Chemistry

This course that describes various methods for the synthesis and characterization of polymers. Copolymers, control of architecture, polymer reactivity, polymer properties, structure/property relationships, and applications of polymers will be discussed. Current topics of interest from the recent literature will also be covered.  
Prerequisite: Chem 262 or permission of instructor.  
Same as L07 Chem 452  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### L07 Chem 5521 Physical Organic Chemistry

The goal of physical organic chemistry (formerly called mechanistic organic chemistry) is to understand the details of reaction mechanisms, and gain insight into structures and reactivity common to organic chemicals and of high-energy chemical intermediates. This course focuses on the structure of any intermediates, the extent of a reaction from the perspective of the transition state, and identifying the relative energies of reactants, products, intermediates, and transition states. Students will learn concepts needed to solve mechanistic organic problems encountered in research, covering common organic reaction mechanisms, experimental techniques, and theoretical approaches. After the course, students will be able to design experiments to probe mechanistic questions and propose reasonable mechanisms and intermediates to explain experimental observations. Prerequisite CHEM 262 or permission of the instructor.  
Same as L07 Chem 450  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### L07 Chem 5522 Synthetic Methods

A lecture course presenting a detailed survey of synthetically useful reactions of carbonyl compounds and their derivatives, with particular attention to their stereoselectivity aspects and asymmetric methodology. The course is intended to provide the necessary background for more advanced work in organic synthesis.  
Credit 3 units.

---

#### L07 Chem 554 Molecular Orbital Theory

Lectures will cover the background, practice and applications of computational chemistry to the modeling of the structures and chemical reactions of organic molecules. Different levels of calculation will be presented, from molecular mechanics calculations and Hückel molecular orbital theory, through semi-empirical and ab initio self-consistent field calculations with correlation energy corrections, and density functional theory. Hands-on experience performing calculations is an important element in this course.  
Credit 3 units.

---

#### L07 Chem 555 Special Topics in Organic Chemistry

This course focuses on an important current topic in organic chemistry. Open to undergraduates with the permission of the instructor.  
Credit 3 units.

---

#### L07 Chem 557 Advanced Organic Synthesis

The objective of this course is to teach students the art of planning a total synthesis. Key synthetic concepts, strategies and tactics, as well as a variety of reactions and synthetic methods, will be illustrated using examples from total syntheses of the main groups of natural products - terpenes, steroids, and alkaloids. Prerequisite: Chem 451/Chem 5510 or permission of instructor.  
Credit 3 units.

---

#### L07 Chem 5570 Synthetic Polymer Chemistry Laboratory

Chem 462 is an upper-level undergraduate laboratory course that complements Chem 452 Synthetic Polymer Chemistry. This twice-a-week lab provides hands-on training in the design, synthesis, and characterization of polymers and polymeric materials through four standard experiments (each one week) and one independent project (over five to six weeks). The independent project involves using an article from the literature as the basis for developing a short proposal. At the end of the course, students give oral presentations of their proposals, which are reviewed by their classmates. Prerequisite or Concurrent: Chem 452 or permission from instructor.  
Same as L07 Chem 462  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

#### L07 Chem 558 Spectral Methods in Organic Chemistry

A detailed treatment of the structure and stereochemistry of organic compounds with particular emphasis on ultraviolet, visible, infrared, nuclear magnetic resonance, and mass spectroscopic techniques for structure determination. Prerequisite: Chem 262 or permission of instructor.  
Credit 3 units.

---

#### L07 Chem 559 Organic Chemistry Seminar

The organic chemistry graduate students enrolled will each present one seminar on a topic of current interest in the literature.  
Credit 1 unit.

---

#### L07 Chem 5610 Inorganic Chemistry

Inorganic chemistry encompasses the structure, properties, and reactivity of inorganic molecules and solids and it is a required course for all Chemistry majors. This course will focus on the symmetry, bonding, electronic structure, spectroscopy, and reactivity of inorganic coordination complexes in which ligands are bound to one or more metal centers. The course will start with using group theory to classify molecules based on the symmetry elements they possess. A series of different bonding models including VSPER, valence bond theory, molecular orbital theory, crystal field theory, and ligand field theory will be used to describe the structure and bonding of inorganic molecules, coordination complexes, and organometallic compounds. These models will serve as a basis for interpreting and predicting the electronic and vibrational spectra of inorganic compounds. Prerequisites: Chem 106 or 112, and Chem 152.  
Same as L07 Chem 461  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 562 Statistical Thermodynamics**

Statistical mechanical methods will be used to characterize equilibrium and non-equilibrium thermodynamic systems. Computer programming assignments are given. An initial familiarity with ideal equilibrium systems will be assumed. Prerequisite Chem 401 or its equivalent or permission of the instructor.

Credit 3 units.

---

**L07 Chem 5620 Solid-State and Materials Chemistry**

A description of how the structures of crystalline solids at different length scales control their chemical and physical properties is critical for understanding how these materials are applied in a variety of technologies ranging from solar cells to lithium batteries. This course begins with basic crystallography and introduces common inorganic structure types as well as common defects in crystalline solids. With the aid of computer models, students will learn to analyze and index x-ray powder-diffraction patterns that provide a fingerprint to identify a crystal. The relation between the crystal structure of a solid and its resulting electronic structure, chemical reactivity, and physical properties (e.g., optical, electrical, and mechanical) will be discussed throughout the semester with an emphasis on how crystal defects alter these properties. The course will conclude with the use of phase diagrams to assess the composition and microstructure of metals and ceramics. Prerequisite: Chem 105/111A or permission of instructor Same as L07 Chem 465

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 5630 Inorganic Electrochemistry and Photochemistry**

An understanding of electrochemical processes is critical in describing the behavior of batteries, fuel cells, and other important devices used in energy conversion and environmental remediation. This course will cover modern inorganic electrochemistry, photochemistry, and photoelectrochemistry from a microscopic perspective of solid-electrolyte interfaces. The course material will start with the thermodynamics of solid-electrolyte interfaces and the kinetics of electron transfer across these interfaces. Electroanalytical techniques, including cyclic voltammetry and potential-step experiments, will be described to understand the mechanism of electrochemical and photochemical reactions. Lectures will include applications of electrochemical cells in catalysis, materials synthesis, and solar-fuel generation. Prerequisites: Chem 461, or Chem 465, or consent of instructor.

Same as L07 Chem 426

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 5670 Inorganic Chemistry Laboratory**

A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises will introduce novel synthetic techniques including high-temperature synthesis and vacuum-line manipulations. Compounds will be spectroscopically characterized by UV-visible absorption, gas-phase infrared, and multinuclear and dynamic NMR spectroscopies. Measurements of electrochemical behavior, magnetic susceptibility, and electrical conductivity will be performed. Prereq: Chem 461 or consent of the instructor. A Writing Intensive option is available with the permission of the instructor.

Same as L07 Chem 470

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L07 Chem 571 Quantum Chemistry and Spectra**

This course covers the development and application of quantum mechanics as applied to molecular structure and properties. Material to be discussed will include the fundamentals of quantum mechanics; representations; matrix formalisms; applications to model

systems; perturbation theory; variational methods; many-electron wavefunctions; Hartree-Fock theory and post-Hartree Fock methods; density functional theory; additional topics and applications. Prereq: Chem 401.

Credit 3 units.

---

**L07 Chem 5721 Quantum Chemistry in Practice**

A spectrum of modern computational tools -- from semiempirical, self-consistent field theory, and density functional theory one-electron pictures to perturbative and simulation many-electron pictures -- will be used to determine potential energy surfaces, spectroscopic cross-sections, and oxidation-reduction energetics.

Credit 3 units.

---

**L07 Chem 576 Magnetic Resonance**

Quantum mechanical and classical aspects of paramagnetism and of nuclear and electronic magnetic resonance. Phenomenological equations of motion, spin interactions, spin temperature, thermal relaxation, dynamic polarization, multiple resonance phenomena.

Credit 3 units.

---

**L07 Chem 5762 Electron Spin Resonance**

Principles of magnetic resonance of paramagnetic species, structure and dynamics of organic free radicals and transition metal ions in the condensed phase. Detection of transient paramagnetic species generated in photochemical reactions and photo physical processes.

Prereq, Chem 401.

Credit 3 units.

---

**L07 Chem 578 Nuclear Magnetic Resonance Spectroscopy**

A course dealing with the quantum and classical description of the nuclear magnetic resonance of an isolated system of two spin-1/2 nuclei. The design of pulsed NMR spectrometers and the Fourier analysis of time-dependent observable magnetization in 1 and 2 dimensions are treated in detail, NMR relaxation in liquids and solids is included phenomenologically. Prerequisite: Physical Chemistry or permission of the instructor.

Credit 3 units.

---

**L07 Chem 580 Special Topics in Physical Chemistry: Methods of Biophysical Chemistry**

The course provides an overview of key methodologies of contemporary biophysics and biophysical chemistry, covering: 1) Spectroscopic methods routinely used in biochemistry, including absorption, fluorescence, and circular dichroism; 2) Biophysical methods to study intra- and intermolecular protein interactions including solution-state NMR, FCS, and FRET; 3) Cutting-edge biophysical techniques to study transient protein-protein/ protein-nucleic acids interactions. Prerequisites: undergraduate-level course in quantum mechanics (Chem 401)

Credit 3 units.

---

**L07 Chem 581 Advanced Quantum Chemistry**

A study of the theory and methods of quantum mechanics, with applications to problems of chemical interest. Prerequisite, Chem 571 or permission of the instructor.

Credit 3 units.

---

---

### L07 Chem 5810 General Biochemistry I

Topics include the properties and structures of biomolecules, including amino acids, nucleotides, lipids, carbohydrates, proteins and nucleic acids. Additional topics include enzyme kinetics and mechanisms, membrane structure and properties, protein folding, an introduction to metabolism, oxidative phosphorylation and photosynthesis. This course is the first semester of an integrated two-semester sequence. The second course is Chem 482. Prerequisites: Biol 2970, Chem 262. Same as L07 Chem 481

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 5811 Introduction to Biomolecules

The goal of this course is to introduce students to the preparation, characterization, structure-function relationship, and chemistry of proteins, polysaccharides, and nucleic acids. The course emphasizes understanding the chemical and physical properties of the respective building blocks and their noncovalent interactions as the foundation for macromolecular properties and function. Students will apply fundamental energetic and mechanistic principles (from general and organic chemistry) and develop chemical reasoning skills that enable scientific problem-solving towards the understanding of chemical phenomena in biological systems.

Credit 3 units.

---

### L07 Chem 5820 General Biochemistry II

Biochemistry explores the chemistry of life processes at the molecular level. This course is the second semester of a two-semester General Biochemistry sequence (Chem481/482 or Bio4810/4820). Prerequisites include Chem481/Bio4810 and Chem262 or instructor permission. The first semester of the Biochemistry sequence covered the basics of the topic with an emphasis on the structures, functions, and interactions of biomolecules including proteins, nucleic acids, carbohydrates, and lipids. This second semester course will emphasize metabolism, the biosynthetic (anabolism) and degradation (catabolism) pathways that provide the energy of life and define the molecules associated with healthy and disease states.

Same as L07 Chem 482

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 5821 Chemical Biology

This course is a survey of modern chemical biology focusing on the application of a broad array of chemical tools to biological problems. The course is roughly divided into four sections; biopolymers, computational methods and bioinformatics, tools for chemical biology, and applications of chemical biology. A mandatory discussion section accompanies the course and is used to review current and classical literature in the field. Prereqs: Chem 262 and Biol 2970, or permission of the instructor.

Same as L07 Chem 475

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 583 Time-Dependent Quantum Mechanics & Spectroscopy

This graduate-level course lays the foundations of time-dependent quantum mechanics and applications to contemporary optical spectroscopies, particularly ultrafast techniques. Formal theoretical descriptions for nonlinear spectroscopic techniques including transient absorption, photon echo, and two-dimensional spectroscopies will be developed. Practical aspects of these experiments including modern laser systems, instrument design, data collection, data processing, and data analysis will also be discussed. Discussion of current literature in the field will be an important component of the course. Prerequisite courses: Chem 401 or permission from the instructor.

Credit 3 units.

---

### L07 Chem 5830 Bioorganic Chemistry

This course presents a molecule-centered perspective on the current state of the art in antibiotic drug discovery and natural products chemistry. The molecular mechanisms of antibiotic drug action and pathogen resistance will be covered along with the biosynthetic origins of antibiotics from plants and microbes. The course is taught from the perspective of understanding how organic chemistry plays out in biological systems, with an emphasis on small organic molecules and enzymes. Curved arrow mechanisms will be used frequently in learning activities and assignments. Thus, Chem 262 (Organic Chemistry 2) is a mandatory prerequisite for this course. A working knowledge of protein structure and function is helpful. Students are encouraged (but not required) to take Chem 481 (General Biochemistry 1) and/or Chem 482 (General Biochemistry 2) in preparation for this course. Students will be responsible for writing a review article on an assigned antibiotic molecule and presenting their paper to the class.

Same as L07 Chem 453

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L07 Chem 5833 Protein Biochemistry

The focus of this course is protein biochemistry, and is intended to build upon General Biochemistry (Chem 481). In this course we will focus on protein structure, folding, and techniques to purify and characterize protein activity. We will progress from initial studies to first understand protein fold and function to current efforts to better characterize protein structure-function relationships. We will also highlight human diseases that are underpinned by protein misfolding. This course will focus on reading and understanding primary literature, including landmark papers along with more recent work. During the second half of the semester, each student will select a paper and prepare a written analysis of that paper. The student will then present the paper and lead a journal club style discussion of the paper. Prerequisites: Chem 481 or instructor's permission

Same as L07 Chem 483

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L07 Chem 584 Molecular Spectroscopy

Cursorry overview of electromagnetic radiation and its interaction with atoms and molecules. The course will assume a general knowledge of quantum chemistry, (i.e., Chem 401), although a quick review of eigenfunctions and states will be given. We will cover Rotational Spectroscopy, Vibrational Spectroscopy, Electronic Spectroscopy, and Time-resolved Spectroscopy. In so doing, attention will be focused on diatomic molecules, although some examples of polyatomics will be given with emphasis placed on how structure contributes to spectra. Emphasis is placed on creating intuition into spectroscopy, not necessarily the quantum-mechanical rigor or detailed calculations of molecular spectroscopy. Prerequisite, Chem 401 or permission of the instructor.

Credit 3 units.

---

### L07 Chem 585 Molecular Reaction Dynamics

This course addresses the question, "what happens in a chemical reaction?" at the atomic/molecular level. Topics: Non-reactive and reactive molecular collisions, scattering and resonances, unimolecular and bimolecular reactions, potential energy surfaces, reaction rate calculations and models, state to state experiments and stereodynamics, energy transfer mechanisms, time resolved and frequency resolved dynamics, condensed phase dynamics, control of chemical reactions. Requirements: Chem 401 is a pre-requisite and prior completion or current registration in Chem 402 is required. However, equivalent courses will be considered at the discretion of the instructor.

Credit 3 units.

---

### L07 Chem 599 Chemical Laboratory Safety

An overview of current laboratory safety, regulatory, and compliance practices. Safety and compliance issues that impact chemical, biological, and materials research will be covered. Required for entering chemistry graduate students.

Credit 0.5 units.

## Chemistry Major Program Requirements

- **Total units required:** 53

### Required Courses

To prepare for a major in chemistry, students will take the following:

Code	Title	Units
Chem 111A	General Chemistry I *	3
Chem 112A	General Chemistry II *	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Chem 262	Organic Chemistry II with Lab	4
Physics 191	Physics I **	3
Physics 191L	Physics I Laboratory **	1
Physics 192	Physics II **	3
Physics 192L	Physics II Laboratory **	1
Math 131	Calculus I ***	3
Math 132	Calculus II ***	3
Math 233	Calculus III ***	3
<b>Total Units</b>		<b>35</b>

\* In certain instances, students may substitute Chem 105 Principles of General Chemistry I and Chem 106 Principles of General Chemistry II for Chem 111A General Chemistry I and Chem 112A General Chemistry II. Please consult the department's director of undergraduate studies for details.

\*\* Physics 193 Focused Physics I may replace Physics 191 Physics I, Physics 194 Focused Physics II may replace Physics 192 Physics II, Physics 193L Focused Physics I Laboratory may replace Physics 191L Physics I Laboratory, and Physics 194L Physics II Laboratory may replace Physics 192L Physics II Laboratory.

\*\*\* Math 203 Honors Mathematics I may replace both Math 131 Calculus I and Math 132 Calculus II. Math 204 Honors Mathematics II may replace Math 233 Calculus III.

Physics 217 Introduction to Quantum Physics and additional mathematics courses are also recommended. The optional Chem 181 First-Year Opportunity: Why is Chemistry Called "the Central Science"? is open to first-year students, highlighting research activities in the department.

A working knowledge of computer programming and of a foreign language, such as German or Russian, is encouraged for the chemistry major but not required.

Majors in chemistry must take a minimum of 18 units of advanced courses in chemistry or biochemistry, among which the following must be included:

Code	Title	Units
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 461	Inorganic Chemistry	3
<b>Total Units</b>		<b>9</b>

In addition, 9 units in chemistry at the 300 level or above must be taken (not including Chem 490 Introduction to Research or Chem 495 Advanced Undergraduate Research in Chemistry). Biol 451 General Biochemistry may be used to complete 3 of these additional 9 units, but not in combination with Chem 481 General Biochemistry I or Chem 482 General Biochemistry II.

At least 3 of these 9 advanced units must be in a laboratory course chosen from the following list:

Code	Title	Units
Chem 358	Advanced Organic Laboratory	4
Chem 435	Nuclear and Radiochemistry Lab	3
Chem 445	Instrumental Methods: Physical Chemistry	3
Chem 462	Synthetic Polymer Chemistry Laboratory	3
Chem 470	Inorganic Chemistry Laboratory	3

Neither Chem 490 Introduction to Research nor Chem 495 Advanced Undergraduate Research in Chemistry can be used to satisfy the advanced laboratory requirement.

Students have the advantage of planning their programs with their advisors in accordance with their personal interests. Some graduate courses are also available to seniors.

All chemistry course work must be taken in residence at Washington University to be applied toward the chemistry major. A minimum grade of C- must be earned in each course to count toward the chemistry major.

## Additional Information

### Study Abroad

Study Abroad programs are available both for chemistry and pre-medical studies. Details of these programs can be found at the Overseas Programs website. For chemistry programs, students may be able to receive elective/research (Chem 490 Introduction to Research) credit for courses taken/research done abroad. It is strongly advised that students contact the Department of Chemistry Study Abroad Advisor, Prof. Richard Mabbs (mabbs@wustl.edu), as soon as possible after they declare their major in order to discuss study abroad plans.

## Latin Honors for the Major in Chemistry

- **Total units required:** 56

To qualify for Latin Honors, students must complete a minimum of 21 units in advanced courses in chemistry or biochemistry, among which the following must be included:

Code	Title	Units
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 461	Inorganic Chemistry	3

In addition, 6 units in chemistry at the 300 level or above must be taken (not including Chem 490 Introduction to Research). Chem 495 Advanced Undergraduate Research in Chemistry can be used to satisfy 3 of these additional 6 units on the chemistry honors track. Biol 451 General Biochemistry may be used to complete 3 of these additional 6 units but not in combination with Chem 481 General Biochemistry I or Chem 482 General Biochemistry II.

Students must also complete **two** additional advanced laboratories. Students **must** choose one synthetic laboratory from the following:

Code	Title	Units
Chem 358	Advanced Organic Laboratory	4
Chem 462	Synthetic Polymer Chemistry Laboratory	3
Chem 470	Inorganic Chemistry Laboratory	3

They **must** also choose one physical laboratory from the following:

Code	Title	Units
Chem 435	Nuclear and Radiochemistry Lab	3
Chem 445	Instrumental Methods: Physical Chemistry	3

Neither Chem 490 Introduction to Research nor Chem 495 Advanced Undergraduate Research in Chemistry can be used to satisfy the advanced laboratory requirements.

## Departmental Honors for the Major in Chemistry

To be eligible for Departmental Honors, a student must complete the Latin Honors program in chemistry. To graduate "with distinction," a student must maintain a chemistry grade point average of 3.5 and complete the equivalent of at least 3 units of Chem 490 Introduction to Research. To graduate "with high distinction," a student must maintain a chemistry GPA of 3.65 and complete the equivalent of at least 3 units of Chem 490 and one semester of Chem 495 Advanced Undergraduate Research in Chemistry. To graduate "with highest distinction," a student must maintain a chemistry GPA of 3.8 and complete the equivalent of at least 3 units of Chem 490 and one semester of Chem 495. Chemistry research is defined as a research project performed under the direction of a chemistry faculty member or a research project approved by the

Chemistry Department Undergraduate Work Committee. The chemistry GPA is calculated from the grades received in chemistry courses and prerequisites for the chemistry major. The level of Departmental Honors that a student achieves will appear on the student's final transcript.

Phone: 314-935-6530  
Email: chemistry@wustl.edu  
Website: http://chemistry.wustl.edu

## Chemistry Major, Biochemistry Specialization

### Program Requirements

- **Total units required:** 61-62

### Required Courses

To prepare for a major in chemistry with a specialization in biochemistry, students will take the following:

Code	Title	Units
Chem 111A	General Chemistry I *	3
Chem 112A	General Chemistry II *	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Chem 262	Organic Chemistry II with Lab	4
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
Physics 191	Physics I **	3
Physics 191L	Physics I Laboratory **	1
Physics 192	Physics II **	3
Physics 192L	Physics II Laboratory **	1
Math 131	Calculus I ***	3
Math 132	Calculus II ***	3
Math 233	Calculus III ***	3
<b>Total Units</b>		<b>43</b>

\* In certain instances, students may substitute Chem 105 Principles of General Chemistry I and Chem 106 Principles of General Chemistry II for Chem 111A General Chemistry I and Chem 112A General Chemistry II. Please consult the department's director of undergraduate studies for details.

\*\* Physics 193 Focused Physics I may replace Physics 191 Physics I, Physics 194 Focused Physics II may replace Physics 192 Physics II, Physics 193L Focused Physics I Laboratory may replace Physics 191L Physics I Laboratory, and Physics 194L Physics II Laboratory may replace Physics 192L Physics II Laboratory.

\*\*Math 203 Honors Mathematics I may replace both Math 131 Calculus I and Math 132 Calculus II. Math 204 Honors Mathematics II may replace Math 233 Calculus III.

Majors in chemistry with a specialization in biochemistry must take a minimum of 18 units of advanced courses in chemistry or biochemistry, among which the following must be included:

Code	Title	Units
Chem 481	General Biochemistry I	3
Chem 482	General Biochemistry II	3
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 461	Inorganic Chemistry	3
<b>Total Units</b>		<b>15</b>

In addition, at least one advanced lab must be chosen from the following list:

Code	Title	Units
Chem 358	Advanced Organic Laboratory	4
Chem 435	Nuclear and Radiochemistry Lab	3
Chem 445	Instrumental Methods: Physical Chemistry	3
Chem 462	Synthetic Polymer Chemistry Laboratory	3
Chem 470	Inorganic Chemistry Laboratory	3
Biol 4522	Laboratory in Protein Analysis, Proteomics, and Protein Structure	3
Biol 4523	Molecular Methods in Enzyme Analysis	4

All required chemistry course work must be taken in residence at Washington University to be applied toward the chemistry major. A minimum grade of C- must be earned in each course to count toward the chemistry major.

**Note:** Per the College of Arts & Sciences guidelines, for students who also pursue a minor or more than one major or minor program, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both programs. All advanced (300- and 400-level) courses must be unique to each program. In other words, no advanced course may be "double-counted" for the course work needed to fulfill either program's minimal requirements. Should a student's major and minor programs require the same course, a departmentally sanctioned elective must be chosen to replace the course in one of the programs.

## Additional Information

### Study Abroad

Study Abroad programs are available both for chemistry and pre-medical studies. Details of these programs can be found at the Overseas Programs website: <http://www.artsci.wustl.edu/~overseas/>. For chemistry programs, you may be able to receive elective/research (Chem 490 Introduction to Research) credit for courses taken/

research done abroad. It is strongly advised that you contact the Department of Chemistry Study Abroad Advisor, Prof. Richard Mabbs (mabbs@wustl.edu) as soon as possible after you declare your major to discuss study abroad plans.

## Latin Honors for the Major in Chemistry With a Specialization in Biochemistry

- **Total units required:** 64-66

To qualify for Latin Honors, students must complete a minimum of 21 units in advanced courses, including **one** of the following six courses:

Code	Title	Units
Chem 410	Special Topics in Physical Chemistry	3
Chem 453	Bioorganic Chemistry	3
Chem 464	Inorganic Biochemistry	3
Chem 475	Chemical Biology	3
Chem 483	Protein Biochemistry	3
Chem 485	Nucleic Acids	3
Chem 510	Chemical Dynamics of Biological Pathways	3
Biol 334	Cell Biology	3
Biol 349	Microbiology	4

or a second advanced laboratory course in chemistry or biology chosen from the following list:

Code	Title	Units
Chem 358	Advanced Organic Laboratory	4
Chem 435	Nuclear and Radiochemistry Lab	3
Chem 445	Instrumental Methods: Physical Chemistry	3
Chem 462	Synthetic Polymer Chemistry Laboratory	3
Chem 470	Inorganic Chemistry Laboratory	3
Biol 4522	Laboratory in Protein Analysis, Proteomics, and Protein Structure	3
Biol 4523	Molecular Methods in Enzyme Analysis	4

All required chemistry course work must be taken in residence at Washington University to be applied toward the chemistry major. A minimum grade of C- must be earned in each course to count toward the chemistry major.

## Departmental Honors for the Major in Chemistry With a Specialization in Biochemistry

To be eligible for Departmental Honors, a student must complete the Latin Honors program in chemistry. To graduate "with distinction," a student must maintain a chemistry grade point average of 3.5 and complete the equivalent of at least 3 units of Chem 490 Introduction to Research. To graduate "with high distinction," a student must maintain a chemistry GPA of 3.65 and complete the equivalent of at least 3 units of Chem 490 and one semester of Chem 495 Advanced Undergraduate

Research in Chemistry. To graduate "with highest distinction," a student must maintain a chemistry GPA of 3.8 and complete the equivalent of at least 3 units of Chem 490 and one semester of Chem 495. Chemistry research is defined as a research project performed under the direction of a chemistry faculty member or a research project approved by the Chemistry Department Undergraduate Work Committee. The chemistry GPA is calculated from the grades received in chemistry courses and prerequisites for the chemistry major. The level of Departmental Honors that a student achieves will appear on the student's final transcript.

Phone: 314-935-6530  
Email: chemistry@wustl.edu  
Website: http://chemistry.wustl.edu

## Chemistry Minor Program Requirements

- **Total units required:** 41 (27 in chemistry; 14 in math and physics)

### Required Courses

Code	Title	Units
Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Chem 262	Organic Chemistry II with Lab	4
Math 131	Calculus I *	3
Math 132	Calculus II *	3
Physics 191	Physics I **	3
Physics 191L	Physics I Laboratory **	1
Physics 192	Physics II **	3
Physics 192L	Physics II Laboratory **	1
<b>Total Units</b>		<b>32</b>

\* Math 203 Honors Mathematics I may replace both Math 131 Calculus I and Math 132 Calculus II.

\*\* Physics 193 Focused Physics I may replace Physics 191 Physics I, Physics 194 Focused Physics II may replace Physics 192 Physics II, Physics 193L Focused Physics I Laboratory may replace Physics 191L Physics I Laboratory, and Physics 194L Physics II Laboratory may replace Physics 192L Physics II Laboratory.

**Note:** In certain instances, students may substitute Chem 105 Principles of General Chemistry I and Chem 106 Principles of General Chemistry II for Chem 111A General Chemistry I and Chem 112A General Chemistry II. Please consult with the department's director of undergraduate studies for details.

## Elective Courses

Student must complete 9 units of chemistry encompassing three courses in at least two subdisciplines. Biol 451 General Biochemistry may be used to satisfy one course of the three required (but not in combination with Chem 481 General Biochemistry I or Chem 482 General Biochemistry II). Courses must be at the 300 level or above, but Chem 490 Introduction to Research and Chem 495 Advanced Undergraduate Research in Chemistry are specifically excluded.

All chemistry course work must be taken in residence at Washington University to be applied toward the chemistry minor. A minimum grade of C- must be earned in each course to count toward the chemistry minor.

**Note:** Per the College of Arts & Sciences guidelines, if a student has a major and a minor or has two minors, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both programs. All advanced (300- and 400-level) courses must be unique to each program. In other words, no advanced course may be "double-counted" for the course work needed to fulfill either program's minimal requirements. Should a student's major and minor programs require the same course, a departmentally sanctioned elective must be chosen to replace the course in one of the programs.

Email: chemistry@wustl.edu  
Website: http://chemistry.wustl.edu

## Classics

The major in Classics focuses on the study of the Latin and/or ancient Greek languages. The major in Ancient Studies is for students who want to explore the whole spectrum of the classical world with little or no work in the ancient languages. Resources on campus that support the study of classics include a substantial library collection of materials related to the ancient world, collections of Greek papyri and art, and the Wulfling Coin Collection.

### L08 Classics 1040 First-Year Seminar: The Trojan War in Myth, Art, and Reality

The Trojan War was one of the most significant events in the history of the world. It was also, almost certainly, fictional. The goal of this class will be to examine the wide-ranging and varied evidence for the story of the Trojan War and its long-lasting cultural influence, from antiquity to the present day. Ultimately, we will seek to understand how every reflection on the Trojan War as a past event - whether poetic, artistic, or archaeological - has also been a reflection of a contemporary society - Iron Age Greece, Imperial Rome, Modern Europe - and an attempt to situate that society within a global history. In doing so, the class will also address questions of pressing contemporary relevance: including how civilizations form and collapse, how fact and fiction are intertwined in the construction of civic and ethnic identities, and how certain kinds of evidence may be alternately privileged or suppressed in the creation of historical narratives. Prerequisites: none

### L08 Classics 1135 Freshman Seminar: The World of Cleopatra

Cleopatra -- the last queen of ancient Egypt -- captivated her contemporaries and has fascinated the Western world ever since her famous suicide by asp in 31 BCE. She was a woman of contrasts: Pharaoh of Egypt and Greco-Macedonian queen; seductive woman and shrewd political strategist; a ruthless monarch using every means available to consolidate her position in the face of the encroaching power of the Roman Empire. Through texts and material culture, the seminar will seek to understand Cleopatra in the context both of her native Egypt and of the wider Mediterranean world. We will thus examine the traditions of Pharaonic Egypt; the historical events that brought Egypt under the control of the Macedonian Ptolemies (Cleopatra's dynasty); the wider stage of East-West tension and conquest in which Cleopatra struggled to maintain her power; her

relationships (political and personal) with famous men of her day (Caesar, Herod, Mark Antony); her capital city of Alexandria, the largest metropolis of its day; Cleopatra's brilliant court and its luxury arts; and finally the many Cleopatras that have populated art and literature of later times. We will emerge with a sense of Cleopatra, both as a unique individual and as a product of her time.

---

#### **L08 Classics 114 First-Year Seminar: Ancient Literary Journeys**

Recent social histories exploring Greek childhood have emphasized the reconstruction of the ancient child's agency. Such studies have been interested to illuminate the lived experience of children and to apprehend their voices so often silent in the sources. While such inquiry has clearly widened our understanding of ancient children's lives, the present course is designed instead to explore explicitly the representation of children as particularly rich reservoirs of cultural values. Drawing upon a range of art historical and archaeological sources and literary genres, we will examine the ways in which children were presented to mirror back social mores, thus capturing the aspirations of ancient Greek society. As figures of future potential, children continue to offer social historians one of the most striking lenses through which to explore the question of our humanity. The protean answer to this question at once reveals the proximity and vast distance that stands between our modern society and the ancient Greek one.

---

#### **L08 Classics 115 First-Year Seminar: Engaging the Classical Past in Modern Fiction**

This course will explore the persistent -- but often camouflaged -- influence of classical antiquity on modern genre (popular) fiction. Students will read and discuss both texts from antiquity (e.g., Ovid's "Metamorphoses," Lucian's "A True History") and selections from the works of major 20th-century authors drawn from the canon of a specific genre. Although popular fiction embraces a wide range of authors and styles, genres that are particularly engaged with the classical past include science fiction (e.g., Jules Verne, Suzanne Collins), fantasy (e.g., J.R.R. Tolkien, Rick Riordan), horror (e.g., H.P. Lovecraft, Stephen King), mystery (e.g., Elizabeth Peters, Steven Saylor), and adventure (e.g., Clive Cussler, David Gibbins). Discussion of these texts will include theorization about the nature of the genre and its origins as well as specific examples of allusions and intertexts to ancient Greek and Roman authors, focusing on the characters, artifacts, monsters, themes, legends, and plot devices drawn from Greco-Roman mythology or modern mythology about Classical antiquity. Course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

#### **L08 Classics 117 First-Year Seminar: Villians of Ancient Rome**

Fall 2024: Who were the ancient Romans? What were their lives like? What did they care about, and what did they believe? In this seminar, you will work to answer these questions and more as you examine the rich culture and literature of the ancient Romans through the lens of "villainy". You will read historical and literary accounts of ancient Rome and explore the great "villains" of the monarchy, republic, and empire--to name a few: Tarquinius Superbus, Lucius Catiline, Livia Drusilla, Marc Anthony, and Agrippina the Younger. As we make our way through our sources you will learn about the daily life, social structures, governments, economies, and multiple religions of Roman culture. Furthermore, you will come to see how traces of Romans (virtuous and villainous) live on today! After a semester of critical reading and class discussions, you should leave the course with a greater understanding

of three things: Roman culture broadly, the impact that this culture has on our modern world, and what constitutes a "villain" in the Roman mind across the centuries. Note: This course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

#### **L08 Classics 118 First Year Seminar: The Art of Rhetoric from Cicero to Social Media**

In Barack Obama's victory speech after the 2008 election, he said, "It's been a long time coming, but tonight, because of what we did on this day, in this election, at this defining moment, change has come to America." He did indeed promise change, but in making that promise he relied on rhetorical rules -- like the climactic tricolon -- that were first formulated in classical antiquity and have been passed down in an unbroken tradition right up to today. In this class we will study the uses and abuses of rhetoric from the ancient world to the present. The course combines a study of rhetorical theory with observation of its practice from Cicero to contemporary advertising, and also includes a significant public speaking component. The meticulous deconstruction of complex texts and ideas in this course will give students a tool for cutting to the heart of the issues that continue to face the modern world, and the participants' own speaking and writing will also benefit. Students will analyze both ancient and modern attempts at persuasion in light of classical rhetorical theory, and they will write and deliver two short speeches on topics of their choice.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

#### **L08 Classics 120 First Year Seminar: The Hero**

The tale of the hero has endured as one of the most popular narrative forms since the 3rd millennium BC. From the first recording of the Sumerian Epic of Gilgamesh to the 21st c. cinematic spectacle of Marvel's Avengers, audiences have been transfixed by the travails of the protagonist who attains heroic status. In studying seminal heroes drawn from near eastern and ancient Greek epic, classical tragedy and history, this course will examine why the hero generates such fascination and how the hero reflects back the most fundamental concerns of human existence.

---

#### **L08 Classics 121 Christianity and Polytheism in Late Antique Egypt**

This course explores the subject of polytheism in late Roman Egypt and the role that Christianity played in shaping a new religious, social, and cultural environment between the third century CE and the advent of Islam in the seventh century. The goal is to gain an understanding of the process by which the new religion spread in a deeply Hellenized part of the Mediterranean world such as Egypt. Indeed, its inhabitants had not only largely adopted the Greek language, but were deeply imbued with Greco-Roman culture and lifestyle, at the same time remaining attached to their traditional religious heritage. The seminar will touch upon issues of religious and cultural resistance, imperial involvement, official propaganda, proselytism, and syncretic manifestations of devotional practice. Attention will also be paid to the variety of forms in which Christianity (and modes of Christian life) developed in Egypt, revealing a complex but deeply fascinating world of ideas and beliefs. The religious topography of pre-Christian Egypt, in which temples were prime visual landmarks, will be examined and compared with the dramatic changes brought about, both to the built and the natural environment, by the appearance and dissemination of Christian places of cult and monastic life.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L08 Classics 137 First Year Seminar: The Emperor Nero: Prince, Monster, Artist**

The destructive, scandal-ridden career of the Roman emperor Nero (mid-1st century CE) almost defies belief. From his assumption of power as a teenager to his suicide after a military revolt, Nero flouted political and cultural conventions left and right. His inspiring debut notwithstanding, he killed off his family and mentor, held wild parties, poured money into extravagant projects, and neglected state business to pursue a career on stage. He came to be labeled one of the "Bad Emperors," and seen as a symbol of the decline of Rome itself - especially by sympathizers of the Christians he persecuted. Yet Nero as an emperor and a literary character was also a creation of his time. The figure of Nero is examined in his context. The central text is the *Life of Nero* by Suetonius (2nd century CE), a dense and colorful text read first in its entirety and then more carefully in pieces. Supplementary readings are from the abundant other sources on and interpretations of Nero, both ancient and modern. Discussions and writing assignments are varied and designed to develop analytical and writing skills.

Credit 3 units. A&S: FYS A&S IQ: HUM

---

**L08 Classics 188 Beginning Coptic I**

This course provides an introduction to the Coptic language in the Sahidic (southern) dialect. Coptic was the vernacular language spoken and written in Egypt during the Roman, Byzantine, and Arab periods (until about 1300 CE) and as such is important for studying the history of premodern Egypt. It preserves some of the oldest known translations of the Bible, many apocryphal and "heretical" books that illustrate the wide diversity of ancient Christianity (e.g., the Gospels of Thomas and Mary), as well as sermons, saints' lives, monastic instructions, and liturgical manuals that still constitute the literary culture of the Coptic Orthodox Church today. In addition, a plethora of "magical" papyri illustrate medical and religious practices; personal letters reveal the lives of everyday people; and troves of business documents (e.g., contracts, wills, governmental petitions, receipts) have proved important for understanding Roman and Byzantine economies. Because Roman Egypt was a highly bilingual society, there are even instances of Classical Greek literature translated into Coptic (e.g., selections of Homer and Plato), and these offer a unique witness to how such texts were received by Egyptians. The goal of this course is to cover 15 of the 20 lessons in the grammar book. The remainder will be covered in the second level of this course.  
Credit 4 units. A&S IQ: HUM, LCD BU: HUM EN: H

---

**L08 Classics 189 Beginning Coptic II**

After completing the remaining grammar lessons from Beginning Coptic I, we will build skill and confidence as translators by reading selections from a variety of Coptic texts: the Sahidic Gospel of Mark, the hagiographic "Life of John the Monk," selections from the Gospels of Mary and Thomas, and a unique Coptic translation of Plato's "Republic." In our readings from the Bible and Plato, those who read Classical Greek will also have the opportunity to study how ancient translators chose to render the Greek texts into Egyptian, and how, in the process of translation, they changed the meaning of the originals. Prerequisite: Classics 188 or permission of instructor.  
Credit 4 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

**L08 Classics 2011 Classical to Renaissance Literature**

Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer's *Iliad* is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin, and Italian, to poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Vergil, Ovid, Petrarch, and Shakespeare.

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

**L08 Classics 2100 Beginning Sanskrit I**

This course is an introduction to Classical Sanskrit, the ancient literary language of India. Students will learn to read and write in the Devanagari writing system and be introduced to the basics of Sanskrit grammar. By the end of the course students will be able to produce grammatical paradigms of Sanskrit words, understand and produce complex sentences in Sanskrit, and will even start reading passages of the Mahabharata in the original.  
Credit 4 units. A&S IQ: HUM, LCD EN: H

---

**L08 Classics 2110 Beginning Sanskrit II**

Credit 3 units. A&S IQ: LCD, LS EN: H

---

**L08 Classics 223 Ampersand: The Age of Pericles**

This seminar will explore the relationship between the sociopolitical history and cultural development of Athens in the fifth and fourth centuries BC. Students will be encouraged to analyze both archeological and literary evidence throughout the process of democratization, paying particular attention to the Periclean building program, including the sanctuary of Athena on the Acropolis, the Agora, domestic Athenian architecture, and the panhellenic sanctuaries of Delphi and Olympia. Selections from the histories of Herodotus and Thucydides, the plays of Sophocles and Aristophanes, the dialogues of Plato, and Aristotle's "Constitution of Athens" will highlight the functions and limitations of the democratic regime. This course is for first-year, non-transfer students in the Democracy and Myth in Ancient Greece Ampersand program.  
Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

**L08 Classics 225D Latin and Greek in Current English**

An astonishingly large number of English words, especially in areas such as medicine, science, and law, are derived from Latin and Greek. This course will provide a study of the impact of Latin and Greek on the English language through study of the Latin and Greek roots, prefixes, and suffixes that are most commonly found in English technical and non-technical vocabulary and the linguistic principles through which these elements have entered the English language.  
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L08 Classics 228 Theater Culture Studies I: Antiquity to Renaissance**

This course is a survey of ancient, medieval and Renaissance theater and performance: in both the West and in the East, as it both reflects and shapes culture. Coverage will include the following areas: ancient Greece, ancient Rome, classical Sanskrit theater, Yuan China, medieval Japan, medieval Europe, Renaissance Italy, and Renaissance England. Both scripted theater and performance practices will be examined

through the lenses of dramatic literature, theater history, performance studies, and dramatic theory. A continual emphasis will be on marginal and underrepresented figures, as we will attempt to excavate forgotten histories from the theatrical past.

---

### L08 Classics 232E Myths and Monuments of Antiquity

An introduction to the ancient world (circa 3500 B.C. to A.D. 400) based on masterpieces of art and architecture from Mesopotamia, Egypt, Greece, and the Roman Empire. The monuments are accompanied by a selection of myths and documents representing the cultural life of these ancient societies and constituting their legacy to our modern world.

Same as L01 Art-Arch 232

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, HUM BU: HUM EN: H

---

### L08 Classics 234 The Greek World

This course offers an introduction to the society and culture of ancient Greece, the civilization that created Homer, Socrates, and Herodotus, among many others. Using a wide variety of literary, documentary, and material sources, we will focus on one central question: what does it mean to be Greek in antiquity? We will explore how the negotiation of 'Greekness' affects cultural values, how it influences the geopolitics of the ancient Mediterranean, how women, slaves, and immigrants fit (or do not fit) into this Greekness, how ancient Greek democracy arises, and how it dies.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

### L08 Classics 2361 Cities and Towns of the Ancient World

This course is an introduction to ancient urbanism in the Mediterranean region, the Near East, and the Indus Valley. The chronological span is wide, ranging from the Neolithic era to the Late Roman/Early Byzantine period. The archaeological evidence of some of the earliest known cities will be presented and discussed, with the aim of understanding the formation process of urban centers and how these shaped and influenced their sociopolitical, economic, and cultural life. Broad issues that will be considered in class concern the origin of urban life and its different manifestations; the relationship between the natural landscape and the built environment and how the former affected the development of the latter; and the ways in which ancient civilizations constructed and used space in order to shape social relations. The course will also highlight the available evidence of monuments and artworks in context as integral parts of the urban landscape of ancient cities and towns. When available, ancient documentary sources will be introduced in order to present a more comprehensive picture of those urban centers and of the communities that created and inhabited them. The readings assigned for each session (and discussed in class) will also provide a broad sample of primary and secondary sources, the latter consisting of relevant scholarship on the topic of ancient urbanism.

---

### L08 Classics 236C The Roman World

An introduction to the society and culture of the ancient Roman Republic and Empire. The "Roman World" began as a small settlement by the Tiber River and became a huge and diverse empire extending into three continents, with a cultural legacy that has lasted to this day. The course will cover key events over a millennium of Roman political history, but much of our time will be given to study and analysis of

Roman concepts of national identity, moral and political thought, social hierarchies and dynamics, family, religion, and entertainment. To this end, we will examine a diverse combination of primary sources - literary, documentary, and material.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

### L08 Classics 251 Projecting the Past: Ancient Greece and Rome in Modern Film

Since the earliest days of film, screenwriters and directors have mined the rich history of Ancient Greece and Rome to captivate audiences with tales of heroes and slaves, soldiers and lovers. This course will examine such cinematic representations across a variety of American and European films from the 20th and 21st century. Drawing upon translated selections from ancient Greek and Roman authors, secondary readings and weekly screenings, students will reflect upon the ways in which film adaptations of antiquity both tell us much about Ancient Greece and Rome and reveal as much about our present as they do the past.

### L08 Classics 3003 Writing Intensive in Ancient Studies

This is a Writing Intensive course involving the study of selected topics in Classics. Recent topics include The Banquet in Antiquity; The Art of Reading and Writing an Ancient Greek Vase; and Golden Ages, Nostalgia, and the Idealized Past.

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM EN: H

---

### L08 Classics 301C Greek Mythology

The myths of ancient Greece are not only inherently interesting, but they are an incomparable starting point for the study of the ancient world, and they have offered numerous images and paradigms to poets, artists, and theorists. This course provides an introduction to the major Greek myths, their role in literature and art, their historical and social background, and ancient and modern approaches to their interpretation. Student work will include discussing course material in sections and online, taking two exams covering both the myths themselves and the ancient authors who represent our richest sources, and writing several essays interpreting or comparing ancient literary treatments. 3 units.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM

---

### L08 Classics 3051 Orthodoxy and Heresy in Early Christianity

From the time Jesus of Nazareth preached in the rural countryside of Judea, his followers interpreted his words differently and wrote varied accounts of what he said and did. As time passed and as Jesus' movement grew into a world religion -- Christianity -- disagreement among Christians only continued to increase, leading to the need to define and enforce correct beliefs and practices to create a Christian "orthodoxy" embodied in the now-familiar institutions of creed, canon, and clergy. Yet in the process of creating an orthodoxy, what was left out? Whose voices were suppressed? Through the careful study of ancient texts that were long-ago deemed heretical and virtually lost until the 20th century, this course examines the wide varieties of Christianity in its nascent years and discusses how the framers of orthodoxy defined themselves against these alternatives.

---

**L08 Classics 306 Race and Identity in Greco-Roman Antiquity**

This seminar will start from one big question: Were the ancient Greeks and Romans white? We will examine this question -- and the questions that spring from it -- from two angles. First, using literary and archaeological evidence and informed by modern critical race theory, we will investigate how people living in the ancient Mediterranean understood difference: between themselves and others as well as among their own citizens. Did they have a concept of race at all? If not, how did they theorize difference? Second, we will study how and why the modern race system in the United States uses antiquity and racializes the premodern past. Students will write several short responses to sources over the semester and complete a research paper on a topic of their choice.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: ETH, IS EN: H

---

**L08 Classics 307F Historical Introduction to the New Testament**

What can be known -- from an historical perspective -- about the life and teachings of Jesus and his earliest followers? How did Jesus see himself and how did his followers see him? How did the lives, teachings, and deaths of Jesus and his followers come to form the heart of a new movement? If Jesus and the apostles were all Jews, how did Christianity emerge as a distinct "religion"? This course investigates these questions through a focus on the earliest sources for Jesus and his first followers, including and extending beyond the canonical books of the Christian New Testament. Our approach in this course is historical and literary, rather than theological or confessional: we ask what Jesus, his first followers, and their Jewish and "pagan" contemporaries did and believed, and we try to catch glimpses of the worlds in which they lived and the cultures which they took for granted.

Same as L23 Re St 307F

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM

---

**L08 Classics 3130 Sexuality in Early Christianity**

What did Jesus of Nazareth and his early followers teach about sexuality in terms of marriage, adultery, divorce, the virtues of procreation and celibacy, same-sex relationships, and erotic desire? How and why did ancient Christians take different stances on these issues, and how do these traditions continue to inform sexual ethics and gender roles today? In this course, we will study these questions by examining key passages from the teachings of Jesus in the Gospels, Paul's letters, writings of early church leaders, martyr propaganda, monastic literature, and apocryphal books deemed heretical. We will also consider the interpretations of contemporary historians of religion informed by recent trends in sexuality and gender theories.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: BA, ETH EN: H

---

**L08 Classics 3152 Gender and Sexuality in Greco-Roman Antiquity**

In this course, we will explore how ancient Greeks and Romans thought about gender and sexuality. We will consider questions such as: which traits and behaviors did the Greeks and the Romans associate with masculinity and with femininity? What can we tell from our sources about those who did not fit neatly into this binary? How did ancient Greeks and Romans think about male and female anatomy and psychology? How did the Greeks and the Romans construct sexuality and how did they approach homosexual and heterosexual relationships? How did they think about erotic desire? How did ancient laws and institutions circumscribe the lives of men and women, and how did they contribute to the construction of gender and sexuality? How did class, ethnicity, and age intersect with ideas about gender and sexuality in antiquity? We will read an array of ancient texts in translation, we will consider various theoretical viewpoints, and we

will move toward a better understanding of how gender and sexuality were constructed in antiquity. Ultimately, we will reflect on how our exploration of ancient ideas about these issues can help us understand better how we think about them today.

**L08 Classics 3153 The Women of Greek Tragedy**

This course examines the role of women in Athenian drama. Students will read English translations of the works of the three major tragedians -- Aeschylus, Sophocles, and Euripides -- and their near contemporary, the comedian Aristophanes. Direct engagement with ancient texts will encourage students to develop their own interpretations of and written responses to the political, social, and ethical manipulation that these mythological women were compelled to endure and the subtle ways in which they appear to exercise power themselves. Selected scholarly articles and book chapters will help students to contextualize these ancient dramas in their culture of origin. Because such issues continue to preoccupy both sexes today, students will see how Greek tragedy addresses perennial historical and cultural concerns through the examination of adaptations of Greek tragedies ranging from Seneca in ancient Rome to Spike Lee's "Chi-Raq" and Luis Alfaró's "Mojada: A Medea in Los Angeles." The final research paper will encourage students to consider how a specific female character from antiquity is transformed for a "modern" dramatic audience.

**L08 Classics 3212 Art & Archaeology of Cleopatra's Egypt**

This course is an introduction to the art and archaeology of Egypt from its conquest by Alexander the Great (332 BCE) to the early fourth century CE. It will examine the rich and multi-faceted history and artistic legacy of Egypt under the Ptolemies and their last queen Cleopatra, followed by the Roman conquest under Emperor Augustus up to the flourishing of Egyptian Christianity. Students will become familiar with a wide range of ancient sources, including documentary and literary texts, coins, architecture, paintings and sculpture. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215), or permission of instructor.

**L08 Classics 3231 Jews and Christians in the Premodern World**

In modern times, it is common to think of Judaism and Christianity as two distinct, if historically connected, "religions." Increasingly, however, historians of ancient religions have thought more deeply about the implications of taking Christianity and Judaism in antiquity as more fluid and porous than we tend to think of them. In this upper division course, we will explore the ways in which the boundaries that early Christians attempted to draw between Christianity and Judaism remained unstable and incomplete. While the various efforts to establish early Christian identity led to the production of a variety of hermeneutical representations of the Judaeoi, these literary representations nevertheless often reflected, to various degrees, engagement with actual historical Jews/Judeans, who shared political, economic, and intellectual worlds with Christians. We will consider how early Christian discourse about Jews and Judaism informed and was informed by intra-Christian disputes and their negotiations of their relationships with the wider Greco-Roman culture. We will explore how Christian efforts to establish both continuity and difference between Judaism played a role in the construction of 'orthodoxy' and 'heresy,' as well as the way in which Christians re-appropriated Jewish texts, rituals, and ideas in their efforts to construct a Christian identity. We will also explore how this continued dynamic of difference and continuity continued into the Middle Ages.

**L08 Classics 3250 Pompeii: Cultural Mosaic of the Ancient Mediterranean**

This course will provide an in-depth survey of artistic, architectural, and archaeological material from the ancient town of Pompeii, a river port of middling size and importance in southern Italy with remains that were remarkably well preserved by the ash and pumice stones of Mt. Vesuvius during the eruption of 79 CE. Starting with an overview of its development -- an Oscan settlement under Greek and Etruscan influence that expanded after the conquest of the Samnite and then Roman armies -- students will explore all aspects of urban life through Pompeii's uniquely rich archaeological record, with a particular focus on the social, cultural, and ethnic diversity that can be difficult to detect and appreciate even in the much larger, wealthier, and more cosmopolitan capitals of the Roman Empire. Over the course of the semester, students will learn various methods for applying different types of material evidence (including wall paintings, sculpture, architecture, furniture, and graffiti) to a series of scholarly questions about key points of conflict and tension within society, such as local attitudes toward foreign cultures, resistance to imperialism, the marginalization of women and slaves, opportunities for social mobility, and religious censorship. By the end of the course, a dynamic and colorful mosaic of Pompeii will have emerged, far removed from the image of a static Roman town supposedly frozen in time. Prerequisite: L01 113 or permission of instructor.

---

**L08 Classics 326 Archaeology of Roman Slavery**

Slavery was a fundamental part of the ancient Roman world. In this course, we will survey various ways in which the institution of slavery played a critical role in shaping Roman society. Through an exploration of social, economic, legal, and cultural aspects of Roman slavery, we will pose questions of what it means to be a slave society, how the ubiquity of forced labor impacted the lives of ancient Romans, and the extent to which we can recover the experiences and subjectivities of enslaved people. Throughout the course, we will confront the interpretive problems posed by biased and/or scarce evidence and by assumptions we may carry as the inheritors of modern slaveries. A recurring theme we will explore is the extent to which evidence of slavery and the material traces of enslaved people's lives are visible in the archaeological record. At the end of the term, we will contextualize Roman slavery by comparing it with modern examples and by considering the legacy of ancient slavery in modern visual culture and representations of enslaved people. Prerequisites: Any 100- or 200-level course in art history or archaeology; or permission of instructor.

**L08 Classics 3330 Greek and Roman Painting**

This course provides a survey of the major achievements of ancient Greek and Roman painting, broadly understood and encompassing wall painting, panel painting, painted pottery, and mosaic. We will study monuments ranging over a millennium in time and located throughout the ancient Mediterranean. Particular attention will be paid to the social, political, and religious aspects of ancient Greco-Roman painting and to questions of innovation in artistic practice. Special emphasis will be placed on students' cultivation of the tools of art-historical analysis and of the presentation of that analysis in written form. Prerequisite: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215) or permission of instructor.

**L08 Classics 3563 Ancient Sport and Spectacle**

Ancient sport and spectacle seem both familiar and foreign to us today. We share the Greek obsession with athletic success, and we have revived their Olympic games-and yet the Greeks competed nude and covered in oil and included in their celebration a sacrifice of 100 oxen to Zeus. So too do we recognize the familiar form of the Roman arena, but recoil from the bloody spectacles that it housed. In this class we will examine the world of ancient Greco-Roman sport and spectacle, seeking to better understand both ancient culture and our own. We will consider Greek athletic competition, Roman gladiatorial combat, chariot racing, and other public performances. We will set these competitions in their social and historical context, considering both their evolution and their remarkable staying power.

---

**L08 Classics 3801 Ancient Greek and Roman Medicine**

This course introduces students to the practice and theory of medicine in the ancient Mediterranean, beginning in Egypt and continuing through Greece and Rome. It ends in the Middle Ages. Greco-Roman medicine will be our focus. How was disease understood by practitioners and, as far as can be reconstructed, by laypeople? What form did surgical, pharmacological, and dietetic treatment take? What were the intellectual origins of Greek medicine? The social status of medical practitioners? How was medicine written and in what terms did its practitioners conceive it?"

---

**L08 Classics 3831 Magicians, Healers, and Holy Men**

Magic is perhaps not one of the first words one associates with Greco-Roman antiquity. Yet for most individuals living in the ancient Mediterranean, including philosophers, businessmen, and politicians, magic was a part of everyday life. Casting spells, fashioning voodoo dolls, wearing amulets, ingesting potions, and reading the stars are just some of the activities performed by individuals at every level of society. This course examines Greco-Roman, early Christian, and Judaic "magical" practices. Students read spell-books which teach how to read the stars, make people fall in love, bring harm to enemies, lock up success in business, and win fame and the respect of peers. Students also look at what is said, both in antiquity and in contemporary scholarship, about magic and the people who practiced it, which helps illuminate the fascinating relationship between magic, medicine, and religion.

---

**L08 Classics 385W Comedy, Ancient and Modern**

In this course we will examine the nature of dramatic comedy and its role in society. We will read, discuss and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences? How have comic playwrights responded to issues such as class, gender, religion, and politics? Why does comedy have such power both to unite and to divide people? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy.

**L08 Classics 408 Sacred Ways and Holy Spaces: Athenian Religion and Topography**

From seashore to mountain top, ancient Athens was famous for being a landscape rich with myth and religion. In order to worship their gods with processions, sacrifices, and other acts of devotion, Athenians moved through, across, and within space as defined by such things as sacred roads, monumental gateways and altars, and even places considered so holy that one was forbidden to enter. This course will introduce students to the study of place (topography) and to the methods and evidence by which we can determine where specific buildings and sites were, how they were used, and what they signified. We will explore major sites like the Acropolis as well as a variety of other temples, shrines, and holy sites across urban and rural landscapes alike, each of which structured space in its own way. By examining a wide range of archaeological and textual evidence (c. 800 BC-AD 400), we will develop an integrated understanding of Athenian religious belief and ritual in the context of architecture and space. While this course will concentrate on the topography of architecturally definable religious sites, we will also explore religious practices (e.g., magic, early Christianity) that employed the landscape in fundamentally different ways than other parts of the Athenian religious system.

---

**L08 Classics 4230 The Reception of Egypt in the Graeco-Roman World**

Ancient Greeks and Romans found Egypt to be an exceptionally enthralling world, in terms not only of its physical features but also of its people, monuments, and traditions. This course will explore how different views of Egypt emerged in the Graeco-Roman world; it will also investigate the possible reasons for the remarkable popularity and allure of Egypt and things Egyptian as reflected in the writings of Greek and Roman authors as well as in the art and architecture of the Mediterranean world in Classical antiquity. In this seminar, we will read primary literary sources (in translation) that focus on the reception of ancient Egypt and, more specifically, its history, religion, and customs. Several of these sources also offer a privileged viewpoint to investigate how the perception of notable Egyptian figures -- chiefly Cleopatra -- was shaped by Rome to suit a specific agenda. In addition to the written sources, we will look at the artistic and archaeological evidence that best showcases the impact of Egypt's legacy on Graeco-Roman traditions. The readings assigned for each class will also provide a broad sample of secondary sources, consisting of some of the most significant scholarship on the image of Egypt in Classical antiquity.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

**L08 Classics 4235 Rome in Egypt: The Archaeology of an Oasis City**

This seminar will focus on the results of the archaeological fieldwork carried out at Trimithis / Amheida, a Graeco-Roman city in Egypt's Western Desert. It will investigate the available documentary and archaeological evidence, including a wealthy house with paintings inspired by Classical themes, a public bath built in the Roman tradition, a rhetorical schoolroom, pyramid-shaped Roman tombs, remains

of a temple, and one of the earliest churches discovered in Egypt so far. We will explore how this evidence compares with that from neighboring sites in Egypt's Western Desert as well as in the Nile Valley. The goal is to develop an appreciation and understanding of Romano-Egyptian architecture, Classical and late antique art in Egypt, and Egypt's religious, social, and cultural history. Students will also have the opportunity to familiarize themselves with notions of archaeological methods and practice, as adopted in the context of an Egyptian excavation project. Prerequisites: One course at the 100- or 200-level in Art History, Classics, or Archaeology recommended Same as L01 Art-Arch 4235

#### **L08 Classics 426 Ancient Athens**

Athens was one of the great cities of antiquity. From lavishly decorated marble temples on the Acropolis, to public office buildings and inscriptions in the Agora (civic center), to the houses of the living and the monuments for the dead, the city has left a rich record of her material culture. These buildings and objects, together with an exceptionally large number of literary and historical texts, make it possible to paint a vivid picture of the ancient city. The course concentrates on the physical setting and monuments of Athens, as revealed by both archaeology and texts, and how they functioned within the context of Athenian civic and religious life. PREREQUISITES: CLA 345C, CLA 350, OR PERMISSION OF INSTRUCTOR.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM

#### **L08 Classics 428 The Invention of the Image: From Classical Art History to Modern Visual Studies**

The scholarly field of Image or Visual Studies has developed in response to the widespread proliferation of images, both still and moving, in contemporary life. It distinguishes itself from traditional art history by examining visual representations of all types, not only works of high art, and by concentrating on the role those representations play in the formation of culture. Though most of the scholarship produced in this field focuses on the modern world, it depends upon ideas first developed in Mediterranean antiquity. This course has two primary goals. We will conduct an historical examination of practices and theories of image making from Near Eastern antiquity to modernity. In so doing, we will also carry out an historiographical survey of the major works in Image/Visual Studies, thereby gaining an appreciation for the wide range of methods of inquiry employed in this important field of research. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Same as L01 Art-Arch 428

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN: H

---

#### **L08 Classics 429 Art and Death in Ancient Rome**

Perhaps more than any other phenomenon, death spurred the creation of art in the ancient Roman world. The practice of materially commemorating the deceased -- of perpetuating the memory of the dead through the creation of funerary monuments designed to appeal to both intimate familial relations and the public at large -- stretched across Roman social boundaries and endured for many centuries. But death also frequently provided the subject matter of art even outside the confines of the funerary realm. The goal of this course will be to explore the complex relationship between art and death in the Roman world. It will range from early Rome to the end of the empire and the changes brought about by widespread conversion to Christianity. In conjunction with historical readings, the course will also engage

with theoretical texts in the anthropology and philosophy of death. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Same as L01 Art-Arch 429

Credit 3 units. A&S IQ: HUM EN: H

---

#### **L08 Classics 4350 Hellenistic Philosophy**

The Hellenistic Age, traditionally dated from the death of Alexander and his (Macedonian) Empire at 323 BCE to the birth of Augustus' (Roman) Empire in 31 BCE, gave the West three of its most innovative and influential schools of philosophy: Epicureanism, Skepticism, and Stoicism. This course investigates the central features of their thought. Special attention is paid to the still-relevant debates between the Stoics and Sceptics about the possibility of knowledge, to the disagreements among all three schools about the issues of freedom, responsibility, and determinism, and to their ethical theories. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

---

#### **L08 Classics 4376 Pictorial Illusion in the Ancient Mediterranean**

Among the many accomplishments in the history of Greco-Roman art, ancient writers especially valued the development of pictorial illusion. Pictorial illusion refers to the techniques of reproducing or approximating aspects of the visual perception of the material world on a two-dimensional surface. These include foreshortening, the application of highlights, and the indication of multiple points of depth in space relative to the picture plane. The purpose of the course is to explore the material, stylistic, and technical history of illusionistic painting practices in the ancient Mediterranean world from Classical Greece to Late Antique Rome and to seek to understand the cultural and social significance of those practices. In addition to examining specific historical questions in the development of ancient painting, the course will investigate trans-historical connections between vision, visibility, and methods of representation. Prerequisites: Either L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Same as L01 Art-Arch 4376

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

**L08 Classics 453 The Greek Symposium**

This course explores the history, archaeology, material culture, and sociology of the symposium in ancient Greece. While we will focus mainly on the archaic and classical Greek symposium, we will also examine its reception in the Roman world. In this context, we will study art and literature produced for the symposium, as well as representations of the symposium in literature, especially in lyric poetry, drama, and philosophical prose.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

**L08 Classics 462 Ancient Greek and Roman Music**

Music played a vital role in Ancient Greece and Rome. New resources and perspectives now allow us to appreciate the ancients' music better than ever before. This course addresses the nature of ancient music (instruments, melody and rhythm, modes), ancient attitudes towards music, and its contribution to public and private life. The focus throughout will be on our ancient sources, both literary and archaeological.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L08 Classics 4647 Ancient Madness**

In this course we will ask what madness meant in Greek and Roman culture. We will find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating, and categorizing people treated as mad. While we will concentrate on literary (particularly tragic and epic), philosophical, and medical texts, we will also look at visual representations and evidence from ritual and cult. An important part of our project will involve tracing the afterlife of classical ideas: the history of melancholia will ground this aspect of the course. Finally, we will consider how antiquity informs psychoanalysis (Oedipus, Antigone, Narcissus), and how ancient madness might partake in a critique of contemporary understandings of mental illness.

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

**L08 Classics 465 Topics in the History of Philosophy**

Study of individual philosophers or themes from the ancient, medieval, and/or modern periods. Examples: Spinoza, St. Thomas Aquinas, neo-Platonism, universals in ancient and medieval thought, ancient and modern theories of space and time. Prerequisite: 6 units in philosophy, or permission of instructor.

Same as L30 Phil 465

Credit 3 units. A&S IQ: HUM EN: H

---

**L08 Classics 4700 Ancient Greek and Roman Gynecology**

This course examines gynecological theory and practice in ancient Greece and Rome, from about the 5th century BCE to the 3rd century CE. The task is complicated by the nature of our evidence. Our surviving textual sources are authored exclusively by men, mainly physicians. They have a pronounced tendency to conceptualize the health and disease in terms of a single body, which was male by default. They distinguished female bodies from male primarily in reproductive aspects. How exactly did these physicians understand diseases of women and, as far as can be recovered, to what extent were their views represented among laypeople? What form did treatment take and what

was the social status of practitioners, both that of our extant sources and female practitioners whose voices have largely been silenced by the textual tradition? We will approach the study of Greek and Roman gynecology, first from the perspective of Greco-Roman medical views, then from the point of view of contemporary Western biomedicine. The limited nature of our sources will allow students to read the majority of surviving material. These primary readings will be accompanied by current secondary scholarship that explores these fascinating and often frustrating questions about the female body in ancient medical thought. All primary materials will be available in English translation. There will be an option for students with a background in Greek or Latin to form a satellite reading group. The course does not assume familiarity with Greek and Roman medicine more broadly.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L08 Classics 476 Money, Exchange, and Power: Economy and Society in the Ancient Mediterranean World**

From seaborne trade and banking to slavery and the impact of new technology, the economy of the ancient Mediterranean world constitutes a particularly dynamic field of study. To examine a society's underlying economics is to gain critical insight into those historical phenomena that are themselves the product of multiple, overlapping dimensions of human action and thought. This course engages directly with a fascinating array of primary evidence for economic behaviors, beliefs, structures, and institutions among the Romans, Greeks, and their neighbors. We will also explore the methodological challenges and implications of that evidence as well as a variety of modern theoretical approaches. This year our focus is mainly upon developments among the Greeks, ranging from the transformative invention of coinage to the rise of commercial networks centered around religious sanctuaries like Delos. PREREQ: CLA 341C OR 342C OR 345C OR 346C OR PERMISSION OF INSTRUCTOR.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

---

**L08 Classics 4763 Olympian Shadows: Macedon and its Neighbors in Antiquity**

The home of both Alexander the Great and Aristotle, Macedon was pivotal to the course of ancient Greek and Roman history and yet stood apart as a culturally and politically distinct region. Macedonian dynasts dominated the Hellenistic world and deeply shaped Roman reception of Greek culture, while others profoundly affected the intellectual life of antiquity. We will explore topics ranging from ethnicity, religion, and the nature of kingship to urbanization and Macedon's emergence as a great power until its subsequent transformation at the hands of the conquering Romans. We will pay special attention to Macedon's neighbors, especially Thrace and Illyria, as well as to Macedon's relationships with the Persian Empire and the Greek coastal colonies. PREREQUISITES: AT LEAST ONE SEMESTER OF CLASSICS 341C, 342C, 345C, OR 346C, OR INSTRUCTOR'S PERMISSION.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

**L08 Classics 480 Roman Coins and Their Stories**

This course will provide insights into everyday life in Rome and its territories through the evidence of the coins minted from the Roman Republic until the collapse of the Western Roman Empire in AD 476 and beyond. We will discuss general numismatics, starting with the history of coins and coinage, and we will understand how these small objects became an intrinsic part of the Roman way of life and what evidence they provide for daily life in Rome, from ideology to religion and from politics and culture.

## Greek

Visit online course listings to view semester offerings for L09 Greek.

---

### L09 Greek 101D Beginning Greek I

An introduction to Classical Greek (Attic), which will prepare the student to read texts in Greek History, Philosophy, and Medicine as well as the New Testament. This course builds the foundations for readings in Greek Tragedy, Comedy, and Lyric poetry. Our goal will be to develop reading knowledge as rapidly and efficiently as possible. By the end of the year the student should be reading continuous Greek prose.  
Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

---

### L09 Greek 102D Beginning Greek II

Continuation of the program begun in Greek 101D. Students will complete their initial study of Classical Greek grammar and will begin reading selections from ancient Greek authors. Prerequisite: Greek 101D, or permission of the instructor.  
Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

---

### L09 Greek 190D Intensive Beginning Greek I

An intensive study of Attic Greek.  
Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

### L09 Greek 210 Intensive Beginning Greek II

Completion of work begun in Greek 190D followed by readings in original Greek poetry and prose. Successful completion of Greek 210 will allow the student to proceed directly to Greek 318C. PREREQ: GREEK 190D OR PLACEMENT BY EXAMINATION.  
Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

### L09 Greek 317C Introduction to Greek Literature

Introduction to Attic prose through the reading of Plato's APOLOGY and related texts. Prerequisite: L09 102D or placement by examination.  
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

---

### L09 Greek 318C Introduction to Greek Literature

Introduction to epic poetry through the reading of selections from Homer's ILLIAD and ODYSSEY. Prerequisite: Greek 210, Greek 316C, or Greek 317C.  
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

---

### L09 Greek 400 Independent Study

Credit 3 units. A&S IQ: HUM EN: H

---

### L09 Greek 416 Hesiod

In this course, we will read substantial passages from the works attributed to Hesiod, an archaic period Greek poet whose style and subject matter are often contrasted to Homer, and whose influence on Greek literary culture was second only to Homer's. Hesiod's two major poems - Theogony and Works and Days - form important evidence for the Greek rhapsodic tradition, and the mythological content and compressed styles of these mini-epics strongly influenced later Hellenistic Greek and Roman poets. Through discussion of readings from recent scholarship, we will consider topics including the authorship and dating of the Hesiodic corpus, Hesiod's Near-Eastern influences, oral poetics, mythography, genre studies, and narratology. Preparation of substantial Greek reading assignments will be supplemented with frequent practice of scansion (both written and oral) and the parallel development of sight translation skills. Students will be responsible for the development of a portfolio consisting of written translations, creative and interpretive mini-projects, a commentary, and an original research project.  
Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H

---

### L09 Greek 421 Sophocles

In this course, we will read closely two plays by Sophocles: OEDIPUS REX and TRACHINIAN WOMEN.  
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM EN: H

---

### L09 Greek 422 Euripides

The tragedies of Euripides are among the most powerful dramas ever produced. In this class we will read one or more plays of Euripides in Greek as well as scholarly works on the tragedies. Among the topics discussed will be language and style, meter and music, mythological and historical backgrounds, elements of performance, and Euripides' influence in the modern world. PREREQUISITES: GREEK 318C OR PERMISSION OF THE INSTRUCTOR AND SOPHOMORE STANDING OR ABOVE.  
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

---

### L09 Greek 423 Aeschylus

This course will focus on Aeschylus' SEVEN AGAINST THEBES and on the PROMETHEUS BOUND; in addition, we will look at a few fragmentary plays. Readings will include relevant secondary literature.  
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

---

### L09 Greek 430 Herodotus

The Histories of Herodotus are our most important source for a key period of Greek history and are also a delight to read. We will read in Greek sections from various parts of the Histories. Among the topics discussed will be Herodotus' attitudes towards cultural and ethnic differences, the accuracy of Herodotus' narrative, and Herodotus' literary techniques. PREREQUISITES: GREEK 318C OR PERMISSION OF THE INSTRUCTOR AND SOPHOMORE STANDING OR ABOVE."  
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM

---

### L09 Greek 431 Thucydides

Credit 3 units. A&S IQ: HUM

---

**L09 Greek 432 The Attic Orators**

More than mere prose, Attic oratory consists of a rich body of literature in which style was paramount to its persuasive aims, and provides vital evidence for Athenian culture, politics, mores, institutions, thought, and history. This course will survey a representative and important sample of forensic, epideictic, and symbouleutic speeches from classical Athenian oratory, and will give special attention to the social, legal and political context of these speeches. In addition, the class will focus on improving students' command of syntax, vocabulary and idiom as the basis for further development as well as the study of different orators and their style. Prerequisites: L09 317C & 318C or the equivalent.  
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

---

**L09 Greek 437 Topics in Greek Poetry**

Reading in Greek and discussion of one or more texts by one or more ancient Greek poets. May be repeated for credit for study of different texts.  
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM EN: H

---

**L09 Greek 438W Topics in Greek Literature**

Advanced Greek seminars with enhanced writing requirements may be taken under this designation as writing intensive courses. REQUIRED: PERMISSION OF INSTRUCTOR.  
Credit 3 units. A&S IQ: HUM

---

**L09 Greek 439 The Greek Novel:**

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L09 Greek 440 Lucian**

Lucian's TRUE HISTORIES is neither true, nor a history, but it is often called the first science fiction novel. Lucian's voice is one of the most distinctive in antiquity: wry, sarcastic, and too clever by half. He feels distinctly modern but is steeped in the literary tradition before him. In this class, we will read his TRUE HISTORIES and several other of his works, with a focus on his questions about truth and fiction, and his engagement with other genres of writing, including historiography, epic, philosophy, and rhetoric. We also read about the first journey to the moon.  
Credit 3 units. A&S IQ: HUM, LCD EN: H

---

**L09 Greek 445 Greek Prose Composition**

The tradition of writing in Attic Greek stretches from classical antiquity to the present. In this course, students will become connoisseurs of that tradition and enter into it themselves. In the process, they will become better Hellenists. Each week, students will review points of Greek grammar, compose Greek sentences illustrating those points, read and analyze the style of a Greek passage, and write an original Greek composition of their own device. We will focus not only on grammatical and idiomatic accuracy but also on elegance of style. In this course, students will develop a more nuanced understanding of the Attic Greek language in all its many-splendored glory. They will thereby increase their ability to read ancient Greek with depth, ease, and pleasure. Prerequisite: Greek 317C and Greek 318C or equivalent and sophomore standing or higher. Note: This course is required for MA and PhD students in Classics.  
Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H

---

**L09 Greek 451 Plato**

This course will focus on a set of Plato's dialogues known as his Early Dialogues. We will read two and perhaps three of the Euthyphro, Protagoras, and Meno in Greek. We will accompany these readings with a relatively small sample of secondary scholarship in English that aims at contextualizing the dialogues in the broader scope of Plato's work. Our aim will be to gain familiarity with Plato as a prose author as well as a philosophical thinker.  
Credit 3 units. A&S IQ: HUM EN: H

---

**L09 Greek 460 There Be Dragons: Greek Encounters with the Unknown in History and Legend**

How did ancient Greeks imagine their world, both in terms of geography and ethnography? What did they know -- or think they knew -- about foreign cultures and faraway lands such as India, Persia, Africa, and the distant north? How have their representations of foreigners influenced European conceptions of the self and others, even into our own time? This course examines these questions by focusing primarily on two foundational authors: first, Herodotus, the "father of history," who provides a wealth of information about ancient geography and the customs and lifestyles of non-Greek peoples; and second, Apollonius of Rhodes, whose epic poem "The Argonautica" tells the legendary tale of Jason and the Argonauts' search for the Golden Fleece. We will read extensive passages of these books in ancient Greek and, we will read and discuss additional passages in English translation, along with modern scholarship and atlases with historical and modern maps.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

**L09 Greek 471 Galen's "On Prognosis": A Social History of Medicine in Second-Century Rome**

Galen of Pergamum was a Greek physician, philosopher, and intellectual active throughout most of the second century CE. He was also a voracious reader and writer of Greek literature; his surviving work far exceeds the extant output of any other Greek author before the third century CE. In this course, we will be reading Galen's treatise "On Prognosis," in which he recounts his career in the city of Rome, from his arrival in the early 160s through his tenure as an imperial physician to at least the emperors Marcus Aurelius and Commodus. While ostensibly a medical account, "On Prognosis" has little to say on technical medical issues. Rather, Galen's story is a carefully constructed professional autobiography that pivots from searing denunciations of Roman life to tense public performances of medical expertise and finally to intimate case histories of Rome's rich and powerful. The text presents us a fascinating window through which to examine not only the social practice of elite medicine in Rome of the second century but also the complicated experience of a Greek intellectual navigating the corridors of the Imperial court. Course goals include improving accuracy and speed in reading Greek prose, acquiring greater familiarity with intellectual discourse of the Imperial Period, and training in methods of research and writing.  
Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM, IS EN: H

---

**L09 Greek 497 Study for Honors**

Students interested in pursuing honors should consult the Director of Undergraduate Studies in the Department of Classics. PREREQUISITE: OVERALL GPA OF 3.65.  
Credit 3 units. A&S IQ: HUM EN: H

---

**L09 Greek 499 Study for Honors**

Students interested in pursuing honors should consult the Director of Undergraduate Studies in the Department of Classics. PREREQUISITE: OVERALL GPA OF 3.65.  
Credit 3 units. A&S IQ: HUM EN: H

---

## Latin

Visit online course listings to view semester offerings for L10 Latin.

---

### L10 Latin 101D Beginning Latin I

An introduction to Latin, the language of Ancient Rome and the European Middle Ages and Renaissance, and the most important source of English medical and scientific terms. Beginning with the foundations of Latin grammar, students will work towards developing reading knowledge with the goal of reading literary texts. Students who have already begun their study of Latin should consult the Chair of the Department to discuss placement.

Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

---

### L10 Latin 102D Beginning Latin II

Continuation and completion of the program begun in Latin 101D. PREREQUISITE: LATIN 101D OR EQUIVALENT OR PERMISSION OF INSTRUCTOR.

Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

---

### L10 Latin 301 Introduction to Latin Literature I

Review of Latin grammar and syntax and development of reading skills and translation techniques through short readings from original texts in prose and poetry such as Caesar and Ovid. PREREQUISITES: LATIN 102D OR LATIN 190D, PLACEMENT BY EXAMINATION, OR PERMISSION OF INSTRUCTOR.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

---

### L10 Latin 3161 Introduction to Latin Literature II: Elementary Prose and Poetry

Appreciation of literary forms through study of selected elementary literary texts in Latin prose and poetry. PREREQUISITE: LATIN 301, PLACEMENT BY EXAMINATION, OR PERMISSION OF THE INSTRUCTOR.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

---

### L10 Latin 3171 Survey of Latin Literature: The Republic

A sampling of the major literary achievements of the last two centuries of the Roman Republic, including prose and verse authors. Readings are typically drawn from Catullus, Lucretius, Caesar, and Cicero. There will be regular, selective grammar review and discussion of translation strategies. PREREQUISITE: LAT 102D OR LAT 190D WITH A GRADE OF B+ OR BETTER, OR LAT 301 AND LAT 3161, OR PLACEMENT BY EXAMINATION.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

---

### L10 Latin 3181 Survey of Latin Literature: The Empire

Readings in the verse and prose literature of the Roman Empire, particularly its first two centuries, with targeted grammar review and stylistic analysis. Readings may be drawn from Vergil, Livy, Suetonius, or other appropriate authors. PREREQUISITE: LAT 102D WITH A GRADE OF B+ OR BETTER, OR LAT 301, OR LAT 3161, OR PLACEMENT BY EXAMINATION.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

---

### L10 Latin 370 Topics in Latin Literature

Study in selected problems, eras, or generic sequences; specific topic for each semester in Course Listings. May be repeated for credit for study of different topics. PREREQUISITES: LATIN 318C OR PERMISSION OF INSTRUCTOR.

Credit 3 units. A&S IQ: HUM BU: HUM

---

### L10 Latin 400 Independent Study

Credit 3 units. EN: H

---

### L10 Latin 4080 The Catilinarian Conspiracy

In this course we will study one of the most fascinating and best documented episodes of the late Roman Republic, the Catilinarian Conspiracy of 63-62 BCE. The conspiracy, an attempted coup led by the apparently dissolute and certainly disaffected aristocrat Catiline, was uncovered and suppressed by the consul Marcus Tullius Cicero. We will read the main literary sources for the conspiracy in Latin (Cicero's first and third Catilinarian speeches; Sallust's *Bellum Catilinae*) or in English (Cicero's second and fourth Catilinarian speeches; Cicero's *Pro Murena* and *Pro Sulla*; short extracts from other texts). We will consider these texts both as historical sources and as works of literature.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM

---

### L10 Latin 415 Cicero

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

---

### L10 Latin 416 Seneca

The tragedies of Seneca are fascinating works in themselves and have had a profound influence on modern theatre and literature. In this class we will read one or more plays of Seneca in Latin as well as scholarly works on the tragedies. Among the topics discussed will be the tradition of tragedy in Rome, questions of performance, and Seneca's responses to the politics and philosophy of his age. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

---

### L10 Latin 4161 Seneca: Philosopher and Friend

Seneca the Younger was a philosopher, politician, playwright, and propagandist; he rose from the province of Spain to become tutor and advisor to Nero, only to fall from favor and commit suicide at the emperor's command. We will study Seneca's life and works, focusing on the *Epistulae Morales* and select philosophical treatises. We will pay special attention to issues of language and style, cultural and historical context, and ideological and philosophical content. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

---

### L10 Latin 4215 Plautus

Readings from the comedies of Plautus. Discussion of play production in Republican Rome, reception, and interpretation. The advanced level Latin reading load will be supplemented by secondary readings, quizzes, and short reports. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

---

### L10 Latin 422 Lucretius

In this course, we will read selections from Lucretius' epic-didactic poem *ON THE NATURE OF THINGS*. The poem explains the basic tenets of Epicurean philosophy with a focus on the physical structure of the universe, the nature of the soul, and why we shouldn't fear death. There are many things in Lucretius that feel scientific in a modern sense, such as atomism and the absence of the gods. In fact, he has been accused of inspiring the Scientific Enlightenment, a charge we will acquit him of in this class. Special attention will be given to how Lucretius uses myth and poetry, the influence of earlier Roman epic poets such as Ennius, and his relationship with earlier Greek sources. No prior knowledge of Epicureanism or any philosophy is necessary; Lucretius will be happy to explain everything to you. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

---

**L10 Latin 431 Vergil: The Aeneid**

We will read books 2 and 3 of the Aeneid, in which Aeneas relates the fall of Troy and the strange series of events that leads him to Carthage and Dido. In addition to close analysis of Vergil's poetic practice in the context of the poem as a whole, we will consider ways in which he engages his epic forebear Homer.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

---

**L10 Latin 432 Horace**

This course examines Roman poetry that illuminates ancient and still-influential ideas about the functions of literature. Horace's monumental *Ars Poetica* and his other literary-critical works will be the major texts. These works convey the complexity of contemporary debates about literature's role in society and history and about the merits of various genres (epic, tragedy, comedy, satire, epigram). Readings in secondary sources will help to fill out the picture of Horace's career and of the climate of literary production in early Imperial Rome.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

---

**L10 Latin 433 Ovid**

In this course, we will read selections from the monumental and multifaceted "Metamorphoses of Ovid," which was composed before the poet's exile from Rome in 8 CE. Supplementary readings from Ovid's elegiac verse will give us a fuller picture of the poet's career and cultural context. Substantial daily Latin readings will be supplemented with practice of scansion, additional readings from related ancient works, and readings from modern scholarship on the poem. There will be regular translation quizzes, a final exam, student presentations, and a final research and writing project. Prerequisites: Latin 3171, Latin 3181 (or equivalent, and sophomore standing or above).

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

---

**L10 Latin 441 Roman Satire**

This course focuses on the genre of hexameter satire represented by the Roman poets Lucilius, Horace, Persius, and Juvenal (2nd century BCE - 2nd century CE). The Roman professor Quintilian called satire "entirely Roman" (*tota nostra*), and our readings will allow us to explore the meaning of this claim for satire's authors and readers. We will read a large sampling of satiric verse in the original Latin, practice reading the dactylic hexameter, and observe and discuss differences between the poets' styles and themes. We'll also read and discuss scholarship on the genre's formal characteristics and influences, its origins in Republican literary culture, and its development in the Imperial period.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

---

**L10 Latin 444 Latin Prose Composition**

Readings in select authors coupled with Latin composition, primarily in prose but occasionally in verse, with attention to grammatical and idiomatic accuracy as well as elegance of style.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

---

**L10 Latin 451 The Roman Historians**

Credit 3 units. A&S IQ: HUM

---

**L10 Latin 465 Silver Latin Epic: Lucan**

Lucan's epic poem about the civil war between Caesar and Pompey, written under Nero, investigates themes of individuality, citizenship, morality, and historical inevitability in Roman history. We will read selections from the poem, focusing on Lucan's literary models and poetic style; his treatment of the past and of historical figures

like Caesar, Pompey, and Cato; and Lucan's place in the political, philosophical, and literary world of Neronian Rome. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: IS EN: H

---

**L10 Latin 471 Elegiac Poetry**

In this course we will read a broad selection of the works of the Roman elegiac poets, focusing primarily on the works of Propertius, Tibullus, and Ovid. This course will emphasize the development of Roman elegy as a genre during the Augustan period, and will consider a range of literary topics related to elegy, including poetic voice and persona, fictionality, style, meter, intertextuality, and generic tropes, as well as the political, social, and cultural context(s) for these poems. Coursework will include translation and analysis of Latin texts, written assignments, and readings from scholarly literature on Roman elegy. Prerequisites: L10 3171 & 3181 or the equivalent.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

---

**L10 Latin 493 Readings in Latin Prose: Apuleius**

A survey of the major genres of Latin prose, history, oratory, and philosophy. Authors may include Caesar, Cicero, Seneca, Tacitus. Aim is to develop reading facility and understanding.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM EN: H

---

**L10 Latin 494 Topics in Latin Literature**

This course involves the study of selected problems, eras, or generic sequences; the specific topic for each semester can be found in the Course Listings. The course may be repeated for credit for the study of different topics.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM EN: H

---

**L10 Latin 494W Topics in Latin Literature**

Advanced Latin seminars with enhanced writing requirements may be taken under this designation as writing intensive courses. REQUIRED: PERMISSION OF INSTRUCTOR

Credit 3 units. A&S IQ: HUM, LCD, LS, WI EN: H

---

**L10 Latin 495 Topics in Republican Latin**

May be repeated for credit for study of different topics.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM

---

**L10 Latin 496 Tacitus**

Tacitus, the great historian and orator of the late 1st and early 2nd centuries CE, is one of our best sources for the early history of the Roman Empire. With his concise style and scathing political insight, Tacitus' writings influenced later authors from Ammianus Marcellinus to Macchiavelli. We will read selections from Tacitus' historical works, paying particular attention to: prose style; genre, rhetoric, and historiography; and Tacitus' critique of the Principate. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM EN: H

---

**L10 Latin 4961 Topics in Empire Latin**

May be repeated for credit for study of different topics.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

---

**L10 Latin 4963 Martial**

Martial, the prolific first-century Latin poet, left behind fifteen books of poetry. Martial's epigrams can be witty, sincere, caustic, and often quite sexually explicit. In this course, we will read a selection of Martial's epigrams in Latin, and we will discuss various themes related to

Martial's work, such as gender and sexuality, ancient conceptions of authorship and publishing, flattery, invective, and the many personae Martial adopts. We will also pay close attention to Martial's language and style, and we will discuss where Martial fits into the wider social and historical context.

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

#### L10 Latin 497 Honors Course I

Students interested in pursuing honors should consult the Director of Undergraduate Studies in the Department of Classics. PREREQUISITE: OVERALL GPA OF 3.65.

Credit 3 units. A&S IQ: HUM EN: H

---

#### L10 Latin 498 Honors Course II

Students interested in pursuing honors should consult the Director of Undergraduate Studies in the Department of Classics. PREREQUISITE: OVERALL GPA OF 3.65.

Credit 3 units. A&S IQ: HUM EN: H

---

## Ancient Studies Major Program Requirements

- **Total units required:** 24

Ancient Studies follows the Arts & Sciences minimum grade requirement of C- or better for courses that apply to the major. Students may apply up to a maximum number of 9 credits to their major earned through study abroad and/or transfer credits.

### Required Courses

Of the 24 required units, at least 18 units must be at the 300 level or above. Of these 18 units, at least 6 units must be at the 400 level or above.

In this major, students are encouraged to take at least one course in ancient history and to develop a certain depth in one special field of interest (e.g., art, history, literature, medicine, philosophy). Therefore, at least 9 of the 18 advanced units of the major should be taken in one such specific area.

Please consult the sections below regarding the required capstone experience and additional information.

### Required Capstone Experience

All Classics and Ancient Studies majors are required to complete a capstone experience in which they can synthesize what they have learned in their Classics courses. Except in unusual cases (e.g., a junior year abroad experience), the capstone experience should occur during the student's senior year. Among the most common capstone experiences are the following:

- A senior honors thesis (two semesters of research and writing concluding in a long paper)
- A one-semester research project
- A Classics study abroad experience
- Special work within a 400-level seminar

Students should consult with their advisor to see what kind of capstone experience will work best for them.

## Additional Information

### Study Abroad

Study abroad for a semester in Rome or Athens is an option many Classics and Ancient Studies majors select. Washington University is a member of the Intercollegiate Center for Classical Studies (ICCS) consortium. Majors and minors regularly attend the one-semester ICCS "Centro" program in Rome. Others choose to attend a semester at the College Year in Athens (CYA) program. Students interested in these programs should consult Professor Luis Salas. Some other study abroad programs will also allow students to earn major credit in Classics or Ancient Studies.

### Senior Honors

Students who are planning to pursue graduate work should enter the honors program, and other students are encouraged to consider this program as well. To apply, a student must have junior standing, an average of an A- or better in Greek and/or Latin courses (for Classics majors) or in Classics courses (for Ancient Studies majors) numbered 300 or higher, an overall grade point average of 3.65 or higher, and permission of the chair. A formal application should be submitted in April of the junior year. A thesis of substantial nature and length is prepared and written under the direction of a member of the department, beginning during the fall semester of the senior year. A final draft is submitted to the director no later than February 1 of the senior year, and a final copy is submitted to the full thesis committee before Spring Break of the senior year. Credit of 6 units is awarded upon presentation of an acceptable thesis. These credits will be in addition to the 24 credits of the major; those students who complete senior honors will, therefore, graduate with a total of 30 credits in the major.

Contact: Luis Alejandro Salas

Website: <http://classics.wustl.edu>

## Classics Major Program Requirements

- **Total units required:** 24

Classics follows the Arts & Sciences minimum grade requirement of C- or better for courses that apply to the major. Students may apply up to a maximum number of 9 credits to their major earned through study abroad and/or transfer credits.

## Required Courses

Students must complete 24 units; at least 18 of these units must be at the 300 level or above, and at least 6 of these 18 units must be in Greek or Latin at the 400 level or above. An additional 6 units must be in Greek or Latin at the 300 level or above.

The specific program will be determined by the student and the advisor, in accordance with the student's interests. Those who are able to enter the program at the advanced level because of previous language study will normally take 15 or more advanced units in language. Competence in both Greek and Latin — although strongly encouraged and necessary for those planning to go on to graduate study in Classics — is not required. Majors, especially those planning graduate work, should enter the Honors Program if time permits.

Please consult the sections below regarding the required capstone experience and additional information.

## Required Capstone Experience

All Classics and Ancient Studies majors are required to complete a capstone experience in which they can synthesize what they have learned in their Classics courses. Except in unusual cases (e.g., a junior year abroad experience), the capstone experience should occur during the student's senior year. Among the most common capstone experiences are the following:

- A senior honors thesis (two semesters of research and writing concluding in a long paper)
- A one-semester research project
- A Classics study abroad experience
- Special work within a 400-level seminar

Students should consult with their advisor to see what kind of capstone experience will work best for them.

### Senior Honors

Students who are planning to pursue graduate work should enter the honors program, and other students are encouraged to consider this program as well. To apply, a student must have junior standing, an average of an A- or better in Greek and/or Latin courses (for Classics majors) or in Classics courses (for Ancient Studies majors) numbered

300 or higher, an overall grade point average of 3.65 or higher, and permission of the chair. A formal application should be submitted in April of the junior year. A thesis of substantial nature and length is prepared and written under the direction of a member of the department, beginning during the fall semester of the senior year. A final draft is submitted to the director no later than February 1 of the senior year, and a final copy is submitted to the full thesis committee before Spring Break of the senior year. Credit of 6 units is awarded upon presentation of an acceptable thesis. These credits will be in addition to the 24 credits of the major; those students who complete senior honors will, therefore, graduate with a total of 30 credits in the major.

## Ancient Studies Minor Program Requirements

- **Total units required:** 15

Ancient Studies follows the Arts & Sciences minimum grade requirement of C- or better for courses that apply to the minor. Students may apply up to a maximum number of 6 credits to their minor earned through study abroad and/or transfer credits.

### Required Courses

Students select at least two courses from the following list:

Code	Title	Units
Classics 341C	Ancient History: The Roman Republic	3
Classics 342C	Ancient History: The Roman Empire	3
Classics 345C	Greek History: The Dawn of Democracy	3
Classics 346C	Greek History: The Age of Alexander	3

### Elective Courses

Students must complete at least 3 additional units at the 300 level or above. Students must earn a grade of C- or better in all courses.

Contact: Luis Alejandro Salas  
Phone: 314-935-5183  
Email: classics@wustl.edu  
Website: <http://classics.wustl.edu>

## Classics Minor Program Requirements

- **Total units required:** 15

## Required Courses

Code	Title	Units
Greek 317C & Greek 318C	Introduction to Greek Literature and Introduction to Greek Literature	6
or		
Latin 3171 & Latin 3181	Survey of Latin Literature: The Republic and Survey of Latin Literature: The Empire	6

## Elective Courses

At least 3 additional units must be in Greek or Latin at the 300 level or above.

## Additional Information

Classics follows the Arts & Sciences minimum grade requirement of C- or better for courses that apply to the minor.

Students may apply up to a maximum number of 6 credits to their minor earned through study abroad and/or transfer credits.

## Comparative Literature and Thought

The Department of Comparative Literature and Thought houses two main units: Comparative Literature and Thought and Germanic Languages and Literatures.

Comparative Literature and Thought undergraduate programs include the following:

- Comparative Literature and Thought Major (p. 458)
- Comparative Literature and Thought, Comparative Arts Specialization Major (p. 459)
- Comparative Literature and Thought Minor (p. 462)
- Data Science in the Humanities Minor (p. 462)
- Legal Studies Minor (p. 463)
- Medieval and Renaissance Studies Minor (p. 464)
- Translation Studies Minor (p. 464)

Germanic Languages and Literatures undergraduate programs include the following:

- Germanic Languages and Literatures Major (p. 461)
- Germanic Languages and Literatures Minor (p. 463)

Phone: 314-935-4276  
Email: [complitandthought@wustl.edu](mailto:complitandthought@wustl.edu)  
Website: <https://complitandthought.wustl.edu/>

## Faculty

### Chair

**Matt Erlin**  
Professor of German  
PhD, University of California, Berkeley

### Director of Graduate Studies

**Caroline Kita**  
Associate Professor of German  
PhD, Duke University

### Directors of Undergraduate Studies

**André Fischer**  
Assistant Professor of German  
PhD, Stanford University

**Joseph Loewenstein**  
Professor of English  
PhD, Yale University

### Department Faculty

**Jami Ake**  
Teaching Professor  
PhD, Indiana University

**Aylin Bademsoy**  
Assistant Professor of Germanic Languages and Literatures  
PhD, University of California, Davis

**Nancy E. Berg**  
Professor of Modern Hebrew Language and Literature (Affiliated Faculty)  
PhD, University of Pennsylvania

**J. Dillon Brown**  
Associate Professor of English (Affiliated Faculty)  
PhD, University of Pennsylvania

**Jianqing Chen**  
Assistant Professor (Affiliated Faculty)

### **L16 Comp Lit 1023 Beethoven in His Time and Ours**

Ludwig van Beethoven not only composed some of the most significant works of Western classical music -- he continues to make his mark as the prototypical "troubled genius," symbol for a wide range of political causes, subject of numerous films, and classical music's main representative in American pop culture. We will begin with an exploration of Beethoven's life, music, and historical context and continue by tracing how, after his death, Beethoven became a cultural hero whose image took on a life of its own. Throughout, we will unravel the interaction of music, culture, and mythmaking. No previous musical experience required.

### **L16 Comp Lit 1024 Mozart: The Humor, Science, and Politics of Music**

Wolfgang Amadeus Mozart is one of the most recognized composers of classical music and has come to symbolize beauty, "genius," and technical perfection. In this course, we'll peer behind this beauty and discover that Mozart speaks to some of our most complex present-day concerns. Mozart's music reflects the world of the Enlightenment, as well as challenges to its beliefs about reason and human nature. He also created musical comedies that make provocative, strikingly contemporary statements about power, gender, privilege, and sexuality. And, he delighted in musical engineering challenges and thought carefully about how we perceive music. Our focus works will range from symphonies and piano music to musical theatre. We'll also explore Mozart's afterlife: how his music has figured in film and popular culture. This course is open to all - no previous musical experience is required.

---

### **L16 Comp Lit 1115 First Year Seminar: Engaging the Classical Past in Modern Fiction**

This course will explore the persistent -- but often camouflaged -- influence of classical antiquity on modern genre (popular) fiction. Students will read and discuss both texts from antiquity (e.g., Ovid's "Metamorphoses," Lucian's "A True History") and selections from the works of major 20th-century authors drawn from the canon of a specific genre. Although popular fiction embraces a wide range of authors and styles, genres that are particularly engaged with the classical past include science fiction (e.g., Jules Verne, Suzanne Collins), fantasy (e.g., J.R.R. Tolkien, Rick Riordan), horror (e.g., H.P. Lovecraft, Stephen King), mystery (e.g., Elizabeth Peters, Steven Saylor), and adventure (e.g., Clive Cussler, David Gibbins). Discussion of these texts will include theorization about the nature of the genre and its origins as well as specific examples of allusions and intertexts to ancient Greek and Roman authors, focusing on the characters, artifacts, monsters, themes, legends, and plot devices drawn from Greco-Roman mythology or modern mythology about Classical antiquity. Course is for first-year, non-transfer students only.

---

**L16 Comp Lit 137A First Year Seminar**

The destructive, scandal-ridden career of the Roman emperor Nero (mid-1st century CE) almost defies belief. From his assumption of power as a teenager to his suicide after a military revolt, Nero flouted political and cultural conventions left and right. His inspiring debut notwithstanding, he killed off his family and mentor, held wild parties, poured money into extravagant projects, and neglected state business to pursue a career on stage. He came to be labeled one of the "Bad Emperors," and seen as a symbol of the decline of Rome itself - especially by sympathizers of the Christians he persecuted. Yet Nero as an emperor and a literary character was also a creation of his time. The figure of Nero is examined in his context. The central text is the Life of Nero by Suetonius (2nd century CE), a dense and colorful text read first in its entirety and then more carefully in pieces. Supplementary readings are from the abundant other sources on and interpretations of Nero, both ancient and modern. Discussions and writing assignments are varied and designed to develop analytical and writing skills. Same as L08 Classics 137

---

**L16 Comp Lit 200C Sanity and Madness**

We will consider explicit and implicit models of mental life, motivation, and action in works by authors studied in 201C. We will investigate how concepts related to madness are formulated and regulated in these literary texts and in the societies that produce them, and we will read scholarship from the 19th through 21st centuries that has debated the scale and scope of irrationality in ancient, medieval, and early modern cultures.

---

**L16 Comp Lit 201A AMP: Classical to Renaissance Literature**

Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer's Iliad is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin, and Italian, to poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Vergil, Ovid, Petrarch, and Shakespeare.

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

**L16 Comp Lit 211 World Literature**

This course teaches ways of reading literature across eastern and western cultures, introducing students to works of great imaginative power from many different regions of the world. The course focuses on a given historical period, such as the modern period or antiquity (the latter including Near Eastern as well as European texts). Organizing themes may include cultural translation, cross-cultural encounter (e.g., orientalism), hybridity, and displacement.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

**L16 Comp Lit 215C Introduction to Comparative Practice I**

This course permits the close examination of a particular theme or question studied comparatively, that is, with a cross-cultural focus involving at least two national literatures. Topics are often interdisciplinary; they explore questions pertinent to literary study that also engage history, philosophy, and/or the visual arts. Although the majority of works studied are texts, the course frequently pursues comparisons of texts and images (painting, photography, film). Requirements may include frequent short papers, response papers, and/or exams.

---

**L16 Comp Lit 228B Thatre Culture Studies I: Antiquity to Renaissance**

This course is a survey of ancient, medieval and Renaissance theater and performance: in both the West and in the East, as it both reflects and shapes culture. Coverage will include the following areas: ancient Greece, ancient Rome, classical Sanskrit theater, Yuan China, medieval Japan, medieval Europe, Renaissance Italy, and Renaissance England. Both scripted theater and performance practices will be examined through the lenses of dramatic literature, theater history, performance studies, and dramatic theory. A continual emphasis will be on marginal and underrepresented figures, as we will attempt to excavate forgotten histories from the theatrical past.

Credit 3 units. Art: HUM BU: HUM

---

#### L16 Comp Lit 301C Greek Mythology

The myths of ancient Greece are not only inherently interesting, but they are an incomparable starting point for the study of the ancient world, and they have offered numerous images and paradigms to poets, artists, and theorists. This course provides an introduction to the major Greek myths, their role in literature and art, their historical and social background, and ancient and modern approaches to their interpretation. Student work will include discussing course material in sections and online, taking two exams covering both the myths themselves and the ancient authors who represent our richest sources, and writing several essays interpreting or comparing ancient literary treatments. 3 units.

#### L16 Comp Lit 3040 Introduction to Digital Humanities

It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed, and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork will be supplemented by class presentations and a small assigned group project.

Same as L93 IPH 312

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM

---

#### L16 Comp Lit 3050 Literary Modernities in Europe and America: Text and Tradition

The course examines the various facets of modernity in major works of European, Eurasian, and, sometimes, American literature from the early 17th century to the 1920s, starting with "Don Quixote." We will explore, among other things, the eruption of the novel, the secularization of autobiography, the literary discovery of the city, and the rise of literary and aesthetic criticism that takes literature and art seriously as political and social institutions. In addition to literary works, the course will engage with two or three important models of critical practice (e.g., Wollstonecraft's "Vindication of the Rights of Women"; Marx's "German Ideology"; Freud's "The Interpretation of Dreams"; Eliot's "Tradition and the Individual Talent"; or perhaps that great work of fictionalized literary criticism, Borges' "Pierre Menard, Author of the Quixote").

Same as L93 IPH 3050

---

#### L16 Comp Lit 306 Modern Jewish Writers

What is Jewish literature? While we begin with -- and return to -- the traditional question of definitions, we will take an unorthodox approach to the course. Reading beyond Bellow, Ozick and Wiesel, we will look for enlightenment in unexpected places: Egypt, Latin America, and Australia. Recent works by Philip Roth, Andre Aciman, Simone Zelitch and Terri-ann White will be supplemented by guest lectures, film, short stories and significant essays. We will focus on issues of language, memory and place. Background knowledge is not required, though it is warmly welcomed.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

#### L16 Comp Lit 306C Voice, Language and Power: Late Medieval Religious Writing

In the later Middle Ages, there is a flowering throughout Christian Europe of religious writings that offer a new voice in which personal religious experience can be pursued and expressed. Their voices are mainly intended to be communal ones, to be contained within the Church and regulated by it. But in each case the fact that it is a voice may offer a mode of resistance, or of difference. Such writing is often aimed at lay people, sometimes exclusively at women; and sometimes the intended auditors become the authors, and propose a version of religious experience that claims a new and more intimate kind of power for its readers. This course looks at a wide range of such writing in vernacular languages read in translation (English, French and German), including the work of Meister Eckhart, Marguerite Porete, Margery Kempe, Julian of Norwich, Eleanor Hull, the anonymous writer of *The Cloud of Unknowing* and the perhaps pseudonymous William Langland, author of *Piers Plowman*. Whether such writing seeks to be orthodox or conducive to heresy, it presents a challenge to the power of clergy - a challenge that is written in the vernacular language of lay people, rather than clerical Latin, and in doing so offers distinctively new voices for religious experience. The course will also look at ways in which such work might have been influenced, if only oppositionally or at times indirectly, by contact with Muslim and Jewish writing (including Jewish exegesis of the Psalms).

#### L16 Comp Lit 3071 Caribbean Literature in English

Rum! Fun! Beaches! Sun! This is the image of the Caribbean in America today. This course will survey literature and culture from these islands, looking both at and beyond this tourists' paradise. It will aim to introduce students to the region's unmistakably vibrant tradition of multicultural mixture, while keeping an eye on the long history of slavery and rebellion out of which the islands' contemporary situation formed. Along the way we will encounter a wide variety of texts, from the earliest writing focused on life in urban slums, to the first novel ever to have a Rastafarian as its hero, to more contemporary considerations of the region's uncertain place in a U.S.-dominated world. Toward the end of the course, we will also look at important films like *The Harder They Come* as well as discussing the most globally famous cultural product of the contemporary Caribbean: reggae music. The course will involve readings from multiple genres, and will cover authors such as C.L.R. James, Derek Walcott, Jean Rhys, V.S. Naipaul, Jamaica Kincaid, and Caryl Phillips.

**L16 Comp Lit 312C Topics in English and American Literature**

Starting with Allan Bloom's *The Closing of the American Mind*, a book that helped re-ignite the Culture Wars, this course will consider the debates and problems that pervaded American culture during the 1990s. From the end of the Cold War to the sexual scandals that rocked Bill Clinton's presidency, from the emergence of the Internet to the rise of grunge and rap, the 1990s were a time of vast change in American culture. It was a period when we, as a nation, reconsidered the legacy of

the 1960s, the Reagan revolution, and the end of the Cold War, a time of economic expansion and cultural tension. In our consideration of this period, we will take a multidisciplinary approach when tackling a variety of materials--ranging from literary fiction (Philip Roth's *The Human Stain*, Jonathan Franzen's *The Corrections*) and popular films (Spike Lee's *Do the Right Thing* and *The Cohen brothers' The Big Lebowski*) to the music of Nirvana and Public Enemy--in an attempt to come to a better understanding of our recent history. Throughout the semester, we will pursue the vexed cultural, political, and historical questions that Americans faced in the years between the fall of the Berlin Wall and the terrorist attacks of September 11th, 2001, and consider how literary texts imagined this period of American history. **L16 Comp Lit 3132 Romantic Revolutions in European Music and Culture**

The early nineteenth century in Europe witnessed sweeping changes in social, political, and cultural life, but some of the most fascinating happened in music. This course considers intersections between Romantic thinking about music--which inspired an idealistic vision of the art form as a source of quasi-spiritual experience-- and other contemporary "revolutions." To what extent was Romantic music a "holy art" that offered a refuge from the world? In what ways was it a worldly participant in larger currents in society and culture? By exploring these questions and more, students will develop the skills and framework needed to incorporate works of music into their investigation of enduring issues in history and the humanities. Although this course will require listening and viewing of musical works, it is designed for students with intellectual curiosity but without prior musical background. We will also require weekly readings, occasional presentations, three short papers, and spirited class discussion.

**L16 Comp Lit 313A Topics in English Literature: Asian American Fictions: Space, Place, & the Makings of Asian America**

Called the "Age of Revolution," the Romantic Age of British literature, 1770-1830, witnessed the birth of new lyric forms, the effacement of traditional strictures on style and taste, and produced through poetic voice (and its quaverings and multiplications) what might be called, over simply, the modern subject. Within a developing discourse of human rights and personal freedom, this growing assertion through poetry of individual expressivity allowed William Blake to construct in a single work a visual and verbal "Jerusalem." It encouraged William Wordsworth to write a pathbreaking investigation of the sources of his own creativity that challenged conventional restraints on what topics can, and cannot, be confessed in poetry. Beginning with these two poets, we will consider the historical contexts, and the sometimes competing histories of ideas, that shaped the five major British Romantic poets: Blake, Wordsworth, Samuel Taylor Coleridge, Lord Byron, and John Keats. We will follow an anthology for much of the poetry, including the poems and prose of influential contemporaries (female as well as male) who included the political philosopher Edmund Burke and Mary Wollstonecraft. Texts also to be assigned will include Mary Shelley's *Frankenstein* and Byron's *Don Juan*.

**L16 Comp Lit 313B Nordic Noir Adaptations**

The past decade has seen an unprecedented passion for crime fiction, film and TV originating in the Nordic countries, such as Stieg Larsson's *"The Girl with the Dragon Tattoo"* and the TV series *"The Killing"* and *"The Bridge."* Before they are distributed in the United States, Scandinavian cultural products undergo a degree of adaptation via tactics ranging from translation to subtitling to the creation of

complete remakes. Many of these works are also subject to transmedial adaptation (e.g., from the page to the screen). In this course, we will use Nordic noir as a vibrant case study to consider the theoretical implications of adaptations across media and across cultures. In workshops, students will also gain exposure to the practical side of adaptation. No knowledge of Scandinavian languages is required to enroll.

### L16 Comp Lit 313E Introduction to Comparative Arts

Intro to Comparative Arts is an interdisciplinary, multimedia course that explores the relationship among the arts in a given period. In their written work, students will venture beyond the course material, alternately assuming the roles of artist, critic, and consumer. Students will attend (virtual and/or in-person) performances and exhibits. Ability to read music is not required.

### L16 Comp Lit 3153 The Women of Greek Tragedy

This course examines the role of women in Athenian drama. Students will read English translations of the works of the three major tragedians -- Aeschylus, Sophocles, and Euripides -- and their near contemporary, the comedian Aristophanes. Direct engagement with ancient texts will encourage students to develop their own interpretations of and written responses to the political, social, and ethical manipulation that these mythological women were compelled to endure and the subtle ways in which they appear to exercise power themselves. Selected scholarly articles and book chapters will help students to contextualize these ancient dramas in their culture of origin. Because such issues continue to preoccupy both sexes today, students will see how Greek tragedy addresses perennial historical and cultural concerns through the examination of adaptations of Greek tragedies ranging from Seneca in ancient Rome to Spike Lee's "Chi-Raq" and Luis Alfaro's "Mojada: A Medea in Los Angeles." The final research paper will encourage students to consider how a specific female character from antiquity is transformed for a "modern" dramatic audience.

### L16 Comp Lit 320A The Intellectual History of Race and Ethnicity

This course is designed to introduce students to a wide range of historical ideas, contexts, and texts that have shaped our understandings of race and ethnicity. We will examine the ways in which our definitions and categories of race and ethnicity have helped us to construct (and continuously reinvent) our sense of who counts as human, what counts as human behavior, the possibilities of artistic expression, the terms of political engagement, and our critical and analytical frameworks. Students should be prepared to do quite a bit of reading of some very challenging yet rewarding texts.

### L16 Comp Lit 331A Topics in Holocaust Studies

This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period--the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children--both those they considered "Aryan" and those they designated "enemies" of the German people, such as Jewish children - an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. OPEN TO FRESHMEN. STUDENTS MUST ENROLL IN BOTH MAIN SECTION AND A DISCUSSION SECTION.

**L16 Comp Lit 351 A World of Words**

This seminar is designed for undergraduate students who are interested in literature, foreign languages, creative writing, and translating. In the course students will enrich their studies in foreign languages, cultures and literatures with creative work. Participants will read and discuss practical criticism, present their own creative projects and hone their skills as writers, translators, and readers. At the conclusion of the course, students will have the choice of presenting a polished work of translation or a piece of original writing. Besides myriad possibilities for translating into and from English, the course can accommodate creative writers in English, Spanish, French, German, Korean, and Chinese. Students who wish to enroll in the course should contact the Program in Comparative Literature for further information. There is a limit of 14 participants to this class.

**L16 Comp Lit 3511 Global Surveillance Culture**

Surveillance in its most basic definition is often understood as watching someone from above and has proven to be one of the most effective ways of exercising power in political communities since the Middle Ages. If it is true, as the surveillance scholar David Lyon writes, that cultures of surveillance develop differently depending on their political economies and post-authoritarian or colonial past, a focus on the global circulation of surveillance imaginaries then raises the question of how such local differences are narrated, visualized or imagined. In this course, we will focus on the narrated differences within artistic and cultural expressions from Europe, Asia, Africa, North and South America to explore how local surveillance practices shape, disrupt or create global imaginaries. Surveillance and the linkages between its diverging cultures, as one might argue, then become a part of the globalization processes themselves. Against this backdrop, a focus on the global imaginaries of surveillance promises a unique inquiry into how local attitudes towards information collection, beliefs in (mass) monitoring, or values and desires associated with social media surveillance translate, shape, and intervene with the global. In final projects students will have the opportunity to work on a (digital) humanities project that explores the themes of "Sharing is Caring," "Counter-Surveillance," and "(In)Visibility in Surveillance Capitalism."

**L16 Comp Lit 352 Arts Reviewing**

What does it mean to become writers and public intellectuals who combine their creative work as poesis and praxis within a community of creative people? Writers will be asked to write about almost everything. Interviews, reviews, short essays, public speeches, radio plays, ekphrastic texts and staged works are among the many smaller forms with which an emerging writer has to engage. We will be writing in museums, writing in nature, performing on stage and exploring artistic collaboration. The course is designed for students who want to produce their own creative work and receive feedback, strengthening their personal writing skills as well as their creative and critical thinking. Throughout the course, students will discuss and analyze a variety of works, learn to read like writers, and deeply explore their senses, including reactions to and the incorporation of other forms of art. This experience and exposure to music, paintings architecture and nature e.g. can inspire writers to further their own expression via the multilayered genres of the written text. The course will engage with different professionals in the field of creative writing and investigate how to build a successful literary career. This course is open for first year students.

**L16 Comp Lit 3520 Introduction to Postcolonial Literature**

At its zenith, the British Empire encompassed almost a quarter of the globe, allowing the diminutive island nation unprecedented economic, military, and political influence upon the rest of the world. This course will introduce some of the foundational responses to this dominance, both literary and theoretical, by the colonized and their descendants. We will examine important critiques of colonialism by theorists such as Frantz Fanon, Aimé Césaire, Edward Said, Homi Bhabha, and Gayatri Spivak, as well as literary works that reflect a postcolonial critique by authors such as V.S. Naipaul, George Lamming, Doris Lessing, and N'gugi wa Thiong'o. The course will interrogate how literature could be said to help consolidate Empire as well as ways in which it might function as rebellion against imperial power, with a view toward teasing out the problematics of race, gender, language, nationalism, and identity that postcolonial texts so urgently confront. This course may fulfill the global or minority literatures requirement for students who declare an English major in the fall 2021 semester and beyond.

---

**L16 Comp Lit 3552 Introduction to Literary Theory**

This course introduces students to some of the most influential theoretical approaches to interpretation applied to English-language literature; to significant conceptual and historical debates about literary and cultural theory; and to the keywords used in these debates. Students will learn how to write and speak about theoretical texts and how to recognize the theoretical assumptions that underlie acts of literary interpretation. Theoretical approaches to be featured may include formalism; Marxism; psychoanalysis; gender and sexuality studies; structuralism and post-structuralism; postcolonial studies; critical race studies; new historicism and cultural materialism; cultural studies; affect theory; neurocognitive approaches; and disability studies. This course fulfills the literary theory requirement for the English major; no substitutions will be permitted. In order to preserve necessary seats for English majors, the course will be enrolled through the wait list.

**L16 Comp Lit 3556 Exile in Global French & Francophone Cultures: Senegal, Algeria, & the Caribbean**

French is the fifth most spoken language in the world, with an estimated 300 million speakers in 106 countries and territories. It is the only language aside from English to be spoken on five continents, according to the OIF. In the wake of decolonization and the rapid spread of globalization, the French language has been adopted, adapted and transformed in various locales and with widespread cultural implications. This course will aim to explore French culture through the specific case studies of Senegal, Algeria, the Caribbean and Francophone exiles worldwide. We will explore the history, literature, poetry and film of these regions and, in doing so, gain a more nuanced and complex understanding of global French cultures. In this course, we will study a range of works that will provide a window onto the issues of French cultural and national identity in the modern world. We will delve into the role of race, ethnicity, belonging and identity in global French and Francophone societies. Students will gain an understanding of French (post)colonial history and current French politics and culture through novels, poetry and film. Knowledge of French is not required for this class.

**L16 Comp Lit 3561 Exodus**

We will investigate the biblical book of Exodus in both its original significance in the ancient Near East and its later meanings for Jews, Christians, and Muslims in societies around the world. Why did its narratives and ideas about law and justice and religion resonate so strongly both in biblical times and afterwards? Which assumptions did the biblical authors make about writing stories and poetry? What is the historical reality of the Exodus? How did the biblical Israelites conceive of their religious practices and institutions? We will also explore how Exodus and the celebration of Passover has been, and continues to be, a crucial source of identity in Jewish and Christian circles. How has Exodus been re-imagined and transfigured multiple times, and

how has the Passover celebration reflected transformations in the understanding of the Exodus? We will analyze many types of expression influenced by Exodus: historical sources, liturgy, art, commentaries, theology, literature, film, mysticism, and music.

---

**L16 Comp Lit 359 Travelers, Tricksters, and Storytellers: Jewish Travel Narratives and Autobiographies**

Jewish literature includes highly fascinating travel accounts and autobiographies that are still awaiting their discovery by a broader readership. In this course, we will explore a broad range of texts originating from the Middle Ages to the 19th century. They were written by both Ashkenazi and Sephardi Jews hailing from countries as diverse as Spain, Italy, Germany, and the Ottoman Empire. Among the authors were pilgrims, rabbis, merchants, and one savvy businesswoman. We will read their works as responses to historical circumstances and as expressions of Jewish identity, in its changing relationship to the Christian or Muslim environment in which the writers lived or traveled. Specifically, we will ask questions such as: How do travel accounts and autobiographies enable their authors and readers to reflect on issues of identity and difference? How do the writers produce representations of an "other," against which and through which they define a particular sense of self? This course is open to students of varying interests, including Jewish, Islamic, or Religious Studies, medieval and early modern history, European or Near Eastern literatures. All texts will be read in English translation. Please note: L75 559 is intended for graduate students only.

**L16 Comp Lit 369A Reading Sex in Premodern England: Medieval Sexualities**

This course introduces students to the literary representation of gender and sexuality in England from the medieval period to the eighteenth century. To understand a tradition that addressed the intractable problem of human sexuality in terms very different from ours, we will ask: how does pre-modern culture imagine gendered identities, sexual difference, and erotic desire? How do various contexts—medical, religious, social, private, public—inform the literary representation of gender and sexuality? What are the anatomies and economies of the body, the circuits of physical pleasure, and the disciplines of the self that characterize human sexuality? Students will have the opportunity to study romances, saints' lives, mystical writings, diaries, plays, sex guides, novels, and scientific treatises. By learning how to "read sex" in pre-modern literature, students will acquire a broad cultural and historical understanding of English sexualities before the descent of modern sensibilities.

**L16 Comp Lit 376 Reading Across the Disciplines: Introduction to the Theoretical Humanities**

What does theory look like in an age like ours so sharply marked by interdisciplinarity and in which most humanities scholarship crosses disciplines—for instance, combining literature or history with philosophy or critical race studies? In this way all (or almost all) humanities scholars are comparatists in practice if not always in name. The course is designed to introduce this complex and exciting state of affairs to CompLit and English majors, yet any students in a humanities program, or with an interest in the humanities, will fit right in. Our main text is *Futures of Comparative Literature*, ed. Heise (2017), which contains short essays on topics like Queer Reading; Human Rights; Fundamentalism; Untranslatability; Big Data; Environmental Humanities. We will supplement this material with relevant short texts from a variety of fields, including some that cross over into the social sciences.

**L16 Comp Lit 385A Comedy, Ancient and Modern**

In this course we will examine the nature of dramatic comedy and its role in society. We will read, discuss and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences? How have comic playwrights responded to issues such as class, gender, religion, and politics? Why does comedy have such power both to unite and to divide people? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy.

**L16 Comp Lit 389A Topics in African Literature**

Beginning with a survey of African oral narratives, then analyzing selected texts by such leading African authors as Chinua Achebe, Ngugi waThiong'o, Wole Soyinka, and Ousmane Sembene, this course will examine ways in which African narrators have represented the struggle to uphold African identity in the face of such insidious influences as individualism, colonialism and neo-colonialism. Translations from indigenous African languages will supplement the study of works originally written in English. Critical issues in African literature such as the role of literature in society and the issue of language and audience in multilingual African societies will be discussed. The course will help students understand and appreciate the distinctiveness of African culture and encourage them to explore the meaning and complexity of that experience through the eyes of African narrators.

**L16 Comp Lit 394 Worldwide Translation: Language, Culture, Technology**

This course considers the crucial role played by translation across the world today: from new technologies and digital media, to the global demands of professionals working in fields as diverse as literature, law, business, anthropology, and health care. We will begin our exploration of the concept of translation as a key mechanism of transmission between different languages by looking at works of literature, and film. Students will then examine how different cultures have historically required translation in their encounter with each other, studying how translation constitutes a necessary transcultural bridge both from a colonial and postcolonial point of view in different historical moments and parts of the world. The course also analyzes from practical and real-world perspectives whether concepts such as war, human rights, democracy or various illnesses have the same meaning in different societies by considering the diverse frames of reference used by linguists, lawyers, anthropologists, and medical doctors across the world. Finally, we will focus on translation from a technological perspective by examining various modes of transfer of information required for the functioning of digital tools such as Google Translate, Twitter, Duolingo, or various iPhone applications. Throughout the semester we will also examine a range of creative artworks, and various forms of digital technology and computing (AI, machine translation) related to the theory and practice of translation. Readings will include works by Jorge Luis Borges, Walter Benjamin, Gayatri Spivak, Kwame Anthony Appiah, Susan Bassnett, Lawrence Venuti, Emily Apter, Gideon Lewis-Krauss, and Karen Emmerich among others. Prerequisite: None. Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

**L16 Comp Lit 395 Paris and New York: The Art of the City**

The cultural icons Paris and New York exert a powerful hold on our imagination. We will explore how the French and Americans define themselves, and each other, through their premiere cities. The themes of integration and isolation, class and race, innovation and tradition, and commemoration and celebration will ground our discussions of writers Zola ("Therese Raquin"), Wharton ("The Age of Innocence"), Proust ("Swann's Way"), Foer ("Extremely Loud and Incredibly Close"), Krauss ("The History of Love"), Truong ("The Book of Salt"), and Gopnik ("Paris to the Moon"); painters Vuillard, Caillebotte, and de Kooning; photographers Brassai, Cartier-Bresson, Doisneau, Ronis, Abbott, Hine, and Stieglitz; and filmmakers Godard ("Breathless"), Allen ("Manhattan," "Midnight in Paris"); Jeunet ("Amelie Poulain"), and Kassovitz ("Hate"). Through our study of public spaces (the Brooklyn Bridge, the Twin Towers, the Eiffel Tower, and the streets themselves), we will consider how each city functions as a site of memory even as it fashions the future. Credit 3 units.

---

**L16 Comp Lit 4012 Staging Atrocity: Theatre of the Holocaust**

Responding to the Holocaust has challenged artists working in every medium. Nowhere are these challenges more extreme than in the theater, where the intimacy of the space, the close proximity of live actors and audience, and the subject matter itself may serve to intensify its effect. We will read a careful selection of modern and contemporary dramas and explore the range of responses. Underneath each weekly topic reverberate the nagging question of whether one can -- or should -- make art from the Holocaust, as well as a serious exploration of the uses and effectiveness of theater to communicate on this subject. We look at the ways in which the Holocaust has been used as a subject to raise moral dilemmas, examine the limits of humanity, elicit doubt or faith, and provide political commentary. We will also discuss the ways in which playwrights have stretched the limits of the theater to meet the challenge of staging the Holocaust. Topics considered include the

nationalization and personalization of the Holocaust, the role of the second generation, issues of audience, and the use of experimental forms and obscenity. The plays on the syllabus are from North America, Israel and Europe. All readings are in English (original or translation). Same as L15 Drama 4011

**L16 Comp Lit 409C Beyond Geography: The Meaning of Place in the Middle East**

This course considers the importance of place in the Middle East with particular reference to Jewish and Islamic traditions. Topics to cover include the creation of holy sites, the concept of sacred space, the practice of pilgrimages, and the tropes of exile and return. Texts will range from analytical essays to novels, memoirs, and films by authors such as Edward Said, Naguib Mahfouz, Taher Ben Jelloun, Elif Shafak, A. B. Yehoshua, Shulamit Hareven, and Hanan Al-Shaykh. Requirements include participation, short assignments, and a seminar paper. This course fulfills the capstone requirement for students majoring in Jewish, Islamic and Near Eastern Languages and Cultures, but is open to advanced undergraduates and graduate students. Prerequisites: coursework in JINES and senior standing or permission of instructor. Same as L75 JIMES 409

**L16 Comp Lit 411 The Empire Writes Back**

Britannia did indeed once rule the waves, controlling an empire that encompassed a quarter of the globe. In the estimation of many, literature was a crucial component of its power. This course will examine the nature of Britain's cultural power, as well as the ways colonial authors answered back through an assertive rewriting of the British canon. We will read classic texts of British literature - Charlotte Brontë's JANE EYRE, E.M. Forster's HOWARD'S END, Joseph Conrad's HEART OF DARKNESS - in tandem with later reworkings of them by authors such as Zadie Smith and Jean Rhys, in order to tease out the implications of literary emendation and adaptation. The course

will also look at film versions of these works, as well as some critical theories of revision, hoping to shed light on both the opportunities and the pitfalls of attempting to critique a system of thought within the constraints of that very system.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

---

### L16 Comp Lit 4111 Pastoral Literature

This course will open with a survey of the classical tradition in pastoral/bucolic. We will consider questions of genre, intertextuality and ideology, and we will ask how 'the lives and loves of herders' became favored ground for literary meditation on issues of surface and depth, reality and illusion, artifice and sincerity. This portion will involve intensive reading in translation of Theocritus, Vergil and Longus. In the second half of the semester, we will consider the survival, adaptation and deformation of ancient pastoral themes, forms and modes of thought in British and American writing from the 19th and 20th centuries. We will read works of Mark Twain, Kenneth Grahame, Thomas Hardy and Tom Stoppard.

---

### L16 Comp Lit 4130 Modernity & Historicity in the Renaissance

Introduction to a pivotal period in the emergence of the modern consciousness by an intensive, sustained study of a few major Renaissance or "early modern" writers such as Petrarch, Castiglione, More, Erasmus, and Montaigne. The relationship of these authors to their ancient and medieval past, their "modernity," and their historical otherness. Of central concern is the nature of "humanism," imitative and antagonistic relationships with ancient texts, the complex Renaissance "self" as integral and individual or as a product of its cultural and material relations, utopias and anti-utopias, the discovery of historicity, and the state as a work of art. The course does not assume that its students have already done substantial work in the Renaissance.

---

### L16 Comp Lit 4140 Topics in Embodied Communication: Listening

This course is about listening. We will begin by mediated and unmediated listening with the human auditory system and continue into an exploration of multi-modal listening, focusing on vibration and on somatic attention. We will work in the "studio," which will include a music studio, a dance studio, and the environment. Our investigation will include the study of sensing in more-than-human organisms as well as theoretical perspectives from sound studies, critical improvisation and history of science. The course will encourage the perspective that the practice of listening is a political act of tending to the invisible, the non-normative, and the incomplete.

Same as L15 Drama 4140

---

### L16 Comp Lit 415A Music in the Romantic Era: Aesthetics and Ideologies

This course explores pivotal developments in 19th-century thinking about music's cultural and aesthetic significance -- developments that reverberate well beyond that historical period. Rather than surveying repertoire, we will emphasize in-depth exploration of selected issues and music, reading important contemporary writings and grappling with challenging musical works. Our topics will include discourses about musical interiority, the post-Beethovenian symphony, the Lied tradition, performance aesthetics and the creative agency of the

performer, intersections of music and literature, and canon formation and its consequences. Our topics will include, to cite but a few examples, discourses about musical interiority, the post-Beethovenian symphony, the Lied tradition, performance aesthetics and the creative agency of the performer, intersections of music and literature, and canon formation and its consequences.

### L16 Comp Lit 4204 Film Theory

This course is an introduction to both classical and contemporary film theory. Beginning with the earliest attempts to treat cinema as a new and unique art form, the course will initially review the various ways in which film theory attempted to define cinema in terms of its most essential properties. The course will then examine more contemporary developments within film theory, more specifically its attempt to incorporate the insights of other critical and analytical paradigms, such as semiotics, psychoanalysis, feminism, queer theory, and postmodernism. Throughout the course, we will consider questions regarding the ontology of cinema, its relation to spectators, and the various ways in which its formal properties create meaning. Readings for the course will include the major works of Sergei Eisenstein, Andre Bazin, Christian Metz, Laura Mulvey, and Fredric Jameson. Required screenings.

### L16 Comp Lit 425A Humanities by the Numbers

To what extent can computational techniques that draw on statistical patterns and quantification assist us in literary analysis? Over the semester, we will juxtapose the close reading of historical documents or literary works with the "distant reading" of a large corpus of historical data or literary texts. We will ask how the typically "human" scale of reading that lets us respond to literary texts can be captured on the "inhuman" and massive scales at which computers can count, quantify and categorize texts. While this class will introduce you to basic statistical and computational techniques, no prior experience with technology is required. Prerequisites: two 200 level or one 300-level course in literature or history. This is a topics-type course and the specific documents and works examined will vary from semester to semester. Please see semester course listings for current offerings. Same as L93 IPH 425

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L16 Comp Lit 426 Seminar in Dramatic Theory

This course is an in-depth exploration of core works of dramatic theory from the ancient world to the present, and it will introduce texts that enunciate what theater is, has been, and should be. We will study authors' expressions of theater's role in society, their articulations of and responses to anti-theatrical prejudice, and their negotiations of the contradiction of putting "the real" on stage. Other significant themes include accounting for the aesthetic pleasures of drama and theater; theater as a means of educating the citizen; and the relationship between dramatic form and social and political revolution. Moving chronologically, we begin with foundational documents of the ancient world, including Aristotle's "Poetics," Bharata's "Natyasastra," and Horace's "Ars Poetica." The course then progresses through the Middle Ages, the Neoclassical and Romantic eras, and the explosion of fin de siècle avant-gardes. We will also read key texts from beyond the European tradition, including works of dramatic theory written in medieval Japan (Zeami), postcolonial Nigeria (Soyinka), and the millennial, multicultural United States (Parks). Along these same lines, we will also be attuned to transnational exchange and influence, particularly as it appears in the 20th-century theories of Bertolt Brecht, Antonin Artaud, and Konstantin Stanislavsky. Although the course will be focused on efforts to describe and prescribe theories of drama, dramatic genre, and theatrical pleasure, it will also position play scripts alongside the theoretical treatises that guide or are guided by them. Credit 3 units. A&S IQ: SSC EN: S

---

### L16 Comp Lit 429 The Commedia Dell'arte

This course explores the history, style and dynamics of the commedia dell'arte: an originally Italian type of improvisational theater that has flourished from the time of Shakespeare to the present day. As we study, we will also put this theater on its feet. Students with a background and interest in improvisation are encouraged to take the class. (At the same time, no acting background is required to take the course--just a willingness to try.) We will examine primary and secondary texts regarding the Italian "golden age" of 1570-1625, and we will study the flowering of the commedia dell'arte in Paris during the seventeenth century. The influence of the commedia dell'arte on Shakespeare and Molière will be examined, and we will experiment with a new body of French scenarios from the time of Molière that have never before been translated into English. Questions of theater and performance history will be examined, as we consider various historical myths regarding this theater in the light of actual primary documents. We'll spend the final part of the course looking at political uses of this form of theater in the twentieth and twenty-first centuries, considering things like the San Francisco Mime Troupe, the radical socialist theater of Dario Fo, and the international Theater Hotel Courage that uses commedia-style performance for social change. Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

---

### L16 Comp Lit 4300 Data Manipulation for the Humanities

The course will present basic data modeling concepts and will focus on their application to data clean-up and organization (text markup, Excel, and SQL). Aiming to give humanities students the tools they will need to assemble and manage large data sets relevant to their research, the course will teach fundamental skills in programming relevant to data management (using Python); it will also teach database design and querying (SQL). The course will cover a number of "basics": the difference between word processing files, plain text files, and structured XML; best practices for version control and software "hygiene"; methods for cleaning up data; regular expressions (and similar tools built into most word processors). It will proceed to data modeling: lists (Excel, Python); identifiers/keys and values (Excel, Python, SQL); tables/relations (SQL and/or data frames); joins (problem in Excel, solution in SQL, or data frames); hierarchies (problem in SQL/databases, solution in XML); and network graph structures (nodes and edges in CSV). It will entail basic scripting in Python, concentrating on using scripts to get data from the web, and the mastery of string handling. Same as L93 IPH 430

Credit 1 unit. EN: H

---

### L16 Comp Lit 432A Programming for Text Analysis

This course will introduce basic programming and text-analysis techniques to humanities students. Beginning with an introduction to programming using the Python programming language, the course will discuss the core concepts required for working with text corpora. We will cover the basics of acquiring data from the web, string manipulation, regular expressions, and the use of programming libraries for text analysis. Later in the course, students will be introduced to larger text corpora. They will learn to calculate simple corpus statistics as well as techniques such as tokenization, chunking, extraction of thematically significant words, stylometrics and authorship attribution. We will end with a brief survey of more advanced text-classification terminology and topics from natural language processing such as stemming, lemmatization, named-entity recognition, and part-of-speech tagging. Same as L93 IPH 432

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

### L16 Comp Lit 435A Expressionism in the Arts

A close study of expressionism as an international phenomenon in the arts, from the anti-naturalist movements of the 1890s to Hitler's condemnation of expressionism as decadent. The evolution of expressionist theatre from Wedekind to Toller and Kaiser; such composers as Schoenberg and Berg; in the visual arts, such groups as Der blaue Reiter and Die Brücke, such independents as Kokoschka; in cinema, such figures as Pabst, Murnau, Von Sternberg, Lang. Prerequisite: Drama 208E, Drama 336, or permission of instructor. Same as L15 Drama 435

Credit 3 units. Art: HUM

---

### L16 Comp Lit 436 Seminar in Dramatic Theory

The course begins with Plato's critique of mimesis and Aristotle's defense, as we read THE POETICS as a response to Plato. We will take some of Aristotle's basic concepts, such as mimesis, plot, character, and thought, and attempt to apply them to drama up to the present day. We will also consider fundamental elements of both the dramatic text and the dramatic production, such as space, time, dialogue, narrative devices, and perspective. Brecht's theory of "epic drama" will form the other conceptual pole in the course, opposing Aristotle. Besides these two theorists, other figures will include Ben Jonson, Corneille, Dryden, Diderot, Schiller, Hegel, Zola, Artaud, and Grotowski. The course, then, will have both chronological and thematic axes. Three papers and one oral presentation. Credit 3 units.

**L16 Comp Lit 449 Topics in Comparative Literature: Writing from the Periphery: The Question of Chineseness**

In this course, we will read a broad range of literary works written by ethnic Chinese from various parts of the world. We will examine the notion of "Sinophone," primarily its implications to the challenge of cultural identity formation to those Chinese who are not traditionally identified as "Chinese" because of war, migration, immigration, colonialism, among others. We will also examine the meaning of being on the margins of geopolitical nation-states. Finally we will discuss the notions of hybridity and authenticity vis-a-vis literary representation. We will read works by ethnic Chinese writers from the United States, France, Taiwan, Hong Kong, Singapore, Malaysia, Mongolia, Tibet, and so on. This course is limited to seniors and graduate students only. All readings will be in English. Active class participation is required.

**L16 Comp Lit 4647 Ancient Madness**

In this course we will ask what madness meant in Greek and Roman culture. We will find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating, and categorizing people treated as mad. While we will concentrate on literary (particularly tragic and epic), philosophical, and medical texts, we will also look at visual representations and evidence from ritual and cult. An important part of our project will involve tracing the afterlife of classical ideas: the history of melancholia will ground this aspect of the course. Finally, we will consider how antiquity informs psychoanalysis (Oedipus, Antigone, Narcissus), and how ancient madness might partake in a critique of contemporary understandings of mental illness. **L16 Comp Lit 4692 Shakespeare and Performance**

How were Shakespeare's plays performed in their own day--in the Globe theater, with boy actors, and with very short rehearsal times? How, for the actor, did performance work on the outdoor stage, with the Globe's wide and deep acting platform and its intimate relationship to the audience? How might one stage Shakespeare today in an outdoor environment without lighting and with minimal sets, and with the capacity to move easily from one outdoor venue to another? From what social types in Renaissance England--such as merchants, prostitutes, aristocrats, constables, beggars, and princes--did Shakespeare draw? How can evolving ideas about race, gender, and sexuality inform the way we perform Shakespeare today? Addressing these questions and others, the course weaves together performance and literary, critical, and historical study. Topics include blank verse, performing Shakespeare's prose, playing with figures of speech, working the Globe stage, engaging an outdoor audience, acting from a written "part" rather than an entire script, performing types, exploring Shakespeare's sources as performance alternatives, making Shakespeare new--and more. Students will rehearse and perform sonnets, scenes, and monologues based on social figures from Shakespeare's England. The course assumes a willingness to perform but not specialized acting training.

**L16 Comp Lit 4750 Worldviews, World-Building, and World Literature: New Approaches to Chinese Literature (1500-1900)**

This course explores how the multivalent notion of "world" creates new approaches for studying Chinese literature from the 16th century up to the early 20th century. It will consider the following questions: How did the Chinese people perceive, map, and write about the world prior to modernity? What are the strategies to construct fictional, virtual, or gameful worlds through literature and other media? How and why should we position Chinese literature as world literature? Issues covered in this course include premodern worldviews, literary and transmedia world-building, multilingualism, adaptation, and translation. One primary goal of this course for students is to learn how to critically apply theories from narratology, media studies, and comparative literature to study Chinese literature. To this end, the first session will focus on a particular piece of theoretical work or relevant secondary scholarship, and in the second session students will conduct a case study with selected primary sources to practice employing, questioning, and complicating those theories and methods. All readings will be provided in English. Students with classical and modern Chinese skills will be encouraged to read materials in the original to the extent possible. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisites: junior level or above or permission of instructor. Same as L81 EALC 4750

**L16 Comp Lit 486 The Business of Books**

Book publishing shapes our literary and intellectual landscape in defining ways, yet only with the recent rise of Publishing Studies has the theory and practice of publishing become a serious subject of attention within the academy. This course offers a broad introduction to publishing, with a practical emphasis on contemporary literary publishing. We will explore how publishing communities form in relation to aesthetics, demographics, and technologies, and will consider how ethics and business practices are defined within these communities. On the applied side, we will study editing, contracts, marketing, sales & distribution, infrastructure, and media, and students will write reader's reports, marketing plans, and a final paper analyzing a contemporary publishing project and placing its work in relation to the historical and cultural context, demonstrating how each particular publishing practice is adapted to its own cultural ecosystem. Industry professionals will visit to speak with the class by Zoom, and Professor Riker brings two decades of experience as a book publisher, author, and reviewer. Alongside these other activities, over the course of the semester students will follow the progression of a book published by the nationally acclaimed publishing house Dorothy, a Publishing Project, of which Professor Riker is the publisher.

**L16 Comp Lit 493 The Unmaking and Remaking of Europe: The Literature and History of the Great War of 1914-1918**

The Great War of 1914-1918 is one of the most momentous events in history. We can approach its broad European import by reading its literatures comparatively. Far wider than the concerns of any one national ideology, the literature of record represents a profound crisis in the European cultural imaginary. A number of critical and interpretive issues will be in play in our readings, which will move through three

major phases. We begin with the powerful immediacy of trench poetry (1914-1919), develop into the constructed narratives of the great postwar novels and memoirs (1920-1931), and then turn toward the retrospect of the 1930s, which is also the prospect on the next, now inevitable, war. The authors featured include combatant and civilian writers, names well-known and not so famous: Mann, Apollinaire, Owen, Pound, Cocteau, H.D., Woolf, Maurois, West, Celine, Joyce, Musil, Eliot, Rosenberg, Sassoon, Graves, Hardy, Trakl, Stramm, Lichtenstein, Péguy, Barbusse, Manning, Jünger, Zweig, Brittain, and Kroner. All readings for class will be in English translation. Our secondary literature will provide approaches to specific texts and models of literary and cultural history that represent the longer-range importance of the war. Credit 3 units. **L16 Comp Lit 4970 Performance Theory**

This course introduces students to contemporary theories of performance, with "performance" understood as both metaphor and event. From a multi-disciplinary perspective, students will consider how cultures produce meanings-and, indeed, perform those meanings-to create and/or disrupt their own social coherence. Theories likely to be studied include: J. L. Austin's speech-act theory and its engagement by John Searle and Jacques Derrida; Victor Turner's analysis of ritual as social process and Richard Schechner's use of it to transform "theater studies" into "performance studies;" Erving Goffman's sociology of the self and its relation to a post-structuralist model of subjectivity; Michael Fried's screed against minimalist art and its relation to Happenings, Body Art, Fluxus, and other mid- to late-20th century examples of "performance art;" and Judith Butler's influential revision of Austin's performative in her theory of queer "performativity."

## Germanic Languages and Literatures

Visit online course listings to view semester offerings for L21 German.

---

**L21 German 101D Basic German: Core Course I**

Introductory program; no previous German required. Students will develop their competence in listening, speaking, reading, and writing German by means of interpersonal, interpretive and presentational communicative practice. This first course serves as an introduction to German grammar and culture; goals range from developing the communicative skills necessary to find an apartment to being able to read modern German poetry. Students will learn how to apply their knowledge of basic cases and tenses in order to hold a conversation or write a letter describing their interests, family, goals, routines, etc. and to discover personal information about others. Students who complete this course successfully should enter German 102D.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L21 German 102D Basic German: Core Course II**

Continuation of German 100D or 101D. In preparation for more advanced academic study in German, this second course will further introduce students to fundamental German grammar, culture and history. It is comprised of a combination of situational lessons and tasks which will challenge their critical thinking abilities. Students in 102D will familiarize themselves with the language necessary to understand and give directions, apply for a job, and speak with a doctor; students will also read more advanced content such as Grimm's fairy tales and a text from Franz Kafka. Prerequisite: German 100D, 101D, the equivalent, or placement by examination. Students who complete this course successfully should enter German 201D.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L21 German 201D Intermediate German: Core Course III**

Continuation of German 102D. This course is designed to expand and deepen students' understanding of modern German society and culture and to help them improve their skills in all four key areas of foreign-language learning: reading, speaking, listening and writing. All class discussions and assignments will be in German in order to provide students with an opportunity to expand their active and passive vocabulary and gain confidence in their ability to communicate in the language. Prerequisite: German 102D, the equivalent, or placement by examination. Students who complete this course successfully should enroll in German 202D.

Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H

---

**L21 German 202D Intermediate German: Core Course IV**

Continuation of German 201D. In preparation for study at the advanced level, this fourth-semester course will continue the four-skills based approach of 201D, focusing on a range of cultural topics relevant to the German-speaking lands, including diversity in modern German society, the media, local and national politics, and transatlantic relations. The course also includes additional review of grammatical

structures that will enable you to express yourself more fluently and idiomatically in German. All class discussion and assignments will be in German, in order to provide you with an opportunity to expand your active and passive vocabulary and gain confidence in your ability to communicate in the language. Prerequisite: German 201D, the equivalent, or placement by examination. Students who complete this course successfully should enroll in German 301D.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L21 German 301D Advanced German: Core Course V**

Discussion of literary and non-literary texts combined with an intensive grammar review. Systematic introduction to the expressive functions of German with an emphasis on spoken and written communication. In addition to the regular class meetings, students should sign up for a twice-weekly subsection. Prerequisite: German 202D, German 210D, the equivalent, or placement by examination. Students who complete this course successfully should enter German 302D.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L21 German 302D Advanced German: Core Course VI**

Continuation of Ger 301D. Refinement and expansion of German communication skills (speaking, listening, writing, reading), deepening understanding of German grammatical structures, acquisition of more sophisticated and varied vocabulary, introduction to stylistics through discussion and analysis of literary and non-literary texts. In addition to the regular class meetings, students should sign up for a twice-weekly subsection. Prerequisite: Ger 301D or equivalent, or placement by examination. Students completing this course successfully may enter the 400-level. Note that Ger 340C/340D, Ger 341/341D, or Ger 342/342D are a prerequisite for most 400-level courses.

Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L21 German 313 Conversational German**

Practice in speaking and vocabulary development in cultural contexts. Prerequisite: Ger 210D, equivalent, or placement by examination. May be repeated for credit.

Credit 1 unit. A&S IQ: LCD EN: H

---

#### **L21 German 331 Topics in Holocaust Studies: Children in the Shadow of the Swastika**

This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period—the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children—both those they considered "Aryan" and those they designated "enemies" of the German people, such as Jewish children - an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. OPEN TO FRESHMEN. STUDENTS MUST ENROLL IN BOTH MAIN SECTION AND A DISCUSSION SECTION.

#### **L21 German 340C German Literature and the Modern Era**

Introduction in English to German writers from 1750 to the present. Discussion focuses on questions like the role of outsiders in society, the human psyche, technology, war, gender, the individual and mass culture, modern and postmodern sensibilities as they are posed in predominantly literary texts and in relation to the changing political and cultural faces of Germany over the past 250 years. Readings include works in translation by some of the most influential figures of the German tradition, such as Goethe, Nietzsche, Freud, Kafka, Thomas Mann, Brecht, and Christa Wolf. Open to first-year students, non-majors and majors. Admission to 400-level courses (except 402, 403D, 404, and 408D) is contingent on completion of this course or 341/341D. The main course is conducted in English, so this will only qualify for major or minor credit when taken in conjunction with one-hour discussion section in German (L21 340D).

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, IS EN: H

---

#### **L21 German 340D German Literature and the Modern Era**

This course must be taken concurrently with 340C for major/minor credit. The discussion section provides an introduction to critical German vocabulary and is open to students with prior knowledge of German (210D or equivalent, or placement by examination.)

Credit 1 unit.

---

#### **L21 German 341 German Thought and the Modern Era**

In this introduction to the intellectual history of the German-speaking world from roughly 1750 to the present, we will read English translations of works by some of the most influential figures in the German tradition, including Kant, Hegel, Marx, Nietzsche, Freud, Adorno, Heidegger, Arendt, Habermas, and others. Our discussions will focus on topics such as secularization, what it means to be modern, the possibility of progress, the role of art and culture in social life, the critique of mass society, and the interpretation of the Nazi past. We will consider the arguments of these thinkers both on their own terms and against the backdrop of the historical contexts in which they were written. Open to first-year students, non-majors and majors. Admission to 400-level courses (except 402, 403D, 404, and 408D) is contingent on completion of this course or 340C/340D. The main course is conducted in English, so this will only qualify for major or minor credit when taken in conjunction with one-hour discussion section in German (L21 341D).

---

#### **L21 German 341D German Thought and the Modern Era**

This course must be taken concurrently with 341 for major/minor credit. The discussion section provides an introduction to critical German vocabulary and is open to students with prior knowledge of German (210D or equivalent, or placement by examination.)

Credit 1 unit.

---

#### **L21 German 342 German Literature and the Premodern Era**

In this introduction to the literary and intellectual history of the German-speaking world from roughly 800 C.E. to the 17th century, we will read English translations of some of the most influential authors and works in the medieval and early modern German tradition, including the "Heroic Age" (e.g., "Nibelungenlied"), the classical period of the 12th and 13th centuries (e.g., Walther von der Vogelweide, Wolfram von Eschenbach, Gottfried von Straßburg), late-medieval

philosophy and mysticism (e.g., Mechthild von Magdeburg, Meister Eckhart), and early modern humanism and the Reformation (e.g., Martin Luther). Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the German and European literary tradition; these are texts that continue to offer invaluable insights into humanity and the world around us. Our discussions will focus on concepts such as heroism, chivalry, and courtly love and on questions regarding the relationship between the individual and society, the role of religion in society, and the emergence of modern mass media (e.g., the Gutenberg revolution). We will consider the texts both on their own terms and against the backdrop of the historical contexts in which they were written.

---

#### **L21 German 351 A World of Words**

This seminar is designed for undergraduate students who are interested in literature, foreign languages, creative writing, and translating. In the course students will enrich their studies in foreign languages, cultures and literatures with creative work. Participants will read and discuss practical criticism, present their own creative projects and hone their skills as writers, translators, and readers. At the conclusion of the course, students will have the choice of presenting a polished work of translation or a piece of original writing. Besides myriad possibilities for translating into and from English, the course can accommodate creative writers in English, Spanish, French, German, Korean, and Chinese. Students who wish to enroll in the course should contact the Program in Comparative Literature for further information. There is a limit of 14 participants to this class.

Same as L16 Comp Lit 351

---

#### **L21 German 402 Advanced Grammar and Style Lab**

Take your German skills to the next level! This 1-unit lab is designed for advanced students seeking to master the finer points of German grammar and style through targeted exercises and discussion. Students will learn to construct sophisticated, elegant, and accurate sentences, with the goal of improving their effectiveness as writers and speakers of German. A rotating weekly focus will cover such topics as: complex sentence structures; advanced passive and subjunctive forms; idiomatic prepositional and verb phrases; and infinitive constructions. Prerequisite: German 302 or the equivalent.

Credit 1 unit.

---

#### **L21 German 403D Advanced Vocabulary and Usage**

This one-unit workshop is designed for advanced undergraduate students wishing to develop advanced communication skills by improving their grasp of German vocabulary and usage. Over the course of the semester, students will discuss a wide variety of texts related to German art, philosophy, literature and contemporary culture, focusing on specific aspects of the language that pose challenges for non-native speakers. Assignments (not to exceed 1.5 hours per week) will include short written responses and exercises aimed to help students speak and write more elegantly and idiomatically. Prerequisite: German 302 or the equivalent or permission of the Director of Undergraduate Studies.

Credit 1 unit.

---

#### **L21 German 404 Germany Today**

Introduction to the history, politics, and culture of contemporary Germany (1945 to the present). Topics include the cultural construction of identity in post-unified Germany; European integration and post-wall economy; the German constitution, electoral system and current elections; current debates and controversies; political parties and leading political figures; the role of literature, film, music, the visual arts, media and popular culture; the role of universities. Discussion, readings, and papers in German. Required for candidates planning to attend the overseas program in Tübingen, Germany. Prerequisite: Ger 302D (may be taken concurrently with Ger 404), or permission of the Director of Undergraduate Studies.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: IS EN: H

---

#### **L21 German 408D German as a Language of Business**

This course introduces students to concepts and issues relevant to German business and economics and helps them to develop the language skills necessary to succeed in the German business world. We will concentrate on the basic elements of the German economic system, looking at Germany as a site of production and exchange, the legal structure of German firms, the relations between labor and management, and strategies for product development and marketing in national and international contexts. Students will also be introduced to specific German business practices, including forms of communication, management styles, and general corporate culture. Students will learn business vocabulary, writing skills for business correspondence, oral presentation techniques, and reading and comprehension strategies for German newspapers and news reports. All discussions, readings, and assignments will be in German. Prerequisite: German 302D.

Credit 3 units. A&S IQ: LCD, LS BU: IS EN: H

---

#### **L21 German 4100 German Literature and Culture, 1150-1750**

Exploration of medieval and early modern literature and culture within sociohistorical contexts. Genres and themes vary and may include visual culture, representation, the development of fictionality and historical writing, questions of race, gender, and class, courtly culture, law, magic and marvels, medical and scientific epistemologies. Readings may include such genres as the heroic epic, drama, "Minnesang," the courtly novel, the Arthurian epic, fables, the novella, religious or devotional literature, witch tracts, pamphlets, political writings, the "Volksbuch," the picaresque novel, and the essay.

Discussion, readings, and papers in German. Prerequisite: German 302D and German 340C/340D OR German 341/341D OR German 342/342D

Credit 3 units. A&S IQ: HUM, LCD, LS, WI BU: HUM, IS EN: H

---

#### **L21 German 4101 German Literature and Culture, 1750-1830**

Exploration of the literature and culture of the Enlightenment, Storm and Stress, Weimar Classicism, and Romanticism within sociohistorical contexts. Genres and themes vary and may include the representation of history, absolutism and rebellion, the formation of bourgeois society, questions of national identity, aesthetics, gender, romantic love, and the fantastic. Reading and discussion of texts by authors such as Lessing, Goethe, Schiller, Kant, Novalis, Günderode, the Brothers Grimm, Kleist, E.T.A. Hoffmann, Eichendorff, Bettina von Arnim. Discussion, readings, and papers in German. Prerequisites: German 302D and German 340C/340D OR German 341/341D OR German 342/342D.

Credit 3 units. A&S IQ: HUM, LCD, LS, WI Art: HUM

---

#### **L21 German 4102 German Literature and Culture, 1830-1914**

Exploration of 19th-century literature and culture within sociohistorical contexts. Genres and themes vary and may include the representation of history, liberalism and restoration, nationalism, industrialization, colonialism, class, race and gender conflicts, materialism, secularization, and fin-de-siècle. Reading and discussion of texts by

authors such as Büchner, Heine, Marx, Storm, Keller, Meyer, Fontane, Droste-Hülshoff, Nietzsche, Ebner-Eschenbach, Schnitzler, Rilke. Discussion, readings, and papers in German. Prerequisites: German 302D and German 340C/340D OR German 341/341D OR German 342/342D.

Credit 3 units. A&S IQ: HUM, LCD, LS, WI Arch: HUM Art: HUM EN: H

---

### **L21 German 4103 German Literature and Culture, 1914 to the Present**

Exploration of modern and contemporary literature within sociohistorical contexts. Genres and themes vary and may include the representation of history, the crisis of modernity, the two World Wars, the Weimar Republic, the Third Reich, generational conflicts, the women's movement, and postmodern society. Reading and discussion of texts by authors such as Wedekind, Freud, Mann, Kafka, Brecht, Seghers, Boell, Bachmann, Grass, Wolf. Discussion, readings, and papers in German. Prerequisites: German 302D and German 340C/340D OR German 341/341D OR German 342/342D.

Credit 3 units. A&S IQ: HUM, LCD, LS, WI Art: HUM BU: HUM EN: H

---

### **L21 German 4104 Studies in Genre**

Exploration of the definition, style, form, and content that characterize a specific genre. Investigation of the social, cultural, political, and economic forces that lead to the formation and transformation of a particular genre. Examination of generic differences and of the effectiveness of a given genre in articulating the concerns of a writer or period. Topics and periods vary from semester to semester. Discussion, readings, and papers in German; some theoretical readings in English. Prerequisites: German 302D and German 340C/340D OR German 341/341D OR German 342/342D.

Credit 3 units. A&S IQ: HUM, LCD, LS, WI Arch: HUM Art: HUM EN: H

---

### **L21 German 4105 Topics in German Studies**

Focus on particular cultural forms such as literature, film, historiography, social institutions, philosophy, the arts, or on relationships between them. Course examines how cultural meanings are produced, interpreted, and employed. Topics vary and may include national identity, anti-semitism, cultural diversity, construction of values, questions of tradition, the magical, the erotic, symbolic narrative, and the city. Course may address issues across a narrow or broad time frame. Discussion, readings, and papers in German. Prerequisite: German 302D and German 340C/340D OR German 341/341D OR Ger 342/342D

Credit 3 units. A&S IQ: HUM, LCD, LS, WI Arch: HUM Art: HUM EN: H

---

### **L21 German 4106 Studies in Gender**

Investigation of the constructions of gender in literary and other texts and their sociohistorical contexts. Particular attention to the gendered conditions of writing and reading, engendering of the subject, and indicators of gender. Topics and periods vary from semester to semester and include gender and genre, education, religion, politics, cultural and state institutions, science, sexuality, and human reproduction. Discussion, readings, and papers in German; some theoretical readings in English. May be repeated with different content. Prerequisite: German 302D and German 340C/340D OR German 341/341D OR Ger 342/342D

Credit 3 units. A&S IQ: HUM, LCD, LS, SD, WI EN: H

---

### **L21 German 432 Undergrad Seminar: What Dreams May Come: Explorations of the Psyche in Viennese Modernism**

This course investigates the relationship of the burgeoning field of psychoanalysis to modernist art and literature in Vienna at the beginning of the 20th century. Examining literary texts and artworks alongside theories of dreams and the unconscious by thinkers such as Ernst Mach and Sigmund Freud, we will analyze the ways that visual

artists, composers, and poets sought to divulge the inner workings of the psyche. Our discussion will focus on key questions: What forms and what visual, aural, and verbal languages were developed to represent subjective experience? How did theories of memory and trauma and ideas about gendered psyches shape the depiction of individual agency in these works? What can these works tell us about the larger societal forces at play in this cultural moment? Readings will include the drama, poetry, and novellas of Arthur Schnitzler and Hugo von Hofmannsthal; musical works by Mahler and Schoenberg; and the visual art of Gustav Klimt, Helene Funke, and Oskar Kokoschka. Readings and discussion in German. Prerequisites: German 302D; German 340C/340D, German 341/341D, or German 342/342D.

Credit 3 units. A&S IQ: HUM EN: H

---

### **L21 German 4381 Contemporary German Literature**

Taught by the Max Kade writer and critic in residence, the course deals with the most recent trends and developments in contemporary German literature, including its multicultural, feminist, and postcolonial aspects. In all, the writer and critic will deal with approximately eight literary texts during the semester. The writers generally include a work of their own and give an idea of their personal poetics. Admission for undergraduate senior German majors is allowed only with permission of the Director of Graduate Studies.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

### **L21 German 457 Introduction to Linguistics and the Structure of German**

Introduction to the structure of the German language and to linguistic theory: phonology, morphology, syntax, semantics, as well as semiotic, pragmatic, and sociolinguistic theories. Prerequisite: Undergraduates may only take this course with permission of the Director of Graduate Studies.

Credit 3 units. A&S IQ: LCD EN: H

---

### **L21 German 490 Undergraduate Topics in German Film: Introduction to German Cinema**

In this undergraduate course, we will watch and discuss some of the great highlights of German film history. The course will provide students with a visual and linguistic foundation for discussing German film from the early days of cinema to the present. To cover such an extensive time span and range of cinematographic output, we will view representative works from various periods, genres, and authors that deal with a wide variety of themes. Class discussions will address the social and cultural significance of cinematic production in 20th- and 21st-century German culture as well as historical moments in German culture that are viewed through film. Certain themes will reoccur throughout the semester, including gender, the city, technology, violence, and social crisis. This course will also help students to improve their reading, writing, listening and speaking proficiency in German. Classroom discussions and readings will be entirely in German. The films will have English subtitles. This class will accommodate a range of levels of German proficiency. The reading and writing assignments will be adjusted accordingly. All instruction and all discussion will be in German. Note: There will be required weekly screenings. Prerequisite: successful completion of German 302D AND German 340C/340D OR German 341/341D OR German 342/342D or permission of the Director of Undergraduate Studies.

Credit 3 units. Art: AH BU: HUM

---

### **L21 German 493 The Task of the Translator**

This course offers an introduction to the theory and practice of translation, consisting of three main components. First, students will have the opportunity to translate a wide range of fictional and non-fictional texts from a variety of genres (short stories, philosophy, journalism, academic prose). The focus will be on translation from German to English, but we will also translate from English to

German. Next, we will read selections from key works on the theory of translation, from Martin Luther's sixteenth-century treatise on his Bible translation to twentieth-century essays by philosophers like Walter Benjamin. Finally, we will read and discuss excerpts from some of the most celebrated literary and philosophical translations of the past 200 years, including German translations of authors ranging from Shakespeare to J.K. Rowling as well as English translations of authors such as Goethe and Kafka. The course aims to give students a sense of the challenges and rewards of translation as well as a deeper understanding of the relationship between language, thought, and culture. Prerequisite: German 302D and German 340C/340D OR German 341/341D OR German 342/342D

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

#### **L21 German 497 Independent Work for Senior Honors**

Research for an Honors thesis, on a topic chosen in conjunction with the adviser. Emphasis on independent study and writing. Open to students with previous course work in German at the 400 level, an overall 3.0 grade-point average, and at least a B+ average in advanced work in German. Prerequisites: senior standing and permission of the undergraduate adviser.

Credit 3 units.

---

#### **L21 German 498 Independent Work for Senior Honors**

Continuation of Ger 497. Completion of thesis. Quality of the thesis determines whether the student receives credit only or Honors in German. Prerequisite: Ger 497.

Credit 3 units.

---

## Interdisciplinary Project in the Humanities

Visit online course listings to view semester offerings for L93 IPH.

---

#### **L93 IPH 150 First-Year Seminar: Topics in Interdisciplinary Inquiry**

For first-year, non-transfer students. Past topics include: Research Methodologies in Cognitive Science, Fictions of Financial Crisis, The Good Life, Speculative Worlds & Technological Futures, and Fictions of Chance.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM, IS EN: H

---

#### **L93 IPH 200C Sanity and Madness in Literature from Ancient Greece to the Renaissance**

We will consider explicit and implicit models of mental life, motivation, and action in works by authors studied in 201C. We will investigate how concepts related to madness are formulated and regulated in these literary texts and in the societies that produce them, and we will read scholarship from the 19th through 21st centuries that has debated the scale and scope of irrationality in ancient, medieval, and early modern cultures.

Credit 3 units. A&S: AMP A&S IQ: HUM BU: BA, HUM EN: H

---

#### **L93 IPH 201A Puzzles and Revolutions: Text & Traditions**

One major force in human history has been inquiry into the natural world. Especially after 1550, natural science, by virtue of its role in the development of technology and the improvement of health, has brought about great changes on all scales of human existence, first in Western Europe and then globally. In this course, the changing character of inquiry into the natural world, from antiquity forward, will be the object of study. Does natural science enable us, for example, to study nature as it is in itself, or are culturally-determined

perspectives or frameworks inescapable? How is it that natural science has, especially since 1800, proved so useful in the development of technology? How has it impinged on the arts? The requirements will include writing several short papers and brief responses to the readings.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

---

#### **L93 IPH 201B The Great Economists: Text & Traditions**

Examination of the great economic thinkers, the problems they sought to solve, the historically-conditioned assumptions that they bring to their work, and the moral issues they raise. The class will read from the works of Adam Smith, Ricardo, Malthus, Marx, Veblen, Keynes, Schumpeter, Galbraith, and others as well as commentary from Heilbroner. These readings will be paired with selected texts on the social and moral issues of their times.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

#### **L93 IPH 201C Classical to Renaissance Literature: Text & Traditions**

Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer's Iliad is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin, and Italian, to poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Vergil, Ovid, Petrarch, and Shakespeare.

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

#### **L93 IPH 203C Early Political Thought: Text & Traditions**

A selected survey of the political and moral thought of Europe from the rise of Athenian democracy to the Renaissance, with emphasis on analysis and discussion of writers such as Thucydides, Plato, Aristotle, St. Augustine, Castiglione, and Machiavelli. The course aims to introduce students to basic texts in the intellectual history of Western Europe, understood both as products of a particular time and place and as self-contained arguments that strive to instruct and persuade. The texts are simultaneously used to chart the careers of such fundamental notions as liberty, virtue, and justice.

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

#### **L93 IPH 207C Modern Political Thought: Text & Traditions**

What is power? Why are societies divided along lines of race, class, and gender? When did politics become split between the right and the left? Can religion be reconciled with the demands of modern life? Can democracy? These are some of the questions that will be addressed in this survey of modern political thought. Thinkers covered will include Thomas Hobbes, Immanuel Kant, Karl Marx, WEB Du Bois, Hannah Arendt, and Michel Foucault.

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

#### **L93 IPH 209 Scriptures and Cultural Traditions: Text & Traditions**

When we think of the word "scripture" in antiquity, we might think of the texts that have been compiled in the different holy books that we currently have today. Yet the function of "scriptures" within a community, and the status given to different texts treated as "scriptural," has changed in different times and places. In this course, we will consider texts that would eventually come to be part of the Hebrew Bible, New Testament, and the Qu'ran as well as several of

the exegetes and reading communities that shaped their various interpretations. We will explore how non-canonical sources played a role in the formation of the various canons we have today, comparing the authoritative status given to these texts to that given to other works from antiquity, such as the epics of Homer. Special attention will be played to the role of the receiving community in the development of "scripture," and the variety of the contexts in which scripture can function in the construction of and opposition to religious authority. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

---

### **L93 IPH 211A Digital Humanities: Information Representation, Analysis, and Modeling**

It is a truism that computers have changed our lives, the way we think, but in fact systematic efforts to apply current technologies to the thinking about history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. Students will explore the various ways that ideas and data in the humanities can be represented, analyzed, and communicated. Topics include forms of information, modeling and simulation, geospatial (GIS) and temporal representations of data, and ways of creating and using audio and visual information. Readings and classwork will be supplemented by small assigned digital projects culminating in a project chosen by the students themselves. Students should be comfortable with using the Internet and a word processor. No other special computing skills are required. Credit 3 units.

---

### **L93 IPH 260 From Literature to Opera**

Much operatic repertoire is based on classics of literature, from the very first operas of 1598-1600 to the present day. From Literature to Opera will introduce students to the world of opera through a close study of a few select works based on major literary subjects, beginning with the literary works themselves and proceeding to the ways the texts are adapted for the musical stage and then transformed into another genre through their dramatic musical settings. For 2018 the works studied will be Virgil's and Ovid's versions of the Orpheus myth set to music by Claudio Monteverdi in 1607 as one of the earliest operas. Next we will move on to Carlo Goldoni's play, "Don Juan" which was composed by Mozart as "Don Giovanni" in 1787. Shakespeare will be represented by the ultimate tragedy of words, "Othello," and Giuseppe Verdi's "Otello" of 1887. The course will conclude with Claude Debussy's "Péleas et Mélisande" of 1902, based on Maurice Maeterlinck's 1892 symbolist play of the same name. No previous musical experience required. The class will be conducted as a seminar focused on student participation. Each student will also choose an opera based on a literary work as the subject of two 10-page papers. The first, due at midterm, will study the literary source and the way it is adapted as an operatic text (libretto). The second, due at the end of finals week, will analyze how the libretto is dramatized through the music. One of the important purposes of class discussion will be to develop a usable vocabulary for describing music and its dramatic effects.

### **L93 IPH 3050 Literary Modernities in Europe and America: Text & Traditions**

The course examines the various facets of modernity in major works of European, Eurasian, and, sometimes, American literature from the early 17th century to the 1920s, starting with "Don Quixote." We will explore, among other things, the eruption of the novel, the secularization of autobiography, the literary discovery of the city, and the rise of literary and aesthetic criticism that takes literature and art seriously as political and social institutions. In addition to literary works, the course will engage with two or three important models of critical practice (e.g., Wollstonecraft's "Vindication of the Rights of Women"; Marx's "German Ideology"; Freud's "The Interpretation of Dreams"; Eliot's "Tradition and the Individual Talent"; or perhaps that great work of fictionalized literary criticism, Borges' "Pierre Menard, Author of the Quixote").

---

### **L93 IPH 307 Literary Modernities in East Asia: Text & Traditions**

This course will explore the complex forces at work in the emergence of modern East Asia through a selection of literary texts spanning fiction, poetry, and personal narrative. Our readings-- by Chinese, Japanese, Korean, and Taiwanese writers and poets-- will point to the distinctively different and dramatically-shifting circumstances of modern East Asian nations and peoples, as well as to their shared values and aspirations. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

### **L93 IPH 310 An Intellectual History of Sex and Gender: Text & Traditions**

When did sexuality begin? Is it safe to assume that gender constructions are universal and timeless? In this course, we will engage with a broad range of readings that serve as primary texts in the history of sexuality and gender. Our aims are threefold: (1) to analyze the literary evidence we have for sexuality and gender identity in Western culture; (2) to survey modern scholarly approaches to those same texts; and (3) to consider the ways in which these modern theoretical frameworks have become the most recent set of primary texts on sexuality and gender.

### **L93 IPH 312 Introduction to Digital Humanities**

It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed, and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork will be supplemented by class presentations and a small assigned group project.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

**L93 IPH 315 Independent Study in the Interdisciplinary Project in the Humanities**

Credit 3 units.

---

**L93 IPH 3191 The European Avant Garde: Interdisciplinary Studies in the Humanities, 20th Century**

The first half of the twentieth century witnessed the emergence of Artistic movements characterized by revolt against tradition, emphasis on radical experimentation, and redefinition of the art work. This course will familiarize students with the avant-garde's main currents: Italian Futurism, English Vorticism, Russian Constructivism, "stateless" Dadaism, and French Surrealism. We will ask ourselves how to define the avant-garde, how it is related to modernity, and whether its aesthetic is necessarily political. Texts include "Futurist Manifestos", Cendrars's "Trans-Siberian Prose," Stein's "Tender Buttons", Breton's "Nadja". We will also examine artworks such as Duchamp's "Large Glass" and films Buñuel's "Un Chien Andalou".

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

**L93 IPH 320 An Intellectual History of Race and Ethnicity: Text & Traditions**

This course is designed to introduce students to a wide range of historical ideas, contexts, and texts that have shaped our understandings of race and ethnicity. We will examine the ways in which our definitions and categories of race and ethnicity have helped us to construct (and continuously reinvent) our sense of who counts as human, what counts as human behavior, the possibilities of artistic expression, the terms of political engagement, and our critical and analytical frameworks. Students should be prepared to do quite a bit of reading of some very challenging yet rewarding texts.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H

---

**L93 IPH 332 Visual Culture**

In this interdisciplinary course, we explore this long history of vision and visual representation from antiquity to the present so as to shed light on how people at different moments have understood vision, have seen their own seeing and have encoded this seeing in different artifacts and media. More specifically, we explore the role of the visual in the historical production of subjectivity and collectivity; the political, religious, and ideological uses and abuses of vision; the relation of images to words and stories; the implication of sight in competing systems of truth, enlightenment, and scientific progress; and the function of seeing within different media of art, entertainment, and virtualization—from ancient cave painting, medieval icons and early modern church designs to modernist paintings and motion pictures.

Credit 3 units. A&S IQ: HUM BU: ETH EN: H

---

**L93 IPH 3451 Histories of Intelligence: Topics in Science and Society**

The use of data, computing, and quantitative methods has become central to politics, economics, and daily life. This course uses the concept of "intelligence" to survey the history of technoscientific efforts to understand and represent the intersections of minds, machines, and society. The course title has a deliberate double meaning; it is about both the people who seek to study and measure humans and their knowledge capacities as well as the knowledge or information that is increasingly collected, measured, and automated by machines. Organized topically and chronologically, this discussion-based seminar will examine the changing meanings and significance of intelligence, their impact on politics and social organization, and the questions raised about the relationship between specific technologies and

specific models of human reasoning. We will consider these questions from diverse perspectives, including race, gender, class, ability, and materiality from the 19th century to the present. Topics covered include histories of artificial intelligence, racial dynamics, meritocracy, informational labor, state secrecy, and the self as data.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM

---

**L93 IPH 3473 Race, Rights, and Humanity in European History**

This course explores discourses of human rights as natural rights in Europe from the Enlightenment to the present. While Europe -- and particularly France -- has been quick to declare itself the birthplace of human rights, a closer look reveals a broad continuum of conceptions of political, social, and economic rights. The course functions as a kind of survey of Modern European history, touching on the Age of Revolutions, the rise of European overseas empires, international anti-slavery movements, totalitarianism, and postwar development. It focuses on how political, social, and economic rights have always been articulated incompletely, to the benefit of some and to the detriment of others.

---

**L93 IPH 351 A World of Words**

This seminar is designed for undergraduate students who are interested in literature, foreign languages, creative writing, and translating. In the course students will enrich their studies in foreign languages, cultures and literatures with creative work. Participants will read and discuss practical criticism, present their own creative projects and hone their skills as writers, translators, and readers. At the conclusion of the course, students will have the choice of presenting a polished work of translation or a piece of original writing. Besides myriad possibilities for translating into and from English, the course can accommodate creative writers in English, Spanish, French, German, Korean, and Chinese. Students who wish to enroll in the course should contact the Program in Comparative Literature for further information. There is a limit of 14 participants to this class.

---

**L93 IPH 3587 From Genghis Khan to the Taliban: War and Peace in Central Asia**

From romantic invocations of the Silk Road and isolated nomads to medieval barbarisms of the Taliban, Western media and popular culture often portray Central Asia as a region out of step with time. However, Central Asia has long been a center for culture, innovation, and political power, and it has a history that is hard to reconcile with popular images of a place stuck in the past. This course, which is intended for advanced undergraduate and graduate students, traces the transformation of Central Asia from Genghis Khan's 13th-century conquests to the present, covering the territories of former Soviet Central Asia, Western China (Xinjiang), and Afghanistan. Although the course covers nearly 1000 years, the primary emphasis is on the imperial schemes and transformations of the past 300 years. All readings will be in English, and no prior knowledge in Central Asian history is expected or required.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

**L93 IPH 3951 Shakespeare's Sonnets: Framing the Sequence**

We will begin by exploring ways of reading a small number of individual sonnets, proceeding thereafter to think about patterns of meaning in language and image across broader groupings and the sequence as a whole. We will investigate the influence of earlier sonnet tradition, especially Petrarch's sonnets, and the relationship of the poems to modes of sexuality and selfhood. Finally, we will ask how some of Shakespeare's most creative readers—including Wilde, Booth, and Vendler—have responded to the challenges of the Sonnets. Students will work on writing their own commentary on a group of poems.

### L93 IPH 4052 Citizenship: Historical, Cross-Cultural, and Interdisciplinary Perspectives

Although some have posited that citizenship may become obsolete in an increasingly globalizing and interconnected world, citizenship has never been more relevant. Discussions of migration, statelessness, naturalization policies, borders, and so many other contemporary topics hinge on questions of citizenship. In this course, we will be taking an interdisciplinary approach to the study of citizenship, drawing on a wide range of work from historians, social scientists, journalists, and writers. This is an interdisciplinary and transnational course intended for advanced undergraduate and graduate students. Examples will draw from around the world and from a variety of disciplines. Assigned materials include the work of historians, anthropologists, political scientists, sociologists, and journalists as well as novels, films, and audio and visual sources.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA EN: H

---

### L93 IPH 4111 Pastoral Literature: Interdisciplinary Studies in the Humanities, Antiquity

This course will open with a survey of the classical tradition in pastoral/bucolic. We will consider questions of genre, intertextuality and ideology, and we will ask how 'the lives and loves of herders' became favored ground for literary meditation on issues of surface and depth, reality and illusion, artifice and sincerity. This portion will involve intensive reading in translation of Theocritus, Vergil and Longus. In the second half of the semester, we will consider the survival, adaptation and deformation of ancient pastoral themes, forms and modes of thought in British and American writing from the 19th and 20th centuries. We will read works of Mark Twain, Kenneth Grahame, Thomas Hardy and Tom Stoppard.

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

### L93 IPH 4171 Roman Remains: Traces of Classical Rome in Modern British Literature

This course will examine the use of the Roman textual and material inheritance in poets, novelists and critics of the late nineteenth and twentieth centuries working in Britain, and will ask how modernity addresses the claims of the classical tradition. We will place Thomas Hardy's "Poems of 1912-13" next to Vergil's Aeneid, then survey Hardy's

relationship to the visible remainders of Rome and the people it conquered -- roads, barrows, forts -- in the landscape of Dorset. After examining the representation of the Celtic hill-fort in fiction, and the legacy of Vergilian representations of the countryside in poetry, we will consider representations of Rome in light of modern imperialism (Joseph Conrad's Heart of Darkness and Ezra Pound's Homage to Sextus Propertius) and examine the place of Vergil in T. S. Eliot's critical and poetic practice.

Credit 3 units. A&S IQ: HUM EN: H

---

### L93 IPH 419A Economic Life in Modern Social and Cultural Theory

Social and cultural theorists have developed many perspectives on economic life, ranging from actor-network theory to new institutionalism. Yet recent ethnographic work, for instance in consumption studies and in the anthropology of financial markets, has raised all sorts of problems for theorists. Our course will ask whether we really can generalize about economic life and, if so, how far such generalizations might extend into fields such as intimate relations or artistic production. Readings will include work by Bourdieu, Callon, Geertz, Hochschild, Mauss and Zelizer.

Credit 3 units. A&S IQ: SSC EN: S

---

### L93 IPH 425 Humanities by the Numbers: Essential Readings in Digital Humanities

To what extent can computational techniques that draw on statistical patterns and quantification assist us in literary analysis? Over the semester, we will juxtapose the close reading of historical documents or literary works with the "distant reading" of a large corpus of historical data or literary texts. We will ask how the typically "human" scale of reading that lets us respond to literary texts can be captured on the "inhuman" and massive scales at which computers can count, quantify and categorize texts. While this class will introduce you to basic statistical and computational techniques, no prior experience with technology is required. Prerequisites: two 200 level or one 300-level course in literature or history. This is a topics-type course and the specific documents and works examined will vary from semester to semester. Please see semester course listings for current offerings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L93 IPH 426 Imagining the City: Crime and Commerce in Early Modern London

The astonishing demographic and economic growth of early modern London, and the rapid increase in spatial and social mobility that accompanied this growth seemed to harbingers, in the eyes of many contemporaries, a society in crisis and perhaps on the brink of collapse. As increasing numbers of vagrants or masterless men flocked to the metropolis and a growing number of people - apprentices, domestic labor, street vendors etc - lived on the fringes of legitimacy and at risk of lapsing into vagrancy, policing early modern London provided unique challenges for authorities. At the same time, the very notion of the social - a shared space of kinship and community could often seem to be under threat as an emerging market and a burgeoning commodity culture reshaped the traditional underpinnings of social and economic transactions. Yet, late Tudor and early Stuart London remained by far England's most prosperous metropolis, its primary market, home to a burgeoning print culture and nourishing theater and emerged, eventually, as the epicenter of a global economy. This course will consider the topographic, social and institutional configuration of early modern London and the ways in which these were reimagined and negotiated in the literature of the period. Drawing on the drama of the period and a wide array of pamphlet literature, we will discuss how civic institutions handled the growing influx of the poor and adapted to the increasing power of an emerging bourgeoisie who asserted themselves in unprecedented ways. In addition we will consider secondary sources

ranging from maps, theories of urban space and social and economic historiography as well as digital archives and computational techniques that allow us to "scale up" our thinking about early modern London to a vast corpus of texts and documents.

Credit 3 units. A&S IQ: HUM EN: H

---

### **L93 IPH 427 Technology and Feminist Practice: Gender Violence Prevention Tools**

How can we best use technology, and the tools and insights of the Digital Humanities in particular, to promote effective approaches to addressing gender-based violence? What are the most effective ways to bridge the innovations of the research university with the everyday work of practitioners seeking to prevent violence or intervene in its aftermath? What are the ethics involved in constructing tools for public and professional use? Which interests should govern the choices in content, design, and dissemination of information? This course will introduce students to the strategies and challenges of devising technological tools for violence prevention for use beyond the classroom. Class readings and discussions will be supplemented by hands-on project work with Washington University's Gender Violence Database and lab sessions that focus on skill-building in digital project construction. Prerequisite: For undergraduate students, L77 393 01 or previous work experience with the Gender Violence Database. Graduate students by permission of instructor.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA, ETH EN: H

---

### **L93 IPH 430 Data Manipulation for the Humanities**

The course will present basic data modeling concepts and will focus on their application to data clean-up and organization (text markup, Excel, and SQL). Aiming to give humanities students the tools they will need to assemble and manage large data sets relevant to their research, the course will teach fundamental skills in programming relevant to data management (using Python); it will also teach database design and querying (SQL). The course will cover a number of "basics": the difference between word processing files, plain text files, and structured XML; best practices for version control and software "hygiene"; methods for cleaning up data; regular expressions (and similar tools built into most word processors). It will proceed to data modeling: lists (Excel, Python); identifiers/keys and values (Excel, Python, SQL); tables/rerelations (SQL and/or data frames); joins (problem in Excel, solution in SQL, or data frames); hierarchies (problem in SQL/databases, solution in XML); and network graph structures (nodes and edges in CSV). It will entail basic scripting in Python, concentrating on using scripts to get data from the web, and the mastery of string handling.

Credit 1 unit. EN: H

---

### **L93 IPH 431 Statistics for Humanities Scholars: Data Science for the Humanities**

A survey of statistical ideas and principles. The course will expose students to tools and techniques useful for quantitative research in the humanities, many of which will be addressed more extensively in other courses: tools for text-processing and information extraction, natural language processing techniques, clustering & classification, and graphics. The course will consider how to use qualitative data and media as input for modeling and will address the use of statistics and data visualization in academic and public discourse. By the end of the course students should be able to evaluate statistical arguments and visualizations in the humanities with appropriate appreciation and skepticism. Details. Core topics include: sampling, experimentation, chance phenomena, distributions, exploration of data, measures of central tendency and variability, and methods of statistical testing and inference. In the early weeks, students will develop some facility in the use of Excel; thereafter, students will learn how to use Python or R for statistical analyses.

Credit 3 units. A&S IQ: HUM, AN EN: H

---

### **L93 IPH 432 Programming for Text Analysis**

This course will introduce basic programming and text-analysis techniques to humanities students. Beginning with an introduction to programming using the Python programming language, the course will discuss the core concepts required for working with text corpora. We will cover the basics of acquiring data from the web, string manipulation, regular expressions, and the use of programming libraries for text analysis. Later in the course, students will be introduced to larger text corpora. They will learn to calculate simple corpus statistics as well as techniques such as tokenization, chunking, extraction of thematically significant words, stylometrics and authorship attribution. We will end with a brief survey of more advanced text-classification terminology and topics from natural language processing such as stemming, lemmatization, named-entity recognition, and part-of-speech tagging.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### **L93 IPH 435 Practicum in Digital Humanities: Topics in Interdisciplinary Studies**

This is a variable topics course, and content will change from semester to semester.

---

### **L93 IPH 440 The Ethics, Politics, and Law of Big Data**

This course will explore the phenomenon of "big data" -- the use of very large datasets that make new predictive algorithms and other advanced data analytics possible -- and provide students with an opportunity to think critically about the applications of new information technologies and to develop an awareness of their ethical and political context.

We will begin by addressing the philosophical question of what, if anything, is special about big data -- what makes today's digital data ecosystems different from the ways in which scholars, governments, and businesses have used data and statistics for centuries. We will then examine questions about the ethics, politics, and law of contemporary information technology. Topics will include the moral philosophy of privacy; the theoretical foundations of American and European privacy law pertaining to big data; the ethics of using predictive algorithms in criminal sentencing and marketing; the ethical considerations that bear on academic research using "big data"; and differences and similarities between the ways in which computer code ("West Coast Code") and laws ("East Coast Code") regulate conduct. Readings will include excerpts from Ian Hacking's "The Taming of Chance"; Safiya Umoja Noble's "Algorithms of Oppression"; Cathy O'Neil's "Weapons of Math Destruction"; Evgeny Morozov's "To Save Everything, Click Here"; and Frank Pasquale's "The Black Box Society." Assignments for the course will include both academic papers and practical exercises, such as drafting a mock privacy policy for a tech company accumulating large quantities of personal data about its consumers.

**L93 IPH 465 The Pre-History of Blogging: Social Media of the Enlightenment**

This course will explore the ways in which the Enlightenment-in France, England, Germany and the US-was shaped by the emergence of new literary forms, media, and technologies of communication. Like our blogs, Facebook, and e-mail, the eighteenth-century had its new social media-newspapers and literary journals, letters that surged through the national postal systems-as well as new social institutions-salons and coffeehouses-that served as forums for public debate. We will examine these novelties in order to investigate the often ambivalent heritage of the Enlightenment: the use of media to exchange knowledge and express dissent; the use of media for surveillance and State control.

Credit 3 units. A&S IQ: HUM EN: H

---

**L84 Lw St 117 Amp:Global Population on the Move: Language + Resettlement w/Legal, Healthcare + Educational Systems**

Today, the number of displaced people is as its highest: one out of every 113 people on Earth. In this course, we begin with an understanding of what it means to be a refugee, and we discuss readings that lead us to an understanding of the modern refugee as we contextualize the significance of such terms as 'refugee,' 'asylum,' 'sanctuary,' 'non-refoulement,' or 'forced displacement.' With this foundation, we move to the role that language plays with resettlement into society and examine factors in the legal, healthcare and educational systems. We examine global work done through the

United Nations Educational, Scientific and Cultural Organization and more, and we concentrate on the current state of refugees and New Americans in St. Louis and the USA. The course fosters critical thinking across academic disciplines, encourages practical implications of research on resettlement and language policy, and includes invited guest lectures by local practitioners and other Washington University scholars. This course is for first-year, non-transfer students only.

---

**L84 Lw St 120A Religious Freedom in America**

The intersection of religion and law in American society has sparked some of the fiercest cultural engagements in recent memory: Should a for-profit religious corporation have a right not to fund birth control for its employees? Can a public college expel campus religious groups whose membership is not open to all students? May a Muslim in prison grow a beard for religious reasons? Should a cake baker or a florist be permitted to refuse services for a gay wedding? Can a church hire and fire its ministers for any reason? These current debates and the issues that frame them are interwoven in the American story. This course introduces students to the major texts and historical arguments underlying that story. Drawing from the respective expertise of the instructors, the course will expose students to a variety of scholarly methods related to the issue: legal history and case law, intellectual history and canonical texts, social history and narrative accounts, and political philosophy and contemporary analyses. This course is for first-year (non-transfer) students only.

**L84 Lw St 126 Ampersand: Law and Society**

This course considers the basic aspects of the American legal system: its foundations, processes, institutions and rights. We will also study some specific substantive areas of the law. The course consists of two 90-minute Socratic lectures per week. Upon completion of this course, students should have a basic knowledge of the American legal system, which is an important part of a general education. The hope is that such knowledge will enable students to better understand and assess current legal events and to develop an increased interest in those events. This course should also enable students to consider law as a future area of study and career. Interested students may continue their study in the spring semester with an optional 1-credit seminar focusing on contemporary Supreme Court cases. Course is for first-year students in the Law and Society Program only.

Same as L61 FYP 1261

**L84 Lw St 203B Introduction to Education: Disability Law, Policy, and Institutional Implications**

This seminar is designed to provide students with a working knowledge of the laws and policies governing disabilities and how they impact governmental, social, economic, political, and educational institutions. This introduction to disabilities is provided from a legal perspective and will appeal to self-motivated students interested in learning more about how disability awareness might impact their everyday lives. Topics for discussion include IDEA, ADA, and Section 504 accommodations and how these laws apply to K-12 schools, higher education, immigration, housing, substance abuse, courts, employment, and access to public transit and public accommodations.

---

**L84 Lw St 203C Early Political Thought: Text and Tradition**

A selected survey of the political and moral thought of Europe from the rise of Athenian democracy to the Renaissance, with emphasis on analysis and discussion of writers such as Thucydides, Plato, Aristotle, St. Augustine, Castiglione, and Machiavelli. The course aims to introduce students to basic texts in the intellectual history of Western Europe, understood both as products of a particular time and place and as self-contained arguments that strive to instruct and persuade. The texts are simultaneously used to chart the careers of such fundamental notions as liberty, virtue, and justice.

**L84 Lw St 207 Crossing Borders: An Introduction to Institutions and Concepts in Global Studies**

This course provides an overview of the emergence of international governing institutions, the ideologies that shaped them, and concepts helpful for understanding them. Identifying the systems that have emerged to govern modern human societies at the national and international levels provides the means to consider how human beings are categorized within those systems, as citizens, subjects, asylum seekers, refugees, and the stateless. We engage a few classic works -- including "The Communist Manifesto," "Imagined Communities," and "Orientalism" -- and consider how they have transformed knowledge. The goal is for students to gain an empirical grasp of world institutions and a critical vocabulary that will provide the means for an informed engagement with international issues across different world regions and academic approaches.

**L84 Lw St 207C Modern Political Thought: Text and Traditions**

What is power? Why are societies divided along lines of race, class, and gender? When did politics become split between the right and the left? Can religion be reconciled with the demands of modern life? Can democracy? These are some of the questions that will be addressed in this survey of modern political thought. Thinkers covered will include Thomas Hobbes, Immanuel Kant, Karl Marx, WEB Du Bois, Hannah Arendt, and Michel Foucault.

---

**L84 Lw St 2110 Social Inequality in America**

Americans face different challenges and opportunities that depend on a variety of characteristics, including race, class, gender, and sexual orientation. This class examines these intersecting categories from a sociological perspective - not simply as ways to classify people, but as social constructions that help to explain social inequality. Students will examine these systems in a variety of institutional contexts, such as popular culture, family life, education, the criminal justice system, and the labor force. No prerequisite.

This course will be a continuation of the seminar Ampersand: Law and Society. The course will apply knowledge learned in the first semester to analyze current and recent Supreme Court cases. Prerequisites: L61 1261 and admission to the Ampersand: Law and Society course. Same as L61 FYP 221

Credit 3 units. A&S: AMP A&S IQ: SSC Art: SSC BU: BA, HUM EN: S

---

**L84 Lw St 225 Religion and Politics in American History**

In a famous 2004 article, historian Jon Butler once remarked that US history textbooks and survey courses tend to pay significant attention to religion during the Colonial Era and early Republic, yet after the Civil War "religion more often appears as a jack-in-the-box" that pops up in historical accounts somewhat randomly and without much elaboration or analysis. To address the gaps in historical understandings that these absences may create, this course will provide a survey of the ways theological ideas and religiously-motivated social movements have shaped US politics and civic life from the Civil War to the present. With a particular emphasis placed on how religion intersects with other social categories such as race, gender, and class, it will examine the complex role that religious beliefs, practices, and identities have played in major political events and debates from the 1860s to today. In doing so, it will also inquire into what it means to study religion as a historical phenomenon, the theoretical and methodological tools that best assist in this work, and the historiographic implications of better attending to religion in historical analyses. No prior coursework in US history or religious studies is required.

**L84 Lw St 2443 First-Year Seminar: The Nuremberg Trials and International Justice**

This course is an exercise in understanding how professional historians and the general public discover and use the past. The main goals of this course are to understand the many different methods and standards applied to the past; to understand how and why each generation changes the past as it seeks to make it "usable"; and to develop the skills of exposition and argumentation necessary to describe and analyze complex historical issues and to express critical ideas effectively. The subject of this inquiry will be the Nuremberg trials - the innovations and critiques around the law and politics of the trials themselves, as well as the trials' legacies for ideas about international justice in postwar America and the world. Course is for first-year, non-transfer students only.

Same as L22 History 2443

**L84 Lw St 251 Juvenile Justice in the Black Experience**

This course examines the sociolegal past, present, and future of American juvenile justice, with a focus on the Black American experience. The course is organized in three parts. Part I surveys the late 19th- and early 20th-century development of the "parental state," including its institutional centerpiece (the juvenile court), its principle legal subjects ("dependents" and "delinquents"), and how these took shape alongside the contemporaneous rise of American Apartheid. Part II examines several key changes and challenges in contemporary juvenile justice, including the transformation of this institution in the wake of the Civil Rights Movement and the endurance of racialized juvenile social control in the post-Civil Rights period. Finally, Part III considers possible futures of youth justice in the United States and beyond as well as practical strategies for achieving equal protection within and beyond the law. For AFAS majors, this course counts as Area Requirement 2.

**L84 Lw St 299 Undergraduate Internship in Legal Studies**

Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities, e.g., 8-10 hours a week for 13 or 14 weeks to

receive 3 units of credit; 1 or 2 credits for fewer hours. Students may not receive credit for work done for pay but are encouraged to obtain written evaluations about such work for the student's academic advisor and career placement file.

Credit variable, maximum 3 units.

---

**L84 Lw St 3001 Social Theory**

This course provides an overview of major theoretical frameworks used by sociologists to understand social behavior and group patterns. This course explores classical theories, including those developed by Marx, Weber, and Durkheim, along with contemporary perspectives such as functionalist, interactionist, and conflict theories. Class discussions and writing assignments emphasize students' application of theory to understand current social experiences and structures. The course has no specific prerequisites, but students should be prepared for intensive study of challenging ideas and the application of these ideas in new contexts relevant to modern society. This course counts toward the program's Theory component which Sociology majors and minors must complete to fulfill degree requirements.

---

**L84 Lw St 3012 Biblical Law and the Origins of Western Justice**

This course will explore how law developed from the earliest periods of human history and how religious ideas and social institutions shaped law. The course will also illuminate how biblical law was influenced by earlier cultures and how the ancient Israelites reshaped the law they inherited. It will further analyze the impact of biblical law on Western culture and will investigate how the law dealt with those of different social classes and ethnic groups, and we will probe how women were treated by the law.

**L84 Lw St 3255 The Development of the American Constitution**

The U.S. Constitution has been so long maintained because it has adapted to new circumstances. Contrary to common mythology, this adaptation goes far beyond formal amendment and court interpretation. But past performance is no guarantee of future results. The course examines the processes through which American constitutional democracy has developed, considers its successes and failures, and assesses some of its most pressing challenges. In doing so the course treats topics such as: the Electoral College; the justice system; executive powers in war and peace; Congress versus the president; regulation and taxation; civil rights and Reconstructions; amendment politics; and constitutional rhetoric and beliefs.  
Same as L32 Pol Sci 3255

**L84 Lw St 335S Poverty and the New American City**

This course explores structural changes that are transforming the American urban landscape, especially for low-income populations. The course begins with a review of classic theories of urban poverty and consider their relevance in the modern context. Students will then analyze key political, economic, demographic, and geographic shifts in how urban poverty is organized and reproduced, including gentrification, immigration, social policy reform, and the credit crisis. Special attention will be devoted to exploring the social and political implications of changing urban policy approaches, as well as the

"suburbanization" of poverty. The course will conclude by discussing how urban poverty interfaces with broader social structures, including law, markets, and the state. Prerequisite: successful completion of an introductory sociology course or consent of the instructor.  
Same as L40 SOC 3350  
Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

**L84 Lw St 3373 Law and Culture**

We live in an age when social policy is increasingly displaced into the realm of law, when justice and equality are matters of courtroom debate rather than public discussion. Legal language has become a key resource in all kinds of struggles over livelihood and ways of life. In this course, we study the cultural dimensions of law and law's changing relationship to state power, the global economy, social movements, and everyday life. We approach law as a system of rules, obligations, and procedures, but also a cultural practice, moral regime, and disciplinary technique. How are relationships between legal, political, and economic realms structured and with what consequences? How does law provide tools for both social struggle and social control? What does anthropology contribute to research on these issues? In exploring these questions, we combine readings from classical legal anthropology with recent ethnographic work from around the globe.  
Same as L48 Anthro 3373  
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: ETH EN: S

---

**L84 Lw St 340F Social and Political Philosophy**

Study of certain fundamental issues concerning government, society, and culture. For example: what are the nature and limits of legitimate political authority? Are ordinary human beings capable of governing themselves justly? Do citizens have a duty to obey the state? If so, to what extent, if at all, is that duty grounded in consent or contract? Should the state limit or regulate the personal relationships of citizens, such as marriage, family, and sexuality? How should social institutions rectify a history of political or social injustice against oppressed groups? Readings from historical and contemporary sources. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.  
Same as L30 Phil 340F

---

#### **L84 Lw St 3441 Defendant's Rights**

This course explores the operations of the American criminal justice system. Substantial emphasis on the constitutional rights accorded to the criminally accused. Readings consist primarily, but not exclusively, of Supreme Court cases.

Same as L32 Pol Sci 3441

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA, ETH EN: S

---

#### **L84 Lw St 345 Issues in Applied Ethics**

Advanced study of a selected topic in applied ethics. Abstract ethical theories and methods are brought to bear on the moral problems that arise in an area of social and professional practice such as medicine, business, law, journalism, engineering, or scientific and humanistic research. Possible topics include: reproductive healthcare and policy, the just distribution of medical resources, the social responsibilities of corporations, accountability in the media and public office, and the ethics of research on or affecting human subjects. Prerequisites: one course at the 100 or 200-level in applied ethics; or permission of the instructor.

Same as L30 Phil 345F

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

---

#### **L84 Lw St 3450 The Legislative Process**

Structure and behavioral patterns of American legislative bodies. Primary emphasis on the U.S. Congress, with attention to state legislatures for comparative purposes. Representation, internal patterns of influence, and policy-making processes. Prerequisite: junior standing.

Same as L32 Pol Sci 345

Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

#### **L84 Lw St 346 Philosophy of Law**

This course will first focus on the philosophical foundations of law, examining both the relationship between law and rules, as well as the types of legal reasoning. Second, the course will focus on philosophical issues that arise in the key substantive areas of law: contracts, torts, property, criminal law, and constitutional law, as well in specialized areas such as family and employment law. The course will end with a brief discussion of several problems in legal ethics. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Same as L30 Phil 346

#### **L84 Lw St 347 Environmental Justice**

Environmental quality varies widely across race, class, gender and other forms of social difference. This course explores how and why these differences exist. It provides an overview of the history and foundations of the environmental justice movement in the United States while covering classic environmental justice issues, such as toxic waste and pollution, along with more recent issues such as food access, urban green space, transportation and climate change. Environmental justice concerns in St. Louis are featured as part of the course. Class time will be devoted to lectures, case studies, group activities and discussion. Student learning will be assessed through exams, reflection, online assignments, a policy brief on an environmental justice issue and a group presentation. This is an advanced elective targeted toward third and fourth year students.

Same as L82 EnSt 346

---

#### **L84 Lw St 3507 Legal Conflict in Modern American Society**

Thousands of lawsuits are filed daily in the state and federal courts of the United States. The disputes underlying those lawsuits are as messy and complex as the human, commercial, cultural and political dynamics that trigger them, and the legal processes for resolving those disputes are expensive, time-consuming and, for most citizens, seemingly impenetrable. At the same time law and legal conflict permeate public discourse in the United States to a degree that is unique in the world, even among the community of long-established democracies. The overarching objective of the course is to prepare our undergraduate students to participate constructively in that discourse by providing them with a conceptual framework for understanding both the conduct and resolution of legal conflict by American legal institutions, and the evolution of - - and values underlying - - the substantive law American courts apply to those conflicts. This is, at core, a course in the kind of legal or litigation "literacy" that should be expected of the graduates of first-tier American universities. Some of the legal controversies that will be used to help develop that "literacy" include those surrounding the permissible use of lethal force in self-defense, the constitutionality of affirmative action in university admissions, contracts that are unconscionably one-sided, sexual harassment in the workplace, the duty of landlords to prevent criminal assaults on their tenants, groundwater pollution alleged to cause pediatric cancers, and warrantless searches of cellphone locator data by police.

---

**L84 Lw St 3561 Women and the Law**

This course explores how social constructions of gender, race, class, and sexuality have shaped traditional legal reasoning and American legal concepts, including women's legal rights. We will begin by placing our current legal framework, and its gender, race, sexuality, and other societal assumptions, in an historical and Constitutional context. We will then examine many of the questions raised by feminist theory, feminist jurisprudence, and other critical perspectives. For example, is the legal subject gendered male, and, if so, how can advocates (for women and men) use the law to gain greater equality? What paradoxes have emerged in areas such as employment discrimination, family law, or reproductive rights, as women and others have sought liberal equality? What is the equality/difference debate about and why is it important for feminists? How do intersectionality and various schools of feminist thought affect our concepts of discrimination, equality, and justice? The course is thematic, but we will spend time on key cases that have influenced law and policy, examining how they affect the everyday lives of women. Over the years, this course has attracted WGSS students and pre-law students. This course is taught by law students under the supervision of a member of the School of Law faculty.

**L84 Lw St 358 Law, Politics, and Society**

This course is an introduction to the functions of law and the legal system in American society. The course material will stress the realities of the operation of the legal system (in contrast to legal mythology) as well as the continuous interaction and feedback between the legal and political systems. There are four specific objectives of this course: (1) to introduce students to legal concepts and legal theories; (2) to analyze the operation of the appellate courts, with particular emphasis on the U.S. Supreme Court; (3) to analyze the operation of American trial courts, especially juries and the criminal courts; and (4) to examine the linkages between culture and law.

---

**L84 Lw St 3670 The Long Civil Rights Movement**

The Civil Rights Movement is known as a southern movement, led by church leaders and college students, fought through sit-ins and marches, dealing primarily with non-economic objectives, framed by a black and white paradigm, and limited to a single tumultuous decade. This course seeks to broaden our understanding of the movement geographically, chronologically, and thematically. It pays special attention to struggles fought in the North, West and Southwest; it seeks to question binaries constructed around "confrontational"

and "accommodationist" leaders; it reveals how Latinos, Native Americans, and Asian Americans impacted and were impacted by the movement; and it seeks to link the public memory of this movement with contemporary racial politics.

Same as L22 History 3670

Credit 3 units. A&S IQ: HUM, SC, SD BU: BA, HUM EN: H

---

**L84 Lw St 3710 Sociology of Immigration**

This course reviews theoretical and empirical research on how and why people migrate across international borders, and the consequences of international migration for immigrants and natives in the United States. While immigration is one of the most controversial issues in the contemporary United States, these contentious debates are not new. Americans once voiced the same concerns about the economic and social impact of Southern and Eastern European immigrants that today are aimed at immigrants from Latin America, Asia, Africa, and the Caribbean. In this course, students will compare historical (1880-1920) and contemporary (1965-present) waves of immigration to the United States. In this, students will explore why and how people migrate; immigrant integration; the impact of immigration on native-born Americans; and how government policies - at the national, state, and local level - shape immigrant assimilation and what it means to be considered truly "American" in a social as well as a legal sense.

Prerequisite: successful completion of an introductory Sociology course or consent of the instructor.

**L84 Lw St 3744 Law and History: Colonial Era to Reconstruction**

This course analyzes the development of American law and the constitutional system from the colonial era through the era of the Civil War and Reconstruction, beginning with a general theoretical background on the study of legal history. The course concludes with an analysis of the role of law in controversies around the commemoration of the Civil War era.

**L84 Lw St 3866 Interrogating "Crime and Punishment"**

Whether read as psychological thriller, spiritual journey, or social polemic, Dostoevsky's 1866 novel CRIME AND PUNISHMENT has inspired diverse artistic responses around the world. From the nineteenth century to the present day, writers and filmmakers have revisited (and often subverted) questions that Dostoevsky's novel poses: What internal and external forces cause someone to "step over" into crime? What are the implications of a confession? To what extent can the legal system provide a just punishment? Are forgiveness and redemption possible, or even relevant? What role does grace--or luck--play in the entire process? This course begins with our close reading of Dostoevsky's novel and then moves on to short stories, novels, literary essays, and movies that engage in dialogue with the Russian predecessor. A central concern of our intertextual approach is to explore the interplay between specific socio-historical contexts and universal questions. All readings are in English. No prerequisites.

---

**L84 Lw St 389 Power, Justice, and the City**

This course examines normative theoretical questions of power and justice through the lens of the contemporary city, with a particular focus on American urban life. It explores urban political economic problems, questions of racial hierarchy and racial injustice in the modern metropolis, and the normative and practical dilemmas posed by "privatism" in cities and their suburbs. In addition, the course devotes considerable attention to honing students' writing skills, through class assignments that stress rewriting and revising, and also through four in-class writing workshops devoted to formulating a thesis and making an argument, revising and rewriting, writing with style, and peer consultation.

---

**L84 Lw St 390 Gender Violence**

This course explores the issue of violence against women within families, by strangers in the workplace, and within the context on international and domestic political activity. In each area, issues of race, class, culture, and sexuality are examined as well as legal, medical and sociological responses. Readings cover current statistical data, research, and theory as well as information on the history of the battered women's movement, the rape crisis center movement, violent repression of women's political expressions internationally, and the effect of violence on immigrant and indigenous women in the U.S. and abroad. NOT OPEN TO STUDENTS WHO HAVE TAKEN U92 363 WoSt. DOMESTIC VIOLENCE.

---

**L84 Lw St 391 History of Political Thought I: Justice, Virtue and the Soul**

This course offers a critical introduction to the main issues and debates in western political theory, including but not limited to the topics of justice, legitimacy, equality, democracy, liberty, sovereignty, and the role of history in the political and social world. This course is designed to be the first in a three-semester sequence on the history of political thought, and students are encouraged, but not required, to take the courses in chronological sequence. The first semester begins with ancient Greek political thought, and follows its development up to the early 16th century.

---

**L84 Lw St 392 History of Political Thought II: Legitimacy, Equality, and the Social Contract**

Government is often justified as legitimate on the grounds that it is based on the consent of the governed. In History of Political Thought II, "Legitimacy, Equality, and the Social Contract," we examine the origins of this view, focusing our attention on canonical works in the social contract tradition, by Thomas Hobbes (1588-1679), John

Locke (1632-1704), Jean-Jacques Rousseau (1712-1778), David Hume (1711-1776), and Immanuel Kant (1724-1804). This course is the second in a three-semester sequence on the history of political thought. Students are encouraged but not required to take all three courses. Prerequisite: One previous course in political theory or political philosophy.

---

**L84 Lw St 393 History of Political Thought III: Liberty, Democracy and Revolution**

How, if at all, should the political institutions of the modern state express and secure the liberty and equality of citizens? What is the political significance of private property? Is world history to be understood as progress towards one best form of government - capitalist democracy, perhaps, or communism? What forces drive history? We shall address these and other timeless political questions through close reading and rigorous analysis of classic texts in the history of Western political thought. Authors to be studied will include Kant, Hegel, Marx, Tocqueville, John Stuart Mill, and Nietzsche. Prerequisite: one previous course in political theory or political philosophy. The course is designed to be the third in a three-semester sequence on the history of political thought, and students are encouraged but not required to take the courses in chronological sequence.

**L84 Lw St 4002 Directed Fieldwork in Legal Research**

A fieldwork project in empirical and/or archival legal research under the direction of a member of the Washington University faculty. The fieldwork may be planned and undertaken individually or as part of a formal project. Permission of supervising faculty member and director of the program is required.

Credit variable, maximum 6 units. EN: H

---

**L84 Lw St 4013 Negotiating Major Legislation in Congress**

This course examines the outcomes of the legislative process in the United States. The first third of the course will examine key concepts and major determinants of the negotiation process: majority rule instability, agenda control, political parties, the amendment process, and the uncovered set. The rest of the course will examine the negotiations that led to some of the most significant legislation in the past 100 years, from the Federal Reserve Act of 1913 through the Voting Rights Act of 1965 to the immigration bill of 2006. Along with other assignments, each student will write several drafts of a major research project on a major piece of legislation. Each research project will examine the amendments offered, the strategic intentions of the amendments' sponsors, the agenda process, and the role of party. Prerequisite: Poli Sci 101B.

Same as L32 Pol Sci 4013

Credit 3 units. A&S IQ: SSC, WI EN: S

---

**L84 Lw St 4030 Political Theory of Education**

This course explores issues of authority, legitimacy, citizenship, freedom, and equality through contemporary readings in the political theory of education. What is to be done when parents, citizens, and educational experts make conflicting judgments about the proper

education of children? When should the state defer to parental judgments and what are the grounds for legitimately refusing to do so? How should public schools aim to equip their students for the responsibilities of citizenship in a diverse liberal democratic state? What do the concepts of equality and equality of opportunity mean in the context of education, and (how) should governments pursue these values through education policy? We shall explore these issues through contemporary works of political theory as well as through considering a number of important U.S. court cases, including those dealing with the schooling of children from minority religious and cultural groups, affirmative action in university admissions, and school desegregation plans. Prerequisite: one previous course in political theory or political philosophy.

#### L84 Lw St 4080 Voting Rights

This course will study legal concepts of voting rights and election law that impact the ability of citizens to access and participate in the democratic process. It will include the opportunity for students to directly engage in observing, monitoring, or advancing the right to vote during the 2008 elections. Election law changes rapidly and is the subject of legal and political dispute in a number of areas that will affect the franchise during the 2008 elections. This course will examine federal constitutional and statutory law governing the right of suffrage and assess current controversies in these areas. While there is no specific "right to vote" explicitly stated in the U.S. Constitution, over time, it has been amended or interpreted to protect the right of franchise from being abridged based on race, gender, property ownership, age and other qualifications. Legislative enactments have also established rights with respect to voting. Each extension of voting rights has been a product of and resulted in social and political change. This course will examine the interplay of law and politics in the right to vote. The course will begin with the study of constitutional foundations, statutory protections and case law. We will then apply these principles to current issues in voting rights, including voter registration, voter identification, provisional ballots, voting machines, access for people with disabilities, felony disenfranchisement, voter suppression and voter fraud. Students will apply this knowledge to voting rights during the 2008 elections through hands-on involvement in voter education, monitoring or advocacy. The course will conclude with an assessment of the current issues in light of observations made by students during the 2008 elections, with an eye toward the advancement of election law and full enfranchisement in the future. The course involves the study of fundamental Supreme Court cases, interactive discussion of contemporary debates, and review of current litigation and legislative proposals. The course will be supplemented by occasional guest visits by election officials, lawyers, legislators, voting rights advocates or others.

#### L84 Lw St 425A Law, Religion, and Politics

What is the role of religious argument in politics and law? What kinds of arguments are advanced, and how do they differ from one another? Are some of these arguments more acceptable than others in a liberal democracy? This course will explore these questions through the work of legal scholars, theologians, and political theorists. Our topics include the nature of violence and coercion in the law, constraints on public reason, the relationship between religion and government, and the nature of religious practice and tradition.

---

#### L84 Lw St 429 Feminist Political Theory

This course asks how feminist thinkers from various political and intellectual traditions critique, adopt and transform political theories of justice, citizenship, property and the state. To uncover how different feminist theories have been adopted in the struggle for political transformation and social justice, we will pursue two main lines of inquiry. The first asks how feminist thinkers from various traditions critique and engage the history of political thought within the social contract tradition. We will ask, in particular, how gender, race, slavery, colonialism and empire shape conceptions of citizenship and property. We will also examine transnational feminist critiques of the public/private division in the Western political theory canon as it impacts the role of women and the social construction of women's bodies. During the second half of the semester, we will ask how various transnational social movements have engaged and adopted feminist theories in efforts to resist state violence, colonialism, labor exploitation and resource extraction. In following these lines of inquiry we will draw from postcolonial, decolonial, liberal, Black, radical, Marxist and Chicana feminist perspectives. Part of our goal will be to uncover how various feminist theories treat the relationship between politics and embodied experience, how gendered conceptions of family life affect notions of political power and how ideas about sexuality and sexual conquest intersect with empire-building. Majors and minors in WGSS receive first priority. Other students will be admitted as course enrollment allows.

---

**L84 Lw St 4510 Race, Ethnicity, and Migration**

This course will explore theoretical and empirical analyses of race, ethnicity and migration through a sociological lens, focusing on children of immigrants and later-generation descendants of migrants in the United States. Students will compare the experiences and outcomes of various racial and ethnic "groups," including whites/Europeans, Blacks/African-Americans, Latinos/Hispanics, and Asians, investigating how migration processes and patterns shape racial/ethnic group formations and inequalities. Examples of specific topics related to these issues include: assimilation; ethnic and racial identities; multiraciality; language; legality; intergroup relations; and education. This course will be taught in a seminar style where student engagement within class discussions is required and one's participation is central to the learning process. Prerequisite: successful completion of an introductory-level Sociology course or consent of the instructor. Graduate students should enroll in the 500-level offering.

Same as L40 SOC 4510

---

**L84 Lw St 461A Intro to Environmental Law**

Survey of the most prominent federal laws designed to control pollution and protect human health and the environment. Examines laws applicable to environmental impact statements, biodiversity, air pollution, water pollution, and hazardous waste. Discusses the role of state law and cooperative federalism, as well as the roles of the courts, the legislature, and the administrative state in protecting the environment.

Same as L82 EnSt 461

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L84 Lw St 4646 Democracy: Theory And Practice**

What does it mean to govern democratically? Why value democratic government? What role, if any, should notions of rights, representation, and deliberation play in theorizing about and empirical research into problems of democratic governance? What lessons can we learn about democracy from scholars writing in the traditions of feminist theory and critical race theory? What is the relation between democracy and knowledge? Should democracy extend beyond the boundaries that define the nation-state? Should (some aspects of) the economy be democratized? During the fall of 2018, we will have the opportunity to ask these and related questions in the context of the U.S. midterm election. We will engage in debates about contemporary democratic theory while we follow developments in the campaigns leading up to the November election.

Same as L32 Pol Sci 4646

Credit 3 units. A&S IQ: SSC EN: S

---

**L84 Lw St 470 Interdisciplinary Topics: The Idea of the Law: Text & Traditions**

Various interdisciplinary topics are explored that may include around the humanities, social sciences and data sciences.

Same as L93 IPH 470

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L84 Lw St 472 Social Theory and Anthropology**

A seminar on social theory and its ethnographic implications. Course combines major works of modern social theory, including Marx, Weber, and Durkheim, with current work by contemporary anthropologists, such as Clifford Geertz, Eric Wolf, Marshall Sahlins, and Fredrik Barth, and ethnographers from related disciplines, such as Pierre Bourdieu and Paul Willis. Prerequisite: Previous anthropology coursework or permission of instructor.

Same as L48 Anthro 472

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC EN: S

---

**L84 Lw St 487 Topics in American History: Race and Drugs in American History**

This course explores the racial construction of the use of legal and illegal substances in American history from the mid-19th century to the present. We will spend time engaging in a historical analysis of the social, economic, and racial dynamics that defined drug addiction in popular imagination, and examine how these factors contributed to discussions about legality, access to substances, one's ability to be rehabilitated, and criminal status. Regarding criminality we will particularly explore sociological and theoretical perspectives of labeling, habitual and occasional offenders, and moral panic in order to understand how racial minority groups were targeted for different rhetorical, legislative, and economic purposes. One major goal of the course will be to outline the early 20th century beginnings of the war on drugs and connect it to the century long growth of a militarized police system and prison industrial complex. We will secondly work to understand the role of local and national political actors, law enforcement, and the media in manufacturing and maintaining connections between race, crime and drugs. Ultimately, we will use our study of drugs to contextualize 21st century issues of police violence, increases in homicide in minority communities, mass incarceration, poverty, segregation, and mass movements of protest.

Same as L22 History 487

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L84 Lw St 4981 Advanced Seminar: Historical Perspectives on Human Rights**

This course offers a historical perspective on the modern international human rights regime, using materials drawn from diplomatic, legal, political, and cultural studies. Successful completion of this seminar involves designing, researching, and writing a 25-30 page paper on a historically-oriented, human-rights-related topic of your choice.

Same as L22 History 4981

# Comparative Literature and Thought Major

## Program Requirements

- **Total units required:** 27.5-48.5
  - Required Courses (27-36 units):
    - Humanities Core Courses (12 units): All Comparative Literature and Thought (CLT) majors will take two core (one required) courses in "Literature and Arts" and two core courses in "Thought."
    - Upper-Level Courses (15-24 units): All CLT majors will complete at least eight upper-level CLT courses (24 units) at the 300-/3000-level or above. Up to three 300-/3000-level Humanities Core Courses taken to satisfy the 12-unit core requirement above can count toward the eight-course upper-level requirement.
  - Capstone (0.5 units or honors program): All CLT majors will complete a CLT capstone project (unless CLT is not their primary major).
  - Language Study (3-12 units): All CLT majors will pursue second language study. Up to 6 units of foreign language courses focused on literature or intellectual culture may be counted toward the required 24 units of upper-level courses.

Comparative Literature and Thought (CLT) immerses students in modern and contemporary literary and intellectual cultures and in the textual and philosophical traditions that animate those cultures. The curriculum attends to the emergence of a global textual and media culture as well as to the ways in which nations, subcultures, and individuals embrace and resist that global emergence.

While our faculty and students have wide-ranging interests – intellectual history, translation, arts practice, comparative arts, digital humanities, media studies and book history, political and legal thought – we have built our major and minor upon a foundational curriculum for the humanities. That foundational curriculum focuses on a set of themes and problems that have long preoccupied students and scholars: the nature of textual culture, the philosophical and ethical engagements of literature and the arts, the pressure of politics on literature and thought, the reciprocal pressure of literature and thought on politics, the specific bearing of language on intellectual life, and the transformations and excitations produced whenever texts are translated to another language or to another medium.

Many of our students are both scholars and makers. In addition to courses in translation practice, we offer courses in multilingual creative writing and arts journalism. Although some of our students do traditional scholarly work for their capstones in the major, others do creative final projects. Our digital humanities group offers students opportunities to participate in collaborative research projects comparable to those offered to students in the natural and social sciences.

The introductory core of the CLT curriculum engages a major in CLT with literature, intellectual history, social and political thought, and cultural theory. As students progress through the major, they may develop an emphasis in one of those areas, or they may maintain allegiances that blend both literature and thought.

## Required Courses

### Humanities Core Courses

The CLT Humanities Core is meant to introduce major texts (in both secular and sacred canons) and foundational methods of inquiry in the humanities (formal, generic, historicizing, skeptical, and appreciative) as well as to provide an historical perspective on the development of current categories of sociocultural analysis (i.e., race, ethnicity, sex, and gender).

All CLT majors must take two core courses in Literature and Arts (including one required course) and two core courses in Thought for a total of 12 units in the Humanities Core.

### Literature and Arts

Code	Title	Units
<i>Required course:</i>		
Comp Lit 211	World Literature	3
<i>Plus one of the following:</i>		
Comp Lit 313E	Introduction to Comparative Arts	3
IPH 201C	Classical to Renaissance Literature: Text & Traditions	3
IPH 3050	Literary Modernities in Europe and America: Text & Traditions	3
IPH 307	Literary Modernities in East Asia: Text & Traditions	3

### Thought

Code	Title	Units
IPH 201A	Puzzles and Revolutions: Text & Traditions	3
IPH 203C	Early Political Thought: Text & Traditions	3
IPH 207C	Modern Political Thought: Text & Traditions	3
IPH 209	Scriptures and Cultural Traditions: Text & Traditions	3
IPH 310	An Intellectual History of Sex and Gender: Text & Traditions	3
IPH 320	An Intellectual History of Race and Ethnicity: Text & Traditions	3

CLT also offers special first-year programs (FYP) and Ampersand courses that will perform the intellectual functions of courses in the Humanities Core above. Please contact the CLT department for additional information about those offered courses, as they change each semester.

## Upper-Level Courses

CLT majors must complete 24 upper-level units. To build on the Humanities Core, these students will take five to eight additional courses at the 300/3000 or 400/4000 level. (Note that several courses in the Humanities Core are offered at the 300/3000 level; these courses can count toward the 24-unit upper-level major requirement.)

Up to 6 units of foreign language courses focused on literature or intellectual culture may be counted toward the required 24 units of upper-level courses with permission of the CLT Director of Undergraduate Studies; students must seek and obtain that permission prior to enrolling in the course.

## Language Study

CLT majors should complete four semesters (roughly 12 units) of sequenced courses in a foreign language *or* two foreign language courses at the 300/3000 level *or* one foreign language course at the 400/4000 level. (Students will note that three language courses taken in sequence satisfy the Arts & Sciences graduation requirement in Language and Culture.)

## Capstone

The final semester or two in the CLT major comprises an important culmination. Students enrolled in CLT as their primary major will complete a CLT capstone project. Many will simply revise essays from two upper-level courses and write a sustained essay reflecting on how these exemplify the skills and concerns they have developed over the course of the major. In a few cases, students will complete their capstone requirement by means of an internship. The capstone projects for students pursuing honors are described below.

## Additional Information

### Honors Program in Comparative Literature and Thought

CLT offers an honors program that requires an additional 6.5 units of course work. Students who have attained a 3.7 grade point in courses in the major are encouraged to apply for admission to the honors program as early as the second semester of their sophomore year and no later than the beginning of the second semester of their junior year. Students seeking CLT honors have two options: honors by thesis or honors by course work. We expect that most CLT honors students will complete their majors with a thesis.

For most students, the honors program will begin in the fall of the junior year, when students enroll in a course in Theory and Research Methods that culminates in the production of a substantial research paper and oral defense. This course is open to students across the humanities. (For students who decide to pursue honors belatedly, the Theory and Research Methods course may be taken during the fall of senior year.)

In the spring of junior year, students pursuing theses will enroll in a short course of four workshops that address how to refine a thesis topic. The following year, this cohort of CLT honors students will complete their thesis in two semesters of highly collaborative workshops.

In a few instances, CLT honors students will forego a thesis or creative project and will instead enroll in two more 400-level CLT courses, with a capstone essay reflecting on the coherence of those advanced courses or on the friction between them.

Students may be awarded honors, high honors, or highest honors based on the quality of their honors capstone materials. Please note that CLT honors are separate from Latin honors.

Phone: 314-935-4200

Website: <https://complitantthought.wustl.edu/>

## Comparative Literature and Thought Major, Comparative Arts Specialization

### Program Requirements

- **Total units required:** 30-50.5
  - Required Courses (27-36 units):
    - Humanities Core Courses (12 units): All Comparative Literature and Thought (CLT), Comparative Arts (CA) Specialization majors will take two required core courses in "Literature and Arts" and two core courses in "Thought."
    - Upper-Level Courses (15-24 units): All CA majors will complete at least eight upper-level CLT courses (24 units) at the 300-/3000-level or above, including one course with the HTH attribute. Up to three 300-/3000-level Humanities Core Courses taken to satisfy the 12-unit core requirement above can count toward the eight-course upper-level requirement.
    - Capstone (0.5 units *or* honors program): All CA majors will complete a CA or CLT capstone project (unless CA or CLT is not their primary major).
    - Applied Art and Language Study (3-14 units): All CA majors will pursue applied arts credits and, if necessary, language study. Up to 6 units of foreign language courses focused on literature or intellectual culture may be counted toward the required 24 units of upper-level courses.

A student pursuing the Comparative Literature and Thought Major, Comparative Arts Specialization, will adapt the Comparative Literature and Thought Major (p. 458) as follows:

1. Students will select Comp Lit 313E Introduction to Comparative Arts (3 units) as one of the four courses from the Humanities Core. As an alternative, they may substitute a first-year program or Ampersand seminar in Comparative Arts.
2. Upper-level courses for the major must include one course in the history or theory of a non-literary art practice (HTH course attribute). If such courses are not cross-listed in CLT, students may enroll with the permission of their CLT advisor and the CLT Director of Undergraduate Studies.
3. Students must complete at least two semesters of applied arts courses for a minimum of 3 units.

## Required Courses

### Humanities Core Courses

The CLT Humanities Core is meant to introduce major texts (in both secular and sacred canons) and foundational methods of inquiry in the humanities (formal, generic, historicizing, skeptical, and appreciative) as well as to provide an historical perspective on the development of current categories of sociocultural analysis (i.e., race, ethnicity, sex, and gender).

All CA majors will take the two required core courses in Literature and Arts and two core courses in Thought for a total of 12 units in the Humanities Core.

#### Literature and Arts

CLT also offers special first-year programs (FYP) and Ampersand courses that will perform the intellectual functions of courses in the Humanities Core above. Please contact the CLT department for additional information about those offered courses, as they change each semester.

### Upper-Level Courses

CA majors must complete 24 upper-level units, including one course in the history or theory of a non-literary art practice (HTH course attribute). To build on the Humanities Core, these students will take five to eight additional courses at the 300/3000 or 400/4000 level. (Note that several courses in the Humanities Core are offered at the 300/3000 level; these courses can count toward the 24-unit upper-level major requirement.)

Up to 6 units of foreign language courses focused on literature or intellectual culture may be counted toward the required 24 units of upper-level courses with permission of the CLT Director of Undergraduate Studies; students must seek and obtain that permission prior to enrolling in the course.

### Applied Arts and Language Study

CA majors must complete at least two semesters of applied arts courses for a minimum of 3 units:

- Students who take 3 to 5 units of applied arts must also take one of the following:
  - Three consecutive semesters of foreign-language study with a grade of a C or better; or
  - One semester of a language course at the 300/3000 level or higher.
- Students who take at least 6 units of applied arts are not required to take additional foreign language courses above the Arts & Sciences graduation requirement in Language and Culture.

### Capstone

The final semester or two in the CA major comprises an important culmination. Students enrolled in CA as their primary major will complete a CLT capstone project. Many will simply revise essays from two upper-level courses and write a sustained essay reflecting on how these exemplify the skills and concerns they have developed over the course of the major. In a few cases, students will complete their capstone requirement by means of an internship. Students pursuing specializations in CA have the option of completing a creative project capstone. The capstone projects for students pursuing honors are described below.

## Additional Information

### Honors Program in Comparative Literature and Thought, Comparative Arts Specialization

CA offers an honors program that requires an additional 6.5 units of course work. Students who have attained a 3.7 grade point in courses in the major are encouraged to apply for admission to the honors program as early as the second semester of their sophomore year and no later than the beginning of the second semester of their junior year. Students seeking CA honors have three options: honors by thesis, honors by creative project, or honors by course work. We expect that most CA honors students will complete their majors with a creative project.

For most students, the honors program will begin in the fall of the junior year, when students enroll in a course in Theory and Research Methods that culminates in the production of a substantial research paper and oral defense. This course is open to students across the humanities. (For students who decide to pursue honors belatedly, the Theory and Research Methods course may be taken during the fall of senior year.)

In the spring of junior year, students pursuing theses or creative projects will enroll in a short course of four workshops that address how to refine a thesis or creative project topic. The following year, this cohort of CLT honors students will complete their honors project in two semesters of highly collaborative workshops.

In a few instances, CLT honors students will forego a thesis or creative project and will instead enroll in two more 400-level CLT courses, with a capstone essay reflecting on the coherence of those advanced courses or on the friction between them.

Students may be awarded honors, high honors, or highest honors based on the quality of their honors capstone materials. Please note that CLT honors are separate from Latin honors.

## Germanic Languages and Literatures Major

### Program Requirements

- **Total units required:** 25

### Requirements

Students interested in studying German may declare German as their major or second major. Majors and second majors are required to complete 25 units of course work (German 202D and above), at least 12 of which must be at the 400 level, with a grade of C- or higher. If students begin German at Washington University and follow the

regular sequence of courses (German 101D Basic German: Core Course I–German 102D Basic German: Core Course II–German 201D Intermediate German: Core Course III), they will be ready to begin the German major after three semesters. With the exception of German 3400 and its 1-unit discussion section, only courses taught in German will count toward the major. All majors and second majors are required to participate in the senior assessment interview in the final semester of their senior year.

Applications for admission to the honors program must be submitted by the first week of classes in the student's final year of study.

**Note:** For both majors and minors, at least half of the courses at the 300 level and above must have been acquired either in residence at Washington University or in overseas programs affiliated with Washington University.

## Additional Information

### Study Abroad

German majors or minors are encouraged to participate in one of our overseas study programs. The German department sponsors a semester and a year abroad at the University of Tübingen, Germany. To participate in the Tübingen program, students must complete German 202D (for the semester program), German 301D (for the year program), or their equivalent by the time the program begins. Upon returning to campus, German majors are required to take at least one 400-level course (other than German 497–German 498) during their senior year.

Washington University sponsors a summer program in Berlin, Germany. Students who have taken at least one semester of German may be eligible for this intensive language program. Students studying business or engineering/computer science are also encouraged to consider the study abroad programs in Germany offered by Olin Business School and the McKelvey School of Engineering.

## Departmental Distinction in German and Latin Honors in German

Students who wish to be eligible for distinction in German must undertake a project in German during their final year at Washington University. There are three ways to achieve honors in German: (1) honors by course work and portfolio; (2) honors by creative project; or (3) honors by thesis. Students receiving distinction in German may additionally qualify for Latin honors in German. By May 15 of the junior year, these students choose a project or portfolio with the help of a faculty advisor from the department, enroll in the appropriate course work during the senior year, and submit completed projects immediately following spring break of the senior year.

# Comparative Literature and Thought Minor

## Program Requirements

- **Total units required:** 15

Comparative Literature and Thought (CLT) immerses students in modern and contemporary literary and intellectual cultures and in the textual and philosophical traditions that animate those cultures. The curriculum attends to the emergence of a global textual and media culture as well as to the ways in which nations, subcultures, and individuals embrace and resist that global emergence.

While our faculty and students have wide-ranging interests – intellectual history, translation, arts practice, comparative arts, digital humanities, media studies and book history, political and legal thought – we have built our major and minor upon a foundational curriculum for the humanities. That foundational curriculum focuses on a set of themes and problems that have long preoccupied students and scholars: the nature of textual culture, the philosophical and ethical engagements of literature and the arts, the pressure of politics on literature and thought, the reciprocal pressure of literature and thought on politics, the specific bearing of language on intellectual life, and the transformations and excitations produced whenever texts are translated to another language or to another medium.

Many of our students are both scholars and makers. In addition to courses in translation practice, we offer courses in multilingual creative writing and arts journalism. Although some of our students do traditional scholarly work for their capstones in the major, others do creative final projects. Our digital humanities group offers students opportunities to participate in collaborative research projects comparable to those offered to students in the natural and social sciences.

The introductory core of the CLT curriculum engages a minor in CLT with literature, intellectual history, social and political thought, and cultural theory. The minor requires five courses, four of which must be drawn from the core curriculum; the fifth course may be taken from the same roster of core courses or from more advanced courses in CLT.

## Required Courses

### Humanities Core Courses

The CLT Humanities Core is meant to introduce major texts (in both secular and sacred canons) and foundational methods of inquiry in the humanities (formal, generic, historicizing, skeptical, and appreciative) as well as to provide a historical perspective on the development of current categories of sociocultural analysis (i.e., race, ethnicity, sex, and gender).

All CLT minors must take two core courses in Literature and Arts (including one required course) and two core courses in Thought for a total of 12 units in the Humanities Core. CLT minors must take a fifth CLT course.

## Literature and Arts

Code	Title	Units
<i>Required course:</i>		
Comp Lit 211	World Literature	3
<i>Plus one of the following:</i>		
Comp Lit 313E	Introduction to Comparative Arts	3
IPH 201C	Classical to Renaissance Literature: Text & Traditions	3
IPH 3050	Literary Modernities in Europe and America: Text & Traditions	3
IPH 307	Literary Modernities in East Asia: Text & Traditions	3

## Thought

Code	Title	Units
IPH 201A	Puzzles and Revolutions: Text & Traditions	3
IPH 203C	Early Political Thought: Text & Traditions	3
IPH 207C	Modern Political Thought: Text & Traditions	3
IPH 209	Scriptures and Cultural Traditions: Text & Traditions	3
IPH 310	An Intellectual History of Sex and Gender: Text & Traditions	3
IPH 320	An Intellectual History of Race and Ethnicity: Text & Traditions	3

CLT also offers special first-year programs (FYP) and Ampersand courses that will perform the intellectual functions of courses in the Humanities Core above. Please contact the CLT department for additional information about those offered courses, as they change each semester.

Website: <https://complitandthought.wustl.edu/>

## Data Science in the Humanities Minor

### Program Requirements

- **Total units required:** 15

Any humanities student will feel at home in this minor and in its active research community. No previous experience with computational methods is required; the curriculum equips students with the skills and knowledge necessary to navigate the field of Digital Humanities, and those skills and that knowledge are eminently "transferable." Computational approaches to questions in the humanities are slowly migrating from the methodological fringes of the disciplines of cultural, artistic and historical inquiry. Students in the minor will have the opportunity to engage with the emerging future of their fields and to help shape that future.

A student who *does* have previous computational experience — a computer science major, for instance — will also benefit from this minor. By grafting that knowledge to the problems of cultural and historical analysis and working on challenging new projects within unfamiliar fields, computer-savvy students will find themselves becoming more versatile and more attractive to graduate admissions committees and potential employers.

For the minor, students will take 15 units of course work, at least 6 units of which should be drawn from the four core DASH courses, plus at least 3 units of internship (which can be repeated for up to 8 credits). The internship research experience is required and consists of working under the director of a faculty on a project through IPH or the Humanities Digital Workshop. The DASH courses and internship can be supplemented with elective courses in Computational Humanities, Digital Culture and Design, or Computer Science.

## Requirements

### 1. Courses (6-10 units):

Code	Title	Units
IPH 312	Introduction to Digital Humanities	3
IPH 431	Statistics for Humanities Scholars: Data Science for the Humanities	3
IPH 430	Data Manipulation for the Humanities	1
IPH 432	Programming for Text Analysis	3

### 2. Internships (3-8 units):

Code	Title	Units
IPH 399	Internship in Digital Humanities (Can be repeated for up to 8 total credits)	3-8

### 3. Electives (up to 6 units)

## Internship Research

The DASH minor is unusual among humanities programs in its focus on hands-on undergraduate research via internship. STEM fields provide relatively straightforward pathways toward research, whereas humanities students sometimes struggle to define what humanities research entails and how to get involved. Research opportunities are built into the DASH minor. DASH requires every student to take at least 3 units of directed research during an internship on a faculty-led project, and students are encouraged to work on more than one project or to advance their skills during another semester or summer. Students may take up to 8 units of internship/research. Lists of projects can be found on the IPH and Humanities Digital Workshop websites.

Every summer, the Humanities Digital Workshop invites applications from students for its summer fellowships. The fellowships pair students with humanities faculty engaged in digital humanities projects for 8 weeks, and past participants have overwhelmingly found this experience to be valuable.

Phone: 314-935-4200  
Email: [complitandthought@wustl.edu](mailto:complitandthought@wustl.edu)

## Germanic Languages and Literatures Minor

### Program Requirements

- **Total units required:** 16

### Required Courses

Students who intend to minor in German must complete 16 units of course work (German 202D Intermediate German: Core Course IV and above) with a grade of C- or higher. With the exception of German 3400, only courses taught in German will count toward the minor. At least 3 of the 16 required units must be at the 400 level.

### Additional Information

- At least half of the courses at the 300 level and above must have been acquired either in residence at Washington University or in overseas programs affiliated with Washington University.
- Any credits obtained at the 300 or 400 level during the summer institute program in Göttingen may count toward the minor.

Phone: 314-935-4200  
Email: [german@wustl.edu](mailto:german@wustl.edu)  
Website: <https://german.wustl.edu/undergraduate>

## Legal Studies Minor

### Program Requirements

- **Total units required:** 18

The minor in legal studies requires six courses (18 graded units), at least three of which (9 units) must be upper-division (300- or 400-level) courses. Two of the six courses may be drawn from the student's major, but as in all College of Arts & Sciences programs, they cannot be double-counted (i.e., applied to both the major and the minor). The six courses also must be distributed across three of four thematic subject areas. For details, please visit the Legal Studies website or consult the Director of Legal Studies.

Contact: Frank Lovett  
Phone: 314-935-4200  
Email: [legalstudies@wustl.edu](mailto:legalstudies@wustl.edu)  
Website: <https://legalstudies.wustl.edu/>

## Medieval and Renaissance Studies Minor

### Program Requirements

- **Total units required:** 18

Students pursuing the minor in Medieval and Renaissance Studies must complete two years of college-level language study in Spanish, French, Italian, Latin, German, Arabic or Greek, and they are encouraged to continue their foreign-language study further. Students are expected to take six additional courses, three of which should come from the following list:

### Required Courses

Code	Title	Units
Art-Arch 113	History of Western Art, Architecture & Design	3
History 101C	Western Civilization	3
IPH 201C	Classical to Renaissance Literature: Text & Traditions	3
IPH 203C	Early Political Thought: Text & Traditions	3
IPH 209	Scriptures and Cultural Traditions: Text & Traditions	3

### Additional Information

Students must also take three courses in medieval or renaissance studies from at least two different departments or programs. Students will select these three courses in consultation with their minor advisor.

- Courses must be drawn from at least two departments or programs, and at least one course must significantly address non-Western material.

Interested students may pursue the Medieval and Renaissance Studies Minor under the auspices of Comparative Literature and Thought. The minor offers students the opportunity to gain a broad and global understanding of the medieval and Renaissance world through inquiry in multiple disciplines, including literature, history, philosophy, religious studies, art history, and music.

Students may choose from multiple offerings on medieval and Renaissance topics that range in geographical reach to include the West, the Near East, the Far East, and the Global South.

Phone: 314-935-9336  
Email: rhenke@wustl.edu  
Website: <https://complitandthought.wustl.edu/>

## Translation Studies Minor Program Requirements

- **Total units required:** 15

### Required Courses

Code	Title	Units
<i>Required course:</i>		
Comp Lit 394	Worldwide Translation: Language, Culture, Technology	3
<i>Plus three of the following:</i>		
Comp Lit 211	World Literature	3
Comp Lit 351	A World of Words	3
IPH 310	An Intellectual History of Sex and Gender: Text & Traditions	3
IPH 3123	Introduction to Digital Humanities	3
IPH 320	An Intellectual History of Race and Ethnicity: Text & Traditions	3

### Additional Courses

In addition to the four required courses listed above, students must take the following:

- A 400-/4000-level Translation practicum (3 units)  
*or*
- A course in Translation Studies (3 units)

### Additional Requirements

Translation Studies minors are also expected to complete three sequenced courses of at least 3 units each in a single foreign language. (Note that this sequence of courses will also satisfy the Arts & Sciences Language and Cultural Diversity [LCD] requirement.)

Phone: 314-935-4200  
Email: [complitandthought@wustl.edu](mailto:complitandthought@wustl.edu)  
Website: <https://complitandthought.wustl.edu/>

## Earth, Environmental, and Planetary Sciences

For students interested in studying the world beneath their feet or other worlds farther away, the Department of Earth, Environmental, and Planetary Sciences provides the tools for understanding the processes that shape our planet and other bodies within the solar system. Understanding the Earth system is also the key to addressing many environmental challenges, including climate change, water supply, and energy issues. Earth, environmental, and planetary scientists are uniquely poised to help solve some of society's most pressing problems. Because planets are complex systems, Earth, environmental, and planetary sciences is, by necessity, an interdisciplinary field. It

applies biology, chemistry, physics, and math to the investigation of topics such as early life on Earth, the structure of the Earth's deep interior, the nature of contaminant transport, and the surfaces of other planetary bodies.

For students who have developed a passion for the basic sciences and who are looking for a way to study these sciences outside of traditional disciplinary boundaries, Earth, environmental, and planetary sciences is an ideal choice of major. The department offers majors and minors in Earth Science, Environmental Science, and Planetary Science. All programs offer a range of customization that allows students to focus on topics with the greatest relevance to their academic interests and career plans.

All students have the opportunity to participate in faculty research programs; however, this participation is not required. Many of our students take advantage of these varied research opportunities, which provide them with valuable experience for future employment or for graduate school. Each year, several scientific papers and abstracts are co-authored by undergraduate students, and undergraduate students have presented papers at many national science meetings.

## Department Policies for Majors and Minors

**Minimum grade performance:** A grade of C- is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. Courses with grades of D may fulfill the College's 120 total units requirement, but they do not meet the departmental requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.

**Transfer credits and the School of Continuing & Professional Studies:** Course work completed at another college or university must have prior approval of the department to be used to fulfill major requirements. Courses taken through the School of Continuing & Professional Studies normally may not be substituted for courses required for an Earth, environmental, and planetary sciences major. Written consent from the director of undergraduate studies is required for any such substitutions to apply and must be sought before the course is taken.

**Graduate-level courses:** All Earth, environmental, and planetary sciences graduate courses (i.e., courses numbered 500 and above) are open to advanced undergraduates with permission of the specific course instructor.

- Environmental Science Minor (p. 478)
- Geospatial Science Minor (p. 479)
- Planetary Science Minor (p. 479)

## Courses

Visit online course listings to view semester offerings for L19 EEPS.

---

### L19 EEPS 103A Oceanography

Emphasis on geological, chemical, and physical oceanography. Topics: topography and origin of ocean basins; origin and composition of sea water; effect of compositional variations on biological productivity; dynamics of water movements, including coastal processes.  
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

---

### L19 EEPS 104 First-Year Seminar: Geology in the Field

This course is designed to develop foundational skills in field geology and Earth science while promoting leadership and teamwork. There are no prerequisites, and the class is suitable for students with little or no academic background in Earth science. Students are not required to have extensive outdoor experience, but they must demonstrate

enthusiasm for work in challenging environments. Students will receive training in a variety of geological field methods, including field mapping, sampling protocols, section measurement, and structural identification and analysis. This course is field-intensive, with multiple field exercises during class periods and two or three weekend field trips that will involve camping, caving, and backcountry hiking. This course is primarily suited for students who enjoy working outdoors and who intend to major in Earth, Environmental, and Planetary Sciences, Biology, Anthropology, or Archaeology. Course enrollment preference is given to first-year students.  
Credit 3 units. A&S: FYS A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 105 Habitable Planets

Why does the Earth have water oceans? Where did our atmosphere come from? Is Earth uniquely habitable among solar system bodies? This course is an exploration of the origins of volatiles such as water and carbon on planetary bodies and of the internal features that help to regulate our planet's surface conditions. The importance of magnetic fields, plate tectonics, and climate feedbacks with respect to the origins and sustenance of life on Earth will be discussed.  
Credit 3 units. A&S: FYS A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 106 First-Year Opportunity: Exploring the Planets

How do humans explore other worlds? This course will introduce how NASA and other space agencies explore our Solar System and beyond. The first part of the course will describe why we explore planets, and how decisions are made as to what missions to fly; the latter portion of the course then focuses on past, current, and planned missions to major Solar System bodies. Course content will include faculty- and guest lecturer-led presentations on spacecraft mission design and how missions are implemented. Students will give individual presentations on a planetary body of their choice, and will work in groups to study spacecraft missions currently in flight.  
Credit 3 units. A&S: FYS A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 108A Oceans and the Atmosphere

Basic concepts of the evolution and physical structures of the Earth's oceans and the atmosphere. Dynamic aspects of the oceans (waves, tides, tsunamis) and atmospheric circulation (weather). Role of biological processes (including anthropogenic) in defining the present oceans and atmosphere. Global climate issues discussed in EEPS 111.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 109A Quantitative Reasoning in Environmental Science

Introduction to practical mathematical methods for understanding environmental aspects of our planet, particularly how the environment changes with time through human interactions. Emphasis on intuitive approaches in devising simple relationships for understanding quantitative outcomes of natural processes. Introduction to basic statistical methods, including hypothesis testing, and how statistics can be applied to environmental problems.  
Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 111 Introduction To Global Climate Change In the 21st Century

Global climate and global climate change and their impacts on life and civilization. Integrated view of global climate and the diverse forces that can alter global climate. Historical and potential future consequences of global climate change on human life, our industrial civilization, and its sustainability.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

---

**L19 EEPS 112 First-Year Seminar: Engineering the Climate**

Geoengineering, the deliberate manipulation of the earth's climate, may be part of a solution to the predicted future global warming. Is this advisable, or even possible? Discussions, lectures, and readings used to learn how earth's climate works. Examination of some proposals for altering the climate. Past attempts for deliberate human alteration of natural systems discussed and evaluated. Consideration of geoengineering as an ethical issue. Prerequisite: first-year undergraduate status.

Credit 3 units. A&S: FYS A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 115 The Future of Energy**

The course will examine the topic of energy from many human-relevant perspectives in a primarily lecture-based format. Humans use an enormous amount of energy, at the staggering rate of 20 terawatts. Where does this energy come from? How long will it last? What are the consequences? This course will examine these questions and look at energy resources and their consumption from scientific, social, economic, ethical and political viewpoints. The course will first examine what energy is, as well its relation to other concepts such as heat, work, and power. We will then look at the way that energy is used by society. We will examine the different sources of energy, their availabilities, the pros and cons of using them, their consequences, and their futures. We will examine the impacts that the use of fossil fuels is having on the environment, primarily through pollution and greenhouse gas-driven climate change. We will examine the significant environmental injustices associated with energy, its production, and availability. Given that Earth receives more energy from the sun in one hour than all humans use in a year, opportunities for solar-based power (photovoltaic, wind, hydro, biomass) are plentiful. However, how we get to there from where we are now is not clear, and many questions remain (the role of nuclear power, the rate of transition, the role of government, the impacts of climate change, energy storage capabilities, battery vs. hydrogen fuel cell cars, etc.). This course will look at all of these topics related to all of the energy sources, including the roles they played in our past and the roles they might play in our future.

Credit 3 units. A&S IQ: NSM BU: SCI

---

**L19 EEPS 118A Geology of National Parks**

Survey of geologic processes occurring at the Earth's surface and its interior using national parks and monuments as the prime venue for presentation. Volcanism and mountain-building; the work of streams, glaciers, and wind; lake and coastline development; stratigraphy and sedimentation; and Earth history. Material presented in a geographic context, with emphasis on landforms and landscape evolution, relating geology to the development and settlement of the U.S.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 125 The Dinosaurs**

The public interest in dinosaurs makes them an ideal organism for exploring the nature of science. In this class, we will separate dinosaur fact from fiction with discussions of evolution, ecology, extinction, anatomy, and behavior. We will also examine the roles of dinosaurs in popular media.

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

---

**L19 EEPS 131 Natural Disasters**

Examination of the effects of natural hazards on landscapes of the Earth in general, as well as on populated areas specifically, through numerous case studies. Social, economic, and political consequences of natural disasters. Locations, particularly in the U.S.A., where disasters are likely to occur in the future. Nature of the hazards and what preparations are possible to minimize damage and the number of casualties.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 141 First-Year Seminar: Unearthing the Science of Climate Change**

How and why does the climate change? How does the climate system interact with human systems? This course investigates the physical principles of Earth's ever-changing climate, with a special focus on the present-day. Topics include Earth's energy balance; the components of the climate system, including the atmosphere; oceans, cryosphere, geosphere, and biosphere; natural and anthropogenic causes of climate change; climate change detection and attribution; weather extremes; and climate adaption/vulnerability in past and present human societies. Students will explore the science behind "hot topics" in climate change and learn how peer-reviewed science is communicated to popular audiences. The course format will be a mixture of lectures, demos, facilitated discussions, and student presentations. In addition to gaining scientific background on climate change, students will develop skills in scientific writing and communication to a variety of audiences. No prior coursework in earth science is necessary. This course is open to students of any background who wish to gain literacy in the science of climate change.

Credit 3 units. A&S: FYS A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 145 Land Dynamics: Case Studies of Environmental Sustainability**

This course is designed for first- and second-year students and will use lectures, discussions, GIS-related and computational exercises, and field trips to introduce students to a systems approach for identifying, characterizing, and solving issues associated with environmental degradation. The course will focus on three case studies. The first will cover rapid lake drawdown of Mono Lake in northern California due to engineered diversions and subsequent court-ordered recovery to an environmentally sustainable lake level. The second will focus on unresolved consequences associated with channelization and levee development on the lower Missouri River, which put federal agencies in conflict with one another on how to manage the river and its floodplains. The third will cover past and present Pb-Cu-Zn sulfide mining practices in Missouri and attempts to balance the need for these nonrenewable resources while minimizing environmental consequences.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 171A The Solar System**

Survey of the planets and satellites of our solar system. Includes results from Apollo manned missions to the Moon and spacecraft missions to the planets and their major satellites. Present ideas about the age, formation, and early history of the sun, Earth, and meteorites.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 201 Earth and the Environment**

Introduction to the study of the Earth as a dynamic, evolving planet. Emphasis on how internal and surface processes combine to shape the environment. Themes: Earth's interior as revealed by seismic waves; Earth history and global tectonics shown by changes to ocean floors, mountain-building, formation of continents, earthquakes, and volcanism; climate history and global biogeochemical cycles, influenced by circulation of atmosphere and oceans, ice ages, and human activity. Composition and structure of rocks and minerals. Part of the introductory sequence of courses for all Earth, Environmental, and Planetary Sciences and Environmental Studies majors. Three class hours and one two-hour lab a week.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 202 Introduction to Earth, Environmental, and Planetary Science**

Introduction to the Earth, its environment, and its place in the solar system. This course is intended to be a starting point for majors in the Department of Earth, Environmental, and Planetary Sciences, or as a standalone course for students from all interests and backgrounds. Themes for this course include Earth's history; the structure and composition of Earth and other planets; the evolution of Earth's surface; natural hazards; climate history; global biogeochemical cycles; and the solar system. No Prerequisites. Students may not take both EEPS 202 and EEPS 201 for college credit. Students who are interested in gaining more depth in lab or field techniques, or students who are planning to major in EEPS, should consider co-registering in EEPS 202L. Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 202L Introduction to Earth, Environmental, and Planetary Science Lab Section**

Students enrolling in EEPS 202, who are interested in gaining more depth in lab or field techniques, should consider co-registering in EEPS 202L. This optional 1-credit lab session is an opportunity for students who want to go deeper into Earth, Environmental, and Planetary Sciences. A combination of lab activities, discussion, and field trips will provide context and practical experience that will enhance understanding of EEPS 202 concepts while preparing students for advanced coursework. Sessions include opportunities to study geologic and environmental processes using hands-on approaches, including field and lab work. No prerequisites. Co-registration in EEPS 202 required. First year or sophomore standing required. Seven meetings, (typically every other week), plus one required field trip on a Saturday. (1 credit)  
Credit 1 unit.

---

**L19 EEPS 219 Energy and the Environment**

Examination of the topic of energy from many human-relevant perspectives. Humans use an enormous amount of energy, at the rate of 18 terawatts. Where does this energy come from? How long will it last? What are the consequences? Examination of energy resources and consumption from scientific, social, economic, and political viewpoints. Relationship of energy to concepts such as heat, work, and power. Energy use by society. Energy sources, pros and cons of use, availability now and in the future. Types, abundance, advantages, challenges of renewable energy sources.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 308 Topics in Environmental Sustainability**

Mathematical sustainability models; ocean, atmospheric, wetland, agricultural, hydrological, and energy sustainability; depletion of non-renewable resources; effects of pollution, human population, urban environment.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 315 Environmental Impacts of Human Energy Use**

Students will meet in an active-learning classroom (such as January 110 or McDonnell 362) and work in groups of up to six people at a table. Some projects will be short units, started and completed within a single class period. Other projects will be longer, extending over several class periods. The projects will include debates, analyses of recent journal articles and other primary sources, energy literacy assessments, the creation of educational modules, and quantitative problem-based learning. Classes will include some amount of lecturing, in measured doses, particularly from guest lecturers. Prerequisite: EEPS 202  
Credit 3 units. A&S IQ: NSM

---

**L19 EEPS 317 Soil Science**

Physical, chemical, and biological processes that occur within soil systems. Types of soils and their formation. Major components of soil, including soil water, minerals, organic matter, and organisms. Soils in wetlands and arid regions. Mapping of soils and their spatial variability. Cycling of nutrients and contaminants in soils. Sustainable use of soils and their role in climate change. Prerequisites: EEPS 202 or EECE 210 or BIOL 2950.  
Credit 3 units. A&S IQ: NSM

---

**L19 EEPS 319 Physical Oceanography**

Ocean circulation, El Nino, dynamical tides, tsunami, coastal ocean, enclosed seas, paleo-ocean, sedimentation, ice-atmosphere-ocean interaction, biology-carbon cycle.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 323 Biogeochemistry**

Basic concepts of how elements cycle among Earth's crust, oceans, and atmosphere, including perturbations due to human activities. Carbon, nitrogen, phosphorus, sulfur, and water cycles. Isotopic tracers. Feedbacks, forcings, and residence times. Redox cycling and thermodynamics. Biogeochemical box models, and changes in biogeochemical cycles over Earth history. Biogeochemistry of greenhouse gases, biogeochemical feedbacks in the climate system. This course is appropriate for EEPS students, engineering students, environmental science majors, and other students with interest in the environmental or geological sciences. Prerequisites: EEPS 202 or EECE 210.  
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 340 Minerals, Rocks, Resources and the Environment**

This course is designed for undergraduate majors and minors in the Department of Earth, Environmental, and Planetary Sciences to master fundamentals of mineralogy and their context within sedimentary, metamorphic, and igneous rocks, including an introduction to mineral resources and the role of minerals and mineral resources in current environmental issues. The course will provide fundamentals of mineralogy and crystallography, important mineral groups, and foundations of sedimentary, metamorphic, and igneous rock systems. It will provide an overview and lab demo of the modern analytical methods used in mineralogy. The course includes lecture (three hours per week) and a lab component (two hours per week). Prerequisites: EEPS 202 and Chem 105.  
Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

**L19 EEPS 342 Environmental Systems**

Introduction to the science of environmental systems and processes. Exploration of key functions of major environmental systems on land, in rivers and lakes, in air, at sea, and in diverse transitional settings at the boundaries between these environments. Evaluation of the ways in which humans alter and are affected by environmental systems. Interspersed throughout the semester will be a review of the major U.S. laws governing human management of environmental systems as well as case studies of environmental disparities in the St. Louis region. Prerequisites: EEPS 202 or EECE 210  
Credit 3 units. A&S IQ: NSM, AN

---

**L19 EEPS 353 Earth Forces**

Basic concepts regarding the forces that act upon the Earth, how geological materials react to these forces, and the time scale over which they respond. Emphasis on physical concepts needed to understand the geodynamical behavior of the Earth over a broad range of length

and time scales. Application and interpretation of geophysical methods to probe the interior of the Earth. Prerequisite: EEPS 202 (may be taken concurrently) and Phys 191. Three class hours and one two-hour laboratory a week.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 3630 Arctic Climate System

In this course we will learn about the Arctic region, with an emphasis on how the Arctic plays a key role in the global climate system. Students will be introduced to the basic physical characteristics of the Arctic and its climate. They will learn how the physical and geographic characteristics of the Arctic contribute to, and are shaped by, the Arctic climate system. Emphasis will be placed on studying the Arctic from a systems science perspective, highlighting the complex interactions between different subsystems of the Arctic, such as the hydrosphere, atmosphere, cryosphere, and biosphere. We will also explore how the Arctic has changed in the past, and what the future holds for the Arctic. Students will develop critical thinking and analysis skills through our emphasis on applying systems-level thinking to understand the interplay between physical principles, geography, landscape, climate, and human society. Class sections will be a mix of lectures and collaborative discussions on readings and course content. Most class sections will begin with a short reading recap. Completion of ENST 202 may be helpful but is not required; please ask instructor if you have questions about enrolling in this class.

Same as L82 EnSt 3630

Credit 3 units. A&S IQ: NSM, AN Art: NSM

---

### L19 EEPS 373 Fundamentals of Planetary Science

Overview of planetary science and astrobiology as practiced today, focusing on key scientific questions. Course is an entry point to the EEPS Planetary Science major, but also provides for those interested a deeper immersion than possible in EEPS 171A. Introduces major planetary science themes: surfaces, interiors, atmospheres, and magnetospheres, and their application to terrestrial planets, giant planets and their satellites, dwarf planets, and small bodies. Final portion of the course focuses on life, ocean worlds, and planetary habitability. Prerequisite: EEPS 202.

Credit 3 units. A&S IQ: NSM

---

### L19 EEPS 385 Earth History

Introduction to the concept of "deep time" and the parallel biological evolutionary and environmental changes that have occurred throughout Earth history. Topics include early evolution of life, rise of atmospheric oxygen, global glaciation, mass extinctions. Prerequisite: EEPS 202

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 386 The Earth's Climate System

This course introduces an integrative view of the Earth's climate system and its coupled components - the atmosphere, the oceans, the cryosphere, the biosphere, and the geosphere - and how they interact with each other. The goal is to provide the physical scientific background that is needed to understand climate variability and climate change, both natural and anthropogenic. Topics include energy balance; general circulation of the atmosphere and the oceans; the greenhouse effect; modes of variability such as El Niño; geologic-scale climate change in the geologic past; climate models; climate change detection and attribution; projection of future climates; and societal impacts. In addition to lectures, students will gain hands-on experience analyzing and interpreting real datasets through inquiry-based "practicum" exercises and in-class discussions. Prerequisites: EEPS 202.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 387 Geospatial Science

This course introduces students to the interdisciplinary field of geospatial science, which bridges the fields of geographic information systems (GIS), remote sensing, data science, and spatiotemporal analysis. This course will provide an overview of the fundamental concepts of geospatial science, including: visualizing and analyzing raster and vector datasets within a GIS database; coordinate systems, reference frames, and projections; the Geoid and geodetic techniques; remote sensing methods; image acquisition and interpretation; spatiotemporal analysis of geospatial data; sampling, interpolation, and time series analysis; uncertainty, error, accuracy, and precision. This course will be available at both the upper-level undergraduate and the graduate levels. Material will be covered through lectures, assignments, and computer exercises that will give students hands-on experience analyzing and interpreting real geospatial datasets. Exercises for students enrolled in the 587 option will be more in-depth and will require some basic programming experience and familiarity with quantitative techniques. These exercises will provide students with a sampling of geospatial science applications, such as environmental studies, cryospheric science, wildlife management, contagious disease monitoring, demography, and human geography. Students will complete a final project of their choosing that synthesizes the concepts and themes learned in this course; students enrolled in the 587 option are encouraged to develop a project proposal that aligns with their own research interests. Students particularly interested in GIS and remote sensing are further encouraged to also consider EnSt 380 and EEPS 407, respectively.

Credit 4 units. A&S IQ: NSM, AN

---

### L19 EEPS 390 Independent Study

Independent study for undergraduates, to be supervised by a faculty member. Credit to be determined. Prerequisite: permission of instructor.

Credit variable, maximum 3 units. Art: NSM

---

### L19 EEPS 400 Special Topics

The content of this course varies each time it is offered, as announced by the Department. With permission of the advisor, this course may be repeated for credit. Variable credit.

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 401 Earth Systems Science

This is a quantitative introduction to physical and chemical interactions among the atmosphere, oceans and solid earth. Topics covered include terrestrial atmospheric chemistry, geochemical cycles, inventories, and reservoirs of carbon, nitrogen, & sulfur, and bulk composition of the Earth. Prerequisite: EEPS 340.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 407 Remote Sensing

Use of different parts of the electromagnetic spectrum (visible, ultraviolet, infrared, and radio wavelengths) for interpretation of physical and chemical characteristics of the surfaces of Earth and other planets. Digital image systems and data processing. Prerequisite: Phys 192.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 408 Earth's Atmosphere & Global Climate

Structure and dynamics of Earth's atmosphere. Basic factors controlling global climate of Earth. Quantitative aspects of remote sensing of atmosphere. Remote sensing instrumentation. Prerequisites: Math 232 and Phys 191.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 409 Surface Processes

How do landscapes evolve? This course focuses on the physical processes of erosion and deposition that shape Earth and planetary surfaces. Course aims (1) understanding emergent landscape patterns, (2) reconstructing past conditions using the sedimentary record, and (3) predicting landscape change under climate scenarios. Review of relevant climatic and tectonic processes, followed by detailed discussion of rivers and deltas, hillslopes, weathering, glaciers, and coasts. Prerequisites: EEPS 353 or Physics 191.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 410 Earth Remote Sensing Methods and Instrumentation

Detection of electromagnetic radiation reflected, scattered, or emitted by components of the Earth system. Spectroscopy of remote sensing. Interpretation of received radiation via radiative transfer within a context of real measurements. Theory of instruments and detectors. Comparison of realized equipment to theoretical models.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 413 Introduction To Soil Science

Physical, chemical, and biological processes that occur within soil systems. Types of soils and their formation. Major components of soil, including soil water, minerals, organic matter, and organisms. Soils in wetlands and arid regions. Mapping of soils and their spatial variability. Cycling of nutrients and contaminants in soils. Sustainable use of soils and their role in climate change. Prerequisites: EEPS 202 and EEPS 323 or CHEM 106 or CHEM 112.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 422 Sedimentary Geology

Survey introduction to sedimentary processes and materials, including description, formation, and interpretation. Sedimentary materials account for most of the Earth's crust, and much of our understanding of Earth history comes from their examination. Many of our economic resources, such as coal, oil, and natural gas, and many environmental problems, are related to or derive from sediments. Goals: understanding and identifying sediments and processes and using them to interpret stratigraphic, paleoenvironmental, and tectonic information; obtaining the understanding of sedimentology that is relevant to environmental issues; increasing scientific literacy and critical thinking. Prerequisite: EEPS 202. Mandatory field trips.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 428 Hydrology

Survey of principles that govern the flow of water in river and groundwater systems in deep geologic environments. Basic equations of fluid flow, dynamics, and the characteristics of drainage basins, rivers, floods, and important aquifers. Exploitation of ground water systems. Prerequisite: EEPS 353 or Physics 191.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 430 Environmental Mineralogy

Topics connected with environmental mineralogy, some selected by students. Topics may include: mineral dust such as asbestos, containment materials for nuclear waste disposal, environmental ramifications of the processing and use of phosphate fertilizers, lead in the environment, acid mine drainage, microbial mediation of sulfide oxidation, minerals in the human body, weathering of building materials, materials engineering, and engineering of materials for more effective recycling. Three class hours and one two-hour laboratory a week. Participation in discussions, term paper, two field trips required. Most readings from primary sources.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

---

### L19 EEPS 437 Igneous & Metamorphic Petrology

Classification, origin, mineralogy, and geological occurrence of major igneous and metamorphic rocks. Laboratory emphasis on identification of rocks and minerals in hand specimens and in thin sections. Three class hours and one two-hour laboratory a week.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 441 Introduction to Geochemistry

Application of the principles of nuclear and physical chemistry to problems of the composition and differentiation of the Earth. Introduction to nucleosynthesis of the elements, stellar evolution, the periodic properties of the elements, chemical bonding and ionic substitution, geochronology and stable isotope geochemistry, and the age and composition of the Earth, Moon and meteorites. Prerequisites: EEPS 202 and Chem 106 or Chem 112.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 442 Aqueous Geochemistry

Introduction to the geochemistry of natural waters and the processes that alter their composition. Key principles of aqueous geochemistry are introduced and then used to describe the main controls of the chemistry of pristine and polluted soil, surface, and ground water environments. Topics covered include mineral solubility, complexation, acids and bases, carbonate chemistry, rock weathering and clay formation, adsorption and ion exchange, redox reactions, microbial energetics and redox zonation, the geochemistry of iron, sulfur, trace elements, and radionuclides, and geochemical kinetics. Geochemical modeling will be introduced. Prerequisites: EEPS 323 or Chem 105 or Chem 111A.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 444 Environmental Geochemistry

Introduction to the geochemistry of natural waters and the processes that alter their composition. Key principles of aqueous geochemistry and their application to describe the main controls on the chemistry of pristine and polluted soil, surface, and ground water environments. Acids and bases, mineral solubility, carbonate chemistry, chemical speciation, redox reactions, adsorption and ion exchange, and the speciation, mobility, and toxicity of metals. Prerequisites: EEPS 202 and Chem 106 or Chem 112.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 445 Organic Geochemistry

Introduction to the composition and analysis of organic material in the environment and geological record. Molecular to global-level perspective of organic matter cycling, reactivity, and fluxes; formation and classification of organic matter, its preservation potential, diagenesis, catagenesis, and kerogen formation; coal, petroleum, and gas formation and accumulation; biomarkers in Earth history; genetics and phylogeny of biomarker compounds; overview of analytical techniques including both structural and isotopic aspects; oceanographic and paleoenvironmental applications of organic biomarkers; contaminants and residue analysis. Prerequisites: EEPS 202 and Chem 106 or Chem 112.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 446 Stable Isotope Geochemistry

Applications of equilibrium and kinetic isotope fractionation and material balance principles to the distribution of oxygen and hydrogen isotopes in natural systems. Geothermometry and paleotemperatures, mass spectrometry, isotope hydrology and ice cores, fluid-rock interaction, igneous rocks and meteorites. Prerequisites: EEPS 441 and MATH 233.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 452 Introduction to Seismology

Introduction to earthquake and exploration seismology. Seismic wave propagation, data analysis and processing, earthquake mechanisms, seismic constraints on the structure of the Earth, relationship of seismicity to plate tectonics. Prerequisites: EEPS 353 and Math 217.

Credit 3 units. A&S IQ: NSM Art: NSM

---

### L19 EEPS 453 Interior of the Earth

Composition and temperature of Earth's mantle and core, determined by geophysical methods. Inferences about mantle and core dynamics, especially interactions. Current understanding and history of interior in fields of seismology, geomagnetism, mineral physics, geodynamics. Prerequisite: EEPS 353

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 454 Exploration and Environmental Geophysics

Basic geophysical techniques used in exploration and environmental geophysics, emphasizing seismic and electromagnetic methods. Basic theory, field procedures, and interpretation of data. Use of geophysical instruments on field trips, followed by reduction and analysis of acquired data. Two class hours and one two-hour laboratory a week, and approximately four one-day field trips during the semester. Prerequisites: EEPS 353 and Phys 191 and Math 132.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 459 Geodynamics

Fundamental physical processes necessary to understand plate tectonics and a variety of geological phenomena. Heat flow, gravity, elasticity and flexure, rheology of Earth materials. Prerequisites: EEPS 353 and Math 217.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 460 Introduction to Structural Geology

The landforms that surround us are being modified constantly by tectonic forces. Structural geology provides a framework for investigating, describing, and quantifying these changes. This course provides an introduction to the structures that form at all scales, from millimeter-sized fractures to plate-boundary-scale rifts. Topics include descriptive analysis of microscopic and macroscopic structures, field methods, the physical basis for rock deformation, and global tectonics. Three hours of lecture and one two-hour laboratory a week. Prerequisites: EEPS 340 and EEPS 353.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 467 Planetary Mission Design

This course will introduce EEPS, physics, and engineering students to the combined scientific and engineering aspects required for the development of a robotic spacecraft exploration mission to a body in the Solar System. Through Instructor delivered lectures, individual presentations, and a group presentation and a report, students will design a robotic spacecraft exploration mission that satisfies specific target, cost and schedule constraints. Prerequisites: Phys 191.

Credit 3 units. A&S IQ: NSM

---

### L19 EEPS 468 Geospatial Field Methods

This course is an introduction to field geospatial surveying using high-precision GNSS systems and UVA's (drones) outfitted with a variety of sensors such as cameras, multispectral sensors, and lidar. Coursework will cover basic principles as well as provide hands on experience. Most of the course is project based, and students will complete a series of exercises designed to familiarize them with the effective use of field equipment. Students will design data collection strategies, collect data,

and become familiar with data processing pipelines and visualization techniques. After completing the course, students will be prepared to safely and effectively conduct independent GNSS and drone surveys, and use the data for studies in Earth, environmental, and planetary science, archaeology, environmental science, ecology, landscape architecture, urban design, agriculture and a variety of other field-based disciplines. Prerequisites: Previous 300+ level coursework in Earth sciences, archaeology, ecology, or other coursework for which these methods are relevant.

Credit 3 units. A&S IQ: NSM Art: NSM

---

### L19 EEPS 473 Planetary Geology

Discussion of the evolution of the terrestrial planets and the outer-planet satellites as evidenced by the geologic records left on the surfaces of these bodies. Focus on major processes affecting planetary surfaces: impact cratering, volcanism, tectonism, and erosion and sedimentation by wind and water. Prerequisite: EEPS 353

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 474 Planetary Geochemistry

A survey of the geochemistry of the planets and their satellites using data from Earth-based, Earth-orbital, and spacecraft observations.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L19 EEPS 486 Paleoclimatology

The history of Earth's changing climates and environments on timescales from decades to millions of years. Key concepts in paleoclimatology include: external factors affecting the climate system (e.g., orbital cycles, volcanic eruptions, greenhouse gases); internal feedbacks, such as with monsoons and the El Nino- Southern Oscillation; abrupt versus gradual change; interactions with the biosphere (including hominins/humans); and comparison to present-day climate change. Current controversies in paleoclimate. Prerequisite EEPS 386

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L19 EEPS 490 Independent Study

Independent study for advanced undergraduates or for graduate students, to be supervised by a faculty member. Prerequisite: permission of instructor. Credit to be arranged. Prerequisite: permission of instructor.

Credit variable, maximum 12 units.

---

### L19 EEPS 492 Field Camp

Practical methods of data collection and interpretation in Earth, Environmental, and Planetary Sciences. Content may include field-based geologic mapping or laboratory-based studies emphasizing particular analytical tools. Prerequisite: permission of major advisor.

Credit variable, maximum 6 units. A&S IQ: NSM

---

### L19 EEPS 493 Internship

Internship experience in Earth, Environmental, and Planetary Sciences, providing learning opportunities with future careers and employers. Direct supervision by approved partner, with oversight by Earth and Planetary Sciences faculty. Prerequisite: permission of major advisor.

Credit variable, maximum 6 units.

---

### L19 EEPS 494 Study Abroad

Studies related to Earth, Environmental, and Planetary Sciences conducted with external institutions. Prerequisite: permission of Department Study Abroad Coordinator.

Credit variable, maximum 6 units.

### L19 EEPS 496 Field Geology

Hands-on application of geological field methods, providing an opportunity for students to synthesize classroom knowledge in a field setting. Students will develop the ability to recognize and analyze Earth processes, and deconstruct complex regional geology. Participation in an extended international field trip during spring break is required. Students must be prepared for an intensive, group-oriented experience. Prerequisite: must be an Earth, Environmental, and Planetary Sciences major and have permission of instructors. Enrollment is limited, and students will be selected through a written application. May be repeated for credit, with instructor permission. Credit 3 units.

### L19 EEPS 499 Honors Research

Independent work for undergraduate Honors, to be supervised by a faculty member. Prerequisites: Senior standing, eligibility for Honors, and permission of instructor. Credit 3 units.

## Earth Science Major Program Requirements

- **Total units required:** 53-60

The Department of Earth, Environmental, and Planetary Sciences (EEPS) offers majors in Earth Science, Environmental Science, and Planetary Science. The curriculum is broad, and the requirements are flexible enough to accommodate diverse needs and interests. Many courses present hands-on, problem-oriented experiences, including ample opportunity for fieldwork, laboratory work, and the use of state-of-the-art computational facilities and research instrumentation. All majors are required to complete certain core courses as well as electives and a capstone experience that must be presented at the Spring EEPS Undergraduate Research Symposium.

### Requirements for All Majors Required Core Courses

Students pursuing any Earth, Environmental, and Planetary Sciences major must complete the following courses:

Code	Title	Units
Chem 105	Principles of General Chemistry I	3
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3
Math 131	Calculus I	3
Math 132	Calculus II	3
Physics 191	Physics I	3
SDS 2200 or SDS 3200	Elementary Probability and Statistics Elementary to Intermediate Statistics and Data Analysis	3
<b>Total Units</b>		<b>18</b>

### Additional Electives

In addition to the disciplinary electives below, which are specific to each major, students must choose three L19 EEPS elective courses at the 300, 400, or 500 level, excluding the following courses: EEPS 390 Independent Study, EEPS 490 Independent Study, EEPS 493 Internship, and EEPS 499 Honors Research.

### Skills Course

Students must complete one of the following:

Code	Title	Units
EEPS 387	Geospatial Science	4
EEPS 400	Special Topics	3
EEPS 492	Field Camp	6
EEPS 496	Field Geology	3
EnSt 380	Applications in GIS	3
EnSt 364	Field Methods for Environmental Science	3

### Capstone Experience

Students completing any Earth, environmental, and planetary sciences major must also build a portfolio of their work from projects completed in courses such as EEPS 496 Field Geology, EnSt 405 Sustainability Exchange: Community and University Practicums, EnSt 539 Interdisciplinary Environmental Clinic, or EnSt 452 International Climate Negotiation Seminar; internship experiences; or research. All capstones must be presented at the Spring EEPS Undergraduate Research Symposium.

### Disciplinary Required Courses

Students must complete all of the requirements listed above for all majors as well as the following two courses:

Code	Title	Units
EEPS 340	Minerals, Rocks, Resources and the Environment	4
EEPS 353	Earth Forces	4

### Disciplinary Elective Courses

Students select five of the following courses:

Code	Title	Units
EEPS 317	Soil Science	3
EEPS 323	Biogeochemistry	3
EEPS 385	Earth History	3
EEPS 386	The Earth's Climate System	3
EEPS 401	Earth Systems Science	3
EEPS 407	Remote Sensing	3
EEPS 409	Surface Processes	3
EEPS 422	Sedimentary Geology	4
EEPS 428	Hydrology	3
EEPS 437	Igneous & Metamorphic Petrology	4
EEPS 441	Introduction to Geochemistry	3

EEPS 452	Introduction to Seismology	3
EEPS 453	Interior of the Earth	3
EEPS 454	Exploration and Environmental Geophysics	4
EEPS 459	Geodynamics	3
EEPS 460	Introduction to Structural Geology	4
EEPS 486	Paleoclimatology	3

## Additional Information

- A grade of C- (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. Courses with grades of D may fulfill the College's 120 total hours requirement, but they do not meet the departmental requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- If a student has two majors, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both majors. All advanced (300- and 400-level) courses must be unique to each major; in other words, no advanced course may "double-count" for the course work needed to fulfill the minimal requirements for either major. Should both major programs require the same course, a departmentally-sanctioned elective must be chosen to replace the course in one of the programs.
- Credits to be transferred from another institution must have prior approval from the Director of Undergraduate Studies in the relevant Arts & Sciences department.
- Students may transfer up to nine credits (or three courses, whichever is greater) of advanced coursework (course numbers 300 or above) toward the completion of a major in the Department of Earth, Environmental, and Planetary Sciences. Students may transfer up to three credits (or one course, whichever is greater) of advanced coursework (course numbers 300 or above) toward the completion of a minor in the Department of Earth, Environmental, and Planetary Sciences. This policy includes credit earned for courses taken while studying abroad or studying at another US institution. Credits earned through the completion of an approved field camp do not count toward this limit.
- Students may not place out of the chemistry, physics, or math requirements for the EEPS major. These courses must be taken at Washington University or at another accredited institution.
- In the Department of Earth, Environmental, and Planetary Sciences, both Latin Honors and Departmental Distinctions require the completion of a senior thesis.
  - In the spring of their junior year, the student should select a faculty member to guide the generation of this thesis. The student should then enroll in EEPS 499 Honors Research Honors Research (GPA > 3.65) or EEPS 490 Independent Study Independent Study (GPA < 3.65) with that faculty member for the fall of their senior year. At that time, the student and faculty

advisor should meet and choose the two additional readers for the student's thesis (the thesis committee) and establish a set of goals for the fall semester's work. At this time, the student should fill out the Senior Honors Topic Form.

- The student may also (but is not required to) enroll in EEPS 499 Honors Research or EEPS 490 Independent Study in the spring semester of their senior year. The faculty adviser will determine, with the student, a date by which a complete draft is to be given to the faculty readers for review, such that the readers have ample time to review the work prior to issuing their evaluations. These drafts will be due no later than the Tuesday following Spring Break. A final copy containing revisions required by the committee is due by the first day of finals period.
- An oral presentation of the senior honors research is expected to be presented to the department, usually late in the senior's last semester. The thesis document must be prepared following the department's formatting guidelines, which are available from the Director of Undergraduate Studies. All theses must be submitted in PDF format to Erin Marshall prior to graduation for online archiving.

## Undergraduate Department Awards

- **The Ernest L. Ohle, Jr., Prize** is presented to the senior judged to have the greatest promise for a successful career in Earth, environmental, or planetary sciences and who has demonstrated superior academic achievement. The prize is funded by an endowed donation from Dr. Ernest L. Ohle, Jr., an alumnus who had a distinguished career as a mining geologist.
- **The Courtney Werner Memorial Prize** is awarded to a senior student who has majored in Earth, environmental, and planetary sciences and who has demonstrated outstanding academic achievement. Courtney Werner was an associate professor in the Department of Geology and Geological Engineering at Washington University. He joined the Department in 1923, having worked as a geologist for Gulf Oil Company. The prize is funded by endowed donations from his friends and former students.
- **The Harold Levin Award** is for undergraduate students who have done outstanding jobs as assistants to the instructor. Professor Levin was a paleontologist who specialized in study of microscopic fossils as indicators of environmental conditions during deposition of sedimentary rocks. He was an outstanding teacher at all levels, ensuring that students remained engaged in his courses through dynamic lectures and discussions.
- **The Margaret E. Bewig Memorial Field Camp Award** is presented to an EEPS major selected by the faculty from those attending summer field camp, based on a combination of academic merit and financial need. The award may be used to defray part of the cost of summer field camp. Margaret Bewig was the department secretary and later the administrative assistant from 1963 to 1986. She died on May 26, 1991. The award is funded by endowed donations from her friends, faculty, and former students.

# Environmental Science Major

## Program Requirements

- **Total units required:** 52-56

The Department of Earth, Environmental, and Planetary Sciences (EEPS) offers majors in Earth Science, Environmental Science, and Planetary Science. The curriculum is broad, and the requirements are flexible enough to accommodate diverse needs and interests. Many courses present hands-on, problem-oriented experiences, including ample opportunity for fieldwork, laboratory work, and the use of state-of-the-art computational facilities and research instrumentation. All majors are required to complete certain core courses as well as electives and a capstone experience that must be presented at the Spring EEPS Undergraduate Research Symposium.

## Requirements for All Majors

### Required Core Courses

Students pursuing any Earth, Environmental, and Planetary Sciences major must complete the following courses:

Code	Title	Units
Chem 105	Principles of General Chemistry I	3
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3
Math 131	Calculus I	3
Math 132	Calculus II	3
Physics 191	Physics I	3
SDS 2200 or SDS 3200	Elementary Probability and Statistics Elementary to Intermediate Statistics and Data Analysis	3
<b>Total Units</b>		<b>18</b>

### Additional Electives

In addition to the disciplinary electives below, which are specific to each major, students must choose three L19 EEPS elective courses at the 300, 400, or 500 level, excluding the following courses: EEPS 390 Independent Study, EEPS 490 Independent Study, EEPS 493 Internship, and EEPS 499 Honors Research.

### Skills Course

Students must complete one of the following:

Code	Title	Units
EEPS 387	Geospatial Science	4
EEPS 400	Special Topics	3
EEPS 492	Field Camp	6
EEPS 496	Field Geology	3
EnSt 380	Applications in GIS	3
EnSt 364	Field Methods for Environmental Science	3

### Capstone Experience

Students completing any Earth, environmental, and planetary sciences major must also build a portfolio of their work from projects completed in courses such as EEPS 496 Field Geology, EnSt 405 Sustainability Exchange: Community and University Practicums, EnSt 539 Interdisciplinary Environmental Clinic, or EnSt 452 International Climate Negotiation Seminar; internship experiences; or research. All capstones must be presented at the Spring EEPS Undergraduate Research Symposium.

### Disciplinary Required Courses

Students must complete all of the requirements listed above for all majors as well as the following two courses:

Code	Title	Units
EEPS 340	Minerals, Rocks, Resources and the Environment	4
or EEPS 353	Earth Forces	
EEPS 342	Environmental Systems	3

### Disciplinary Elective Courses

Students select five of the following courses:

Code	Title	Units
Biol 381	Introduction to Ecology	3
Econ 451	Environmental Policy	3
or Pol Sci 2010	Introduction to Environmental Policy	
EECE 101	Introduction to Energy, Environmental and Chemical Engineering	3
EEPS 308	Topics in Environmental Sustainability	3
EEPS 317	Soil Science	3
EEPS 323	Biogeochemistry	3
EEPS 386	The Earth's Climate System	3
EEPS 407	Remote Sensing	3
EEPS 409	Surface Processes	3
EEPS 428	Hydrology	3
EEPS 442	Aqueous Geochemistry	3
EEPS 454	Exploration and Environmental Geophysics	4
EEPS 486	Paleoclimatology	3

## Additional Information

- A grade of C- (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. Courses with grades of D may fulfill the College's 120 total hours requirement, but they do not meet the departmental requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- If a student has two majors, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both majors. All advanced (300- and 400-level) courses must be unique to each major; in other words, no advanced course may "double-count" for the course work needed to fulfill the minimal requirements for either major. Should both major programs require the same course, a departmentally sanctioned elective must be chosen to replace the course in one of the programs.
- Credits to be transferred from another institution must have prior approval from the Director of Undergraduate Studies in the relevant Arts & Sciences department.
- Students may transfer up to nine credits (or three courses, whichever is greater) of advanced coursework (course numbers 300 or above) toward the completion of a major in the Department of Earth, Environmental, and Planetary Sciences. Students may transfer up to three credits (or one course, whichever is greater) of advanced coursework (course numbers 300 or above) toward the completion of a minor in the Department of Earth, Environmental, and Planetary Sciences. This policy includes credit earned for courses taken while studying abroad or studying at another US institution. Credits earned through the completion of an approved field camp do not count toward this limit.
- Students may not place out of the chemistry, physics, or math requirements for the EEPS major. These courses must be taken at Washington University or at another accredited institution.
- In the Department of Earth, Environmental, and Planetary Sciences, both Latin Honors and Departmental Distinctions require the completion of a senior thesis:
  - In the spring of their junior year, the student should select a faculty member to guide the generation of this thesis. The student should then enroll in EEPS 499 Honors Research (GPA > 3.65) or EEPS 490 Independent Study (GPA < 3.65) with that faculty member for the fall of their senior year. At that time, the student and faculty advisor should meet and choose the two additional readers for the student's thesis (the thesis committee) and establish a set of goals for the fall semester's work. The student should fill out the Senior Honors Topic Form.
- The student may also (but is not required to) enroll in EEPS 499 Honors Research/EEPS 490 Independent Study in the spring semester of their senior year. The faculty adviser will determine, with the student, a date by which a complete draft is to be given to the faculty readers for review, such that the readers have ample time to review the work prior to

issuing their evaluations. These drafts will be due no later than the Tuesday following Spring Break. A final copy containing revisions required by the committee is due by the first day of the finals period.

- An oral presentation of the senior honors research is expected to be presented to the department, usually late in the senior's last semester. The thesis document must be prepared following the department's formatting guidelines, which are available from the Director of Undergraduate Studies. All theses must be submitted in PDF to Kelley Oldham prior to graduation for online archiving.

## Undergraduate Department Awards

- **The Ernest L. Ohle, Jr., Prize** is presented to the senior judged to have the greatest promise for a successful career in Earth, environmental, or planetary sciences and who has demonstrated superior academic achievement. The prize is funded by an endowed donation from Dr. Ernest L. Ohle, Jr., an alumnus who had a distinguished career as a mining geologist.
- **The Courtney Werner Memorial Prize** is awarded to a senior student who has majored in Earth, environmental, and planetary sciences and who has demonstrated outstanding academic achievement. Courtney Werner was an associate professor in the Department of Geology and Geological Engineering at Washington University. He joined the department in 1923, having worked as a geologist for Gulf Oil Company. The prize is funded by endowed donations from his friends and former students.
- **The Harold Levin Award** is for undergraduate students who have done outstanding jobs as assistants to the instructor. Professor Levin was a paleontologist who specialized in study of microscopic fossils as indicators of environmental conditions during deposition of sedimentary rocks. ## Earth Science Minor Program Requirements

- **Total units required:** 17-19 credits

### Requirements for All Minors

Students pursuing any Earth, Environmental, and Planetary Sciences minor must complete the following course:

Code	Title	Units
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3

Students must complete all of the requirements listed above for all minors as well as the following:

### Required Courses

Students must complete the following two courses:

Code	Title	Units
EEPS 340	Minerals, Rocks, Resources and the Environment	4
EEPS 353	Earth Forces	4

### Disciplinary Electives

Students select two of the following courses:

Code	Title	Units
EEPS 317	Soil Science	3
EEPS 323	Biogeochemistry	3
EEPS 385	Earth History	3
EEPS 386	The Earth's Climate System	3
EEPS 401	Earth Systems Science	3
EEPS 407	Remote Sensing	3
EEPS 409	Surface Processes	3
EEPS 422	Sedimentary Geology	4
EEPS 428	Hydrology	3
EEPS 437	Igneous & Metamorphic Petrology	4
EEPS 441	Introduction to Geochemistry	3
EEPS 452	Introduction to Seismology	3
EEPS 453	Interior of the Earth	3
EEPS 459	Geodynamics	3
EEPS 460	Introduction to Structural Geology	4
EEPS 486	Paleoclimatology	3

## Additional Information

# Environmental Science Minor

## Program Requirements

- **Total units required:** 16-17

## Requirements for All Minors

Students pursuing any Earth, Environmental, and Planetary Sciences minor must complete the following course:

Code	Title	Units
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3

## Disciplinary Required Courses

Students must complete all of the requirements listed above for all minors as well as the following two courses:

Code	Title	Units
EEPS 340	Minerals, Rocks, Resources and the Environment	4
or EEPS 353	Earth Forces	
EEPS 342	Environmental Systems	3

## Disciplinary Elective Courses

Students select two of the following courses:

Code	Title	Units
Biol 381	Introduction to Ecology	3
Econ 451	Environmental Policy	3
or Pol Sci 2010	Introduction to Environmental Policy	
EECE 101	Introduction to Energy, Environmental and Chemical Engineering	3
EEPS 308	Topics in Environmental Sustainability	3
EEPS 317	Soil Science	3
EEPS 323	Biogeochemistry	3
EEPS 386	The Earth's Climate System	3
EEPS 407	Remote Sensing	3
EEPS 409	Surface Processes	3
EEPS 428	Hydrology	3
EEPS 442	Aqueous Geochemistry	3
EEPS 454	Exploration and Environmental Geophysics	4
EEPS 486	Paleoclimatology	3

## Additional Information

- A grade of C- (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. Courses with grades of D may fulfill the College's 120 total hours requirement, but they do not meet the departmental requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- Credits to be transferred from another institution must have prior approval from the Director of Undergraduate Studies in the relevant Arts & Sciences department.

This policy includes credit earned for courses taken while studying abroad or studying at another US institution. Credits earned through the completion of an approved field camp do not count toward this limit.

Website: <https://eeps.wustl.edu/>

## Geospatial Science Minor Program Requirements

- **Total units required:** 19

### Requirements for All Minors

Students pursuing any Earth, Environmental, and Planetary Sciences minor must complete the following course:

Code	Title	Units
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3

Students must complete all of the requirements listed above for all minors as well as the following:

### Required Courses

Students must complete the following two courses:

Code	Title	Units
EEPS 387	Geospatial Science	4
EnSt 380	Applications in GIS	3

### Disciplinary Electives

Students select three of the following courses:

Code	Title	Units
Anthro 4803	Advanced GIS Modeling and Landscape Analysis	3
CSE 217A	Introduction to Data Science	3
CSE 314A	Data Manipulation and Management	3
CSE 417T	Introduction to Machine Learning	3
EEPS 407	Remote Sensing	3
EEPS 468	Geospatial Field Methods	3
EnSt 481	Advanced GIS	3
EnSt 482	Applications in Geospatial Intelligence	3
EnSt 483	Introduction to Spatial Epidemiology	3
ESE 417	Introduction to Machine Learning and Pattern Classification	3

- \* Previous or concurrent enrollment in CSE 131 Introduction to Computer Science is recommended.

## Additional Information

- A grade of C- (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. Courses with grades of D may fulfill the College's 120 total hours requirement, but they do not meet the departmental requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- Credits to be transferred from another institution must have prior approval from the Director of Undergraduate Studies in the relevant Arts & Sciences department.
- Students may transfer up to three credits (or one course, whichever is greater) of advanced coursework (course numbers 300 or above) toward the completion of a minor in the Department of Earth, Environmental, and Planetary Sciences. This policy includes credit earned for courses taken while studying abroad or studying at another US institution. Credits earned through the completion of an approved field camp do not count toward this limit.

## Planetary Science Minor Program Requirements

- **Total units required:** 16-18

### Requirements for All Minors

Students pursuing any Earth, Environmental, and Planetary Sciences minor must complete the following course:

Code	Title	Units
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3

Students must complete all of the requirements listed above for all minors as well as the following:

### Required Courses

Students must complete the following two courses:

Code	Title	Units
EEPS 373	Fundamentals of Planetary Science	3
EEPS 340	Minerals, Rocks, Resources and the Environment	4
or EEPS 353	Earth Forces	

## Disciplinary Electives

Students select two of the following courses:

Code	Title	Units
EEPS 401	Earth Systems Science	3
EEPS 407	Remote Sensing	3
EEPS 437	Igneous & Metamorphic Petrology	4
EEPS 441	Introduction to Geochemistry	3
EEPS 459	Geodynamics	3
EEPS 460	Introduction to Structural Geology	4
EEPS 467	Planetary Mission Design	3
EEPS 473	Planetary Geology	3
EEPS 474	Planetary Geochemistry	3
EEPS 567	Planetary Materials	3
EEPS 568	Scientific Exploration of the Moon	3
EEPS 570	Planetary Geophysics & Dynamics	3
EEPS 576	Advanced Planetary Geology: Ice Worlds	3

## Additional Information

- A grade of C- (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. Courses with grades of D may fulfill the College's 120 total hours requirement, but they do not meet the departmental requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- Credits to be transferred from another institution must have prior approval from the Director of Undergraduate Studies in the relevant Arts & Sciences department.
- Students may transfer up to 3 credits (or one course, whichever is greater) of advanced course work (course numbers of 300 or above) toward the completion of a minor in the Department of Earth, Environmental, and Planetary Sciences. This policy includes credit earned for courses taken while studying abroad or at another U.S. institution. Credits earned through the completion of an approved field camp do not count toward this limit.
- Students may not place out of the chemistry, physics, or math requirements for the Earth, Environmental, and Planetary Sciences major. These courses must be taken at Washington University or at another accredited institution.

Website: <https://eeps.wustl.edu/>

## East Asian Languages and Cultures

The Department of East Asian Languages and Cultures (EALC) offers majors and a minor that allow for cross-cultural and interdisciplinary approaches to the study of East Asia. Students can choose either to focus on one of our three linguistic and cultural traditions —

Chinese, Japanese, and Korean — or to explore different traditions and societies by taking courses about multiple regions. EALC offers a wide-ranging and diverse curriculum by means of which students may acquire knowledge and understanding of the literary, historical, and cultural expressions of East Asia from ancient times up to the present. Our language programs also foster the ability to negotiate meaning in a culturally and contextually appropriate manner through the development of high levels of proficiency in speaking, listening, reading, and writing. The emphasis in the EALC programs (with specializations in Chinese, Japanese, or Korean) is on achieving high competency in the relevant language and learning how to read texts from the target culture — literary, philosophical, cultural, historical, or even visual — with an informed appreciation of the contexts in which they were produced. The goal of all of these studies — language, textual, and interdisciplinary — is to acquire the cultural sensitivities needed to become sophisticated scholars and educated global citizens as well as to provide a deeper appreciation of our common cultural experience and the intrinsic value of humanistic study.

**Language Placement:** Placement tests are required for all students entering EALC language programs, with the exception of those students who have had no previous exposure to the language and wish to enroll in the first semester of the first year of instruction. Students who test into second-year Chinese/Japanese/Korean and satisfactorily complete (with a grade of B- or better) at least one semester of language study may be eligible for 3 units of back credit; students who test into the third-year level or above and satisfactorily complete (with a grade of B- or better) at least one semester of language study may be eligible for 6 units of back credit. Back credit is limited to 3 units for those testing into the second-year level and 6 units for those testing into the third-year level or above. Refer to the Back Credit Policy webpage for details. Please note that students with native language proficiency, as determined by the language section, and students who enroll in courses below their placement level are ineligible for back credit units. Students who misrepresent their language proficiency to gain entrance into a course at the elementary or intermediate level will be dropped from that course.

### L81 EALC 1070 Ampersand: Encountering Chinese Culture: A Performative Perspective on Chinese Culture and Identity

This course examines the diversified and rich history of Chinese visual and performance cultures from the Chinese mainland, Taiwan, Hong Kong, and throughout the Chinese diaspora. A collaboration between the East Asian Languages and Cultures and Performing Arts departments, this course explores Chinese cultural narratives in relation to how they have been performed -- on stage in traditional forms of dance-drama, on screen in film, and as lived in the practice of everyday life -- from the late Imperial period to the present. It includes a practice component that introduces the students to movement disciplines such as Tai' Chi and opera, and it allows students to pursue creative assignments such as interview, stage plays, and filmmaking that demonstrate their developing knowledge of historical and contemporary Chinese culture. Building bridges of understanding between the United States and the Republic of China in Taiwan, the course will culminate in a spring break trip to Taiwan. This course is only for first-year, non-transfer students in the Ampersand: Encountering China program.

---

### L81 EALC 1080 Ampersand: Encountering Chinese Culture: Performing Tradition, Engendering Transformations

This course examines the development of modern Chinese culture and its dynamic relationship with traditions and renovations. During the past century, China has gone through a series of political, cultural, economic, and technological transformations that constantly reshaped the form and content of Chinese culture. Tracing the drastic changes in Chinese language, performance and media forms from the late 19th century to contemporary time, this course guides the student through the pivotal moments in modern Chinese history and analyzes their impacts on literature, drama, dance, film and internet culture. What transformative promise did new media and art forms deliver? How do we make sense of the intricate connection between tradition and renovation? The purpose of this course is to foster an understanding of Chinese culture as a dynamic process of formation rather than a static, homogeneous entity. However, instead of seeing this formation as a linear progression with one form or style replacing the other, we will study how past traditions -- both ancient and recently constructed ones -- are reconfigured in new cultural representations and practices.

### L81 EALC 1200 Ampersand: Knowing Through Objects: The World of an Antique Chinese Wedding Bed

Where do modern people spend almost a third of their life? Their beds! In addition to facilitating sleep and relaxation and its association with marriage and sexuality, the bed also is the centerpiece and likely the most expensive item of furniture item in the bedroom. Across cultures, from medieval Europe to imperial China, beds served as

tokens of status that marked families' success and material wealth in increasingly commercialized and stratified societies. In the modern era, beds have drawn scrutiny from sociologists, sexologists, and social critics interested in questions of gender, family, and sexuality. A historical bed might also capture other meanings: its pathways through production, circulation, and consumption might illuminate global trading networks in lumber, labor, and finished commodities. It might reveal (or allow people to imagine) the transmission of craft knowledge, family formation, wealth accumulation (or dissipation), and social mobility. With these possibilities in mind, students will investigate and restore an antique Chinese wedding bed. Work will combine digital tools with humanistic research methods to facilitate a cultural history that engage questions of intimacy, nuptials, curation and conservation, and global trade and cultural exchanges. Prerequisite: first-year, non-transfer students only.

Credit 3 units. A&S IQ: HUM, LCD EN: H

### L81 EALC 144 FYS: Collecting Art/Excluding People: The Contradictions of Chinese Art in U.S. Museums

Tomb raiders, curators, archaeologists, politicians, dealers, and collectors all contributed to the arrival of Chinese art in the United States since the late nineteenth century. But at the same time as Chinese objects arrived in great quantities, Chinese people were actively excluded from the U.S. In this course we consider the contradiction between U.S. enthusiasm for collecting Chinese art and negative U.S. responses to Chinese immigrants, from the 1882 Chinese Exclusion Act to contemporary anti-Asian racism. Through the lens of museums, private collections, and public exhibitions, we study what the movement of Chinese art into the United States says about changes in U.S.-China relations from the nineteenth century through today. No prerequisite: enrollment limited to first-year students.

### L81 EALC 150 First-Year Seminar: Exploring East Asian Classics

This first-year seminar introduces students to major works of the Chinese, Korean, and Japanese traditions. Although written centuries in the past, these texts still reverberate with meaning today and offer important means to understand the often chaotic and confusing events occurring daily around us. What is the self? What is the relationship between the individual and society? How do we live an ethical life? What is literature and for whom is it intended? In grappling with these questions, students will directly engage with the texts through close reading and in-class discussion. Students will, at the same time, also ask broader questions that concern how knowledge is produced, spread, and consumed: what is a canon? Who are the gatekeepers? What does it mean to approach East Asia through a set of "canonical" texts? Among the texts considered will be The Analects, Daodejing, Lotus Sutra, Tale of Genji, Tales of the Heike, Tales of Moonlight and Rain, Samguk yusa, and Memoirs of Lady Hyegyong. Prerequisite: first-year, non-transfer students only.

---

### L81 EALC 223 Korean Civilization

This course introduces Korean civilization from earliest times to the present. While a broad survey, the course emphasizes cultural themes and social institutions, and explores the Korean past in East Asian and global perspectives. To help with building this comprehensive view, the class follows a chronological progression of history using a textbook. But throughout, students also learn from diverse media-including film, drama, music, games, and primary historical sources-to make their own sense of Korea and Korean culture. In terms of methodology, the class adopts various approaches, from source criticism and material

studies to critically engaging modern-day representations of Korea in print and new media. Some of the topics covered include: foundation myths, ancient literature, colonialism, civil war, authoritarianism, rapid industrialization, and democratization in Korea.

Same as L51 Korean 223C

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: IS EN: H

---

### L81 EALC 226 Japanese Civilization

This course will present a comprehensive overview of Japan, its history, its institutions and cultural products, and its society and people. The first half of the course will comprise a survey of Japanese history, with an emphasis on its social and cultural aspects, from the earliest period to the present day. Having established the historical framework with its interweave of native and foreign elements, Kyoto-based imperial aristocracy, the samurai class and their crucial role, Zen-inspired meditative arts, and exquisitely diverse cultural products--the class will move on, in the second half, to an examination of recent and contemporary trends and issues. These will center on Japanese education, social and family structures, urban centers and the rural periphery, economic and socio-political trends, Japan's distinctive and vibrant popular culture, contemporary problems and challenges, and the nation's dramatically shifting position in East Asia and in the 21st-century global order.

Same as L05 Japan 226C

---

### L81 EALC 227 Chinese Civilization

This course is an introduction to Chinese culture through selected topics that link various periods in China's past with the present. Ongoing concerns are social stratification, political organization, and the arts, gender relationships and the rationales for individual behavior, and the conceptions through which Chinese have identified their cultural heritage. Readings include literary, philosophical, and historical documents as well as cultural histories. There will be regular short writing assignments. No prerequisites.

Same as L04 Chinese 227C

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: BA, IS EN: H

---

### L81 EALC 270 Sophomore Seminar: U.S.-China Relations: Perceptions and Realities

The United States and China are the two most important global powers today, and the bilateral relationship is one of the most comprehensive, complex, consequential, and competitive major-power relations in the world. The course aims to examine the attitudes, ideas, and values that have shaped the relationship, from the era of colonial expansion in the 1800s to the rise of China as a major political and economic power in the 21st century. Drawing upon visual images, literature, films, policy statements, and other materials, the course will analyze the patterns of perceptions that have informed and shaped the understanding of realities. This course, which uses an interdisciplinary approach, will include discussions and debates from both American and Chinese perspectives. Prerequisite: sophomore level only.

Same as L04 Chinese 270

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

### L81 EALC 2980 Undergraduate Internship in East Asian Languages and Cultures

Students receive credit for a faculty-directed and approved internship. Registration requires the completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time

spent in work activities (e.g., eight to ten hours a week for thirteen or fourteen weeks to receive 3 units of credit; 1 or 2 credits for fewer hours). Credit/no credit only. Prerequisite: permission of department or DUS.

Credit variable, maximum 3 units.

---

### L81 EALC 307 Literary Modernities in East Asia: Text & Traditions

This course will explore the complex forces at work in the emergence of modern East Asia through a selection of literary texts spanning fiction, poetry, and personal narrative. Our readings-- by Chinese, Japanese, Korean, and Taiwanese writers and poets-- will point to the distinctively different and dramatically-shifting circumstances of modern East Asian nations and peoples, as well as to their shared values and aspirations. Same as L93 IPH 307

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

### L81 EALC 3166 A History of Modern China

This course explores the 19th- and 20th-century history of China. Its purpose is to provide students with a historical foundation to understand the momentous changes the country underwent during its traumatic transition from an empire to a nation-state. We start the course at the height of the empire's power in the late 18th century, when the Qing dynasty (1637-1912) conquered vast swathes of lands and people in Inner Asia. We then move on to the Qing's troubled relationship with Western capitalism and imperialism in the 19th century, which challenged the economic, social, and ideological structures of the imperial regime, culminating in the emergence of "China" as a nation-state. By situating China's national history within a global context, the course outlines in detail the transformations that took place in the 20th century, from the rise of communism and fascism to the Second World War to Maoism and cultural revolution. We end the semester with yet another major change that took place in the 1980s, when a revolutionary Maoist ideology was replaced with a technocratic regime, the legacies of which are still with us today.

Same as L22 History 3166

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

---

### L81 EALC 3211 Contemporary Chinese Popular Culture

With the rise of the Chinese economy and global capitalism, popular culture has proliferated in mainland China in recent years. This course traces the development of Chinese popular and youth culture and society from the 1990s to the present. It also refers back to modern times and ancient Chinese Confucian philosophy for historical background information. The course covers various forms of Chinese popular culture, such as movies, music, television programs, Internet literature, religion, sports, and food. Students observe primary resources and read academic articles to engage in a multiperspective and multimedia view of present-day China in the age of globalization and East Asian regionalization.

Same as L04 Chinese 3211

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

### L81 EALC 3250 Topics in Early Modern Korea: Guns, Tobacco, and Sweet Potato: A History of Material Culture

This course is an introduction to both material culture studies and early modern Korea, through the use of compelling objects--from guns and ceramics, to drugs, foods, and artwork--as an entry point into Korean cultural history (with a focus on the period between 1592 and 1910). It starts with objects in times of crises, from the matchlock guns which wreaked havoc across the Korean peninsula, to the ondol heated floors which warmed Korean homes through the Little Ice Age. Then, it delves into a period of cultural efflorescence, when new material cultures emerged, by the hands of Buddhist papermakers, up-and-coming chungin ("middle people") painters, and aristocratic women. It ends with stories from the nineteenth century, when these "Korean" material cultures became closely entangled with their foreign counterparts--

especially Western European-and how they were put on display at the world's fairs and expositions around the globe-in Japan, Chicago, Hanoi, and Paris. The overarching questions that run throughout the course are: What is material culture? How does the "material turn" change the nature of humanistic inquiry and expand the horizons of Korean/cultural studies? How may attention to "things" transform our understanding of the past and present, ourselves, and of the material world that we inhabit today? Fulfills premodern elective for EALC major. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM, VC EN: H

---

**L81 EALC 3270 Topics in East Asian Performance Cultures: Gender in East Asian Theatre and Performance**

This course explores the constructions of gender within traditional and modern East Asian performing arts, with particular attention to cultural values, identities, and sensibilities revealed through various theatrical expressions. Genres to be studied include Chinese opera xiqu, revolutionary ballet, and spoken drama huaju, Japanese kabuki and Takarazuka Theatre, and Japanese modern drama, Korean narrative song form p'ansori and opera changgeuk, Korean new theatre shin'guk and modern dance, contemporary East Asian queer performances, among others. Consideration of gender in performance will address 1) narrative of the form, 2) persona of the character, 3) identity of the performer, and 4) role of the audience. As part of this study, students will explore the cultural specificity embedded in various forms of East Asian theatre and performance through the lens of gender. A second interest lies in the applicability of Western models of gender, culture, and performance studies for the domain of the arts and for East Asia as a cultural region. The seminar approach will be interdisciplinary with extensive use of written, visual, and aural materials. Class combines lecture and discussion. Readings include critical, historical, literary, and descriptive writing about various genres of performing arts. All readings are in English translation. Prerequisites: None  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L81 EALC 332 Japanese Literature: Beginnings to 19th Century**

This survey of Japanese literature covers antiquity to the early 19th century. Emphasis is on the ideological and cultural contexts for the emergence of a variety of traditions, including poetry, diaries, narrative, and theater. Fulfills premodern literature requirement for EALC degrees. No knowledge of Japanese language is required. Same as L05 Japan 332C  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

**L81 EALC 333 The Modern Voice in Japanese Literature**

This survey explores the emerging modern voice in Japanese literature, with emphasis on prose fiction. After a brief introduction to earlier centuries, the class focuses on the short stories and novels of the 20th century. Among the authors considered are Natsume Soseki, Nagai Kafu, Tanizaki Jun'ichiro, and Nobel laureates Kawabata Yasunari and Oe Kenzaburo. Discussions center on issues of modernity, gender, and literary self-representation. Fulfills modern literature requirement for EALC degrees. No knowledge of Japanese language required. Same as L05 Japan 333C  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

---

**L81 EALC 3340 Topics in East Asian Religions**

Topics course on East Asian religions. Subject matter varies by semester; consult current semester listings for topic. Fulfills premodern elective for EALC major.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L81 EALC 340 Writing New Horizons: Explorers, Envoys, and Other Encounters in Korean Travel Narratives**

Whether physical or imagined, travel evokes notions of center, periphery, boundary and identity that shape the world we live in. This seminar course uses travelogues as well as literary, visual and cinematic representations of travels relating to Korea to explore how travel, art and imagination together help constitute one's sense of place. The course approaches travel from three angles. First, it examines writings by Korean authors on domestic, interregional, and international travels from premodern to modern times. Such works offer a frame for tracing conceptualizations of self and other through topics including diaspora, refugee crisis, migrant workers, political exile, prisoners of war, and others. The course also looks at stories of travel to Korea by non-Korean authors in order to see how "Korea" was perceived in various times by people outside the country. Lastly, through imagined journeys typically labeled as "sci-fi" or "fantasy", it examines notions of "truthful" and "realistic," and considers the function of the fantastic and storytelling and their relation to the world we live in. For their final project, students will create a map of real or fictional travels based on material covered in class. Using Digital Humanities tools such as StoryMaps (ArcGIS), Carto, or MyMaps (Google), they will also produce itineraries and narratives to accompany the maps, and present these results online. Necessary technical assistance will be provided by the GIS team at Olin Library throughout the semester. All reading in English. Prior knowledge of Korean language or culture may be helpful but is not required.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

**L81 EALC 341 Early and Imperial Chinese Literature**

An introduction to important genres and themes of Chinese literature through the study of major writers. Brief lectures on the writers' personal, social, intellectual, and historical contexts; most class time will be devoted to student discussions of their masterworks as an avenue for understanding Chinese culture during selected historical periods. Fulfills premodern literature requirement for EALC degrees. No prerequisites; all readings will be in English translation. Same as L04 Chinese 341  
Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: HUM EN: H

---

**L81 EALC 342 Modern and Contemporary Chinese Literature**

This course provides an introduction to the major writers and works of Chinese literature from the turn of the 20th century to the present, including fiction, poetry and film. It looks at these works in their relevant literary, sociopolitical, and cultural contexts (including Western influences). Fulfills modern literature requirement for EALC degrees. All readings in English translation. Same as L04 Chinese 342  
Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: ETH, IS EN: H

---

**L81 EALC 346 Japanese Literature in Translation: Mystery Fiction**

In this course students explore the tantalizing, thrilling, and sometimes macabre genre of mystery fiction in Japan. Emerging in the late 19th century, largely in response to the disruptions of industrialization, the mystery genre offered writers a way to make sense of a chaotic,

unfamiliar world. The genre has also allowed a means of social critique and radical experimentation. The class considers the works of Edogawa Rampo, Matsumoto Seicho, Miyabe Miyuki, Kirino Natsuo, and others. All readings in English. No prior knowledge of Japanese required. Same as L05 Japan 346

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: IS EN: H  
UColl: CD

---

#### **L81 EALC 3482 The Floating World of Japanese Prints**

The relationship between Japanese printmaking and popular culture from 1600 to 1900. Woodblock and copperplate printmaking techniques, key masters, kabuki drama, pleasure quarters, fiction, travel, modernization will be explored. Prerequisite: L01 111, Intro to Asian Art, or background in printmaking or Japanese culture. Same as L01 Art-Arch 3482

Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: HUM EN: H

---

#### **L81 EALC 350 U.S.-China Relations from 1949 to the Present**

The United States and China are the two most important global powers today, and the relationship between them is one of the most comprehensive, complex, and consequential major-power relations in the world. The tangled relationship is at times turbulent, and its future remains uncertain. This course studies the bilateral relationship from the Chinese Civil War to the rise of China as a major political and economic power in the 21st century. It invites students to explore the following questions: What have China and the U.S. done to confront or accommodate each other in global politics? How has foreign policy in both countries balanced the often competing goals of state security, economic stability, domestic political order, and international influence? What are the impacts of a rising China on geopolitics in the Asia-Pacific region and on the U.S.'s global leadership in the 21st century? By drawing on scholarship in political and social history and area studies, this course helps students better understand both the historical context and current developments of U.S.-China relations. Fulfills modern elective for EALC major.

Same as L04 Chinese 350

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, IS EN: H

---

#### **L81 EALC 3510 Pleasure, Amusement, and Play: Entertainment Culture in Premodern China**

How do people in premodern China talk and write about pleasure? What can be learned about Chinese culture and society through pleasure, amusement, and play? This course explores the entertainment culture in premodern China, mainly from the 16th to the 18th century—an important historical moment of technological, economical, and political transformations. Throughout the semester, students will follow the scholar-officials, urban nouveau riche, courtesans, and entertainers in their travel through city spaces into gardens and pleasure quarters. Students will witness how they seek and take pleasure through reading a wide range of primary texts, including short stories, novels, essays, scholars' notation books, entertainment manuals, and philosophical writings. Students may have the opportunity to join and/or have conversations with them through in-class activities like role-play games and a mid-term creative adaptation assignment. By exploring the entertainment culture in premodern China, this course pays attention to the distinctive aspects in Chinese cultures such as gender dynamics, construction of public and private spaces, the promotion of personal emotions, as well as memories and nostalgia. All readings are in English. Prerequisites: None.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

#### **L81 EALC 352 Literature of Modern and Contemporary Korea**

This undergraduate course surveys the major writers and works of 20th century Korean literature. During the 20th century Korea went through a radical process of modernization. From its colonization by Japan, to its suffering of a civil war within the cold war order, to its growth into a cultural and economic powerhouse, Korea's historical experience is at once unique and typical of that of a third-world nation. By immersing themselves in the most distinctive literary voices from Korea, students examine how the Korean experience of modernization was filtered through its cultural production. The course pays special attention to the writers' construction of the self and the nation. How do social categories such as ethnicity, class, gender, and race figure in the varying images of the self? And how do these images relate to the literary vision of the nation? Along the way, students observe the prominent ideas, themes, and genres of Korean literature. This class combines lecture with discussion, in which students are strongly encouraged to participate. All literary texts are in English translation and no previous knowledge of Korean is required. Fulfills modern literature requirement for EALC degrees.

#### **L81 EALC 3570 Topics in Modern and Contemporary Korean Culture: Intro to K-Pop: Korean Popular Music and Society**

This course examines how Korean popular music, or K-pop, has become a global cultural phenomenon and how it is related to the historical, social, cultural, and political shifts on the Korean peninsula from the beginning of the 20th century to the present. This class will consider a wide range of factors of K-pop, including fans, idols, music production and circulation, industry, media, and national involvement in the field, in order to provide students with an in-depth understanding of the dynamic cultural phenomenon of K-pop. Through various scholarly approaches, this class deepens students' understanding of K-pop and popular music more broadly. The class will utilize audio/video sources, incorporate discussions based on academic articles and chapters, and require student analysis that connects popular music to its context. In addition to scholarly investigation, students are encouraged to engage with K-pop through hands-on performances, writing reviews, creating public-facing resources, and/or interviewing fans for the final project. No background in Korean language, history, or culture is required. Fulfills modern elective for EALC major.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM

---

**L81 EALC 3650 Topics in Modern Korean Literature: The Korean Wave: Reading Korea through Popular Culture and Media**

Korean popular culture has received attention from across the globe for more than 20 years through K-drama, K-cinema, K-pop, K-beauty, webtoon, video games, mukbang (a live-streamed eating show), and so on. This course examines the global popularity of Korean popular culture, known as the Korean Wave (Hallyu). In addition to providing a comprehensive understanding of contemporary Korean culture, society, and politics through popular cultural products, the course will teach a variety of critical tools to interpret them. For example, how would you interpret the inclusion of traditional Korean games for children in Squid Game and its relevance to contemporary Korean society? How would you interpret the scene with the bomb under the bridge in Psy's "Gangnam Style" music video in relation to Korean history? Why is mukbang popular among younger generation in Korea? Through readings, screenings, listening, and discussions, students will learn why and how popular culture is inevitably tied to history, culture, and society. The class will also look at the role of media in understanding how South Korea comes to create a vibrant pop culture scene and why global audiences from diverse racial and generational backgrounds relish Hallyu. Successful students will gain the skills to critically interpret Korea through popular culture and understand the impact of media on cultural globalization. No background in Korean language, history, or culture is required. Modern course; fulfills modern elective for EALC major.

Same as L51 Korean 365

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

**L81 EALC 3660 Chinese Theater Beyond Stage**

This course explores the aesthetics and politics of Chinese theater from the Yuan dynasty (1271-1368) to the present. By focusing on three pivotal themes—media, gender, and politics, students will familiarize themselves with the ways in which theater and performance inform and fashion self, society, and history in China and beyond. Through an in-depth examination of dramatic literature, audio-visual recordings, and films, the course asks: How do various medium forms, such as onstage performance, print, cinema, and animation, shape Chinese theater, and vice versa? In what ways do theatrical productions reflect and challenge gender norms through playwriting, role-playing, and cross-dressing? How does theater and performance negotiate diverse political agendas about China across time and space? The overarching objectives of this course are two-fold, 1) to develop a critical comprehension of major Chinese theatrical traditions and their modern and contemporary transformations, and 2) to discuss, write, and foster creative responses concerning the significance of Chinese theater, both domestically and within the changing global context. All readings will be provided in English. Fulfills premodern or modern elective for EALC major.

**L81 EALC 370 When Tigers Smoke: Songs and Stories from Traditional Korea**

This course has two purposes: (1) to introduce major works and topics in Korean classical literature and the cultural world in which they were produced and (2) to explore modern reimaginings of these historical works and events and wider context through contemporary literature and film. The former involves a journey through various genres, including foundation myths, songs, biographies, essays, poetry, fiction, memoirs, letters and oral performance, all produced before the 20th century. For a modern perspective, the course turns to films, dramas, cartoons and short stories, which serve as the basis for discussing the modern recreations of historical events, characters, and Korean culture more broadly. In addition to details of the works themselves, topics will include Korea's place in the context of a Sino-centric world order; the significance of two writing systems, hanmun (literary Chinese)

and han'gul (Korean vernacular writing); gender and literary practice; and the dynamic relationship between tradition and creativity. No knowledge of Korean history or language is required. All readings in English.

**L81 EALC 3750 Imagined Pasts: Traditional Korea through Film**

This course is an introduction to traditional Korean culture through a selection of contemporary South Korean feature films and dramas. Films and dramas with historical themes have been very popular in Korea and across the globe. As powerful representations of the past, these contents have not just made Korean culture more accessible, but posed new issues and problems in learning about that culture. This course sets out to examine the content of historical films and dramas, investigating how "true" or "false" their representation of the past is, how they imagine and invent that past, and the ways they are useful-and not-in better understanding Korean culture and history. Some of the topics to be introduced are: kingship and court culture; Confucianism; social structure and people on the margin; gender relations and family; war and violence; science and technology; food and medicine; and the quotidian lives of people. This is also a media literacy course and students learn to engage critically with period pieces by writing comparative film essays and historical film critiques/scripts.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM, VC EN: H

**L81 EALC 388 Asian and Asian Diaspora Theatre**

It is often falsely assumed that Asian and Asian American theatre is a theatre for specific ethnic communities. However, its significance in the US and in broader world theatre scenes has reverberated with audiences of diverse backgrounds, leading to a production of vibrant artistic and scholarly discussions on its power in shaping cultures and politics in America and in other global regions. This course engages with these very discussions, centering on understanding the complexity of contemporary Asian and Asian American theatre by situating them in the context of Asian diasporas. Key inquiries include the following questions: What causes the circulation of peoples from Asia and people of Asian descents from their "home" countries to another country?; how do experiences of war, international marriage, adoption, political oppression, refugee, and marginalization in "new" countries impact the psyche of diasporic subjects?; the notion of "Asia" as Other has been integral to the formation of the US national identity from the country's inception, but what exactly is "Asia," and what is the role of theatre in challenging the relentless othering of Asians?; and finally, how might the framework of Asian diasporic theatre and performance help us move beyond the bifurcation between Asian Studies and Asian American Studies? In exploring these questions, we will engage in analyzing plays, production videos, interviews with artists, and scholarly writing, learning from artists who examine lives and histories of Asian descents (Chinese, Filipino, Hmong, Japanese, Korean, Vietnamese, and Taiwanese among others), as well as from thinkers that have been foundational to the development of Asian and Asian American theatre and performance studies. By the end of the semester, students will have read plays, documentaries, musicals, and interdisciplinary arts from the contemporary Asian and Asian diaspora theatre and be able to engage in an informed debate on the role of Asian and Asian American theatre in shaping contemporary cultures in the US and in other parts of the world. All readings are in English or in English translation and are available on Canvas.

**L81 EALC 3901 Mao and the World**

Was Mao Zedong an uncompromising tyrant who caused the death of millions, or was he a revolutionary leader who was daring enough to imagine an alternative existence? This course is a close investigation of Mao and his world through a global perspective. The students will be exposed to primary sources written by Mao himself, and they will situate Mao within the turbulent decades of China's engagement with Western colonialism, imperialism, and revolutionary thought in the 20th century. Putting Maoism at the center of world history, students will learn the intimate links between China, Southeast Asia, Africa, and North America, and they will examine in detail how Maoism shaped a variety of political and infrastructural transformations around the world, from the Black Panthers to Tanzanian railroads. By the end of the course, students will have a strong grasp of the contradictions that Mao himself faced throughout his life -- contradictions that changed nothing less than the world itself.

**L81 EALC 420 Nature, Technology, and Medicine in Korea**

This course examines the cultural history of modern Korea with a focus on science, technology, and medicine. From about 1500 to the present, a number of hugely consequential things happened in Korea that have been called revolutionary--or what historians dub "early modern" and "modern." Confucian kings planned large-scale projects that changed nature, rustic scholars made inventories of flora and fauna, colonial Koreans became biologists, nurses, and "Edisons," and in North and South Korea, new professionals created distinctive--and in some cases, globally-competitive--regimes of knowing, making, and healing. Students will interrogate these developments as an opportunity to revisit the history of modernity, which has been told predominantly from the perspective of the West. What does it mean to be "modern" in Korea? How did that modernity intersect with Korean science, technology, and medicine? Students will find and articulate their own answers by writing the final research paper. Recommended to have taken Korean Civilization or equivalent course that provides basic working knowledge of Korean history. Course also counts as an EALC capstone course. Prerequisite: junior level or above or permission of instructor.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

**L81 EALC 4242 Culture and Politics in the People's Republic of China: New Approaches**

This course inquires into the political, ideological, and social frameworks that shaped the cultural production and consumption in the People's Republic of China (PRC). In the realm of literature, film, architecture, and material culture and everyday life, this course pays a close attention to the contestation and negotiation between policy makers, cultural producers, censors, and consumers. Understanding the specific contour of how this process unfolded in China allows us to trace the interplay between culture and politics in the formative years of revolutionary China (1949-1966), high socialism (1966-1978), the reform era (1978-1992), and post-socialist China (1992 to present). The course examines new scholarship in fields of social and cultural history, literary studies, and gender studies; and it explores the ways in which new empirical sources, theoretical frameworks, and research methods reinvestigate and challenge conventional knowledge of the PRC that have been shaped by the rise and fall of Cold War politics, the

development of area studies in the U.S., and the evolving U.S.-China relations. Graduate students should be proficient in scholarly Chinese, as they are expected to read scholarly publications and primary materials in Chinese. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor. Same as L04 Chinese 4242  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L81 EALC 425 Topics in Religion and Culture in East Asia: Women, Confucianism and Buddhism in East Asia**

This reading seminar introduces students to texts on and by women in East Asia from the earliest extant writings to the nineteenth century. Texts covered in the first half of the course include philosophical and doctrinal writings that deal with the role of women in society, their fitness for self-cultivation, and their access to salvation. The second part of the course focus is on narrative texts, memoirs and diaries that portray women or that were written by women, drawn from the literary traditions of China, Korea and Japan. Some of the issues students will grapple with are: Are Confucianism and Buddhism, some of the great intellectual traditions of East Asia, inherently misogynistic? Or can they function as liberating forces for women in their search for agency and meaning? More broadly, how can boundaries and constraints contribute to self-cultivation, growth, and even salvation? Previous coursework on East Asia and/or Buddhism is strongly recommended, but no prior knowledge of Chinese, Korean, or Japanese language is required. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: junior level or above or permission of instructor.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

**L81 EALC 444 The Forbidden City**

Home to 24 emperors of the Ming and Qing dynasties (1368-1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of premodern architecture in China. This seminar examines the origins of the palace; its construction in the early Ming; the coded symbolisms of its plan and decoration; the rituals of court; and the lives of its denizens, from emperors (including Pu Yi, the "last emperor") to concubines and from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and a backdrop to major political events, as well as its role in the urban design and contemporary art of 21st-century Beijing. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

**L81 EALC 445 Japanese Fiction: Meiji Women Writers (Writing-Intensive Seminar)**

The Meiji Period (1868-1912) in Japan was a time of tumultuous change. During the era Japan made sweeping reforms to its government, educational system, and social structures. Meiji men were encouraged to "modernize" along Western lines, while women were expected to serve as "repositories of the past." Most women prized the elegant traditions and saw these as important markers of cultural identity. But not all were willing to completely abdicate their place in the modernizing impulse. This writing intensive course will examine these women's literary works, paying attention to the way they developed strategies to both "serve the nation" and find an outlet for their own creative voice. Works to consider include the short fiction of Higuchi Ichiyo, Shimizu Shikin, and Tamura Toshiko, the poetry of Yosano Akiko, the essays of Kishida Toshiko, and the translations of Wakamatsu Shizuko. All readings are available in English translation and students need not be familiar with Japanese, though background in Japanese Studies, Women's Studies, or literary studies will be helpful. This is a Writing-Intensive Seminar. Prerequisite: junior level or above or permission of instructor.

**L81 EALC 4450 Horror in Japanese Media**

Elements of the macabre and horrific have been present in Japanese culture and media since time immemorial. The 11th-century work *The Tale of Genji*, for example, features an elite lady's "living ghost" killing off her main rivals for the prince's affections. Tales of ghosts, demons, and the supernatural entities known as yokai continued to appear in collections of Buddhist didactic and folktale literature of the following centuries, finding renewed popularity in the 17th-19th centuries in the form of *kaidan* or "strange tales" which were enjoyed as printed works, parlor games, and stage plays. Some of the very first films made at the turn of the 20th century in Japan were about the popular ghosts of yore. Building on this long legacy of fearsome creatures in popular media of times now past, this course will consider selections of Japanese horror media (film, literature, anime, manga, and video games) from the mid-20th to early 21st centuries, highlighting the intertextuality that different media within the horror genre has and how the horror genre itself even bleeds into other genres. Analyzing major figures and themes in each work, this course will explore how Japanese horror -the strange realm home to ghosts with a grudge, misunderstood monsters, and merciless murderers-can function not only as thrilling entertainment but can also reflect Japanese societal and cultural anxieties present in the real world, ranging from the problems that technology may create in a changing world to the threats posed by shifts in traditional family dynamics. Although this course will focus on horror media in the Japanese context, understanding how horror can function to highlight such anxieties will prepare students to consider the deeper possibilities of horror media in their own respective cultural contexts. All readings will be in English, and visual media will be in Japanese with English subtitles. Required Screenings

**L81 EALC 449 Topics in Comparative Literature:**

In this course, we will read a broad range of literary works written by ethnic Chinese from various parts of the world. We will examine the notion of "Sinophone," primarily its implications to the challenge of cultural identity formation to those Chinese who are not traditionally identified as "Chinese" because of war, migration, immigration, colonialism, among others. We will also examine the meaning of being on the margins of geopolitical nation-states. Finally we will discuss the notions of hybridity and authenticity vis-a-vis literary representation. We will read works by ethnic Chinese writers from the United States, France, Taiwan, Hong Kong, Singapore, Malaysia, Mongolia, Tibet, and so on. This course is limited to seniors and graduate students only. All readings will be in English. Active class participation is required.

**L81 EALC 4496 Porcelain and Lacquer Abroad: Europe Encounters Asia**

From 1500 to 1800, Europeans primarily used exported porcelains and lacquers to engage with China and Japan, which were neither under colonial control, nor easily accessible by travel. Collected first in *kunstkammers* by rulers and nobles as emblems of power, these initially rare, exotic luxuries retained their prestige even as they became more widely available and explicitly gendered. Combining deep object studies with collectors' case studies from across Europe, this course examines how early modern Europeans used porcelains and lacquers to satisfy their curiosity about and material desire for China and Japan. In addition to practical training in essential primary sources such as inventories, it will also introduce theories of luxury and consumption, gift exchange, cross-cultural interaction, material culture, and the global movement of objects. Prerequisites: L01 111 preferred; one art history course or permission of instructor

**L81 EALC 450 Masterworks of Early Japanese Literature: The Tale of Genji and its Afterlives**

This course is an intensive study of one of the central texts of classical Japanese literature. Selection of texts rotate among works including: *The Tale of Genji*, court diaries, poetry anthologies, Noh drama, *The Tale of the Heike*, *setsuwa* collections, and medieval memoirs. In addition to exploring the historical, literary, and cultural significance of the work from its genesis to the present age, students engage in a close reading of the text and an investigation of the primary theoretical issues and approaches associated with the work both in Japan and abroad. Prior knowledge of early Japanese literature or history is recommended. Texts will be read in English translation. Prerequisite: junior level or above or permission of instructor.

**L81 EALC 4510 Urban Culture in Modern China**

The narrative of rural crisis and peasant revolution has dominated China's modern history for decades. But there has been a growing interest in China's urban past and present with the increased prominence of cities in China's breathtaking economic development

and the opening of municipal archives in post-Mao era. The course aims to introduce students to "conventional wisdoms," new directions, and major debates in the urban history field. Topics include: the urban political economy, the cultural dynamics of modernity, the reconstruction of traditions in the making of modernity, the cultural production and consumption, colonialism and imperialism in the urban setting, nationalism, and reform and revolution. Acknowledging and understanding the nuance and difference in views and interpretations in historical writings (historiography) are essential. The course seeks to develop students' research and analytical skills, such as locating secondary sources, incorporating scholarly interpretations, and developing and sustaining a thesis based on secondary and primary sources in student research. This is an interdisciplinary seminar designed for advanced undergraduates and graduate students. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor. Same as L04 Chinese 4510

**L81 EALC 4750 Worldviews, World-Building, and World Literature: New Approaches to Chinese Literature (1500-1900)**

This course explores how the multivalent notion of "world" creates new approaches for studying Chinese literature from the 16th century up to the early 20th century. It will consider the following questions: How did the Chinese people perceive, map, and write about the world prior to modernity? What are the strategies to construct fictional,

virtual, or gameful worlds through literature and other media? How and why should we position Chinese literature as world literature? Issues covered in this course include premodern worldviews, literary and transmedia world-building, multilingualism, adaptation, and translation. One primary goal of this course for students is to learn how to critically apply theories from narratology, media studies, and comparative literature to study Chinese literature. To this end, the first session will focus on a particular piece of theoretical work or relevant secondary scholarship, and in the second session students will conduct a case study with selected primary sources to practice employing, questioning, and complicating those theories and methods. All readings will be provided in English. Students with classical and modern Chinese skills will be encouraged to read materials in the original to the extent possible. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisites: junior level or above or permission of instructor. Credit 3 units. **L04 Chinese 101D First-Level Modern Chinese I**

This course is an introduction to the modern spoken and written national language of China. This course is an introduction to the modern common language of the Greater China area, known as "Mandarin." The course includes conversation, reading of texts, and writing of characters. In addition to lectures, students are required to attend a weekly subsection and a ten-minute one-on-one language practice with the instructor. Minimum grade of B- or permission of Section Head required for continuation to L04 102D. By the end of the semester, students should be able to read and write short passages (approximately 350 Chinese words) and to conduct daily conversations in a colloquial way. Note: Students with some previous Chinese language background must take the placement examination. Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

---

#### **L04 Chinese 102D First-Level Modern Chinese II**

This course is a continuation of L04 101D and L04 131. The course will continue emphasizing listening, speaking, reading, and writing skills in the context of functional everyday Chinese. In addition to lectures, students are required to attend a weekly subsection and a ten-minute one-on-one language practice with the instructor. Minimum grade of B- or permission of Section Head required for continuation to L04 211. By the end of the semester, students should be able to read and write short passages (approximately 750 Chinese words) and to conduct daily conversations in a colloquial way. With the language skills acquired during the two semesters of the first year, the student should be able to survive most of the simple daily conversational situations in China. Prerequisite: L04 101D (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L04 Chinese 106 Beginning Chinese for Heritage Speakers I**

This course is designed specifically for students who can speak and understand some spoken Chinese but have little or no knowledge in reading and writing in Chinese (so-called "heritage speakers / huáyì"). Students can choose either traditional or simplified Chinese characters for tests and written homework. The topics will concentrate on the life of Chinese immigrants in the U.S. By the end of the semester, students will have been introduced to a vocabulary of about 450 words, and will be expected to be able to produce, both in speaking and in writing, paragraph-length passages in modern Chinese. Prerequisite: placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L04 Chinese 107 Beginning Chinese for Heritage Speakers II**

This course is the continuation of the beginning heritage Chinese, and is designed specifically for Chinese heritage speakers to further improve their reading, writing, listening and speaking skills in Chinese. Students can choose either traditional or simplified Chinese characters for tests and written homework. It will cover topics such as China Town, Chinese immigration history, and Chinese etiquette etc. By the end of the semester, students will have been introduced to a vocabulary of about eight hundred and fifty words. Students are expected to make conversations, clarify ideas, and produce multiple paragraph-length passages in writing. Prerequisite: L04 106 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L04 Chinese 1070 Ampersand: Encountering Chinese Culture: A Performative Perspective on Chinese Culture and Identity**

This course examines the diversified and rich history of Chinese visual and performance cultures from the Chinese mainland, Taiwan, Hong Kong, and throughout the Chinese diaspora. A collaboration between the East Asian Languages and Cultures and Performing Arts departments, this course explores Chinese cultural narratives in relation to how they have been performed -- on stage in traditional forms of dance-drama, on screen in film, and as lived in the practice of everyday life -- from the late Imperial period to the present. It includes a practice component that introduces the students to movement disciplines such as Tai' Chi and opera, and it allows students to pursue creative assignments such as interview, stage plays, and filmmaking that demonstrate their developing knowledge of historical and contemporary Chinese culture. Building bridges of understanding between the United States and the Republic of China in Taiwan, the course will culminate in a spring break trip to Taiwan. This course is only for first-year, non-transfer students in the Ampersand: Encountering China program.

---

#### **L04 Chinese 1080 Encountering Chinese Culture: Performing Tradition, Engendering Transformations**

This course examines the development of modern Chinese culture and its dynamic relationship with traditions and renovations. During the past century, China has gone through a series of political, cultural, economic, and technological transformations that constantly reshaped the form and content of Chinese culture. Tracing the drastic changes in Chinese language, performance and media forms from the late 19th century to contemporary time, this course guides the student through the pivotal moments in modern Chinese history and analyzes their impacts on literature, drama, dance, film and internet culture. What transformative promise did new media and art forms deliver? How do we make sense of the intricate connection between tradition and renovation? The purpose of this course is to foster an understanding of Chinese culture as a dynamic process of formation rather than a static, homogeneous entity. However, instead of seeing this formation as a linear progression with one form or style replacing the other, we will study how past traditions -- both ancient and recently constructed ones -- are reconfigured in new cultural representations and practices.

#### **L04 Chinese 130 Basic Chinese I**

Basic Chinese I is designed for zero background beginners. In this course, students will learn basic knowledge of Chinese language, including phonetics, vocabulary, grammars and to perform the language in a culturally appropriate way. This course emphasizes all four skills of a language, listening, speaking, reading and writing. After completing this course, students should be able to read and write basic Chinese characters, conduct daily conversations in a colloquial way. The topics covered in the course will include greetings, family, time, hobbies and visiting friends. In addition to lectures, students are required to attend a ten-minute one-on-one language practice with the instructor. After completing the spring course I, followed by the fall course II, interested students can then go on to L04 102D. Basic Chinese I and Basic Chinese II do not fulfill the language sequence requirement, nor the two-semester language requirement for the EALC minor. Note: Students with some previous Chinese language background must take the placement examination.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

---

#### **L04 Chinese 131 Basic Chinese II**

Basic Chinese II is a continuation of Basic Chinese I (L04 130). Students will continue to learn Chinese phonetics, vocabulary, grammars and to perform the language in a culturally appropriate way. This course emphasizes all four skills of a language, listening, speaking, reading and writing. After completing this course, students should be able to read and write approximately 350 Chinese words, and to conduct daily conversations in a colloquial way. The topics covered in the course will include school life, shopping, studying Chinese and making appointments. In addition to lectures, students are required to attend a ten-minute one-on-one language practice with the instructor. After completing Basic Chinese course II (L04 131) in the fall, students who are interested in further studies can move on to L04 102D. Basic Chinese I and Basic Chinese II do not fulfill the language sequence requirement, nor the two-semester language requirement for the EALC minor. Prerequisite: L04 130 (grade of B- or better) or by placement test.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

#### **L04 Chinese 150 First-Year Seminar: Exploring East Asian Classics**

This first-year seminar introduces students to major works of the Chinese, Korean, and Japanese traditions. Although written centuries in the past, these texts still reverberate with meaning today and offer important means to understand the often chaotic and confusing events occurring daily around us. What is the self? What is the relationship

between the individual and society? How do we live an ethical life? What is literature and for whom is it intended? In grappling with these questions, students will directly engage with the texts through close reading and in-class discussion. Students will, at the same time, also ask broader questions that concern how knowledge is produced, spread, and consumed: what is a canon? Who are the gatekeepers? What does it mean to approach East Asia through a set of "canonical" texts? Among the texts considered will be *The Analects*, *Daodejing*, *Lotus Sutra*, *Tale of Genji*, *Tales of the Heike*, *Tales of Moonlight and Rain*, *Samguk yusa*, and *Memoirs of Lady Hyegyong*. Prerequisite: first-year, non-transfer students only.

#### **L04 Chinese 206 Intermediate Chinese for Heritage Speakers I**

This course is designed for intermediate students with Chinese heritage background. This course includes training in all four skills (speaking, listening, reading and writing) with an emphasis on writing and reading in Chinese. Students can choose either traditional or simplified Chinese characters for tests and written homework. By the end of the semester, students are expected to produce paragraph-length speeches and short essays in modern Chinese. Prerequisite: L04 107 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L04 Chinese 207 Intermediate Chinese for Heritage Speakers II**

This course is a continuation of L04 206. It provides further training on the comprehensive skills of Chinese language, with an emphasis on writing and reading. The materials cover a wide scope of topics regarding Chinese language, society and culture, such as U.S.-China relations, social changes, family issues, and the education system in China, etc. By the end of the semester, students are expected to produce paragraph-length speeches and short essays with linguistic complexity in modern Chinese. Prerequisite: L04 206 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L04 Chinese 211 Second-Level Modern Chinese I**

Modern Chinese 211 is the first part of the intermediate level Chinese language course. It is designed to help students achieve greater proficiency in oral and written use of the language through reading, listening, speaking and writing. Upon completing the semester, students should be able to conduct daily conversations and discussions. Topics will include but not limit to living in the dorm, ordering food, the internet and social media, working while studying, education, Chinese geography etc. By the end of the semester, students should be able to compare and discuss in a structural way, to make specific requests and give comments, to clearly express their opinions on daily topics both in speaking and in writing. In addition to lectures, students are also required to attend a ten-minute one-on-one language practice with the instructor. Prerequisite: L04 102D (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L04 Chinese 212 Second-Level Modern Chinese II**

Modern Chinese 212 is the second part of the intermediate level Chinese Language Course. It is designed to help students achieve greater proficiency in oral and written use of the language through reading, listening, speaking and writing. Upon completing the semester, students should be able to conduct daily conversations and discussions. Topics will include but not limit to traditional holidays, life in China, environment, gender equality, Chinese history, etc. By the end of the semester, students should be able to compare and discuss in a structural way, to express their opinions on abstract topics, to describe

scenes and narrate stories in a structural way. In addition to lectures, students are also required to attend a ten-minute one-on-one language practice with the instructor. Prerequisite: L04 211 (grade of B- or better) or placement by examination.

#### **L04 Chinese 221 Conversational Chinese: A Multimedia Course**

This course is intended for students from advanced beginners to intermediate-level learners who want to improve their Chinese conversational skills and fluency. In this course, students will learn Chinese expressions and phrases encountered in daily situations, and they will also learn to read and type Chinese characters. This is a multimedia course that will utilize videos, movies, and authentic language materials for instruction and learning. By the end of semester, students should attain the abilities to use accurate pronunciation, tones, vocabulary, expressions and grammar in connected speech; to hold conversations in daily situations; to build up speaking and listening fluency; to use appropriate manners, both verbally and nonverbally, in conversations; and to acquire basic knowledge of Chinese sociocultural values and pragmatics. Prerequisites: Permission of instructor.

#### **L04 Chinese 270 Sophomore Seminar: U.S.-China Relations: Perceptions and Realities**

The United States and China are the two most important global powers today, and the bilateral relationship is one of the most comprehensive, complex, consequential, and competitive major-power relations in the world. The course aims to examine the attitudes, ideas, and values that have shaped the relationship, from the era of colonial expansion in the 1800s to the rise of China as a major political and economic power in the 21st century. Drawing upon visual images, literature, films, policy statements, and other materials, the course will analyze the patterns of perceptions that have informed and shaped the understanding of realities. This course, which uses an interdisciplinary approach, will include discussions and debates from both American and Chinese perspectives. Prerequisite: sophomore level only.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

#### **L04 Chinese 275 Sophomore Seminar: Beijing: From Imperial Capital to Olympic City**

This course examines recent English-language scholarship on Beijing's history and culture. From the early modern period to the contemporary era, Beijing has served as the capital for imperial, early Republican, and revolutionary and post-socialist China. The city thus has been virtually synonymous with governmental power and elite politics. However, recent scholarship has shifted focus from the political perspective to uncovering the social and cultural changes at the grassroots. Notable scholarly works have demonstrated that the modernization impulse and the move to industrialization served to create the city's modern face. Administrative reforms gave rise to new conceptions and a host of institutions to manage social relief, public services, and legal and punitive institutions. The rise, fall, and subsequent revival

of the consumer marketplace impacted cultural production and consumption. Mass (de)mobilization closed old venues while opening new possibilities for residents to understand and participate in politics. The recent English-language scholarship not only delineates forces that shaped the lives of millions of residents of Beijing but also situates their experience in the national and global context of modernization and revolution.

#### **L04 Chinese 2980 Undergraduate Internship in Chinese**

Students receive credit for a faculty-directed and approved internship. Registration requires the completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities (e.g., eight to ten hours a week for thirteen or fourteen weeks to receive 3 units of credit; 1 or 2 credits for fewer hours). Candidates must have taken at least one China related course (language or content) or concurrent enrollment. Advisor interview required if first time student is enrolling in an internship within the Chinese language section; limited to two units per semester. Credit/no credit only. Prerequisite: permission of department or DUS. Credit variable, maximum 3 units.

---

#### **L04 Chinese 306 Advanced Chinese for Heritage Speakers I**

This course is designed for heritage students who have studied at least two years of Chinese (or equivalent) to achieve greater proficiency in the oral and written use of the language through reading, listening, speaking, and writing. The teaching materials include essays and dialogues covering miscellaneous topics about today's China. Students are expected to make presentations and exchange ideas in appropriate and persuasive ways. Prerequisite: L04 207 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L04 Chinese 307 Advanced Chinese for Heritage Speakers II**

This course is designed as a continuation of Advanced Chinese for Heritage Speakers to achieve more advanced competence in speech and writing of the language through studying and discussing essays and dialogues covering a variety of topics concerning Chinese society and culture. Students are expected to present opinions, make conversations and debate in appropriate and persuasive ways. Prerequisite: L04 306 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L04 Chinese 3162 Early Modern China**

This course examines political, socio-economic, and intellectual-cultural developments in Chinese society from the middle of the fourteenth century to 1800. This chronological focus largely corresponds to the last two imperial dynasties, the Ming (1368-1644) and Qing (1644-1911). Thematically, the course emphasizes such early modern indigenous developments as increasing commercialization, social mobility, and questioning of received cultural values.

#### **L04 Chinese 3163 Historical Landscape and National Identity in Modern China**

This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campus, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens, and churches. Using methods of historical and cultural anthropological analysis, the course invests the places where we see with historical meaning. Through exploring the ritual,

political, and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local, and personal identity. The historical events and processes we examine along the way through the sites include the changing notion of rulership, national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory, and changing over time are an important concern of this course.

---

#### **L04 Chinese 3166 Archaeology of China: Food and People**

China is a country with a large population, diverse landscapes, and unique food. This course will explore the origins of Chinese food in the context of the formation of Chinese societies. During the last two decades, the archaeology of China has become a fast moving subject with advances in methods, theories and changes of key perceptions. In this context, the beginning and spread of food production in China has become one of the key questions in current archaeology. We will focus on the process of domestication of plants and animals in various regions of China during the Holocene. We will explore how those processes relate to other sectors of the Old World, such as those of South and Southwest Asia. This course will pursue answers to the following questions: Why the Chinese ways of living and eating are different from those in the West? How production and consumption in China were shaped by food globalization in prehistory?

#### **L04 Chinese 3167 Economic History of China: From the Silver Age to Reform and Opening, 1500-1990**

This seminar explores the economic history of China from the 16th to the 20th century; this time period is the half a millennium during which China became part of the world economy and defined its development in major ways. Over the course of the semester, students will be exposed to the main debates in the field of Chinese economic history while acquiring a strong grasp of the nuts and bolts of how economy functioned and changed from the imperial to the modern times. Situating China within a comparative perspective, we will examine a multitude of debates ranging from the global silver age of the 16th century to the birth of capitalism, the socialist economy, and the PRC's recent involvement in Africa. We will in particular discuss the contradictions that arose out of China's integration into the world economy and the different kinds of economic regimes that existed and continue to exist within China. While this course assumes a basic familiarity with Asian history, students with backgrounds in other world histories and/or social science disciplines should feel comfortable with the course material.

---

#### **L04 Chinese 3168 A History of Modern China**

This course explores the 19th- and 20th-century history of China. Its purpose is to provide students with a historical foundation to understand the momentous changes the country underwent during its traumatic transition from an empire to a nation-state. We start the course at the height of the empire's power in the late 18th century, when the Qing dynasty (1637-1912) conquered vast swathes of lands and people in Inner Asia. We then move on to the Qing's troubled relationship with Western capitalism and imperialism in the 19th century, which challenged the economic, social, and ideological structures of the imperial regime, culminating in the emergence of "China" as a nation-state. By situating China's national history within a global context, the course outlines in detail the transformations that took place in the 20th century, from the rise of communism and fascism

to the Second World War to Maoism and cultural revolution. We end the semester with yet another major change that took place in the 1980s, when a revolutionary Maoist ideology was replaced with a technocratic regime, the legacies of which are still with us today.

---

#### **L04 Chinese 3195 Empire and Ethnicity: Qing Legacies in China and Inner Asia, 1600 to Today**

Eschewing traditional narratives of a "closed" Chinese civilization, this course explores the cultural, religious, and ethnic diversity of China and its dynamic interactions with Inner Asia during the early modern period. It questions the myth of a monolithic Chinese culture and uncovers the region's multiple and ethnically entangled past through an in-depth look at the Manchu-led Qing dynasty (1644-1912). This was the last non-Han dynasty of the Imperial Era, and it gave the People's Republic of China its vast Inner Asian territories: Xinjiang, Inner Mongolia, and Tibet. In rethinking the Qing Empire, this course particularly focuses on Tibetan Buddhism and Islam as religious ideologies that linked China with Tibetan, Mongolian, and Turkic-Muslim regions of Inner Asia through the imperial center at Beijing. Specific topics will range from food culture (Halal) to the Qing's expansion into and later colonization of Xinjiang, the reverberations of which persist even today under the Belt and Road Initiative.

---

#### **L04 Chinese 3211 Contemporary Chinese Popular Culture**

With the rise of the Chinese economy and global capitalism, popular culture has proliferated in mainland China in recent years. This course traces the development of Chinese popular and youth culture and society from the 1990s to the present. It also refers back to modern times and ancient Chinese Confucian philosophy for historical background information. The course covers various forms of Chinese popular culture, such as movies, music, television programs, Internet literature, religion, sports, and food. Students observe primary resources and read academic articles to engage in a multiperspective and multimedia view of present-day China in the age of globalization and East Asian regionalization.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

#### **L04 Chinese 3270 Topics in East Asian Performance Cultures: Gender in East Asian Theatre and Performance**

This course explores the constructions of gender within traditional and modern East Asian performing arts, with particular attention to cultural values, identities, and sensibilities revealed through various theatrical expressions. Genres to be studied include Chinese opera xiqu, revolutionary ballet, and spoken drama huaju, Japanese kabuki and Takarazuka Theatre, and Japanese modern drama, Korean narrative song form p'ansori and opera changgeuk, Korean new theatre shin'guk and modern dance, contemporary East Asian queer performances, among others. Consideration of gender in performance will address 1) narrative of the form, 2) persona of the character, 3) identity of the performer, and 4) role of the audience. As part of this study, students will explore the cultural specificity embedded in various forms of East

Asian theatre and performance through the lens of gender. A second interest lies in the applicability of Western models of gender, culture, and performance studies for the domain of the arts and for East Asia as a cultural region. The seminar approach will be interdisciplinary with extensive use of written, visual, and aural materials. Class combines lecture and discussion. Readings include critical, historical, literary, and descriptive writing about various genres of performing arts. All readings are in English translation. Prerequisites: None

#### **L04 Chinese 3352 China's Urban Experience: Shanghai and Beyond**

The course studies the history of Chinese cities from the mid-19th century to the late 20th century. It situates the investigation of urban transformation in two contexts: the domestic context of modern China's reform and revolution and the global context of the international flow of people, products, capitals, and ideas. It chooses a local narrative approach and situates the investigation in one of China's largest, complex, and most dynamic and globalized cities - Shanghai. The experience of the city and its people reveals the creative and controversial ways people redefined, reconfigured, and reshaped forces such as imperialism, nationalism, consumerism, authoritarianism, liberalism, communism, and capitalism. The course also seeks to go beyond the "Shanghai model" by comparing Shanghai with other Chinese cities. It presents a range of the urban experience in modern China.

#### **L04 Chinese 3415 Early Chinese Art: From Human Sacrifice to the Silk Road**

How does ancient and medieval Chinese art inspire contemporary artists? This course examines Chinese art, architecture, and material culture from the prehistoric period through the end of the medieval Tang dynasty to demonstrate how the past continues to affect contemporary Chinese art and the art of its future. Topics covered include Neolithic ceramics and jades, the early bronzecasting tradition, the Terracotta Army and its predecessors, early brush arts and Buddhist sites, and the varied exotica of the Silk Road. Each class teaches early

and contemporary works side by side to demonstrate how artists today continue to look to the past as they create the art of the future. Prerequisite: One course in Art History at the 100 or 200 level or permission of instructor.

#### **L04 Chinese 350 U.S.-China Relations from 1949 to the Present**

The United States and China are the two most important global powers today, and the relationship between them is one of the most comprehensive, complex, and consequential major-power relations in the world. The tangled relationship is at times turbulent, and its future remains uncertain. This course studies the bilateral relationship from the Chinese Civil War to the rise of China as a major political and economic power in the 21st century. It invites students to explore the following questions: What have China and the U.S. done to confront or accommodate each other in global politics? How has foreign policy in both countries balanced the often competing goals of state security, economic stability, domestic political order, and international influence? What are the impacts of a rising China on geopolitics in the Asia-Pacific region and on the U.S.'s global leadership in the 21st century? By drawing on scholarship in political and social history and area studies, this course helps students better understand both the historical context and current developments of U.S.-China relations. Fulfills modern elective for EALC major.

---

#### **L04 Chinese 3510 Pleasure, Amusement, and Play: Entertainment Culture in Premodern China**

How do people in premodern China talk and write about pleasure? What can be learned about Chinese culture and society through pleasure, amusement, and play? This course explores the entertainment culture in premodern China, mainly from the 16th to the 18th century—an important historical moment of technological, economical, and political transformations. Throughout the semester, students will follow the scholar-officials, urban nouveau riche, courtesans, and entertainers in their travel through city spaces into gardens and pleasure quarters. Students will witness how they seek and take pleasure through reading a wide range of primary texts, including short stories, novels, essays, scholars' notation books, entertainment manuals, and philosophical writings. Students may have the opportunity to join and/or have conversations with them through in-class activities like role-play games and a mid-term creative adaptation assignment. By exploring the entertainment culture in premodern China, this course pays attention to the distinctive aspects in Chinese cultures such as gender dynamics, construction of public and private spaces, the promotion of personal emotions, as well as memories and nostalgia. All readings are in English. Prerequisites: None.

#### **L04 Chinese 360 Third-Level Modern Chinese I**

This course is an intermediate-advanced level modern Chinese language course, which is designed to help students achieve greater proficiency in the oral and written use of the language through reading, listening, speaking and writing. More attention will be concentrated on developing the natural flow of the language, expanding vocabulary, and producing written Chinese of paragraph length. It aims at transitioning from spoken language to formal language styles. Content covered includes contemporary China's social livelihood, changes since China's Reform and Opening, as well as various aspects of people's lives, such as pollution, transportation infrastructure, urban-rural gap, market economy and consumer products. Undergraduates enroll in the 300-level section; 500-level section is for graduate students only. Prerequisite: L04 212 (grade of B- or better) or placement by examination.

Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

**L04 Chinese 366 Chinese Theater Beyond Stage**

This course explores the aesthetics and politics of Chinese theater from the Yuan dynasty (1271-1368) to the present. By focusing on three pivotal themes—media, gender, and politics, students will familiarize themselves with the ways in which theater and performance inform and fashion self, society, and history in China and beyond. Through an in-depth examination of dramatic literature, audio-visual recordings, and films, the course asks: How do various medium forms, such as onstage performance, print, cinema, and animation, shape Chinese theater, and vice versa? In what ways do theatrical productions reflect and challenge gender norms through playwriting, role-playing, and cross-dressing? How does theater and performance negotiate diverse political agendas about China across time and space? The overarching objectives of this course are two-fold, 1) to develop a critical comprehension of major Chinese theatrical traditions and their modern and contemporary transformations, and 2) to discuss, write, and foster creative responses concerning the significance of Chinese theater, both domestically and within the changing global context. All readings will be provided in English. Fulfills premodern or modern elective for EALC major.

**L04 Chinese 380 Readings in Popular Literature and Culture: Writing Stories in Late Imperial China**

Why did stories become popular in late imperial China? How were stories written, and what were people's reading habits in a time full of dynamic social and cultural changes? This class answers these questions by reading stories from several narrative genres. Unlike the classic texts for formal education and the imperial civil service examinations, most of these writings were unconventional narratives for leisure reading, and they became part of the popular literature and culture of the time. Primary readings will include selections from formal and informal histories, vernacular short stories, classical language stories, and literary anecdotes. This class concentrates on examples from the 17th and 18th centuries, and these will be accompanied by a small number of secondary readings. A background in Chinese language or culture is welcome but not required. Prerequisite: Sophomore standing or above or permission of instructor.

**L04 Chinese 4242 Culture and Politics in the People's Republic of China: New Approaches**

This course inquires into the political, ideological, and social frameworks that shaped the cultural production and consumption in the People's Republic of China (PRC). In the realm of literature, film, architecture, and material culture and everyday life, this course pays a close attention to the contestation and negotiation between policy makers, cultural producers, censors, and consumers. Understanding the specific contour of how this process unfolded in China allows us to trace the interplay between culture and politics in the formative years of revolutionary China (1949-1966), high socialism (1966-1978), the reform era (1978-1992), and post-socialist China (1992 to present). The course examines new scholarship in fields of social and cultural history, literary studies, and gender studies; and it explores the ways in which new empirical sources, theoretical frameworks, and research methods reinvestigate and challenge conventional knowledge of the PRC that have been shaped by the rise and fall of Cold War politics, the development of area studies in the U.S., and the evolving U.S.-China relations. Graduate students should be proficient in scholarly Chinese, as they are expected to read scholarly publications and primary materials in Chinese. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor.

**L04 Chinese 4251 Topics in Religion and Culture in East Asia: Women, Confucianism and Buddhism in East Asia**

This reading seminar introduces students to texts on and by women in East Asia from the earliest extant writings to the nineteenth century. Texts covered in the first half of the course include philosophical and doctrinal writings that deal with the role of women in society, their fitness for self-cultivation, and their access to salvation. The second part of the course focus is on narrative texts, memoirs and diaries that portray women or that were written by women, drawn from the literary traditions of China, Korea and Japan. Some of the issues students will grapple with are: Are Confucianism and Buddhism, some of the great intellectual traditions of East Asia, inherently misogynistic? Or can

they function as liberating forces for women in their search for agency and meaning? More broadly, how can boundaries and constraints contribute to self-cultivation, growth, and even salvation? Previous coursework on East Asia and/or Buddhism is strongly recommended, but no prior knowledge of Chinese, Korean, or Japanese language is required. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: junior level or above or permission of instructor.

#### **L04 Chinese 427 Fourth-Level Modern Chinese I**

This course is designed for students who have successfully completed Third-Year Chinese or the equivalent. Based on their existing Chinese proficiency level, students will receive further training in all four language skills: listening, speaking, reading, and writing. The regular textbook will be supplemented with writings from Chinese newspapers, magazines, internet sources, and films. By the end of two semesters, students are expected to express themselves both orally and in written form on a variety of topics in humanities in depth and in a culturally appropriate manner. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L04 361 or L04 421 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L04 Chinese 428 Fourth-Level Modern Chinese II**

This course is a continuation of L04 427. Based on their existing Chinese proficiency level, students will receive further training in all four language skills: listening, speaking, reading, and writing. The texts are authentic materials from Chinese newspapers, magazines, internet sources, and films. Topics include changes in social values, technology and life, public policies, and popular culture etc. By the end of this semester, students are expected to conduct in-depth discussions on social issues and produce eight hundred-character essays. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L04 427 (grade of B- or better) or placement by examination.

#### **L04 Chinese 4310 Readings in Classical Chinese - Morality, Reality, and Fantasy**

This thematic course develops language proficiency in modern Chinese while studying classical Chinese. Students will improve their understanding of Chinese history and culture through reading Chinese classics and study Chinese classics through a comparative approach to written and multi-media materials, including videos, films and other online resources. Designed for students who have completed fourth-year Chinese for further training in all four language-skills: listening, speaking, reading, and writing, especially focusing on thematic discussion skills. Prerequisite: L04 428 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

#### **L04 Chinese 4415 Technology, Empire, and Science in China**

How did technology, science, and empire intersect in early modern and modern Chinese history? Was there a unique "Chinese" way of studying nature? How did non-Chinese scientists and engineers contribute to China's knowledge of the world? This course offers a historical and historiographical survey of science and technology studies in China,

from the 13th to the 20th century. It particularly examines the global circulation of scientific knowledge in the late imperial period, the place of technology in the empire building of the Qing dynasty (1637-1912), and the violent epistemic encounters between the West and China from the 19th century onward. Throughout the semester, we will explore Confucian scientists as well as Muslim geographers, Jesuit engineers, Manchu anatomies, and Chinese barefoot doctors. Positioning China within a global order, the students will question the premises of modern scientific discourses and try to respond to a seemingly simple question: What does science and technology even mean in a Chinese context?

#### **L04 Chinese 4441 The Forbidden City**

Home to 24 emperors of the Ming and Qing dynasties (1368-1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of premodern architecture in China. This seminar examines the origins of the palace; its construction in the early Ming; the coded symbolisms of its plan and decoration; the rituals of court; and the lives of its denizens, from emperors (including Pu Yi, the "last emperor") to concubines and from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and a backdrop to major political events, as well as its role in the urban design and contemporary art of 21st-century Beijing. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

#### **L04 Chinese 4489 The Three Emperors: Redefining Chinese Art in the Golden Age**

Ruling imperial China during its last Golden Age, the Qing emperors Kangxi, Yongzheng, and Qianlong patronized the arts during an unprecedented period of prosperity and international exchange. Many of the works they commissioned are now icons of Chinese culture, but in their time these three Manchus redefined Chinese art with ideas and styles from Baroque Europe, Tibet, Mongolia, and even Islamic Central Asia. This seminar focuses on the ethnically and culturally diverse art, architecture, and material culture patronized by these three emperors to examine how they and their multi-ethnic empire changed the definition of Chinese art during the long eighteenth century. Prerequisites: Intro to Asian Art (L01 111); or one 300-level course in Asian Art History, History or Literature; or permission of instructor.

Same as L01 Art-Arch 4489

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

#### **L04 Chinese 449 Topics in Comparative Literature:**

In this course, we will read a broad range of literary works written by ethnic Chinese from various parts of the world. We will examine the notion of "Sinophone," primarily its implications to the challenge of cultural identity formation to those Chinese who are not traditionally identified as "Chinese" because of war, migration, immigration, colonialism, among others. We will also examine the meaning of being on the margins of geopolitical nation-states. Finally we will discuss the notions of hybridity and authenticity vis-a-vis literary representation. We will read works by ethnic Chinese writers from the United States, France, Taiwan, Hong Kong, Singapore, Malaysia, Mongolia, Tibet, and so on. This course is limited to seniors and graduate students only. All readings will be in English. Active class participation is required.

#### **L04 Chinese 4510 Urban Culture in Modern China**

The narrative of rural crisis and peasant revolution has dominated China's modern history for decades. But there has been a growing interest in China's urban past and present with the increased prominence of cities in China's breathtaking economic development and the opening of municipal archives in post-Mao era. The course aims to introduce students to "conventional wisdoms," new directions, and major debates in the urban history field. Topics include: the urban political economy, the cultural dynamics of modernity, the reconstruction of traditions in the making of modernity, the cultural production and consumption, colonialism and imperialism in the urban setting, nationalism, and reform and revolution. Acknowledging and understanding the nuance and difference in views and interpretations in historical writings (historiography) are essential. The course seeks to develop students' research and analytical skills, such as locating secondary sources, incorporating scholarly interpretations, and developing and sustaining a thesis based on secondary and primary sources in student research. This is an interdisciplinary seminar designed for advanced undergraduates and graduate students. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

#### **L04 Chinese 460 Fifth-Level Modern Chinese I**

This content-based language course is designed for advanced students expecting to improve their skills through conversation, reading and writing of essays, stories, and other types of creative writings in Chinese. The reading material consists of a variety of authentic literature texts (1930s to 2000s), including short stories, prose, and poetry. Narration and description are emphasized in both spoken and written forms. After taking this course, students will be familiar with masterpieces of contemporary Chinese literature and representative writers. In addition, students are expected to produce their own creative writings. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L04 428 or L04 411 (grade of B- or better) or placement by examination or by instructor's permission.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L04 Chinese 461 Fifth-Level Modern Chinese II**

This course is designed for advanced students wishing to improve their skills in conversation, reading and writing of letters, essays, reports, and other types of compositions in Chinese. The reading material is comprised of a variety of authentic texts, including newspapers, short stories, and essays. This course is conducted entirely in Chinese. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L04 460 or L04 411 (grade of B- or better) or placement by examination or by instructor's permission.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L04 Chinese 4631 Business Chinese I**

In the present globalization, China has been fertile ground for foreign joint business ventures, and this course focusing specifically on business Chinese attests to that fact. This course aims at teaching Chinese business communication using a series of case studies to involve and challenge the students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts, from resolving contract disputes, to developing a business strategy, to establishing a franchise overseas. The course is designed to simulate real business environments where students interact with Chinese businesspeople in business settings, and are motivated to achieve business goals. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L04 428 (grade of B- or better) or instructor's permission.

Credit 3 units. A&S IQ: LCD EN: H

---

#### **L04 Chinese 4632 Business Chinese II**

This is the continuation of Business Chinese L04 4631. This course uses a series of case studies to involve and challenge students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L04 4631 (grade of B- or better) or instructor's permission.

---

#### **L04 Chinese 4701 Advanced Chinese Readings: Early Modern Vernacular Chinese Short Stories: Eat, Drink, Man, & Woman**

This hybrid Chinese language-literature course is designed to meet the needs of students who have taken at least five years of Chinese language courses (including classical Chinese) and are interested in exploring Chinese language and culture in more depth by studying early modern Chinese vernacular short stories. The stories are selected from the Three Words (Sanyan), the renowned three story collections by Feng Menglong, one of the most accomplished authors of vernacular fiction in the seventeenth-century China. The vernacular language in these stories is grammatically similar to modern Chinese, but is charged with the vocabulary of the time and interspersed with classical Chinese verses and expressions. Studying these stories will allow students to appreciate modern grammar while discerning the development of vernacular Chinese over the centuries. Prerequisite: L04 461 (grade of B- or better) and L04 410 or L04 411.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

---

#### **L04 Chinese 4750 Worldviews, World-Building, and World Literature: New Approaches to Chinese Literature (1500-1900)**

This course explores how the multivalent notion of "world" creates new approaches for studying Chinese literature from the 16th century up to the early 20th century. It will consider the following questions: How did the Chinese people perceive, map, and write about the world prior to modernity? What are the strategies to construct fictional, virtual, or gameful worlds through literature and other media? How and why should we position Chinese literature as world literature? Issues covered in this course include premodern worldviews, literary and transmedia world-building, multilingualism, adaptation, and translation. One primary goal of this course for students is to learn how to critically apply theories from narratology, media studies, and comparative literature to study Chinese literature. To this end, the first session will focus on a particular piece of theoretical work or relevant secondary scholarship, and in the second session students will conduct a case study with selected primary sources to practice employing, questioning, and complicating those theories and methods. All readings will be provided in English. Students with classical and modern Chinese skills will be encouraged to read materials in the original to the extent possible. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisites: junior level or above or permission of instructor.

**L05 Japan 103D First-Level Modern Japanese I**

This is the first semester of an academic-year course in beginning Japanese. It is designed for students who have had no prior study of Japanese. The course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communicative practices. It covers everyday vocabulary, expressions and basic grammatical structures and introduces all Japanese phonetic syllabaries (hiragana and katakana) as well as kanji characters. Cultural aspects of the language will also be introduced to deepen students' cultural awareness and to communicate appropriately in the global era. After completing this course, students are able to have basic

conversations such as self-introduction, shopping, making invitations, describing locations, etc. They are able to read and write simple texts on topics related to oneself. Note: students with some previous Japanese language background must take a placement test; students who misrepresent the extent of their background so as to gain entrance to this course will be dropped from this course. Minimum grade of B- required for continuation to Japanese 104D.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L05 Japan 104D First-Level Modern Japanese II**

This is the second semester of an academic-year course in beginning Japanese. This course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communicative practices. It covers everyday vocabulary and expressions, and introduces approximately 90 kanji characters. More grammatical structures and conjugation patterns will be introduced and practiced. Cultural aspects of the language are also incorporated in classroom practice to deepen students' cultural awareness and successful communication in the global era. After completing this course, students are able to understand and participate in daily conversation such as making requests, comparing things, expressing one's ideas and desires, and describing one's family members. They will be able to understand how to read and write novice-level materials on topics related to oneself and their immediate environment. Prerequisite: L05 103D (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

**L05 Japan 150 First-Year Seminar: Exploring East Asian Classics**

This first-year seminar introduces students to major works of the Chinese, Korean, and Japanese traditions. Although written centuries in the past, these texts still reverberate with meaning today and offer important means to understand the often chaotic and confusing events occurring daily around us. What is the self? What is the relationship between the individual and society? How do we live an ethical life? What is literature and for whom is it intended? In grappling with these questions, students will directly engage with the texts through close reading and in-class discussion. Students will, at the same time, also ask broader questions that concern how knowledge is produced, spread, and consumed: what is a canon? Who are the gatekeepers? What does it mean to approach East Asia through a set of "canonical" texts? Among the texts considered will be The Analects, Daojing, Lotus Sutra, Tale of Genji, Tales of the Heike, Tales of Moonlight and Rain, Samguk yusa, and Memoirs of Lady Hyegyong. Prerequisite: first-year, non-transfer students only.

**L05 Japan 213 Second-Level Modern Japanese I**

This is the first semester of an academic-year course in intermediate Japanese. The course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communicative practices. It covers the basic vocabulary, expressions, and more grammatical structures and conjugation patterns. About 100 new kanji characters are introduced. Cultural aspects of the language are consistently incorporated in classroom practice to deepen students' cultural awareness and successful communication in the global era. After completing this course, students are able to understand and participate in daily conversation about their experience, past, present and future events in more complex Japanese, and to be able to express opinions/thoughts and present information. They are able to read and write more complex texts on topics related to oneself and their immediate environment with a solid understanding of main ideas and supporting details from a variety of texts. Prerequisite: L05 104D (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L05 Japan 214 Second Level Modern Japanese II**

This is the second semester of an academic-year course in intermediate Japanese. The course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communicative practices. It introduces more vocabulary, expressions, grammatical structures and conjugation patterns such as passive, causative, causative-passive and honorifics. Cultural aspects of the language are consistently incorporated in classroom practice to enforce students' cultural awareness and communication success in the global era. After completing this course, students are able to understand and participate in conversation in complex Japanese, and to be able to express opinions/thoughts and present information using appropriate vocabulary, expressions and basic grammar in context. They can communicate appropriately using a variety of speech styles. They are able to read and write more complex texts with a solid understanding of main ideas and supporting details on familiar topics from a variety of texts. Prerequisite: L05 213 (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L05 Japan 226C Japanese Civilization**

This course will present a comprehensive overview of Japan, its history, its institutions and cultural products, and its society and people. The first half of the course will comprise a survey of Japanese history, with an emphasis on its social and cultural aspects, from the earliest period to the present day. Having established the historical framework with its interweave of native and foreign elements, Kyoto-based imperial aristocracy, the samurai class and their crucial role, Zen-inspired meditative arts, and exquisitely diverse cultural products--the class will move on, in the second half, to an examination of recent and contemporary trends and issues. These will center on Japanese education, social and family structures, urban centers and the rural periphery, economic and socio-political trends, Japan's distinctive and vibrant popular culture, contemporary problems and challenges, and the nation's dramatically shifting position in East Asia and in the 21st-century global order.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

#### **L05 Japan 280 Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film**

This course is an examination of key turning points in Japan from the mid-19th century to the present. It focuses on the important role that bureaucracies, staffed by public servants, have played in shaping the political and social life on the archipelago and in the region. We will engage representations of political and social life in Japan by making use of its rich visual culture by viewing and discussing Japanese films. The assigned films, which will be screened in Japanese with English subtitles, will likely include "The Twilight Samurai," "To Live," and "Shin Godzilla," among others. These films provide representations of how people in Japan have responded to crises, including revolution, war, and natural disasters. Through written and visual materials, students will gain a better understanding of history in Japan, public service, and the utility of film for engaging the past. Film screenings are mandatory. Same as L97 GS 280

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, IS EN: H

#### **L05 Japan 2980 Undergraduate Internship in Japanese**

Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities (e.g., eight to ten hours a week for thirteen or fourteen weeks to receive 3 units of credit; 1 or 2 credits for fewer hours). Credit/no credit only.

Credit variable, maximum 3 units.

---

#### **L05 Japan 299 Independent Study**

Prerequisite: permission of the instructor or department.

Credit variable, maximum 6 units.

---

#### **L05 Japan 320C Japan Since 1868**

For some, the word Japan evokes Hello Kitty, animated films, cartoons, and sushi. For others, it makes them think of the Nanjing Atrocity, "comfort women," the Bataan Death March, and problematic textbooks. Still others will think of woodblock prints, tea ceremonies, and cherry blossoms or perhaps of Sony Walkmans and Toyota automobiles. At the same time, still others may have no image of Japan at all. Tracing the story of Japan's transformations - from a preindustrial peasant society managed by samurai-bureaucrats into an expansionist nation-state and then into its current paradoxical guise of a peaceful nation of culture led by conservative nationalists - provides the means for deepening our understandings of historical change in one region and grappling with the methods and aims of the discipline of history. Same as L22 History 320C

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

#### **L05 Japan 324 A User's Guide to Japanese Poetry**

This course introduces the art and craft of Japanese poetry, one of the world's great literary traditions. Exploring the many styles of traditional verse--the poetic diary, linked verse, haiku, and others--and their historical contexts, students gain insights into Japanese aesthetics and study the unique conventions of Japanese poetic production that have evolved over a span of some 1500 years. The course also incorporates a "haiku workshop," where we engage in group-centered poetry writing and critiquing. No prior knowledge of Japanese is required.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

---

#### **L05 Japan 326 Samurai, Rebels, and Bandits: The Japanese Period Film**

Tales of heroism, crime, revolt, and political intrigue. Bloody battles, betrayal, madness, and flashing swords. This is the world of jidaigeki eiga, the Japanese period film. In this course, we will analyze the complex (and often flamboyant) narrative, visual, and thematic structures of films about the age of the samurai. We will discuss jidaigeki representations of violence and masculinity, self-sacrifice and rebellion, and the invention of tradition as well as critical uses of history. In addition to the historical content of the films, we will study the historical contexts that shaped jidaigeki film production and discuss relevant transformations in Japanese cinema and society. Period films have been shaped by and exert strong influences on Japanese theater, oral storytelling, popular literature, comics, and international film culture, all of which are helpful for understanding the films. As we track changes in jidaigeki style and subject matter, the course will introduce theories for interpreting narrative structure, genre repetition and innovation, intertextuality, and representations of "the past." All readings will be in English. No knowledge of Japanese required. No prerequisites. Required Screenings Tuesdays @ 7 pm.

Same as L53 Film 326

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

---

**L05 Japan 3270 Topics in East Asian Performance Cultures:**

**Gender in East Asian Theatre and Performance**

This course explores the constructions of gender within traditional and modern East Asian performing arts, with particular attention to cultural values, identities, and sensibilities revealed through various theatrical expressions. Genres to be studied include Chinese opera xiqu, revolutionary ballet, and spoken drama huaju, Japanese kabuki and Takarazuka Theatre, and Japanese modern drama, Korean narrative song form p'ansori and opera changgeuk, Korean new theatre shin'guk and modern dance, contemporary East Asian queer performances, among others. Consideration of gender in performance will address 1) narrative of the form, 2) persona of the character, 3) identity of the performer, and 4) role of the audience. As part of this study, students will explore the cultural specificity embedded in various forms of East Asian theatre and performance through the lens of gender. A second interest lies in the applicability of Western models of gender, culture, and performance studies for the domain of the arts and for East Asia as a cultural region. The seminar approach will be interdisciplinary with extensive use of written, visual, and aural materials. Class combines lecture and discussion. Readings include critical, historical, literary, and descriptive writing about various genres of performing arts. All readings are in English translation. Prerequisites: None

**L05 Japan 336 The Floating World in Japanese Literature**

This survey of Japanese literature covers the 17th to the 19th century. Primary focus is on the Genroku era (1688-1703), which witnessed the growth of lively urban centers and the emergence of a robust literary voice. Emphasis is on the ideological and cultural contexts for the development of a variety of new innovations in the genres of poetry (haiku), theater (kabuki and bunraku) and prose (kana zoshi). No knowledge of Japanese language is required. Sophomore level and above recommended.

Credit 3 units. A&S IQ: HUM, LCD, SD Art: HUM

---

**L05 Japan 3412 Japanese Art**

Surveying the arts of Japan from prehistory to present, this course focuses especially on early modern, modern, and contemporary art. Emphasizing painting, sculpture, architecture, and print culture, the course will also explore the tea ceremony, fashion, calligraphy, garden design, and ceramics. Major course themes include collectors and collecting, relationships between artists and patrons, the role of political and military culture or art, contact with China, artistic responses to the West, and the effects of gender and social status on art.

Same as L01 Art-Arch 3412

Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: HUM, IS EN: H

---

**L05 Japan 346 Japanese Literature in Translation: Mystery Fiction**

In this course students explore the tantalizing, thrilling, and sometimes macabre genre of mystery fiction in Japan. Emerging in the late 19th century, largely in response to the disruptions of industrialization, the mystery genre offered writers a way to make sense of a chaotic, unfamiliar world. The genre has also allowed a means of social critique and radical experimentation. The class considers the works of Edogawa Rampo, Matsumoto Seicho, Miyabe Miyuki, Kirino Natsuo, and others. All readings in English. No prior knowledge of Japanese required.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: IS EN: H

**L05 Japan 412 Third-Level Modern Japanese I**

This is the first semester of an academic-year course in pre-advanced Japanese. The course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communication. Various projects will be assigned throughout the semester in addition to the course readings, conversation exercises and class discussion. After completing this course, students are able to communicate in Japanese in a linguistically and culturally appropriate manner, to read semi-authentic materials more extensively on topics about Japanese culture, and gather information about the topics of their interest by using a variety of resources. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L05 214 (grade of B- or better) or placement by examination. Credit 4 units for undergraduates, 3 units for graduate students.

Credit variable, maximum 4 units. A&S IQ: LCD, LS BU: HUM EN: H

---

### L05 Japan 413 Third-Level Modern Japanese II

This is the second semester of an academic-year course in pre-advanced Japanese. The course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communication. Various projects will be assigned throughout the semester in addition to the course readings, conversation exercises and class discussion. After completing this course, students are able to communicate in Japanese in a linguistically and culturally appropriate manner, to read semi-authentic materials more extensively on topics about Japanese culture, and gather information about the topics of their interest by using a variety of resources. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L05 412 (grade of B- or better) or placement by examination. Credit 4 units for undergraduates, 3 units for graduate students.

Credit variable, maximum 4 units. A&S IQ: LCD, LS BU: HUM EN: H

---

### L05 Japan 425 Topics in Religion and Culture in East Asia: Women, Confucianism and Buddhism in East Asia

This reading seminar introduces students to texts on and by women in East Asia from the earliest extant writings to the nineteenth century. Texts covered in the first half of the course include philosophical and doctrinal writings that deal with the role of women in society, their fitness for self-cultivation, and their access to salvation. The second part of the course focus is on narrative texts, memoirs and diaries that portray women or that were written by women, drawn from the literary traditions of China, Korea and Japan. Some of the issues students will grapple with are: Are Confucianism and Buddhism, some of the great intellectual traditions of East Asia, inherently misogynistic? Or can they function as liberating forces for women in their search for agency and meaning? More broadly, how can boundaries and constraints contribute to self-cultivation, growth, and even salvation? Previous coursework on East Asia and/or Buddhism is strongly recommended, but no prior knowledge of Chinese, Korean, or Japanese language is required. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: junior level or above or permission of instructor.

Same as L81 EALC 425

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

### L05 Japan 431 Renegades and Radicals: The Japanese New Wave

In 1960, the major studio Shochiku promoted a new crop of directors as the "Japanese New Wave" in response to declining theater attendance, a booming youth culture, and the international success of the French Nouvelle Vague. This course provides an introduction to those iconoclastic filmmakers, who went on to break with major studios and revolutionize oppositional filmmaking in Japan. We will analyze the challenging politics and aesthetics of these confrontational films for what they tell us about Japan's modern history and cinema. The films provoke as well as entertain, providing trenchant (sometimes absurd) commentaries on postwar Japanese society and its transformations. Themes include: the legacy of WWII and Japanese imperialism; the student movement; juvenile delinquency; sexual liberation; and Tokyo subcultures. Directors include: Oshima Nagisa, Shinoda Masahiro, Terayama Shuji, Masumura Yasuzo, Suzuki Seijun, Matsumoto Toshio, and others. No knowledge of Japanese necessary. Credit 3 units. Mandatory weekly screening:

### L05 Japan 443 Memory, Tears, and Longing: East Asian Melodrama Film

Excessive emotion, unreasonable sacrifice, hidden truth, untimely knowledge, and forbidden desire—the power of melodrama and its moving representations have fueled the popularity of hundreds, if not thousands, of books, plays, and films. Melodrama has variously been defined as a genre, a logic, an affect, and a mode, applied to diverse media, divergent cultural traditions, and different historical contexts. The course provides a survey of East Asian melodrama films—as well as films that challenge conventional definitions of melodrama—by pairing Japanese, Korean, and Chinese-language productions with key critical texts in melodrama studies. We will see classics such as *Tokyo Story*, *Two Stage Sisters*, and *The Housemaid*. We will examine melodrama's complex ties to modernity, tradition, and cultural transformation in East Asia; special emphasis will be placed on representations of the family, historical change, gender, and sexuality. In addition to historical background and film studies concepts, we will also consider a range of approaches for thinking about the aesthetics and politics of emotion. No prerequisites. No prior knowledge of East Asian culture or language necessary. Mandatory weekly scheduled screening.

Same as L53 Film 443

Credit 3 units. A&S IQ: HUM, LCD EN: H

---

### L05 Japan 445 Japanese Fiction: Meiji Women Writers (Writing-Intensive Seminar)

The Meiji Period (1868-1912) in Japan was a time of tumultuous change. During the era Japan made sweeping reforms to its government, educational system, and social structures. Meiji men were encouraged to "modernize" along Western lines, while women were expected to serve as "repositories of the past." Most women prized the elegant traditions and saw these as important markers of cultural identity. But not all were willing to completely abdicate their place in the modernizing impulse. This writing intensive course will examine these women's literary works, paying attention to the way they developed strategies to both "serve the nation" and find an outlet for their own creative voice. Works to consider include the short fiction of Higuchi Ichiyo, Shimizu Shikin, and Tamura Toshiko, the poetry of Yosano Akiko, the essays of Kishida Toshiko, and the translations of Wakamatsu Shizuko. All readings are available in English translation and students need not be familiar with Japanese, though background in Japanese Studies, Women's Studies, or literary studies will be helpful. This is a Writing-Intensive Seminar. Prerequisite: junior level or above or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM EN: H

---

### L05 Japan 4450 Horror in Japanese Media

Elements of the macabre and horrific have been present in Japanese culture and media since time immemorial. The 11th-century work *The Tale of Genji*, for example, features an elite lady's "living ghost" killing off her main rivals for the prince's affections. Tales of ghosts, demons, and the supernatural entities known as *yokai* continued to appear in collections of Buddhist didactic and folktale literature of the following centuries, finding renewed popularity in the 17th-19th centuries in the form of *kaidan* or "strange tales" which were enjoyed as printed works, parlor games, and stage plays. Some of the very first films made at the turn of the 20th century in Japan were about the popular ghosts of yore. Building on this long legacy of fearsome creatures in popular media of times now past, this course will consider selections of Japanese horror media (film, literature, anime, manga, and video games) from the mid-20th to early 21st centuries, highlighting the intertextuality that different media within the horror genre has and how the horror genre itself even bleeds into other genres. Analyzing major figures and themes in each work, this course will explore how Japanese horror—the strange realm home to ghosts with a grudge, misunderstood monsters, and merciless murderers—can function not only as thrilling entertainment but can also reflect Japanese societal and cultural anxieties present in the real world, ranging from the problems that

technology may create in a changing world to the threats posed by shifts in traditional family dynamics. Although this course will focus on horror media in the Japanese context, understanding how horror can function to highlight such anxieties will prepare students to consider the deeper possibilities of horror media in their own respective cultural contexts. All readings will be in English, and visual media will be in Japanese with English subtitles. Required Screenings  
Same as L53 Film 445

#### L05 Japan 4451 Topics in Modern Japanese Literature

A topics course on modern Japanese literature; subject matter varies by semester. Prerequisite: junior level or above or permission of instructor.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

#### L05 Japan 446 The Japanese Theater

This course is an investigation, using English materials, of the major developments and forms of the Japanese theater, from Noh and its antecedents to the rise of a modern drama. While less concerned with the performative aspects of theatrical arts (though these will be introduced via videos), emphasis is placed on the ways in which dramatic texts influenced and borrowed from the literary tradition. Readings are from major theatrical texts, secondary studies on Japanese theater, and literary sources. Prerequisite: junior level or above or permission of instructor.  
Credit 3 units. A&S IQ: HUM, LCD, SD Art: HUM EN: H

---

#### L05 Japan 448 Japanese Poetry

This course is a comprehensive survey of Japanese poetry from the 8th century to the present day. Topics include the development of the great tradition of court poetry in the Heian period (ca. 800-1200) and its full flowering during the medieval period (ca. 1200-1600), the influence of the Zen aesthetic, the emergence of linked verse and haiku, and the transformation of the classical tradition with the advent of the modern era. All works will be read in English translation, although knowledge of Japanese will be useful. Graduate students will be expected to read original materials extensively. Prerequisite: junior level or above or permission of instructor.  
Credit 3 units. Art: HUM

---

#### L05 Japan 4482 Japanese Prints: Courtesans, Actors and Travelers

Woodblock prints of the 18th and 19th centuries and their relationship to literature and popular culture. Topics include the life of the pleasure quarters, sexuality and the "erotic," parody, kabuki theater, and the representation of women. Prerequisite: 3 units in Japanese painting, or permission of instructor.  
Same as L01 Art-Arch 4482  
Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

#### L05 Japan 449 Modern Japanese Women Writers: Writing Intensive Seminar

Japanese women have been scripted by Western (male) imagination as gentle, self-effacing creatures. From their (re)emergence in the late 19th century to their dominance in the late 20th, Japanese women writers have presented an image of their countrywomen as anything but demure. Struggling to define their voices against ever-shifting expectations and social contexts, the women they create in their fiction are valiant, if not at times violent. This course examines the various manifestations of the female image in female-authored modern Japanese fiction. Writers to be considered are Higuchi Ichiyo, Hirabayashi Taiko, Uno Chiyo, Enchi Fumiko, Yamada Eimi, and others. A selection of novels and shorter fiction will be available in

English translation, and students need not be familiar with Japanese. Prior coursework in literature/women's studies may be helpful. This is a Writing Intensive course. Prerequisite: junior level or above or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD, SD, WI EN: H

---

#### L05 Japan 4491 Modern Japanese Women Writers

Japanese women have been scripted by Western (male) imagination as gentle, self-effacing creatures. From their (re)emergence in the late 19th century to their dominance in the late 20th, Japanese women writers have presented an image of their countrywomen as anything but demure. Struggling to define their voices against ever-shifting expectations and social contexts, the women they create in their fiction are valiant, if not at times violent. This course examines the various manifestations of the female image in female-authored modern Japanese fiction. Writers considered are Higuchi Ichiyo, Hirabayashi Taiko, Uno Chiyo, Enchi Fumiko, Yamada Eimi, and others. A selection of novels and shorter fiction are available in English translation, and students need not be familiar with Japanese. Prior coursework in literature/women's studies may be helpful. Credit 3 units. A&S IQ: HUM, LCD, SD EN: H

---

#### L05 Japan 450 Masterworks of Early Japanese Literature: The Tale of Genji and its Afterlives

This course is an intensive study of one of the central texts of classical Japanese literature. Selection of texts rotate among works including: The Tale of Genji, court diaries, poetry anthologies, Noh drama, The Tale of the Heike, setsuwa collections, and medieval memoirs. In addition to exploring the historical, literary, and cultural significance of the work from its genesis to the present age, students engage in a close reading of the text and an investigation of the primary theoretical issues and approaches associated with the work both in Japan and abroad. Prior knowledge of early Japanese literature or history is recommended. Texts will be read in English translation. Prerequisite: junior level or above or permission of instructor.  
Credit 3 units. A&S IQ: HUM, LCD EN: H

---

#### L05 Japan 458 Fourth-Level Modern Japanese I

This is the first semester of an academic-year course in advanced Japanese. The course emphasizes the acquisition of linguistic, pragmatic, and sociocultural competence in all four areas of the language as well as advanced level critical thinking skills. In addition to the textbook, more authentic materials such as movie clips, newspaper articles, etc. are selected for readings and discussion topics. Students will be assigned several projects in accordance with the interests and needs of participating students. After completing the course, students are able to manage various speaking styles according to the situational/relational context and express their opinions clearly and logically in speaking and writing. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L05 413 (grade of B- or better) or placement by examination.  
Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### L05 Japan 459 Fourth-Level Modern Japanese II

This is the second semester of an academic-year course in advanced Japanese. The course emphasizes the acquisition of linguistic, pragmatic, and sociocultural competence in all four areas of the language as well as advanced level critical thinking skills. In addition to the textbook, more authentic materials such as movie clips, newspaper articles, etc. are selected for readings and discussion topics. Students will be assigned several projects in accordance with the interests and needs of participating students. After completing the course, students are able to manage various speaking styles according to the situational/

relational context and express their opinions clearly and logically in speaking and writing. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L05 458 (grade of B- or better) or placement by examination.  
Credit 3 units. A&S IQ: LCD, LS EN: H

---

#### L05 Japan 460 Pre-Modern Japanese I

The language referred to as classical Japanese (or literary Japanese, *kobun*, *kogo*, *bungo*, *bungotai*, etc.) was in use from the Heian period to the 20th century, and traces of it remain even in modern Japanese. This course gives students a systematic introduction to the grammar of *bungo*, through readings in texts from the Heian and medieval periods. By the end of the semester students should be able to read reasonably straightforward passages of *bungo* with a dictionary. They will also have a deeper understanding of the grammar and structure of modern Japanese, and will become more skilled at using Japanese-Japanese dictionaries. Readings are drawn from Japanese classical literary texts using materials from standard modern annotated editions. Prerequisite: L05 412-413, or concurrent registration.  
Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### L05 Japan 461 Pre-Modern Japanese II

This course is a continuation of L05 460 which reinforces and expands the student's understanding of classical Japanese grammar through close reading of texts drawn from the Heian, medieval and Edo periods, and introduces the basics of reading *hentaigana*, the cursive form of *kana* found in manuscript and woodblock print books. Readings are in classical literary texts using materials from standard modern annotated editions as well as the introduction of skills necessary for reading original texts, including *kambun* and *hentaigana*. Prerequisite: L05 413 or concurrent registration, or L05 460.  
Credit 3 units. A&S IQ: LCD, LS EN: H

---

#### L05 Japan 464 Japanese Textual Analysis

This course introduces the advanced student of Japanese to a variety of prose narratives in the modern language. Readings, which include literary texts and topical essays on aspects of Japanese society and culture, reflect the needs and interests of the enrolled students. Focus is on close reading and syntactic analysis of the selected texts. Regular translation exercises gauge the mastery of grammar, syntax, and idiomatic usages. All readings are in Japanese, with class discussion conducted predominantly in English. A final translation project, to be chosen by the student in consultation with the instructor, is required. Prerequisite: permission of instructor.  
Credit 3 units. A&S IQ: LCD EN: H

---

#### L05 Japan 4710 Topics in Japanese Culture

Topics course on Japanese culture. Subject matter varies by semester; consult current semester listings for topic.  
Same as L81 EALC 4710  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

#### L05 Japan 486 Independent Work for Senior Honors

This course is taken in the fall semester. Prerequisite: senior level, eligibility for Honors, and permission of the Department.  
Credit 3 units.

---

#### L05 Japan 487 Independent Work for Senior Honors

This course is taken in the spring semester. Prerequisites: senior level, eligibility for Honors, and permission of the Department.  
Credit 3 units.

---

#### L05 Japan 491 Topics in Japanese Literature & History:

A topics course on Japanese literature and history. Subject matter varies by semester; consult current semester listings for topic. Prerequisite: junior level or above or permission of instructor.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

#### L05 Japan 499 Guided Readings in Japanese

Prerequisites: Senior or graduate level and permission of the instructor. This course is normally taken after the successful completion of L05 459. May be repeated once.  
Credit variable, maximum 3 units.

#### L51 Korean 107 Basic Korean I

Basic Korean I is designed to develop students' basic proficiency in all four language skill areas, listening, speaking, reading, and writing, while fostering intercultural competence. Students will improve their Korean communication skills by engaging in various interactive activities throughout the course. The topics covered in the class include self-introduction, describing surroundings, discussing daily activities, and engaging in conversations about familiar objects and people. The course introduces relevant cultural topics to enrich students' understanding of Korean culture and language. This 3-credit, slower-paced course meets three times per week and requires less time commitment than the 5-credit course (L51 117). Upon completing Basic Korean I in the spring semester, students can enroll in Basic Korean II in the fall semester. After successfully finishing Basic Korean II, students can advance to First-Level Modern Korean II (L51 118) in the subsequent spring semester. It is important to note that Basic Korean 1 and Basic Korean 2 do not fulfill the language sequence requirement, nor the two-semester language requirement for the EALC minor.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

---

#### L51 Korean 108 Basic Korean II

Basic Korean II is the second course in the slower-paced Basic Korean language sequence. This course focuses on developing proficiency in listening, speaking, reading, and writing, while also fostering intercultural competence. Students will participate in various interactive activities to develop their proficiency. Topics covered include describing surroundings, discussing daily activities such as school, shopping, extracurricular activities, and describing past and future events. The course also introduces relevant cultural topics to deepen students' understanding of Korean culture and language. After completing Basic Korean II, students can enroll in First-Level Modern Korean II (L51 118) in the spring semester. It is important to note that Basic Korean 1 and Basic Korean 2 do not fulfill the language sequence requirement, nor the two-semester language requirement for the EALC minor. Prerequisite: L51 107 (grade of B- or better) or placement by examination.  
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

---

#### L51 Korean 117D First-Level Modern Korean I

This course is an introduction to Korea's modern spoken and written language, designed for students with no prior background or minimal exposure to the language without any literacy skills. The course emphasizes developing proficiencies in all four areas of language functions, including listening, speaking, reading, and writing, specifically focusing on accurate pronunciation, basic grammar, and communicative and intercultural competence. Throughout the course, students will work towards the following objectives: gaining

the ability to say greetings, tell time, and carry on basic conversations in classrooms, stores, and various social situations related to daily life, family, and school in all time frames (present, past, and future). In addition, the course aims to help students understand Korean culture as reflected in the language. Students with some previous Korean language background must take the placement exam. Note: Students with some previous Korean language background must take the placement examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L51 Korean 118D First-Level Modern Korean II**

This course is a continuation of the first level beginning Korean course, focusing on acquiring communicative and grammatical skills in speaking, writing, and reading through active participation. The curriculum includes interactive activities that enhance learning experiences and foster communicative and intercultural competence. By the end of the course, students will acquire basic vocabulary, accurate pronunciation, and reading and writing skills with appropriate grammar. They will be able to participate in conversations related to school, classes, social life, family, phone conversations, travel, shopping, and restaurants. Additionally, the course aims to help students understand Korean culture reflected in the language. Prerequisite: L51 117D (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L51 Korean 150 First-Year Seminar: Exploring East Asian Classics**

This first-year seminar introduces students to major works of the Chinese, Korean, and Japanese traditions. Although written centuries in the past, these texts still reverberate with meaning today and offer important means to understand the often chaotic and confusing events occurring daily around us. What is the self? What is the relationship between the individual and society? How do we live an ethical life? What is literature and for whom is it intended? In grappling with these questions, students will directly engage with the texts through close reading and in-class discussion. Students will, at the same time, also ask broader questions that concern how knowledge is produced, spread, and consumed: what is a canon? Who are the gatekeepers? What does it mean to approach East Asia through a set of "canonical" texts? Among the texts considered will be *The Analects*, *Daodejing*, *Lotus Sutra*, *Tale of Genji*, *Tales of the Heike*, *Tales of Moonlight and Rain*, *Samguk yusa*, and *Memoirs of Lady Hyegyong*. Prerequisite: first-year, non-transfer students only.

Same as L04 Chinese 150

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA EN: H

---

#### **L51 Korean 217 Second-Level Modern Korean I**

This class is designed for students who have successfully finished First Level Modern Korean I & II and those with equivalent proficiency. The course will continue to emphasize the development of cultural competency in Korean language and culture and communicative skills in speaking, listening, writing, and reading. By the end of this course, students will be able to engage in conversation on personal experiences and topics related to lessons in class, develop accurate pronunciation and intonation, further develop their reading and writing skills in Korean texts, and gain a deeper understanding of Korean culture as reflected in the language. Prerequisite: L51 118D (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L51 Korean 218 Second-Level Modern Korean II**

This class is designed for students who have completed Second Level Modern Korean I or have equivalent proficiency. The course's main objective is to continue developing cultural competency in Korean language and culture while further developing students'

communicative skills in speaking, listening, writing, and reading. By the end of the course, students will be able to engage in expanded conversations on personal experiences and topics related to class lessons, constructing coherent and complete sentences. Additionally, students focus on improving their pronunciation and intonation, developing their reading and writing skills to engage with simple Korean texts effectively, and gaining a deeper understanding of Korean culture as reflected in the language. Prerequisite: L51 217 (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L51 Korean 223C Korean Civilization**

This course introduces Korean civilization from earliest times to the present. While a broad survey, the course emphasizes cultural themes and social institutions, and explores the Korean past in East Asian and global perspectives. To help with building this comprehensive view, the class follows a chronological progression of history using a textbook. But throughout, students also learn from diverse media-including film, drama, music, games, and primary historical sources-to make their own sense of Korea and Korean culture. In terms of methodology, the class adopts various approaches, from source criticism and material studies to critically engaging modern-day representations of Korea in print and new media. Some of the topics covered include: foundation myths, ancient literature, colonialism, civil war, authoritarianism, rapid industrialization, and democratization in Korea.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: IS EN: H

---

#### **L51 Korean 298 Korean Undergraduate Teaching Assistants**

In this course undergraduate students with native or near native proficiency in Korean assist in the first, second, and third level modern Korean language classes by serving as one-on-one session tutor, lab drill and practice session tutor, or discussion leader under close supervision of the faculty. Students can only enroll in the class with permission from the faculty member.

Credit 1 unit.

---

#### **L51 Korean 2980 Undergraduate Internship in Korean**

Students receive credit for a faculty-directed and approved internship. Registration requires the completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities (e.g., eight to ten hours a week for thirteen or fourteen weeks to receive 3 units of credit; 1 or 2 credits for fewer hours). Credit/no credit only. Prerequisite: permission of department or DUS.

Credit variable, maximum 3 units.

---

#### **L51 Korean 299 Independent Study**

Prerequisite: permission of the instructor

Credit variable, maximum 6 units.

---

#### **L51 Korean 3250 Topics in Early Modern Korea: Guns, Tobacco, and Sweet Potato: A History of Material Culture**

This course is an introduction to both material culture studies and early modern Korea, through the use of compelling objects-from guns and ceramics, to drugs, foods, and artwork-as an entry point into Korean cultural history (with a focus on the period between 1592 and 1910). It starts with objects in times of crises, from the matchlock guns which wreaked havoc across the Korean peninsula, to the ondol heated floors which warmed Korean homes through the Little Ice Age. Then, it delves into a period of cultural efflorescence, when new material cultures emerged, by the hands of Buddhist papermakers, up-and-coming chungin ("middle people") painters, and aristocratic women. It ends with stories from the nineteenth century, when these "Korean" material

cultures became closely entangled with their foreign counterparts- especially Western European- and how they were put on display at the world's fairs and expositions around the globe- in Japan, Chicago, Hanoi, and Paris. The overarching questions that run throughout the course are: What is material culture? How does the "material turn" change the nature of humanistic inquiry and expand the horizons of Korean/cultural studies? How may attention to "things" transform our understanding of the past and present, ourselves, and of the material world that we inhabit today? Fulfills premodern elective for EALC major.

**L51 Korean 3270 Topics in East Asian Performance Cultures: Gender in East Asian Theatre and Performance**

This course explores the constructions of gender within traditional and modern East Asian performing arts, with particular attention to cultural values, identities, and sensibilities revealed through various theatrical expressions. Genres to be studied include Chinese opera xiqu, revolutionary ballet, and spoken drama huaju, Japanese kabuki and Takarazuka Theatre, and Japanese modern drama, Korean narrative song form p'ansori and opera changgeuk, Korean new theatre shin'guk and modern dance, contemporary East Asian queer performances, among others. Consideration of gender in performance will address 1) narrative of the form, 2) persona of the character, 3) identity of the performer, and 4) role of the audience. As part of this study, students will explore the cultural specificity embedded in various forms of East Asian theatre and performance through the lens of gender. A second interest lies in the applicability of Western models of gender, culture, and performance studies for the domain of the arts and for East Asia as a cultural region. The seminar approach will be interdisciplinary with extensive use of written, visual, and aural materials. Class combines lecture and discussion. Readings include critical, historical, literary, and descriptive writing about various genres of performing arts. All readings are in English translation. Prerequisites: None

**L51 Korean 340 Writing New Horizons: Explorers, Envoys, and Other Encounters in Korean Travel Narratives**

Whether physical or imagined, travel evokes notions of center, periphery, boundary and identity that shape the world we live in. This seminar course uses travelogues as well as literary, visual and cinematic representations of travels relating to Korea to explore how travel, art and imagination together help constitute one's sense of place. The course approaches travel from three angles. First, it examines writings by Korean authors on domestic, interregional, and international travels from premodern to modern times. Such works offer a frame for tracing conceptualizations of self and other through topics including diaspora, refugee crisis, migrant workers, political exile, prisoners of war, and others. The course also looks at stories of travel to Korea by non-Korean authors in order to see how "Korea" was perceived in various times by people outside the country. Lastly, through imagined journeys typically labeled as "sci-fi" or "fantasy", it examines notions of "truthful" and "realistic," and considers the function of the fantastic and storytelling and their relation to the world we live in. For their final project, students will create a map of real or fictional travels based on material covered in class. Using Digital Humanities tools such as StoryMaps (ArcGIS), Carto, or

MyMaps (Google), they will also produce itineraries and narratives to accompany the maps, and present these results online. Necessary technical assistance will be provided by the GIS team at Olin Library throughout the semester. All reading in English. Prior knowledge of Korean language or culture may be helpful but is not required.

**L51 Korean 352 Literature of Modern and Contemporary Korea**

This undergraduate course surveys the major writers and works of 20th century Korean literature. During the 20th century Korea went through a radical process of modernization. From its colonization by Japan, to its suffering of a civil war within the cold war order, to its growth into a cultural and economic powerhouse, Korea's historical experience is at once unique and typical of that of a third-world nation. By immersing themselves in the most distinctive literary voices from Korea, students examine how the Korean experience of modernization was filtered through its cultural production. The course pays special attention to the writers' construction of the self and the nation. How do social categories such as ethnicity, class, gender, and race figure in the varying images of the self? And how do these images relate to the literary vision of the nation? Along the way, students observe the prominent ideas, themes, and genres of Korean literature. This class combines lecture with discussion, in which students are strongly encouraged to participate. All literary texts are in English translation and no previous knowledge of Korean is required. Fulfills modern literature requirement for EALC degrees.

**L51 Korean 3570 Topics in Modern and Contemporary Korean Culture: Intro to K-Pop: Korean Popular Music and Society**

This course examines how Korean popular music, or K-pop, has become a global cultural phenomenon and how it is related to the historical, social, cultural, and political shifts on the Korean peninsula from the beginning of the 20th century to the present. This class will consider a wide range of factors of K-pop, including fans, idols, music production and circulation, industry, media, and national involvement in the field, in order to provide students with an in-depth understanding of the dynamic cultural phenomenon of K-pop. Through various scholarly approaches, this class deepens students' understanding of K-pop and popular music more broadly. The class will utilize audio/video sources, incorporate discussions based on academic articles and chapters, and require student analysis that connects popular music to its context. In addition to scholarly investigation, students are encouraged to engage with K-pop through hands-on performances, writing reviews, creating public-facing resources, and/or interviewing fans for the final project. No background in Korean language, history, or culture is required. Fulfills modern elective for EALC major.

**L51 Korean 365 Topics in Modern Korean Literature: The Korean Wave: Reading Korea through Popular Culture and Media**

Korean popular culture has received attention from across the globe for more than 20 years through K-drama, K-cinema, K-pop, K-beauty, webtoon, video games, mukbang (a live-streamed eating show), and so on. This course examines the global popularity of Korean popular

culture, known as the Korean Wave (Hallyu). In addition to providing a comprehensive understanding of contemporary Korean culture, society, and politics through popular cultural products, the course will teach a variety of critical tools to interpret them. For example, how would you interpret the inclusion of traditional Korean games for children in Squid Game and its relevance to contemporary Korean society? How would you interpret the scene with the bomb under the bridge in Psy's "Gangnam Style" music video in relation to Korean history? Why is mukbang popular among younger generation in Korea? Through readings, screenings, listening, and discussions, students will learn why and how popular culture is inevitably tied to history, culture, and society. The class will also look at the role of media in understanding how South Korea comes to create a vibrant pop culture scene and why global audiences from diverse racial and generational backgrounds relish Hallyu. Successful students will gain the skills to critically interpret Korea through popular culture and understand the impact of media on cultural globalization. No background in Korean language, history, or culture is required. Modern course; fulfills modern elective for EALC major.

---

#### **L51 Korean 370 When Tigers Smoke: Songs and Stories from Traditional Korea**

This course has two purposes: (1) to introduce major works and topics in Korean classical literature and the cultural world in which they were produced and (2) to explore modern reimaginings of these historical works and events and wider context through contemporary literature and film. The former involves a journey through various genres, including foundation myths, songs, biographies, essays, poetry, fiction, memoirs, letters and oral performance, all produced before the 20th century. For a modern perspective, the course turns to films, dramas, cartoons and short stories, which serve as the basis for discussing the modern recreations of historical events, characters, and Korean culture more broadly. In addition to details of the works themselves, topics will include Korea's place in the context of a Sino-centric world order; the significance of two writing systems, hanmun (literary Chinese) and han'gul (Korean vernacular writing); gender and literary practice; and the dynamic relationship between tradition and creativity. No knowledge of Korean history or language is required. All readings in English.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

#### **L51 Korean 3750 Imagined Pasts: Traditional Korea through Film**

This course is an introduction to traditional Korean culture through a selection of contemporary South Korean feature films and dramas. Films and dramas with historical themes have been very popular in Korea and across the globe. As powerful representations of the past, these contents have not just made Korean culture more accessible, but posed new issues and problems in learning about that culture. This course sets out to examine the content of historical films and dramas, investigating how "true" or "false" their representation of the past is, how they imagine and invent that past, and the ways they are useful-and not-in better understanding Korean culture and history. Some of the topics to be introduced are: kingship and court culture; Confucianism; social structure and people on the margin; gender relations and family; war and violence; science and technology; food and medicine; and the quotidian lives of people. This is also a media literacy course and students learn to engage critically with period pieces by writing comparative film essays and historical film critiques/scripts.

#### **L51 Korean 417 Third-Level Modern Korean I**

This course is designed for students who have completed L51 Korean 217 & 218 (Second Level Modern Korean I & II) or those with equivalent proficiency. The course aims to further develop students' communicative competence and proficiency in speaking, listening, writing, and reading while deepening their understanding of Korean culture at the high intermediate level. Throughout the course, students will develop the cultural and linguistic understanding necessary to communicate for various personal and social purposes. By the end of the course, students will be able to participate in detailed conversations on various familiar topics such as travel, leisure activities, health, traditions, holidays, and beliefs using complex sentences. Students can expect to read simple articles and write essays of 250-350 words. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L51 218 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L51 Korean 418 Third-Level Modern Korean II**

This course is intended for students who have completed L51 Korean 417 (Korean III) or have an equivalent level of proficiency. The primary goal of the course is to enhance students' communicative competence and proficiency in speaking, listening, writing, and reading while also deepening their understanding of Korean culture at the high intermediate level. By the end of the course, students will be able to participate in detailed conversations on various familiar and unfamiliar topics and social situations in a culturally appropriate manner. They will also be able to comprehend main ideas and supporting details in non-complex aural and written stories across various contexts and read articles, narrative, and descriptive texts. Students will also be able to describe, explain, and compare using structures and vocabulary items at the high intermediate level in writing and speaking. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L51 417 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L51 Korean 420 Nature, Technology, and Medicine in Korea**

This course examines the cultural history of modern Korea with a focus on science, technology, and medicine. From about 1500 to the present, a number of hugely consequential things happened in Korea that have been called revolutionary-or what historians dub "early modern" and "modern." Confucian kings planned large-scale projects that changed nature, rustic scholars made inventories of flora and fauna, colonial Koreans became biologists, nurses, and "Edisons," and in North and South Korea, new professionals created distinctive-and in some cases, globally-competitive-regimes of knowing, making, and healing. Students will interrogate these developments as an opportunity to revisit the history of modernity, which has been told predominantly from the perspective of the West. What does it mean to be "modern" in Korea? How did that modernity intersect with Korean science, technology, and medicine? Students will find and articulate their own answers by writing the final research paper. Recommended to

have taken Korean Civilization or equivalent course that provides basic working knowledge of Korean history. Course also counts as an EALC capstone course. Prerequisite: junior level or above or permission of instructor.

Same as L81 EALC 420

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

---

#### **L51 Korean 4251 Topics in Religion and Culture in East Asia: Women, Confucianism and Buddhism in East Asia**

This reading seminar introduces students to texts on and by women in East Asia from the earliest extant writings to the nineteenth century. Texts covered in the first half of the course include philosophical and doctrinal writings that deal with the role of women in society, their fitness for self-cultivation, and their access to salvation. The second part of the course focus is on narrative texts, memoirs and diaries that portray women or that were written by women, drawn from the literary traditions of China, Korea and Japan. Some of the issues students will grapple with are: Are Confucianism and Buddhism, some of the great intellectual traditions of East Asia, inherently misogynistic? Or can they function as liberating forces for women in their search for agency and meaning? More broadly, how can boundaries and constraints contribute to self-cultivation, growth, and even salvation? Previous coursework on East Asia and/or Buddhism is strongly recommended, but no prior knowledge of Chinese, Korean, or Japanese language is required. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: junior level or above or permission of instructor.

Same as L81 EALC 425

---

#### **L51 Korean 427 Fourth-Level Modern Korean I**

This course is intended for students who have completed the Third Level Modern Korean I & II or possess equivalent proficiency. The course's main objective is to develop student's language skills in speaking, listening, reading, and writing, with a greater emphasis on reading and writing while enhancing their understanding of Korean culture. The class explores various topics related to Korea and Korean culture, utilizing a primary textbook and a range of authentic materials such as newspaper articles, literature, films, and video clips that are relevant to the topics. Through these materials, students will be able to express their ideas convincingly and precisely in Korean on Korea-related topics. Additionally, students will work on improving their Korean proficiency in vocabulary and hanja (Chinese characters) at an advanced level and perfecting their sentence structure for oral and written communication in various formats. By the end of the course, students will have developed advanced-level language skills, a deeper understanding of Korean culture, and the ability to communicate their ideas in Korean effectively. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L51 418 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: IS EN: H

---

#### **L51 Korean 428 Fourth-Level Modern Korean II**

This course aims to help students enhance their Korean language proficiency and knowledge of Korean culture, history, and society to an advanced level. Throughout the course, students will participate in various activities, such as discussions, presentations, and reading and writing exercises based on materials such as movies and readings that provide rich cultural, historical, and sociopolitical information about Korea. Additionally, using authentic materials throughout the course provides students with opportunities to be exposed to the authentic Korean language in various situations. Students will continue to expand their advanced-level vocabulary and hanja (Chinese character) knowledge and refine their sentence structure skills for effective oral

and written communication in various formats. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L51 427 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L51 Korean 437 Contemporary Korean I: Language, History, and Musical Culture**

This is an advanced to high-advanced level Korean course in standard modern Korean. Emphasis is placed on developing an advanced level of reading proficiency in Korean and writing ability in Korean for an academic or professional purpose. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L51 428 (grade of B- or better) or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS BU: IS EN: H

---

#### **L51 Korean 438 Contemporary Korean II: Language, History, and Musical Culture**

This is the continuation of Korean 437. It is an advanced to high-advanced level Korean course in standard modern Korean. Emphasis is placed on developing an advanced level of reading proficiency in Korean and writing ability in Korean for an academic or professional purpose. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: L51 428 (grade of B- or better) or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

---

#### **L51 Korean 455 Topics in Korean Literature and Culture**

Topics course in Korean literature and culture; subject varies by semester. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Prerequisite: junior level or above or permission of instructor.

Credit 3 units. A&S IQ: LCD EN: H

## **East Asian Languages and Cultures Major Program Requirements**

- **Total units required:** 27-47 (24 upper-level units, plus 3-23 prerequisite units); 33-53 for students pursuing Senior Honors

## Prerequisites

- First and second levels of the chosen language: Chinese, Japanese, or Korean (or the equivalent) (0-20 units)
- Students are required to complete one of the following Civilization courses (3 units):

Code	Title	Units
Chinese 227C	Chinese Civilization	3
Japan 226C	Japanese Civilization	3
Korean 223C	Korean Civilization	3

## Requirements

Students must complete eight courses for a minimum of 24 upper-level units (300 level or above), including the following:

1. **Students are required to complete one EALC Seminar course (topic varies by semester). The EALC Seminar may also fulfill one of the premodern or modern requirements (3 units).**

Code	Title	Units
EALC 3900	EALC Seminar:	3

2. **Students are required to complete two courses focusing on the premodern era (6 units); one course must be chosen from the following:**

Code	Title	Units
Chinese 341	Early and Imperial Chinese Literature	3
Japan 332C	Japanese Literature: Beginnings to 19th Century	3
Korean 370	When Tigers Smoke: Songs and Stories from Traditional Korea	3

3. **Students are required to complete two courses focusing on the modern era (6 units); one course must be chosen from the following:**

Code	Title	Units
Chinese 342	Modern and Contemporary Chinese Literature	3
Japan 333C	The Modern Voice in Japanese Literature	3
Korean 352	Literature of Modern and Contemporary Korea	3

4. **Students must complete one approved 400-level Capstone course (prime majors). The Capstone course may also fulfill one of the premodern or modern requirements (3 units).**
  - a. The Capstone course is taken during the senior year and must be an EALC home-based course within the student's area of focus. Writing-intensive courses and language courses cannot fulfill the Capstone requirement. Majors are required to present on their Capstone course at the EALC Senior Symposium, which is held in the spring.

5. **The remaining four (prime majors) or five (second majors) upper-level courses are electives and chosen in consultation with the advisor (12-15 units).**
6. **Latin Honors:** Students wishing to pursue senior honors may complete a senior honors thesis. This option, which also entitles the student to Latin Honors, requires a minimum of a 3.65 grade point average. The thesis is researched and written over two semesters for a total of 6 units of credit; this requirement is in addition to the 24 upper-level units required for the major. Students should enroll in EALC 486 Independent Work for Senior Honors (3 units) during the fall of their senior year and in EALC 487 Independent Work for Senior Honors (3 units) during the spring of their senior year. Majors are required to present their senior honors thesis at the EALC Senior Symposium, which is held in the spring.

## Additional Information

- Language placement is required for this program. Please see the Overview page (p. 480) for details.
- Language courses require a grade of B- or better to continue to the next level. Students must also maintain a B- average in all required courses for the major. Those who do not meet this requirement may either repeat the course(s) in question or earn at least a B- in an approved equivalent course or courses (either during the summer or in a study abroad program).
- With advisor approval, students may include two courses in a related area offered outside of the department among the 24 upper-level units. (For example, a student may take one course in Film and Media Studies or Art History that focuses on East Asia.)
- Courses for the major may not be taken credit/no credit.
- Study abroad credit: Up to 6 units of credit may be applied toward the major from one semester abroad, and up to 12 units of credit may be applied from two semesters abroad.
- Transfer credit: Students who wish to transfer credits from other institutions (non-study abroad units) for use toward the major must have approval from the director of undergraduate studies. With approval, students may transfer a total of 9 units from other U.S. institutions. University policy specifies that at least half of the units for the major must be completed in residence at Washington University. Therefore, no more than 12 units in total can be applied to the major whether the credits are earned via study abroad or transfer credit.
- Students are strongly encouraged to participate in a study abroad program. Please refer to the EALC website for more information about study abroad programs.
- No more than 3 units of independent study may be counted toward the required 24 upper-level units.

## Departmental Honors

EALC awards Departmental Honors to majors as an acknowledgment of exemplary work in the major.

- Prime and second majors are eligible.
- Students seeking “High Distinction in EALC” or “Highest Distinction in EALC” must complete the requirements of the department’s Latin Honors program.
- For all EALC Honors, students must participate actively in department-run or recommended events, such as special lectures, conferences/symposia, workshops, or films.

## Highest Distinction in EALC

- Students must have a within-major GPA of  $\geq 3.86$  at the time of graduation, and they must have participated in the department’s Latin Honors program.

## High Distinction in EALC

- Students must have a within-major GPA of 3.65 to 3.85 at the time of graduation, and they must have participated in the department’s Latin Honors program.

## Distinction in EALC

- Students must have a within-major GPA of  $\geq 3.65$  at the time of graduation, and they must not have participated in the department’s Latin Honors program.

## East Asian Languages and Cultures Major, Korean Specialization

### Program Requirements

- **Total units required:** 27-47 (24 upper-level units, plus 3-23 prerequisite units); 33-53 for students pursuing Senior Honors

### Prerequisites

- First and second levels of Korean (or the equivalent) (0-20 units)
- Students are required to complete one of the following Civilization courses (3 units):

Code	Title	Units
Chinese 227C	Chinese Civilization	3
Japan 226C	Japanese Civilization	3
Korean 223C	Korean Civilization	3

### Requirements

Students must complete eight courses for a minimum of 24 upper-level units (300 level or above), including the following. Five of the eight courses must focus on Korean (15 units).

1. **Students are required to complete one EALC Seminar course (topic varies by semester). The EALC Seminar may also fulfill one of the premodern or modern requirements (3 units).**

Code	Title	Units
EALC 3900	EALC Seminar:	3

2. **Students are required to complete two courses focusing on the premodern era (6 units). One course must be chosen from the following:**

Code	Title	Units
Chinese 341	Early and Imperial Chinese Literature	3
Japan 332C	Japanese Literature: Beginnings to 19th Century	3
Korean 370	When Tigers Smoke: Songs and Stories from Traditional Korea	3

3. **Students are required to complete two courses focusing on the modern era (6 units). One course must be chosen from the following:**

Code	Title	Units
Chinese 342	Modern and Contemporary Chinese Literature	3
Japan 333C	The Modern Voice in Japanese Literature	3
Korean 352	Literature of Modern and Contemporary Korea	3

4. **One approved 400-level Capstone course (prime majors). The Capstone course may also fulfill one of the premodern or modern requirements (3 units).**

- a. The Capstone course is taken during the senior year and must be an EALC home-based course within the student's area of focus. Writing-intensive courses and language courses cannot fulfill the Capstone requirement. Majors are required to present on their Capstone course at the EALC Senior Symposium, which is held in the spring.

5. **The remaining four (prime majors) or five (second majors) upper-level courses are electives and chosen in consultation with the advisor (12-15 units).**

6. **Latin Honors:** Students wishing to pursue senior honors may complete a senior honors thesis. This option, which also entitles the student to Latin Honors, requires a minimum of a 3.65 grade point average. The thesis is researched and written over two semesters, for a total of 6 units; this requirement is in addition to the 24 upper-level units required for the major. Students should enroll in EALC 486 Independent Work for Senior Honors (3 units) during the fall of their senior year and in EALC 487 Independent Work for Senior Honors (3 units) during the spring of their senior year. Majors are required to present their Senior Honors thesis at the EALC Senior Symposium, which is held in the spring.

### Additional Information

- Language placement is required for this program. Please see the Overview page (p. 480) for details.
- Language courses require a grade of B- or better to continue to the next level. Students must also maintain a B- average in all required courses for the major. Those who do not meet this requirement may either repeat the course(s) in question or earn at least a B- in an approved equivalent course or courses (either during the summer or in a study abroad program).

- With advisor approval, students may include two courses in a related area offered outside of the department among the 24 upper-level units. (For example, a student may take one course in Film and Media Studies or Art History that focuses on East Asia.)
- Courses for the major may not be taken credit/no credit.
- Study abroad credit: Up to 6 units of credit may be applied toward the major from one semester abroad, and up to 12 units of credit may be applied from two semesters abroad.
- Transfer credit: Students who wish to transfer credits from other institutions (non-study abroad units) for use toward the major must have approval from the director of undergraduate studies. With approval, students may transfer a total of 9 units from other U.S. institutions. University policy specifies that at least half of the units for the major must be completed in residence at Washington University. Therefore, no more than 12 units in total can be applied to the major whether the credits are earned via study abroad or transfer credit.
- Students are strongly encouraged to participate in a study abroad program. Please refer to the EALC website for more information about study abroad programs.
- No more than 3 units of independent study may be counted toward the required 24 upper-level units.

## Departmental Honors

EALC awards Departmental Honors to majors as an acknowledgment of exemplary work in the major.

- Prime and second majors are eligible.
- Students seeking “High Distinction in EALC” or “Highest Distinction in EALC” must complete the requirements of the department’s Latin Honors program.
- For all EALC Honors, students must participate actively in department-run or recommended events, such as special lectures, conferences/symposia, workshops, or films.

## Highest Distinction in EALC

- Students must have a within-major GPA of  $\geq 3.86$  at the time of graduation, and they must have participated in the department’s Latin Honors program.

## High Distinction in EALC

- Students must have a within-major GPA of 3.65 to 3.85 at the time of graduation, and they must have participated in the department’s Latin Honors program.

## Distinction in EALC

- Students must have a within-major GPA of  $\geq 3.65$  at the time of graduation, and they must not have participated in the department’s Latin Honors program.

# East Asian Languages and Cultures Minor

## Program Requirements

**Total units required:** 18 units

## Required Courses

- Two semesters of one of the chosen languages: Chinese, Japanese, or Korean
- At least 9 units must be from 300-level courses or above

### 1. Students are required to complete one of the following Civilization courses (3 units):

Code	Title	Units
Chinese 227C	Chinese Civilization	3
Japan 226C	Japanese Civilization	3
Korean 223C	Korean Civilization	3

### 2. Students are required to complete one of the following courses focusing on the premodern era (3 units):

Code	Title	Units
Chinese 341	Early and Imperial Chinese Literature	3
Japan 332C	Japanese Literature: Beginnings to 19th Century	3
Korean 370	When Tigers Smoke: Songs and Stories from Traditional Korea	3

### 3. Students are required to complete one of the following courses focusing on the modern era (3 units):

Code	Title	Units
Chinese 342	Modern and Contemporary Chinese Literature	3
Japan 333C	The Modern Voice in Japanese Literature	3
Korean 352	Literature of Modern and Contemporary Korea	3

### 4. One upper-level (300/400 level) elective course: course must be non-language and homebased in EALC (L04, L05, L51, L81) (3 units)

## Additional Information

- Language placement is required for this program. Please see the Overview page (p. 480) for details.
- Students must earn at least a B- or better in language courses to continue to the next level. They must also maintain at least a B- average in all courses taken to fulfill the minor requirements. Students who do not meet this requirement may either repeat the course(s) in question or earn at least a B- in an approved equivalent course or courses (either during the summer or in a study abroad program).

- Basic Chinese and Basic Korean: students must take both semesters of Basic and one semester of regular language to fulfill the two-semester language requirement. Two semesters of Basic language does not fulfill the language requirement.
- Courses for the minor may not be taken credit/no credit.
- No more than 3 units of transfer or study abroad non-language courses may be applied to the minor.
- Students are strongly encouraged to participate in a study abroad program. Please refer to the EALC website for more information about study abroad programs.

Website: <http://ealc.wustl.edu/>

## Economics

The Economics program explores the problems of a modern economy and introduces the methodological tools that economists use. It emphasizes the development of analytical models and their application to important economic, social and political issues, such as inflation, unemployment, taxation, inequality, poverty, pollution, government decision-making, and regulation. Our faculty, which is made up of leading teacher-scholars, includes specialists in game theory, microeconomics, macroeconomics, industrial organization, monetary economics, financial economics, and public finance.

The study of economics contributes to a broad liberal arts education and helps students develop superior problem-solving skills. It is an excellent course of study to pursue, whether students plan to enter the workforce after graduation or are considering graduate work in law, engineering, or the social sciences. Economics also provides exceptional preparation for careers in business, either immediately after graduation or after completing master's-level graduate work in business (e.g., MBA, MS Finance). For further information, consult the Department of Economics website. Economics students with business interests typically complete at least one internship to obtain practical business experience, and it may be possible to obtain academic credit for that internship. Students should discuss with their advisors the possibility of taking courses, such as accounting, in the Olin Business School.

In addition to the Economics major, there are two interdisciplinary majors: Economics and Computer Science and Mathematics and Economics. In each major, students complete the core courses in the respective fields along with a set of electives that are complementary to both fields. Further information is available in the Majors section (p. 515) of this page. As noted previously, students are strongly encouraged to complete at least one internship and to complement their studies with appropriate course work from the Olin Business School.

## Faculty

### Chair

#### George-Levi Gayle

John H. Biggs Distinguished Professorship in Economics  
PhD, University of Pittsburgh  
Econometric theory; contract theory; labor economics; personnel economics; corporate governance

### Associate Chair

#### Francisco (Paco) Buera

Sam B. Cook Professor of Economics  
PhD, University of Chicago  
Macroeconomics; macroeconomic development

### Director of Graduate Studies — Doctoral Program

#### Jonathan Weinstein

Professor  
Director Graduate Studies - Doctoral Program  
PhD, Massachusetts Institute of Technology  
Microeconomic theory, game theory

### Director of Graduate Studies — Master's Program

#### Brian Rogers

Professor  
PhD, California Institute of Technology  
Microeconomic theory; fields of network formation; social learning; applied game theory

### Associate Director of Graduate Studies — Master's Program

#### Grace J. Yan Johnson

Lecturer  
PhD, Oklahoma State University

### Director of Undergraduate Studies

#### John Nachbar

Professor  
PhD, Harvard University  
Economic theory

### Department Faculty

#### Md Nazmul Ahsan

Lecturer  
PhD, University of Southern California

**Gaetano Antinolfi**

Professor  
Weidenbaum Center Research Fellow  
PhD, Cornell University  
Macroeconomics; monetary and international economics

**Gaurab Aryal**

Associate Professor  
PhD, Pennsylvania State University  
Industrial organization; empirical industrial organization

**Costas Azariadis**

Edward Mallinckrodt Distinguished Professor in Arts & Sciences  
Weidenbaum Center Research Fellow  
PhD, Carnegie Mellon University  
Macroeconomic dynamics; economic development; monetary and fiscal policy

**Ana Babus**

Associate Professor  
PhD, Erasmus University Rotterdam  
Microeconomic theory; finance

**Sudeshna Bandyopadhyay**

Teaching Professor  
PhD, University of Maryland

**Marcus Berliant**

Professor  
PhD, University of California, Berkeley  
Public finance; mathematical economics; urban economics

**Michele Boldrin**

Joseph Gibson Hoyt Distinguished Professor in Arts & Sciences  
PhD, University of Rochester  
Economic theory; economic growth; macroeconomics

**Maria Canon**

Senior Lecturer  
PhD, University of Rochester

**Steven Fazzari**

Bert A. and Jeanette L. Lynch Distinguished Professor of Economics  
PhD, Stanford University  
Macroeconomics; Keynesian economics; investment and finance

**Ian Fillmore**

Assistant Professor  
PhD, University of Chicago  
Intersection of industrial organization; labor economics; econometrics;  
economics of education; education markets

**Sanghmitra Gautam**

Assistant Professor  
PhD, University College London  
Development economics; applied microeconometrics; public economics

**Martín García-Vázquez**

Assistant Professor  
PhD, University of Minnesota  
Labor economics; public finance; macroeconomics; econometrics

**Limor Golan**

Laurence H. Meyer Professor of Economics  
PhD, University of Wisconsin–Madison  
Labor economics; applied microeconomics; applied econometrics

**Philipp Grübener**

Assistant Professor  
PhD, European University Institute  
Quantitative macroeconomics; macro labor economics; macro public finance

**Andrew Jordan**

Assistant Professor  
PhD, University of Chicago  
Labor markets; discrimination; criminal justice

**Sukkoo Kim**

Associate Professor  
PhD, University of California, Los Angeles  
Economic history; urban and regional economics; trade and development

**SangMok Lee**

Associate Professor  
PhD, California Institute of Technology  
Microeconomics

**Rodolfo Manuelli**

James S. McDonnell Distinguished University Professor  
Graduate Admissions Officer  
PhD, University of Minnesota  
Economic growth and development economics; macro and monetary economics

**Molly Moore**

Lecturer  
PhD, Harvard University

**Ismael Mourifié**

Professor  
PhD, University of Montréal  
Microeconomics (theory and applications)

**Werner Ploberger**

Thomas H. Eliot Distinguished Professor in Arts & Sciences  
PhD, Vienna University of Technology  
Statistics; econometric methodology; time-series econometrics

**Robert Pollak**

Hernreich Distinguished Professor of Economics  
PhD, Massachusetts Institute of Technology  
Environmental economics; microeconomics/industrial organization;  
business and government; political economy

**Yongseok Shin**

Douglass C. North Distinguished Professor of Economics  
PhD, Stanford University  
Macroeconomics; economic growth

**Ping Wang**

Seigle Family Professor in Arts & Sciences  
NBER Research Associate  
PhD, University of Rochester  
Growth/development; money/macro; economic theory; spatial/health economics

**M. Bumin Yenmez**

Professor  
PhD, Stanford Graduate School of Business  
Microeconomic theory, mechanism and market design, choice theory

## Affiliated Faculty

PhD, Harvard University

## Majors

- Economics and Computer Science Major (p. 521)
- Economics and Computer Science Major, Financial Economics Specialization (p. 523)
- Economics Major (p. 522)
- Economics Major, Financial Economics Specialization (p. 523)
- Mathematics and Economics Major (p. 524)
- Mathematics and Economics Major, Financial Economics Specialization (p. 523)

## Minors

- Applied Microeconomics Minor (p. 525)
- General Economics Minor (p. 526)

## Courses

Visit online course listings to view semester offerings for L11 Econ.

---

**L11 Econ 1011 Introduction to Microeconomics**

Determination of prices; distribution of national income; theory of production. For a thorough introduction to economics, Econ 1021 also should be taken.

Credit 3 units. A&S IQ: SSC, AN Arch: NSM, SSC Art: NSM, SSC EN: S

---

**L11 Econ 1021 Introduction to Macroeconomics**

Business fluctuations: inflation, recession; monetary and fiscal policy; economic development. For a thorough introduction to economics, Econ 1011 should also be taken.

Credit 3 units. A&S IQ: SSC, AN Arch: NSM, SSC Art: NSM, SSC EN: S

---

---

**L11 Econ 105 The Endgame of Entrepreneurship: Leveraging Capitalism for Good**

Historically, profit has been a key driver of human behavior. In this course, students will learn to take advantage of the profit-seeking motive of capitalism while also learning from the mistakes and unintended consequences capitalism has caused throughout history. Students will apply these learnings toward profit-seeking solutions for the United Nations' Sustainable Development Goals, which are global challenges that call us to work together with boldness and urgency. We will explore how skills from entrepreneurship and venture creation can be used to improve water, climate, education and gender equality globally and here in St. Louis. In interdisciplinary teams, students will learn how to define a problem; listen to customers, competitors and collaborators; create value; measure impact; and communicate their vision. Bold entrepreneurial spirit and skills learned in this course will guide students in their further studies at Washington University and beyond. This course does not count for Economics major/minor elective credit. This course is for first-year (non-transfer) students only. Same as I60 BEYOND 105

Credit 3 units. A&S: FYBB A&S IQ: SSC Arch: SSC Art: SSC BU: BA, ETH EN: S

---

**L11 Econ 2391 Economies as Cultural Systems**

Many contemporary approaches to economics downplay or bracket the importance of culture in the workings of economic systems. In this class we will focus on approaches to distribution and exchange in which culture and social institutions figure prominently, if not pre-eminently. We will sample a diverse array of economies, from gift exchange to the ceremonial destruction of wealth, from Melanesia to Wall Street, in order to evaluate some of the assumptions that undergird market capitalism. These assumptions include the perception of market actors exclusively as calculative, maximizing individuals. Topics to be covered include the Industrial Revolution; utilitarianism; economic anthropology; the formal vs. substantivist debates; ethnography of finance, and Marxist sociology.

Same as L48 Anthro 3391

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: ETH EN: S

---

**L11 Econ 290 Sophomore Research Seminar**

How do you find an economically-relevant research topic? What are the different types of economic papers? How do you write like an economist? This seminar is aimed to help sophomores develop research skills in economics. Work will consist of an original research paper to be completed by the student by the end of the semester under supervision of the instructor. The paper will describe an economic problem, survey the relevant research literature, and outline a contribution to the field.

Credit 3 units. EN: S

---

**L11 Econ 296 Undergraduate TA**

In this course, an advanced undergraduate can assist a faculty member in the teaching of an undergraduate Economics class. Students can enroll after their selection by a supervising faculty member, which occurs after an application (on the department website) is submitted and reviewed, perhaps in conjunction with an interview with the supervising faculty member. Students can enroll in only one section per semester. Students will be expected, at a minimum, to attend lectures and hold office hours. Specific grading duties will be determined by the supervising faculty member, in accord with Arts & Sciences policies. The typical number of units earned is 2, with the possibility of a maximum of 3, per semester. This course can be repeated for P/F credit. Prerequisite: instructor permission. Units: variable - 2 typical; 3 maximum.

Credit variable, maximum 3 units.

---

**L11 Econ 326 American Economic History**

Basic theoretical concepts applied to analyze the changing structure and performance of the American economy from colonial times to the present. Prerequisites: Econ 1011 & 1021.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L11 Econ 328 History of Economic Analysis**

The purpose of this course is to introduce students to some of the theories and doctrines that constitute the main paradigms from which economists and policy makers approach the world. Rather than focusing on the whole history of economic thinking, we will focus on practical issues, including questions such as the following: What determines the wage of labor? Why is monopoly considered a bad thing? At what level does an interest rate become usury? We will consider how these questions have been framed and answered at different points in time and in different cultures. Important components of this course are participation in in-class discussion and essays submitted on the practical issues discussed throughout the semester. Prerequisites: Econ 1011 and Econ 1021.

Credit 3 units. A&S IQ: SSC EN: S

---

**L11 Econ 3311 Financial Markets and Analysis**

This course is a rigorous introduction to financial markets, financial institutions, and their purpose and functions in the economy. In financial markets, trade is essentially "money now" for "money in the future." As such, financial decisions must often take into account future events, whether those be related to individual stocks, portfolios, or the market as a whole. This course explores the topics related to the level and structure of interest rates and of stock prices, portfolio choice, basic investment theory, and arbitrage pricing theory, among others. Prerequisites: Econ 1011 and Econ 1021.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L11 Econ 335 Money and Banking**

Money and the monetary system; money creation by the banking system; central bank functions; monetary theory and economic policy. Prerequisite: Econ 1011 & 1021.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L11 Econ 348 Economic Realities of the American Dream**

Exploration of the realities of economic life in the U.S. and how they correspond to the American Dream. Interdisciplinary perspectives from economics, sociology, and other areas of social inquiry. Emphasis on the consistency between empirical data and different concepts of the American Dream. Specific topics to include sources of economic growth and changing living standards, unemployment, impact of globalization on U.S. citizens, economic mobility, poverty and inequality, and social justice. Prerequisites: An introductory course in economics or sociology, or consent of the instructors. All students who pre-register will be put on the wait list. Students will receive an email immediately after pre-registration requesting more information.

Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC BU: BA EN: S

---

**L11 Econ 352 Health Economics**

Analysis of consumer demand for health care, medical technology, and the role of health insurance. Emphasis placed on behavior of the physician (whether he acts as an agent for the consumer or on his own behalf); on the use of paramedics, preventive care, outpatient care, and the general market organization of the health industry. The major concern will be the rising cost of health care and appropriate public policy responses. Prerequisite: Econ 1011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L11 Econ 354 The Economics of Criminal Justice

In this course, we will use the theoretical and empirical tools of economics to study the criminal justice system. By constructing models of how arrest/prosecution/conviction/sentencing/etc. decisions are made, we will evaluate these decisions for errors and especially for bias. We will also see how economists test hypotheses about the criminal justice system using the same types of "natural experiments" they use to study markets. Prerequisites: Econ 1011 and SDS 2200.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L11 Econ 376 International Economics

Explores consequences of economic integration from various perspectives in international trade: Ricardian, Heckscher-Ohlin, and the New International Trade Theories. Topics include patterns of trade, protectionism, international factor movements, balance of payments, exchange-rate determination, international policy coordination, the international capital market, multinational and international investments, and patterns of international business. Prerequisites: Econ 1011 and Econ 1021, or permission of instructor.

Credit 3 units. A&S IQ: SSC BU: IS

---

### L11 Econ 380 Labor and the Economy

Economic analysis of labor markets. Theory and policy applications of labor supply and labor demand; explanations of wage and income differentials; migration and immigration; discrimination; labor unions; unemployment. Prerequisite: Econ 1011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 382 Socio-Economic Perspectives on Inequality

This course examines the definition and impact of social and economic inequality. Beginning with a review social, economic, and philosophical perspectives of inequality, the course considers the measurement of inequality, international comparisons of inequality, and policies designed to eliminate inequality. Students should be comfortable with methods of quantitative social science. Prerequisite: Econ 1011 is recommended.

Credit 3 units. A&S IQ: SSC

---

### L11 Econ 4011 Intermediate Microeconomic Theory

Analytic theory of consumer and producer behavior under perfect and imperfect competition. Coverage of demand theory (indifference curves and utility functions) and preferences under uncertainty, including expected utility and risk aversion. Development of general equilibrium under pure exchange, including the concepts of competitive equilibrium and Pareto efficiency. Discussion of the role of time as it pertains to interest rates, discounting and net present value. Analysis of standard monopoly and simple oligopoly problems. Development of non-cooperative game theory, including strategic and extensive-form equilibria and Nash and sub-game perfect equilibria. Thorough training in intermediate theory would require both Econ 4011 and Econ 4021. Prerequisites: Econ 1011, Math 132, and concurrent enrollment in, or prior completion of, either Math 233 or Econ 493 ("Mathematical Economics").

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 4021 Intermediate Macroeconomic Theory

National income and labor market measurement. Business cycle facts and consideration of alternative explanations for business cycle phenomena. Development of Solow growth model, along with theories of endogenous growth and an examination of reasons for differences in growth rates across countries. General equilibrium description of firms and consumers in labor and product markets. Implementation of monetary and fiscal policy, and exploration of the impact of policy changes on the macroeconomy. Prerequisites: Econ 1021 and Econ 4011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 404 Behavioral Economics and Experimental Economics

Behavioral economics is an effort to incorporate ideas from psychology into economic models of behavior. We will focus on popular experimental anomalies, including the Allais and Rabin paradoxes, ultimatum bargaining, the centipede and public goods contribution games. We will examine the extent to which these are consistent with standard economic theory and how they may contradict it. The primary focus will be a critical examination of psychological theories of non-standard preferences including loss aversion, probability weighting, reciprocity, fairness and present bias. Theories of incorrect beliefs and systematic biases such as money illusion and procrastination will be covered. The class will include an introduction to experimental methods in economics, including hands-on experience in the MISSEL laboratory. A sound grounding in economic theory is essential to the course. You must have successfully completed Economics 4011, and should be acquainted with basic optimization theory, expected utility theory, risk aversion, discounting and basic game theory including dominance, Nash equilibrium and subgame perfection.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 407 Market Design

The objective of this course is to study how to design mechanisms to allocate scarce resources and how to create successful marketplaces. We will primarily consider two topics: (1) two-sided matching markets, such as the National Resident Matching Program and the Kidney Exchange for transplants, and (2) auctions used by Google, Facebook, etc. Time permitting, a third topic will be the problem of designing and regulating market "platforms," such as the e-commerce markets run by eBay, Amazon, and Craigslist, and applications marketplaces run by Apple, Google, etc., as well as the electronic financial trading platforms run by the NYSE. Prerequisite: Econ 4011. 3 units.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 410 Macroeconomics of Inequality

In this course, we study the driving forces of inequality across countries, across time, and across individuals within a country. We will define and measure inequality using standard measures of economic well-being, such as income, wealth, and consumption of market goods, and we will also consider broader measures such as health outcomes. Historical cross-country data, microdata, and specific case studies will be used to evaluate theories of the sources of inequality. Key variables to be evaluated include physical capital investment, education and human capital investment, technological progress, robotization, international trade, and financial markets, among others. Prerequisites: Econ 4011 and Econ 4021.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 4111 Optimization and Economic Theory

An introduction to mathematical optimization and its applications within economics. The course is designed for, and should be taken by, all undergraduates considering graduate study in economics, but all interested students are welcome. Prerequisites: Econ 4011 and Math 309 or permission of the instructor. Credit 3 units.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 413 Introduction to Econometrics

Econometrics is the development and application of statistical techniques for the measurement of economic phenomena. This course is your initial study of econometric theory and practice. Topics include: translation of economic theory into statistical models, statistical foundations of econometrics, preregression analysis bivariate and

multiple regression techniques, hypothesis testing, multicollinearity, specification error, autocorrelation, errors in variables, identification, and simultaneous estimation. Prerequisites: Econ 1011, Econ 1021, and SDS 2200 (or equivalent).

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

#### **L11 Econ 413W Introduction to Econometrics with Writing**

Econometrics is the development and application of statistical techniques for the measurement of economic phenomena. This course is your initial study of econometric theory and practice. Topics include: translation of economic theory into statistical models, statistical foundations of econometrics, preregression analysis bivariate and multiple regression techniques, hypothesis testing, multicollinearity, specification error, autocorrelation, errors in variables, identification, and simultaneous estimation. The 3 writing assignments and the final paper will provide you an opportunity to formulate an economic model, estimate the model with appropriate data, and interpret the results. Prerequisites: Econ 4011 and Math 2200 or equivalent. PLEASE NOTE: Requests for on-line registration will be wait listed, and students will be enrolled according to Economics major/minor status and student level (e.g., priority to Level 8 Econ majors). Students should also select the "A" subsection.

Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC EN: S

---

#### **L11 Econ 4151 Applied Econometrics**

Introduction to econometrics as it is applied in microeconomics. Emphasis is on hands-on implementation of the models covered in the course. Topics related to the analysis of microeconomic data include cross-section and panel data linear models and robust inference; instrumental variables estimation; simultaneous equation models; models for discrete choice; and truncation, censoring and sample selection models. Prerequisite: Econ 4011 and Econ 413 (Math 309 is recommended). Students should co-enroll in the "A" subsection.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

#### **L11 Econ 4160 Topics in Econometrics: Microeconometrics**

This is a topics class in econometrics but with a strong focus on microeconometrics. This course has two main objectives: (i) Teach students various advanced theoretical econometric tools to the students and (ii) guide them through the process of writing a research paper that explores an empirical research question in economics using adequate econometrics tools. We will study theory and application of methods of data analysis developed for microdata pertaining to individuals, households and firms. More, precisely, We will study recent development of theory and methods for analyzing selective samples and analyzing discrete choice models. Prerequisites: Econ 4011 and (Econ 413, Econ 413W, or Econ 536). Math 309 recommended. Students should co-enroll in the "A" subsection. 3 units.

Credit 3 units. A&S IQ: SSC

---

#### **L11 Econ 4210 Topics in Financial Economics: Asset Pricing**

The objective of the course is to develop the basic economic models that can be used to study the valuation of different financial assets and to discuss how to confront the theory with the evidence from financial markets. The course will develop the basic model of investment under uncertainty and discuss portfolio choices in static and dynamic settings as well as market equilibria and the impact of news on the forecast-ability of excess returns. The course will describe valuation in incomplete asset markets (e.g. arbitrage pricing theory) and the extension to the valuation of firms and real estate assets. Prerequisites: Econ 4011, Econ 4021 and Econ 413. 3 units.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

#### **L11 Econ 4211 Topics in Financial Economics: Investments**

This course surveys recent developments in investments and portfolio management. The course aims to provide students with a structure for thinking about investment decisions from the perspective of a portfolio manager. We start by understanding fundamental concepts for investment theory: modern asset valuation and portfolio selection under uncertainty. We will proceed to investigate various sources of risk which financial institutions are exposed to, such as interest rate risk, credit risk and liquidity risk, and study how financial institutions manage these risks. The course will also introduce student to investment evaluation techniques. We will explore recent innovations in financial markets, as well as various frictions that arise in markets. Students will have the opportunity to apply concepts learned in class on a virtual investment and trading platform, StockTrak. Prerequisites: Econ 4011, Math/SDS 2200 (or Math/SDS 3200, Math/SDS 3211, QBA 120 and QBA 121, ESE 326.) or PolSci 363 with permission from instructor. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

#### **L11 Econ 432 Economics of Public Policy**

This course will cover the logic underlying the economics and politics of public policies concerning issues such as international trade, monetary policy, fiscal policy, market reforms, pollution control, economic inequality and the welfare state more generally. The general question we will address, using specific cases, is that of the role of markets and government in an economy. The course relies heavily on the concepts and methods of microeconomics and macroeconomics. There are many theories of how economic policies work and considerable debate as to what can be done and what should be done. We will examine the facts (past and present) and then examine the theories and their explanatory power. We will also organize the class into research groups that will address specific economic policies issues. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC EN: S

---

#### **L11 Econ 435 Open Economy Macroeconomics**

This course will begin with a review of international trade theory, of the balance of payment accounts and their relationship to international borrowing and lending. We will then study the asset approach to exchange rates determination, exchange rate behavior in the short and in the long run, and the relationship of exchange rates with prices and output. The course will also explore monetary and fiscal policy under both fixed and floating exchange rates, macroeconomic policy coordination and optimum currency areas, international debt problems of developing countries and their relation to stabilization program. Prerequisite: Econ 4021.

Credit 3 units. A&S IQ: SSC Art: SSC BU: IS EN: S

---

#### **L11 Econ 437 The Economics of Financial Intermediation**

The structure and the role of banks have changed tremendously. The historically-traditional activity of granting loans and collecting deposits has evolved into a much richer and more complex set of financial contracts. The separation between financial asset trading activity and traditional commercial bank activity that was typical of the financial system in the period after the World War II also disappeared. Coincident with the evolution of financial institutions was the development of the asymmetric information model. The role of banks in the economy can be explained with the tools developed in these models of the economics of information, as a microeconomic theory of banking does not exist when information is symmetric and markets are complete. The economics of information literature is also used to explain the evolution of financial institutions and markets, and to understand the consequences of that evolution for economic outcomes (such as economic development and financial crises) and for monetary policy choices (such as central bank interventions, regulations and changes in the payments system). Prerequisite: Econ 4011; Econ 4021 recommended, but not required.

Credit 3 units. A&S IQ: SSC EN: S

---

**L11 Econ 444 Innovation and Intellectual Property: Theory and Practice**

Innovation - that is: figuring out better and cheaper ways of satisfying human desires - is the key to improving our well being. It is not patient saving and accumulation that makes us so much better off than we used to be: capital accumulation is only the conduit through which the innovation juices flow. The question is what drives it? How come some societies are apparently much more innovative than others? How come we have the impression that most useful inventions took place in the last three centuries? Are there policies that help fostering innovation and others that hurt? The course tries to address these questions. Economists have many theories of innovation, and some better than others. We will look at the theories, we will examine the facts (past and present), then we will go back to the theories and reconsider their explanatory power. With this background we approach the debate about Intellectual Property, what it is and what it is not good for, whose interests it serves and whose well being it thwarts. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L11 Econ 445 Public Finance**

The study of fundamental forms of market failure that provide the economic rationale for government action. The first third of the class examines market failure when an economy contains externalities and public goods and the general nature of public policies that address these issues. The second third addresses particular public policies, with a focus on their intended and unintended consequences and their costs. The final third addresses taxation. Topics include the measurement and evaluation of tax burdens, the federal personal income tax, tax evasion, and proposals for fundamental tax reform. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

---

**L11 Econ 448 Money & Monetary Policy**

We will explore several classic questions in the theory of money. What is money? What forms does money take? Why is money necessary-why is there a demand for money? What determines the supply of money? What is the debate on central versus free banking? Should banking be regulated, and, if so, why and how? What determines inflation? Should nations enter into fixed exchange rate regimes, or should they let the value of their monies be market-determined? What are the tensions that arise in fixed exchange rate regimes and common currency areas? How should policymakers view cryptocurrencies? Is a central bank digital currency desirable? These, and other questions, are explored within the context of theories that model the microfoundations of monetary exchange explicitly. PREREQUISITES: Econ 4011 and Econ 4021. 3 units.

Credit 3 units. A&S IQ: SSC EN: S

---

**L11 Econ 448W Current Macroeconomic Issues**

Review and extension of macroeconomic models from Econ 4021 from a comparative perspective and use of these models to analyze current macroeconomic and policy issues. Topics include recession and recovery, long-term growth, saving and social security, investment, and monetary policy. Multiple writing assignments that emphasize critical analysis of theoretical perspectives and readings applied to current macroeconomic topics. Writing will be revised to improve logical structure, clarity, and style. Enrollment limited to 15 students with priority given to senior economics majors. Prerequisite: Econ 4021. All students who pre-register will be put on the wait list. Students will receive an email immediately after pre-registration requesting more information.

Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC EN: S

---

**L11 Econ 451 Environmental Policy**

Course will examine the relationship between environmental economics and environmental policy. The course will focus on air pollution, water pollution, and hazardous wastes, with some attention given to biodiversity and global climate change. The course will examine critically two prescriptions that economics usually endorses: (1) "balancing" of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; (2) use of market incentives (e.g., prices, taxes, or charges) or "property rights" instead of traditional command-and-control regulations to implement environmental policy. Prerequisite: Econ 1011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L11 Econ 452 Industrial Organization**

Theoretical and empirical analysis of the presence and value of competitive forces in the United States economy. Theories of industrial organization and development of criteria for performance of noncompetitive industries. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L11 Econ 4567 Auction Theory and Practice**

This course will use the theoretical and empirical tools of economics to study auctions, which are one way of buying and selling goods (or services). The course begins with a consideration of optimal bidding in different types of auctions. We will explore how to design auction rules that maximize the seller's revenue, or minimize the buyer's cost (such as in the case of government procurement). We will also study how to design auction rules that improve efficiency by reducing collusion by bidders. The course will conclude by using econometrics to analyze "real-world" auction data to estimate preferences and cost distributions; to determine optimal reserve prices; and to answer some questions related to auction design. Familiarity with computer programming/estimation, such as with MATLAB, R, or Julia, will be helpful. Prerequisites: Econ 4011 and Econ 413 or Econ 413W.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC

---

**L11 Econ 460 Urban Economics**

Economic function of the city and the role of the city in a national economy. Local decision making; financing of local government expenditures. An analysis of selected urban problems, such as causes and effects of housing market segregation; decay and abandonment, landlord-tenant relations, crime, and urban transport systems. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L11 Econ 467 Game Theory**

This course covers advanced applications of Game Theory in economics. Topics include expected utility, strategic-form and extensive-form games with perfect information, Bayesian games, infinitely repeated games, dominance, Nash equilibrium and its refinements. We apply these tools to study strategic situations in industrial organization, auctions, bargaining, voting, and signaling games. Prerequisites: Econ 4011 and SDS 2200.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L11 Econ 471 Development Economics**

This course investigates issues related to the development of the economics of third-world countries. Topics include economic growth, poverty, corruption, and human capital accumulation, with an emphasis on education and health-related policies. The course provides an in-depth understanding of the role of the state and the impact of specific public policies designed to encourage development. Empirical examples are drawn from Asia, Latin America, and the African subcontinent. Prerequisites: Econ 4011 and Econ 413 or Econ 413W.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 472 Topics in Growth and Development

This course highlights important empirical facts concerning growth and development in various countries at different development stages. Fundamental growth theory is then provided for explaining these facts systematically and for evaluating the consequences of commonly adopted development policies. Topics vary, but may include population, human capital and labor market development, R&D and innovation, finance and growth, modernization and industrial transformation, world income disparities and poverty problems, institutions and political economy issues, environmental and social factors, and international trade and economic integration. Prerequisites: Econ 4011 and Econ 4021. Credit: 3 units.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 4721 Advanced Topics in Modern Economic Growth

This course studies economic theories that explain the observed patterns of economic development across time and space. What explains the growth of the world economy since the Industrial Revolution? Why are the level and the growth rate of per-capita income so different across countries? What explains the decline of manufacturing, and its growth in the early stages of development? What are the determinants of inequality and risk faced by individuals in different countries? Theories featuring the role of investment in physical and human capital, technology, coordination, financial markets, and environmental variables will be presented. Theories will be evaluated using historical data and detailed case studies. This course is designed to complement Econ 472. Prerequisites: Econ 4011.

Credit 3 units. A&S IQ: SSC EN: S

---

### L11 Econ 480 Labor Economics

Economic analysis of labor markets. Theory and evidence on supply of and demand for labor, explanation of wage and income differentials; impact of education on human skills and productivity. Prerequisite: Econ 401 and Econ 413.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 483 Economics of Education

The "economics of education" involves analysis of the economic and social determinants and consequences of education. Because each person's education is an investment in human capital which allows the individual to contribute to society in a productive way, education becomes a crucial determinant of an economy's ability to achieve high growth with high wages, low unemployment and strong social cohesion. This course will address three essential topics from the wide-ranging field of the economics of education. The first is demand-side oriented and includes: (i) the measurement of the returns to education in the labor market (human capital theory; the central idea of education as human capital investment); and (ii) a characterization of the education production function, which relates the various inputs affecting a student's learning (schools, families, peers, neighborhoods, etc.) to measure outputs including labor market success, graduation rates and standardized test scores. The second important topic involves political economy and the supply side: the financing and provision of education. The third part of the course is devoted to the links between education and economic development, including cross-country differences in schooling, returns to schooling and per-capita income. Prerequisites: Econ 4011, Econ 4021, and Econ 413.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 484 Computational Macroeconomics

This course provides a more in depth look into quantitative methods used in contemporary macroeconomic analysis. We will cover numerical methods used in dynamic optimization. In practice, we will apply these methods to solve two major models used in macroeconomic analysis, using both Excel and Matlab. The Neoclassical Growth Model and its variants are used to study aggregate trends and aggregate effects of government policy. The lifecycle model is used to examine questions involving decision-making over the lifecycle. We will learn how to use empirical observations for the purpose of calibrating model parameters and how to conduct policy evaluation in the context of calibrated models. Our policy evaluation will focus on fiscal policy (taxes) and social security issues. Prerequisites: Econ 4011 and Econ 4021.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 490 Independent Work

Prerequisites: senior standing and permission of the supervising faculty member. See Academic Coordinator for further details. Note: This course does not count toward the major or minor in Economics. Credit to be determined; maximum 6 units.

Credit variable, maximum 6 units.

---

### L11 Econ 493 Mathematical Economics

The objective of this course is to develop the mathematical tools necessary for the study of intermediate micro- and macro-economic theory and the advanced electives in economics. The principal focus will be the calculus of multivariate functions (including total and partial differentiation), unconstrained and constrained optimization of multivariate functions, and implicit and inverse function rules. Time permitting, additional topics will be introduced. Economics majors and minors must take this course (or Math 233) prior to, or concurrently with, Econ 4011. Students who have taken, or are taking, Math 233 are encouraged to take this course as well. Prerequisites: Econ 1011 and Econ 1021, and Math 132.

Credit 1 unit. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L11 Econ 494 Introduction to Stata

This short course introduces students to the data analysis and statistical software tools used in upper-level econometrics and applied economics courses. The course is designed to serve as a bridge between introductory econometrics and practical work with real-world databases. The course will be held in the computer classroom so that students can obtain hands-on experience with data preparation, workflow, and modeling using the Stata statistical software package. Emphasis throughout the course is placed on examples of applications in economics. PLEASE NOTE: 1. This course must be taken for a letter grade; the P/F and audit grade options are not available. 2. Students cannot use WebStac to add or drop this course after the first session -- contact [dottie@wustl.edu](mailto:dottie@wustl.edu) for scheduling issues. 3. The final exam will occur on the last day of class, per the course syllabus. Prerequisites: prior completion of, or concurrent enrollment in, Econ 413.

Credit 1.5 units.

---

### L11 Econ 4941 Economic Analysis with Excel

This mini course offers students the opportunity to master the advanced functionality of Microsoft Excel, and to apply those skills to common economic, statistical, and financial problems. Even those familiar with the basic functioning of Excel may be surprised to learn how little of its full capability most users access. Though basic functions will be covered, our focus will be on leveraging Excel's more advanced functions, analytical tools, reporting templates, and linking features to manage multiple workbooks, manipulate data across files, automate tasks, and produce publication quality charts, tables, and graphs. In addition to providing hands-on experience using Excel's advanced capabilities, the course is designed to serve as a bridge between

introductory econometrics and practical work with real-world datasets. The course will be held in the computer classroom so that students can obtain practical experience preparing data, managing workflow, and presenting results. Added emphasis throughout the course will be placed on examples with applications in economics. Prerequisites: prior completion of, or concurrent enrollment in, Econ 413 (or equivalent). Credit 1.5 units.

#### L11 Econ 497 Research in Economics

Opportunity to work as part of a research project under faculty supervision. Note: this course does not count toward the major or minor in Economics. May be repeated for credit. Credit variable, maximum 3 units. A&S IQ: SSC Art: SSC EN: S

#### L11 Econ 498 Honors Seminar

Advanced application of economic theory to policy problems. This is the first part of the two-course sequence for seniors writing an honors thesis, and it is taken in the fall semester of the senior year. This course may not be used to satisfy major requirements. Prerequisite: invitation into the "Honors in Economics with Thesis" track of the department's Honors Program. Credit 3 units. A&S IQ: SSC EN: S

#### L11 Econ 499 Study for Honors

Independent reading and research under faculty direction leading to a Senior Honors Thesis. This is the second part of the two-course sequence for seniors writing an honors thesis, and it is taken in the spring semester of the senior year. This course may not be used to satisfy major requirements. Prerequisite: invitation into the "Honors in Economics with Thesis" track of the department's Honors Program. Credit 3 units.

## Economics and Computer Science Major Program Requirements

- **Total units required:** 54

The College of Arts & Sciences and the McKelvey School of Engineering have developed a major that allows students interested in both economics and computer science to combine these two complementary disciplines efficiently, without having to pursue them as two separate majors.

Engineering students who declare this major must fulfill the distribution requirements and all other requirements for the BS in Applied Science degree (p. 1304) in the McKelvey School of Engineering. Arts & Sciences students who declare this major must fulfill the distribution requirements and all other requirements for an AB degree (p. 1112) in addition to the specific requirements listed below. It is possible to earn the Financial Economics Specialization (p. 523) in conjunction with this major (prime or second), and interested students should consult with the Academic Coordinator (dottie@wustl.edu) in the Department of Economics.

## Required Courses

Code	Title	Units
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 413	Introduction to Econometrics	3
or Econ 413W	Introduction to Econometrics with Writing	
Math 131	Calculus I (AP credit may satisfy this requirement)	3
Math 132	Calculus II (AP credit may satisfy this requirement)	3
Math 233	Calculus III	3
SDS 3200	Elementary to Intermediate Statistics and Data Analysis	3
or SDS 3211	Statistics for Data Science I	
or ESE 326	Probability and Statistics for Engineering	
CSE 131	Introduction to Computer Science	3
CSE 240	Logic and Discrete Mathematics	3
or Math 310	Foundations for Higher Mathematics	
or Math 310W	Foundations For Higher Mathematics With Writing	
CSE 247	Data Structures and Algorithms	3
CSE 347	Analysis of Algorithms	3

\* Of these options, SDS 3200 is the preferred course.

## Elective Courses

1. Three 3-unit economics electives drawn from any Econ 4011 prerequisite course, including Econ 4021
  - a. Economics electives of particular relevance include (but are not limited to) Econ 407 Market Design, Econ 4151 Applied Econometrics, Econ 4160 Topics in Econometrics: Microeconometrics, Econ 452 Industrial Organization, Econ 4567 Auction Theory and Practice, Econ 467 Game Theory, and Econ 484 Computational Macroeconomics.
2. Three 3-unit computer science electives drawn from the list below:

Code	Title	Units
CSE 217A	Introduction to Data Science	3
CSE 311A	Introduction to Intelligent Agents Using Science Fiction	3
CSE 314A	Data Manipulation and Management	3
CSE 330S	Rapid Prototype Development and Creative Programming	3
CSE 332S	Object-Oriented Software Development Laboratory	3
CSE 341T	Parallel and Sequential Algorithms	3

CSE 400E	Independent Study	varies; max. 3
CSE 411A	AI and Society	3
CSE 412A	Introduction to Artificial Intelligence	3
CSE 416A	Data Science for Complex Networks	3
CSE 417T or ESE 417	Introduction to Machine Learning Introduction to Machine Learning and Pattern Classification	3
CSE 419A	Introduction to AI for Health	3
CSE 425S	Programming Systems and Languages	3
CSE 427S	Cloud Computing with Big Data Applications	3
CSE 435S	Database Management Systems	3
CSE 457A	Introduction to Visualization	3
CSE 514A	Data Mining	3
CSE 517A	Machine Learning	3
CSE 518A	Human-in-the-Loop Computation	3
CSE 543T	Algorithms for Nonlinear Optimization	3
CSE 557A	Advanced Visualization	3

\* Students planning to complete CSE 517A Machine Learning should try to complete CSE 417T Introduction to Machine Learning as the prerequisite course. Non-engineering students may substitute SDS 3200 Elementary to Intermediate Statistics and Data Analysis or SDS 3211 Statistics for Data Science I for the ESE 326 Probability and Statistics for Engineering prerequisite for ESE 417 Introduction to Machine Learning and Pattern Classification.

Website: <http://economics.wustl.edu>

## Economics Major Program Requirements

- **Total units required:** 37-39

### Required Courses

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Econ 493 or Math 233	Mathematical Economics Calculus III	1-3
SDS 2200 or SDS 3200 or SDS 3211	Elementary Probability and Statistics Elementary to Intermediate Statistics and Data Analysis Statistics for Data Science I	3

or ESE 326 or DAT 120 & DAT 121	Probability and Statistics for Engineering Managerial Statistics I and Managerial Statistics II	
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 4021	Intermediate Macroeconomic Theory	3
Econ 413 or Econ 413W	Introduction to Econometrics Introduction to Econometrics with Writing	3

### Elective Courses

Four upper-level (3-unit) economics electives (12 units), at least two of which must have an Econ 4011 or Econ 4021 prerequisite.

### Additional Information

- All courses in the major (including Mathematics and SDS courses) must be completed with the letter grade option, and a grade of at least C- must be earned in each.
- Majors selecting an approved study abroad program (for one semester) may receive transfer credit for Econ 413. Note: many study abroad programs in Europe do not offer the equivalent of Econ 413 in the spring semester. A grade of C (or higher) is required in study abroad coursework. Preapproval from the department's study abroad advisor is required.
- Majors selecting an approved study abroad program (for one semester) may also receive transfer credit for two economics electives, which count in the major as 300-level electives (regardless of the abroad course prerequisite). A grade of C (or higher) is required in study abroad coursework. Preapproval from the department's study abroad advisor is required.
- Majors selecting an approved study abroad program for a full year of study will be handled on a case-by-case basis in terms of meeting degree requirements. All majors must complete at least 4, 400-level courses from the WU Department of Economics.
- No credit is awarded in the Economics major from the AP Microeconomics or the AP Macroeconomics exam(s). AP credit for [Math 131](#), Math 132, and/or [SDS 2200](#) is accepted in the Economics major.
- Majors may receive a maximum of 3 units of transfer credit from other colleges/universities to replace Econ 1011, Econ 1021, or a 300-level economics elective. A minimum grade of C- must be earned. This policy is distinct from studying in an approved study abroad/study away program, but, in total, no more than 9 units of transfer credit will be accepted for a major matriculating to WU as a freshman.
- Transfer credit for mathematics or for probability/statistics courses is approved by the respective departments and is accepted by the Department of Economics for major credit.
- For further details on policies and procedures, please refer to the Undergraduate Guide and the Department's website, or schedule a meeting with the department's Academic Coordinator.

Website: <http://economics.wustl.edu>

## Financial Economics Specialization for Economics Majors

By completing a specialized set of electives, majors (prime or second, including dual majors) can earn the Financial Economics Specialization.

Students should notify the department of their intent to earn the Financial Economics Specialization by completing the form on the department's website at least one semester prior to graduation.

### Program Requirements

- Declared major in Economics (p. 522), Math+Economics (p. 524), or Econ+CSE (p. 521)
- Completion of extra elective(s) and an integrated set of electives (These details are described below and are specific to each major.)

### Major in Economics

**Total units required:** 37 to 39 (for the major) + 3 = 40 to 42 total units

Students with a prime or second major in economics must do the following, in addition to completing the major requirements:

- Complete one additional economics elective at the 300 or 400 level, or complete FIN 340.
- A minimum of three courses must be drawn from the approved "List of Financial Economics Electives" below or be approved substitutes from a study abroad program.
- All courses must be completed with the letter grade option, and a grade of at least C- must be earned in each. (A grade of at least C is required in study abroad course work.)

### List of Financial Economics Electives

Code	Title	Units
Econ 3311	Financial Markets and Analysis	3
Econ 335	Money and Banking	3
Econ 4210	Topics in Financial Economics: Asset Pricing	3
Econ 4211	Topics in Financial Economics: Investments	3
Econ 437	The Economics of Financial Intermediation	3
Econ 448	Money & Monetary Policy	3
FIN 340	Capital Markets and Financial Management (approved if the student is NOT in Finance major/minor)	3

### Major in Economics + Computer Science

- **Total units required:** 54 (for the major) + 3 = 57 total units

Students pursuing this dual major through the McKelvey School of Engineering or Arts & Sciences must do the following, in addition to the major requirements:

- Complete one additional economics elective at the 300 or 400 level, or complete FIN 340.
- A minimum of three of the four courses must be drawn from the approved "List of Financial Economics Electives" above or be approved substitutes from a study abroad program.
- All courses must be completed with the letter grade option, and a grade of at least C- must be earned in each. (A grade of at least C is required in study abroad course work.)

### Major in Mathematics + Economics

- **Total units required:** 57 (for the major) + 3 = 60 total units

Students with a major in Math+Econ have two options through which the Financial Economics Specialization may be earned. Regardless of option, all courses must be completed with the letter grade option, and a grade of at least C- must be earned in each. (A grade of at least C is required in study abroad course work.)

#### Option 1 (when completing the major with three Economics electives and four Math electives)

- Complete one additional economics elective at the 300 or 400 level, or complete FIN 340. Therefore, completion of the major plus the specialization requires four economics electives (or three economics electives and FIN 340) and four math electives, subject to the constraints below:
  - The four math electives must come from the approved list for the major, or a student may complete three math electives from the approved list and one SDS elective from the preapproved electives list.
  - A minimum of three of the four total economics electives must be drawn from the approved "List of Financial Economics Electives" above or be approved substitutes from a study abroad program.
  - A minimum of three of the four total economics electives must come from the approved list for the major.

#### Option 2 (when completing the major with four Economics electives and three Math electives)

Students must complete the following:

- Four economics electives, where both of the following criteria must be satisfied:
  - At least two of the four electives must be drawn from the "List of Financial Economics Electives" above.
  - At least three of the four economics electives must be drawn from the approved list for the major.
- The three math electives must be drawn from the approved list for the major.
- In addition, for the specialization, students must complete Math 456.

## Mathematics and Economics Major Program Requirements

- **Total units required:** 57

### Required Courses

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 4021	Intermediate Macroeconomic Theory	3
Econ 413	Introduction to Econometrics	3
or Econ 413W	Introduction to Econometrics with Writing	
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Math 309	Matrix Algebra	3
Math 310	Foundations for Higher Mathematics	3
or Math 310W	Foundations For Higher Mathematics With Writing	
SDS 3200	Elementary to Intermediate Statistics and Data Analysis	3
or SDS 3211	Statistics for Data Science I	
or Math 493C	Probability	
<b>Total Units</b>		<b>36</b>

### Elective Courses

Majors must complete seven electives drawn from the lists below. Three electives must be drawn from the Economics list and three electives must be drawn from the Mathematics list. The remaining elective may come from either department or from the preapproved elective list below.

#### Economics

One of the three Economics electives can be any Economics course with Econ 4011 or Econ 4021 as a prerequisite, including from an approved study abroad program. The other two economics electives must come from the following list:

Code	Title	Units
Econ 404	Behavioral Economics and Experimental Economics	3
Econ 407	Market Design	3
Econ 410	Macroeconomics of Inequality	3
Econ 4111	Optimization and Economic Theory	3
Econ 4151	Applied Econometrics	3
Econ 4160	Topics in Econometrics: Microeconometrics	3
Econ 4210	Topics in Financial Economics: Asset Pricing	3
Econ 4211	Topics in Financial Economics: Investments	3
Econ 435	Open Economy Macroeconomics	3
Econ 437	The Economics of Financial Intermediation	3
Econ 445	Public Finance	3
Econ 452	Industrial Organization	3
Econ 4567	Auction Theory and Practice	3
Econ 460	Urban Economics	3
Econ 467	Game Theory	3
Econ 471	Development Economics	3
Econ 480	Labor Economics	3
Econ 484	Computational Macroeconomics	3

#### Mathematics

The three Mathematics electives must come from the following list:

Code	Title	Units
Math 312	Differential Equations and Dynamical Systems	3
Math 318	Introduction to Calculus of Several Variables	3
Math 371	Graph Theory	3
Math 410	Introduction to Fourier Series and Integrals	3
Math 4111	Introduction to Analysis	3
Math 4121	Introduction to Lebesgue Integration	3

Math 415	Partial Differential Equations	3
Math 416	Complex Variables	3
Math 429	Linear Algebra	3
Math 449	Numerical Applied Mathematics	3
Math 450	Topics in Applied Mathematics	3
Math 456	Topics in Financial Mathematics	3
Math 493C	Probability	3
Math 495C	Stochastic Processes	3

\* Students choosing both Math 312 and Math 318 must complete four L24 Mathematics electives from the list above. Math 493C can be taken for elective credit in the major if SDS 3200 (or SDS 3211) is completed to satisfy the core requirements.

## Preapproved Electives

One elective in the major can come from the following list:

Code	Title	Units
SDS 420	Experimental Design	3
SDS 439	Linear Statistical Models	3
SDS 4392	Advanced Linear Statistical Models	3
SDS 459	Bayesian Statistics	3
SDS 460	Multivariate Statistical Analysis	3
SDS 461	Time Series Analysis	3
SDS 462	Mathematical Foundations of Big Data	3
SDS 475	Statistical Computation	3
SDS 494	Mathematical Statistics	3

## Additional Information

- Students may declare a prime or a second major in Mathematics and Economics via L24 (Math) or L11 (Econ), and that will determine their major advisor.
- Students cannot declare more than one major or minor in the Department of Economics. This restriction includes dual majors, such as Mathematics and Economics (and Economics and Computer Science). Dual majors are considered "in the department" even if they are declared in another department.
- All courses in the major must be completed with the letter grade option, and a grade of at least C- must be earned in each.
- It is possible to earn the Financial Economics Specialization (p. 523) in conjunction with this major (prime or second).
- It is recommended that students completing Math 203 and Math 204 should bypass Math 309 and Math 310. However, they must complete one upper-level Mathematics elective from the list above (with the exception of Math 318) in lieu of Math 309 and Math 310.
- With instructor permission, students may use any of the following for Economics elective credit: Econ 501, Econ 502, Econ 503, Econ 504, Econ 511, or Econ 513.

- Transfer credit, including study abroad approval, for mathematics courses, for probability/statistics courses, or for CSE 131 is approved by the respective departments and is accepted by the Department of Economics for major credit.
- Majors may receive a maximum of 6 units of transfer credit from other colleges/universities to replace Econ 1011 and Econ 1021 (3 units of transfer credit per course). A minimum grade of C- must be earned. Preapproval by the Academic Coordinator (dottie@wustl.edu) in the Department of Economics is required.
- Majors selecting an approved study abroad program (for one semester) may receive transfer credit for Econ 413. **Note:** Many study abroad programs in Europe do not offer the equivalent of Econ 413 in the spring semester. A grade of C (or higher) is required in study abroad course work. Preapproval from the Department of Economics' study abroad advisor is required.
- Majors selecting an approved study abroad program (for one semester) may also receive transfer credit for up to two economics electives. (Majors completing two economics electives abroad are required to complete four economics electives in the major.) A grade of C (or higher) is required in study abroad course work. Preapproval from the department's study abroad advisor is required.
- Majors selecting an approved study abroad program for a full year of study will be handled on a case-by-case basis in terms of meeting degree requirements.
- AP credit for Econ 1011, Econ 1021, Math 131, and/or Math 132 is accepted in the major. Consult with the Department of Mathematics and the Department of Economics for International Baccalaureate and British A-level policies.
- For further details on policies and procedures, please refer to the Undergraduate Guide and the Department of Economics' website, or schedule a meeting with the department's Academic Coordinator (dottie@wustl.edu).

 Website: <http://economics.wustl.edu>

## Applied Microeconomics Minor

### Program Requirements

- **Total units required:** 22-24

## Required Courses

Code	Title	Units
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Math 131	Calculus I	3
Math 132	Calculus II	3
Econ 493	Mathematical Economics	1-3
or Math 233	Calculus III	
<b>Total Units</b>		<b>16-18</b>

## Elective Courses

- One (3-unit) Economics elective having at least Econ 1011 and/or Econ 1021 as a prerequisite course
- One (3-unit) Economics elective having Econ 4011 as a prerequisite course

## Prerequisites

The prerequisite courses for Econ 4011 are Econ 1011 and Math 132. In addition, Econ 493 or Math 233 must be taken prior to or concurrently with enrollment in Econ 4011.

## Additional Information

- All courses in the minor (including Mathematics) must be completed with the letter grade option, and a grade of at least C- must be earned in each course.
- Minors in an approved study abroad program may receive transfer credit for one economics elective at the 300 level. Preapproval from the department's study abroad advisor is required.
- For further details on policies and procedures, please refer to the Undergraduate Guide and the department's website, or schedule a meeting with the department's Academic Coordinator.

# General Economics Minor

## Program Requirements

- **Total units required:** 22-24

## Required Courses

Code	Title	Units
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 4021	Intermediate Macroeconomic Theory	3
Math 131	Calculus I	3
Math 132	Calculus II	3
Econ 493	Mathematical Economics	1-3
or Math 233	Calculus III	
<b>Total Units</b>		<b>19-21</b>

## Elective Course

Students must complete one (3-unit) Economics elective that has at least Econ 1011 and/or Econ 1021 as a prerequisite.

## Prerequisites

The prerequisite courses for Econ 4011 are Econ 1011 and Math 132. In addition, Econ 493 or Math 233 must be taken prior to or concurrently with enrollment in Econ 4011. The prerequisite courses for Econ 4021 are Econ 1021 and Econ 4011.

## Additional Information

- All courses in the minor (including Mathematics) must be completed with the letter grade option, and a grade of at least C- must be earned in each.
- Minors in an approved study abroad program may receive transfer credit for one economics elective at the 300 level. Preapproval from the department's study abroad advisor is required.
- For further details on policies and procedures, please refer to the Undergraduate Guide and the department's website, or schedule a meeting with the department's Academic Coordinator.

# Education

The Department of Education at Washington University in St. Louis is an interdisciplinary community that bridges the theoretical and research foundations of education, traditional academic disciplines (e.g., sociology, psychology, history), and the professional practice of education. Our academic programs span a variety of disciplinary perspectives, methodological approaches (e.g., quantitative, qualitative), and levels of analysis ranging from the individual to complex systems. Each of us works from a disciplinary perspective, but we embrace and utilize other perspectives because such disciplinary synergies are critical to understanding and impacting the complex

world of education. Individually and as a community, we are working to change education and other systems that perpetuate inequity and inequality. Our departmental theme of “**Equalizing Educational Opportunity: Equity, Inclusion, and Success in Classrooms, Schools, and Communities**” encapsulates this work.

Whether a student's goal is to teach young minds, discover how humans learn, or better understand educational institutions and policies, the Department of Education offers students a chance to explore their interests, develop their skills, and begin their journey to a rewarding career through undergraduate programs in Educational Studies and Teacher Education. Our academic programming views the learning pathway as part of a broader transdisciplinary framework of development and well-being. Conditions associated with education and youth development represent a problem space where persistent engagement and planning across political boundaries, health care providers, youth-serving organizations, and educational institutions are critical. We offer a vibrant student-centered community in which faculty and staff are invested in the mentoring and success of students. Many of our classes are smaller and thus allow for meaningful interactions with the education community.

The Department of Education offers an undergraduate major and minor in Educational Studies for persons interested in the study of educational processes and institutions. Students in the Educational Studies program apply the perspectives and methods of a number of disciplines to questions about educational institutions, educational processes, and the social and cultural factors that affect them.

The Department of Education also offers undergraduate majors in Teacher Education with elementary, middle school, and secondary specializations in addition to a 4/1 Accelerated AB/MAT Degree Program for undergraduates at Washington University in St. Louis. The elementary, middle school, and secondary teacher education programs are designed to produce teachers who take an inquiry-oriented approach to education. Based upon the belief that teaching is a complex normative and changing activity, teacher education is viewed as an on-going, problem-solving process as opposed to a search for the "one right" answer or "one best" way.

## Courses

Visit online course listings to view semester offerings for L12 Educ.

---

### L12 Educ 102 First-Year Seminar: Strengths, Weaknesses, Opportunities, and Threats for 21st-Century Education

This first-year seminar will highlight various aspects of critical topics in K-12 education to consider the current strengths, weaknesses, opportunities, and threats in contemporary K-12 education. This will be primarily a discussion-based course covering topics such as (but not limited to) trauma-informed care and school-based mental health, advancing technology, restorative practices, design schools, and equity in education. The course will provide students with an opportunity to observe a classroom at the P-12 grade level(s) with varied and diverse student populations for the purpose of introduction to and analysis of the culture of schooling and classrooms. Enrollment limited to first-year students.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L12 Educ 102A First-Year Seminar: Metacognating Mario -- Learning and Video Games

Although we often associate education with school-based activity, human beings learn in multiple environments beyond the formal classroom. Video games, while often dismissed as frivolous entertainment, provide one such example of a significant experiential learning context: individual players develop skills in the pursuit of goals, collaborate with each other to advance their theorizing about the game's mechanics, and display deep engagement and persistence in the face of frustration despite a lack of extrinsic rewards. Among the questions encountered in this course will be the following: What kind of understanding is built through game play? How might games teach us about ourselves as learners? In what ways might the skills involved in learning to play a game transfer to learning in other contexts? What pedagogical lessons might teachers take from game designers? Throughout the course, readings and activities will promote the rigorous critical analysis of both games and theories of learning.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L12 Educ 102B First-Year Seminar: Improving Student Success Through Psychological Interventions

One of the most exciting transformations in the social sciences in recent years is the finding that brief psychological exercises can improve important student outcomes for months and years, such as raising school achievement and reducing inequality. These interventions help individuals flourish and help our society live up to its ideals. They address critical psychological questions that people have, like the following: Do people like me belong in this school? Can I learn math? When will I ever use what I am learning in class? In this seminar, we will learn about psychological interventions in education; how they work;

how they can cause lasting benefits; their intellectual lineage; how they can be used, adapted, and scaled to address contemporary problems; and challenges and mistakes that can arise in doing so. In addition to learning from classic and contemporary research, students will design their very own intervention and workshop others' efforts. When students have completed this seminar, they will more fully understand the psychological aspect of educational problems and how this can be addressed through rigorous research.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L12 Educ 102C First-Year Seminar: Black Lives Matter and Educational Justice for Black Youth

In the wake of the global uprising against racial injustice, this introductory course examines how schools in the United States can create opportunities for Black youth to thrive. We will examine the schooling experiences of Black children and youth amid pervasive anti-blackness, analyze the relevance of educational models for racial justice, and imagine radical ways that P-16 schools might dismantle white supremacy.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L12 Educ 203A Introduction to Education: Contradictions and Controversies in School Choice

Drawing from social scientific perspectives, this course surveys educational research and policy in contemporary U.S. society. It considers the relationship among controversial policy issues (e.g., school choice, public school closure, urban redevelopment) and education. Finally, it examines the implications of recent changes in education for social inequality, mobility, and group relations.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L12 Educ 203B Introduction to Education: Disability Law, Policy, and Institutional Implications

This seminar is designed to provide students with a working knowledge of the laws and policies governing disabilities and how they impact governmental, social, economic, political, and educational institutions. This introduction to disabilities is provided from a legal perspective and will appeal to self-motivated students interested in learning more about how disability awareness might impact their everyday lives. Topics for discussion include IDEA, ADA, and Section 504 accommodations and how these laws apply to K-12 schools, higher education, immigration, housing, substance abuse, courts, employment, and access to public transit and public accommodations.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L12 Educ 203C Introduction to Education: Social Inequality, Development, & Early Childhood Education

Education begins long before children are introduced to formal schooling, and factors both internal and external to schools influence children's education. An understanding of the social, political, and economic contexts of families and schools is essential to understanding how social factors impact individuals. Race, class, health, and place exert influence on individual achievement and opportunity throughout the life course. This course will examine such factors as they relate to early developmental outcomes, school readiness skills, later academic achievement, and success in schooling. Course readings and activities will examine the influence of families, neighborhoods, the built environment and health on early childhood development and education and will offer corresponding implications for education policy. This course will examine the complex ecosystem of neighborhoods and schooling and will offer students a broad overview of these themes as we critically examine inequality and education in the United States.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L12 Educ 203D Introduction to Education: Immigrants, Refugees, and English Learners in U.S. Schools**

What is the distinction between immigrant, refugee, migrant, and newcomer students in schools? How are their needs similar, and how are they different? Although U.S. schools have historically served multilingual children, many have seen an increase in the racial, ethnic, and language backgrounds of the students they designate as English learners (ELs). As such, educators are still coming to understand how to best support this highly diverse group. In addition to clarifying distinctions between EL and student background classifications, this course will examine: federal, state, and local policies impacting immigrant and refugee student integration into schools, how school practices for several kinds of multilingual students vary, and how existing educational structures can better support designated EL students and their families.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L12 Educ 203E Introduction to Education: Myths and Mysteries of Memory**

In this course, we will learn about the science of memory and how it relates to education, broadly construed, by taking a tour through the many ways in which memory influences everyday life. We will cover topics like how to learn effectively, individual differences in memory ability, the effect of trauma on memory, why people are susceptible to misinformation, and how collective memories shape the way we remember history. In the process of learning about these topics and others, we will critically evaluate widely believed myths about memory, try to explain mysteries of memory, and explore the implications for education in formal and informal contexts. By gaining a better understanding of memory and how it works, you will acquire skills and knowledge that you can apply to your education and life more generally.

Credit 3 units. Arch: SSC Art: SSC BU: BA EN: S

---

**L12 Educ 203G Introduction to Education: Uncovering and Understanding Teachers and Teaching**

What makes someone a teacher; both in their profession and personal identity? In this course, many of the issues that challenge, shape and define the practice and identity of classroom teachers are explored. Goals of the course include demystifying teaching and exploring it as an intellectual act; one that requires the bridging of research and theory to practice, careful planning and attention to detail, comprehensive knowledge of diverse students, responsiveness to/creation of the learning environment, and authentic representation of one's teacher identity. Students will embrace the art of pedagogical exploration and curation to design a personalized teaching brand; one that authentically represents their teaching style, abilities, and identity, yet is flexible enough to evolve over time. Throughout the course, students will build new understandings and capabilities based on critical and engaging discourse, design-based practice, reflection, and engaging classroom activities.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L12 Educ 234 Introduction to Speech, Language, and Hearing Sciences**

This course provides an introduction to the fields of speech-language pathology, audiology, the education of hearing-impaired children, and speech and hearing sciences. Normal speech and hearing processes as well as communication disorders are discussed. Selected research topics in speech and hearing sciences will also be presented.

Credit 3 units. BU: BA, SCI EN: S

---

**L12 Educ 299 Internship in Education**

Students may receive up to 3 units of credit for an approved, faculty-sponsored internship that relates to the study and application of educational research. Credit is determined by the number of hours worked per the College of Arts & Sciences recommendations. Specific requirements -- which include but are not limited to completion of hours, an essay about the student's experience, and/or informational meetings with other faculty about the student's internship experience -- are set by the faculty supervisor in consultation with the supervisor in the organization where the internship work is completed. Students should complete a learning agreement provided by the department. Open to undergraduate majors and minors in the Department of Education only; register for the section assigned to the faculty supervisor. Prerequisites: completion of the Learning Agreement provided by the department and approval of faculty supervisor.

Credit variable, maximum 3 units.

---

**L12 Educ 301C The American School**

In this course we analyze the development of American schooling within the context of American social history. Our focus is on three general themes: the differing conceptions of schooling held by some American political, social, and cultural thinkers; the changing relationships among schools and other educational institutions such as the church and the family; and the policy issues and arguments that have shaped the development of schooling in America. We spend considerable time studying the history of schooling in relation to the enduring challenges and dilemmas of marginalized groups including but not limited to systemic racial inequalities, access to schooling and inequitable schooling experiences. Undergraduate students must enroll in Educ. 301C, while graduate students must enroll in Educ. 5001.

Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H

---

**L12 Educ 303 Gender and Education**

An examination of educational experiences, practices, and institutions across multiple levels (PK-university) using gender as a critical lens. Key topics include common beliefs, practices, and expectations related to gender in educational spaces, as well as the intersections between gender and other identities that may influence educational experiences and outcomes. Readings are drawn from multiple disciplines, including sociology, history, psychology, and philosophy. Students should be prepared to analyze their own gendered educational experiences in the context of the scholarship explored in the course, while also listening respectfully and reflecting on the experiences shared by classmates. Enrollment Note: Undergraduate students must enroll in Educ. 303, and graduate students must enroll in Educ. 5003.

Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC BU: BA EN: S

---

**L12 Educ 3030 Topics in JIMES: Education in Divided Societies- the Israeli Case**

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Same as L75 JIMES 390

Credit 3 units. A&S IQ: SSC Art: SSC BU: IS EN: S

---

**L12 Educ 304 Educational Psychology**

This is a course in psychological concepts relevant to education that is organized around four basic issues: (1) how humans think and learn; (2) how children, adolescents, and adults differ in their cognitive and moral development; (3) the sense in which motivation and intention explain why people act as they do; and (4) how such key human characteristics as intelligence, motivation, and academic achievement

can be measured. Offered fall and spring semesters. Enrollment Note: Undergraduate students must enroll in Educ. 304. Graduate students must obtain approval of instructor and their advisor before enrolling in Educ. 5004.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L12 Educ 3100 Guided Research in Composition: Theory and Pedagogy of One-to-One Writing Instruction.**

This course teaches theoretical and practical approaches to the tutoring of writing, specifically focusing on tutoring writing within the context of undergraduate courses. Students will learn collaborative methods of tutoring writing, explore different approaches to writing comments on student work in various content areas, and examine the connections between writing and thinking. Students in this course will analyze their own writing processes and learn how to help others through the writing and revision process. Readings and discussions will focus on writing theory and pedagogy, and students will practice one-to-one methods in mock conferences and with sample essays. Assignments: two short essays, a longer research paper and presentation, and a journal.

Same as L13 Writing 310

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L12 Educ 313B Education, Childhood, Adolescence, and Society**

This course examines the social and developmental experiences of children and adolescents at the national and international level. Readings will focus on the development of children and adolescents from historical, sociological, psychological, and political perspectives. Students will examine how both internal and external forces impact the developmental stages of children and adolescents. Students will investigate the issues that impact children and adults such as poverty, war, media, schooling, and changes in family structure. Students will explore some of the issues surrounding the education of children such as the effects of high quality preschool on the lives of children from low income families and the connection between poverty and educational achievement. Students will focus on the efficacy of the "safety nets" that are intended to address issues such as nutrition, health, violence, and abuse. Throughout the course, students will review and critique national and international public policy that is designed to address the needs of children and their families throughout the educational process. Undergraduates must enroll in Educ. 313B, while graduate students must enroll in 513B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L12 Educ 314 Sociolinguistics, Literacies, Schools, and Communities**

Literacy learning and development within a thriving community require attention to the linguistic, cultural, and economic diversity of students. Within an era of state standardization and accountability, it is imperative to use a systems approach in education that unites homes, schools, and communities. Differentiating instruction to meet the needs of all students, including English language learners and other traditionally marginalized groups of students, is essential. This course will introduce students to sociocultural theories of literacy across settings. It will prepare students to analyze how race, ethnicity, class, gender, and language influence the development of literacy skills. We will develop a multifaceted view of literacy that is embedded within culture and that acknowledges the influences of social institutions and conditions. We will incorporate strategies for individual student needs based on students' backgrounds and prior experiences to deliver differentiated instruction and to teach students to set learning goals. Offered in fall semester only. Undergraduate students must enroll in Educ. 314, while graduate students must enroll in Educ. 5114.

Credit 3 units. A&S IQ: HUM, SC, SD Art: HUM BU: BA EN: H

---

**L12 Educ 325 Psychology of Adolescence**

This course concentrates on brain, cognitive, and social development during adolescence. This period of development is marked by transition and change. Special topics will include the vulnerability of the adolescent brain and the development of sexual orientation. Prerequisite: Psych 100B.

Same as L33 Psych 325

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L12 Educ 3885 The Mental Health Crisis in Higher Education**

During the last decade, college campuses have seen unprecedented increases in the proportion of students suffering from mental health problems. Many institutions have responded by increasing the number of mental health counselors available in student health centers, making the accommodations at disability resource centers more robust, and providing safe spaces for students to process incidents and events that have triggered them. Are such interventions improving the well-being of today's students, or might they actually be further encumbering students' psychological health? This discussion-based course will explore arguments made on all sides of this provocative debate and examine research on the nature of today's college students and what resources and services most contribute to their psychological health and well-being. Enrollment is limited to 15 students. Prerequisite: at least 6 units of advanced home-based psychology courses.

Same as L33 Psych 3885

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L12 Educ 4000 Curriculum and Instruction for Secondary Teachers**

This course provides an in-depth look at secondary curricula and instructional practices in order to equip teacher candidates across a spectrum of disciplines with the knowledge and skill needed to implement meaningful teaching and learning in their future classrooms. By drawing from educational research in curriculum studies and related fields, students will examine the foundations of their discipline's curriculum, consider avenues for the implementation of culturally responsive pedagogy, and gain strategies for engaging contemporary issues facing secondary teachers (e.g. controversy, burnout). A strong emphasis will be placed on connecting with colleagues in different disciplines and exploring the possibilities for interdisciplinary instruction. Enrollment note: must be taken concurrently with content-specific lab [L12 400A/6001, 400D/600D, 400E/600E, 400L/600L, 400M/6006, 400S/600S, or 40SS/60SS] unless approved by Director of Teacher Education. Undergraduate students must enroll in Educ. 4000, while graduate students must enroll in Educ. 6000

Credit 2 units. A&S IQ: HUM EN: H

---

**L12 Educ 400A Curriculum and Instruction in Art K-12**

This course provides hands-on practice for K-12 teacher candidates in art curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Enrollment note: must be taken concurrently with L12 4000/6000 and L12 5007 unless approved by the Director of Teacher Education. Undergraduate students must enroll in Educ. 400A, while graduate students must enroll in Educ. 6001.

Credit 2 units.

---

**L12 Educ 400D Curriculum and Instruction in Dance K-12**

This course provides hands-on practice for K-12 teacher candidates in dance curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and

facilitating learning activities for fellow students. Enrollment note: must be taken concurrently with L12 4000/6000 unless approved by the Director of Teacher Education. Undergraduate students must enroll in Educ. 400D, while graduate students must enroll in Educ. 600D. Credit 2 units.

---

#### **L12 Educ 400E Curriculum and Instruction in Secondary English**

This course provides hands-on practice for secondary teacher candidates in English curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Enrollment note: must be taken concurrently with L12 4000/6000 and L12 4451/6451 unless approved by the Director of Teacher Education. Undergraduate students must enroll in Educ. 400E, while graduate students must enroll in Educ. 600E. Credit 2 units.

---

#### **L12 Educ 400L Curriculum and Instruction in World Languages K-12**

This course provides hands-on practice for K-12 teacher candidates in world language curriculum, including French, German, Japanese, Latin, Mandarin Chinese, Russian, and/or Spanish, regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Note: must be taken concurrently with L12 4000. Undergraduate students must enroll in Educ. 400L, and graduate students must enroll in Educ. 600L. Credit 2 units.

---

#### **L12 Educ 400M Curriculum and Instruction in Secondary Mathematics**

This course provides hands-on practice for secondary teacher candidates in mathematics curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Enrollment note: must be taken concurrently with L12 4000. Undergraduate students must enroll in Educ. 400M, while graduate students must enroll in Educ. 600E. Credit 2 units.

---

#### **L12 Educ 400S Curriculum and Instruction in Secondary Science**

This course provides hands-on practice for secondary teacher candidates in science curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Enrollment Note: must be taken concurrently with L12 4000. Undergraduate students must enroll in Educ. 400S, and graduate students must enroll in Educ. 600S. Credit 2 units.

---

#### **L12 Educ 4014 Urban Education in Multiracial Societies**

This course offers students an analysis of the historical development and contemporary contexts of urban education in English-speaking, multiracial societies. It examines legal decisions, relevant policy decisions, and salient economic determinants that inform urban systems of education in Western societies including, but not limited to, the United States, Canada, Great Britain, and South Africa. The

course draws on quantitative, qualitative, and comparative data as an empirical foundation to provide a basis for a cross-cultural understanding of the formalized and uniform system of public schooling characteristic of education in urban settings. Given the social and material exigencies that shape urban school systems in contemporary societies, special attention is given in this course to the roles of migration, immigration urbanization, criminal justice, industrialism, de-industrialism, and globalization in shaping educational outcomes for diverse students in the aforementioned settings. Prerequisite: Junior standing or permission of instructor. Same as L18 URST 400

Credit 3 units. A&S IQ: SSC, WI EN: S

---

#### **L12 Educ 4022 Higher Education Administration for Social Justice & Equity: Achievable or Only Dreamable?**

Higher education has long been the subject of much general public interest and discourse. Understanding the complexity of the system, its history, practices, and expertise will help define whether and how campuses can work toward social justice and equity. In this course, students will study the history, policies, and organizational decisions that underly the current state of higher education in America. These perspectives and theories will be studied with an eye toward social justice and understanding possible changes that may lead toward equity on American college campuses. Through engaged discussions around readings and case studies, students will tackle complex social questions, including: how our college campuses became so complex? Why pervasive social issues, such as system racism, sexism, and classism, continue to exist on our campuses? How and when technology and the SAT/ACT began to rule our lives in college? Perhaps even deeper, students will grapple with finding alternate, more socially just, and equitable alternatives to create more equity on our campuses. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: Undergraduate students must enroll in Educ. 4022, and graduate students must enroll in Educ. 5222.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

---

#### **L12 Educ 4023 Second Language Acquisition & Technology**

This seminar for undergraduate and graduate students will transform research and theory about second-language acquisition into practice while focusing on technology-driven applications. The course fosters professional development as participants formulate critical skills for evaluating, creating, and integrating technology into the language classroom and other language learning contexts, including business, engineering, and law. Course formats include readings, discussions, and demonstrations with technologies. The course counts for the minor in applied linguistics, the PhD in applied linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors. Same as L92 APL 4023

Credit 3 units. A&S IQ: SSC EN: S

---

#### **L12 Educ 403 Foundations of Educational Research**

Educational researchers in today's world use an interdisciplinary toolbox of approaches to examine the complex issues facing today's students, teachers, educating institutions, and communities. Providing an introduction to the basic concepts, philosophies, and kinds of methodologies used in educational research, this course will examine research designs such as experiments, surveys, mixed methods, ethnography, and action research. Students will be required to analyze

the strengths, weaknesses, and limitations of each. Furthermore, the course is devoted to understanding the importance of identifying a research problem, the literature review, research questions, and the alignment with appropriate methodologies (quantitative, qualitative, or mixed methods) in responding to the research inquiry. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: Undergraduate students should register for Educ. 403, while graduate students should register for Educ. 503

Credit 3 units. A&S IQ: SSC EN: S

---

### **L12 Educ 4033 Video Microanalysis: Methods and Tools**

The purpose of this course is to explore video microanalysis as a methodological tool for studying and valuing unconscious aspects of culturally diverse settings. Utilizing social cultural theoretical lens, this type of analysis will reveal fleeting actions, subtle movements, peripheral events, and non-verbal communication that are not easily identified in real time viewing. Specifically we may look at facial expressions, direction of gaze, hand movements, body position, and use of material resources as micro techniques to expand our capacity to explore minute aspects and alternative interpretations of social interactions. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor.

Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC EN: S

---

### **L12 Educ 4036 Children of Immigrants: Identity and Acculturation**

This seminar takes an interdisciplinary approach to children of immigrants as an analytical subject. The course texts are in sociology, anthropology, and cultural studies, and a significant number of our case studies focus on 1.5- and second-generation Asian Americans and Latinx. Identity and identity politics are main topics; in addition, the course will critically examine theories on acculturation and assimilation. Our discussions cover a wide range of topics from culture, ethnicity, and race, to bilingualism, education, family, school, ethnic community, and youth culture. Students are required to conduct an individual research project among a selected group of children of immigrants. Attendance on the first day of class is mandatory to reserve class enrollment.

---

### **L12 Educ 404 Study for Honors**

A research program arranged by the student and a faculty member. Prerequisite: recommendation for Honors study.

Credit 3 units. EN: S

---

### **L12 Educ 4052 Educational Psychology: A Focus on Teaching and Learning**

How should research in educational psychology inform teaching in contemporary schools - and how might the lived experience of professional educators in turn inform research in educational psychology? This class uses the reciprocal relationship between educational theory and practice to examine key issues in teaching and learning in contemporary school settings. Throughout, students will gain greater familiarity with topics influencing the pedagogical decision-making of teachers, from everyday topics (e.g. differentiation, classroom management, developmental appropriateness, etc.) to topics gaining ground in contemporary education (e.g. culturally responsive pedagogy, trauma-informed pedagogy, poverty-informed pedagogy, etc.). By engaging with substantive texts representing diverse perspectives, students will become more comfortable navigating scholarly research on teaching and learning in school settings, including distinguishing between multiple forms of scholarship (e.g. qualitative and quantitative studies, action research, self-study, portraiture, etc.) and other forms of writing about education (e.g.

memoirs, advice based on personal experience, op-eds by thought leaders, etc.). Students will also theorize about reasons for gaps between educational research and practice by drawing on their knowledge of the sociocultural, political, and historical contexts of schooling. Ultimately, students will become more able to articulate their reasoned perspectives as emerging professionals regarding best practices for meaningful teaching and learning in school settings. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: All students are enrolled onto the waitlist. Priority is given to Teacher Education majors, prospective Teacher Education majors, and majors/minors in Educational Studies. Undergraduate students must enroll in Educ. 4052, and graduate students must enroll in Educ. 6052

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

### **L12 Educ 4053 Early Field Experience**

This course offers students an informed look at schooling in America and is designed for current teachers, prospective teachers (those considering a Teacher Education major), and for those simply interested in furthering their understanding of classroom interaction and the fundamental principles of teaching and learning. Students will be able to plan lessons and activities that address student's prior experiences, multiple intelligences, strengths, and needs to positively impact learning. This course provides direct and indirect experiences with contemporary K-12 educational practice in schools through 30 clock hours of field observation to be completed during the semester. Students will observe the daily life of teachers and their interactions with children and adolescents, with the dual goal of understanding the professional nature of the setting (i.e. pedagogical decision-making processes, expectations and requirements for teachers, institutional functioning, etc.) and being an active participant in a K12 classroom setting. Assignments will include, but are not limited to, observation notes, discussions with class members, and evaluation and design of instructional strategies and learning activities. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: All students are enrolled onto the waitlist. Priority is given to Teacher Education majors, prospective Teacher Education majors, and majors/minors in Educational Studies. Students must complete their 30 clock hours outside of class in school settings assigned by the WUSTL Department of Education Field Placement Specialist. Undergraduate students must enroll in Educ. 4053 and graduate students must enroll in Educ. 6053

Credit 1 unit. A&S IQ: SSC Arch: SSC Art: SSC EN: S

### **L12 Educ 4055 Central Topics in Psychological Research on Teaching and Learning**

This course will focus on how theory and research in psychological science and other related disciplines can inform teaching and learning in a variety of educative contexts. Each week, we will delve into research on a new set of issues that all revolve around a particular theme, such as pedagogical methods, motivation, student characteristics, assessment of learning, evaluation of teaching effectiveness, and educational technology. In addition to analyzing theory and research, we will discuss implications for educational practice and policy with an emphasis on designing interventions and fostering innovation. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: Undergraduate students must enroll in Educ. 4055 and graduate students must enroll in Educ. 5555

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

---

### **L12 Educ 408 Education and Psychology of Exceptional Children**

Learning, psychological, cognitive and social characteristics of exceptional children and youth from gifted to those with disabilities. Study child and adolescent developmental stages and the application to educational settings through data-based decision making using assessment and student data in a critical thinking, problem

solving team approach. Current practices of educational strategies, interventions, and modifications to differentiate instruction for individual learning needs are emphasized. Plan lessons and activities that address student's prior experiences, multiple intelligences, strengths, and needs to positively impact learning. Learn specific strategies for classroom management, consultation and collaboration with families, colleagues, and administrators to meet individual needs within a culturally and demographically diverse classroom. Influences of legislation, criteria used to identify children, and awareness of supportive services are explored. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: All students are enrolled onto the waitlist. Priority is given to Teacher/Deaf Education majors, prospective Teacher Education majors, and majors/minors in Educational Studies. Undergraduate students must enroll in Educ. 408 and graduate students must enroll in Educ. 6008.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

### L12 Educ 4080 Slavery and Public History

Public history, or applied history, encompasses the many and diverse ways in which history is put to work in the world and applied to real-world issues. This course teaches public history practice with particular emphasis on engaging in the public history of slavery through research and interpretation on the regional histories of enslavement within St. Louis and at Washington University. Students will learn by engaging critical scholarship on public history, debates about how public history is practiced, and learning core tenets of public history interpretation, museum best practices, oral history, preservation, and material culture and their particular application to public history interpreting slavery. This includes grappling with the politics of memory and heritage that shape, limit, and empower public history practice on slavery, and how white supremacy has shaped what histories we absorb in the public. Same as L90 AFAS 4008

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM EN: H

### L12 Educ 40SS Curriculum and Instruction in Secondary Social Science

This course provides hands-on practice for secondary teacher candidates in social science curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Enrollment note: must be taken concurrently with L12 4000/6000 unless approved by the Director of Teacher Education. Undergraduate students must enroll in Educ. 40SS, while graduate students must enroll in Educ. 60SS.

Credit 2 units.

---

### L12 Educ 4111 Linguistics and Language Learning

This course, taught in English, is a foundation for students who will work with linguistically and culturally diverse people in the USA and around the world, whether this work is in the courtroom, hospital, classroom, office and more. The class will help prepare students for the diverse range of twenty-first century occupations that have language and linguistics at their center, including machine learning and translation studies. The class utilizes a survey format and covers both internal and external factors related to language acquisition and language use, such as language and the brain, language aptitude, age, gender, memory, prior knowledge, etc. Theoretical and research dimensions of both linguistics and foreign / second language learning are treated. Corresponding implications of the readings focus on action- on making decisions for language policies and debates around the world that are informed by linguistic and language knowledge. The course is required for the minor in applied linguistics, the PhD in

Applied Linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors such as Global Studies and Educational Studies. Prereq: Ling 170 is recommended but not required.

Same as L92 APL 4111

### L12 Educ 4280 History of Urban Schooling in the United States

More than ever, schooling in urban areas is researched, and it is at the center of debates for improving U.S. schooling. This course, which is framed by contemporary issues, focuses on the history of urban schooling and policy to deepen our understanding of the contemporary landscape. We will focus on particular cities and their school districts; these may include New York, Boston, Chicago, Detroit, St. Louis, Los Angeles, San Francisco, and Atlanta. In this course, students will develop a strong contextual understanding of the conditions of urban schooling; the history of urban school reform; and the debates over the purposes of urban schools, past and present. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L12 Educ 4288 History of Higher Education in American Culture

This course will examine the historical and philosophical development of higher education from colonial to contemporary periods including the histories of minoritized individuals and campus types. Throughout the semester, we will learn how history continues to impact the way we run and organize our campuses today. This course concludes with an exploration of current social, political, and economic challenges in higher education and current public debates regarding contentious topics in higher education. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: Enrollment limited to juniors, seniors, and graduate students. Undergraduate students must enroll in Educ. 4288 and graduate students must enroll in Educ. 5288

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H

---

### L12 Educ 4289 Neighborhoods, Schools, and Social Inequality

A major purpose of the course is to study the research and policy literature related to neighborhoods, schools and the corresponding opportunity structure in urban America. The course will be informed by theoretical models drawn from economics, political science, sociology, anthropology, education and law. A major focus is to gain greater understanding of the experiences and opportunity structure(s) of urban dwellers, in general, and urban youth, in particular. While major emphasis will be placed on data derived from the interface of urban environments and the corresponding institutions within them, the generational experiences of various ethnic groups will complement the course foci. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: All students are enrolled onto the waitlist. Priority is given to Department of Education majors, minors, and graduate students. Undergraduate students must enroll in Educ. 4289 and graduate students must enroll in Educ. 5289

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

---

### L12 Educ 4302 Cognitive Psychology Applied to Education

This course is intended to cover topics in the cognitive psychology of human memory, conceptual learning, and comprehension with special focus on areas, theory, and research that have potential application to education. Thus, the course will provide selective coverage of theoretical and empirical work in cognitive psychology that provides potential to inform and improve educational practice. The applicability of these themes will be explicitly developed and evaluated through the primary research literature using educationally oriented experimental

paradigms. The course is expected to be of interest and benefit to education majors and to psychology majors interested in cognitive psychology and its applications. PREREQ: Junior/Senior status, 9 units in Psychology and Psych 100B OR Junior/Senior status, 9 units in Education and Psych 100B.  
Same as L33 Psych 4302  
Credit 3 units. A&S IQ: SSC EN: S

### L12 Educ 4310 Sociology of Higher Education

What we call "higher education" in the United States is a complex web of institutions - nearly 3,000 4-year colleges, 1,500 2-year colleges, and still more postsecondary institutions that grant a variety of credentials. It is a system through which tens of millions of students pass each year; over the last few decades, the importance of earning a postsecondary credential has increased markedly. As such, higher education is deserving of rigorous scrutiny and careful interrogation. But in studying "higher education," we are in fact attending to a multitude of things - among other things, varied institutional types with different resources and different imperatives, experiences of accessing and navigating higher education that are widely divergent along axes of inequality, and institutional processes that play out on campus but have resonance beyond the university gates. In this course, which will be conducted as a discussion-based seminar, we will engage with texts examining the enterprise of higher education from varied vantage points, but always through a sociological lens. We'll discuss why and how higher education came to be so important and loom so large in contemporary life, the stark differences between different sectors of the higher education landscape, and how stratification occurs between and within institutions. We'll talk at length about how higher education is a microcosm of many of the inequalities we see in the broader society, looking at issues of race, class, gender, and politics on campus. By taking a sociological lens to studying higher education, we'll learn a language and facility for rooting discussion of issues in higher education in theoretical grounding and empirical evidence. In so doing, students will develop the capacity to more critically assess research and public discourses on higher education, as well as their own work and experiences in the sector. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: Undergraduate students must enroll in Educ. 4310, and graduate students must enroll in Educ. 5310.

Credit 3 units. A&S IQ: SSC, SC EN: S

---

### L12 Educ 433 Complex Learning in Education

This course will focus on psychological research and theory pertaining to higher-order learning. Each week, we will delve into a different topic, such as memory, transfer of learning, analogical reasoning, conceptual change, metacognition, and problem solving. Prerequisite: Junior standing or L12 304.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

---

### L12 Educ 433W Complex Learning in Education

This course will focus on psychological research and theory pertaining to higher order learning. Each week, we will delve into a different topic such as memory, transfer of learning, analogical reasoning, conceptual change, metacognition, and problem-solving. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor.

Credit 3 units. A&S IQ: SSC, WI BU: BA EN: S

---

### L12 Educ 4451 Teaching Writing in School Contexts

Writing teachers often know how to write well but less about the teaching of writing. To provide effective instruction in writing, teachers need, first of all, experiences with writing instruction and theoretical knowledge to guide classroom practices. The goals of this course are as follows: to provide opportunities for all teachers of English and

language arts, to develop theoretical knowledge and skill as teachers of writing, to connect the practices of research and teaching, to encourage teachers to give their students multiple and varied experiences with writing, to assist teachers in learning to respond to students' writing and assess their progress as writers. Offered Fall semester. Enrollment note: Undergraduate students must enroll in Educ. 4451, while graduate students must enroll in Educ. 6451.

Credit 3 units. A&S IQ: SSC EN: S

---

### L12 Educ 4511 Race, Ethnicity, and Culture: Critical Qualitative Understandings of Urban Education

This course examines educational institutions as spaces where children are asked to comply to the norms, expectations, and values of the culture of power. We will study how forces -- such as de facto segregation, the disproportionate hyper-disciplining of students, punitive school climates, and the devaluing of certain forms of cultural and social capital -- can contribute to cycles of social reproduction among the marginalized. To address such challenges, this course introduces sociocultural theories and critical qualitative inquiry methods as mechanisms by which urban educational institutions can be positively transformed. Specifically, restorative practices, cogenerative dialogues, and participatory/co-researcher models are explored as methods that honor the voices of marginalized stakeholders and lead to catalytic, transformational impact. Leaving this course, students will have an understanding of the inequitable terrain of urban education institutions as well as a repertoire of theories and methods to assist with the conducting of critically grounded, culturally responsive, humane, and transformative research. In addition to lectures, readings, discussions, films, and actual classroom footage, students will conduct a school experience project to practice using the theories and methods introduced in this course. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: Enrollment is limited to juniors, seniors, and graduate students. All students are enrolled onto the waitlist. Priority is given to Department of Education majors, minors, and graduate students. Undergraduate students must enroll in Educ. 4511, and graduate students must enroll in Educ. 5511.

Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC BU: BA EN: S

### L12 Educ 453B Sociology of Education

There are few institutions that nearly all Americans pass through, and schools are one of them; around fifty million students are enrolled in preK-12 schooling in the United States. As such, schools are an institution deserving of rigorous scrutiny and careful interrogation. But in studying K-12 schools, we are in fact attending to a multitude of things - competing visions of and purposes for schools, and disparate experiences of accessing and navigating education that are widely divergent along axes of inequality. In this course, which will be conducted as a discussion-based seminar, we will engage with texts examining the enterprise of education from varied vantage points, but always through a sociological lens. We'll discuss the varied purposes theorists and practitioners envision for schools, and the extent to which schools live up to those ideals. We'll talk at length about how schools are a microcosm of many of the inequalities we see in the broader society, looking at issues of race, class, gender, and place. By taking a sociological lens to studying education, we'll learn a language and facility for rooting discussion of issues in education in theoretical grounding and empirical evidence. In so doing, students will develop the capacity to more critically assess scholarly research and public discourses on education, as well as their own experiences. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: All students are enrolled onto the waitlist. Priority is given to Department of Education majors, minors, and graduate students. Undergraduate students must enroll in Educ. 453B and graduate students must enroll in Educ. 5530

### **L12 Educ 459F Philosophies of Education**

An analysis of perennial themes in the philosophy of education, with particular attention to implications arising from the uneven distribution of power in an inequitable society. Significant questions to be examined include: What constitutes a truly democratic form of education? How might our answers change when we approach this question in light of the history of race in the American experience? How should teachers dedicated to a liberatory practice approach both their content and their students? Which theories of knowledge might help us envision new possibilities for teaching and learning? Readings will address both K-12 and higher education spaces while drawing on a diverse range of historical and contemporary thinkers. Seminar format. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: All students are enrolled onto the waitlist. Priority is given to Department of Education majors, minors, and graduate students. Undergraduate students must enroll in Educ. 459F and graduate students must enroll in Educ. 5590

### **L12 Educ 461B Construction and Experience of Black Adolescence**

This course examines the construct of black adolescence from the general perspectives of anthropology, sociology, and psychology. It begins by studying the construct of black adolescence as an "invention" of the social and behavioral sciences. The course then draws upon narrative data, autobiography, literature and multimedia sources authored by black youth to recast black adolescence as a complex social, psychological, cultural and political phenomenon. This course focuses on the meaning-making experiences of urban-dwelling black adolescents and highlights these relations within the contexts of class, gender, sexuality, and education.

### **L12 Educ 462 Politics of Education**

In this course, politics is interpreted broadly to include both formal policy-making processes and any situation in which people have to solve a problem or come to a decision. The purpose of this course is to explore the following processes: (1) how ideologies and power dynamics influence educational policies and decisions; (2) how educational policies and decisions translate into specific school

programs and practices; (3) how specific programs and practices influence pedagogies, especially in the relationships among students, teachers, and knowledge pedagogies; (4) how these pedagogies impact student opportunities and outcomes; and (5) how student outcomes and opportunities reinforce ideologies and power dynamics. This course considers politics across time, space, and individuals, noting how historical, geographical, cultural, social, psychological, political, and economic contexts can shape the politics of education. In addition, as this course considers the relationship between politics and power, we explore how politics can manifest itself in ways that promote exclusion and subjugation or work toward the common good. Finally, after carefully examining the research on inequalities and inefficiencies resulting from the current politics of education, we will transition from problem identification (i.e., "What went wrong?") to problem solution (i.e., "Where do we go from here?"). Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: All students are enrolled onto the waitlist. Priority is given to Department of Education majors, minors, and graduate students. Undergraduate students must enroll in Educ. 462, and graduate students must enroll in Educ. 5620.

### **L12 Educ 4621 The Political Economy of Urban Education**

Defining a political economy of urban education involves the examination of power and wealth and the manner in which they operate in urban settings. It requires analysis of the larger urban social and economic context and consideration of historical forces that have brought the schools to their present state. In this course, we consider various political and economic factors that have influenced and shaped urban education in the United States, drawing upon the extant literature on urban education and related social science disciplines to characterize and discuss them. A particular focus of this course will be on the dynamic interrelationships among the political economy, urban education, and social stratification. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: Undergraduate students must enroll in Educ. 4621, while graduate students must enroll in Educ. 5622

Credit 3 units. A&S IQ: SSC, SC Arch: SSC Art: SSC EN: S

---

### **L12 Educ 466 Mathematics for Elementary School Teachers**

A review of mathematics for grades K-8, at a level beyond its usual presentation in the schools. The purpose of this course is to ensure that teachers have the necessary foundation to teach mathematical concepts and problem solving at the elementary level. Applications of all essential mathematical concepts are presented in abundance, along with methods and strategies for instruction at the elementary level. Restricted to elementary education students, except with approval of the Director of Teacher Education. Prerequisite: two years of high-school mathematics and admission to the Teacher Education program or permission of instructor. Offered Fall semester. Enrollment note: Undergraduate students must enroll in Educ. 466, while graduate students must enroll in Educ. 6660

Credit 3 units. A&S IQ: NSM

---

### **L12 Educ 4681 Teaching Reading in the Elementary School**

This course, emphasizing emergent literacy and children's literature, is the first in a sequence of three courses on teaching reading and writing. The purposes of this course are to survey children's acquisition of oral and written language from an emergent literacy perspective, to focus on methods of teaching beginning reading, to develop uses of children's literature in a reading program. Offered Fall semester. Enrollment note: Undergraduate students must enroll in Educ. 4681, while graduate students must enroll in Educ. 6681.

Credit 3 units. A&S IQ: HUM EN: H

---

**L12 Educ 4692 Reading Across Languages and Cultures: Theory, Research, and Practice**

The United Nations has declared that literacy is a fundamental human right. This course, which is taught in English, connects to the mission of UNESCO and examines the wide range of theoretical and research issues -- both historical and current -- related to reading and writing across languages and cultures. Literacy acquisition among second-language learners involves a number of variables, including both cognitive and social factors. Topics to be discussed include universal cognitive operations, individual learner differences, text types and literary forms, literacy and social power, and the extent to which reading and writing are interrelated. Students will discuss how to bridge scientific research in the laboratory to practice, and they will be involved in St. Louis community outreach projects with refugees and immigrants at the International Institute, where they will create and implement reading and writing activities driven by theory and empirical investigations. Students will take the theory and research they learn, and they will help meet the local reading and writing needs of a changing population with a variety of backgrounds, values, and educational preparations. The course is required for the minor in applied linguistics, the PhD in applied linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors, such as Global Studies and Educational Studies.

---

**L12 Educ 470 Language, Learning, and Instruction**

This course, which emphasizes children's writing and literacy issues, is the second of three courses in a sequence on teaching reading and writing. The course reviews and elaborates on work from previous courses on children's acquisition of written language; examines approaches to teaching writing; and focuses on work from sociological, feminist, and philosophical perspectives to affirm and criticize aspects of these approaches. Prerequisite: Educ 4681. Enrollment Note: Undergraduate students must enroll in Educ. 470, and graduate students must enroll in Educ. 670.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L12 Educ 4700 History Education In & Beyond the Classroom**

Far from requiring students to merely memorize names and dates, the work of history education rests on a robust theoretical foundation that urges complex cognitive skills. This course is intended to help students form a strong grasp of major issues in history education, including its underlying conceptualization of knowledge and related disciplinary habits of mind, instructional methods aimed at handling controversy with sensitivity toward students' contemporary identities, and sociocultural forces that exert pressure on professional communities and curricula alike. While this course is of special interest to students with an interest in teaching history (whether in higher education, at the K-12 level, or at a museum or historic site), admission to the teacher education program is not a prerequisite for entry. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: Undergraduate students must enroll in Educ. 4700, while graduate students must enroll in Educ. 6700

Credit 3 units. A&S IQ: HUM EN: H

---

**L12 Educ 4731 Elementary School Mathematics**

This course introduces fundamental concepts, properties, operations, and applications of mathematics related to the systems of whole numbers, integers, rational numbers, and real numbers. Also included are measurement, simple geometry, probability, and logical reasoning. The course is designed to help students develop effective teaching strategies and approaches to curriculum development in mathematics. It addresses components of effective curriculum that are aligned with

learning experiences and outcomes using the academic language of mathematics. It incorporates strategies for individual student needs based on diverse backgrounds, prior experiences, and language to deliver differentiated instruction, and it teaches students to set learning goals. Students will develop strategies to engage their students in methods of inquiry and research, with interdisciplinary approaches where appropriate. They will learn research-based models of critical thinking and problem-solving, including various instructional strategies and technologies to support student engagement in higher-level thinking skills. Students will use formal and informal assessments to design instruction and improve learning activities, and these will be followed by assessment analysis to determine the effect of class instruction on individual and whole-class learning. They will understand strategies to communicate confidential student data and progress in accordance with ethical and legal protocols. Prerequisite: EDUC 466 and admission to the teacher education program or permission of instructor. Enrollment Note: Undergraduate students must enroll in Educ. 4731, and graduate students must enroll in Educ. 6731.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L12 Educ 4741 Elementary Science: Content, Curriculum, and Instruction**

This course focuses on key concepts appropriate for elementary school science and health instruction. A repertoire of effective teaching strategies and approaches to curriculum development are presented. Prerequisite: Admission to the teacher education program or permission of instructor. Offered spring semester. Enrollment Note: Undergraduate students must enroll in Educ. 4741, and graduate students must enroll in Educ. 6741.

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

---

**L12 Educ 4751 Elementary Social Studies: Content, Curriculum, and Instruction**

Introduction to key concepts in social studies, including economics and geography. Repertoire of effective teaching strategies and approaches to curriculum development in all areas of social studies. Prerequisite: admission to teacher education program or permission of instructor. Offered spring semester. Enrollment Note: Undergraduate students must enroll in Educ. 4751, and graduate students must enroll in Educ. 6751.

Credit 2 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L12 Educ 4771 Arts and Aesthetics: A Means of Communication**

Methods and materials for integrating the arts and aesthetics into the elementary classroom are discussed. Emphasis is on art, music, and oral communication as well as curricula in movement. Prerequisite: Admission to teacher education program or permission of instructor. Offered spring semester. Enrollment Note: Undergraduate students must enroll in Educ. 4771, and graduate students must enroll in Educ. 6771.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM EN: H

---

**L12 Educ 481W History of Education in the United States**

Examines education within the context of American social and intellectual history. Using a broad conception of education in the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, work place, and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas, and practices that have shaped American educational policy in different periods of our history. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: All students will be enrolled onto the waitlist. Because this is a

writing intensive course, enrollment will most likely be 12-15 students. Enrollment preference will be given to students who are majoring/minoring in Educational Studies, Teacher Education, History, American Culture Studies, and Children's Studies and to students needing to complete their Writing Intensive requirement. Instructor will e-mail students about enrollment. Undergraduate students must enroll in Educ. 481W, and graduate students must enroll in Educ. 5810.  
Credit 3 units. A&S IQ: HUM, SC, SD, WI BU: BA, HUM EN: H

---

**L12 Educ 4821 The Teaching-Learning Process in the Secondary School**

Secondary teacher education majors are required to take this teacher-learning course during the spring semester in which student teaching is completed. The course focuses on the study, practice, and analysis of generic teaching strategies and skills needed to meet the needs of all students. Topics include classroom management, lesson planning, instructional and ethical decision making, and strategies for presenting clear explanations, asking effective questions, conducting productive discussions, reaching students with different learning styles/abilities/cultural backgrounds, and using cooperative learning groups. Prerequisite: Admission to the teacher education program. Corequisites: Educ 492 or Educ 494; and Educ 5681. Enrollment Note: Undergraduate students must enroll in Educ. 4821, and graduate students must enroll in Educ. 6821.  
Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC EN: S

---

**L12 Educ 4831 The Teaching-Learning Process in the Elementary School**

This course focuses on four broad areas: (1) self-awareness and human relations; (2) instructional and behavioral management strategies; (3) the development of curriculum and the analysis of instruction; and (4) social, political, and legal issues affecting the classroom. Topics include teacher-pupil relationships, assessment of pupil progress, curriculum development, instructional technology, and school organization. Course discussion and study further develop knowledge in a variety of areas that are experienced during student teaching, such as the refinement of pedagogy strategies and skills; the Missouri Educator Evaluation System (MEES) for certification; understanding diverse cultural perspectives of English language learners and how to select appropriate strategies for addressing individual needs in meeting curriculum objectives; incorporating strategies for individual student needs based on diverse backgrounds and prior experiences to deliver differentiated instruction; creating a positive learning environment through effective classroom management using strategies based on research and pedagogically sound techniques; developing reflective practices to improve teaching while understanding the importance of utilizing professional learning opportunities in school districts and professional organizations; understanding the importance of communication, professional relationships, and collaboration with teachers, administrators, families, and the community; and understanding the nature of professional, ethical behavior and the need to adhere to district policies and school procedures. Prerequisite: Admission to the teacher education program. Corequisites: Educ 470 and Educ 4911. Enrollment note: Undergraduate students must enroll in Educ. 4831, while graduate students must enroll in Educ. 6831.  
Credit 3 units. A&S IQ: SSC, WI EN: S

---

**L12 Educ 4833 Leadership in Student Affairs**

This course provides an overview of the field of student affairs; its related functional areas; role in higher education in the United States; and current issues faced by practitioners. In the context of this course student affairs is defined as those programs, services, and activities designed to recruit, retain, support, and develop students in college. This course concentrates on the leadership roles within student affairs in higher education institutions across the United States. Leaders in student affairs are regularly challenged to respond to the current and

emerging needs of students, as well as to expectations from various stakeholders: faculty, boards of trustees, alumni, community members, and the government, as to the priorities for the student experience in higher education. Successful student affairs leadership requires the ability to understand the context of student affairs work including how and why student affairs emerged as an organizational entity within higher education; the critical issues faced by student affairs practitioners; and the various administrative functional areas that typically exist within the portfolio defined as student affairs on a college campus. This course is designed to provide students with an overview of student affairs as an entity from both an historical and contemporary lens; introduce students to the literature in the field and examine various theoretical frameworks related to the student experience in higher education; strengthen understanding of the standards that guide student affairs practice; and explore leadership theories and practices to apply to the review of the critical student affairs issues and strengthen student understanding of their own leadership styles in preparation for possible careers in higher education. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: Undergraduate students must enroll in Educ. 4833, and graduate students must enroll in Educ. 5833.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC

---

**L12 Educ 4841 Elementary Methods Field Experience**

This course involves the application and analysis of specific content area methods and strategies in an elementary school classroom. Prerequisite: Admission to the teacher education program. Elementary teacher education majors are required to take this course during the spring semester before the year in which student teaching is completed. Offered spring semester. Enrollment Note: Undergraduate students must enroll in Educ. 4841, and graduate students must enroll in Educ. 6841.

Credit 2 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L12 Educ 4843 Field Experience Seminar**

This course guides students through a field experience in a middle or secondary public school. Fifty hours of observation are required for each student; these hours involve observing and documenting classroom environment characteristics, professional teacher behaviors, and student behaviors; working with students individually and/or in small groups; preparing and teaching a lesson; and learning classroom technologies such as SMART Board and digital video recording and editing. Course topics, observation, and discussion include understanding diverse cultural perspectives of English language learners and how to select appropriate strategies for addressing individual needs in meeting curriculum objectives; incorporating strategies for individual student needs based on diverse backgrounds and prior experiences to deliver differentiated instruction; creating a positive learning environment through effective classroom management using strategies based on research and pedagogically sound techniques; developing reflective practices to improve teaching while understanding the importance of utilizing professional learning opportunities in school districts and professional organizations; and understanding the importance of communication, professional relationships, and collaboration with teachers, administrators, families, and the community as well as the nature of professional, ethical, and legal behavior and the need to adhere to district policies and school procedures. Prerequisite: Admission to the teacher education program. Corequisites: Educ. 4000/6000 + 400A/6001, 400D/600D, 400E/600E, 400L/600L, 400M/6006, 400S/600S, or 40SS/60SS unless approved by the Director of Teacher Education. Undergraduate students must enroll in Educ. 4843, while graduate students must enroll in Educ. 6843  
Credit 3 units. A&S IQ: SSC EN: S

---

**L12 Educ 489 Education and Public Policy in the United States**

This course takes a triangulated approach to the field of public policy as it relates to education and social problems. First, the course emphasizes theories of public policy that frame the field of policy studies. Second, the course emphasizes the skills related to the exercise of policy analysis. Third, this course simulates the policymaking context through students' participation in mock congressional testimonies. Educational opportunity, achievement inequality, and social change will be the primary interests that link these course features. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Credit 3 units. A&S IQ: SSC Art: SSC EN: S UColl: ACS

---

**L12 Educ 4911 Student Teaching in the Elementary School**

This course encompasses a supervised teaching experience as well as group meetings and individual conferences. Emphasis is on the integration of theory/practice and reflections on teaching. Prerequisite: Admission to the teacher education program. Graduate students must register for satisfactory/unsatisfactory grading; undergraduates must register for pass/fail grading. Offered fall semester. Enrollment note: Undergraduate students must enroll in Educ. 4911, while graduate students must enroll in Educ. 6911. Credit 8 units. A&S IQ: SSC EN: S

---

**L12 Educ 492 Student Teaching in the Secondary School**

Supervised teaching experience. Group meetings and individual conferences. Emphasis on integration of theory/ practice and reflection on teaching through videotape analysis. Prerequisite: admission to teacher education program. Enrollment Notes: Graduate students must register for Satisfactory/Unsatisfactory and Undergraduates must register for Pass/Fail. Secondary teacher education students enroll for 8 credits during the Spring semester. Undergraduate students must enroll in Educ. 492, and graduate students must enroll in Educ. 692. Credit 8 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L12 Educ 4922 Student Teaching in Middle Schools**

Supervised teaching experience. Group meetings and individual conferences. Prerequisite: admission to teacher education program. Enrollment Notes: Graduate students must register for Satisfactory/Unsatisfactory and Undergraduates must register for Pass/Fail. Middle school teacher education students enroll for 8 credits. Offered Spring semester. Undergraduate students must enroll in Educ. 4922, and graduate students must enroll in Educ. 6922. Credit 8 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L12 Educ 494 Student Teaching in Grades K-12**

This course encompasses a supervised teaching experience as well as group meetings and individual conferences. Prerequisite: Admission to the teacher education program. Offered spring semester. Enrollment Note: Undergraduate students must enroll in Educ. 494, and graduate students must enroll in Educ. 694. Credit 8 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

**L12 Educ 4951 Middle School Philosophy and Organization**

This course examines the history, goals, organization and philosophy of middle schools as institutions. Students will explore how the characteristics and needs of early adolescents guide the mission, structure and operation of middle schools. Prerequisite: admission to teacher education program. Enrollment note: undergraduate students must enroll in Educ. 4951, and graduate students must enroll in Educ. 6951. Credit 2 units. A&S IQ: SSC EN: S

---

**L12 Educ 4952 Middle School Curriculum and Instruction**

By building on knowledge of the middle-level child and the ways in which middle schools are organized to meet the needs of middle-level children (covered in Educ 4951), this course explores the learning styles and attributes of middle-school students and examines instructional theory, methods, and materials appropriate to grades 5 through 9. In addition, portions of this course will be devoted to specific content field methodology and subdivided into English/language arts and social studies or science and math. The English/social studies and science/math sessions will be held concurrently, and students will attend the session appropriate to their content majors or minors. Interdisciplinary team teaching will be modeled and featured in these sessions. This course features a required practicum experience. Prerequisite: Admission to the teacher education program. Enrollment note: Undergraduate students must enroll in Educ. 4952, and graduate students must enroll in Educ. 6952. Credit 3 units. A&S IQ: SSC Art: SSC EN: S

---

**L12 Educ 4999 Capstone Seminar in Educational Studies**

All majors not writing an Education senior honors thesis are required to enroll in the senior seminar, a reading colloquium. Students read with faculty and write papers based on the readings and the courses taken to complete the major requirements in the program. All honors students are required to attend at least one session of the seminar to present their work and all graduating Educational Studies majors, including those completing honors work in Educational Studies, are required to attend the final session of the seminar. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

## Educational Studies Major

### Program Requirements

- **Total units required:** 24

The Educational Studies program examines and applies the historical, social, cultural, psychological, and public policy aspects of educational institutions and educational processes as well as the social and cultural factors that affect them. The program provides an entry point into the study of the multidimensional field of education, analysis, the individual, and the collective. By becoming familiar with educational research and writing, students in Educational Studies are expected to develop basic inquiry skills as well as a critical understanding of how educational institutions function, how individuals grow and change, and how social groups are shaped by educational processes. These tools should help students develop the ability to integrate and apply systematic knowledge in order to guide personal action and professional development and to understand and possibly transform social and institutional policy.

The Educational Studies program is appropriate for students who want to enhance their understanding of educational policy and of the educational issues that they may encounter in their careers or face as students, citizens, and adults. Many educational studies majors pursue graduate or professional study; however, this major also prepares students to work in educational, nonprofit, and government agencies. Students are strongly encouraged to complete a second major; however, a second major is not required.

## Required Courses

**Note:** The frequencies of the course offerings are designated by the following symbols:

- <sup>(+)</sup> Offered every semester in recent years
- <sup>(\*)</sup> Offered at least once a year or once every other year in recent years
- <sup>(-)</sup> Offered less frequently in recent years

## Discipline-Based Study

Students are required to take three Discipline-Based Study courses (9 units):

Code	Title	Units
Educ 304	Educational Psychology <sup>(+)</sup>	3
Educ 453B	Sociology of Education <sup>(+)</sup>	3
Educ 459F	Philosophies of Education <sup>(*)</sup>	3
Educ 462	Politics of Education <sup>(*)</sup>	3
Educ 4621	The Political Economy of Urban Education <sup>(*)</sup>	3
Educ 481W	History of Education in the United States <sup>(*)</sup>	3

Students must take three courses (total of 9 units) from the Individual Processes of Education and Social Context of Education categories below. Students can choose to take one Individual Processes of Education course and two Social Context of Education courses or two Individual Processes of Education courses and one Social Context of Education course.

## Individual Processes of Education

Students are required to take one or two Individual Processes of Education courses (3-6 units):

Code	Title	Units
Educ 4023	Second Language Acquisition & Technology <sup>(-)</sup>	3
Educ 4052	Educational Psychology: A Focus on Teaching and Learning <sup>(+)</sup>	3
Educ 4055	Central Topics in Psychological Research on Teaching and Learning <sup>(*)</sup>	3
Educ 408	Education and Psychology of Exceptional Children <sup>(+)</sup>	3
Educ 433W	Complex Learning in Education <sup>(*)</sup>	3
Educ 461B	Construction and Experience of Black Adolescence <sup>(-)</sup>	3
Educ 4692	Reading Across Languages and Cultures: Theory, Reserach, and Practice <sup>(-)</sup>	3

## Social Context of Education

Students are required to take one or two Social Context of Education courses (3-6 units):

Code	Title	Units
Educ 301C	The American School <sup>(+)</sup>	3
Educ 303	Gender and Education <sup>(*)</sup>	3
Educ 313B	Education, Childhood, Adolescence, and Society <sup>(+)</sup>	3
Educ 314	Sociolinguistics, Literacies, Schools, and Communities <sup>(*)</sup>	3
Educ 4033	Video Microanalysis: Methods and Tools <sup>(-)</sup>	3
Educ 4111	Linguistics and Language Learning <sup>(*)</sup>	3
Educ 4280	History of Urban Schooling in the United States <sup>(-)</sup>	3
Educ 4288	History of Higher Education in American Culture <sup>(*)</sup>	3
Educ 4289	Neighborhoods, Schools, and Social Inequality <sup>(*)</sup>	3
Educ 4511	Race, Ethnicity, and Culture: Critical Qualitative Understandings of Urban Education <sup>(*)</sup>	3
Educ 4608	The Education of Black Children and Youth in the United States <sup>(*)</sup>	3
Educ 489	Education and Public Policy in the United States <sup>(-)</sup>	3

## Elective Courses

In addition to the six courses (18 credits) completed from the areas of Discipline-Based Study, Individual Processes of Education, and Social Context of Education, students must complete one elective course (3 credits) which may be satisfied by the following:

- Any course listed in the tables above
- Educ 299 Internship in Education
- Students can consult with the Director of Educational Studies regarding additional courses offered by or crosslisted in the Department of Education and courses offered outside of the Department of Education that address educational topics and issues.

## Educ 4999 Capstone Seminar in Educational Studies

All majors not writing an educational senior honors thesis are required to enroll in this senior seminar (3 credits). Students read and write papers based on readings and the courses taken to complete the major requirements in the program. They also complete a research project.

## Additional Requirements

- All courses for the Educational Studies major must be taken for a letter grade (with the exception of Educ 299 Internship in Education, which must be taken P/F). Per Arts & Sciences requirements, students must earn at least a C- in order for course work to count toward the major.

- All students must complete a 100-, 200-, or 300-level Education course before enrolling in a 400-level course. Exceptions may be granted through permission of the 400-level course instructor.
- By the end of the fall of senior year, all majors need to have taken at least six of the seven required courses before taking Capstone in the spring of senior year; if unable to fulfill this requirement, majors must meet with the Director of Undergraduate Studies for Educational Studies.
- If planning to graduate early (i.e., at the end of the fall of senior year), majors are required to meet with their advisor in fall of their junior year prior to course registration for the spring semester.

## Additional Information

### Honors Program

Honors in the Department of Education involves both the demonstration of acquired knowledge and a report on an original research project. Students in either major in the department — Educational Studies or Teacher Education — may pursue honors. The appropriateness of honors work in education for a given student is determined by reference to both GPA and faculty recommendation. Students may be eligible for either the College of Arts & Sciences' Latin Honors Program or departmental honors from the Department of Education. Students interested in Latin Honors work should speak with either the Director of Educational Studies or Director of Teacher Education about eligibility and requirements as early as sophomore year or, ideally, during the junior year.

### Transfer Credit

- All courses for the major in Educational Studies or the majors in Teacher Education should be taken after the student has declared the major as a student at Washington University. Exceptions, up to 6 transfer credits, may be granted on an individual basis.

## Study Abroad

### Educational Studies Majors and Minors

- Courses taken abroad for the Educational Studies major or minor must be equivalent to 300-level or 400-level courses at Washington University.
- Students may transfer up to 6 credits earned abroad with the approval of the Department of Education Study Abroad Advisor.
- Courses taken abroad do not necessarily serve as substitutes for specific Educational Studies courses. Rather, courses are reviewed holistically to determine if they address the Individual Processes of Education and/or Social Context of Education (two areas of study for the Educational Studies major and minor). Any study abroad course determined to address the Individual Processes of Education and/or Social Context of Education can also count for an elective.
- Study Abroad courses cannot count for a discipline-based requirement.

## Teacher Education Majors

- Teacher Education students have found studying abroad to be very helpful to their educational experiences and may do so during their sophomore or junior year. To ensure that students are in residence at Washington University during their professional year (senior fall and spring for secondary candidates and junior spring and senior fall for elementary candidates) when they must take coursework required by the Department of Elementary and Secondary Education, it is very important to plan the study abroad semester in consultation with the Director of Teacher Education. As a result, many Teacher Education students consider taking courses for their other major or minor during study abroad so that certification coursework is completed while on campus.
- Teacher Education students who are interested in studying abroad may transfer up to 6 credits of education foundations coursework from one of the preapproved sites listed below.

## Preapproved Study Abroad Sites

There are six preapproved sites for semester-long study abroad in Educational Studies and Teacher Education:

1. Danish Institute for Study Abroad (DIS) Copenhagen — Child Development and Diversity Program in Copenhagen, Denmark
2. IES Abroad Amsterdam Semester Program in Amsterdam, Netherlands
3. Trinity College Dublin with IES Abroad in Dublin, Ireland
4. University of Auckland with IES Abroad in Auckland, New Zealand
5. WU in Chile at Pontificia Universidad Catolica de Chile (PUC) (**Note:** This program has a Spanish language prerequisite.)
6. University of Sydney in Sydney, Australia

There are also two pre-approved sites for summer study abroad in Educational Studies and Teacher Education:

1. Summer in Scandinavia Danish Institute for Study Abroad (DIS) Program in Copenhagen, Denmark, or Stockholm, Sweden
2. The School for International Training (SIT) Study Abroad Africa: Education and Social Change in Durban, South Africa

## Title II

Section 207 of Title II of the Higher Education Act mandates that Washington University's Teacher Education programs (or the Department of Education) make public specific Teacher Education performance data on the Department of Education website.

# Elementary Teacher Education Major

## Program Requirements

- **Total units required:** 48

### Required Courses

This major prepares students to teach grades 1 through 6 and may be completed within a four-year undergraduate degree. In addition to the Teacher Education major, students must declare a major or minor in a closely related field of study.

- Students are required to complete the following education courses prior to the professional year:

Code	Title	Units
Educ 313B	Education, Childhood, Adolescence, and Society	3
Educ 314	Sociolinguistics, Literacies, Schools, and Communities	3
Educ 4052	Educational Psychology: A Focus on Teaching and Learning	3
Educ 4053	Early Field Experience	1
Educ 408	Education and Psychology of Exceptional Children	3
Educ 466	Mathematics for Elementary School Teachers	3
Educ 4681	Teaching Reading in the Elementary School	3
<b>Total Units</b>		<b>19</b>

- Students must enroll in the methods block during the spring of their junior year:

Code	Title	Units
Educ 4731	Elementary School Mathematics	3
Educ 4741	Elementary Science: Content, Curriculum, and Instruction	2
Educ 470	Language, Learning, and Instruction	3
Educ 4751	Elementary Social Studies: Content, Curriculum, and Instruction	2
Educ 4771	Arts and Aesthetics: A Means of Communication	3
Educ 4841	Elementary Methods Field Experience	2
<b>Total Units</b>		<b>15</b>

- Students must enroll in the elementary school teaching block during the fall of their senior year:

Code	Title	Units
Educ 4831	The Teaching-Learning Process in the Elementary School	3
Educ 4911	Student Teaching in the Elementary School	8
Educ 525	Diagnosis and Correction of Reading Disabilities	3

### Additional Requirements for Teacher Education Majors

- Students interested in a major in Elementary, Middle School, or Secondary Teacher Education should seek admission to the teacher preparation program early in their sophomore year by contacting the Director of Teacher Education. To be eligible for admission students must:
  - Achieve a passing score on an entrance exam mandated by the State of Missouri OR prove adequate content knowledge through ACT or SAT scores
  - Hold a minimum grade point average of 3.0 in the content area
- Upon completion of the program, a satisfactory records check, and the recommendation of the Washington University Department of Education, the Missouri Department of Elementary and Secondary Education will issue a teaching certificate if the student has met the following criteria:
  - Achieved a passing score on the required Missouri certification exam(s)
  - Maintained a minimum content area GPA of 3.0
  - Earned a grade of B or higher in required fieldwork or Education course work

### Additional Information

#### Honors Program

Honors in the Department of Education involves both the demonstration of acquired knowledge and a report on an original research project. Students in either major in the department — Educational Studies or Teacher Education — may pursue honors. The appropriateness of honors work in education for a given student is determined by reference to both GPA and faculty recommendation. Students may be eligible for either the College of Arts & Sciences' Latin Honors Program or departmental honors from the Department of Education. Students interested in Latin Honors work should speak with either the Director of Educational Studies or Director of Teacher Education about eligibility and requirements as early as sophomore year or, ideally, during the junior year.

#### Transfer Credit

- All courses for the major in Educational Studies or the majors in Teacher Education should be taken after the student has declared the major as a student at Washington University. Exceptions, up to 6 transfer credits, may be granted on an individual basis.

## Study Abroad

### Educational Studies Majors and Minors

- Courses taken abroad for the Educational Studies major or minor must be equivalent to 300-level or 400-level courses at Washington University.
- Students may transfer up to 6 credits earned abroad with the approval of the Department of Education Study Abroad Advisor.
- Courses taken abroad do not necessarily serve as substitutes for specific Educational Studies courses. Rather, courses are reviewed holistically to determine if they address the Individual Processes of Education and/or Social Context of Education (two areas of study for the Educational Studies major and minor). Any study abroad course determined to address the Individual Processes of Education and/or Social Context of Education can also count for an elective.
- Study Abroad courses cannot count for a discipline-based requirement.

### Teacher Education Majors

- Teacher Education students have found studying abroad to be very helpful to their educational experiences and may do so during their sophomore or junior year. To ensure that students are in residence at Washington University during their professional year (senior fall and spring for secondary candidates and junior spring and senior fall for elementary candidates) when they must take coursework required by the Department of Elementary and Secondary Education, it is very important to plan the study abroad semester in consultation with the Director of Teacher Education. As a result, many Teacher Education students consider taking courses for their other major or minor during study abroad so that certification coursework is completed while on campus.
- Teacher Education students who are interested in studying abroad may transfer up to 6 credits of education foundations coursework from one of the preapproved sites listed below.

### Preapproved Study Abroad Sites

There are six preapproved sites for semester-long study abroad in Educational Studies and Teacher Education:

1. Danish Institute for Study Abroad (DIS) Copenhagen — Child Development and Diversity Program in Copenhagen, Denmark
2. IES Abroad Amsterdam Semester Program in Amsterdam, Netherlands
3. Trinity College Dublin with IES Abroad in Dublin, Ireland
4. University of Auckland with IES Abroad in Auckland, New Zealand
5. WU in Chile at Pontificia Universidad Catolica de Chile (PUC) (**Note:** This program has a Spanish language prerequisite.)
6. University of Sydney in Sydney, Australia

There are also two pre-approved sites for summer study abroad in Educational Studies and Teacher Education:

1. Summer in Scandinavia Danish Institute for Study Abroad (DIS) Program in Copenhagen, Denmark, or Stockholm, Sweden
2. The School for International Training (SIT) Study Abroad Africa: Education and Social Change in Durban, South Africa

## Title II

Section 207 of Title II of the Higher Education Act mandates that Washington University's Teacher Education programs (or the Department of Education) make public specific Teacher Education performance data on the Department of Education website.

## K-12 Teacher Education Major

### Program Requirements

- **Total units required:** 34-37
- Students must achieve a grade of B or higher in required fieldwork and education course work.

### Required Courses

This major prepares students to teach in grades K-12 in the areas of art, dance, or world languages, including Latin. Students must complete a major in their content area and maintain a 3.0 GPA in that major. In addition, students are required to complete the following education courses:

- 3 credits of educational foundations:

Code	Title	Units
Educ 301C	The American School	3
or Educ 453B	Sociology of Education	
or Educ 459F	Philosophies of Education	
or Educ 481W	History of Education in the United States	

- All of the following courses prior to the professional year:

Code	Title	Units
Educ 313B	Education, Childhood, Adolescence, and Society	3
Educ 4052	Educational Psychology: A Focus on Teaching and Learning	3
Educ 4053	Early Field Experience	1
Educ 408	Education and Psychology of Exceptional Children	3
Educ 4843	Field Experience Seminar	3

- In addition, teacher certification students intending to teach in grades K-12 must enroll in Educ 4000 as well as the course(s) associated with their chosen content area in the fall of their senior year as indicated below:

Code	Title	Units
<b>For ALL content areas</b>		
Educ 4000	Curriculum and Instruction for Secondary Teachers (Grades K-12, all content areas)	2
<b>For World Language content area, grades K-12</b>		
Educ 400L	Curriculum and Instruction in World Languages K-12 (Grades K-12, content area: Foreign Language)	2
<b>For Art content area, grades K-12</b>		
Educ 400A	Curriculum and Instruction in Art K-12 (Grades K-12, content area: Art)	2
Educ 5007	Instructional Techniques for Art K-12 (Grades K-12, content area: Art)	3
<b>For Dance content area, grades K-12</b>		
Educ 400D	Curriculum and Instruction in Dance K-12 (Grades K-12, content area: Dance)	2

- Along with the Curriculum and Instruction courses, students must also enroll in Educ 5681 Reading in the Content Areas in the fall of their senior year.
- Students must enroll in the secondary school teaching block during the spring of their senior year:

Code	Title	Units
Educ 4821	The Teaching-Learning Process in the Secondary School	3
Educ 494	Student Teaching in Grades K-12	8

## Additional Requirements for Teacher Education Majors

- Students interested in a major in Elementary, Middle School, or Secondary Teacher Education should seek admission to the teacher preparation program early in their sophomore year by contacting the Director of Teacher Education. To be eligible for admission students must:
  - Achieve a passing score on an entrance exam mandated by the State of Missouri OR prove adequate content knowledge through ACT or SAT scores
  - Hold a minimum grade point average of 3.0 in the content area
- Upon completion of the program, a satisfactory records check, and the recommendation of the Washington University Department of Education, the Missouri Department of Elementary and Secondary Education will issue a teaching certificate if the student has met the following criteria:

- Achieved a passing score on the required Missouri certification exam(s)
- Maintained a minimum content area GPA of 3.0
- Earned a grade of B or higher in required fieldwork or Education course work

## Additional Information

# Middle School Teacher Education Major (Grades 5-9)

## Program Requirements

- **Total units required:** 42-45
- Students must achieve a grade of B or higher in required fieldwork and education course work.

## Required Courses

This option prepares students to teach in middle school grades 5 through 9. Students must major in a subject field taught at the middle school level (language arts, science, mathematics, or social science) or complete courses in two or more content areas while maintaining a 3.0 GPA in those subjects. In addition, students are required to complete the following education courses:

- 3 credits in educational foundations:

Code	Title	Units
Educ 301C	The American School	3
or Educ 453B	Sociology of Education	
or Educ 459F	Philosophies of Education	
or Educ 481W	History of Education in the United States	

- All of the following courses prior to the professional year:

Code	Title	Units
Educ 313B	Education, Childhood, Adolescence, and Society	3
Educ 4052	Educational Psychology: A Focus on Teaching and Learning	3
Educ 4053	Early Field Experience	1
Educ 408	Education and Psychology of Exceptional Children	3
Educ 4843	Field Experience Seminar	3
Educ 4951	Middle School Philosophy and Organization	2
Educ 4952	Middle School Curriculum and Instruction	3
Educ 5253	Instructional Interventions in Reading for Adolescents and English Language Learners	3

- In addition, middle school teacher certification students must enroll in Educ 4000 as well as the course(s) associated with their chosen content area in the fall of their senior year as indicated below:

Code	Title	Units
<b>For ALL content areas</b>		
Educ 4000	Curriculum and Instruction for Secondary Teachers (Grades 5-9, all content areas)	2
<b>For Language Arts content area, grades 5-9</b>		
Educ 400E	Curriculum and Instruction in Secondary English (Grades 5-9, content area: Language Arts)	2
Educ 4451	Teaching Writing in School Contexts (Grades 5-9, content area: Language Arts)	3
<b>For Science content area, grades 5-9</b>		
Educ 400S	Curriculum and Instruction in Secondary Science (Grades 5-9, content area: Science)	2

For Mathematics content area, grades 5-9		
Educ 400M	Curriculum and Instruction in Secondary Mathematics (Grades 5-9, content area: Mathematics)	2
For Social Science content area, grades 5-9		
Educ 40SS	Curriculum and Instruction in Secondary Social Science (Grade 5-9, content area: Social Science)	2

- Along with the Curriculum and Instruction courses, students must also enroll in Educ 5681 Reading in the Content Areas in the fall of their senior year.
- Students must enroll in the middle school teaching block during the spring of their senior year:

Code	Title	Units
Educ 4821	The Teaching-Learning Process in the Secondary School	3
Educ 4922	Student Teaching in Middle Schools	8

The middle school teacher education option may be completed in conjunction with the secondary major; all requirements for both must be met, including student teaching at both levels. Students who choose middle school certification will student teach during the spring of their senior year while concurrently taking additional education course work, depending on the option selected.

## Additional Requirements for Teacher Education Majors

- Students interested in a major in Elementary, Middle School, or Secondary Teacher Education should seek admission to the teacher preparation program early in their sophomore year by contacting the Director of Teacher Education. To be eligible for admission students must:
  - Achieve a passing score on an entrance exam mandated by the State of Missouri OR prove adequate content knowledge through ACT or SAT scores
  - Hold a minimum grade point average of 3.0 in the content area
- Upon completion of the program, a satisfactory records check, and the recommendation of the Washington University Department of Education, the Missouri Department of Elementary and Secondary Education will issue a teaching certificate if the student has met the following criteria:
  - Achieved a passing score on the required Missouri certification exam(s)
  - Maintained a minimum content area GPA of 3.0
  - Earned a grade of B or higher in required fieldwork or Education course work

## Additional Information

## Educational Studies Minor

### Program Requirements

- **Total units required:** 18

### Required Courses

**Note:** The frequencies of the course offerings are designated by the following symbols:

- (<sup>+</sup>) Offered every semester in recent years (pending faculty availability)
- (<sup>\*</sup>) Offered at least once a year or once every other year in recent years
- (<sup>-</sup>) Offered less frequently in recent years

- Discipline-Based Study (two courses required; 6 units):

Code	Title	Units
Educ 304	Educational Psychology ( <sup>+</sup> )	3
Educ 453B	Sociology of Education ( <sup>+</sup> )	3
Educ 459F	Philosophies of Education ( <sup>*</sup> )	3
Educ 462	Politics of Education ( <sup>*</sup> )	3
Educ 4621	The Political Economy of Urban Education ( <sup>*</sup> )	3
Educ 481W	History of Education in the United States ( <sup>*</sup> )	3

- Individual Processes of Education (one course required; 3 units):

Code	Title	Units
Educ 4023	Second Language Acquisition & Technology ( <sup>-</sup> )	3
Educ 4052	Educational Psychology: A Focus on Teaching and Learning ( <sup>+</sup> )	3
Educ 4055	Central Topics in Psychological Research on Teaching and Learning ( <sup>*</sup> )	3
Educ 408	Education and Psychology of Exceptional Children ( <sup>+</sup> )	3
Educ 433W	Complex Learning in Education ( <sup>*</sup> )	3
Educ 461B	Construction and Experience of Black Adolescence ( <sup>-</sup> )	3
Educ 4692	Reading Across Languages and Cultures: Theory, Reserach, and Practice ( <sup>-</sup> )	3

- Social Context of Education (one course required; 3 units):

Code	Title	Units
Educ 301C	The American School ( <sup>+</sup> )	3
Educ 303	Gender and Education ( <sup>*</sup> )	3
Educ 313B	Education, Childhood, Adolescence, and Society ( <sup>+</sup> )	3
Educ 314	Sociolinguistics, Literacies, Schools, and Communities ( <sup>*</sup> )	3
Educ 4033	Video Microanalysis: Methods and Tools ( <sup>-</sup> )	3
Educ 4111	Linguistics and Language Learning ( <sup>*</sup> )	3
Educ 4280	History of Urban Schooling in the United States ( <sup>-</sup> )	3
Educ 4288	History of Higher Education in American Culture ( <sup>*</sup> )	3
Educ 4289	Neighborhoods, Schools, and Social Inequality ( <sup>*</sup> )	3

## English

Undergraduates who major or minor in English explore literature as readers and writers in small classes that focus on the individual student. With exposure to our wide array of course topics and intellectual approaches, alumni of the English department have succeeded in top-notch graduate programs in English and creative writing as well as in law, business, medicine, journalism, and government.

Preparation for the English major begins at the first-year level. In both the fall and spring semesters, first-year seminars of 15 students or fewer are led by distinguished faculty on subjects such as detective fiction, literature and justice, the invention of romantic love, and the cultural history of the American university. Majors go on to acquire a comprehensive understanding of the history and criticism of literature written in English. Our department's commitment to cross-fertilizing creative and critical literacy is genuine and longstanding. Home to a strong and rigorous MFA program that fosters a close-knit community of talented writers in poetry, fiction, and creative nonfiction, the department offers an undergraduate minor in writing as well as a major with a specialization in creative writing. English students frequently enroll in creative writing workshops or classes in advanced rhetoric, and three such courses may count toward the regular English major.

### L14 E Lit 100 First-Year Seminar: The Literary Life

This class approaches literature from many angles: the creative to the scholarly, the personal to the ethical, the edifying to the entertaining. At the heart of our study will be a survey of literary "values" such as invention, emotion, style, subversion, beauty, humor—those fundamental reasons readers come to literature in the first place. Through readings and discussion, we will consider the great variety of ways literature expresses these values, and will explore them ourselves via creative assignments. Along the way, we will learn about literary life today through discussions with nationally renowned writers who will visit the class, and through units on literary scholarship, book reviewing, and magazine and book publishing. In the midst of it all, you will write and workshop your own stories, poems, and non-fiction works. Course enrollment preference is given to first-year students. Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

### L14 E Lit 115A First-Year Seminar

A variety of topics in comparative literature, designed for first-year students—no special background is required—and to be conducive to the investigation and discussion format of a seminar. Previous topics include: Story Telling Through Sound, Banned Books, Immigrants and Exiles, Literature and Democracy, Literature and the Art of Apology, Hell on Earth: Crime, Conscience, and the Arts, Magical thinking: Literature and Theory Engage the Occult. Same as L16 Comp Lit 115. Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

### L14 E Lit 150 First-Year Seminar: Turn & Face the Strange: Alienation & Transformation in Modern Lit & Contmp Music

Credit 3 units. A&S: FYS A&S IQ: HUM BU: ETH EN: H

### L14 E Lit 152 Literature Seminar for Freshmen

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

### L14 E Lit 153 Literature Seminar for Freshman

Reading courses, each limited to 15 students. Topics: selected writers, varieties of approaches to literature, e.g., Southern fiction, the modern American short story, the mystery; consult Course Listings. Prerequisite: first-year standing. Credit 3 units. A&S: FYS A&S IQ: HUM

### L14 E Lit 155 First-Year Seminar: Campus Novels and Dark Academia: Stories of College Life

Reading courses, each limited to 15 students. Topics: selected writers, varieties of approaches to literature, e.g., Southern fiction, the modern American short story, the mystery; consult Course Listings. Course is for first-year, non-transfer students only. Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

### L14 E Lit 156 Literature Seminar for Freshmen

Reading courses, each limited to 15 students. Topics: selected writers, varieties of approaches to literature, e.g., Southern fiction, the modern American short story, the mystery; consult Course Listings. Prerequisite: first-year standing. Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

### L14 E Lit 160 First-Year Seminar: Immigrants and Exiles

Literature has traditionally been a welcoming space for people who, by choice or history, do not fit easily in the mainstream of community life. The widespread changes and upheavals of the last century have vastly expanded the ranks of such people, accelerating the processes of immigration and exile while fundamentally altering traditional notions of home and belonging. This course will examine fiction by writers such as Jhumpa Lahiri, Albert Camus, Jean Rhys, Franz Kafka, and Teju Cole, who write from and about the position of "outsider," exploring what such texts have to say about living in an unsettled, diasporic modern world - a world in which real belonging seems an increasingly elusive goal. In reading these texts, we will investigate how their authors have portrayed the journeys, hopes, and hardships of dislocation and alienation, as well as the role literature might play in creating a sense of community for immigrants, refugees, and people living in various forms of exile. Course is for first-year, non-transfer students only. Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

### L14 E Lit 161A Morality and Markets

What does it look like to live a moral life in today's market system? We know all too well what it does not look like. The news is filled with moral failures of leaders and executives at top firms. We like to believe that we would behave differently, but what kinds of pressures inform our moral choices? What pulls us, what pushes us, and what persuades us to act one way rather than another? These are the questions that a course combining business and literature can address in unique ways; the world of fiction helps us to examine the ethical dilemmas of the market we inhabit every day. In this course, we use great books, classics of film and modern television, and the tools of modern psychology and business strategy to think critically about what is entailed in living a moral life in the midst of the modern market. This course is for first-year (non-transfer) students only. Same as I60 BEYOND 161. Credit 3 units. A&S: FYBB A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L14 E Lit 201C Classical to Renaissance Literature: Text and Traditions**

Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer's Iliad is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin, and Italian, to poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Vergil, Ovid, Petrarch, and Shakespeare.

**L14 E Lit 2151 Literature in English: Early Texts and Contexts**

How did what we now call English literature emerge? How did such literary activity reflect the world, and how did the world shape this writing? How can literature help us understand the history of art, race, religious identity and sectarian conflict, nations and empires, gender, sexuality, and class? We will address these questions by studying the early history of literature in English, from the Middle Ages through the late 18th century, as well as the tools, vocabularies, and critical practices of contemporary literary studies. We will learn about the material forms of English literature (manuscript, print, and performance traditions) as well as major poetry and prose forms (e.g., sonnet, epic, blank verse, romance, letter, slave narrative). In addition to Geoffrey Chaucer, William Shakespeare, John Milton, and Ignatius Sancho or Olaudah Equiano, the syllabus may include authors and texts such as "Beowulf," "Sir Gawain and the Green Knight," Julian of Norwich, Edmund Spenser, Margaret Cavendish, Aphra Behn, Daniel Defoe, and Eliza Haywood. Note: This course satisfies one of the two 200-level requirements for the English major.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L14 E Lit 2152 Literature in English: Modern Texts and Contexts**

What is modern English literature, and how do we tell its story? Is it a succession of literary movements from romanticism to realism to modernism and beyond? Is it a canon of classic texts to survey? Is it a sustained critique of that canon's exclusions, a recentering of the marginalized authors whose works reveal previously obscured accounts of modernity? It is, in fact, all of the above. In this course, we will introduce students to the central themes, forms, and forces that have shaped the history of English-language literature from the late 18th century to the present, as well as to the tools, vocabularies, and critical practices of contemporary literary studies. Throughout, we will examine the norms and assumptions of literary history, including those based in race, ethnicity, class, gender, and sexuality. Students will encounter fiction, poetry, drama, and creative nonfiction from Britain and the United States, along with African, Caribbean, or other global literatures in English. Authors studied may include William Wordsworth, Phillis Wheatley, Jane Austen, Charlotte Brontë, Frederick Douglass, Oscar Wilde, T.S. Eliot, Virginia Woolf, Claude McKay, Samuel Beckett, James Baldwin, Wole Soyinka, Toni Morrison, Ngugi wa Thiong'o, and Zadie Smith. Note: This course satisfies one of the two 200-level requirements for the English major.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L14 E Lit 224 Publishing: History and Contexts**

This course offers a broad introduction to book publishing, with the goal of establishing an understanding the larger issues facing publishing today, as well as the historical and cultural contexts that informs these issues. We will look at both multiple types of book publishing, with a general emphasis on contemporary Anglophone

trade publishing, and will have frequent class visits (via Zoom) by professionals from different sectors of the publishing community. This course will count for one of the core requirements of the forthcoming Publishing Concentration.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L14 E Lit 250 Sophomore Seminar**

Topic will vary by semester.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L14 E Lit 257 The Art of Poetry**

An introduction to the critical vocabulary necessary for the study and evaluation of poetry; provides a basic understanding of prosody, poetic forms and figurative language, and the historical periods in which poetry has been written.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L14 E Lit 258 Art of the Novel**

In this course we will read novels drawn from several literary traditions and a number of distinctive narrative modes. Among the questions we will consider are those addressing the nature of narrative form, and the literary and stylistic choices made in order to express such things as character and consciousness, society and history, and the relation between the fictive and the real. There will be two papers, and several short writing assignments.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L14 E Lit 299 Research Assistantship**

For students assisting English faculty members with their research.

The student must provide a description of his or her assistantship and secure permission of the Director of Undergraduate Studies. At the end of the semester, the student must submit a four-page essay describing the work done during the assistantship, along with any documents or work produced. In addition, a written evaluation by the faculty member they assisted is required. Up to three units acceptable toward the English Major. Only for declared English Majors. Must be taken pass/fail. Credit variable, maximum 3 units.

---

Credit 3 units.

---

**L14 E Lit 302 The Great American Novel**

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L14 E Lit 302W Writing Modern War**

The twentieth century, as Graham Greene observed, was a century "in which there would never be a peace." This writing intensive course examines the ways in which modern writers have tried to describe warfare and its impact on both combatants and those on the "home front."

Credit 3 units.

---

**L14 E Lit 303W Strangers and Savages, Aliens and Outcasts**

This writing intensive course will focus on a literary tradition united by its representation of passionate hatred and intolerance.

Credit 3 units.

---

**L14 E Lit 304W Craft of Fiction: Historical Fiction**

This writing intensive course will be a literature/creative writing hybrid course in which a number of contemporary historical fictions (meaning, fictions set in periods prior to the authors' births, and sometimes incorporating real historical events or figures) will be covered.

Credit 3 units. EN: H

---

**L14 E Lit 305 Literature and Consent**

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

---

**L14 E Lit 305W Fabricating Lives**

The premise of this writing intensive course is that autobiography is not a straightforward narrative of the past but a conscious shaping of life into a meaningful design.

Credit 3 units.

---

**L14 E Lit 306 Old English Literature: Beowulf**

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L14 E Lit 3065 Voice, Language and Power: Late Medieval Religious Writing**

In the later Middle Ages, there is a flowering throughout Christian Europe of religious writings that offer a new voice in which personal religious experience can be pursued and expressed. Their voices are mainly intended to be communal ones, to be contained within the Church and regulated by it. But in each case the fact that it is a voice may offer a mode of resistance, or of difference. Such writing is often aimed at lay people, sometimes exclusively at women; and sometimes the intended auditors become the authors, and propose a version of religious experience that claims a new and more intimate kind of power for its readers. This course looks at a wide range of such writing in vernacular languages read in translation (English, French and German), including the work of Meister Eckhart, Marguerite Porete, Margery Kempe, Julian of Norwich, Eleanor Hull, the anonymous writer of *The Cloud of Unknowing* and the perhaps pseudonymous William Langland, author of *Piers Plowman*. Whether such writing seeks to be orthodox or conducive to heresy, it presents a challenge to the power of clergy - a challenge that is written in the vernacular language of lay people, rather than clerical Latin, and in doing so offers distinctively new voices for religious experience. The course will also look at ways in which such work might have been influenced, if only oppositionally or at times indirectly, by contact with Muslim and Jewish writing (including Jewish exegesis of the Psalms).

---

**L14 E Lit 307 The Writing of the Indian Subcontinent**

The Indian Sub-continent has in recent years yielded a number of writers, expatriate or otherwise, whose works articulate the postcolonial experience in the "foreign" English tongue. This course is designed to be an introductory survey of such writing, drawing on select Sub-continental writers. Covering both fiction and non-fiction by several authors including R. K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatje and Romesh Gunsekera, we will discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity and the constraints of gender roles.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM

---

**L14 E Lit 3071 Caribbean Literature in English**

Rum! Fun! Beaches! Sun! This is the image of the Caribbean in America today. This course will survey literature and culture from these islands, looking both at and beyond this tourists' paradise. It will aim to introduce students to the region's unmistakably vibrant tradition of multicultural mixture, while keeping an eye on the long history of slavery and rebellion out of which the islands' contemporary situation formed. Along the way we will encounter a wide variety of texts, from the earliest writing focused on life in urban slums, to the first novel ever

to have a Rastafarian as its hero, to more contemporary considerations of the region's uncertain place in a U.S.-dominated world. Toward the end of the course, we will also look at important films like *The Harder They Come* as well as discussing the most globally famous cultural product of the contemporary Caribbean: reggae music. The course will involve readings from multiple genres, and will cover authors such as C.L.R. James, Derek Walcott, Jean Rhys, V.S. Naipaul, Jamaica Kincaid, and Caryl Phillips.

---

**L14 E Lit 3075 The American Radical Novel: Literature Versus Inequality**

Intended to help students reckon knowledgeably, imaginatively, and articulately with our era of escalating social inequality, this course is a writing-intensive study of representative American radical novels stretching from the 19th-century abolitionism of Harriet Beecher Stowe's *Uncle Tom's Cabin* to the 21st-century dystopianism of Gary Shteyngart's *Super Sad True Love Story*. Its main goals are (1) to introduce students to the long history and current significance of efforts to pit American literature against American inequality; and (2) to improve the quality of advanced student writing in the related fields of American Culture Studies and English literature. The first goal is pursued through close analysis of both radical novels and the contemporary political documents that inform them, juxtaposing such texts as Upton Sinclair's *The Jungle* and Karl Marx's *Communist Manifesto*, Alice Walker's *Meridian* and Martin Luther King Jr.'s *Nonviolence and Racial Justice*. The second goal is pursued through the hands-on analysis of successful rhetorical strategies sampled from *The Hodges Harbrace Handbook*, and, more importantly, from the scholarly writings of students themselves.

---

**L14 E Lit 3081 City on a Hill: The Concept and Culture of American Exceptionalism**

This course examines the concept, history, and culture of American exceptionalism—the idea that America has been specially chosen, or has a special mission to the world. First, we examine the Puritan sermon that politicians quote when they describe America as a "city on a hill." This sermon has been called the "ur-text" of American literature, the foundational document of American culture; learning and drawing from multiple literary methodologies, we will re-investigate what that sermon means and how it came to tell a story about the Puritan origins of American culture—a thesis our class will reassess with the help of modern critics. In the second part of this class, we will broaden our discussion to consider the wider (and newer) meanings of American exceptionalism, theorizing the concept while looking at the way it has been revitalized, redefined and redeployed in recent years. Finally, the course ends with a careful study of American exceptionalism in modern political rhetoric, starting with JFK and proceeding through Reagan to the current day, ending with an analysis of Donald Trump and the rise of "America First." In the end, students will gain a firm grasp of the long history and continuing significance—the pervasive impact—of this concept in American culture.

**L14 E Lit 312 Introduction to Digital Humanities**

It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed, and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork will be supplemented by class presentations and a small assigned group project.

---

**L14 E Lit 312W Topics in English and American Literature: End of the Century: American Culture in the 1990s**

Starting with Allan Bloom's *The Closing of the American Mind*, a book that helped re-ignite the Culture Wars, this course will consider the debates and problems that pervaded American culture during the 1990s. From the end of the Cold War to the sexual scandals that rocked Bill Clinton's presidency, from the emergence of the Internet to the rise of grunge and rap, the 1990s were a time of vast change in American culture. It was a period when we, as a nation, reconsidered the legacy of the 1960s, the Reagan revolution, and the end of the Cold War, a time of economic expansion and cultural tension. In our consideration of this period, we will take a multidisciplinary approach when tackling a variety of materials—ranging from literary fiction (Philip Roth's *The Human Stain*, Jonathan Franzen's *The Corrections*) and popular films (Spike Lee's *Do the Right Thing* and *The Cohen Brothers' The Big Lebowski*) to the music of Nirvana and Public Enemy—in an attempt to come to a better understanding of our recent history. Throughout the semester, we will pursue the vexed cultural, political, and historical questions that Americans faced in the years between the fall of the Berlin Wall and the terrorist attacks of September 11th, 2001, and consider how literary texts imagined this period of American history.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

---

**L14 E Lit 313 Topics in English and American Literature**

Called the "Age of Revolution," the Romantic Age of British literature, 1770-1830, witnessed the birth of new lyric forms, the effacement of traditional strictures on style and taste, and produced through poetic voice (and its quaverings and multiplications) what might be called, over simply, the modern subject. Within a developing discourse of human rights and personal freedom, this growing assertion through poetry of individual expressivity allowed William Blake to construct in a single work a visual and verbal "Jerusalem." It encouraged William Wordsworth to write a pathbreaking investigation of the sources of his own creativity that challenged conventional restraints on what topics can, and cannot, be confessed in poetry. Beginning with these two poets, we will consider the historical contexts, and the sometimes competing histories of ideas, that shaped the five major British Romantic poets: Blake, Wordsworth, Samuel Taylor Coleridge, Lord Byron, and John Keats. We will follow an anthology for much of the poetry, including the poems and prose of influential contemporaries (female as well as male) who included the political philosopher Edmund Burke and Mary Wollstonecraft. Texts also to be assigned will include Mary Shelley's *Frankenstein* and Byron's *Don Juan*.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L14 E Lit 313W Bots, Drones, and Cyborgs: Being Human in the Age of Intelligent Machines**

We live in a world where not only our access to information, but our social interactions, and bodily autonomy are increasingly mediated by—surveilled, analyzed, facilitated, enhanced—by technology. This course will ask what it means to be human in an age of intelligent machines. What happens to our notions of individuality, autonomy, and political subjecthood when domains or categories once thought exclusively to be the preserve of humanity—language, emotion, complex information processing (playing chess, or driving cars, for example)—are increasingly threatened, replicated, and extended by technology? We will cover a range of science fiction texts including Karel Capek's play *Rossum's Universal Robots*, Isaac Asimov's *I, Robot*, Phillip K. Dick's *Do Androids Dream of Electric Sheep*, and William Gibson's *Neuromancer* along with works of speculative fiction such as Aldous Huxley's *Brave New World* and Margaret Atwood's *Oryx and Crake*, and Kazuo Ishiguro's *Klara and the Sun* along with films such as *Blade Runner* and *The Matrix*. We'll juxtapose these cultural representations of artificial intelligence with emerging philosophical and scientific discussions to ask to what extent the fundamental ways AI continues to redefine the boundaries of the "human" as a category.

**L14 E Lit 3153 The Women of Greek Tragedy**

This course examines the role of women in Athenian drama. Students will read English translations of the works of the three major tragedians -- Aeschylus, Sophocles, and Euripides -- and their near contemporary, the comedian Aristophanes. Direct engagement with ancient texts will encourage students to develop their own interpretations of and written responses to the political, social, and ethical manipulation that these mythological women were compelled to endure and the subtle ways in which they appear to exercise power themselves. Selected scholarly articles and book chapters will help students to contextualize these ancient dramas in their culture of origin. Because such issues continue to preoccupy both sexes today, students will see how Greek tragedy addresses perennial historical and cultural concerns through the examination of adaptations of Greek tragedies ranging from Seneca in ancient Rome to Spike Lee's "Chi-Raq" and Luis Alfaro's "Mojada: A Medea in Los Angeles." The final research paper will encourage students to consider how a specific female character from antiquity is transformed for a "modern" dramatic audience.

**L14 E Lit 3164 Adaptations Literature / Film / TV**

"The book was better than the movie." "The movie wasn't faithful to the book." "The TV series didn't capture the book like the movie did." These have forever been the complaints of readers watching their favorite works of literature adapted to the screen, and, in a media ecosystem increasingly flooded with adaptations and reboots of existing intellectual property, these complaints won't be going away any time soon. Film and literature have been interconnected since the very first films screened at end of the nineteenth century, but the dynamic between literature and media has sometimes been strained: film reviled as the cheap degradation of a vital art form, the novel anxious at the rise of narrative film - and later television - as rival storytelling media. But, viewing literature and visual media in opposition can obscure what becomes visible if we view them together. This is a course about the history, theory, and practice of adaptation from literature to film and television and back again rooted in both canonical and non-canonical case studies. We will study authors whose works have been repeatedly adapted across eras and media; filmmakers whose works are pastiches of various literary and cinematic sources; rigorously, obsessively "faithful" adaptations; radically

transformative "unfaithful" adaptations; and works of literature and media that are themselves about the process and ethics of adaptation. The course will be anchored by a reading of Emily St. John Mandel's 2014 novel Station Eleven and a serial viewing - replicating the unusual original release - of HBO Max's miniseries adaptation.

**L14 E Lit 3192 Interdisciplinary Studies in the Humanities, 20th Century: The European Avant Garde**

The first half of the twentieth century witnessed the emergence of Artistic movements characterized by revolt against tradition, emphasis on radical experimentation, and redefinition of the art work. This course will familiarize students with the avant-garde's main currents: Italian Futurism, English Vorticism, Russian Constructivism, "stateless" Dadaism, and French Surrealism. We will ask ourselves how to define the avant-garde, how it is related to modernity, and whether its aesthetic is necessarily political. Texts include "Futurist Manifestos", Cendrars's "Trans-Siberian Prose," Stein's "Tender Buttons", Breton's "Nadja". We will also examine artworks such as Duchamp's "Large Glass" and films Buñuel's "Un Chien Andalou".

**L14 E Lit 3227 Devising, Adaptation and Docudrama**

This course explores three ways of theatre-making that have revolutionized the contemporary stage: devising (a collaborative process emphasizing physical techniques to realize ideas), adaptation (the transposition of a narrative from one mode to another), and docudrama (the self-conscious staging of history through the assemblage of documentary records). Beginning with a focus on the current "postdramatic theatre" and the pre-histories of these contemporary practices, we will engage current scholarship on each form, learning the "how" and "why" from contemporary practitioners, while considering the rhetorical structure of each form in relation to the social meanings they generate for their audiences. Divided into 3 units, the course will combine the study of each method with hands-on practice, and will conclude with a showcase featuring an original performance created by the student collective. A theme (variable by semester) will unite the three sections of the course, helping students see how a single topic can be illuminated in different ways through these three methods of creating performance.

**L14 E Lit 325A African Americans and Children's Literature**

This course explores two distinct themes: how African descended people have been depicted in American and British children's literature and how African Americans have established a tradition in writing for children and young adults. It will also examine two related questions: How has African American childhood been constructed in children's literature and how have African American writers constructed childhood in children's literature? We will look at such classic white writers for children like Helen Bannerman, Annie Fellows Johnston, and Mark Twain as well as efforts by blacks like the Brownies Book, published by the NAACP, and children's works by black writers including Langston Hughes, Ann Petry, Shirley Graham Du Bois, Arna Bontemps, Virginia Hamilton, Walter Dean Myers, Mildred Taylor, Floyd and Patrick McKissack, Julius Lester, Rosa Guy, Sharon Bell Mathis, bell hooks, and others. For AFAS majors, this course counts as Area Requirement 1. Same as L90 AFAS 3254

**L14 E Lit 3451 Topics in American Literature**

Emerging in American films most forcefully during the 1940s, film noir is a cycle of films associated with a distinctive visual style and a cynical worldview. In this course, we will explore the sexual politics of film noir as a distinctive vision of American sexual relations every bit as identifiable as the form's stylized lighting and circuitous storytelling. We will explore how and why sexual paranoia and perversion seem to animate this genre and why these movies continue to influence

"neo-noir" filmmaking into the 21st century, even as film noir's representation of gender and sexuality is inseparable from its literary antecedents, most notably, the so-called "hard-boiled" school of writing. We will read examples from this literature by Dashiell Hammett, James Cain, Raymond Chandler and Cornell Woolrich, and discuss these novels and short stories in the context of other artistic and cultural influences on gendered power relations and film noir. We will also explore the relationship of these films to censorship and to changing post-World War II cultural values. Films to be screened in complete prints or in excerpts will likely include many of the following: *The Maltese Falcon*, *Double Indemnity*, *Murder My Sweet*, *Phantom Lady*, *Strangers on a Train*, *The Big Sleep*, *The Killers*, *Mildred Pierce*, *The High Wall*, *Sudden Fear*, *The Big Combo*, *Laura*, *The Glass Key*, *The Big Heat*, *Kiss Me Deadly*, *The Crimson Kimono*, *Touch of Evil*, *Alphaville*, *Chinatown*, *Taxi Driver*, *Devil in a Blue Dress*, *The Bad Lieutenant*, and *Memento*. Required Screenings.

**L14 E Lit 3520 Introduction to Postcolonial Literature**

At its zenith, the British Empire encompassed almost a quarter of the globe, allowing the diminutive island nation unprecedented economic, military, and political influence upon the rest of the world. This course will introduce some of the foundational responses to this dominance, both literary and theoretical, by the colonized and their descendants. We will examine important critiques of colonialism by theorists such as Frantz Fanon, Aimé Césaire, Edward Said, Homi Bhabha, and Gayatri Spivak, as well as literary works that reflect a postcolonial critique by authors such as V.S. Naipaul, George Lamming, Doris Lessing, and N'gugi wa Thiong'o. The course will interrogate how literature could be said to help consolidate Empire as well as ways in which it might function as rebellion against imperial power, with a view toward teasing out the problematics of race, gender, language, nationalism, and identity that postcolonial texts so urgently confront. This course may fulfill the global or minority literatures requirement for students who declare an English major in the fall 2021 semester and beyond.

The black athlete is a central figure in American entertainment, and has been since Frederick Douglass decried Christmastime slave games in his Narrative. This course will examine literary depictions of black athletes-in novels, memoirs, essays, and poems-in order to better understand the cultural significance of sportsmen and women in the African American struggle for equality, from abolitionism to the "Black Lives Matter" movement. Students will read works by Douglass, Ralph Ellison, Maya Angelou, and John Edgar Wideman, among others, and examine the lives and athletic pursuits of prominent athletes such as Jackie Robinson, Muhammad Ali, Wilma Rudolph, Michael Jordan, and LeBron James. Popular perceptions of gender and sexuality, in addition to race and racism, will factor into readings, especially as students incorporate secondary sources into their own research.

**L14 E Lit 352D Fantasy, Horror, Sci-Fi: Genre-Fiction in Arabic Literature**

Genre is a category, or to use Aristotle's term, a species. It is a category of literature, arts, music, and other forms of composition, to classify works of shared conventions, practices, and aesthetics. A typical example would be poetry. Subgenre is a single division of a given genre. In this example, epic poetry, the sonnet, haiku are subgenres of poetry. But who gets to decide what is genre, subgenre, and how? These would be some of the main questions we will address in this course. Genre theory can teach us a fascinating history of how various cultures imagine their forms of creative expression. The development of genres and subgenres reveal complex histories on who has the power to define and redefine creative expression. For example, the novel, now a dominant and prestigious global literary genre, was once considered an inferior and working-class genre in Europe over a century ago. The novel genre then developed into numerous subgenres, which are today placed under one large umbrella that is "genre-fiction," such as sci-fi, fantasy, horror, gothic, mystery etc.. However, the borders between these subgenres and the larger genre itself are always contested and reformulated. Through the history of genre and subgenre, we get to learn about literary taste and literary criticism, and whose definitions and conventions have changed the course of literature and the arts, and for what reason. The dominance of the historical novel today, for example, is attributed to larger phenomenon such as decolonization, feminism, and anti-racism. The sociopolitical urge to utilize fiction to address larger issues has not only boosted the impact of the historical novel but "elevated" it to become a common form of the genre itself. Within this grand history, Arabic literature has a complex and rich story to tell about genre and subgenre. The most obvious example here, which will be our entry point in this course, is 1001 Nights (also known as The Nights, or The Arabian Nights). This multi-volumed masterpiece has influenced fiction writers across the globe, especially in the past three centuries as the novel began to formulate into a modern genre. It is an exceptional work where we see a cosmology of subgenres of storytelling, narrative, but also of poetry, and in some editions, illustration and drawing, as well as translation. The Nights is often seen as the first hybrid work of literature where subgenres and forms co-exist but also blur and converge. This dynamic, revolutionary, and mobile nature of The Nights expresses the meeting of various cultures, experiences, and traditions of storytelling during the Abbasid empire.

Today, it remains ever more relevant and inspiring in a cosmopolitan world. The question and history of sub/genre, however, will guide us through an exploration of modern and contemporary Arabic literature. We will get to engage with these texts thematically, stylistically, and intellectually. The aesthetic choices made in literature are never isolated from the intellectual, political, and sociohistorical contexts of a given text. Through the assigned texts and artworks, we will also learn about colonization, gender, imperialism, class, migration, ecology, among other pressing topics. No knowledge of Arabic is necessary; all readings in English translation.

**L14 E Lit 3539 Jews, Jersey, and America: Philip Roth Reconsidered**

Beginning with the publication of his debut Goodbye, Columbus in 1959, Philip Roth remained a highly visible, and at times highly controversial presence on the American literary scene. Questions of Jewish American identity; the power struggle between fathers and sons; the irrationality of male sexual desire; the consequences of exercising one's (artistic, sexual, personal) freedom; the tumultuous history of Newark; the nature of the American experiment-these are the central concerns that percolate throughout his thirty-one books. In this course, we will read Roth's major novels and explore how his fiction addressed these questions. Moreover, we will discuss how we can approach Roth's fiction in the wake of such events as the Trump presidency, the Covid-19 pandemic, and the #Me Too Movement. How do we read Roth in the wake of the political and social traumas that have shaped our recent history? How does Roth's fiction speak to the recent rise in anti-Semitism? To help inform these questions, we will also consider how contemporary writers, such as Nicole Krauss and Taffy Brodesser-Akner, have directly reconsidered Roth's legacy in their fiction, rethinking his treatment on such topics as Jewish-American identity, sexual politics, and the status of the novel.

**L14 E Lit 3550 Undoing Empire: Introduction to Postcolonial Writing and Art**

This course introduces students to the histories and politics of postcolonial writing and art. By tracing the genealogies of writing and art produced in the aftermath of colonialism, this course will explore how writers, artists, and scholars working from the context of formerly colonized nations have responded to the legacies of racial, cultural, and economic oppression. Students will look at novels, poems, art, and theater produced by those working from Africa, the Caribbean, and other formerly colonized nations in order to chart the complex networks of political solidarity these works enable. Writers like Franz Fanon, Aimé Césaire, and Gayatri Spivak will be read alongside literary and artistic pieces by writers such as Chinua Achebe, Tsitsi Dangarembga, Jamaica Kincaid, Derek Walcott, Safiya Sinclair, Arundhati Roy and artists such as Zanele Muholi, Santu Mofokeng, Tessa Mars, William Kentridge, and others. Topics such as racial memory, postcolonial identity, radical aesthetics, and Afro-futurism will be explored.

**L14 E Lit 3552 Introduction to Literary Theory**

This course introduces students to some of the most influential theoretical approaches to interpretation applied to English-language literature; to significant conceptual and historical debates about literary and cultural theory; and to the keywords used in these debates. Students will learn how to write and speak about theoretical texts and how to recognize the theoretical assumptions that underlie acts of literary interpretation. Theoretical approaches to be featured may include formalism; Marxism; psychoanalysis; gender and sexuality studies; structuralism and post-structuralism; postcolonial studies; critical race studies; new historicism and cultural materialism; cultural studies; affect theory; neurocognitive approaches; and disability studies. This course fulfills the literary theory requirement for the English major; no substitutions will be permitted. In order to preserve necessary seats for English majors, the course will be enrolled through the wait list.

**L14 E Lit 359 Scribbling Women: 19th-Century American Women Writers**

In 1855, Nathaniel Hawthorne wrote to his publisher, William Tichnor, that "America is now wholly given over to a damned mob of scribbling women and I should have no chance of success while the public taste is occupied with their trash." In this class, we examine works of those scribbling women of the nineteenth century. We read one of the best selling novels of the century, one that created a scandal and ruined the author's literary reputation, along with others that have garnered more attention in our time than their own. In addition to focusing on these women writers, we also explore questions about the canon and American literature: What makes literature "good"? What constitutes American literature? How does an author get in the canon and stay there? Finally, in this writing intensive course, there are frequent writing assignments and a strong emphasis on the essential writing process of drafting and revising.

**L14 E Lit 359H Hot Takes: Cultural Criticism in the Digital Age**

The twenty-first century has seen a new and exciting wave of cultural criticism, and along with it a new wave of public intellectuals. Ta-Nehisi Coates, Roxane Gay, Jia Tolentino, Anne Helen Petersen, Jo Livingstone, Hanif Abdurraqib-at their best, writers like these aspire to the sort of indispensability on political, social, and artistic matters that their forebears like Susan Sontag, Norman Mailer, and James Baldwin had at midcentury. But these voices are unique because they emerged through and alongside a specifically online critical sphere, a space betwixt and between the comments section and the little magazine. This is the space of viral tweets and threads, "hot takes" and "think-pieces." It's a space of potentially greater democratization and diversity even as it is an opportunity for bigots and trolls. These writers are beholden to their networks, but those networks are far wider, more idiosyncratic and inclusive and incendiary-more unstable-than anything buttressing the vaunted public intellectuals of the past. This course examines the cultural critics of the contemporary moment in context of the critical space they opened and now occupy. We'll begin with a quick history of the "public intellectual" from the eighteenth century to the present before we log on. The rise and fall of Gawker, Grantland, and The Awl; The New Republic's controversial digital pivot; the feminist communities of The Hairpin and The Toast; the conservative "intellectual dark web"; the message boards of the early 2000s; the emergence of semi-academic sites like the Los Angeles Review of Books; the blogs and tumblrs and livejournals that nurtured the talents and provocateurs that we now find indispensable or unavoidable. We will dissect their style, understand their theory and practice, engage with their subjects, and investigate the way their writing has intersected with and propelled social media movements like Black Lives Matter, #MeToo, and #OscarsSoWhite. And we will consider the way these critics have influenced the way scholars and students approach the texts and topics we always have.

**L14 E Lit 363C Theatre Culture Studies III**

The third in the department's three-course history sequence, TCS III surveys the dramatic literature and cultural history of the modern theater. Beginning with Romanticism's self-conscious break with the past, we'll study the rise of bourgeois melodrama with its intensely emotional rendering of character and spectacular effects. We'll consider how those effects were made possible by advances in industrial stage technology which reproduced the everyday world with unprecedented verisimilitude, and how playwrights responded to those technologies by calling for the theatre to become either a "total work of art"--plunging its spectators into a mythical realm--or a petri dish--analyzing the struggles of the modern individual within his or her modern milieu. Exploring a range of aesthetic modes--including Realism, Naturalism, Symbolism, Expressionism, the Epic Theatre, and the Theatre of the Absurd--we will read classic plays by modern playwrights to consider how the modern theatre helped its audiences understand as well as adapt to the rapidly changing conditions of the modern world. Same as L15 Drama 365C

---

**L14 E Lit 365 The Bible as Literature**

The Bible is one book among many; the Bible is a book like no other; the Bible is not one book but many. The course will debate such positions and the different histories and practices of reading they involve. We shall read extensively in English translations of the Bible, both Jewish and Christian, with emphasis on literary form and ideas. We shall look at the Bible's material forms, and the history of its interpretation and translation. The aim is not to adjudicate its meaning but to explore what over time it has been taken to mean, attempting to locate within the book the potential for different interpretations. The course requires, and should foster, attentive reading, vigorous yet courteous argument, and respect for the readings of others.

---

**L14 E Lit 368 The Development of American Romantic Thought: Enlightenment Confidence to Postmodern Questioning**

We'll examine the revolutionary shift in human sensibility commonly known as "Romanticism" by tracing its development in America from the "Fireside Poets" (Bryant, Longfellow) and Transcendentalism (Emerson, Whitman) to anticipations of Modernism and Postmodernism (Henry Adams, Louis Sullivan, Charles Ives). Fulfills the 19c and Am lit requirements for the English major.

---

**L14 E Lit 369 Reading Sex in Premodern England**

This course introduces students to the literary representation of gender and sexuality in England from the medieval period to the eighteenth century. To understand a tradition that addressed the intractable problem of human sexuality in terms very different from ours, we will ask: how does pre-modern culture imagine gendered identities, sexual difference, and erotic desire? How do various contexts--medical, religious, social, private, public--inform the literary representation of gender and sexuality? What are the anatomies and economies of the body, the circuits of physical pleasure, and the disciplines of the self that characterize human sexuality? Students will have the opportunity to study romances, saints' lives, mystical writings, diaries, plays, sex

guides, novels, and scientific treatises. By learning how to "read sex" in pre-modern literature, students will acquire a broad cultural and historical understanding of English sexualities before the descent of modern sensibilities.

**L14 E Lit 370 The Age of Victoria**

Works of fiction, poetry, journalism, children's literature, political cartoons, book illustrations, genre paintings, and photographs. The course aims to give a sense of the age in all its diversity and peculiarity, as well as to concentrate on a few central issues and developments in 19th century British society: e.g. industrialism, materialism, feminism, liberalism, the rise of the social sciences. Readings will include works by Tennyson, Matthew Arnold, Lewis Carroll, Dickens, George Eliot, John Stuart Mill, Trollope, Oscar Wilde, and Edmund Gosse.

Credit 3 units. Art: HUM BU: HUM

---

**L14 E Lit 371 The Age of Chaucer**

Study of the ways in which literature and history interplay between 1340 and 1400. Literary texts include writings by Chaucer, Langland, the Pearl Poet, and anonymous composers of songs, dream visions, romances, satires, debates, and low stories; attempts to move from these to theoretical and over into historical texts, alienating where necessary and translating where possible.

**L14 E Lit 3731 Writing and the Representation of Pain**

Writing intensive course on the representation of pain at every level, from private suffering to public policy. Course reader consists of examples of or extracts from a diversity of materials: the "Bible" and "Ovid," medieval religious lyric, saints' lives, visions of hell and damnation, descriptions of visionary illness, Freud's "Anna O," Kafka's "In the Penal Colony," Wilde's "The Nightingale and the Rose," Woolf's "On Being Ill," Artaud and the theater of cruelty; autobiographical and other writings by Susan Sontag and Inga Clendinnen; theory by Bataille, Deleuze, Dollimore, and Elizabeth Grosz; work on pain by Leder, Morris, Rey and others; poetry by Anne Sexton, Sylvia Plath, Gwen Harwood, Alan Jenkins and others. We will also read Elaine Scarry's "The Body in Pain" and two recent novels: Andrew Miller's "Ingenious Pain" and Manil Suri's "The Death of Vishnu."

**L14 E Lit 376A Reading Across the Disciplines: Introduction to the Theoretical Humanities**

What does theory look like in an age like ours so sharply marked by interdisciplinarity and in which most humanities scholarship crosses disciplines-- for instance, combining literature or history with philosophy or critical race studies? In this way all (or almost all) humanities scholars are comparatists in practice if not always in name. The course is designed to introduce this complex and exciting state of affairs to Complit and English majors, yet any students in a humanities program, or with an interest in the humanities, will fit right in. Our main text is *Futures of Comparative Literature*, ed. Heise (2017), which contains short essays on topics like *Queer Reading*; *Human Rights*; *Fundamentalism*; *Untranslatability*; *Big Data*; *Environmental Humanities*. We will supplement this material with relevant short texts from a variety of fields, including some that cross over into the social sciences.

**L14 E Lit 381 Banned Books**

Why would anyone want to burn a book? Under what circumstances would you support censorship? Several years ago a Russian student was exiled to Siberia for possessing a copy of Emerson's "Essays"; today, schoolboards in the United States regularly call for the removal of "Huckleberry Finn" and "The Catcher in the Rye" from classrooms and library shelves. Actions like these dramatize the complex interconnections of literature and society, and they raise questions about what we read and the way we read. The course explores these issues by looking closely at several American and translated European texts that have been challenged on moral, socio-political or religious grounds to determine what some readers have found so threatening about these works. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin, Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments.

**L14 E Lit 3831 Topics in African-American Poetry**

Beginning with the year in which Gwendolyn Brooks became the first African American to win the Pulitzer Prize, we will examine the tradition of African American poetry and the ways in which that tradition is constantly revising itself and being revised from the outside. We will focus in particular on the pressures of expectation -- in terms of such identity markers as race, gender, and sexuality -- and how those pressures uniquely and increasingly affect African American poetry today.

**L14 E Lit 385W Comedy, Ancient and Modern**

In this course we will examine the nature of dramatic comedy and its role in society. We will read, discuss and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences? How have comic playwrights responded to issues such as class, gender, religion, and politics? Why does comedy have such power both to unite and to divide people? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy.

**L14 E Lit 386A Topics in African-American Literature: Rebels, Heroes and Race Men**

In this seminar-for we are fortunate to be an elite group this term-- we will focus on the first century of African American prose writers. In genre terms that means we will largely, but not exclusively, read autobiographies and novels. Phillis Wheatley, Frederick Douglass, and Harriet Jacobs are now familiar names in U.S. literature surveys, but others are not yet household names, and in fact may never be. We will survey a core group of texts, available at the WUSTL bookstore, but also supplement our readings with materials placed on BlackBoard, via online databases (e.g., materials accessible digitally from the Schomburg Division of the New York Public Library). For AFAS majors, this course counts as Area Requirement 1.

---

**L14 E Lit 388 African-American Literature: African-American Writers Since the Harlem Renaissance**

African-American literature in the 20th and 21st centuries grows from the Harlem Renaissance into a world-shaping institution. Guggenheim, Pulitzer, and Nobel prize winners; card-carrying Communists, rock-ribbed Republicans, and Black Power nationalists; Broadway playwrights, Book-of-the-Month Club novelists, and even a U.S. President are among the many whose fictions and memoirs we will study, with special attention given to the intimate links between Black writing and Black music. The syllabus will thus feature authors ranging from poet Alice Dunbar Nelson (born 1875) to satirist Colson Whitehead (born 1969), with more than a dozen stops in between.

Written assignments may include two papers and two exams. No prerequisites, but related courses such as E Lit 215 and/or AFAS 208 are suggested. Satisfies the American literature requirement in English and/or one 300-level elective requirement in AFAS.

Credit 3 units. A&S IQ: HUM, SC, SD BU: HUM EN: H

#### L14 E Lit 3881 Black Women Writers

When someone says, black woman writer, you may well think of Nobel Prize winner Toni Morrison. But not long ago, to be a black woman writer meant to be considered an aberration. When Thomas Jefferson wrote that Phillis Wheatley's poems were "beneath the dignity of criticism," he could hardly have imagined entire Modern Language Association sessions built around her verse, but such is now the case. In this class we will survey the range of Anglophone African American women authors. Writers likely to be covered include Phillis Wheatley, Harriet Wilson, Nella Larsen, Lorraine Hansberry, Octavia Butler, and Rita Dove, among others. Be prepared to read, explore, discuss, and debate the specific impact of race and gender on American literature. Same as L90 AFAS 3651

#### L14 E Lit 388C African American Literature: African American Writers Since the Harlem Renaissance

African American literature in the 20th and 21st centuries grew from a renaissance in Harlem into a world-shaping institution. Public enemies and Nobel prize winners; card-carrying Communists, rock-ribbed Republicans, and Black Power nationalists; Broadway playwrights, Book-of-the-Month Club novelists, and a duly elected U.S. president are among the authors we will study with special attention to the intimate link between black writing and black music. Aiming at chronological and stylistic breadth, the syllabus will begin with poet Alice Dunbar Nelson (born 1875) and end with novelist Colson Whitehead (born 1969), with an array of better-known names--W. E. B. Du Bois, Langston Hughes, Claude McKay, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, Ralph Ellison, James Baldwin, Gwendolyn Brooks, Amiri Baraka, Alice Walker, and Toni Morrison--coming in between. Assignments will consist of two papers, one presentation, and one exam. Prereqs: none, but related classes such as E Lit 2151 and E Lit 2152 and/or AFAS 255 are suggested. Satisfies the Twentieth Century requirement in English, and/or one 300-level elective requirement in AFAS.

#### L14 E Lit 394W Writing For and About the Theater

In this course, students will learn to write for and about the theater, exploring different forms of dramaturgical and scholarly research as well as journalistic and academic writing. To build skills in both critical analysis and synthesis, students will learn how the key elements of the playwright's text (e.g., language, character, plot, setting) work to create meaning within the work of dramatic literature and how theatre-makers use the various "languages" of the stage (e.g., costume/scenic/lighting design, music, acting) to give expression to an overarching interpretation of the play. Because research is essential to this course, students will learn how to access a variety of library resources by working closely with our subject librarians. By the end of the semester, students will have assembled a portfolio consisting of both journalistic and academic performance reviews, a dossier of dramaturgical research, and a research-based scholarly paper.

#### L14 E Lit 3951 Shakespeare's Sonnets: Framing the Sequence

We will begin by exploring ways of reading a small number of individual sonnets, proceeding thereafter to think about patterns of meaning in language and image across broader groupings and the sequence as a whole. We will investigate the influence of earlier sonnet tradition, especially Petrarch's sonnets, and the relationship of the poems to modes of sexuality and selfhood. Finally, we will ask how some of Shakespeare's most creative readers--including Wilde, Booth, and Vendler--have responded to the challenges of the Sonnets. Students will work on writing their own commentary on a group of poems.

#### L14 E Lit 3975 Wolves of Wall Street: American Business and Popular Culture

America's perceptions about Big Business and the Free Enterprise system have evolved and changed over time from the 1920s to the present. During the 1980s, for example, Oliver Stone's 'Wall Street' seemed to endorse the notion that "greed is good." Today, however, the topic of rising income inequality has been connected with the collapse of prestigious Wall Street firms, the "housing bubble," a declining middle class, and widespread fear about the future of "The American Dream." This new course examines a variety of artistic, ethical and historical perceptions about American Business as depicted in popular culture and the arts over the past hundred years. How have America's foremost artists (among them F. Scott Fitzgerald, Eugene O'Neill, Arthur Miller, Martin Scorsese), dealt with questions of conspicuous consumption, the acquisition of capital for its own sake, and the disparity between rich and poor? We survey several artistic genres and artistic forms, including American tragic works like 'The Great Gatsby' and 'Death of a Salesman,' to popular musicals such as 'How to Succeed in Business' without Really Trying and 'The Producers.'

**L14 E Lit 399 Senior Research Seminar**

This course is tailored to the needs of students who are pursuing honors in English in their senior year. It will develop students' ability to gauge how different approaches affect the research and the outcome of a project in literary studies. It will guide them in their research by analyzing and discussing research design, the construction of an archive, and the assessment and use of sources. Assignments will include annotated bibliographies, summaries of the critical debate on student topics, abstract writing, research presentations, as well as drafts and final versions of chapters or essays. We will workshop many of these assignments in the classroom and practice peer review. The seminar will stretch over two semesters, ending before spring break, when honors work is due in the college. It is required for students who pursue honors by coursework and by thesis.

**L14 E Lit 402 Introduction to Graduate Studies I: Research**

This course seeks to prepare students for successful doctoral study in English literature. We will examine the history of our discipline and its institutions, including shifting definitions of our objects of study and the histories of exclusion and inclusion that accompany these shifts. We will also consider issues of canonicity, especially as they relate to empire building both within and outside the academy. We will survey critical methodologies and consider what is at stake in the objects we read and the ways we choose to read them. Finally, we will introduce challenges

to the traditional organizing frameworks of humanism and national literature. Focused on the academic discipline of literary study, we will also consider the new ways in which the English Ph.D. is preparing students for multiple roles and careers both in and beyond academia.  
Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

**L14 E Lit 403 Black and White in American Drama**

This course will address the complex issue of race in America through the 19th and 20th centuries as dramatized by American playwrights, black and white. Authors include Countee Cullen, Lillian Hellman, Eugene O'Neill, Jean Toomer, Langston Hughes and Arthur Miller. Prerequisites: Junior standing, two 300 level courses or better.  
Credit 3 units. Art: HUM

---

**L14 E Lit 404 Topics for Writers: Beckett**

WAITING FOR GODOT, HAPPY DAYS, KRAPP'S LAST TAPE: these are but three of Samuel Beckett's revolutionary texts for theatre. The complete canon of plays will be examined for structure and compositional elements. Students undertake exercises in dramatic composition and perform a chamber presentation of *ENDGAME*. Course is intended for writers with some experience of the dramatic form. Intending students MUST interview with Instructor Nov. 12-14.  
Credit 3 units. Art: HUM

---

**L14 E Lit 405 Living Influences: Poets and the Poets Who've Shaped Them**

This course examines a number of very contemporary collections of poetry (e.g. from first books writers like Karen Volkman and Greg Williamson, to more established writers like Carl Phillips and Frank Bidart) to discover how generations of writers speak to and through one another. The course considers the nature and possible anxieties of writerly influence and how traditional and/or canonical writers' voices, verse, and vision have shaped a number of poets writing today. This class requires at least a basic knowledge of poetry in English up to the 1950's as we will be moving freely among writers such as Ben Jonson, George Herbert, Gerard Manly Hopkins and Emily Dickinson, as well as Pound, Eliot, Lowell, and Plath.

**L14 E Lit 4172 Roman Remains: Traces of Classical Rome in Modern British Literature**

This course will examine the use of the Roman textual and material inheritance in poets, novelists and critics of the late nineteenth and twentieth centuries working in Britain, and will ask how modernity addresses the claims of the classical tradition. We will place Thomas Hardy's "Poems of 1912-13" next to Vergil's Aeneid, then survey Hardy's relationship to the visible remainders of Rome and the people it conquered -- roads, barrows, forts -- in the landscape of Dorset. After examining the representation of the Celtic hill-fort in fiction, and the legacy of Vergilian representations of the countryside in poetry, we will consider representations of Rome in light of modern imperialism (Joseph Conrad's Heart of Darkness and Ezra Pound's Homage to Sextus Propertius) and examine the place of Vergil in T. S. Eliot's critical and poetic practice.

**L14 E Lit 424 Topics in American Literature II: Modernisms in America**

This course offers an advanced introduction to both the literature and the concept of modernism, the "ism" used to mark the experimental verve of early twentieth-century writing and to grasp its ties to modernity, or the modern social world. As the course title suggests, we will devote most of our time to the career of modernism in the United States, a place imagined as both the modernist nation par excellence and the desert modernism escaped to be born. Three groups of primary texts--early modernist experiments, 1920s modernist landmarks, and Great Depression revisions--will illuminate the grand ambitions of eccentric literary forms and sequestered avant-garde movements; the public disputes and buried alliances between "high" expatriate and Harlem Renaissance modernisms; and the influential Depression-era reinterpretation of modernism as reactionary self-indulgence. The syllabus will feature fiction, poetry, and drama by old and new literary celebrities: Djuna Barnes, John Dos Passos, T. S. Eliot, F. Scott Fitzgerald, Mike Gold, Ernest Hemingway, Nella Larsen, Meridel LeSueur, Claude McKay, Clifford Odets, Tillie Olsen, Ezra Pound, Jean Toomer, and Richard Wright. A shorter list of critical essays will highlight modernism's tendency to theorize itself while introducing 21st-century perspectives from the "New Modernist Studies." Satisfies the American requirement. For undergraduates, Junior or Senior standing is required. Credit 3 units. A&S IQ: HUM Art: HUM EN: H

**L14 E Lit 425 Early American Literature: American Modernisms**

his seminar offers an advanced introduction to both the literature and the concept of modernism, the "ism" used to mark the experimental verve of early twentieth-century writing and to grasp its ties to modernity, or the modern social world. As the course title suggests, we will devote most of our time to the career of modernism in the United States, a place imagined as both the modernist nation par excellence and the desert modernism escaped to be born. Three groups of primary texts—early modernist experiments, 1920s modernist landmarks, and Great Depression revisions—will illuminate the grand ambitions of eccentric literary forms and self-sequestered avant-garde movements; the public disputes and buried alliances between "high" expatriate and Harlem Renaissance modernisms; and the influential Depression-era reinterpretation of modernism as reactionary self-indulgence. The syllabus will feature fiction, poetry, and drama by old and new literary celebrities: Djuna Barnes, John DosPassos, T. S. Eliot, F. Scott Fitzgerald, Mike Gold, Ernest Hemingway, Ella Larsen, Meridel LeSueur, Claude McKay, Clifford Odets, Tillie Olsen, Ezra Pound, Jean Toomer, and Richard Wright. A shorter list of critical essays will highlight modernism's tendency to theorize itself while introducing 21st-century perspectives from the "New Modernist Studies."

**L14 E Lit 425C Humanities by the Numbers**

To what extent can computational techniques that draw on statistical patterns and quantification assist us in literary analysis? Over the semester, we will juxtapose the close reading of historical documents or literary works with the "distant reading" of a large corpus of historical data or literary texts. We will ask how the typically "human" scale of reading that lets us respond to literary texts can be captured on the "inhuman" and massive scales at which computers can count, quantify and categorize texts. While this class will introduce you to basic statistical and computational techniques, no prior experience with technology is required. Prerequisites: two 200 level or one 300-level course in literature or history. This is a topics-type course and the specific documents and works examined will vary from semester to semester. Please see semester course listings for current offerings. Same as L93 IPH 425

**L14 E Lit 426C Imagining the City: Crime and Commerce in Early Modern London**

The astonishing demographic and economic growth of early modern London, and the rapid increase in spatial and social mobility that accompanied this growth seemed to harbinger, in the eyes of many contemporaries, a society in crisis and perhaps on the brink of collapse. As increasing numbers of vagrants or masterless men flocked to the metropolis and a growing number of people - apprentices, domestic

labor, street vendors etc - lived on the fringes of legitimacy and at risk of lapsing into vagrancy, policing early modern London provided unique challenges for authorities. At the same time, the very notion of the social - a shared space of kinship and community could often seem to be under threat as an emerging market and a burgeoning commodity culture reshaped the traditional underpinnings of social and economic transactions. Yet, late Tudor and early Stuart London remained by far England's most prosperous metropolis, its primary market, home to a burgeoning print culture and nourishing theater and emerged, eventually, as the epicenter of a global economy. This course will consider the topographic, social and institutional configuration of early modern London and the ways in which these were reimagined and negotiated in the literature of the period. Drawing on the drama of the period and a wide array of pamphlet literature, we will discuss how civic institutions handled the growing influx of the poor and adapted to the increasing power of an emerging bourgeoisie who asserted themselves in unprecedented ways. In addition we will consider secondary sources ranging from maps, theories of urban space and social and economic historiography as well as digital archives and computational techniques that allow us to "scale up" our thinking about early modern London to a vast corpus of texts and documents.

---

**L14 E Lit 4282 English Modernist Fiction**

The first half of the twentieth century produced some of English fiction's greatest individual achievements, linked by writers' attempts to represent, through narrative experiments, a world in which many certainties about self and society were dissolving. Attentive reading of ten novels or short story collections; study of the historical and cultural contexts to which these writers were responding. Among writers to be considered: E.M. Forster, Virginia Woolf, D.H. Lawrence, Rebecca West, Joseph Conrad, Katherine Mansfield, and Ford Madox Ford.

**L14 E Lit 431 English Drama, Exclusive of Shakespeare, to 1642**

Studies of selected major plays against a background of change and tradition in English drama from its beginnings to the closing of the theatres.

Credit 3 units. Art: HUM

---

**L14 E Lit 4312 Early Drama**

This unit is concerned with English and European drama and spectacle from late Roman theatre onwards: primarily in England, but with comparative material from France and Italy. The chronological span of the course will end at about 1600; the working assumption is that

there is no clean break between 'medieval' and 'Renaissance' drama, but that the theatres and scripts of the late sixteenth century should be understood as developing out of, as well as departing from, earlier theatrical traditions and practices.

Credit 3 units. Art: HUM

---

**L14 E Lit 432 Topics in Renaissance Drama**

A study of Elizabethan and Jacobean theatrical culture--the plays, players, playwrights, and audiences of public theaters, private theaters, and banqueting halls. Study includes the plays of Lyly, Kyd, Marlowe, Jonson, Chapman, Ford, Beaumont, Fletcher, Marston, Middleton, Webster, and Shakespeare.

**L14 E Lit 432A Programming for Text Analysis**

This course will introduce basic programming and text-analysis techniques to humanities students. Beginning with an introduction to programming using the Python programming language, the course will discuss the core concepts required for working with text corpora. We will cover the basics of acquiring data from the web, string manipulation, regular expressions, and the use of programming libraries for text analysis. Later in the course, students will be introduced to larger text corpora. They will learn to calculate simple corpus statistics as well as techniques such as tokenization, chunking, extraction of thematically significant words, stylometrics and authorship attribution. We will end with a brief survey of more advanced text-classification terminology and topics from natural language processing such as stemming, lemmatization, named-entity recognition, and part-of-speech tagging.

**L14 E Lit 435 Childhood and Society: The Formation of Children's Literature**

An intensive examination of some of the major works that have shaped the canon and conception of children's literature in the English-speaking world. Among the authors to be studied are George Macdonald, Mark Twain, Kenneth Grahame, L. Frank Baum, Lewis Carroll, Robert Louis Stevenson, Rudyard Kipling, and others. If time permits at the end of the course, we will examine some works that appeared in the Brownies' Book, the children's publication of the NAACP that appeared in 1920 and 1921, edited by W.E.B. Du Bois and Jessie Fauset, a significant attempt to create a literature for children of color.

Credit 3 units. Art: HUM

---

**L14 E Lit 436 Craft of Fiction: Dialogue**

A literature/creative writing hybrid course, we'll concentrate on the element of dialogue in fiction. We'll focus on 20th Century novels and stories which use dialogue in radical ways or which place conversational dynamics at the center of their projects, probably including works by Don DeLillo, Henry Green, Grace Paley, and Philip

Roth. We'll consider the architecture of conversations--the evasions and hidden agendas; the art of the well-made monologue; how speech is shaped by varieties of linguistic capital; and secrets as a narrative device, extending into issues of conspiracy and paranoia. Since this will be a craft rather than a traditional literature course, we'll approach the texts as creative writers (although experience as such is not required), considering what they have to say through a primary emphasis on the means they develop to say it, and we'll put the craft into practice: assignments will include both a critical paper and a short story using radical elements of dialogue. We'll also make room for some consideration of the dynamics of actual conversations, outside of fiction, through a reading of some conversational analysts and speech-act theorists, and through some real-world experiments.

**L14 E Lit 449A Topics in Literature: Humanism**

In this course, we will read a broad range of literary works written by ethnic Chinese from various parts of the world. We will examine the notion of "Sinophone," primarily its implications to the challenge of cultural identity formation to those Chinese who are not traditionally identified as "Chinese" because of war, migration, immigration, colonialism, among others. We will also examine the meaning of being on the margins of geopolitical nation-states. Finally we will discuss the notions of hybridity and authenticity vis-a-vis literary representation. We will read works by ethnic Chinese writers from the United States, France, Taiwan, Hong Kong, Singapore, Malaysia, Mongolia, Tibet, and so on. This course is limited to seniors and graduate students only. All readings will be in English. Active class participation is required.

**L14 E Lit 4655 The Pre-History of Blogging: Social Media of the Enlightenment**

This course will explore the ways in which the Enlightenment-in France, England, Germany and the US-was shaped by the emergence of new literary forms, media, and technologies of communication. Like our blogs, Facebook, and e-mail, the eighteenth-century had its new social media-newspapers and literary journals, letters that surged through the national postal systems-as well as new social institutions-salons and coffeehouses-that served as forums for public debate. We will examine these novelties in order to investigate the often ambivalent heritage of the Enlightenment: the use of media to exchange knowledge and express dissent; the use of media for surveillance and State control.

**L14 E Lit 4692 Shakespeare and Performance**

How were Shakespeare's plays performed in their own day--in the Globe theater, with boy actors, and with very short rehearsal times? How, for the actor, did performance work on the outdoor stage, with the Globe's wide and deep acting platform and its intimate relationship to the audience? How might one stage Shakespeare today in an outdoor environment without lighting and with minimal sets, and with the capacity to move easily from one outdoor venue to another? From what social types in Renaissance England--such as merchants, prostitutes, aristocrats, constables, beggars, and princes--did Shakespeare draw? How can evolving ideas about race, gender, and sexuality inform the way we perform Shakespeare today? Addressing these questions

and others, the course weaves together performance and literary, critical, and historical study. Topics include blank verse, performing Shakespeare's prose, playing with figures of speech, working the Globe stage, engaging an outdoor audience, acting from a written "part" rather than an entire script, performing types, exploring Shakespeare's sources as performance alternatives, making Shakespeare new--and more. Students will rehearse and perform sonnets, scenes, and monologues based on social figures from Shakespeare's England. The course assumes a willingness to perform but not specialized acting training.

**L14 E Lit 486 The Business of Books**

Book publishing shapes our literary and intellectual landscape in defining ways, yet only with the recent rise of Publishing Studies has the theory and practice of publishing become a serious subject of attention within the academy. This course offers a broad introduction to publishing, with a practical emphasis on contemporary literary publishing. We will explore how publishing communities form in relation to aesthetics, demographics, and technologies, and will consider how ethics and business practices are defined within these communities. On the applied side, we will study editing, contracts, marketing, sales & distribution, infrastructure, and media, and students will write reader's reports, marketing plans, and a final paper analyzing a contemporary publishing project and placing its work in relation to the historical and cultural context, demonstrating how each particular publishing practice is adapted to its own cultural ecosystem. Industry professionals will visit to speak with the class by Zoom, and Professor Riker brings two decades of experience as a book publisher, author, and reviewer. Alongside these other activities, over the course of the semester students will follow the progression of a book published by the nationally acclaimed publishing house Dorothy, a Publishing Project, of which Professor Riker is the publisher.  
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L14 E Lit 4930 The Unmaking and Remaking of Europe: The Literature and History of the European War of 1914-1918**

The Great War of 1914-1918 is one of the most momentous events in history. We can approach its broad European import by reading its literatures comparatively. Far wider than the concerns of any one national ideology, the literature of record represents a profound crisis in the European cultural imaginary. A number of critical and interpretive issues will be in play in our readings, which will move through three major phases. We begin with the powerful immediacy of trench poetry (1914-1919), develop into the constructed narratives of the great postwar novels and memoirs (1920-1931), and then turn toward the retrospect of the 1930s, which is also the prospect on the next, now inevitable, war. The authors featured include combatant and civilian writers, names well-known and not so famous: Mann, Apollinaire, Owen, Pound, Cocteau, H.D., Woolf, Maurois, West, Celine, Joyce, Musil, Eliot, Rosenberg, Sassoon, Graves, Hardy, Trakl, Stramm, Lichtenstein,

Péguy, Barbusse, Manning, Jünger, Zweig, Brittain, and Kroner. All readings for class will be in English translation. Our secondary literature will provide approaches to specific texts and models of literary and cultural history that represent the longer-range importance of the war. Same as L16 Comp Lit 493

**L14 E Lit 496 Shakespeare Adv Course**

A study of Shakespeare's career as a dramatist, with intensive work on particular plays in the light of critical traditions. Prerequisite: E Lit 395C, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: HUM

---

**L14 E Lit 4968 Digital Methods in Literary Analysis: Shakespeare by the Numbers**

This course will explore how emerging digital techniques can help us read literary texts in new ways. We will read a set of Shakespeare plays closely but also work with a large corpus of plays by Shakespeare and his contemporaries as we cover basic text-mining and visualization techniques and use simple statistical and quantitative approaches to think about questions of genre and style. We will ask how the typically "human" scale of reading that lets us respond to these texts can be captured on they massive scales at which computers can count, quantify and categorize. What nuance is lost in this translation between "close" and "distant" readings and what insights are gained?

Credit 3 units. A&S IQ: HUM EN: H

---

**L14 E Lit 4969 Shakespeare in Production**

**L14 E Lit 4976 Advanced Seminar in Literature**

This seminar is an interdisciplinary examination of how Americans represented the Civil War during and after the titanic conflict, with special attention given to the period between 1865 and 1915. The course explores how painters, novelists, photographers, sculptors, essayists, journalists, philosophers, historians, and filmmakers engaged

the problems of constructing narrative and reconstructing national and individual identity out of the physical and psychological wreckage of a war which demanded horrific sacrifice and the destruction of an enemy that could not be readily dissociated from the self.

#### **L14 E Lit 498 The Spenser Lab**

This course involves graduate and undergraduate students in the ongoing work of the Spenser Project, an inter-institutional effort to produce a traditional print edition of the Complete Works of Edmund Spenser.

Credit 3 units. A&S IQ: HUM EN: H

---

#### **L14 E Lit 498A Special Topics in Playwriting: Art and Activism**

Taught by guest teaching artist, Regina Taylor, playwright, director, stage/screen actor, this course will focus on how art can effect change through personal expression. The monumental cultural shift that is in motion throughout the world will be explored through the specific lens of each student's life. Students will write short pieces and one-act plays that will explore where they are at this moment in time. Works in the class may be added to Regina Taylor's black album mixtape. No playwriting experience necessary. Course open only to juniors, seniors and graduate students.

Same as L15 Drama 498

Credit 3 units. BU: HUM

---

#### **L14 E Lit 498W The Spenser Lab**

In this Writing Intensive course, the students will be given a variety of writing tasks: writing commentaries, introductions, software manuals, grant proposals, software requirements, and design documents (SRDDs).

#### **L66 ChSt 114 First-Year Seminar: Childhood in Greek Antiquity**

Recent social histories exploring Greek childhood have emphasized the reconstruction of the ancient child's agency. Such studies have been interested to illuminate the lived experience of children and to apprehend their voices so often silent in the sources. While such inquiry has clearly widened our understanding of ancient children's lives, the present course is designed instead to explore explicitly the representation of children as particularly rich reservoirs of cultural values. Drawing upon a range of art historical and archaeological sources and literary genres, we will examine the ways in which children were presented to mirror back social mores, thus capturing the aspirations of ancient Greek society. As figures of future potential, children continue to offer social historians one of the most striking lenses through which to explore the question of our humanity. The protean answer to this question at once reveals the proximity and vast distance that stands between our modern society and the ancient Greek one.

#### **L66 ChSt 178 First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change**

The goal of this course is to provide a glimpse into how youth reshape African society. Whether in North Africa with the Arab Spring, in West Africa with university strikes, or in East Africa through a linguistic full bloom, youth have been shaping social responses to societies for a long period. In this course, we will study social structures, including churches, NGOs, developmental agencies as well as learn about examples of Muslim youth movements, and the global civil society. The course will also explore how youth impact cultural movements in Africa and how they influence the world. In particular, we will examine Hip-Hop movements, sports, and global youth culture developments that center on fashion, dress, dance, and new technologies. By the end of the course, students will have enriched ideas about youth in Africa and ways to provide more realistic comparisons to their counterparts in the United States. Course is for first-year, non-transfer students only.

#### **L66 ChSt 219 The Infant Mind: Sophomore Seminar**

What goes on inside the mind of an infant? In this course we will explore a variety of hot topics concerning how babies experience the world around them. We will cover topics such as temperament (Do babies get mad?), language and communication (How do infants learn words and what if a baby is exposed to more than one language?), the effects of poverty on the developing brain (Does it matter?), social categories and relationships (Do babies notice differences across people?), and morality (Do babies have a sense of justice?). We will also discuss how to put child development research into practice, for example, by considering research relevant to policies concerning vaccination, early childhood education, and whether screen time is okay for babies. Students will have ample opportunity to interact with children at a local childcare center, where they can experience first-hand the research they are learning about in class. If you are curious about the developing mind, human nature, or considering a career in a field that involves children (e.g., education, medicine, public policy) this course is for you. PREREQ: Sophomore standing, and is open to students from all majors. Enrollment is restricted to 20 sophomores or permission of instructor. Same as L33 Psych 219

#### **L66 ChSt 251 Juvenile Justice in the Black Experience**

This course examines the sociolegal past, present, and future of American juvenile justice, with a focus on the Black American experience. The course is organized in three parts. Part I surveys the late 19th- and early 20th-century development of the "parental state," including its institutional centerpiece (the juvenile court), its principle legal subjects ("dependents" and "delinquents"), and how these took shape alongside the contemporaneous rise of American Apartheid. Part II examines several key changes and challenges in contemporary juvenile justice, including the transformation of this institution in the wake of the Civil Rights Movement and the endurance of racialized juvenile social control in the post-Civil Rights period. Finally, Part III considers possible futures of youth justice in the United States and beyond as well as practical strategies for achieving equal protection within and beyond the law. For AFAS majors, this course counts as Area Requirement 2.

**L66 ChSt 299 Internship in Children's Studies**

This course offers up to three hours of academic credit (on a pass/fail basis) for an unpaid internship with an outside organization in some area of Children's Studies. Enrollment is restricted to Children's Studies minors and will require completion of a final written project as well as coordination with a site supervisor. For more information, please contact Dr. Wendy Anderson at andersonwl@wustl.edu or 314-935-9523.

Credit variable, maximum 3 units.

---

**L66 ChSt 300 Interdisciplinary Introduction to Children's Studies**

What is childhood? Is it supposed to be happy? And what can children's books, toys, and memoirs tell us about the experience of childhood in a certain time and place? This course is designed to introduce students to the field of children's studies, including readings in the history and literature of global childhood, excerpts from children's films and TV, visits from Wash U. faculty studying children across various disciplines, and real or virtual field trips to a children's museum and a juvenile detention facility. The course is intended to give students a richly detailed picture of how children and childhood are dealt with as subjects throughout the curriculum and the impact these approaches have had on how the greater society thinks about children. Freshmen are welcome to enroll. This course fulfills the Social Contrasts requirement in Arts & Sciences.

---

**L66 ChSt 3005 Children's Picture Books: Culture and Content**

Even in our world of apps and e-readers, paging through a picture book remains a beloved pastime for children. What has allowed the picture book to persist as a cultural object for over 300 years and what can it teach us about childhood? In this course, we will examine the history of the picture book, from the earliest illustrated educational texts to John Newbery's groundbreaking delights to the socially conscious picture books of the 21st century. We will use the picture book to trace important social and educational movements given its use as a tool to impart cultural values and knowledge. We will also examine important moments in picture book publishing history, most notably, the post-war Little Golden Books phenomenon. Authors and illustrators of study will include Randolph Caldecott, Beatrix Potter, Maurice Sendak, Ezra Jack Keats, Bruno Munari, Jerry Pinkney, Eric Carle, Tana Hoban, Leo and Diane Dillon, and Christian Robinson. Students will engage critically with both text and image, delving into the way images communicate meaning. The course will also contemplate important contemporary issues, most notably, race and representation in picture books and the rise of picture book bans. This course is well-suited for students interested in illustration, education, publishing, and cultural studies, and is appropriate for students pursuing the children's studies minor.

**L66 ChSt 301C The American School**

In this course we analyze the development of American schooling within the context of American social history. Our focus is on three general themes: the differing conceptions of schooling held by some American political, social, and cultural thinkers; the changing relationships among schools and other educational institutions such as the church and the family; and the policy issues and arguments that have shaped the development of schooling in America. We spend considerable time studying the history of schooling in relation to the enduring challenges and dilemmas of marginalized groups including but not limited to systemic racial inequalities, access to schooling and inequitable schooling experiences. Undergraduate students must enroll in Educ. 301C, while graduate students must enroll in Educ. 5001.

Same as L12 Educ 301C

---

**L66 ChSt 303 Gender and Education**

An examination of educational experiences, practices, and institutions across multiple levels (PK-university) using gender as a critical lens. Key topics include common beliefs, practices, and expectations related to gender in educational spaces, as well as the intersections between gender and other identities that may influence educational experiences and outcomes. Readings are drawn from multiple disciplines, including sociology, history, psychology, and philosophy. Students should be prepared to analyze their own gendered educational experiences in the context of the scholarship explored in the course, while also listening respectfully and reflecting on the experiences shared by classmates. Enrollment Note: Undergraduate students must enroll in Educ. 303, and graduate students must enroll in Educ. 5003.

Same as L12 Educ 303

Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC BU: BA EN: S

---

**L66 ChSt 304 Educational Psychology**

This is a course in psychological concepts relevant to education that is organized around four basic issues: (1) how humans think and learn; (2) how children, adolescents, and adults differ in their cognitive and moral development; (3) the sense in which motivation and intention explain why people act as they do; and (4) how such key human characteristics as intelligence, motivation, and academic achievement can be measured. Offered fall and spring semesters. Enrollment Note: Undergraduate students must enroll in Educ. 304. Graduate students must obtain approval of instructor and their advisor before enrolling in Educ. 5004.

Same as L12 Educ 304

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

**L66 ChSt 313B Education, Childhood, Adolescence and Society**

This course examines the social and developmental experiences of children and adolescents at the national and international level. Readings will focus on the development of children and adolescents from historical, sociological, psychological, and political perspectives. Students will examine how both internal and external forces impact the developmental stages of children and adolescents. Students will investigate the issues that impact children and adults such as poverty, war, media, schooling, and changes in family structure. Students will explore some of the issues surrounding the education of children such as the effects of high quality preschool on the lives of children from low income families and the connection between poverty and educational achievement. Students will focus on the efficacy of the "safety nets" that are intended to address issues such as nutrition, health, violence, and abuse. Throughout the course, students will review and critique national and international public policy that is designed to address the needs of children and their families throughout the educational process. Undergraduates must enroll in Educ. 313B, while graduate students must enroll in 513B.

Same as L12 Educ 313B

---

**L66 ChSt 3140 Sociolinguistics, Literacies, Schools, and Communities**

Literacy learning and development within a thriving community require attention to the linguistic, cultural, and economic diversity of students. Within an era of state standardization and accountability, it is imperative to use a systems approach in education that unites homes, schools, and communities. Differentiating instruction to meet the needs of all students, including English language learners and other traditionally marginalized groups of students, is essential. This course will introduce students to sociocultural theories of literacy across settings. It will prepare students to analyze how race, ethnicity, class, gender, and language influence the development of literacy skills. We will develop a multifaceted view of literacy that is embedded within culture and that acknowledges the influences of social institutions

and conditions. We will incorporate strategies for individual student needs based on students' backgrounds and prior experiences to deliver differentiated instruction and to teach students to set learning goals. Offered in fall semester only. Undergraduate students must enroll in Educ. 314, while graduate students must enroll in Educ. 5114. Same as L12 Educ 314

**L66 ChSt 3221 Girls' Media and Popular Culture**

This course will analyze girls as cultural consumers, mediated representations, cultural producers, and subjects of social anxiety. Readings will cover a range of media that have historically been associated with girlhood, including not only film, television, and digital media but also dolls, magazines, literature, and music. We will explore what role these media texts and technologies have had in the socialization of girls, the construction of their gendered identities, and the attempts at regulation of their behavior, sexuality, and appearance. Although the course will focus on girlhood media since the 1940s, we will consider how constructions of girlhood identity have changed over time and interrogate how girlhood identity intersects with race, sexuality, and class. The course will examine important debates and tensions arising in relation to girls' media. We will evaluate concerns and moral panics about girls and their relationship to or perceived overinvestment in media and compare and contrast this with accounts of girls as active media consumers and producers. We will critically analyze how girls have been understood to negotiate agency in relation to commercialized culture -- how they have been represented as wielders of "girl power," as passive or active consumers, as fans, and as media producers themselves. We will also analyze attempts to intervene in girls' media and popular culture and consider how these interventions have attempted to empower, inspire, or regulate girls or how they have worked to reinforce or challenge gendered understandings of childhood.

**L66 ChSt 3254 African Americans and Children's Literature**

This course explores two distinct themes: how African descended people have been depicted in American and British children's literature and how African Americans have established a tradition in writing for children and young adults. It will also examine two related questions: How has African American childhood been constructed in children's literature and how have African American writers constructed childhood in children's literature? We will look at such classic white writers for children like Helen Bannerman, Annie Fellows Johnston, and Mark Twain as well as efforts by blacks like the Brownies Book, published by the NAACP, and children's works by black writers including Langston Hughes, Ann Petry, Shirley Graham Du Bois, Arna Bontemps, Virginia Hamilton, Walter Dean Myers, Mildred Taylor, Floyd and Patrick McKissack, Julius Lester, Rosa Guy, Sharon Bell Mathis, bell hooks, and others. For AFAS majors, this course counts as Area Requirement 1. Same as L90 AFAS 3254  
Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

---

**L66 ChSt 3270 Comics, Graphic Novels, and Sequential Art**

This course traces the evolution of comics in the America from the "comic cuts" of the newspapers, through the development of the daily and Sunday strips, into the comic book format, and the emergence of literary graphic novels. While not a uniquely American medium, comics have a specifically American context that intersects with issues of race, class, gender, nationalism, popular culture, consumerism, and American identity. Comics have repeatedly been a site of struggle in American culture; examining these struggles illuminates the way Americans have constructed and expressed their view of themselves. The way comics have developed as a medium and art form in this country has specific characteristics that can be studied profitably through the lens of American Culture Studies.

---

**L66 ChSt 331 Topics in Holocaust Studies: Children in the Shadow of the Swastika**

This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period--the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children--both those they considered "Aryan" and those they designated "enemies" of the German people, such as Jewish children - an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. OPEN TO FRESHMEN. STUDENTS MUST ENROLL IN BOTH MAIN SECTION AND A DISCUSSION SECTION.  
Same as L21 German 331

**L66 ChSt 334 A History of the Golden Age of Children's Literature**

A survey of Golden Age texts for children from Lewis Carroll's "Alice in Wonderland" to W.E.B. Du Bois's "Brownies' Book," British and American, 1865-1925. Fiction, drama, poetry. In this course we will examine a remarkable period in the history of children's literature, covering a broad range of genres, from domestic fiction to fantasy

literature to stories of adventure. The settings include the British nursery, the American small town, the jungles of India, a deserted island, and a rabbit hole. The depictions of and assumptions about children that emerge from these disparate texts will guide our investigation of the period's concept of childhood and its relation to categories of identity and nation. Authors will include Alcott, Du Bois, Barrie, Baum, Burnett, Carroll, Mukerji, Nesbit, Stevenson, Sui Sin Far, and Twain.

Same as L14 E Lit 334

#### **L66 ChSt 336 The Cultural History of the American Teenager**

This course will explore the recent history of the teenager in the United States, from the rise of teen culture in the 1950s to the current state of adolescence in the new century. Why have so many novels and films memorialized adolescence? How has the period of development been portrayed in books and film? How have depictions and attitudes toward teen culture changed over the past fifty years? We will begin with J.D. Salinger's classic novel of adolescence alienation, *The Catcher in the Rye*, a book that in many ways helped initiate the rise of the youth movement in the 1950s and 60s. From there, we will read a series of novels and historical studies that will trace the changes in teen culture that have occurred over the past half century. Our class will also consider a few films, such as *Rebel Without a Cause* and *Dazed and Confused*, which have helped shape our conception of the American teenager. Ultimately, we will question what these depictions of teen culture can tell us about larger trends and concerns in American life. Readings will include Judy Blume's *Forever*, Stephanie Meyer's *Twilight*, and Colson Whitehead's *Sag Harbor*.

Credit 3 units.

---

#### **L66 ChSt 341 Children and Childhood in World Religions**

This course will investigate the roles children play in some of the world's major religious traditions and how those traditions construct their concepts of childhood. From child disciples to child martyrs, from the miraculous childhoods of religious founders to the rites marking childhood's end, and from divine commandments involving fertility to those mandating celibacy, we will explore a wide range of different religions' teachings about children and childhood. We will combine primary and secondary sources including written texts, movies/video, and web-based content in order to learn more about the complex relationships between children and the religious traditions of Judaism, Christianity, Islam, Hinduism, Buddhism, and Confucianism.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

---

#### **L66 ChSt 342 Childhood, Culture, and Religion in Medieval Europe and the Mediterranean World**

From child saints to child scholars and from child crusaders to child casualties, the experience of childhood varied widely throughout the European Middle Ages. This course will explore how medieval Jews, Christians, and Muslims developed some parallel and some very much divergent concepts of childhood, childrearing, and the proper cultural roles for children in their respective societies. Our readings will combine primary and secondary sources from multiple perspectives and multiple regions of Europe and the Mediterranean World, including a few weeks on the history and cultural legacy of the so-called Children's Crusade of 1312. We will conclude with a brief survey of medieval childhood and its stereotypes as seen through contemporary children's books and TV shows. This course fulfills the Language & Cultural Diversity requirement for Arts & Sciences.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

---

#### **L66 ChSt 344 Children's Television**

How does contemporary television imagine children? How does the industry speak to them, with what aims, and using what types of representational strategies and modes of address? In turn, how do young people respond, both as viewers and, with the advent and increasing accessibility of new technologies, as media producers? This seminar will address these and other related questions while introducing students to the study of children's television in cultural and critical media studies. Throughout, we will address the theoretical question suggested by the course's title, a reference to the work of literary scholar Jacqueline Rose: is children's television possible?

Same as L53 Film 344

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

#### **L66 ChSt 354 No Boys Allowed: Girlhood and Programming for Girls in the 19th and 20th Centuries, United States**

This course takes an intersectional feminist approach to studying girlhood in 19th and 20th Century United States using fictional accounts of girlhood, conduct books for girls, the history of girls' education, psychological theories of girlhood, girls' toys, and the development of extracurricular programming for girls. Each topic will allow us to study the way stereotypical girlhood of a particular historical moment serves a political purpose in articulating American identity. At the end of the course students will understand how the concept of girlhood is socially constructed, which means that understanding historical context is a core component of the course. The title of the course is a play on words because in the 19th century and the first half of the 20th century, most schools and boys' clubs excluded girls. All are welcome to enroll in the course. L77 100B Introduction to Women, Gender, and Sexuality Studies recommended, but not required.

Same as L77 WGSS 354

Credit 3 units. A&S IQ: SSC, SC Arch: SSC Art: SSC BU: BA EN: S

---

#### **L66 ChSt 3620 Anthropological Perspectives on the Fetus**

Where do we come from? How do we get here? When does "life" begin? Is the fetus a "person", or something else? How could we decide? This course will integrate biological, medical, philosophical, and cross-cultural perspectives to examine how various societies (including our own) understand the nature of the human fetus. The course will examine basic human embryology, beliefs about conception and fetal development, ideas about the moral status of the fetus, controversies surrounding pre-natal care and ante-natal diagnostic testing (including sex-selection and genetic screening tests), current controversies about fetal medicine and surgery, and the problem of abortion in cross-cultural perspective.

Same as L48 Anthro 3620

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

---

#### **L66 ChSt 381 Banned Books**

Why would anyone want to burn a book? Under what circumstances would you support censorship? Several years ago a Russian student was exiled to Siberia for possessing a copy of Emerson's "Essays"; today, schoolboards in the United States regularly call for the removal of "Huckleberry Finn" and "The Catcher in the Rye" from classrooms and library shelves. Actions like these dramatize the complex interconnections of literature and society, and they raise questions about what we read and the way we read. The course explores these issues by looking closely at several American and translated European texts that have been challenged on moral, socio-political or religious grounds to determine what some readers have found so threatening about these works. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin, Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments.

**L66 ChSt 4036 Children of Immigrants: Identity and Acculturation**

This seminar takes an interdisciplinary approach to children of immigrants as an analytical subject. The course texts are in sociology, anthropology, and cultural studies, and a significant number of our case studies focus on 1.5- and second-generation Asian Americans and Latinx. Identity and identity politics are main topics; in addition, the course will critically examine theories on acculturation and assimilation. Our discussions cover a wide range of topics from culture, ethnicity, and race, to bilingualism, education, family, school, ethnic community, and youth culture. Students are required to conduct an individual research project among a selected group of children of immigrants. Attendance on the first day of class is mandatory to reserve class enrollment.

---

**L66 ChSt 408 Education and Psychology of Exceptional Children**

Learning, psychological, cognitive and social characteristics of exceptional children and youth from gifted to those with disabilities. Study child and adolescent developmental stages and the application to educational settings through data-based decision making using assessment and student data in a critical thinking, problem solving team approach. Current practices of educational strategies, interventions, and modifications to differentiate instruction for individual learning needs are emphasized. Plan lessons and activities that address student's prior experiences, multiple intelligences, strengths, and needs to positively impact learning. Learn specific strategies for classroom management, consultation and collaboration with families, colleagues, and administrators to meet individual needs within a culturally and demographically diverse classroom. Influences of legislation, criteria used to identify children, and awareness of supportive services are explored. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: All students are enrolled onto the waitlist. Priority is given to Teacher/Deaf Education majors, prospective Teacher Education majors, and majors/minors in Educational Studies. Undergraduate students must enroll in Educ. 408 and graduate students must enroll in Educ. 6008.

**L66 ChSt 4280 History of Urban Schooling in the United States**

More than ever, schooling in urban areas is researched, and it is at the center of debates for improving U.S. schooling. This course, which is framed by contemporary issues, focuses on the history of urban schooling and policy to deepen our understanding of the contemporary landscape. We will focus on particular cities and their school districts; these may include New York, Boston, Chicago, Detroit, St. Louis, Los Angeles, San Francisco, and Atlanta. In this course, students will

develop a strong contextual understanding of the conditions of urban schooling; the history of urban school reform; and the debates over the purposes of urban schools, past and present. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor.

Same as L12 Educ 4280

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L66 ChSt 4289 Neighborhoods, Schools, and Social Inequality**

A major purpose of the course is to study the research and policy literature related to neighborhoods, schools and the corresponding opportunity structure in urban America. The course will be informed by theoretical models drawn from economics, political science, sociology, anthropology, education and law. A major focus is to gain greater understanding of the experiences and opportunity structure(s) of urban dwellers, in general, and urban youth, in particular. While major emphasis will be placed on data derived from the interface of urban environments and the corresponding institutions within them, the generational experiences of various ethnic groups will complement the course foci. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: All students are enrolled onto the waitlist. Priority is given to Department of Education majors, minors, and graduate students. Undergraduate students must enroll in Educ. 4289 and graduate students must enroll in Educ. 5289

**L66 ChSt 453B Sociology of Education**

There are few institutions that nearly all Americans pass through, and schools are one of them; around fifty million students are enrolled in preK-12 schooling in the United States. As such, schools are an institution deserving of rigorous scrutiny and careful interrogation. But in studying K-12 schools, we are in fact attending to a multitude of things - competing visions of and purposes for schools, and disparate experiences of accessing and navigating education that are widely divergent along axes of inequality. In this course, which will be conducted as a discussion-based seminar, we will engage with texts examining the enterprise of education from varied vantage points, but always through a sociological lens. We'll discuss the varied purposes theorists and practitioners envision for schools, and the extent to which schools live up to those ideals. We'll talk at length about how schools are a microcosm of many of the inequalities we see in the broader society, looking at issues of race, class, gender, and place. By taking a sociological lens to studying education, we'll learn a language and facility for rooting discussion of issues in education in theoretical grounding and empirical evidence. In so doing, students will develop the capacity to more critically assess scholarly research and public discourses on education, as well as their own experiences. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: All students are enrolled onto the waitlist. Priority is given to Department of Education majors, minors, and graduate students. Undergraduate students must enroll in Educ. 453B and graduate students must enroll in Educ. 5530

**L66 ChSt 4607 Education of Black Children and Youth**

This course provides an overview of the education of Black children and youth in the United States. Covering both pre- and post-Brown eras, students in this course offers a deep examination of the research focused on Black education. The social, political, and historical contexts of education, as essential aspects of American and African-American culture and life, will be placed in the foreground of course inquiries. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor.

---

### L66 ChSt 461B Construction and Experience of Black Adolescence

This course examines the construct of black adolescence from the general perspectives of anthropology, sociology, and psychology. It begins by studying the construct of black adolescence as an "invention" of the social and behavioral sciences. The course then draws upon narrative data, autobiography, literature and multimedia sources authored by black youth to recast black adolescence as a complex social, psychological, cultural and political phenomenon. This course focuses on the meaning-making experiences of urban-dwelling black adolescents and highlights these relations within the contexts of class, gender, sexuality, and education.

### L66 ChSt 481W History of Education in the United States

Examines education within the context of American social and intellectual history. Using a broad conception of education in the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, work place, and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas, and practices that have shaped American educational policy in different periods of our history. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: All students will be enrolled onto the waitlist. Because this is a writing intensive course, enrollment will most likely be 12-15 students. Enrollment preference will be given to students who are majoring/ minoring in Educational Studies, Teacher Education, History, American Culture Studies, and Children's Studies and to students needing to complete their Writing Intensive requirement. Instructor will e-mail students about enrollment. Undergraduate students must enroll in Educ. 481W, and graduate students must enroll in Educ. 5810.

### L66 ChSt 499 Senior Seminar in Children's Studies

The WU Children's Studies Minor brings together a range of disciplinary and methodological approaches to the study of children and childhood. In this one-credit seminar, meeting for five three-hour evening sessions, junior and senior Children's Studies minors will discuss a series of interdisciplinary readings about the past and future of Children's Studies as a field, reflect on their own pasts and futures in the Children's Studies Minor, and create and present portfolios of their minor experience. This course is a capstone experience for the minor in Children's Studies. Prerequisite: junior or senior standing and a minor in Children's Studies.

### L13 Writing 103 College Writing: Writing, Literature, and Justice

This course seeks to develop the advanced reading, writing, and research skills that students need in a university setting. It uses classical texts of the western tradition to investigate the question of justice and to develop arguable claims through the careful analysis of evidence. The act of crafting arguments, we will assume, is implicated in the question of justice because arguments depend on an ethics of persuasion. We will learn how to practice such an ethics as we improve our ability to understand and utilize four crucial aspects of academic writing: evidence, analysis, argument, and research. Mastering these aspects will make us proficient in the difficult art of judgment. It will allow us to make sense of some of the most powerful literary statements about justice, from Sophocles to Shakespeare to Toni Morrison. Note: THIS COURSE SATISFIES THE FIRST-YEAR WRITING REQUIREMENT FOR ALL DIVISIONS.

Same as L59 CWP 115

Credit 3 units.

---

### L13 Writing 104 Writing Identity

Who are you? This simple question becomes ever more complicated the more closely you examine it. How should you define yourself? By ancestry, hometown, gender, cultural allegiance, ethnic background, nationality, sexual preference, social class, personal history, fashion sense, career aspirations, taste in music, or by some other category? This course will examine the complexities of identity as they have been expressed in a wide variety of modern literary (and some philosophical) writings in order to develop the advanced reading, writing, and research skills that students need in a university setting. This course will satisfy the Writing 1 requirement.

Credit 3 units.

---

### L13 Writing 203 The Sentence in English

Though formal knowledge of English grammar is not always necessary for effective writing, learning it can help students understand how sentences are put together, and it can allow them to develop their own writing using a new set of skills. The Reed-Kellogg system of diagramming is a method of learning grammar by creating "pictures," or maps, of sentences. These pictures show the logical relations between words, phrases, and clauses, and they illustrate the choices writers are making as they craft individual sentences. Using a recent textbook by Eugene Moutoux, we will learn to diagram sentences both famous and ordinary, both contemporary and of historical interest. Our aims will be (1) to learn both the "rules" and the peculiarities of English grammar, (2) to understand how the structure of a sentence can influence its meaning, and (3) to use this knowledge productively in crafting and revising our own prose. By the end of the course, students should be able to diagram just about any sentence in English, whatever the genre or time period, including their own. Extensive practice in writing and revising sentences will give students a consciousness of how grammar and syntax influence the meaning and effectiveness of their own writing.

---

**L13 Writing 211 Writing 2**

This course invites students to pursue a writing project that centers on their own intellectual interests and that complicates their approaches to researched, creative, and analytical work. See section description for details about specific class emphases. Limit: 12 students. PREREQ: Writing 1 (L13 100).

Credit 3 units. A&S IQ: HUM EN: H

---

**L13 Writing 212 Rhetoric and Power**

The study of rhetoric, one of the original seven Liberal Arts, is perhaps more relevant today, in a world where diverse opinions reverberate 24/7 from television and the internet, than in ancient times when rhetors invented arguments to help people choose the best course of action when they disagreed about important political, religious, or social issues. How do we make our voices heard? How can we invent and present compelling written discourse. This course will introduce students to common rhetorical principles and to the disciplinary history of rhetoric and compositional studies. Assignments in this class include rhetorical exercise in invention and craft, imitations, and varied compositions, ranging from the personal to critical, from the biographical to argumentative. We will examine rhetorical principles (audience, context, kairos, exigency, ethos, pathos, logos, and so forth) that are employed, for example, not only in literary analysis but in law, politics, education, and science. We will aim for a mastery of craft and a refinement of thought.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 213 The Long Essay**

This course is designed for skilled writers who want to bring more complexity and depth to their style and content. Emphasis is on the innovation that can occur when we give sustained interest to our subjects in a long work. The class is particularly well-suited to students who wish to produce extended works of creative nonfiction, honors theses, or artist statements.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L13 Writing 220 Creative Nonfiction Writing 1**

A course designed to introduce students to the fundamental craft elements involved in writing creative nonfiction. While the course will cover the major forms within the genre of creative nonfiction, including literary journalism, biography, profiles, nature writing and travel writing, special emphasis will be given to personal essay and memoir. PREREQ: Writing 1.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 221 Fiction Writing 1**

A course designed to introduce students to the fundamental craft elements involved in writing fiction. PREREQ: Writing 1. 3 units.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 222 Poetry Writing 1**

A course designed to introduce students to the fundamental craft elements involved in writing poetry. PREREQ: Writing 1. 3 units.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 224 Playwriting**

An introductory course in playwriting. Limited to 8 students. Prerequisite: Writing 1 and permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 298 Journalism: Communications Internship**

For students undertaking projects in newspaper or magazine journalism, in radio or television, or in business, government, foundations, and the arts. The student must secure permission of the Chair of the Undergraduate Committee, file a description of his or her project with the Department and, at the end of the semester, submit a significant portfolio of writing together with an evaluation by the internship supervisor. Up to three units acceptable toward the Writing Minor, but cannot be counted toward the English Major or Literature Minor. Prereq: Writing 1. Must be taken Credit/No Credit.

Credit variable, maximum 3 units.

---

**L13 Writing 300I Independent Study**

This independent study in creative writing is for students who have taken the 200-level introductory course in the genre they want to focus on with the instructor. The whole syllabus should be directed toward developing the student's higher-level skills, among them the capacity to reflect on craft methods. It is strongly recommended that two to four multiple-page written assignments be assigned over the course of the semester.

Credit 3 units.

---

**L13 Writing 305 Modern Humor Writing**

This course will analyze and put into practice what makes good humor writing both good and humorous, from subject matter to the mechanics of setting up a punchline, from crafting an unexpected metaphor to perfecting the reversal.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 306W The Long Essay: Researched Writing**

Credit 3 units. A&S IQ: HUM, WI BU: HUM EN: H

---

**L13 Writing 307 Writing and Medicine**

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 309 Writing the Natural World**

For students interested in the environment and natural sciences. This course brings together essays from a wide range of communities including biology, physics, medicine, environmental studies, creative writing and more. Readings and assignments are intended to enhance students' understanding of the relationship between writing and their experience/knowledge of the natural world. Major assignments allow students to follow, explore, and write about their own unique interest in a related subject, and include a personal essay, an expository essay, and a researched argumentative essay, as well as peer review workshops, oral presentations, and revision. Students will record and explore their own experiences of nature in short creative assignments that prepare them for the major papers. Prerequisites: Writing 1 and junior standing.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 310 Guided Research in Composition: Theory and Pedagogy of One-to-One Writing Instruction**

This course teaches theoretical and practical approaches to the tutoring of writing, specifically focusing on tutoring writing within the context of undergraduate courses. Students will learn collaborative methods of tutoring writing, explore different approaches to writing comments on student work in various content areas, and examine the connections between writing and thinking. Students in this course will analyze their own writing processes and learn how to help others through the writing and revision process. Readings and

discussions will focus on writing theory and pedagogy, and students will practice one-to-one methods in mock conferences and with sample essays. Assignments: two short essays, a longer research paper and presentation, and a journal.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L13 Writing 311 Exposition

This advanced writing course considers style in relationship to audience and purpose, asking the writer to engage more consciously with writing conventions, and to explore strategies appropriate to various writing situations. PREREQS: Writing 1 (L13 100) and junior standing. A note for students and advisors: when registering refer to WebStac for updated information on section times and available seats.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

---

### L13 Writing 3111 Exposition (Visual)

This advanced writing course emphasizes writing and visual analysis, asking students to examine important forms of visual media to develop a sophisticated sense of the strategies, techniques, and the rhetoric of visual representation. PREREQ: Writing 1 (L13 100) and junior standing. Credit 3 units.

---

### L13 Writing 3112 Exposition: Writing and Medicine

For students who have a particular interest in health, illness, and medical care. Exposition is a course that considers style in relationship to audience and purpose, asking the writer to engage more consciously with writing conventions, and to explore strategies appropriate to various writing situations, from the more experimental and performative to the more formal and scholarly. The course will involve frequent practice in analyzing and critiquing, with special attention to techniques of organization, argument, and emphasis. Students in this special section of Exposition will read essays, journalism, and personal narratives about the experience of physicians and patients in the modern health care system. Students will use expository writing to think critically and personally about their own experiences with illness and disease. Pre-medical students might use this opportunity to write and think about the anticipated rewards and challenges of the profession they hope to join.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

---

### L13 Writing 312 Argumentation

This upper-level writing course considers the strategies of argumentation emphasizing audience awareness, reflective thinking and strategic presentation. We will explore elements of argument such as enthymeme, the three appeals, claim types, and fallacies. Students will learn to evaluate a wide range of arguments (including their own), considering the rhetorical strategies that make for effective argumentative performance in a given situation. The course will involve regular practice in both written and oral argument. Prereq: Writing 1 (L13 100) and junior standing. A note for students and advisors: when registering refer to WebStac for updated information on section times and available seats.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

---

### L13 Writing 313 Topics in Composition

Topics intended to increase the range and skill of writers who have already attained satisfactory competence. Typical subjects include applications of classical and modern rhetoric, writing problems in a variety of professional fields, differences between essay and research writing. Prerequisites: College Writing and junior standing.

Credit 3 units. A&S IQ: HUM, WI BU: HUM

---

### L13 Writing 313A Topics in Composition

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L13 Writing 314 Topics in Composition

An advanced writing course focusing on selected topics related to writing. Topics to be chosen by department/instructor. See section description for details about specific class emphases. (Note: In some cases, this course may be cross-listed with other programs/departments and may satisfy the writing-intensive requirement.) PREREQ: Writing 1 (L13 100) and junior standing.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM EN: H

---

### L13 Writing 320 Creative Nonfiction Writing 2

This course is aimed at undergraduates who have taken Non-Fiction Writing 1 and wish to pursue both their development as writers and the study of craft in the context of a more rigorous workshop. PREREQ: Writing 1, Non-Fiction Writing 1.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L13 Writing 3208 Imaginative Fiction: Science Fiction and Fantasy

Credit 3 units. A&S IQ: HUM EN: H

---

### L13 Writing 321 Fiction Writing 2

This course is aimed at undergraduates who have taken Fiction Writing 1 and wish to pursue both their development as writers and the study of craft in the context of a more rigorous workshop. PREREQ: Writing 1, Fiction Writing 1. 3 units.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L13 Writing 321J Mellon Undergraduate Fellows Seminar

Credit 1.5 units. A&S IQ: HUM, WI Arch: HUM Art: HUM EN: H

---

Credit 1.5 units. A&S IQ: HUM, WI Arch: HUM Art: HUM EN: H

---

### L13 Writing 321W Mellon Undergraduate Fellows Seminar

Credit 3 units. A&S IQ: HUM, WI EN: H

---

### L13 Writing 322 Poetry Writing 2

This course is aimed at undergraduates who have taken Poetry Writing 1 and wish to pursue both their development as poets and the study of craft in the context of a more rigorous workshop. PREREQ: Writing 1, Poetry Writing 1. 3 units.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L13 Writing 322W Kling Undergraduate Honors Fellowship Seminar

Credit 3 units. A&S IQ: HUM, WI EN: H

---

### L13 Writing 323 Fiction Writing: The Short-Short, Sudden Fiction, and Microfiction

This course is aimed at undergraduates who have taken Fiction Writing 1 or Poetry Writing 1 and wish to further explore the craft of fiction through the medium of the short-short story-a story. The course will focus on reading, writing, and thinking critically about short-shorts.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L13 Writing 324 Fiction Writing: Coming of Age in the Short Story

A fiction writing course that explores coming of age themes.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L13 Writing 325 Poetry Writing: The Poetry of Travel**

This course is offered for students who have taken Poetry 1 and are interested in further developing their craft.

Credit 3 units. A&S IQ: HUM EN: H

---

**L13 Writing 326 Fiction Writing: Stories in the Suburbs**

In the fifties, the suburbs were still somewhat of a novelty in American culture—most people still lived in cities and small towns, or on the farm. Back then, Levitowns and the like were embraced with either gee-whiz optimism, or seen as sinister dystopias where youth, ideals, and romance went to fester and die. But now that the American mainstream is stucco McMansions, strip malls, and big box stores; now that the suburbs have become more ethnically diverse; now that literature is being generated from these places instead of just about them, how have stories set in the 'burbs changed? We'll read short stories written from the fifties until the present day exploring this particular setting, and, through a series of exercises, workshops, and our own short fiction, we'll explore the milieu as writers (whether we happen to be from the suburbs or not), always on the lookout for the unexpected in these familiar places.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L13 Writing 327 Creative Nonfiction: Personal Essay and Memoir**

This is an intermediate course in writing creative nonfiction, with a concentration on personal essay and memoir. PREREQ: Creative Nonfiction Writing 1.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 330 Fiction Writing: Fiction and Obsession**

Desire is at the heart of fiction, from the forces that drive the decisions characters make to the ways stories work on us as readers.

Credit 3 units. A&S IQ: HUM EN: H

---

**L13 Writing 331 Fiction Writing: Historical Fiction**

A literature/creative writing hybrid course, students will read a number of contemporary historical fictions and then write one of their own. We'll consider the ways in which these fictions inhabit, depart from, and reflect upon the historiography and history they're built from—upon the indeterminacy of the historical record, and the limits of its reach—but we'll also discuss fiction's responsibility to historical "facts" and documents, and the relevance of fictions among non-fictions in approaching an event or figure. PREREQ: Writing 1, Fiction 1

Credit 3 units. A&S IQ: HUM EN: H

---

**L13 Writing 333 Copyediting**

This course fulfills one of the requirements of the Publishing track in the English major, but all students who wish to improve their skills in editing and revision are welcome. We will begin with definitions of editing in the publishing world, but move quickly to focus on the practice of editing for grammar, syntax, and mechanics. While learning the conventions for edited prose suggested by the Chicago Manual of Style, we will note how arbitrary those conventions are by looking at other systems (e.g., MLA, APA, AMA) next to Chicago's. Two exams will assess what students have learned about editorial practice, including citation of source, as well as grammar, syntax, and style. Three written projects will ask students to do their most careful work in editing, analysis, and revision. The final project, with presentation, will ask students to learn about fact checking. Active participation in discussions of this often controversial material will be expected.

Credit 3 units. A&S IQ: HUM EN: H

---

**L13 Writing 351 Introduction to Playwriting**

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 352 Introduction to Screenwriting**

Writers will explore the various elements, structures and styles used in crafting a motion picture screenplay. They will experience this process as they conceive, develop and execute the first act of a feature-length script. Writers will create a screenplay story, present an outline for class discussion and analysis, then craft Act One. Writers will be encouraged to consult with the instructor at various stages: concept, outline, character and scene development, and dialogue execution. While the students fashion their screenwriting independently, the class will also explore the general elements of THEME, GENRE, and VOICE. A more specific examination of mechanics, the nuts and bolts of story construction, plotting, pacing, etc. will follow to support the ongoing writing process. In-class exercises will aid the writer in sharpening skills and discovering new approaches to form and content. Writers' work will be shared and discussed regularly in class. Screening of film scenes and sequences will provide students with concrete examples of how dramatic screenwriting evolves once it leaves the writer's hands. Same as L53 Film 352

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 360 The Art of Publishing**

This course introduces students to the art and craft of book publishing through a practical emphasis on types of writing and thinking that are specific to publishing, and by creative engagement with the variety of forms books now take in our culture. As part of our study, we will follow two different books through the publication process, studying the different roles (editor, designers, marketer, publicist) that contributed to their creation and their published life. We will have frequent class Zoom visits by book professionals who worked on the books we are studying, as well as writing assignments (such as reader's reports, jacket copy, and book reviews) that put you in the position of working on these titles yourself. And we will have creative assignments in which you apply what you've learned to hypothetical publishing projects of your own. NOTE: This course is one of three required courses for students enrolled in the Publishing Concentration.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

**L13 Writing 372 Music Journalism**

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 373 Cultural Journalism**

In the Internet Age, journalism has migrated from traditional, or "legacy" institutions (book publishers, film & television production companies, newspapers) to digital versions of the same thing, however the craft remains tied to its legacy models. The migration online has endangered certain ecologies of journalistic practice - in particular, arts journalism, especially criticism, the long form investigative essay, and foreign reporting. The first two of these three fit under what I describe as cultural journalism, and our purpose in this class is to practice what have been Cultural Journalism's forms, at the same time as we inquire into the modes and genres that are its future.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

---

**L13 Writing 375 Political Writing**

Defined most simply, politics is that which pertains to the "affairs of the polis," one's community. In its real-life context, writing always interacts with a community in some way, engaging a defined audience to produce an intended effect. In this sense, writing always touches the affairs of a polis, and thus, writing is inherently political, regardless of whether the writer considers this during composition. In this class, we will focus on explicitly political writing by writers who are not politicians, that is to say, sanctioned experts in the affairs of the polis. Foregoing public policy memoranda and economic analyses, we will look at how journalists, grassroots organizers, and creative writers have consciously written to intervene in the affairs of their communities

despite their outsider status. Using techniques of rhetorical analysis and logical structure, we will examine how these writers crafted works that inspire and move audiences through the conventions of several genres: essay, polemic, journalism, and satire.  
Credit 3 units. A&S IQ: HUM, SD, WI Arch: HUM Art: HUM BU: HUM EN: H

---

### L13 Writing 400I Independent Study

This independent study in creative writing is envisioned as more specialized than a 300-level course, with students intensively investigating a particular topic, theme, craft element, genre, and so on. Students should, along with the instructor, create an intensive reading list in the area of focus and complete a substantial creative project during the semester.  
Credit 3 units. BU: SCI

---

### L13 Writing 401 Writing for Children and Young Adults

In this course we will examine various genres of writing for young people: poetry, fiction, and non-fiction.  
Credit 3 units.

---

### L13 Writing 403 Dramaturgy Workshop

A laboratory course that investigates dramaturgy from four vantage points: New Play Dramaturgy, Institutional Dramaturgy, Dramaturgy of Classics, and Dramaturgical Approaches to Nontraditional and Devised Theater. This is a "hands-on" course where student dramaturgs will not only pursue the study of dramaturgy, but will work actively and collaboratively with playwrights, actors and each other.  
Same as L15 Drama 403  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM

---

### L13 Writing 405 Rhetorical Theory: Problems and Methods

Credit 3 units. A&S IQ: HUM BU: HUM

---

### L13 Writing 4131 Topics in Composition

Composition topics course -- offerings will vary from semester to semester.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L13 Writing 417 Prose Style in English: History and Craft

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L13 Writing 420 Advanced Nonfiction

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L13 Writing 421 Advanced Fiction Writing

For qualified students who wish to continue their creative writing and reading through immersion in an intensive fiction workshop. Students wishing to enroll must not only register but also submit a 15 page (double-spaced) fiction sample. The sample must include a cover page with: your name, the semester you took Fiction Writing 2, and the name of the Fiction Writing 2 instructor. Submit samples to the English Dept. mailbox of the L13 421 instructor no later than April 20th. No one is officially enrolled in this class until contacted by the instructor. PREREQ: Writing 1, Fiction Writing 1, Fiction Writing 2.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L13 Writing 422 Advanced Poetry Writing

For qualified students who wish to continue their creative writing and reading through immersion in an intensive poetry workshop. Students wishing to enroll must not only register but also submit 8 poems. The sample must include a cover page with: your name, the semester you took Poetry Writing 2, and the name of the Poetry Writing 2 instructor.

Submit samples to the English Dept. mailbox of the L13 421 instructor no later than April 20th. No one is officially enrolled in this class until contacted by the instructor. PREREQ: Writing 1, Poetry Writing 1, Poetry Writing 2. 3 units.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L13 Writing 423 Proseminar in Writing: Nonfiction Prose

For students qualified to pursue their own projects in nonfiction prose; criticism by other members of the class and by the instructor. Limit: 12 students. Prerequisite: permission of instructor upon submission of writing samples.  
Credit 3 units.

---

### L13 Writing 424 Poetry Tutorial

These credits are available to students who have completed Poetry I and Poetry II. This is an opportunity for students who have already completed Advanced Poetry, or who are not able to take Advanced Poetry because of scheduling conflicts, to meet individually with the instructor to develop a portfolio of poems. During weekly meetings students will explore various writing processes and revision techniques. There will be directed readings and discussions of selected topics related to contemporary poetry and poetics. Credits may be taken concurrently with Advanced Poetry. Permission of the instructor is required.  
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L13 Writing 431 Craft of Fiction

A literature/creative writing hybrid course; students will read a number of contemporary historical fictions-an increasingly important and innovative genre-and then write one of their own.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L13 Writing 432 The Craft of Poetry

This course is for writers who wish to study long-form poetic composition and book arrangement. The major assignment will be to compose a poem or poetic sequence of considerable length. Gwendolyn Brooks ("The Anniad") and Theresa Hak Kyung Cha ("Dictee") will be chief among our guides. We will study how poets arrange their books, and we will also make a brief foray into the material history of the book. Texts by Rosa Alcalá, John Ashbery, Daniel Borzutzky, Barbara Guest, Lyn Hejinian, Lorine Niedecker, Alice Notley, George Oppen, Ed Roberson, Brian Teare, and Simone White will also be included. This course counts toward the creative writing concentration. Prerequisite: L13 322.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L13 Writing 440 Critic as Writer

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L13 Writing 4521 Advanced Screenwriting

This course is intended for students who have already taken Film Studies 352, "Introduction to Screenwriting." Building on past writing experiences, students will explore the demands of writing feature-length screenplays, adaptations, and experimental forms. Particular attention will be paid to the task of rewriting.  
Same as L53 Film 452  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L13 Writing 4731 Advanced Playwriting

This course explores the tendencies and relationship between each individual student writer and the page. Exercises dispel any lingering doctrine that presupposes a certain style of writing. A large part of the class centers around collaborations. The writers write scenes as a final project for an acting class, and also work with two professional

actors in an extended writing project that culminates in a script-in-hand presentation. The informal moments between collaborations look at the process beyond the first draft -- i.e., the playground of language, non-verbal options, and the maintaining of "the work" through rewrites, readings, workshops, and productions. Prerequisite: Introduction to Playwriting, Drama 227.

Same as L15 Drama 473

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L13 Writing 490 Creative Writing Capstone Seminar

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

## English Literature Major Program Requirements

- **Total units required:** 30

### Required Courses

Code	Title	Units
E Lit 2151	Literature in English: Early Texts and Contexts	3
E Lit 2152	Literature in English: Modern Texts and Contexts	3
E Lit 3552	Introduction to Literary Theory	3

### Requirements

In addition to the 9 units of required coursework, students must complete 21 units of upper-division (300- and 400-level) course work (at least 6 units of which must be at the 400 level), distributed as follows. Students must earn a C or better in all courses to count them toward the major:

#### 1. Historical requirements

- Three historical courses, covering three of the following five historical periods in American, British, or Anglophone literature and including at least one course from each of the following two groups:

##### Group 1

- Medieval
- Early Modern

##### Group 2

- The 18th Century
- The 19th Century
- The 20th Century and Later

#### 2. One course centered on either global or minority literatures

At least one 300- or 400-level literature course must be taken in one of the following areas:

- *Global literatures* in English, defined as the Anglophone literatures of Africa, the Caribbean, South Asia, and other non-British or non-U.S. territories
- *Minority literatures* of the United States or the United Kingdom, which include Anglophone African American, Asian American, Native American, Latinx, and Black British writing.

Each semester, official course listings will designate the courses selected by the English Department Curriculum Committee that may be chosen to meet this requirement. Courses applied to this requirement may also satisfy other English major requirements involving historical range (requirement 1) and the need to complete two 400-level courses (requirement 4).

#### 3. Portfolio capstone

All majors are required to complete a portfolio capstone project, for which the student provides a 200-level paper, a 400-level paper, and a brief essay (two to three pages) that reflects on the student's overall learning experience in the major.

### Additional Information

- Only one cross-listed course not home-based in English may be counted toward the 21 units required. The two required 400-level courses must be home-based in English.
- A maximum of 6 units from the School of Continuing & Professional Studies and/or Summer School courses may count toward the major. These selections require English department approval.
- Study abroad students are expected to complete the 200-level prerequisite courses and at least two upper-level courses in English literature before going abroad.
- 3 units of 300- or 400-level courses in the literature of a language other than English may be counted toward the English major.
- Before the end of their junior year, majors are encouraged to consult with advisors regarding the fulfillment of major requirements.

Phone: 314-935-5190

## English Literature Major, Creative Writing Specialization

### Program Requirements

- **Total units required:** 30

## Prerequisites

Code	Title	Units
E Lit 2151	Literature in English: Early Texts and Contexts	3
E Lit 2152	Literature in English: Modern Texts and Contexts	3

## Requirements

24 units of upper-division (300- and 400-level) work (at least 6 units must be at the 400 level), distributed as follows:

### 1. Four required courses

- E Lit 3552 Introduction to Literary Theory
- Three historical courses, covering three of the following five historical periods in American, British, or Anglophone literature and including at least one course from each of the following two groups:

#### Group 1

- Medieval
- Early Modern

#### Group 2

- The 18th Century
- The 19th Century
- The 20th Century and Later

### 2. Four electives

### 3. One course centered on either global or minority literatures

At least one 300- or 400-level literature course must be taken in one of the following areas:

- *Global literatures* in English, defined as the Anglophone literatures of Africa, the Caribbean, South Asia, and other non-British or non-U.S. territories
- *Minority literatures* of the United States or the United Kingdom, which include Anglophone African American, Asian American, Native American, Latinx, and Black British writing

Each semester, official course listings will designate the courses selected by the English Department Curriculum Committee that may be chosen to meet this requirement. Courses applied to this requirement may also satisfy other English major requirements involving historical range (requirement 1) and the need to complete two 400-level courses (requirement 4).

### 4. Eight upper-division courses in all (including two 400-level courses)

- All courses must be taken for letter grades.
- The student must receive a grade of C or better in all courses.
- Only one cross-listed course not home-based in English may be counted toward the 24 units required. The two required 400-level courses must be home-based in English.
- A maximum of 6 units from the School of Continuing & Professional Studies and/or Summer School courses may count toward the major. These selections require English department approval.
- Study abroad students are expected to complete the 200-level prerequisite courses and at least two upper-level courses in English literature before going abroad.
- 3 units of 300- or 400-level courses in the literature of a language other than English may be counted toward the English major.
- Before the end of their junior year, majors are encouraged to consult with advisors regarding the fulfillment of major requirements.

### 5. Portfolio capstone

All majors are required to complete a portfolio capstone project, for which the student provides a 200-level paper, a 400-level paper, and a brief essay (two to three pages) that reflects on the student's overall learning experience in the major.

## Creative Writing Specialization

There is the option of completing an English Literature major with a creative writing specialization. To do so, students must take five creative writing courses, including at least three upper-division courses. Students will specialize in one particular genre — poetry, fiction, or creative nonfiction — and, ultimately, take a three-course sequence (200-, 300-, and 400-level courses) in that genre while taking at least one course outside of the chosen genre. The specialization requirements will not change the requirement structure for the English major and, thus, requires 6 additional credit units to complete as compared with a regular English Literature major. For more information, please consult the description of the major on the English department website.

Phone: 314-935-5190  
Email: [english@wustl.edu](mailto:english@wustl.edu)  
Website: <http://english.artsci.wustl.edu>

## English Literature Major, Publishing Specialization

### Program Requirements

- **Total units required:** 36

## Required Courses

Code	Title	Units
E Lit 2151	Literature in English: Early Texts and Contexts	3
E Lit 2152	Literature in English: Modern Texts and Contexts	3
E Lit 224	Publishing: History and Contexts	3
Writing 360	The Art of Publishing	3
Writing 333	Copyediting	3
E Lit 3552	Introduction to Literary Theory	3

## Requirements

In addition to the 18 units of required course work, students must complete 18 units of upper-division (300- and 400-level) course work (at least 6 units of which must be at the 400 level), distributed as follows. Students must earn a C or better in all courses to count them toward the major:

### 1. Historical requirements

- Three historical courses, covering three of the following five historical periods in American, British, or Anglophone literature and including at least one course from each of the following two groups:

#### Group 1

- Medieval
- Early Modern

#### Group 2

- The 18th Century
- The 19th Century
- The 20th Century and Later

### 2. One course centered on either global or minority literatures

At least one 300- or 400-level literature course must be taken in one of the following areas:

- *Global literatures* in English, defined as the Anglophone literatures of Africa, the Caribbean, South Asia, and other non-British or non-U.S. territories
- *Minority literatures* of the United States or the United Kingdom, which include Anglophone African American, Asian American, Native American, Latinx, and Black British writing.

Each semester, official course listings will designate the courses selected by the English Department Curriculum Committee that may be chosen to meet this requirement. Courses applied to this requirement may also satisfy other English major requirements involving historical range (requirement 1) and the need to complete two 400-level courses (requirement 4).

### 3. Publishing electives

Two additional courses focusing on publishing, drawn from inside and outside the department. These electives require approval from the director of the Publishing Specialization.

### 4. Portfolio capstone

All majors are required to complete a portfolio capstone project, for which the student provides a 200-level paper, a 400-level paper, and a brief essay (two to three pages) that reflects on the student's overall learning experience in the major.

## Additional Information

- Only one cross-listed course not home-based in English may be counted toward the 21 units required. The two required 400-level courses must be home-based in English.
- A maximum of 6 units from the School of Continuing & Professional Studies and/or Summer School courses may count toward the major. These selections require English department approval.
- Study abroad students are expected to complete the 200-level prerequisite courses and at least two upper-level courses in English literature before going abroad.
- 3 units of 300- or 400-level courses in the literature of a language other than English may be counted toward the English major.
- Before the end of their junior year, majors are encouraged to consult with advisors regarding the fulfillment of major requirements.

Phone: 314-935-5190

## Children's Studies Minor Program Requirements

- **Total units required:** 16

### Required Courses

Code	Title	Units
ChSt 300	Interdisciplinary Introduction to Children's Studies	3
ChSt 499	Senior Seminar in Children's Studies	1
<b>Total Units</b>		<b>4</b>

### Core Courses

Students choose 6 units from the following list:

Code	Title	Units
ChSt 301C	The American School	3
ChSt 313B	Education, Childhood, Adolescence and Society	3
ChSt 318	Topics in American Literature (when taught as "The Cultural History of the American Teenager")	3
ChSt 321	Developmental Psychology	3
ChSt 325	Psychology of Adolescence	3
ChSt 334	A History of the Golden Age of Children's Literature	3

**Note:** The children's studies minor will allow minors to substitute one elective course in children's studies for one core course that the student has taken but needs to count toward a different major or minor (e.g., ChSt 321 Developmental Psychology for a Psychological & Brain Sciences major). The number of independent credits required for the children's studies minor remains the same, but minors in this situation have more choices for those 3 credits.

Two core courses must come from two different home departments. Both ChSt 301C The American School and ChSt 313B Education, Childhood, Adolescence and Society are Education courses; ChSt 318 Topics in American Literature and ChSt 334 A History of the Golden Age of Children's Literature are English courses; and ChSt 321 Developmental Psychology and ChSt 325 Psychology of Adolescence are Psychological & Brain Sciences courses.

## Additional Courses

Students choose 6 additional units from either the core list or from elective courses, including but not limited to the following:

Code	Title	Units
ARCH 316F	Re-Discover the Child	3
ChSt 178	First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change	3
ChSt 251	Juvenile Justice in the Black Experience	3
ChSt 304	Educational Psychology	3
ChSt 3140	Sociolinguistics, Literacies, Schools, and Communities	3
ChSt 316W	Topics in American Literature: Girls' Fiction	3
ChSt 3221	Girls' Media and Popular Culture	3
ChSt 3270	Comics, Graphic Novels, and Sequential Art	3
ChSt 331	Topics in Holocaust Studies: Children in the Shadow of the Swastika	3
ChSt 341	Children and Childhood in World Religions	3
ChSt 342	Childhood, Culture, and Religion in Medieval Europe and the Mediterranean World	3

ChSt 354	No Boys Allowed: Girlhood and Programming for Girls in the 19th and 20th Centuries, United States	3
ChSt 3620	Anthropological Perspectives on the Fetus	3
ChSt 381	Banned Books	3
ChSt 400	Independent Work in Children's Studies	max. 3
ChSt 4036	Children of Immigrants: Identity and Acculturation	3
ChSt 4280	History of Urban Schooling in the United States	3
ChSt 4289	Neighborhoods, Schools, and Social Inequality	3
ChSt 453B	Sociology of Education	3
ChSt 4608	The Education of Black Children and Youth in the United States	3
ChSt 461B	Construction and Experience of Black Adolescence	3
ChSt 481W	History of Education in the United States	3
ChSt 408	Education and Psychology of Exceptional Children	3

## Additional Information

The most up-to-date list of approved electives is located on the Children's Studies Minor website. Courses not on that list may be used to fulfill the requirements of the minor only if they have been approved by the minor director. Students must receive a C- or above in order for credit to count towards the minor.

A maximum of 3 units of course work completed at another university, whether in the United States or abroad, may be applied toward the children's studies minor. Credit will be awarded only for those courses that have been approved by the minor's director and study abroad advisor.

Phone: 314-935-5190  
Email: [english@wustl.edu](mailto:english@wustl.edu)  
Website: <http://english.artsci.wustl.edu>

## English Minor

### Program Requirements

- **Total units required:** 15

### Required Courses

Code	Title	Units
E Lit 2151	Literature in English: Early Texts and Contexts	3
E Lit 2152	Literature in English: Modern Texts and Contexts	3

## Elective Courses

Students must complete three upper-division (300- or 400-level) electives. These courses should be home-based in the Department of English.

## Additional Information

Students are expected to take courses for letter grades and to receive a grade of C or better in each. No credits from outside the College of Arts and Sciences may be applied to the Minor without approval from the Director of Undergraduate Studies.

Phone: 314-935-5190  
Email: [english@wustl.edu](mailto:english@wustl.edu)  
Website: <http://english.artsci.wustl.edu>

## Writing Minor

### Program Requirements

- Total units required: 15 units

### Required Courses

Students must take one of the following courses:

Code	Title	Units
Writing 311	Exposition	3
Writing 312	Argumentation	3

## Elective Courses

Students must complete 12 additional units, at least 6 of which must be at the 300 level or higher.

## Additional Information

With department approval, up to 6 units of journalism courses in writing or editing offered by the School of Continuing & Professional Studies can be counted toward the minor. An off-campus internship (Writing 298 Journalism: Communications Internship) oriented toward writing may also be counted toward the minor. Regardless of level, at least 9 units counted toward the minor must be completed in regular courses home-based in writing.

For undergraduate scholars in the Howard Nemerov Program, two semesters of the 200-level Nemerov seminar (GeSt 211 Howard Nemerov Seminar I) may count as 3 units of 200-level work toward the writing minor. Two semesters of the 300-level Nemerov seminar may count as 3 units of 300-level work toward the writing minor. A maximum of 6 Howard Nemerov units may count toward the writing minor.

Students who wish to take a writing minor in addition to an English major are advised to take English and American literature courses (L14 E Lit) exclusively for the major and writing courses (L13) exclusively for the minor. (Please note: 100-level L13 classes do not normally count toward the writing minor.) Students who wish to combine writing with their English major are encouraged to consider an English major with a concentration in creative writing.

Phone: 314-935-5190  
Email: [english@wustl.edu](mailto:english@wustl.edu)  
Website: <http://english.artsci.wustl.edu>

## Environmental Studies

Environmental Studies offers one major and one minor. The Environmental Analysis major creates a framework to integrate environmental courses and places a strong emphasis on critical thinking and general analytical and problem-solving skills. We offer an explicit focus on the application of those skills to analyze and design solutions to contemporary environmental challenges. The curriculum for this major is integrated and interdisciplinary, drawing from many disciplines across Arts & Sciences and the university as a whole. Thus, the major captures the strengths of the traditional academic departments and incorporates the interdisciplinary innovation necessary to fully explore the multiple issues and questions posed by the study of the environment. Our curriculum is sequenced and scaffolded so that students encounter concepts at increasing levels of depth, analysis, and real-world application. We offer opportunities for students with different disciplinary interests to repeatedly encounter one another and to engage in reflection with peers throughout their programs, especially during our fourth-year reflection seminar.

The Environmental Studies minor includes core course work in biology, Earth science, and political science. Students may choose upper-level elective courses in a variety of natural and social science disciplines. Please visit the Environmental Studies website for more information.

### L82 EnSt 101 Earth's Future: Causes and Consequences of Global Climate Change

Earth's Future: Causes and Consequences of Global Climate Change examines the following: 1) the physical basis for climate change; 2) how climates are changing and how we know and assess that climates are changing; and 3) the effects of climate change on natural and human systems. The course is team-taught and will involve participation by scholars across the university with expertise in specific subjects. This is a broad introductory course for first-year students, and it presumes no special subject matter knowledge on the part of the student. This course is for first-year (non-transfer) students only.  
Same as I60 BEYOND 101

Credit 3 units. A&S: FYBB A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L82 EnSt 102 To Sustainability and Beyond: People, Planet, Prosperity

This class examines the subject of sustainability from multiple perspectives to gain an appreciation for its interconnected environmental, social, and economic dimensions. We explore foundational concepts and principles through a variety of activities and assignments, including readings, discussions, group work, games, presentations, and projects. The goal is to integrate knowledge and methods from different disciplines to achieve a holistic understanding of sustainability problems and solutions. This course is for first-year (non-transfer) students only.

Same as I60 BEYOND 140

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L82 EnSt 110 Environmental Issues

This course examines the science behind current environmental issues, with emphasis on Ecology and Conservation. Students will gain an understanding about the consequences of the way that humans currently interact with the natural environment and potential solutions that would allow long-term sustainability of the Earth. Topics will include: Human population growth, ecosystem structure and diversity, types and origin of pollution, global climate change, energy resources and use, challenges to feeding the world, and the interaction between the environment and human health.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L82 EnSt 111 Environmental Racism and the Health of Everyone

Environmental inequalities threaten the health and well-being of low-income communities and communities of color who are increasingly on the frontlines in the fight against climate change, air and water pollution, food security, and many other urgent environmental problems. Like many urban areas, the St. Louis region faces egregious social, environmental and health disparities. In this course, we critically examine the role of racism and other structural policy inequalities that produce unequal environments and how those unequal environments contribute to public health disparities in St.

Louis and beyond. We explore the use of public health data, policy options, and case studies that allow for evidence-based solutions to environmental racism and improved population health. This course that combines small group sessions, case studies and speakers working on environmental justice in the St. Louis region. We provide students with interdisciplinary perspectives and methods, challenging them to address racism and environmental policy through a population health lens. Student learning will be assessed through case studies, reflections, online assignments, and exams. This course is for first-year (non-transfer) students only. Students who are not first year students will be unenrolled from this course.

Same as I60 BEYOND 115

Credit 3 units. A&S: FYBB A&S IQ: SSC Arch: ETH, S, SEM EN: S

---

### **L82 EnSt 115 Introduction to Conservation Biology**

This course is introductory level and appropriate for both non-science majors as well as potential science majors who may be investigating their interests. Conservation Biology will focus on biodiversity, its preservation and current threats, as well as obstacles to its preservation for the future. We will examine the different levels of biodiversity present in nature as well as highlighting its importance, and why it matters to the human population. In studying Conservation Biology, students will also learn key concepts from related fields such as evolution and ecology that are necessary to understand concepts and concerns. Course topics include species and ecosystem management, restoration, strategies to combat threats, and past successes and failures relating to biodiversity conservation.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### **L82 EnSt 121 Ampersand: Pathfinder - A Sense of Place:**

#### **Discovering Missouri's Natural Heritage**

This is the first course in the Pathfinder program, and it will introduce students to their new home for the next four years. This interdisciplinary course will cover Missouri geology, climate, archaeology, and native megafauna. We will explore many of the habitats found in Missouri (prairie, forest, glade, and stream) and the biology of our diverse plant and animal wildlife (arthropods, mollusks, fish, salamanders, lizards, birds, and mammals). This will provide a foundation that will inform the study of ecology, policy and management in other courses. In addition to weekly lectures and discussions, students in this course will visit sites across the state during three weekend camping trips and two one-day trips. Attendance on field trips is an essential component of the course. Course enrollment is open only to students admitted into the Pathfinder Fellowship program.

Same as L61 FYP 121

---

### **L82 EnSt 122 Ampersand: Pathfinder - A Sense of Place:**

#### **Discovering the Environment of St. Louis**

Go exploring in and around St. Louis. You'll learn about the St. Louis backyard, and your "home" for the next four years. Through field trips, readings, and discussion, you'll see first-hand what challenges face the environment and the people who live here. You will learn how to examine multiple perspectives, how to think critically and how to approach problems from an interdisciplinary and holistic approach. You'll also learn why it is important to know a community at the local level if you're going to affect change on any level-state, national, or international. In addition to weekly readings and discussion, this class includes several field trips.

Same as L61 FYP 122

Credit 3 units. A&S: AMP A&S IQ: NSM BU: SCI

---

### **L82 EnSt 181 Ampersand: Pathfinder: Environmental Seminar**

A survey of pressing environmental issues, both local and global, as well as an introduction to the breadth of environmental work occurring on campus. Credit/no credit only.

Same as L61 FYP 181P

Credit 1 unit. A&S: AMP A&S IQ: NSM Art: NSM

---

### **L82 EnSt 201 Earth and the Environment**

Introduction to the study of the Earth as a dynamic, evolving planet. Emphasis on how internal and surface processes combine to shape the environment. Themes: Earth's interior as revealed by seismic waves; Earth history and global tectonics shown by changes to ocean floors, mountain-building, formation of continents, earthquakes, and volcanism; climate history and global biogeochemical cycles, influenced by circulation of atmosphere and oceans, ice ages, and human activity. Composition and structure of rocks and minerals. Part of the introductory sequence of courses for all Earth, Environmental, and Planetary Sciences and Environmental Studies majors. Three class hours and one two-hour lab a week.

Same as L19 EEPS 201

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### **L82 EnSt 210 Undergraduate Teaching Assistant**

Credit 3 units.

---

### **L82 EnSt 215 Introduction to Environmental Humanities**

In this environmental humanities course we will explore the human and ecosystem impacts resulting from Euro- American colonization and agricultural settlement of the U.S. Our reflection will include the social, political and economic factors which shape individual relationships with and experiences of nature in Indigenous, enslaved and newly-arrived immigrant communities. Topics will include: the fragmentation of the Sioux American Indian ecosystem and subsequently the dispersion of Sioux people into settled, disparate reservation lands; agrarian democracy, including plantation agriculture, improvement farming and Homestead farming on the Great Plains; and the Dust Bowl. This course is for first-year students and sophomore students only.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN:

### **L82 EnSt 250 One Health: Linking the Health of Humans, Animals, and the Environment**

This course provides an introduction to One Health, a collaborative effort of multiple disciplines -- working locally, nationally, and globally -- to attain optimal health for people, animals, and the environment. The student will learn about the challenges threatening environmental, animal, and human health. More importantly, they will learn about the transdisciplinary/holistic/One Health approach, which is necessary if we are to develop the solutions to these challenges. To address the loss of biodiversity, climate change, and environmental pollutants, students will participate in project-based learning modules to understand the how and why of these challenges as well as the mechanisms available to study current threats to conservation and public health. Class lessons will consist of lectures, clicker-based discussions, and case-study discussions. Assignments will include regular readings, quizzes, three exams, the creation of one infographic to convey a concept to a lay audience, and one short final reflection essay. This course will be limited to first- and second-year students.

---

### L82 EnSt 251 Metropolitan Environment

Understanding the forces shaping urban growth and change is increasingly important for addressing environmental issues. The United Nations projects up to 3/4ths of the world's population will live in urban areas by the end of the century. Urbanization rates now outpace population growth rates in many parts of the world. Changes within the metropolitan environment will have profound impacts on people and planet. This course provides an interdisciplinary overview of the metropolitan growth and change, paying particular attention to the role of planning, politics, and policy. Class time will be devoted to lectures, case studies, group activities and discussion. Student learning will be assessed through exams, online assignments, and a research paper on an environmental issues in a city of student's choice. This course is targeted toward first and second year students looking for foundational understand of urban environmentalism.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

### L82 EnSt 252 Sustainability in Business

In today's complex business environment, organizations are constantly challenged to develop innovative policies and processes that ensure profitability. Some leaders believe that the sole purpose of business is to maximize shareholder wealth and that fiscal sustainability is not compatible with environmental responsibility. In reality, ecological and economic performance need not—and should not—be mutually exclusive. Fortunately, the outmoded mindset of "profit-at-any-cost" is beginning to shift as organizations recognize the importance of adopting balanced business practices that promote social equity and environmental prosperity without sacrificing financial stability. Organizations that embed sustainability into their corporate strategies increase operational efficiency by using resources more responsibly and minimizing waste. In an increasingly crowded and competitive marketplace, sustainability has become a source of competitive advantage through which an organization can have a positive impact not only on the financial "bottom line" but also on the environment and society. In this course, we explore key concepts and issues driving sustainability in business. We also examine core sustainability principles, frameworks, and tools that companies can use to better understand and work within the natural systems that enable their existence and sustain their operations.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L82 EnSt 255 Systems Thinking

Our complex world is bound together by multiple overlapping systems. Social systems interact with physical and biological systems. Societies and individuals, ecosystems and species, interact in ways that influence each other. Systems thinking is the ability to see the relationships and patterns within and across systems, as well as the underlying structures which shape those relationships and patterns. This course provides an introduction into systems thinking for sustainability. We will explore the key features of systems and students will learn the basics of the systems thinking lens which they will be able to use for addressing sustainability in an ever-changing world. Class time will be devoted to lectures, case studies, group activities and discussions.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L82 EnSt 290 Sophomore Seminar in Sustainability and the Environment

This course will provide an opportunity for students to evaluate and explore potential paths in environmental studies, and learn presentation skills to carry forward in their careers. Students will also get the opportunity to get out of the classroom and participate in environmental field trips and activities.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

### L82 EnSt 2950 Introduction to Environmental Biology

Introduction to Environmental Biology is designed to teach important principles of environmental biology and general science literacy skills. We cover the foundational biological principles and contemporary issues within four main topics: human population growth, transfer of energy and carbon in the ecosystem, biodiversity, and food production. We focus on the biological principles involved as we examine these topics in the context of some contentious and confusing issues related to environmental biology in everyday life. The science literacy skills that you master in this course will help you address the issues you face in your everyday life regarding scientific and pseudoscientific claims about the environment and society and will form the foundation for your development as a critical consumer of science information in the media. This course is required for all environmental biology majors and environmental studies minors. We recommend you take this course in your first- or second-year if possible. If your interests align and your schedule allows, we recommend co-enrolling in ENST 215: Introduction to Environmental Humanities.

Same as L41 Biol 2950

### L82 EnSt 3060 Community Based Conservation: Madagascar Sustainability Initiative

This course in community-based conservation through the lens of Madagascar represents a partnership between Missouri Botanical Garden (MBG) and Washington University in Saint Louis. The course is designed to support MBG's Community Based Conservation Program sites, while building student understanding of challenges at the intersection of rural agricultural subsistence communities, climate change, and biodiversity "hot spots." The course involves preparatory learning during the WUSTL spring semester and ongoing communication and collaboration with Malagasy community representatives during this period. An additional lab credit option entails interactive research project deployment and monitoring on the ground in Madagascar during a summer window. MBG has been facilitating conservation work in Madagascar for over 40 years. Among these initiatives is a Community Based Conservation Program (CBCP) in Mahabo, a ten-community commune in southeastern Madagascar within a rare forest ecosystem. This commune is the most mature of MBG's eleven conservation sites, each of which share similar challenges for both biodiversity conservation and human wellbeing. Over several years MBG has established trusted relationships with rural Malagasy community members, building cooperation on community-specific, grassroots conservation efforts with indigenous communities. Such cooperation can be undermined by the forces of poverty, which compel communities to extract resources unsustainably from the sensitive forest. Therefore, the community-based conservation approach integrates a full understanding of the need for economic stability and health priorities alongside conservation of flora and fauna. Program targets range from forest conservation and use to nutrition, health, food security, clean water, and education. This course integrates study of biodiversity, poverty, and community-based conservation principles with research design, professional teamwork, and cultural competency skills. Through enrollment in this course and the optional subsequent field experience, students will select a focal area in community-based conservation, and build a robust understanding of a challenge in principle, as well as its specific manifestation in the Mahabo case. They will engage with preexisting and/or collaboratively proposed on-the-ground initiatives in MBG's CBCP, develop a study design to assess the efficacy of these initiatives, and support iterative implementation.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

---

### L82 EnSt 310 Ecological Economics

Our planet is finite but our economic theories and practices assume that our economy can grow forever. The paradoxical pursuit of infinite growth on a finite planet has real-world consequences: from climate change to increasing income inequality to stagnant and declining

quality of life for most of us to the ongoing mass extinction of species not deemed economically useful to us, but whose loss simplifies ecosystems to the point of collapse. If these trends continue, we will face very difficult times ecologically and socio-politically. One alternative to infinite-planet economic theory is Ecological Economics, which can be described as economics as if the laws of thermodynamics are true and apply to us. Alone among disciplines with aspiration to analytic rigor, the field of economics has remained unaffected by the thermodynamic revolution that transformed the fields of biology, chemistry, physics, even history in the late nineteenth and early twentieth centuries. This failure to take physical law into account is one great source of our society's environmental (and social, and political) problems. Ecological economics thus represents the continuation of the thermodynamic revolution begun in the 1880s. This course is designed to give you an appropriate grounding in the fundamental assumptions, the conceptual novelties, and the distinctive tools of analysis that comprise this emergent school of economic theory, while placing this theorizing in historical and ecological context. We'll pay particular attention to how the precepts and practice of Ecological Economics illuminate the largest challenge facing humans today, the necessity of developing an ecologically sustainable society, one that is sized to the limits of our finite planet.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### **L82 EnSt 315 Fallout: Analyzing Texts and Narratives of the Nuclear Era**

Nuclear technology has long been developed, used, studied, and debated. Capable of both healing and harm, it challenges our notions of risk versus benefit at every level. It is also poised to potentially play a significant environmental role in climate change mitigation by delivering large amounts of nearly carbon-free energy. In this class you will trace the public perception and experience of this technology, and scientific and medical assessments of it through an environmental humanities lens. You will use texts such as literary non-fiction, history, environmental anthropology, natural history, and public health. Topics will include but not be limited to, the Manhattan Project, the Chernobyl nuclear reactor accident, and nuclear waste (including that from uranium processing in St. Louis). The course will include a visit to the Weldon Springs Interpretive Center and is designed as an upper-level elective for third- and fourth-year students. Note: While we will talk about nuclear reactors in general, this course will not explore them from a detailed scientific or engineering perspective. For those who would like to pursue that understanding, see our new 1-hour course: EnSt 400 Topics in Environmental Science: Technical Overview of Nuclear Power. This course is taught by Lee Sobotka, nuclear scientist and Professor of Physics and Chemistry, who is also the science advisor for the Fallout course.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### **L82 EnSt 316 Beyond the Evidence**

This class is about the science of science communication. Why, when all evidence points to the growing threats of climate change, is it so difficult to create movement toward addressing it? Why, when we have so much evidence that vaccines reduce illness and death and are extremely safe, do individuals still choose not to vaccinate their children? What if I told you that the scientific evidence does not matter? Over the last few decades, not better education, nor guilt, nor fear has worked to produce change on important environmental and public health issues. In this class, we will explore how values, beliefs, emotions and identity shape how we receive and process information and make decisions. We will explore themes of moral world view, cognitive linguistics and framing, cognitive dissonance, risk perception, empathy, habit changes, and difficult dialoguing through the case studies of climate change and vaccination. Course activities will consist of regular reading, some online research, reflective journaling at home, and

engaging in conversation during class. There are no prerequisites, but the class is designed for fourth-year students in environmental majors and pre-health studies. Upper-level environmental majors and minors will receive priority enrollment from the waitlist.

Credit 3 units. A&S IQ: SSC Arch: ETH, S, SSC Art: SSC BU: BA EN: S

---

### **L82 EnSt 3171 Biology for Climate Solutions**

Human-induced climate change poses a pressing and pervasive threat to both human populations and to the biological world. The challenges of climate change are manifest and well known, increasing temperatures, greater variability of weather, sea level rise, leading to a host of consequences. Adapting to and mitigating climate change are essential activities for confronting the threats of climate change. The biological sciences offer great potential for addressing these threats. This course focus on efforts in biological research to adapt and to mitigate climate change. Topics will range across the biological sciences from microbial engineering and biotechnology to zoonotic diseases and one health, to ecosystem function and conservation of biodiversity. The course consists of lectures, discussion of assigned readings, and class projects. Class projects focus on science topics that addresses new approaches to climate adaptation and mitigation and constitute both of a written paper and class presentation. The goals of this class are: (1) to develop an understanding of basic climate science and the biological aspects of climate change, (2) to develop knowledge of the biological efforts towards adaption and mitigation for climate solutions. The class is open to both non-science and science majors. The course does not count for the biology major. 3 units credit. Class cannot be taken pass fail. Small class. Not for biology major credit Same as L41 Biol 3171

Credit 3 units. A&S IQ: NSM

---

### **L82 EnSt 3194 Environment and Empire**

In this course we study British imperialism from the ground up. At bottom, the British empire was about extracting the wealth contained in the labour and the natural resources of the colonized. How did imperial efforts to maximize productivity and profits impact the ecological balance of forests, pastures, and farm lands, rivers and rainfall, animals and humans? We'll ask, with environmental historians of the U.S., how colonialism marked a watershed of radical ecological change. The course will cover examples from Asia to Africa, with a focus on the "jewel in the crown" of the British empire: the Indian subcontinent. We'll learn how the colonized contributed to the science of environmentalism, and how they forged a distinctive politics of environmentalism built upon local resistance and global vision, inspired by religious traditions and formative thinkers, not least Mahatma Gandhi.

Same as L22 History 3194

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

---

### **L82 EnSt 320 Pathfinder: Environmental Modernism**

As committed environmentalists, one of our greatest fears is that not enough people take climate change seriously. To ward off that fear, we assess the state of the world in the most dramatically pessimistic ways to indicate the seriousness of our situation and our personal commitment to "environmentalism." Highlighting (much less admiring) human progress in areas where solid evidence of its flourishing exists, seems blasphemous, dismissive of evident, copious human suffering and natural systems abuse. However, the absence of acknowledging human progress reinforces social fear and a sense of danger. The resulting panic leads to a preferencing of solutions which appear "in harmony with nature," limiting our understanding and trust of viable alternative solutions using our best social, economic and technological powers. As antidote to this cycle, in this course we will explore the precepts of environmental modernism, the reconciliation of environmental preservation with human development.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L82 EnSt 323 Biogeochemistry

Basic concepts of how elements cycle among Earth's crust, oceans, and atmosphere, including perturbations due to human activities. Carbon, nitrogen, phosphorus, sulfur, and water cycles. Isotopic tracers. Feedbacks, forcings, and residence times. Redox cycling and thermodynamics. Biogeochemical box models, and changes in biogeochemical cycles over Earth history. Biogeochemistry of greenhouse gases, biogeochemical feedbacks in the climate system. This course is appropriate for EEPS students, engineering students, environmental science majors, and other students with interest in the environmental or geological sciences. Prerequisites: EEPS 202 or EECE 210.

### L82 EnSt 3410 Native American Storytelling - Healthy Land Practice

The earth does not belong to man, man belongs to the earth. All things are connected like the blood that unites us all. Man did not weave the web of life, he is merely a strand in it. Whatever he does to the web, he does to himself. - Chief Seattle The history of this country has had many stories and many practices which shaped the landscape pre-colonization. These Indigenous practices regularly teach methods of living within the world and can provide significant insight into current practices to manage public and private lands. This course looks to examine some of those stories, cultural beliefs, and Native American life practices which have shaped the land. For example the practice of valuing and gaining insight from natural elements such grain and fire bring one into harmony with the earth. Many people, from pre-1492 to the present and agencies, such as the U.S. Forest Service and Bureau of Land Management have changed the landscape into what we have today. Through this course we will look at common agency-based practices which have caused harm to the earth and current indigenous inspired practices designed to restore a healthy eco-system. The final portion of this course will not only look at these positive outcomes of integration of indigenous practices in the environment, but to look at additional positive health outcomes in regards to individuals living within their environment.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L82 EnSt 346 Environmental Justice

Environmental quality varies widely across race, class, gender and other forms of social difference. This course explores how and why these differences exist. It provides an overview of the history and foundations of the environmental justice movement in the United States while covering classic environmental justice issues, such as toxic waste and pollution, along with more recent issues such as food access, urban green space, transportation and climate change. Environmental justice concerns in St. Louis are featured as part of the course. Class time will be devoted to lectures, case studies, group activities and discussion. Student learning will be assessed through exams, reflection, online assignments, a policy brief on an environmental justice issue and a group presentation. This is an advanced elective targeted toward third and fourth year students.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: CPSC, SSC BU: BA EN: S

---

### L82 EnSt 347 Sustainable Cities

Urbanization is one of the most significant forces shaping today's environment. More than half of the world's population now lives in urban, rather than rural, areas. This migration has profound consequences for people and the planet, connecting a sustainable future to the developments in cities around the world. Many cities are already advancing sustainable policies and practices in all areas of urban systems and services - green infrastructure, renewable energy, waste management and climate mitigation. This course explores the

impact of the rise of cities in an interconnected world and the efforts to sustainably address environmental issues in urban settings. This course pays particular attention to the role of planning, politics and policy. Class time will be devoted to lectures, case studies, group activities and discussion. Student learning will be assessed through exams, online assignments, and a research paper on an environmental issue in a city of the student's choice.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L82 EnSt 350W Writing Skills for Environmental Professionals

For students interested in climate change, sustainability and the environment. Consider writing as a tool. Who will read it? Why are you writing it? What do you want the reader to know or do? What structure or format effectively makes your case? We will consider these questions while building effective written communications with a focus on climate change. Students will explore audience awareness, purpose, and format as they analyze document types and create their own. Activities will include writing, reading, discussion, and peer workshops. Major assignments include a letter of inquiry and a grant proposal. Students will write a grant proposal to an imaginary climate change foundation. Preference given to upper-level majors in Environmental Analysis.

Credit 3 units. A&S IQ: NSM, WI BU: SCI

---

### L82 EnSt 357 Multiparty Environmental Decision Making

This course aims to provide students with the opportunity to develop and apply problem-solving skills in the context of environmental challenges. Students will learn basic frameworks of negotiation and decision-making through readings and role-play. Through the role-play students will grapple with the perspectives of multiple stakeholders, the interplay of science and policy, and the ambiguity and uncertainty inherent in decision-making processes. This class is designed as an upper-level elective for third and fourth year students.

Credit 3 units. A&S IQ: SSC Arch: ETH, S, SSC Art: SSC BU: BA EN: S

---

### L82 EnSt 361 Culture and Environment

An introduction to the ecology of human culture, especially how "traditional" cultural ecosystems are organized and how they change with population density. Topics include foragers, extensive and intensive farming, industrial agriculture, the ecology of conflict, and problems in sustainability.

Same as L48 Anthro 361

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: ETH EN: S

---

### L82 EnSt 3615 Environmental Anthropology

This course will provide students with a working knowledge of how the study of humans across space and time has fundamentally impacted the way we understand the idea of nature, the environment and what it means to be human. The course will ground students in both historical and cutting-edge anthropological theories with units on subsistence, transformative nature, imagining wilds in the Anthropocene and pluralizing environmentalisms.

Same as L48 Anthro 3615

Credit 3 units. A&S IQ: SSC Arch: SSC Art: CPSC, SSC BU: BA EN: S

---

### L82 EnSt 3630 Arctic Climate System

In this course we will learn about the Arctic region, with an emphasis on how the Arctic plays a key role in the global climate system. Students will be introduced to the basic physical characteristics of the Arctic and its climate. They will learn how the physical and geographic characteristics of the Arctic contribute to, and are shaped by, the Arctic climate system. Emphasis will be placed on studying the Arctic from a systems science perspective, highlighting the complex interactions between different subsystems of the Arctic, such as the hydrosphere, atmosphere, cryosphere, and biosphere. We will also explore how the Arctic has changed in the past, and what the future holds for the

Arctic. Students will develop critical thinking and analysis skills through our emphasis on applying systems-level thinking to understand the interplay between physical principles, geography, landscape, climate, and human society. Class sections will be a mix of lectures and collaborative discussions on readings and course content. Most class sections will begin with a short reading recap. Completion of ENST 202 may be helpful but is not required; please ask instructor if you have questions about enrolling in this class.

Credit 3 units. A&S IQ: NSM, AN Art: NSM

---

### L82 EnSt 364 Field Methods for Environmental Science

This course provides a broad survey of practical and applied methods for environmental field work for site assessments, ecological studies, conservation land management, habitat monitoring, and ecological restoration. A primary focus will be sources and techniques for obtaining and interpreting field data across a range of abiotic, organismal and system/community parameters, with emphasis on hands-on field experience providing students with direct knowledge highlighting the advantages and limitations of various methods. In the process, students will learn about multiple taxonomic and organismal groups and natural community types, and the relationships among these and the physical environment in functional natural systems. Course topics include theory and practice of methods for sampling biotic and abiotic resources, including vegetation, fauna, aquatic systems, stream geomorphology, and soils, as well as using these data for assessments, habitat monitoring, land management decisions, and developing ecological restorations. Students will gain familiarity with responding to issues driving applied environmental science and related fields today, including data quality, sampling design, field techniques, viability and threat analyses, and incorporating field data into multi-scale conservation planning and design work. The course consists of instructor presentations, guest lectures, readings and written response papers, student projects and presentations, classroom discussions, and extensive field exercises and hands-on training. Class logistics: one lecture (1.5 hours) and one lab (5 hours) per week, plus 2-3 all day Saturday field trips (see policy on absences for back-up plan regarding field trips).

Credit 3 units. A&S IQ: NSM Arch: ETH, S Art: NSM BU: SCI

---

### L82 EnSt 3640 Plants, People and the Environment

Human life, health, and civilization depend on plants. This course introduces basic plant biology, the role of plants in natural ecosystems, and the various uses of plants in both traditional cultures and in developed countries. Topics include the medicinal uses of plants, domestication of plants for agriculture, biotechnology and plant conservation. Prerequisite: Junior standing or permission of instructor. Does not count toward upper-division credits required for the major. Same as L41 Biol 343A

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

---

### L82 EnSt 365 Applied Conservation Biology

A practical, case-based approach to the concepts of conservation biology and applied conservation practice, including designing and implementing conservation projects. Readings, lectures, classroom activities and discussions, student presentations, and exercises will immerse students in all aspects of conservation in the contemporary landscape, and provide the tools and techniques needed for successful and sustainable conservation outcomes. Two Saturday field trips required. Prerequisites: a biology/ecology class or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L82 EnSt 374 Social Landscapes in Global View

From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists, and geographers have developed a wide body of research concerning these socially constructed and perceived settings -- commonly known as "landscapes". This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We will cover various urban landscapes, rural landscapes, nomadic landscapes (and others) and the intersection of the natural environment, the built environments, and the symbolism that weaves them together. Chronologically, we will range from 3000 BCE to 2009 CE and we will cover all the continents. This course will also trace the intellectual history of the study of landscape as a social phenomenon, and will investigate the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world and trace the global currents of your social landscape!

---

### L82 EnSt 375 Urban Ecology

Urban Ecology is a field of study within ecology that focuses on the urban environment as an ecosystem and attempts to understand how humans and nature can better coexist in these highly modified environments. The ultimate goal is to aid efforts for more sustainable cities through better urban planning and practices. It is a multidisciplinary study including topics from ecology, evolution, and conservation biology, as well as architecture, economics, and business. The class format will include both lectures and discussions.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L82 EnSt 380 Applications in GIS

This introductory course in Geographic Information Systems (GIS) is designed to provide you with the knowledge, skills, and confidence to be an independent user of GIS. The course will use the latest version of ESRI ArcGIS. The course is taught using a combination of lectures, demonstrations, and hands-on, interactive tutorials in the classroom. You will also explore the scientific literature to understand how GIS is being used by various disciplines to address spatial questions. The course takes a multidisciplinary approach that is focused on learning the tools of GIS versus working with data from a particular field. The goal is to establish a solid foundation you can use to address spatial questions that interest you, your mentor, or your employee. The first weeks of the course will provide a broad view of how you can display and query spatial data and produce map products. The remainder of the course will explore the power of GIS with a focus on applying spatial analytical tools to address questions and solve problems. As the semester develops, more tools will be added to your GIS toolbox so that you can complete a final independent project that integrates materials learned during the course with those spatial analyses that interest you the most. Students will have the choice of using a prepared final project, a provided data set, or designing an individualized final project using their own or other available data.

Credit 3 units. A&S IQ: NSM Arch: ETH, NS, ETH, S, NSM Art: NSM

---

### L82 EnSt 381 Introduction to Ecology

This course explores the central theories and principles in ecology and evolution, and the use of these principles to study and predict human-induced environmental changes. It emphasizes understanding species interactions and population dynamics in biological communities,

and the relationships between communities and their environment. It regularly touches on applications of these principles such as ecological responses to global climate change, consequences of habitat fragmentation, disease ecology, and conservation medicine. Principles of experimental design, quantitative data analysis and interpretation, and mathematical models are critical to the field of ecology and are also emphasized throughout the course. Class meetings will include lectures, class activities, computer simulation labs, and smaller group discussions to familiarize students with peer-reviewed journals, scientific writing, and current issues in ecology. Assignments include regular homework reading, occasional problem sets, participation in tutorials/discussions, and a small term-paper. Prerequisite: Bio 2970 or Bio 2950 or permission of instructor.

Same as L41 Biol 381

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

---

### L82 EnSt 390 Independent Study

Independent study for undergraduates, to be supervised by a faculty member. Prerequisite: permission of instructor.

Credit variable, maximum 6 units.

---

### L82 EnSt 3900 Science for Agriculture and Environmental Policy

Government policies at the local, state, and national levels determine and regulate activities that range from local farmers markets to U.S. membership in the Paris Climate Agreement. Science can and should play a critical role in developing policy. This course focuses on the biological science behind policies for climate change and agricultural practice as well as the role of various organizations in providing science for policy. Now is a particularly interesting time for science-based policy with the election of a new U.S. President and the elevation of the President's science advisor to Cabinet level. This course is divided into three parts. First, we review how policy is developed and how various agencies and actors affect policy. The next section looks at biological topics that have policy implications. These case studies are presented by expert speakers who have had experience in various science-related roles in the federal government, foundations, professional associations, advisory organizations, and scientific publications. Finally, students conduct individual research projects on a science topic that affects current legislative efforts, either state or national. Students investigate the basic science of their chosen topic and how this could affect proposed legislation. As part of the research project, students give a class presentation, lead a class discussion, and write a term paper on the foundational biological science. The goals of this course are as follows: (1) to develop an understanding of how science is used to develop policy by examining case studies presented by experts; and (2) to critique a proposed science-based policy either at the state or federal level.

### L82 EnSt 405 Sustainability Exchange: Community and University Practicum

The Sustainability Exchange engages interdisciplinary teams of students to tackle real-world energy, environmental, and sustainability problems through an experiential form of education. Students participate in projects with on- or off-campus clients, developed with and guided by faculty advisors from across the University. Teams deliver to their clients an end-product that explores "wicked" problems requiring innovative methods and solutions. New and varied projects are introduced each semester. Past projects have included conducting greenhouse gas inventories for a community organization; developing a tool to screen University investments for sustainability parameters; developing a sustainability plan for a local nonprofit; addressing water savings initiatives for local breweries; and assessing the vulnerability of city sanitation systems. Team-based projects are complemented by seminars that explore problem solving strategies and methodologies drawn from a wide range of creative practices, including design, engineering, and science, as well as contemporary topics in energy, environment, and sustainability. Students will draw on these topics to influence their projects. The course is designed primarily for undergraduates, with preference given to seniors.

### L82 EnSt 406 Urban Ecosystem Principles Integration

In today's world, your discipline has grand challenges whose solutions often lay in other realms. How will you train yourself to leverage the interdisciplinary partnerships required to innovatively solve and evolve in a rapidly changing world? The mission of this interdisciplinary course is to "Advance the interrelationships of ecological and human systems toward creating a healthy, resilient, and biodiverse urban environment", and will bring together experts and students in ecology, urban design, architecture/landscape architecture, economics, social work, and engineering, drawing from inside and outside the WU community. Building from our knowledge of ecosystem principles and function, a diverse group of leaders in their fields will provide lectures, readings, and student project leadership to understand and test Healthy Urban Ecosystems Principles among human and ecological (non-human) systems and the range of socio-political processes entailed with their implementation. Class content is developed by Washington University leaders in their disciplines as well as external organizations such as the Missouri Botanical Garden, the Field Museum in Chicago, and others. This course builds upon a 1-unit fall seminar (not a pre-requisite) that introduces challenges and solutions to achieving healthy urban ecosystems, and provides students an opportunity to more deeply engage and manipulate the interrelationships of symbiotic urban systems and apply those concepts in multi-disciplinary project applications. Projects will leverage student-defined challenges in the evolving laboratory of urban St. Louis using Healthy Urban Ecosystems Principles to develop multi-disciplinary integrated solutions to challenges encountered in urban areas such as climate change and resilience, security of ecosystem services, social inequity, economic strife, and community vitality. Students will present their work in a public forum at semester's end.

### L82 EnSt 407 RESET - Renewable Energy Policy, Engineering and Business

RESET is an interdisciplinary course that explores the incredible potential of renewable energy, energy storage, and electrification to mitigate climate change. Students will gain an in-depth understanding of the complex dynamics that are driving rapid deployment of renewables and present both opportunities and challenges to decarbonization in the years ahead. Through the lenses of business, policy, and engineering, students in RESET will learn through classroom lectures from faculty, industry professionals, and policy-makers; group

discussions; field trips to solar arrays and a landfill gas power plant; and a final team project where students serve as consultants to a local government, proposing an on-site solar strategy, local policy changes to support decarbonization, and more. By the end of the course, students will have an understanding of many large-scale issues influencing decarbonization, as well as the real-world factors that are necessary for designing, financing, and building new renewable energy projects. Why renewables and the grid? Decarbonizing the electric grid paired with electrifying sectors that currently run on fossil fuels - including transportation, heating, buildings, and manufacturing and construction - together have the potential to reduce more than 50% of global greenhouse gas emissions. The global energy transition, which was already well-underway, accelerated in 2022 due to a combination of countries' energy security concerns following Russia's invasion of Ukraine and expanding climate ambition resulting in new policies that support renewable energy, including the Inflation Reduction Act in the United States. The International Energy Agency's 2022 Renewables report found that "renewables are set to account for over 90% of global electricity expansion over the next five years, overtaking coal to become the largest source of global electricity by early 2025." Registration for this course is direct to the waitlist, and students are selected by application. The application can be found here. The deadline for the application is 5 PM on April 24th.

---

#### **L82 EnSt 408 Earth's Atmosphere & Global Climate**

Structure and dynamics of Earth's atmosphere. Basic factors controlling global climate of Earth. Quantitative aspects of remote sensing of atmosphere. Remote sensing instrumentation. Prerequisites: Math 232 and Phys 191.

Same as L19 EEPS 408

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L82 EnSt 413 Introduction to Soil Science**

Physical, chemical, and biological processes that occur within soil systems. Types of soils and their formation. Major components of soil, including soil water, minerals, organic matter, and organisms. Soils in wetlands and arid regions. Mapping of soils and their spatial variability. Cycling of nutrients and contaminants in soils. Sustainable use of soils and their role in climate change. Prerequisites: EEPS 202 and EEPS 323 or CHEM 106 or CHEM 112.

Same as L19 EEPS 413

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L82 EnSt 415W Writing Home: Creating Cultural Guides for Environmental Site Workers**

Each of you comes from a different cultural landscape, each with its own demographic, racial, religious, linguistic, economic profile, (and endless other attributes). Effectively describing your community is integral to its sense of being respected by outsiders and to its capacity to support others. For example, each community carries a different sense of what kind of landscape constitutes safety, well-being, and happiness. Whatever your cultural landscape, sharing the unique nature of your community with global citizen experts is integral to the success of applied environmental solutions to climate change. Towards the attainment of that success, join this guided, writing intensive class to identify and reflect upon the cultural attributes that constitute your community, and how those are reflected in its landscape requirements. Identify, assess, and prioritize those sensitivities deemed most important by you for others to understand. By semester's end, write a cultural guide for environmental site workers, leading them to a better awareness of how best to help and move through, your world. Revisions and resubmission of writing work will be emphasized, as well as camaraderie and mutual interest in each other's landscapes.

#### **L82 EnSt 419 Community Ecology**

Community ecology is an interdisciplinary field that bridges concepts in biodiversity science, biogeography, evolution and conservation. This course provides an introduction to the study of pattern and process in ecological communities with an emphasis on theoretical, statistical and experimental approaches. Topics include: ecological and evolutionary processes that create and maintain patterns of biodiversity; biodiversity and ecosystem function; island biogeography, metacommunity dynamics, niche and neutral theory; species interactions (competition, predation, food webs), species coexistence and environmental change. The class format includes lectures, discussions, and computer labs focused on analysis, modeling and presentation of ecological data using the statistical program R. Prereq: Bio 2970 required, Bio 381 recommended, or permission of instructor. (Biology Major Area C) Same as L41 Biol 419

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L82 EnSt 4193 Experimental Ecology Laboratory**

The goal of this course is to provide skills in the design, interpretation, and written presentation of ecological and evolutionary experiments, with emphasis on sampling methodology, hypothesis testing, and data analysis. A key objective of this course is to familiarize students with the importance of statistics and experimental design as unified tool, rather than two separate processes. We will practice how to abstract theories, hypotheses, predictions, mathematically, how to contrast them with data, and interpret the results. The course does not seek to be exhaustive of all experimental designs or statistical techniques, nor intensive in any given one. Rather, its focus is on providing the tools and concepts for the critical evaluation, choice, interpretation and further independent learning of the experimental and statistical tools needed for research. Practical analysis of data will be taught in program R, but no prior knowledge is required. During the course, students will plan and execute their own ecological studies, within the limitations of the current pandemic. This is a writing intensive course and grades are based on written assignments, including final projects, and in-class participation. This course fulfills the upper-level laboratory requirement for the Biology major. Prereq: Permission of instructor and at least one of the following: Bio Bio 3501, Bio 372, Bio 381, Bio 419, or Bio 472. Enrollment is limited to 10 students. Credit 4 units.

Same as L41 Biol 4193

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

---

#### **L82 EnSt 426 Topics in American Politics**

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests. Prerequisites: L32 101B American Politics

Same as L32 Pol Sci 426

Credit 3 units. A&S IQ: SSC, SD Art: SSC EN: S

---

#### **L82 EnSt 428 Hydrology**

Survey of principles that govern the flow of water in river and groundwater systems in deep geologic environments. Basic equations of fluid flow, dynamics, and the characteristics of drainage basins, rivers, floods, and important aquifers. Exploitation of ground water systems. Prerequisite: EEPS 353 or Physics 191.

Same as L19 EEPS 428

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

#### **L82 EnSt 432 Environmental Mineralogy**

Topics connected with environmental mineralogy, some selected by students. Topics may include: mineral dust such as asbestos, containment materials for nuclear waste disposal, environmental ramifications of the processing and use of phosphate fertilizers, lead in the environment, acid mine drainage, microbial mediation of

sulfide oxidation, minerals in the human body, weathering of building materials, materials engineering, and engineering of materials for more effective recycling. Three class hours and one two-hour laboratory a week. Participation in discussions, term paper, two field trips required. Most readings from primary sources.

Same as L19 EEPS 430

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L82 EnSt 451 Environmental Policy

Course will examine the relationship between environmental economics and environmental policy. The course will focus on air pollution, water pollution, and hazardous wastes, with some attention given to biodiversity and global climate change. The course will examine critically two prescriptions that economics usually endorses: (1) "balancing" of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; (2) use of market incentives (e.g., prices, taxes, or charges) or "property rights" instead of traditional command-and-control regulations to implement environmental policy. Prerequisite: Econ 1011.

Same as L11 Econ 451

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L82 EnSt 452 International Climate Negotiation Seminar

This course is designed to prepare students to attend and observe annual meetings associated with the United Nations Framework Convention on Climate Change (UNFCCC) as a delegate of Washington University. The course and meetings provide student delegates with a unique educational experience to observe the development of international climate policy through interdisciplinary negotiations and interactions inside the negotiating space. Students see the interaction between climate policy, science and technology as they identify and analyze policy decisions across the international climate regime. The COP 29 meeting will be held in Baku, Azerbaijan, from Monday, November 11, 2024 to Friday, November 22, 2024. While the number of students who can attend meetings is limited by the United Nations, we will do our best to have course participants attend one week of the COP. Course enrollment is limited. Indicate your interest by placing yourself on the waitlist and completing an application. The cost of meeting attendance is partially covered by the College of Arts & Sciences and need based support is available. More information on cost is included on the course FAQ page. Pre-requisite: junior standing. Contact the instructor with questions at martin@wustl.edu. Registration for this course is direct to the waitlist, and students are selected by application. The application can be found here . The deadline for the application is 5 PM on April 24th.

Credit 4 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L82 EnSt 4527 IPCC: Governance, Policy and Science

This course is a three-credit advanced seminar for students who are interested in the intersection of science and policy in the area of climate change. The Intergovernmental Panel on Climate Change (IPCC) is regarded as world's top scientific authority on climate change. Using the Synthesis Report of the IPCC's 6th Assessment Review as our guide, students will explore the unique role of the IPCC as an intergovernmental body. We will dig into what it means for the IPCC to be an intergovernmental body, the underlying reports that make up the AR6 assessment cycle, and what the future holds for the IPCC. In doing so we will explore the current science and knowledge around land use, oceans and cryosphere, mitigation, adaptation, loss and damage, vulnerability and how that is presented in a 'policy relevant but not policy prescriptive' format. Students will be able to evaluate key questions and concepts around climate change as they find and understand how they are included in the IPCC reports. They will then learn to assess and analyze the questions/concepts in the context of the IPCC findings and see how those findings are integrated in the international policy space. Prerequisites: junior level standing.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

---

### L82 EnSt 461 Intro to Environmental Law

Survey of the most prominent federal laws designed to control pollution and protect human health and the environment. Examines laws applicable to environmental impact statements, biodiversity, air pollution, water pollution, and hazardous waste. Discusses the role of state law and cooperative federalism, as well as the roles of the courts, the legislature, and the administrative state in protecting the environment.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

---

### L82 EnSt 481 Advanced GIS

This course is designed to move beyond tools and skills learned in Applications in GIS (EnSt 380/580). Classes will feature hands-on exercises selected to help you master advanced GIS analysis tools and techniques, while providing experience in the planning and execution of real-world projects. Primary emphasis will be on applying fundamental GIS concepts, performing spatial analysis, developing proficiency with core ArcGIS software (e.g., Network Analyst extension), resolution of problems, and efficient delivery of results. Readings from books and scientific literature will introduce key concepts and provide real-world examples that will be reinforced in the hands-on exercises, assignments, and projects. As the semester develops, you will gain a variety of new tools and techniques that will allow you to complete a final independent project that integrates the material learned during the course.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

---

### L82 EnSt 482 Applications in Geospatial Intelligence

This course introduces the concept of geospatial intelligence (GEOINT) and how to use location to see patterns, connections and relationships to ultimately "see what others can't". Learn about the Intelligence Cycle, the mission of the National Geospatial-Intelligence Agency (NGA), potential career pathways in GEOINT, and other members of the Intelligence Community (IC) leveraging GIS to solve problems and make decisions related to Intelligence. This course is designed to incorporate both a theoretical understanding with a variety of subject matter expert (SME) presentations from the industry, as well as a practical understanding with hands-on exercises using ArcGIS Pro and other Esri software applications.

Credit 3 units. A&S IQ: NSM

---

### L82 EnSt 483 Introduction to Spatial Epidemiology

This 14-week course is to introduce essential concepts and methods of spatial epidemiology. Spatial epidemiology is a methodology for dealing with spatial-correlated issues in environmental and public health, epidemiological, and medical research. The lecture will give the knowledge in the designs and approaches of spatial epidemiology. Homework assignments after each lecture will test student knowledge the concepts we covered. GIS mapping exercises will allow students to practice and apply their knowledge of basic geospatial analyses in epidemiology. The paper discussions and final project (presentation and paper) will help the students develop a better understanding how to integrate geospatial and GIS modeling into epidemiological and population health studies to address spatial-correlated research questions. This course requires a previous completion of a GIS course with basic skill in the application of GIS software (such as ESRI ArcGIS) for mapping. This course will be suggested to the third-, fourth-year undergraduate students and/or master students.

Credit 3 units. A&S IQ: NSM Art: NSM

**L82 EnSt 492 Environmental Studies Fourth-Year Reflection Seminar**

Over the course of your time at Washington University, you have taken a depth and breadth of coursework toward your major in Environmental Analysis. Your major coursework has likely been supplemented by your coursework in other departments and programs of study. The purpose of this course is for you to meet your peers who have done the same. As a group you will reflect on and share representations of your learning across the years, make connections among things you have learned and to experiences in other arenas of your life. Reflection will occur through personal writing, discussion with peers in the course and the sharing of favorite podcasts, films, etc.  
Credit 1 unit.

**L82 EnSt 498 Senior Honors Research**

This course is designed to support fourth-year students who are working on research and thesis development for mentored research, honors research, or Latin Honors with the Environmental Studies Program. In this pass/fail, one-hour seminar course, instructors will guide students through common elements of the research process and teach skills for thesis writing that cross disciplines, such as goal setting and planning, developing a proposal, outlining methodology and findings, and using bibliographic reference software. Instructors and students will co-create a supportive environment for students to share ideas, feedback, and support as they engage in their independent research processes. This course is REQUIRED for all students completing Latin Honors and STRONGLY ENCOURAGED for students conducting mentored "senior" research regardless of GPA. Students graduating in spring or summer should take ENST 498 in fall and ENST 499 in spring of their final year; students graduating in December should take ENST 498 in the fall of their graduating year.  
Credit 3 units.

**L82 EnSt 499 Senior Honors**

Independent work for undergraduate Honors, to be supervised by a faculty member. Prerequisites, senior standing, eligibility for Honors, and permission of instructor.  
Credit 3 units.

**L82 EnSt 4995 Foundations of Research: Building a literature review**

The goal of this course is to introduce you to many of the skills that are required to generate, contextualize, and justify research. The final product of the course will be a literature review and tractable research question about a topic of your choice. One of the most important pieces of conducting research is to generate an interesting and important research question that is grounded in what we already know, contextualized by previous research, and justified by what gaps yet remain in our knowledge. Researchers craft and share this motivation in a literature review, contextualizes, justifies, and motivates the research question. Drafting a literature review is a critical and large part of the process, because working through writing of ideas is often how the ideas are shaped and refined, in large part because writing is thinking. In class we will cover a variety of concepts and skills that are useful in any discipline in terms of searching for the right kind of background information and data, evaluating types and quality of sources, reading and summarizing literature, constructing a logical and persuasive written argument, reference management, and data management and visualization. This course serves all students in the interdisciplinary environmental space, because the content and skills of this course apply to the literature review process across the range of humanities, social science, and natural science disciplines. We will touch on disciplinary conventions where they differ, but most of the content and skills are common and apply to all disciplines. Some students will go on to pursue a senior thesis research project while others may not, but all students will be able to transfer the skills you learn here into other

course and capstone work, professional school and professional work going forward. Through reading, individual homework activities, and group discussion and class activities, you will learn and practice skills. Over the course of the semester, you will complete phased assignments that build up to a written literature review on a topic of your choice. Your course grade will be based on participation, homework, class activities, and assignments related to the literature review. This course is offered every semester. It is designed for third year students with a major or minor in Environmental Analysis/Environmental Studies. It is not required but is strongly recommended for any student who is considering senior thesis research in Environmental Analysis. Fourth-year and second-year Environmental Analysis/Environmental Studies students will be considered on a case-by case basis based on available seats.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

## Environmental Analysis Major

### Program Requirements

- **Total units required:** 49

The environmental analysis major is a flexible, 49-credit program that focuses on developing critical skills and competencies in interdisciplinary environmental problem-solving. It is ideal for students seeking interdisciplinary training focused on the environment and sustainability, and it is designed to stand alone or to complement another major.

### Required Courses

Students must complete a total of 28 units of required courses as described below:

- Choose three of the following (9 units):

Code	Title	Units
Biol 2950	Introduction to Environmental Biology	3
EnSt 101	Earth's Future: Causes and Consequences of Global Climate Change (160 course)	3
EnSt 102	To Sustainability and Beyond: People, Planet, Prosperity	3
EnSt 111	Environmental Racism and the Health of Everyone	3
EnSt 215	Introduction to Environmental Humanities	3
EnSt 250	One Health: Linking the Health of Humans, Animals, and the Environment	3
EnSt 251	Metropolitan Environment	3
EnSt 252	Sustainability in Business	3
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3
Pol Sci 2010	Introduction to Environmental Policy	3

\* These Beyond Boundaries courses, open to first-year students only, may apply to this section; students may count up to two toward the major.

- Required core courses in analysis and communication; choose four of the following (12 units):

Code	Title	Units
Drama 214	Public Speaking: Embodied Communication	3
Drama 4081	Theater for Social Change	3
EnSt 315	Fallout: Analyzing Texts and Narratives of the Nuclear Era	3
EnSt 316	Beyond the Evidence	3
EnSt 350W	Writing Skills for Environmental Professionals	3
EnSt 357	Multiparty Environmental Decision Making	3
EnSt 364	Field Methods for Environmental Science	3
EnSt 380	Applications in GIS	3
EnSt 415W	Writing Home: Creating Cultural Guides for Environmental Site Workers	3
EnSt 481	Advanced GIS	3
EnSt 4995	Foundations of Research: Building a literature review	3
IPH 3123	Introduction to Digital Humanities	3
SDS 2200	Elementary Probability and Statistics	3
or SDS 3200	Elementary to Intermediate Statistics and Data Analysis	
or SDS 3211	Statistics for Data Science I	

**Note:** Students may count a fifth analysis and communication course toward the depth electives.

- Required course in social identity and environment; choose one of the following (3 units):

Code	Title	Units
AFAS 1130	Introduction to Race	3
AAS 2010	The Roots of Ferguson: Understanding Racial Inequality in the Contemporary U.S.	3
EnSt 111	Environmental Racism and the Health of Everyone	3
GeSt 232	Intergroup Dialogue: Race/Ethnicity	3
JIMES 2910	Racism and Antiracism	3
SOC 2110	Social Inequality in America	3
SOC 2520	Inequality By Design: Understanding Racial/Ethnic Health Disparities	3
SOC 3212	The Social Construction of Race	3
SOC 3910	Economic Realities of the American Dream	3

SOC 4289	Neighborhoods, Schools, and Social Inequality	3
SOC 4810	Global Structures and Problems	3
SOC 4830	Global Racial Systems	3

- Required interdisciplinary environmental capstone course; choose one of the following (3 units):

Code	Title	Units
EnSt 405	Sustainability Exchange: Community and University Practicums	3
EnSt 407	RESET - Renewable Energy Policy, Engineering and Business	3
EnSt 452	International Climate Negotiation Seminar	var.; max. 6
EnSt 498	Senior Honors Research	3
EnSt 539	Interdisciplinary Environmental Clinic	var.; max. 6

**Note:** Due to the intensity of these project-based courses, students may only take one per semester. Students may count a second capstone course toward the depth electives.

- Fourth-year reflection seminar (1 unit):

Code	Title	Units
EnSt 492	Environmental Studies Fourth-Year Reflection Seminar	1

**Note:** The purpose of this seminar is to create a written narrative portfolio that synthesizes, integrates, and reflects on the student's learning across the courses and experiences of the major. Reflection will occur through personal writing and discussion with peers in the course.

## Elective Courses

Students will choose 21 units of depth and breadth elective courses from the three categories below: Social Sciences, Humanities and Arts, and Natural Science. Students must choose seven elective courses, with at least four courses from one category and at least one course in each of the other two categories. This requirement means that students can choose a 5/1/1 combination or a 4/2/1 combination from the elective categories.

The following flexibility is allowed regarding substitutions:

- Students may count a fifth analysis and communication course toward the depth electives.
- Students may count a second capstone course toward the depth electives.
- Students may request one course substitution outside of the electives listed below to take advantage of unique one-time or rarely-offered courses.

Students must complete no fewer than 18 units of courses numbered 300 or above within the major with a grade of C- or better. There is no double counting of advanced (300- and 400-level) courses between two majors or between a major and a minor. This "no double-counting rule" also applies to students who are double majoring across schools.

- Social sciences electives:

Code	Title	Units
AMCS 227	Topics in Native American Culture	3
AMCS 299	The Study of Cities and Metropolitan America	3
Anthro 3102	Topics in Anthropology: Sustainability in Extractive Communities	3
Anthro 3215	Food, Culture, and Power	3
Anthro 3472	Global Energy and the American Dream	3
Anthro 3602	Environmental Inequality: Toxicity, Health, and Justice	3
Anthro 361	Culture and Environment	3
Anthro 374	Social Landscapes in Global View	3
Anthro 379	Meltdown: The Archaeology of Climate Change	3
Anthro 4281	Ecological Anthropology	3
Econ 451	Environmental Policy	3
EnSt 255	Systems Thinking	3
EnSt 3060	Community Based Conservation: Madagascar Sustainability Initiative	3
EnSt 310	Ecological Economics	3
EnSt 316	Beyond the Evidence	3
EnSt 346	Environmental Justice	3
EnSt 347	Sustainable Cities	3
EnSt 4527	IPCC: Governance, Policy and Science	3
EnSt 461	Intro to Environmental Law	3
EnSt 481	Advanced GIS	3
EnSt 482	Applications in Geospatial Intelligence	3
EnSt 4995	Foundations of Research: Building a literature review	3
MGT 450R	Business & Government: Understanding and Influencing the Regulatory Environment	3
MGT 460L	Introduction to Social Entrepreneurship	3
MPH 5002	Epidemiology	3
MPH 5323	TPS: Climate Change and Public Health	3
Pol Sci 332B	Energy Politics	3
Pol Sci 3760	Globalization, Urbanization, and the Environment	3
Pol Sci 363	Quantitative Political Methodology	3
Pol Sci 389A	Power, Justice, and the City	3

Pol Sci 4043	Public Policy Analysis, Assessment and Practical Wisdom	3
Pol Sci 495	Research Design and Methods	3
SOC 3350	Poverty and the New American City	3
SOC 4810	Global Structures and Problems	3

\* Students should request permission from the instructor to enroll in this course.

- Environmental humanities and arts electives:

Code	Title	Units
AFAS 3075	Recipes for Respect: Black Foodways in the United States	3
ARCH 209	Design Process	3
ART 318P	Photography: Art Practice (Art, Environment, Culture & Image)	3
Art-Arch 3961	Art & Ecology	3
Comp Lit 4111	Pastoral Literature	3
Drama 351	Intro to Playwriting	3
Drama 4081	Theater for Social Change	3
EnSt 315	Fallout: Analyzing Texts and Narratives of the Nuclear Era	3
EnSt 3410	Native American Storytelling - Healthy Land Practice	3
EnSt 415W	Writing Home: Creating Cultural Guides for Environmental Site Workers	3
History 2561	Urban America	3
History 3194	Environment and Empire	3
IPH 312	Introduction to Digital Humanities	3
IPH 431	Statistics for Humanities Scholars: Data Science for the Humanities	3
LAND 530F	Foodscapes: Art Food Space Activism	3
LAND 553A	Seeds	3
Phil 235F	Introduction to Environmental Ethics	3
Writing 309	Writing the Natural World	3

\* This course has a prerequisite.

- Natural science electives:

Code	Title	Units
Anthro 3053	Nomadic Strategies and Extreme Ecologies	3
Anthro 3660	Primate Ecology, Biology, and Behavior	3
Anthro 3662	Writing for Primate Conservation Biology	3
Anthro 4285	Environmental Archaeology	3
Anthro 4803	Advanced GIS Modeling and Landscape Analysis	3
Biol 3171	Biology for Climate Change Solutions	3
Biol 3220	Woody Plants of Missouri	3

Biol 3221	Research and Public Education in the Arboretum	3
Biol 343A	Plants, Environment and Civilization	3
Biol 3494	Microbes and the Environment	4
Biol 370	Animal Behavior	3
Biol 373W	Laboratory on the Evolution of Animal Behavior (Writing Intensive)	3
Biol 381	Introduction to Ecology	3
Biol 3900	Science for Agriculture and Environmental Policy	3
Biol 419	Community Ecology	3
Biol 4193	Experimental Ecology Laboratory	4
Biol 4195	Disease Ecology	4
EEPS 317	Soil Science	3
EEPS 323	Biogeochemistry	3
EEPS 340	Minerals, Rocks, Resources and the Environment	4
EEPS 342	Environmental Systems	3
EEPS 385	Earth History	3
EEPS 386	The Earth's Climate System	3
EEPS 387	Geospatial Science	4
EEPS 407	Remote Sensing	3
EEPS 409	Surface Processes	3
EEPS 428	Hydrology	3
EEPS 442	Aqueous Geochemistry	3
EEPS 454	Exploration and Environmental Geophysics	4
EEPS 468	Geospatial Field Methods	3
EEPS 486	Paleoclimatology	3
EnSt 3630	Arctic Climate System	3
EnSt 364	Field Methods for Environmental Science	3
EnSt 365	Applied Conservation Biology	3
EnSt 375	Urban Ecology	3
EnSt 481	Advanced GIS	3
EnSt 483	Introduction to Spatial Epidemiology	3
LAND 551A	Landscape Ecology	3

## Additional Information

### Grades and Credits

The program has set the following policy concerning the minimum acceptable grade performance. A grade of C- is the minimum acceptable performance for each unit of credit for all course work for the major. Courses with grades of D may fulfill the College's requirement for 120 total units of credit, but they do not meet the program requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses. Please visit the Academic Regulations page (p. 1132) of the College of Arts &

Sciences Bulletin for more information. **Note:** Students must make sure that, while completing the major, they complete a minimum of 18 units of upper-level course work (300 level or above). At least half of the units (i.e., 25 units) for the major must be completed in residence.

### Substitutions and Transfer Credit

Requests for substitutions for courses from other institutions (transfer credit) need approval by the College Office. Please visit the Policies and Procedures for more information.

For Majors requesting a course substitution, please complete the Course Petition Form.

### Study Abroad

To study abroad, students must be in their junior or senior year and have at least a 3.0 grade point average. Students must understand the language of the country in which they plan to study. Grades do not transfer back to Washington University. Credits can be applied toward the 120 credits needed to graduate, and courses taken abroad can substitute for courses for the environmental major and minors. These substitutions should be worked out before leaving for Study Abroad. Final decisions for course credit will be made once the student has returned and the courses and grades are reported back to Washington University. The minimum grade for study abroad coursework to apply to major/minor credit is C-.

Environmental Studies will accept up to 4 courses (12-16 units) from a study abroad program toward the Environmental Analysis Major. This can include courses in the social identity and environment and breadth and depth elective sections of the major, as well as a research methods courses taken on a field-based program, but not other sections of the major. Requests for substitutions should be submitted to the director and study abroad coordinator for Environmental Studies, Dr. Jeff Catalano.

### Considerations

- Participating in a Washington University program allows financial assistance, and students may earn full academic credit for study abroad if they participate in Washington University programs.
- Students wishing to participate in non-Washington University programs must petition for credit before participating in the program.
- Students must communicate regularly with their advisors while abroad and report to them upon return.
- Each student must contact the Overseas Office to arrange for the transfer of credit.
- For details, contact the Overseas Office.

# Environmental Studies Minor

## Program Requirements

- **Total units required:** 18

This minor is a good fit for students for many reasons:

- **Exposure:** Includes introductory-level courses
- **Accessibility:** Includes introductory courses
- **Flexibility:** Wide degree of choice in elective categories
- Pairs easily with many majors to provide interdisciplinary exposure

Students must have at least 9 units of course work at the 300 level or higher that are unique to this minor.

## Required Courses

Required core introductory courses (students choose two of the following; 6 units):

Code	Title	Units
Biol 2950	Introduction to Environmental Biology	3
EEPS 202	Introduction to Earth, Environmental, and Planetary Science	3
EnSt 101	Earth's Future: Causes and Consequences of Global Climate Change*	3
EnSt 102	To Sustainability and Beyond: People, Planet, Prosperity*	3
EnSt 111	Environmental Racism and the Health of Everyone*	3
EnSt 215	Introduction to Environmental Humanities	3
EnSt 250	One Health: Linking the Health of Humans, Animals, and the Environment	3
EnSt 251	Metropolitan Environment	3
EnSt 252	Sustainability in Business	3
Pol Sci 2010	Introduction to Environmental Policy	3

\* Students may count one of these Beyond Boundaries courses (first year only): EnSt 101, EnSt 102, or EnSt 111.

## Elective Courses

One elective in analysis and communication (3 units):

Code	Title	Units
EnSt 315	Fallout: Analyzing Texts and Narratives of the Nuclear Era	3
EnSt 316	Beyond the Evidence	3
EnSt 350W	Writing Skills for Environmental Professionals	3
EnSt 357	Multiparty Environmental Decision Making	3

EnSt 364	Field Methods for Environmental Science	3
EnSt 380	Applications in GIS	3
EnSt 405	Sustainability Exchange: Community and University Practicums	3
EnSt 407	RESET - Renewable Energy Policy, Engineering and Business	3
EnSt 415W	Writing Home: Creating Cultural Guides for Environmental Site Workers	3
EnSt 452	International Climate Negotiation Seminar	var.; max 6
EnSt 481	Advanced GIS	3
EnSt 4995	Foundations of Research: Building a literature review	3
EnSt 539	Interdisciplinary Environmental Clinic	var.; max 6

One elective in environmental humanities and arts (3 units):

Code	Title	Units
AFAS 3075	Recipes for Respect: Black Foodways in the US	3
ARCH 209	Design Process	3
ART 318P	Photography: Art Practice (Art, Environment, Culture & Image)	3
Art-Arch 3961	Art & Ecology	3
Comp Lit 4111	Pastoral Literature	3
Drama 351	Intro to Playwriting	3
Drama 4081	Theater for Social Change	3
EnSt 315	Fallout: Analyzing Texts and Narratives of the Nuclear Era	3
EnSt 3410	Native American Storytelling - Healthy Land Practice	3
EnSt 415W	Writing Home: Creating Cultural Guides for Environmental Site Workers	3
History 2561	Urban America	3
History 3194	Environment and Empire	3
IPH 312	Introduction to Digital Humanities	3
IPH 431	Statistics for Humanities Scholars: Data Science for the Humanities	3
LAND 530F	Foodscapes: Art Food Space Activism	3
LAND 553A	Seeds	3
Phil 235F	Introduction to Environmental Ethics	3
Writing 309	Writing the Natural World	3

One elective in social sciences (3 units):

Code	Title	Units
AMCS 227	Topics in Native American Culture	3
AMCS 299	The Study of Cities and Metropolitan America	3
Anthro 3102	Topics in Anthropology: Sustainability in Extractive Communities	3
Anthro 3215	Food, Culture, and Power	3

Anthro 3472	Global Energy and the American Dream	3
Anthro 3602	Environmental Inequality: Toxicity, Health, and Justice	3
Anthro 361	Culture and Environment	3
Anthro 374	Social Landscapes in Global View	3
Anthro 379	Meltdown: The Archaeology of Climate Change	3
Anthro 4281	Ecological Anthropology	3
Econ 451	Environmental Policy	3
EnSt 255	Systems Thinking	3
EnSt 3060	Community Based Conservation: Madagascar Sustainability Initiative	3
EnSt 310	Ecological Economics	3
EnSt 316	Beyond the Evidence	3
EnSt 346	Environmental Justice	3
EnSt 347	Sustainable Cities	3
EnSt 4527	IPCC: Governance, Policy and Science	3
EnSt 461	Intro to Environmental Law	3
EnSt 481	Advanced GIS	3
EnSt 482	Applications in Geospatial Intelligence	3
EnSt 4995	Foundations of Research: Building a literature review	3
MGT 450R	Business & Government: Understanding and Influencing the Regulatory Environment	3
MGT 460L	Introduction to Social Entrepreneurship	3
MPH 5002	Epidemiology	3
MPH 5323	TPS: Climate Change and Public Health	3
Pol Sci 332B	Energy Politics	3
Pol Sci 363	Quantitative Political Methodology	3
Pol Sci 3760	Globalization, Urbanization, and the Environment	3
Pol Sci 389A	Power, Justice, and the City	3
Pol Sci 4043	Public Policy Analysis, Assessment and Practical Wisdom	3
Pol Sci 495	Research Design and Methods	3
SOC 3350	Poverty and the New American City	3
SOC 4810	Global Structures and Problems	3

One elective in natural science (3 units):

Code	Title	Units
Anthro 3053	Nomadic Strategies and Extreme Ecologies	3
Anthro 3660	Primate Ecology, Biology, and Behavior	3
Anthro 3662	Writing for Primate Conservation Biology	3
Anthro 4285	Environmental Archaeology	3
Anthro 4803	Advanced GIS Modeling and Landscape Analysis	3
Biol 3171	Biology for Climate Change Solutions	3
Biol 3220	Woody Plants of Missouri	3

Biol 3221	Research and Public Education in the Arboretum	3
Biol 343A	Plants, Environment and Civilization	3
Biol 370	Animal Behavior	3
Biol 373W	Laboratory on the Evolution of Animal Behavior (Writing Intensive)	3
Biol 381	Introduction to Ecology	3
Biol 3900	Science for Agriculture and Environmental Policy	3
Biol 3494	Microbes and the Environment	4
Biol 419	Community Ecology	3
Biol 4193	Experimental Ecology Laboratory	4
Biol 4195	Disease Ecology	4
EEPS 317	Soil Science	3
EEPS 323	Biogeochemistry	3
EEPS 340	Minerals, Rocks, Resources and the Environment	4
EEPS 342	Environmental Systems	3
EEPS 385	Earth History	3
EEPS 386	The Earth's Climate System	3
EEPS 387	Geospatial Science	4
EEPS 407	Remote Sensing	3
EEPS 409	Surface Processes	3
EEPS 428	Hydrology	3
EEPS 442	Aqueous Geochemistry	3
EEPS 454	Exploration and Environmental Geophysics	4
EEPS 468	Geospatial Field Methods	3
EEPS 486	Paleoclimatology	3
EnSt 3630	Arctic Climate System	3
EnSt 364	Field Methods for Environmental Science	3
EnSt 365	Applied Conservation Biology	3
EnSt 375	Urban Ecology	3
EnSt 481	Advanced GIS	3
EnSt 483	Introduction to Spatial Epidemiology	3
LAND 551A	Landscape Ecology	3

## Film and Media Studies

During the 21st century, as our national and global cultures become increasingly dominated by the visual in ubiquitous modes of technology-based communication, the need to become critical viewers — knowledgeable in the history of the most popular art forms of our time and possessing the analytical skills to understand and interpret mass media — is acute.

To address this need, the major in Film and Media Studies requires the rigorous study of history and aesthetics so that students come to understand the creative force of moving image texts, whether digital, electronic, or filmic. Courses examine the place of these texts in culture and how their production of meaning relates to industrial and business practices as well as to other artistic endeavors. By complementing the critical studies undergraduate curriculum in Film and Media Studies, courses in production and screenwriting provide — through acts of creation and collaboration — an understanding of the aesthetic and ethical choices that artists confront when working with moving image-based media. Such practical experience integrates theoretical and historical awareness to further enhance students' understanding of the ways in which visual culture makes meaning with established and emergent technologies in contemporary society. This major will benefit any student interested in gaining an intellectual perspective on the relationship between art and technology, culture and industry, and history and theory. This major trains students in rigorous analytical thinking and provides them with research skills and historical knowledge that will assist them in becoming effective participants in the mediated culture of the 21st century.

The program of Film and Media Studies' academic mission is focused on the intellectual and professional development of students, but our faculty regard educating the larger Washington University and St. Louis communities about our field of study to be another important element of our work. To that end, we are committed to sponsoring events — including film festivals, academic lectures, and symposia — that further the discussion of and intellectual engagement with all forms of moving image media.

---

### L53 Film 110 First-Year Seminar: Science Fiction Literature & Film: A Contrast in Hyper-imaginative Media

This course will present a historical overview of the forms that racial and ethnic representations have taken in American television. The course will chart changes in public perception of racial and ethnic difference in the context of sweeping cultural and social transformations. The course examines how notions of medium and ponders the implications for these identities of the contemporary practice of "narrowcasting." Required Screening.  
Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Art: HUM BU: BA EN: H

---

---

**L53 Film 112 First-Year Seminar: Race and Ethnicity in American Cinema**

From the early documentary roots of cinema through the Civil Rights movement and to the recent democratization of the means of media production, questions of race and ethnicity have proved crucial both to the content of American films and also to the perspective from which they are made. This class will look at the representation of historical moments from the Civil War to Hurricane Katrina, the production of cinematic stereotypes as well as their appropriation for subversive purposes, and the gradual evolution of multi-culturalism as a central factor in the stories told and the telling of stories on the American screen. Students will use film texts to develop a critical understanding of one of the most important issues in American history. REQUIRED SCREENING: [day, time].

Credit 3 units. A&S: FYS A&S IQ: HUM, SD Art: HUM BU: BA EN: H

---

**L53 Film 1122 First-Year Seminar: Multiverses and Mind Games in Film and TV**

Over the past three decades, contemporary film and television have seen a trend of increasingly complex storytelling, in the US and worldwide. We see such innovative narrative forms in Hollywood films such as *Source Code* (Duncan Jones, 2011), *Inception* (Christopher Nolan, 2010), and *Butterfly Effects* (Eric Bress and J.Mackye Gruber, 2004), as well as in TV series such as *FlashForward* (ABC, 2009-10) and *Russian Doll* (Netflix, 2019), not to mention global art cinema *Too Many Ways to Be No.1* (Wai Ka-fai, 1997) and *Peppermint Candy* (Chang Dong Lee, 1999). Named "puzzle films," "mind-game films," or "complex TV," these films and series manifest common new features, such as non-linear narratives, jumbled chronologies, labyrinthine spatial orientation; they creatively use time travel, multiverse, compulsive repetition, and loops to transcend spatial-temporal limitations. These films play with our perception of the reality, present new psychological and cognitive challenges, and thereby create new spectatorial pleasure. This course teaches students to enjoy, view, closely analyze, and critically think about films and series of complex storytelling. Reading these films along with recent film and television studies scholarship, students learn analytical skills and conceptual frameworks to untangle the convoluted narrative logic and discern in the narrative architecture new modes of rethinking identity, reality, history, and future in our contemporary societies. Required Screenings: Wednesdays @ 4pm. This course is appropriate for first-year students.

Credit 3 units. A&S: FYS A&S IQ: HUM EN: H

---

**L53 Film 114 First-Year Seminar: Superhero Media**

This course will examine the superhero as American myth and media industry commodity. We will consider historical, cultural, and industrial aspects of the superhero genre across comic books, films, television series, and video games. Focusing on multiple media allows us to examine an array of medium-specific and cross-media issues (e.g., how criticism of superhero films as "not cinema" reflects a legacy of comics being perceived as juvenile). Our study will encompass a number of critical frameworks, including myth, adaptation, gender, race, and transmedia storytelling. Each course unit will focus on how different media have presented one or more superhero franchises (e.g., Superman, Batman, Black Panther, Captain Marvel, Watchmen). Required screenings. Enrollment limited to first-year students.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

---

**L53 Film 115 First-Year Seminar**

This course will explore the complex relationship between moving images and ideas of the real in both movies and television. It will explore theories of representation, surveillance, authenticity, truth, and realism in this context. From the earliest "actuality" films to the recent phenomenon of reality television programming, it will ask if screen images capture what is "really" happening in front of the camera or if conventions of representation, genre, and narrative mediate the

reality of these images. More significantly, it will inquire into why such questions matter. At issue is the role that moving images on both the big and the small screen have in our understanding of the world as it is and ourselves as we experience it.

Credit 3 units. A&S: FYS A&S IQ: SSC BU: HUM EN: S

---

**L53 Film 116 First-Year Seminar: Cult TV: Critical Approaches to Fans and Fictions**

What do such disparate television series as *Dr. Who*, *Star Trek*, *The Avengers*, *Monty Python's Flying Circus*, *The X-Files*, *Buffy the Vampire Slayer*, *Xena: Warrior Princess*, and *Sealab 2021* have in common? They all attract loyal audiences, stimulate "subcultural" sensibilities, lend themselves to "textual poaching," and thus qualify as examples of "Cult TV," a term that has become increasingly salient within critical studies of the medium. In this course we will explore the subject of cult television from a variety of social, cultural, and thematic perspectives, so that by the end of the semester students will have gained a deeper understanding of its historical importance as a barometer of both popular and oppositional tastes. We will examine how these and other examples of genre-based network and cable programming complicate distinctions between lowbrow and highbrow tastes while sustaining worldwide "interpretative communities" years after their original airdates. Students will also examine the importance of syndication, home video technologies, ancillary markets, publishing, and the Internet in the construction of fan cultures. Required Screening.

Credit 3 units. A&S: FYS A&S IQ: HUM EN: H

---

**L53 Film 117 First-Year Seminar: Asians in American Film**

This course surveys the history of Asian representations in American cinema from the silent period to the contemporary era. Throughout the semester we will focus on images of Chinese, Japanese, Koreans, Filipinos, and Vietnamese that have become most ingrained in American popular culture over the last century, from *Fu Manchu* and *Madame Butterfly* stereotypes popular during the classical studio era to more recent reconfigurations of racialized imagery in *Jackie Chan* and *Jet Li* films. We will also examine selected works by Asian American independent writer-directors-films and videos like *Chan is Missing*, *History and Memory*, and *Better Luck Tomorrow* that challenge the stereotypes and normative tropes of "Orientalism" still permeating mainstream media. Students will be asked to frame textual analyses of key films (such as *The Cheat*, *Daughter of Shanghai*, *Battle Hymn*, *Flower Drum Song*, and *Enter the Dragon*) within various political, social, cultural, and industrial contexts (e.g. anti-Asiatic immigration and labor policies; U.S. foreign policies; the practice of "yellowface;" censorship codes; wars in East and Southeast Asia; anti-miscegenation laws; grassroots campaigns to stem the tide of stereotypes and hate-crimes; etc.).

Credit 3 units. A&S: FYS BU: HUM, IS EN: H

---

**L53 Film 118 First-Year Seminar: Mr. Kiss Kiss Bang Bang: James Bond in Film, Literature and Popular Culture**

Originally a character in Cold War spy literature, James Bond has emerged as an international pop culture phenomenon. In this course, we will explore the evolution of James Bond from Ian Fleming to the "spy" parodies in international cinema. We will read several of Fleming's novels and short stories, including *Casino Royale* (1953), *"Octopussy"* (1966) and *"The Property of a Lady"* (1967), and discuss these texts in light of post-war spy literature. We will screen numerous Bond films, and compare and contrast James Bond the literary and cinematic character, how Bond emerged as a franchise hero through the vision of producers Harry Saltzman and Albert "Cubby" Broccoli, and critical aspects of the film franchise, including its storytelling roots in Hollywood serials, its use of gadgets and special effects, and the role of stardom in their marketing (Sean Connery, Ursula Andress, Roger Moore, Madonna, Pierce Brosnan and Daniel Craig). Finally, we will

explore the re-envisioning of Bond in various media and art forms in global popular culture, including music, DC and Marvel Comics, games, children's television and in Asian cinema (Stephen Chow's 1994 *From Beijing with Love*). Required Screenings.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 119 First-Year Seminar: Anime as Popular Culture

In the contemporary media landscape, film, television, games, publishing, and merchandizing are increasingly connected and help distribute cultural products across the globe. Japanese animation is one of the earliest and most successful examples of this powerful strategy. This course examines the global franchising industry of Japanese anime to explore basic questions about media and popular culture: How do we define a medium? How do consumer practices shape media and popular culture? What is the impact of globalization on media, and global media on national culture? Our investigations of Japan "cool" and its avid consumer cultures will cover: animation aesthetics and technology; media convergence; anime fan cultures; science-fiction and remaking the body, history, and identity through global media. No prerequisites. Enrollment limited to fifteen college freshmen. In addition to class meetings, there will be a mandatory weekly scheduled screening.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: IS EN: H

---

### L53 Film 120 First-Year Seminar: Horror Across Media

In spite of -- and because of -- its propensity for terrifying readers and viewers, horror has proven to be one of the most resilient and popular genres across all forms of media. Why are audiences attracted to a genre that causes fear, revulsion, and distress? This course will consider the cultural, philosophical, and generic dimensions of horror and explore how it operates across an array of media platforms: film, literature, television, comics, and video games. We will read two literary masters of the genre, H.P. Lovecraft and Stephen King, and we will screen some of the most successful horror films of the last 50 years. We will also study horror through a variety of critical frameworks, including gender, stardom, special effects, transnationality, adaptation, transmedia storytelling, and interactivity. The course will culminate in two extended case studies. In the first, we will compare and contrast literary, filmic, and televisual adaptations of "The Shining." In the second, we will consider "The Walking Dead" as a franchise that spreads its narrative across comics, multiple television programs, and video games. Required screenings. Enrollment limited to first-year students.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 121 First-Year Seminar: Youth Culture and Visual Media

Since the advent of cinema through the recent development of online social networking, visual media in the United States and around the world have been identified with a market of youthful consumers and producers. This course will look at the development of youth culture in the United States and its unique relationship to visual media, including film, television, comic books, video games, and the Internet, in the twentieth and twenty-first centuries. We will examine youth culture as a social phenomenon generated by the young, a means of representing the experience of being youthful, and as part of the ongoing debates over the effects of media on the young. As alternately mass culture, popular culture, counter culture, and participatory culture, youth culture holds a privileged place in the history of American visual media and continues to influence production and innovation within the media marketplace.

Credit 3 units. A&S: FYS A&S IQ: HUM BU: BA EN: H

---

### L53 Film 200 Special Projects

This course is intended for freshmen and sophomores who wish to register for internships. Students must receive Program approval prior to beginning the internship. Please consult the Program guidelines governing internships. Credit variable, maximum 3 units.

Credit variable, maximum 3 units.

---

### L53 Film 220 Introduction to Film Studies

How do film images create meaning? What are the tools the film artist uses to create images? This course will introduce students to basic techniques of film production and formal methodologies for analyzing film art. Students will learn the essential components of film language -- staging, camera placement, camera movement, editing, lighting, special effects, film stock, lenses -- to heighten perceptual skills in viewing films and increase critical understanding of the ways films function as visual discourse. The course is foundational for the major in Film and Media Studies. Required Screening

Credit 3 units. A&S IQ: HUM Arch: ETH, NS, HUM Art: HUM BU: HUM EN: H

---

### L53 Film 225 Making Movies

This course introduces the core concepts and skills for producing dramatic narrative film and video, building on the Hollywood paradigm. No previous technical experience is required, but students should have taken or be concurrently enrolled in Film 220. This course teaches students how films are put together to tell stories, negotiating between the possibilities of cinematic language and the practicalities of working with machines and other people. In order to develop an understanding of filmic narration, students will learn the basics of camera operation, lighting, digital video editing, sound design and recording, casting and directing actors, visual composition and art direction, and production planning and organization. These concepts will be put into practice through a series of exercises culminating in a creative, narrative short digital video. This course fulfills the prerequisite for 300 and 400 level video and film production courses in Film and Media Studies and the production requirement in the FMS major. Admission by waitlist only. Prereq: Film 220.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 305 Music and Masculinity in the Movies of Martin Scorsese

This course considers the work of American filmmaker Martin Scorsese, with close attention to (1) how Scorsese uses music (and sound) to construct intense cinematic worlds and (2) how his film characters and plots represent various sorts of white American men. The consistent collision between Scorsese's interest in music as a driver of film style and content and his penchant for male-centered, frequently violent narratives makes him an ideal central figure for our study of white American masculinities at the movies over the last five decades. Films to be studied include "Mean Streets," "Taxi Driver," "Raging Bull," "Goodfellas," "Cape Fear," "The Departed," "Shutter Island," and "The Wolf of Wall Street." Required screenings.

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 310 Video Production

An advanced course exploring the creative and technical aspects of video production. Students sharpen their knowledge of cameras, directing, lighting, sound recording, non-linear systems, and narrative structures. In addition to acquiring a theoretical understanding of the production process, students will gain practical experience by producing, outside of class time, a short project reflecting their visual and conceptual maturity. Prerequisite: L53 Film 230 (Moving Images and Sound) or permission of the instructor.

Credit 3 units. A&S IQ: HUM BU: BA EN: H

---

### L53 Film 311 Documentary Production

In parallel with an overview of various documentary genres, ranging from the personal, the poetic, the agitprop, and cinema vérité, this course will offer students the opportunity to produce a short documentary piece on the topic of their choosing. Aesthetic and ethical issues will be explored by considering the overall methodology in terms of subjectivity, content, structure, and the possible usage of music and/or voice-over. For the sake of completing the project in time, it is recommended that students be familiar with the subject matter of their investigation, before taking the course. Prerequisite: L53 Film 230 (Moving Images and Sound) or permission of the instructor. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 3164 Adaptations: Literature / Film / TV

"The book was better than the movie." "The movie wasn't faithful to the book." "The TV series didn't capture the book like the movie did." These have forever been the complaints of readers watching their favorite works of literature adapted to the screen, and, in a media ecosystem increasingly flooded with adaptations and reboots of existing intellectual property, these complaints won't be going away any time soon. Film and literature have been interconnected since the very first films screened at end of the nineteenth century, but the dynamic between literature and media has sometimes been strained: film reviled as the cheap degradation of a vital art form, the novel anxious at the rise of narrative film - and later television - as rival storytelling media. But, viewing literature and visual media in opposition can obscure what becomes visible if we view them together. This is a course about the history, theory, and practice of adaptation from literature to film and television and back again rooted in both canonical and non-canonical case studies. We will study authors whose works have been repeatedly adapted across eras and media; filmmakers whose works are pastiches of various literary and cinematic sources; rigorously, obsessively "faithful" adaptations; radically transformative "unfaithful" adaptations; and works of literature and media that are themselves about the process and ethics of adaptation. The course will be anchored by a reading of Emily St. John Mandel's 2014 novel *Station Eleven* and a serial viewing - replicating the unusual original release - of HBO Max's miniseries adaptation. Same as L14 E Lit 3164. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L53 Film 319 Documentary Film and Media

From movie screens to cell phones, moving images that "document" life have never been more ubiquitous. What do these images tell us about the relationship between representation and reality? How have film and media makers used moving images to represent major cultural, political, and social upheavals as well as communicated an understanding of everyday life? To answer these questions, this course will survey the rich, vibrant legacy of documentary filmmaking as well as demonstrate its ongoing artistic and cultural relevance to newer media. We will examine key modes of documentary film while contextualizing the historical development of these forms within aesthetic, industrial, and political factors. We will also consider ethical issues in filmic representation, especially in relation to the ethnographic tradition. In addition to studying the work of documentary pioneers, we will explore contemporary activist documentaries, as well as new industrial developments such as serialized online documentary. Required screenings. Tuesdays @ 4pm. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

---

### L53 Film 320 British Cinema: A History

British cinema has gotten a bad rap. French film director François Truffaut once declared that cinema and Britain were incompatible terms since "the English countryside, the subdued way of life, the stolid routine-are anti-dramatic. . . [even] the weather itself is anti-cinematic." Yet British films proudly rank among some of the most acclaimed and beloved in film history: Monty Python and the Holy

Grail, *A Hard Day's Night*, *Lawrence of Arabia*, *The Third Man*, *Zulu*, *The Ladykillers*, *A Night to Remember*, *Trainspotting*, *The King's Speech*, and the James Bond franchise. Admittedly, British cinema has had its ups and downs, never quite knowing whether to position itself as a distinctive national cinema or as a rival to Hollywood. This uncertainty has fostered a rich diversity and complexity that this course will emphasize in a survey approach. We will give equal attention to the work of high-profile directors like Alfred Hitchcock and Michael Powell and to important "genres" in which the British seem to excel—like black comedy, imperialist adventure, "kitchen sink" drama, documentary, and the so-called "heritage" films that paved the way for television's *Downton Abbey*. Required Screenings. Credit 3 units. A&S IQ: HUM BU: IS EN: H

---

### L53 Film 3211 Contemporary Chinese Popular Culture

With the rise of the Chinese economy and global capitalism, popular culture has proliferated in mainland China in recent years. This course traces the development of Chinese popular and youth culture and society from the 1990s to the present. It also refers back to modern times and ancient Chinese Confucian philosophy for historical background information. The course covers various forms of Chinese popular culture, such as movies, music, television programs, Internet literature, religion, sports, and food. Students observe primary resources and read academic articles to engage in a multiperspective and multimedia view of present-day China in the age of globalization and East Asian regionalization. Same as L04 Chinese 3211. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

### L53 Film 322 Contemporary East Asian Cinema

This course focuses on films made in Japan, Mainland China, Taiwan, Hong Kong and South Korea over the past three decades. Students will examine how the global/local geopolitics specific to the post-Cold War period, the passing of authoritarian regimes, the boom and bust of the Asian economy, and international film festivals have influenced the shaping of New East Asian cinemas across borders. REQUIRED SCREENING: [day, time]. Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

---

### L53 Film 323 The Cinema of Eastern Europe in the Cold War Era

This course has two objectives. On the one hand, we will watch masterpieces of European cinema, awarded at international festivals and directed by legendary names such as Milos Forman, Emir Kusturica and Andrzej Wajda, and focus on their artistic genius. On the other hand, we will study the way in which the confrontational politics of the Cold War inform these films, with a special focus on the perplexing predicament of a divided and antagonized Europe. The readings for this class emphasize our dual exploration. We will work with texts dealing with both film history and its aesthetics and with broader analyses of the intellectual and political landscape of the Cold War context. Required Screenings. Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

---

### L53 Film 324 History of Chinese Cinemas: 1930s-1990s

This course offers an overview of Chinese cinemas, including those of Mainland China, Hong Kong, and Taiwan, over the twentieth century. We will study major trends such as the left-wing filmmaking in the 1930s, the Maoist revolutionary narratives, Taiwanese healthy realism, the New Cinemas of the three regions, and contemporary transnational productions. Major topics include urban modernity, gender formation, national and transnational cinemas within specific historical contexts. All films come with English subtitle. Required Screenings. Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

---

### L53 Film 325 French Film Culture

Called "the seventh art," film has a long tradition of serious popular appreciation and academic study in France. This course will offer an overview of French cinema, including the origins of film (Lumière brothers, Méliès), the inventive silent period (which created such avant-garde classics as *Un chien andalou*), the poetic realism of the 30s, the difficulties of the war years, the post-war emphasis on historical/nationalist themes in the "tradition of quality" films, the French New Wave's attempt to create a more "cinematic" style, the effects of the political turmoil of May '68 on film culture, the "art house" reception of French films in the US, and the broader appeal of recent hyper-visual ("cinéma du look") films, such as *La Femme Nikita* and *Amélie*. While the primary focus of the course will be on French cinema, we will also discuss the reciprocal influences between American and French film culture, both in terms of formal influences on filmmaking and theoretical approaches to film studies. French film terms will be introduced but no prior knowledge of the language is expected. REQUIRED SCREENING: [day, time].

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

### L53 Film 326 Samurai, Rebels, and Bandits: The Japanese Period Film

Tales of heroism, crime, revolt, and political intrigue. Bloody battles, betrayal, madness, and flashing swords. This is the world of *jidaigeki eiga*, the Japanese period film. In this course, we will analyze the complex (and often flamboyant) narrative, visual, and thematic structures of films about the age of the samurai. We will discuss *jidaigeki* representations of violence and masculinity, self-sacrifice and rebellion, and the invention of tradition as well as critical uses of history. In addition to the historical content of the films, we will study the historical contexts that shaped *jidaigeki* film production and discuss relevant transformations in Japanese cinema and society. Period films have been shaped by and exert strong influences on Japanese theater, oral storytelling, popular literature, comics, and international film culture, all of which are helpful for understanding the films. As we track changes in *jidaigeki* style and subject matter, the course will introduce theories for interpreting narrative structure, genre repetition and innovation, intertextuality, and representations of "the past." All readings will be in English. No knowledge of Japanese required. No prerequisites. Required Screenings Tuesdays @ 7 pm.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

---

### L53 Film 327 Anime and Manga

This course examines the production and reception of Japanese animation and comics, with special emphasis on animation techniques and technology, industrial practices, cultural analysis, and fan cultures. Students will learn about the intertwined histories of anime and manga, and engage with contemporary examples. No prerequisites or Japanese language necessary. This course is appropriate for first year students.

Credit 3 units. A&S IQ: HUM, LCD Art: VC EN: H

---

### L53 Film 328 History of German Cinema

This course explores the major developments of German cinema throughout the twentieth century. More specifically, this course will engage with issues relating to German film culture's negotiation of popular filmmaking and art cinema, of Hollywood conventions and European avant-garde sensibilities. Topics will include the political functions of German film during the Weimar, the Nazi, the postwar, and the postwar eras; the influence of American mass culture on German film; the role of German émigrés in the classical Hollywood studio system; and the place of German cinema in present-day Europe and in our contemporary age of globalization. Special attention will be given to the role of German cinema in building and questioning national identity, to the ways in which German feature films over the past hundred years have used or challenged mainstream conventions to recall the national past and envision alternative futures. Films by

directors such as Murnau, Lang, Fassbinder, Herzog, Tykwer and many others. All readings and discussions in English. May not be taken for German major or minor credit. Required screenings. This course is appropriate for first year students.

Credit 3 units. BU: IS EN: H

---

### L53 Film 329 Italian Neorealism

This course explores the visual language of one of the most influential film movements of the twentieth century. We will concentrate on the origins of neorealism in Italian post-war cinema and history, and focus on the works of film-makers such as Roberto Rossellini, Vittorio De Sica and Luchino Visconti. We will also consider the longer-term influence of the movement both in Italy and elsewhere. Throughout this course, we will reflect on the possibilities of mimesis in cinema, on the social and political engagement of neorealist film, and on the factors that caused its decline.

Credit 3 units. A&S IQ: HUM BU: IS EN: H

---

### L53 Film 330 History of American Cinema

This course traces the history of the American cinema from the earliest screenings in vaudeville theaters through the birth of the feature film to movies in the age of video. The course will examine both the contributions of individual filmmakers as well as the determining contexts of modes of production, distribution, and exhibition. The course aims to provide an understanding of the continuing evolution of the American cinema, in its internal development, in its incorporation of new technologies, and in its responses to other national cinemas. Required screenings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

---

### L53 Film 331 The New Hollywood Cinema

This course will examine the history of film culture and the film industry in the United States since the end of the classical Hollywood studio system. It will pay special attention to the period of auteur-centered filmmaking in the 1970s. During this time, the end of the production code, the financial crisis of the industry, the unparalleled influence of European New Wave and Art films, and the introduction of the first generation of film school graduates (the so-called "movie brats") all combined amidst the tumultuous cultural politics of such movements as the counterculture, civil rights, and second wave feminism to form a film-historical moment often called the Hollywood Renaissance. This brief period was soon followed by a newly reinvigorated Hollywood industry focused on the high-concept blockbuster. Such rapid transformations in the practice and nature of American film not only continue to influence commercial filmmaking today but also continue to shape our understanding of the role of authorship, genre, and ideology within Hollywood. The course will consider films of the New Hollywood in the context of tensions between radicalism and populism, progressivism and nihilism, entertainment and ideology, artistic and commercial success. Required screenings.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 333 Making Movies II: Intermediate Narrative Filmmaking

In *Making Movies II*, students advance their skills in filmmaking through a series of exercises and individual short films culminating in a final narrative project shot in high definition digital video and edited in Adobe CC and Premiere Pro. With faculty guidance, and working in groups, students collaborate in producing a narrative film that is a minimum of 10 minutes in length, following three-act structure and involving elements of motivation, conflict, and resolution. In addition to this structured approach to content, students are encouraged to achieve a unified aesthetic approach to picture and soundtrack that reinforces/enhances the meaning of their final projects. The course develops student skills through lectures, demonstrations, in-class screening of excerpts and critiques. Topics covered include idea

development, preproduction planning, directing actors, composition, lighting, and editing. Students are required to assist other students in their productions and attend all classes. 3 credits. Admission by waitlist only. Prerequisite: Film 220 and Film 225 or 230.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 336 Cinema and Ireland

Like many other anglophone and francophone countries, Ireland only even started to develop a robust national cinema in the 1970s. As in, for instance, Australia and New Zealand, growth had previously been blocked by the dominance of local screens by films from, on the one hand, the overbearing 'imperial' power, Britain, and, on the other, Hollywood, center of an even stronger cultural imperialism. Increased national self-assertion coincided with the weakening of the grip of those two cinemas in the post-classical period. A major focus of the class is on some of the key works of the film-makers who established themselves in the 1980s, notably Neil Jordan and Jim Sheridan. But, as the title indicates - not simply Irish Cinema - it deals with more than this. Like Ireland itself, Irish cinema is deeply marked by, and preoccupied with, the political and cultural struggles of the past, and recent cinema is illuminated by seeing it in the context of earlier films: Hollywood and British versions of Ireland, whether shot on location or in the studio, as well as the isolated earlier landmarks of an indigenous Irish cinema. We also look at the rich topic of the representation of Irish immigrants in Hollywood films. Required Screenings.

Credit 3 units. A&S IQ: LCD BU: IS EN: H

---

### L53 Film 337 Retro Game Design

Before they became "retro," games played on platforms of the 1970s and 1980s were just games. But early game-console hardware was designed with very particular ideas of what made a game a game, and under extreme constraints of cost and technical viability. Creators designed for these constraints, and their work then influenced the design of later hardware and software. This is a course about the history, design, and technology of one retro game console, the 1977 Atari Video Computer System (also known as the Atari VCS or the Atari 2600). The first popular home console, the Atari VCS is a truly weird computer: It "boasts" 128 bytes of RAM, no video buffer, and a custom graphics and sound chip designed to interface with then-universal cathode ray tube televisions. Against all odds, creators made fun and successful games within these extreme constraints. Just as an artist benefits from learning the fundamentals of their craft, so a game designer or developer can benefit from returning to these early and crude hardware platforms. In this course, students will learn the technical and creative history of the Atari, and they will also learn the fundamentals of programming its unfamiliar hardware. Students will carry out programming exercises, mostly in the assembly language instructions required to operate this unusual computer. They will then make their own games for the Atari, which will be able to run on the actual, 45-year-old hardware.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC BU: HUM EN: H

---

### L53 Film 338 Global Game Industries

This course examines the history and practices of the video game industry from a global perspective. We will begin by charting the history of video games through corporate case studies that reflect industrial turning points. Next, we will review frameworks by which to understand the industry both historically and contemporarily. The final part of the course will be spent breaking down processes involved in the creation, distribution, and consumption of video games. Our analysis of the global video game industry will be based on game studies scholarship, trade press reports, and historical material. Lab meetings will provide the opportunity for engagement with documentaries, gameplay demonstrations, and guest speakers. By the end of the course, you will have gained a better sense of how to both study and participate in the increasingly global video game industry. Weekly required screening/lab: Tuesdays @ 7pm. This course is appropriate for first-year students.

Credit 3 units. A&S IQ: HUM, LCD Art: VC EN: H

---

### L53 Film 340 History of World Cinema

The course surveys the history of cinema as it developed in nations other than the United States. Beginning with the initially dominant film producing nations of Western Europe, this course will consider the development of various national cinemas in Europe, Asia, and third world countries. The course will seek to develop an understanding of each individual film both as an expression of a national culture as well as a possible response to international movements in other art forms. Throughout, the course will consider how various national cinemas sought ways of dealing with the pervasiveness of Hollywood films, developing their own distinctive styles, which could in turn influence American cinema itself. Priority given to majors. REQUIRED SCREENING: [day, time].

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

### L53 Film 341 Transnational Cinema(s): Film Flows in a Changing World

Across a century of extreme nationalism, Cold War imperialism, and increased globalization, moving image culture remains deeply tied to the evolution of global economics, shifting notions of local identity, and human migration. Recent changes in the dynamic of international economics and cultural flow have led to new critical approaches that reassess international cinema as being constructed by relationships that transcend national borders. This course examines multiple ways in which cinema works "transnationally", focusing on recent theories of modernism, globalization, and borderless cultures. Exploring a range of contexts from American domination of the early international market, to the recent evolution of Chinese blockbuster action films, to contemporary Palestinian video art, this course looks at the way in which material developments, narrative and aesthetic conventions, and film professionals have circulated over the past century. We will also look at how new technologies of production, distribution, and exhibition challenge traditional notions of cultural borders. Required screenings and in-class textual analysis will be used to complement industrial studies of how transnational flows have come to define contemporary audio-visual media practices. Required Screenings.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

---

### L53 Film 342 Introduction to Video Game Studies

This course will introduce students to multiple facets of video games as an art form, as a business, and as a part of American popular culture. The course will begin with a broad establishment of game studies and an investigation of the uniqueness of video games as a medium. Subsequent weeks will introduce different approaches to studying video games -- including historical, industrial, technological, cultural, theoretical, and aesthetic -- drawn from a variety of sources. Weekly lab sections will provide the opportunity for screenings -- including documentaries, news reports, television episodes, web series, and feature films -- and video game play. Students will complete a final research project on a video game of their choice and present on their projects in class. Required lab.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC BU: HUM EN: H

---

### L53 Film 344 Children's Television

How does contemporary television imagine children? How does the industry speak to them, with what aims, and using what types of representational strategies and modes of address? In turn, how do young people respond, both as viewers and, with the advent and increasing accessibility of new technologies, as media producers? This seminar will address these and other related questions while introducing students to the study of children's television in cultural and critical media studies. Throughout, we will address the theoretical question suggested by the course's title, a reference to the work of literary scholar Jacqueline Rose: is children's television possible?

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L53 Film 345 Sexual Politics in Film Noir and Hard-boiled Literature**

Emerging in American films most forcefully during the 1940s, film noir is a cycle of films associated with a distinctive visual style and a cynical worldview. In this course, we will explore the sexual politics of film noir as a distinctive vision of American sexual relations every bit as identifiable as the form's stylized lighting and circuitous storytelling. We will explore how and why sexual paranoia and perversion seem to animate this genre and why these movies continue to influence "neo-noir" filmmaking into the 21st century, even as film noir's representation of gender and sexuality is inseparable from its literary antecedents, most notably, the so-called "hard-boiled" school of writing. We will read examples from this literature by Dashiell Hammett, James Cain, Raymond Chandler and Cornell Woolrich, and discuss these novels and short stories in the context of other artistic and cultural influences on gendered power relations and film noir. We will also explore the relationship of these films to censorship and to changing post-World War II cultural values. Films to be screened in complete prints or in excerpts will likely include many of the following: *The Maltese Falcon*, *Double Indemnity*, *Murder My Sweet*, *Phantom Lady*, *Strangers on a Train*, *The Big Sleep*, *The Killers*, *Mildred Pierce*, *The High Wall*, *Sudden Fear*, *The Big Combo*, *Laura*, *The Glass Key*, *The Big Heat*, *Kiss Me Deadly*, *The Crimson Kimono*, *Touch of Evil*, *Alphaville*, *Chinatown*, *Taxi Driver*, *Devil in a Blue Dress*, *The Bad Lieutenant*, and *Memento*. Required Screenings.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

---

**L53 Film 346 From Golden Age to Wasteland: U.S. Television in the 1950s and 1960s**

How did television become the dominant news and entertainment medium of the second half of the 20th Century? How did the medium come to define itself and American identities in the post-WWII era? In an era where various social movements began to lay claim to the cultural center, why did "mad men" eventually give way to magical women and fantastic families? This course examines the cultural, industrial, and aesthetic changes in U.S. television broadcasting during a time that was crucial to defining its relationship to the public as well as to Hollywood, the government, critics, and American commerce. The class explores the relationships and shifts that made television the U.S.'s most popular consensus medium but one that also would profit by the expression of alternative tastes, politics and identities. Required screenings.

Credit 3 units. A&S IQ: HUM EN: H

---

**L53 Film 349 Media Cultures**

This course is an introduction to methods in media and cultural studies. We will analyze intersections of media with race, gender, and sexuality by focusing on television and digital media examples. The course begins by exploring questions of representation in media then continues by interrogating how media are implicated in existing structures of inequality and differences of social and cultural power. We will end by discussing some ways that scholars have theorized media consumers as actively engaging with media texts, including scholarship on fan cultures and social media. Required screenings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC BU: BA EN: H

---

**L53 Film 350 History of Electronic Media**

This course traces the history of electronic media as they have become the dominant source for entertainment and information in contemporary culture, starting with over-the-air broadcasting of radio and television through to cable and the "narrowcasting" achieved by digital technologies. While some attention will be paid to other national industries, the chief focus of the course will be on electronic media in the United States to determine, in part, the transformative role they

have played in the cultural life of the nation. The course will explore the relationship of the electronic media industries to the American film industry, determining how their interactions with the film industry helped mutually shape the productions of both film and electronic media. Required screenings.

Credit 3 units. A&S IQ: HUM Arch: ETH, NS, HUM Art: HUM BU: HUM EN: H

---

**L53 Film 352 Introduction to Screenwriting**

Writers will explore the various elements, structures and styles used in crafting a motion picture screenplay. They will experience this process as they conceive, develop and execute the first act of a feature-length script. Writers will create a screenplay story, present an outline for class discussion and analysis, then craft Act One. Writers will be encouraged to consult with the instructor at various stages: concept, outline, character and scene development, and dialogue execution. While the students fashion their screenwriting independently, the class will also explore the general elements of THEME, GENRE, and VOICE. A more specific examination of mechanics, the nuts and bolts of story construction, plotting, pacing, etc. will follow to support the ongoing writing process. In-class exercises will aid the writer in sharpening skills and discovering new approaches to form and content. Writers' work will be shared and discussed regularly in class. Screening of film scenes and sequences will provide students with concrete examples of how dramatic screenwriting evolves once it leaves the writer's hands.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L53 Film 353 Writing Episodic Television**

This class will focus on all the factors that go into preparing and writing an episode for a network TV series (dramas only). Students begin with a "pitch" (verbally or in short outline form) for an idea for a show currently on a network schedule. Once the "pitch" is accepted, the student will then complete a "beat sheet," and ultimately a spec script that can run from 62 to 75 pages. Two drafts of the script will be required. During the course of this process, students will also learn how to research their narrative premises by contacting legal, medical, and law enforcement experts in order to guarantee the accuracy of their scripts. In addition to learning the actual writing process, students will be expected to watch several television shows and to read books, scripts, and industry trade papers as they pertain to the craft and business of television writing. Finally, students will also meet agents, producers, directors, and other television industry professionals in order to gain their insights into the script writing process and to gain a more global view of the steps involved in bringing their ideas to the screen.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L53 Film 356 Television Culture and Cult TV: Critical Approaches to Fandom**

Why do television series inspire passionate involvement on the part of some viewers? What are the differences among being a viewer, an audience member, and a fan? How can we make scholarly sense of cultural practices such as learning to speak Klingon or building a repli-car of the General Lee? Studies of fandom have attempted to answer such questions and continue to explore issues that are crucial to understanding contemporary television culture. The phenomenon of "Cult TV" offers fertile ground for examining the complex dynamics at play among fans, popular culture, the institutions of American media, and individual programs. In its exploration of cult television and fans, this course will engage with key issues in contemporary media such as the proliferation of new media technologies and the repurposing of existing media forms, the permeable boundaries between high and low or mass and oppositional culture, and the fragmentation and concentration of media markets. The class will combine close textual analysis with studies of fan practices to examine a variety of television programs, from canonical cult texts such as *Star Trek* and *Doctor Who* to "quality" fan favorites such as *Designing Women* and *Cagney &*

Lacey to contemporary cult/quality hybrids such as *Lost* and *Heroes*. In mapping out this cultural territory, we will develop a set of critical perspectives on audience identities and activities and examine the continuing and conflicted imagination of fans by media producers, distributors, regulators, and critics. Required Screening. Prerequisite: Film Studies 220 or Film Studies 350 or consent of instructor. Credit 3 units. A&S IQ: HUM Art: HUM BU: BA EN: H

---

### L53 Film 357 Quality Television and the "Primetime Novel"

Over the past four decades, the cultural status of television in the United States has been reconfigured and complicated with changes in industrial structures, audience formations, regulatory presumptions, and production techniques and strategies. This course examines these interrelated forces, particularly as they have fostered a set of programs and practices often hailed as Quality Television. The class will survey the institutional paradigms that gave rise to particular generations of programming celebrated as "quality" and analyze the systems of distinction and cultural value that make the label socially and industrially salient. We will critically investigate the role of audiences and the conceptions of viewer choice at play in these developments. In addition, the course will analyze the textual features that have come to signify narrative complexity and aesthetic sophistication. We will examine foundational historical examples of this phenomenon from *The Mary Tyler Moore Show* to *Hill Street Blues* and *Cagney & Lacey* to *Northern Exposure* as well as more contemporary broadcast and cable fiction such as *LOST*, *The Wire*, and *Mad Men*. In addition, students will be expected to watch a complete series, chosen in consultation with the instructor, as part of their final research project. REQUIRED SCREENING. Prerequisite: Film Studies 220 or Film Studies 350 or consent of instructor. Credit 3 units. A&S IQ: HUM BU: ETH EN: H

---

### L53 Film 358 Combat Movie Music and Sound after Vietnam

This course considers the Hollywood combat movie genre after the Vietnam War (post 1975) by listening closely to how these always noisy films use music and sound effects to tell stories of American manhood and militarism. Centering on an elite group of prestige films--actions movies with a message for adult audiences--the course examines thirty-five years of Hollywood representations of World War II, the Vietnam War, the Gulf War, and post-9/11 wars against terrorism. Close analysis of how combat film directors and composers have used music and sound in conjunction with the cinematic image will be set within a larger context of ancillary texts (source materials, soundtrack recordings, published and unpublished scripts), media folios (press kits, reviews, editorials, newspaper and magazine stories and interviews), and scholarly writing from across the disciplines. Films to be screened include *Apocalypse Now*, *Platoon*, *Hamburger Hill*, *Courage Under Fire*, *Saving Private Ryan*, *The Thin Red Line*, *We Were Soldiers*, *Flags of our Fathers*, *The Hurt Locker*, and *Act of Valor*, as well as pre-1975 combat films starring John Wayne. The ability to read music is not required. Required Screenings. Prerequisites: None. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L53 Film 359 The American Musical Film

Film musicals were crucial to the success of the American film industry from the dawn of sound film in the late 1920s to the demise of the studio system in the late 1950s. This course examines the American film musical from a variety of aesthetic, critical, and historical perspectives, with particular attention to how the genre interacted with popular music and dance and the major political and social trends of the Thirties, Forties, and Fifties. REQUIRED SCREENING: [day, time]. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L53 Film 360 The History of the Film Score

This course looks at the role of music in Hollywood films from the beginning of the sound era to the present. Larger themes include the importance of technology, industry structures shaping the nature of scores, notable film music composers, the relationship between music, gender and genre, music's role in the adaptation of literary texts to film, the power of directors to shape the content of film scores, and the importance of popular music as a driving economic and aesthetic force in film music history. Films to be screened include *From Here to Eternity*, *Stagecoach*, *High Noon*, *The Night of the Hunter*, *Butch Cassidy and the Sundance Kid*, *Born on the Fourth of July*, *Casino*, *Jarhead* and *The Social Network*. Required Screenings. Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 361 Film Sound

Although film critics and theorists tend to think of cinema as a "visual art," this shorthand description of the medium overlooks the importance of film sound in cinematic storytelling. This course is intended to provide a general overview of the way in which film theorists have treated the issue of sound in the cinema. Among the issues addressed in the course are: the contribution sound technology and practice makes to film form; the various possible formal relationships between sound and image; the effects of sound technologies on notions of realism and verisimilitude; the importance of sound to particular genres, like the horror film; and lastly, the role of sound in film spectatorship. The course will also showcase the work of the most important sound stylists in film history, such as Fritz Lang, Orson Welles, Alfred Hitchcock, Robert Altman, and David Lynch. Required screenings. Credit 3 units.

---

### L53 Film 363 Video Post-Production

While post-production of the soundtrack has been around for years, post-production of the "visual track" has increasingly become a major phase in the video and movie-making process. It often allows filmmakers to enhance existing footage with potentially dazzling results. As in all our production courses, we will be concerned with developing strong content. The focus is not on special effects per se, but rather on how they may be used to enhance the message. Students find a non-profit organization of vital importance in need of exposure and produce a Public Service Announcement to be broadcast. Key post-production software like *Comotion*, *AfterEffects* and *Motion* are explored throughout the semester. Prereq: Film 230 (*Moving Images and Sound*) or consent of instructor. 3 units. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

### L53 Film 3644 "Look Here, Karen": The Politics of Black Digital Resistance to White Femininity

In this course, we will explore the ways in which Black online publics use resistance strategies, such as mimetic imagery and racial humor, to call attention to white femininity and its deployment of the police against African Americans. We will trace the relationship between the police state and white femininity through the historical lens of 'innocence' and protection of the U.S. nation as well as the similarities and differences of Black online publics' responses in relation to past resistance strategies. What does it mean to be a 'typical' Karen in Internet culture? What are the aesthetic boundaries of Karens? And, what do digital platforms afford to Black users who make Karens visible? While paying attention to race, gender and class, this course offers students the skills to be able to collect and analyze online data, such as 'Karen' memes, in order to make critical arguments and observations that are grounded in historical accuracy. Same as L90 AFAS 3644. Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: BA EN: H

---

**L53 Film 366 Women and Film**

The aim of this course is primarily to familiarize students with the work of prominent women directors over the course of the twentieth century, from commercial blockbusters to the radical avant-garde. Approaching the films in chronological order, we will consider the specific historical and cultural context of each filmmaker's work. In addition we will be discussing the films in relation to specific gender and feminist issues such as the status of women's film genres, representations of men and women on screen and the gender politics of film production. Required screenings.

Credit 3 units. A&S IQ: HUM, SD BU: HUM EN: H

---

**L53 Film 368 Contemporary Women Directors**

Despite recent media attention to the gender gap in Hollywood, women still account for less than 10% of all directors, and only five women have ever been nominated for the Best Director Oscar. However, these abysmal statistics do not reflect the reality that female directors are producing some of the most innovative and exciting films of the 21st century. This course is intended to provide a general overview of the remarkable contributions of women directors to contemporary cinema (1990 to present). First, we will turn our attention to women in the commercial industry, examining topics such as female authorship, popular genres, and the gender politics of production cultures in Hollywood. Then, we will survey women directors working outside of the system in documentary, independent, and experimental filmmaking modes. Finally, we will adopt a transnational perspective to investigate the contributions of women directors to world cinema, contextualizing the films of "women cinéastes" from countries such as Hong Kong, Argentina, and Iran in relation to their national cinemas and international film festival networks. In addition, we will discuss the films of women directors in terms of feminist and gender issues and as texts that clarify critical issues in film analysis, interpretation, and criticism. Required screenings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L53 Film 370 American Horrors**

Horror movies. Fright films. Scream marathons. Blood and gore fests. Why should we want to look at movies that aim to frighten us? What is the attraction of repulsion? Is there an aesthetics of ugliness? Except for some early prestige literary adaptations like *Dr. Jekyll and Mr. Hyde*, the horror film began as a low class genre, a notch above exploitation movies. In the 1970s-1980s, it became the dominant commercial genre by offering increasingly graphic images of violence and mayhem. The horror film had arrived: lavish budgets, big stars, and dazzling special effects in mainstream major studio films competed with low-budget, no frills productions that helped establish artistically ambitious and quirky filmmakers like George Romero and David Cronenberg. By a chronological survey of the American horror film, this course will explore how differing notions of what is terrifying reflect changing cultural values and norms. Throughout, we will consider the difficult questions raised by horror's simple aim of scaring its audience. In addition to weekly screenings, work for the course will include analytical and theoretical essays on the horror film. Written analyses of films with a close attention to visual style will be required. Prerequisite: Film 220. REQUIRED SCREENING TIME: [day, time].

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

---

**L53 Film 371 Making War**

This course examines the cinematic representation of war. Using World War Two as a case study, students will examine a series of combat pictures, documentaries, and "home front" films from the 1940s to the present. Several key questions will guide the class discussion: How do war films respond to and shape the political worlds in which they are produced? How do these films confront the aftermath of war and the soldier's homecoming? Where is the line between the home front and the front line? More broadly, what does it mean to portray the violence and suffering that war inevitably brings? At the close of the

semester, students will partake in an in-class symposium presenting their research on the cinematic treatment of other conflicts, from the Civil War to the "War on Terror." Films include: *The Boat*, *Saving Private Ryan*, *The Thin Red Line*, *Why We Fight*, and *Mrs. Miniver*. Readings will include works by Susan Sontag, Kaja Silverman, and W.G. Sebald. Required screenings.

**L53 Film 376 French New Wave**

French cinema from 1958-1968 offered "La Nouvelle Vague" or "The New Wave," one of the most innovative, influential, and critically discussed movements in film history. The New Wave marked a major turning point in the relationship between film, thought, and politics in France, as well as a unique bridge between art cinema and pop-culture. Speaking for more than just the youth generation of its own country, it had a major influence on new approaches in subsequent European, American and Asian cinemas. This course offers a detailed look at the social values, artistic motivations, and aesthetic experiments embodied in the French New Wave through the films of Jean-Luc Godard, Agnès Varda, François Truffaut, Alain Resnais, Claude Chabrol, Eric Rohmer, and others, positioning their work within the larger social, political, and cultural environment of this period. As many of these directors collaborated as filmmakers and also were active as film critics and theorists, this class provides a unique insight into the overlapping between visual theory and practice, film and other media, culture and society. Weekly screening required.

Credit 3 units. A&S IQ: HUM BU: IS EN: H

---

**L53 Film 379 Expressionism in Theater and Film**

This course is designed as an advanced introduction to the aesthetic movement of Expressionism as it appeared in Germany and the United States in the media of theater and film. Characterized by stylized settings that "ex-press" the internal spiritual/emotional/psychological state of its central character, Expressionism is usually discussed as a reaction to Realism, given its overt symbolism, telegraphic diction, and episodic action. Beginning with a brief general introduction to the movement (including its manifestation in the visual arts), we will consider its cultural, political, and critical history, while exploring more recent scholarly investigations into the significance of its performance dimensions.

Same as L15 Drama 379

---

**L53 Film 3826 Contemporary Latin American Cinema: Market Economy, Social Injustice, New Technologies**

This class studies the relationship between cinema and society in Latin America between 1988 and the present. Latin American cinema in this period has gone to a period of deep crisis to the consolidation of industries and production with significant global recognition and impact. In this, cinema has strong correlations with neoliberalism, the political doctrine tied to free-market reform, democratization and privatization, among other ideas. The class will be based on the study and discussion of key films of the period to develop two themes. First, we will study the way in which cinema has become a cultural practice central to the discussion of the effects of neoliberalism in the region, as well as the opposition to neoliberalism. Topics in this regard will include: the social impact of free market reforms, growing economic and social inequality, the emergence of working class, Black and indigenous communities, the rise and fall of the New Left, the creation of new elites and other related themes. Second, we will study the way in which films are made and distributed and the changes on film production over the past decades. Topics will include the privatization of production and exhibition, the role of home video and streaming, the importance of film festivals and the move from national to translational

scenes of production. Prereq: L45 165D or L53 220 or other coursework in Latin American Studies, or Film and Media Studies, desirable but not required. Students without this background are encouraged to contact the instructor.

### **L53 Film 419 Theories of Mass Media**

This course explores theories of the mass media with an emphasis on television as well as its convergences with other media and computer technologies. It starts by examining theories that posit the media as instruments of societal maintenance or transformation and then examines the ways in which various theorists have refined or rejected elements of these theories in a quest for both specificity and complexity. In particular, the course examines media and cultural studies' attempts to synthesize critical paradigms ranging from political economy to semiotics to feminism. The course concludes with an examination of the challenges and opportunities posed to theorizations of the mass media by contemporary circumstances such as media conglomeration, niche marketing and micro-casting, and global flows of information, capital, and people. REQUIRED SCREENING: [day, time].

Credit 3 units. A&S IQ: HUM BU: BA EN: H

---

### **L53 Film 420 Film Theory**

This course is an introduction to both classical and contemporary film theory. Beginning with the earliest attempts to treat cinema as a new and unique art form, the course will initially review the various ways in which film theory attempted to define cinema in terms of its most essential properties. The course will then examine more contemporary developments within film theory, more specifically its attempt to incorporate the insights of other critical and analytical paradigms, such as semiotics, psychoanalysis, feminism, queer theory, and postmodernism. Throughout the course, we will consider questions regarding the ontology of cinema, its relation to spectators, and the various ways in which its formal properties create meaning. Readings for the course will include the major works of Sergei Eisenstein, Andre Bazin, Christian Metz, Laura Mulvey, and Fredric Jameson. Required screenings.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM EN: H

---

### **L53 Film 421 Film Historiography**

This course is a seminar on the writing of film history for advanced students. Through an engagement with the historiographical writings of scholars, such as Dominic LaCapra, Hayden White, and Michel Foucault, students will gain an understanding of various genres of film historical writing, an appreciation for the kinds of research that film historians do, and a familiarity with the ways in which film historians delimit their field of study, form research questions, and develop hypotheses. In addition to reading and classroom discussions, students will be expected to write a fairly lengthy paper (17-20 pages) that involves original historical research and the close examination of trade press, professional journals, fan magazines, and news articles. As preparatory assignments leading up to the final project, students will also prepare project descriptions, bibliographies, and outlines that will be shared and discussed in a workshop format.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### **L53 Film 422 Film Stardom, Performance, and Fan Culture**

This course focuses the Hollywood star system. We will explore stars in relation to celebrity and consumerism, especially how "stardom" is created by a system that seeks to create effects in film viewers whether conceived as audiences, fans, or spectators. We will examine the performance element of stardom and its relationship to genre, style, and changing film technology. Also of concern will be how stars and the discursive construction of stardom intersect with gender representation, race, ideology, sexuality, age, disability, nationality, and other points of theoretical interest to and historical inquiry in contemporary film studies. While emphasis will be placed on mainstream commercial U.S. cinema, students are encouraged to pursue questions beyond this framework within their own research. REQUIRED SCREENING: [day, time].

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

---

### **L53 Film 423 Histories of Media Convergence**

Entertainment and communications forms combine and blend, and they have done so across millennia. However, the phenomenon of media convergence has taken on a special salience over the last one-and-a-half-centuries, as exemplified by the growing intermixture of film, radio, television, gaming, and the internet. In particular, critics, consumers, politicians, and producers used convergence as structuring principle in understanding, regulating, and planning for the future of media culture. This course engages with contemporary worries and enthusiasms about convergence by considering the specific conditions in which the phenomenon has been understood and practiced. Tracing a historical arc through the Twentieth Century, we will first examine convergences of radio and film, film and music publishing, television and film exhibition, and disparate corporate entities as basis for understanding more recent media combinations. Building on that foundation, the majority of the course will consist of case studies of media convergence since 1980, considering it in terms of industry, technology, regulation, and audiences. These case studies will also provide students with a survey of and inquiry into questions of historiographic theory and method. Note: This course satisfies the history & historiography requirement for the FMS Graduate Certificate. Required Screenings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### **L53 Film 424 Broadcasting Equality: Radio, Television, and Social Change in Postwar America**

The period between World War II and the 1970s was one of profound cultural, political, and demographic shifts that brought the problems of ethno-religious and racial prejudice to the forefront of U.S. national consciousness. Religious leaders, secular social activists, media industry professionals, and African American civil rights leaders often worked together to combat intolerance, bigotry, and inequality. What did these activists achieve in their attempts to deploy U.S. broadcast media in what they sometimes referred to as "propaganda against prejudice"? How did this activism relate to the institutions of broadcast media, including governmental agencies, national networks and local broadcasters? What was television and radio's impact on the Civil Rights Movement of the 1950s and 1960s? In addressing these questions, we will consider a wide range of media: public service programming as well as commercially produced series, specials, network news and documentaries produced between the 1940s and the 1970s. Programs considered will include *A New World 'A Coming*, *Amos 'n Andy*, *American Bandstand*, *NBC White Papers: Sit In*, *Sanford and Son*, *Eyes on the Prize*, and *Soul Train*, among many others. Required screenings.

Credit 3 units. A&S IQ: HUM, SC, SD EN: H

---

**L53 Film 425 Seminar in Video Games: Video Games, Gender and Sexuality**

This seminar considers different topics that illuminate the relationship of video games to culture. Topics vary by semester. The course may have a variety of analytical frames: gender and sexuality, interactivity and reception, narrative and aesthetic theory, industrial or technological history. Prerequisite is graduate status or completion of a 300-level FMS or WGSS course and permission of the instructor. Credit 3 units. REQUIRED LAB/SCREENING TIME weekly.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

**L53 Film 429 Mass Culture and Modern Media: Fantasylands: Cinema, Spectatorship, and the Spatial Imagination**

This course provides an introduction to cultural theories that are pertinent to the study of cinema, mass culture, and modernity. Rotating topics will highlight different aspects of cinema's relationship to popular culture, urbanism, modern technology, capitalism, and mass media. Students will encounter key theorists for understanding modern life and subjectivity, such as Marx, Freud, Foucault, Benjamin, and Raymond Williams. In addition, the course introduces core readings in the history and cultural theory of early cinema, which may include work by Miriam Hansen, Anne Friedberg, Tom Gunning, Charles Musser, Giuliana Bruno, Jacqueline Stewart, and others. Topics may include cinema and modernity, cinema and mass culture, cinema and leisure, cinema and urbanism, and cinema and consumer culture.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

---

**L53 Film 430 Clown Princes**

"Dying is easy, comedy is hard," runs an old theatrical adage. Nevertheless, some of the most popular actors in American film have chosen the hard path by typecasting themselves in comedy, playing repeated variations on the same character. "Comedian comedy," representing films that showcase the distinctive skills of great clown-actors, is the central concern of this course. We will analyze how individual comedians rework performance traditions through the distinctive concerns of their time and culture to create idiosyncratic comic personae. We will look at films starring Charles Chaplin, Buster Keaton, Harold Lloyd, Laurel and Hardy, the Marx Brothers, Jack Benny, Peter Sellers, Jim Carey and Eddie Murphy. Work for the course will require reading in comic theory and analytical essays. Required screenings.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

**L53 Film 431 Renegades and Radicals: The Japanese New Wave**

In 1960, the major studio Shochiku promoted a new crop of directors as the "Japanese New Wave" in response to declining theater attendance, a booming youth culture, and the international success of the French Nouvelle Vague. This course provides an introduction to those iconoclastic filmmakers, who went on to break with major studios and revolutionize oppositional filmmaking in Japan. We will analyze the challenging politics and aesthetics of these confrontational films for what they tell us about Japan's modern history and cinema. The films provoke as well as entertain, providing trenchant (sometimes absurd) commentaries on postwar Japanese society and its transformations. Themes include: the legacy of WWII and Japanese imperialism; the student movement; juvenile delinquency; sexual liberation; and Tokyo

subcultures. Directors include: Oshima Nagisa, Shinoda Masahiro, Terayama Shuji, Masumura Yasuzo, Suzuki Seijun, Matsumoto Toshio, and others. No knowledge of Japanese necessary. Credit 3 units.  
Mandatory weekly screening:  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

---

**L53 Film 432 Global Art Cinema**

How do art films tell stories? The dominant storytelling genre of the contemporary festival circuit, the art film has since World War Two combined "realist" and "modernist" impulses. Influenced by Italian neorealism, art films grant priority to characters from working class, sexual, and other exploited and imperiled minorities. Drawing on the fine arts, literature and music, art films also experiment with modernist themes and formal principles, such as subjectivity, duration, serial structure, denotative ambiguity and reflexivity. This course explores art cinema from a variety of national contexts, analyzing storytelling techniques and themes that challenge the "economical" and diverting forms associated with mainstream commercial filmmaking. Required Screenings.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

**L53 Film 443 Memory, Tears, and Longing: East Asian Melodrama Film**

Excessive emotion, unreasonable sacrifice, hidden truth, untimely knowledge, and forbidden desire—the power of melodrama and its moving representations have fueled the popularity of hundreds, if not thousands, of books, plays, and films. Melodrama has variously been defined as a genre, a logic, an affect, and a mode, applied to diverse media, divergent cultural traditions, and different historical contexts. The course provides a survey of East Asian melodrama films—as well as films that challenge conventional definitions of melodrama—by pairing Japanese, Korean, and Chinese-language productions with key critical texts in melodrama studies. We will see classics such as Tokyo Story, Two Stage Sisters, and The Housemaid. We will examine melodrama's complex ties to modernity, tradition, and cultural transformation in East Asia; special emphasis will be placed on representations of the family, historical change, gender, and sexuality. In addition to historical background and film studies concepts, we will also consider a range of approaches for thinking about the aesthetics and politics of emotion. No prerequisites. No prior knowledge of East Asian culture or language necessary. Mandatory weekly scheduled screening.  
Credit 3 units. A&S IQ: HUM, LCD EN: H

---

**L53 Film 444 Topics in Chinese Language Cinema**

Variable topics associated with the shaping of Chinese-language cinema, whether originating from the PRC, Hong-Kong, or Taiwan. This course may take up themes, directors, film genres, special subjects (such as independent film), formal elements (such as cinematography or sound), or issues (the relationship of film to literature, specific cultural movements or political events). Required Screenings.  
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

**L53 Film 445 Horror in Japanese Media**

Elements of the macabre and horrific have been present in Japanese culture and media since time immemorial. The 11th-century work *The Tale of Genji*, for example, features an elite lady's "living ghost" killing off her main rivals for the prince's affections. Tales of ghosts, demons, and the supernatural entities known as *yokai* continued to appear in collections of Buddhist didactic and folktale literature of the following centuries, finding renewed popularity in the 17th-19th centuries in the form of *kaidan* or "strange tales" which were enjoyed as printed works, parlor games, and stage plays. Some of the very first films made at the turn of the 20th century in Japan were about the popular ghosts of yore. Building on this long legacy of fearsome creatures in popular media of times now past, this course will consider selections of Japanese horror media (film, literature, anime, manga, and video

games) from the mid-20th to early 21st centuries, highlighting the intertextuality that different media within the horror genre has and how the horror genre itself even bleeds into other genres. Analyzing major figures and themes in each work, this course will explore how Japanese horror -the strange realm home to ghosts with a grudge, misunderstood monsters, and merciless murderers-can function not only as thrilling entertainment but can also reflect Japanese societal and cultural anxieties present in the real world, ranging from the problems that technology may create in a changing world to the threats posed by shifts in traditional family dynamics. Although this course will focus on horror media in the Japanese context, understanding how horror can function to highlight such anxieties will prepare students to consider the deeper possibilities of horror media in their own respective cultural contexts. All readings will be in English, and visual media will be in Japanese with English subtitles. Required Screenings

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

### L53 Film 446 The Israeli-Palestinian Conflict Through Cinema

The Israeli-Palestinian "conflict" is often considered the longest-running national conflict in the world. The "dispute," which started in the early 20th century, attracts much attention more than a hundred year later, stirring intense passions and generating controversial headlines. This course explores the Israeli-Palestinian conflict through Palestinian and Israeli cinema. We examine the ways in which cinema depicts the conflict in the Middle East, starting from the British Mandate to the present day. Adopting a relational history reading, the course examines the "treatment," the influences, and the representation of major historical and political events in the region - Israeli independence/Palestinian Nakba (1948), the Six-Day War/Arab Naksa (1967), the Yom Kippur war (1973), the Lebanon War I (1982), the Palestinian uprising Intifada I (1987), the Oslo accords (1993), Intifada II (2000) - in both Israeli and Palestinian films. The course examines the social and historical processes which shape Palestinian and Israeli cinematic narratives, self-representation, the representation of the Other, the relationship to the land, diaspora, national narratives, collective memory, and trauma. This course offers a dialectical cinematic and historic journey from national films to transnational modernist and experimental films, from the collective to the individual, and from hope to despair. Required Screenings:

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

---

### L53 Film 450 American Film Genres

By close examination of three or four specific types of film narratives, this course will explore how genre has functioned in the Hollywood mode of production. Students will gain an understanding of genre both as a critical construct as well as a form created by practical economic concerns, a means of creating extratextual communication between film artist/producers and audience/consumers. Genres for study will be chosen from the western, the gangster film, the horror movie, the musical, screwball comedy, science fiction, the family melodrama, the woman's film, and others. In addition to film showings, there will be readings in genre theory as well as genre analyses of individual films. Required screenings

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

---

### L53 Film 451 American Television Genres

Questions of genre are central to any exploration of television's texts, whether they are being analyzed as craft, commerce, or cultural phenomenon. Genre has been used by critics and historians to ascribe "social functions" to groups of programs and to diagnose cultural preoccupations, while genre has been used industrially to manage expectations among audiences, advertisers, programmers, producers, and creative professionals. Investigating genres ranging from the soap opera to the western, workplace situation comedies to sports, and game shows to cop shows, this course will explore the role of genre in the production, distribution, and reception of American television. Students will gain a critical understanding of genre theory and key

arguments about the form and function of television texts and will develop a set of tools for analysis of televisual narrative and style, the social uses and meanings of genre, the institutional practices and presumptions of the American television industry, and the persistence of textual forms and audience formations in the face of structural changes such as deregulation, media convergence, and globalization. Required Screenings.

Credit 3 units. A&S IQ: HUM BU: BA EN: H

---

### L53 Film 452 Advanced Screenwriting

This course is intended for students who have already taken Film Studies 352, "Introduction to Screenwriting." Building on past writing experiences, students will explore the demands of writing feature-length screenplays, adaptations, and experimental forms. Particular attention will be paid to the task of rewriting.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

---

### L53 Film 453 Experimental Design for Immersive Media

The term "metaverse" (originally coined by novelist Neal Stephenson) has recently come into vogue to describe a loose constellation of emerging technologies related to immersive media-particularly virtual, augmented, and mixed reality. In this course, we will explore new forms of creative practice enabled by this ecosystem. Students will analyze a variety of immersive experiences, ranging from 360 films and animations to interactive room scale experiences to multisensory installations, to understand the creative opportunities and challenges offered by these media. Students will then develop their own creative proposals and prototype an XR experience using a combination of 360 camera systems, digital production software, head-mounted displays, and physical and spatial computing elements.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC EN: H

---

### L53 Film 454 American Film Melodrama and the Gothic

American film melodrama has been considered both the genre of suffering protagonists, incredible coincidences, and weeping spectators as well as a mode of action, suspense, and in-the-nick-of-time rescues. In this course, we will examine American film melodrama as a dialectic of sentiment and sensation which draws heavily on Gothic tropes of terror, live burial, and haunted internal states. We will trace the origins of film melodrama and the cinematic Gothic to their literary antecedents, the horrors of the French Revolution, and classical and sensational stage melodramas of the nineteenth century. In addition to the 1940s Gothic woman's film cycle, we will excavate the Gothic in the maternal melodrama, the suspense thriller, film noir, domestic melodrama, the slasher film, and the supernatural horror film. Required screenings.

Credit 3 units. A&S IQ: HUM EN: H

---

### L53 Film 457 From Vitaphone to YouTube: Popular Music and the Moving Image

This course considers American popular music as represented in audiovisual media from 1926 to the present. The relationship between the popular music industry (a commercial sphere oriented primarily towards the selling of sheet music and audio recordings) and audiovisual technologies (various screens and formats encountered in changing social and commercial contexts) will be explored along two complementary tracks: popular music performers as presented in performance-centered media and popular music as a narrative topic or resource in feature films. Three related analytical frames will shape our discussions: industrial and technological history (the material conditions for the making and distribution of popular music and moving images) the question of "liveness" in recorded audiovisual media aesthetics of various popular music styles as translated into audiovisual forms and contexts The course is in seminar format. The

ability to read music is not required but students with music reading or transcription skills will be encouraged to draw upon these tools. Prerequisites: graduate status or completion of a 300-level FMS or Music course and permission of the instructor  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 458 Major Film Directors

What does the film director do? In the earliest movies, film directors modeled themselves on their theatrical counterparts: they chiefly focused on how to stage an action in a confined space for a stationary camera that represented an ideal member of the audience. As the camera began to be used to direct audience attention, first through cutting, then through actual movement, the film director evolved from a stager of events to a narrator. By analyzing the work of one or more major film directors, this course will explore the art of film direction. We will learn how film directors may use the camera to narrate a scene, to provide their own distinctive view of the actions playing out on the movie screen. May be repeated for credit with permission of the instructor. REQUIRED SCREENING: [day, time].  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 460 Taboo: Contesting Race, Sexuality and Violence in American Cinema

Pushing the envelope or going too far? What is the boundary between films that challenge us and films that offend us? This is a course about films that crossed that boundary, most often by presenting images of race, sexuality and violence, images that could attract audiences as much as they offended moral guardians and courted legal sanctions. Because they were denied the First Amendment protection of free speech by a 1915 Supreme Court decision, movies more than any prior art form were repeatedly subject to various attempts at regulating content by government at federal, state, and even municipal levels. Trying to stave off government control, Hollywood instituted forms of self-regulation, first in a rigid regime of censorship and subsequently in the Ratings system still in use. Because taboo content often means commercial success, Hollywood could nonetheless produce films that pushed the envelope and occasionally crossed over into more transgressive territory. While control of content is a top-down attempt to impose moral norms and standards of behavior on a diverse audience, it also reflects changing standards of acceptable public discourse. That topics once barred from dramatic representation by the Production Code - miscegenation, homosexuality and "lower forms of sexuality," abortion, drug addiction - could eventually find a place in American movies speaks to changes in the culture at large. In trying to understand these cultural changes, this course will explore films that challenged taboos, defied censorship, and caused outrage, ranging from films in the early 20th Century that brought on the first attempts to control film content through to films released under the Ratings system, which has exerted subtler forms of control. REQUIRED SCREENING:  
Credit 3 units. A&S IQ: HUM, SC, SD Art: CPSC EN: H

---

### L53 Film 465 Theory and Practice of Experimental Film

Filmmaker Stan Brakhage famously wrote the following: "Imagine an eye unruly by man-made laws of perspective, an eye unprejudiced by compositional logic, an eye which does not respond to the name of everything but which must know each object encountered in life through an adventure of perception." In this course, we will embark upon our own adventures of perception, examining and producing works of art that challenge our preconceptions of what cinema is or can be. From city symphonies to pop collages, portraiture to handcrafted animation, and ethnography to gender studies, we will explore the multifaceted and transformative avant-garde cinema through the work of its greatest practitioners, contextualize films in relation to aesthetic aspirations (e.g., formalism, opposition, reflexivity, transcendence) and movements in art and cultural theory (e.g., Dadaism, Abstract Expressionism, Pop, Performance Art, Minimalism), and acquire

the digital production skills needed to make our own experimental videos. Each week, we will mix the classic with the contemporary to demonstrate the ongoing vitality of -- and make our own contributions to -- this often misunderstood cinematic tradition. Required screenings.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 475 Screening the Holocaust

This course surveys the history of Holocaust representation on film, examining a wide range of documentary and fictional works from 1945 to the present day. Discussions will consider a number of key questions, including: What challenges does the Holocaust pose to cinematic representation, and how have filmmakers grappled with them? How have directors worked within and against notions of the Holocaust as unrepresentable, and how have they confronted the challenge of its association with a limited set of highly iconic images? What are the more general ethical and political dimensions of representing the Holocaust onscreen -- its victims as well as its perpetrators, the systematic genocidal violence that characterized it, and the sheer absence of so many dead? We will also probe the changing significance of cinematic representation of the Holocaust, exploring the medium's increasingly memorial function for audiences ever further removed from the historical moment of its occurrence. Screenings may include *The Last Stage*; *Distant Journey*; *Night and Fog*; *Judgment at Nuremberg*; *Shoah*; *Europa, Europa*; *Schindler's List*; *Train of Life*; *The Specialist*; *Photographer*; *A Film Unfinished*. Critical readings by figures such as Giorgio Agamben, Jean Amery, Shoshana Felman, Geoffrey Hartman, Marianne Hirsch, Sidra Israhi, Dominick LaCapra, Alison Landsberg, Berel Lang, Michael Rothberg, and James Young. Required screenings  
Credit 3 units. A&S IQ: HUM, LCD EN: H

### L53 Film 478 Topics in Transmedia Franchises

This variable topics course for advanced undergraduate and graduate students is an interdisciplinary seminar on transmedia franchises. In particular, it is recommended for those seeking to understand transmedia storytelling as an artistic, industrial, and cultural practice. As such, this course will bring into conversation various methodologies and perspectives, including film and media scholarship as well as other fields of study in the humanities and social sciences. The goal of this interdisciplinary approach is to illuminate how transmedia franchises have developed since the early 20th century to become the dominant product of the American -- and, increasingly, global -- cultural industries. Foci of this course may include such topics as individual franchises; global transmedia history; the franchise strategies of individual cultural industries (e.g., the Japanese media mix); or representation within franchise texts, production cultures, and fan communities. This course serves as a capstone for Film & Media Studies majors. Weekly or bi-weekly screenings or hands-on media labs are required.  
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

---

### L53 Film 479 (In)Visible Media: Connection and Crisis in Contemporary Japan

This variable topics course is an interdisciplinary seminar on film/media designed for advanced undergraduate and graduate students. In particular, it is recommended for those seeking to understand film/media as a lived experience that takes place within cultural frameworks. As such, this course will bring into conversation various methodologies and perspectives, including film/media scholarship, as well as ones drawn from other fields of study in the humanities, sciences, or social sciences. The goal of this interdisciplinary approach is to illuminate how film/media both elicits and represents human response. The foci of this course may include such topics as violence and film/media, the body and film/media, the cognitive impact of film/media viewing, the relationship of environment to experiencing film/media,

or the relationship of culturally specific events or trends to film/media production and reception. This course serves as a capstone for Film & Media Studies majors. Weekly or biweekly screenings or hands-on media labs required.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

### L53 Film 485 Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000

This seminar examines film and modern art within the framework of "Orientalism" Reading foundational texts by Said, and incorporating theory and historical discourse concerned with race, nationalism, and colonialism, we explore artistic practice in European photography, painting, and decorative arts from 1850 to recent times and European and Hollywood Film. We study how power and desire have been inscribed in western visual culture across the bodies of nations and peoples through conventions such as the harem, the odalisque, the desert, and the mysteries of ancient Egypt. To that end, we will look at artists such as Delacroix, Ingres, Gérôme, Beardsley, and Matisse and will screen films such as *The Sheik*, *The Mummy*, *Salome*, *Cleopatra*, *Pepe le Moko*, *Naked Lunch*, *Shanghai Gesture*, *Thief of Bagdad*, *Princess Tam Tam*, and *The Sheltering Sky*. Subjects include the representation of gender, sexuality, desire, race, and identity as well as the cultural impact of stereotype and "exotic" spectacle. Students will study methods of visual analysis in film studies and art history. All students must attend film screenings. 3 credits  
Credit 3 units. A&S IQ: HUM, LCD, SD EN: H

### L53 Film 495 Special Projects

This course is intended for juniors and seniors who wish to register for internships. Students must receive Program approval prior to beginning the internship. Please consult the Program guidelines governing internships. Credit variable, maximum 3 units.  
Credit variable, maximum 3 units.

### L53 Film 499 Study for Honors

This course is intended for majors pursuing honors in Film and Media Studies. In order to enroll for this course, students must apply in advance for honors and be approved by a faculty committee. Please consult the Program guidelines for application deadlines and other requirements.  
Credit 3 units.

## Film and Media Studies Major

### Program Requirements

- **Total units required:** 30

#### Required Courses

Code	Title	Units
Film 220	Introduction to Film Studies	3
Film 225	Making Movies	3
or Film 352	Introduction to Screenwriting	
Film 330	History of American Cinema	3

Film 340	History of World Cinema	3
Film 350	History of Electronic Media	3
Film 420	Film Theory	3
<b>Total Units</b>		<b>18</b>

### Elective Courses

In addition to these required courses, students must take 12 credits in advanced electives (300 level or higher). All students must take one 3-credit elective that focuses on a national cinema other than that of the United States. In addition, all students must take one 3-credit critical studies elective at the 400 level or above. A 400-level elective in a national cinema may satisfy both of these elective requirements, but a total of 12 units in electives is still required. Electives in critical studies may be drawn from courses on individual directors, specific genres, limited historical periods, individual crafts (e.g., acting), and so on. Students with an interest in production may count two production and/or screenwriting courses toward the major within these 12 elective units.

A total of 6 Film & Media Studies–approved units can be applied for credit toward this program from study abroad work at the 300 level or higher: 3 units can be applied to the national cinema elective, and the other 3 units would count toward the remaining 9 units of advanced electives.

The program allows Film & Media Studies–approved transfer credits from other universities for advanced electives.

### Additional Information

**Senior Honors** (Film 499) is intended for majors pursuing honors in Film and Media Studies. In order to enroll for this course, students must apply in advance for honors, possess a minimum cumulative grade point average of 3.65, and be approved by a faculty committee.

A grade of C- or higher is required for a course to count toward the major.

## Film and Media Studies Major, Film and Media Production Specialization

### Program Requirements

- **Total units required:** 36

## Required Courses

Code	Title	Units
Film 220	Introduction to Film Studies	3
Film 225	Making Movies	3
Film 330	History of American Cinema	3
Film 340	History of World Cinema	3
Film 350	History of Electronic Media	3
Film 352	Introduction to Screenwriting	3
Film 420	Film Theory	3
<b>Total Units</b>		<b>21</b>

## Elective Courses

The specialization in film and media production provides majors in Film and Media Studies with the opportunity to enhance their skills in and knowledge of various forms of moving image media creative production. The student must also complete 15 credit units of electives consisting of the following:

1. One 3-credit critical studies course in a national or regional (non-U.S.) cinema at the 300 or 400 level (required of all majors)
2. One 3-credit critical studies course at the 400 level (screenwriting or production does not count toward this requirement)
3. 9 units total credit or three 3-credit electives in digital or film production or screenwriting (3 credits may be for courses at the 200 level or above; 6 credits must be for courses at the 300 level or above)

Courses taken in overseas study are eligible to be used to satisfy the above C category for up to a total of 6 credit units with permission of the Film and Media Studies overseas advisor. Courses offered by another academic department or school at Washington University may be accepted in the above C category for up to 6 credit units with the prior permission of the student's Film and Media Studies advisor. A minimum of C- must be earned for any course to count toward the 36 credit units required for the film and media production specialization.

A total of 6 Film & Media Studies–approved units can be applied for credit toward this program from study abroad work. If the course was production-based, 3 units can be applied toward the production electives at the 200 level or higher. If the course was not production-based, 3 units can be applied to the national cinema elective, and the other 3 units would count toward the remaining 12 units of advanced electives.

The program allows Film & Media Studies–approved transfer credits from other universities for advanced electives.

## Additional Information

**Senior Honors** (Film 499) is intended for majors pursuing honors in Film and Media Studies. In order to enroll for this course, students must apply in advance for honors, possess a minimum cumulative grade point average of 3.65, and be approved by a faculty committee.

A grade of C- or higher is required for a course to count toward the major.

## Film and Media Studies Minor

### Program Requirements

- Total units required: 15

### Required Courses

Code	Title	Units
Film 220	Introduction to Film Studies	3
Film 330	History of American Cinema	3
Film 340	History of World Cinema	3
Film 350	History of Electronic Media	3
<b>Total Units</b>		<b>12</b>

### Elective Courses

In addition to the required courses, students must also take a 3-credit advanced elective course (300 level or above) to complete the minor.

A total of 3 Film & Media Studies–approved units can be applied for credit toward this program from study abroad work at the 300 level or higher, which will satisfy the advanced elective requirement.

The program allows Film & Media Studies–approved transfer credits from other universities for advanced electives.

### Additional Information

Elective courses change every academic year, so please visit the Program in Film and Media Studies website for current course listings.

A grade of C- or higher is required for a course to count toward the minor.

Internships and independent study do not count toward any Film and Media Studies minor.

# Global Film and Media Studies Minor

## Program Requirements

- **Total units required:** 15

### Required Courses

Code	Title	Units
Film 220	Introduction to Film Studies (offered every fall)	3
Film 340	History of World Cinema (offered every fall)	3
<b>Total Units</b>		<b>6</b>

### Elective Courses

- A. Two courses (3 credits each) at the 300 or 400 level dealing with national or regional cinemas, such as the following:

Code	Title	Units
Film 320	British Cinema: A History	3
Film 3211	Contemporary Chinese Popular Culture	3
Film 325	French Film Culture	3
Film 4300	Topics in Chinese Media Culture: Charting Identity in the Digital Age	3
Film 431	Renegades and Radicals: The Japanese New Wave	3
Film 443	Memory, Tears, and Longing: East Asian Melodrama Film	3
Film 479	(In)Visible Media: Connection and Crisis in Contemporary Japan	3

- B. One course (3 credits) at the 300 level or higher that analyzes film or moving image media from different countries or parts of the world. Options in this category include the following:

Code	Title	Units
Film 319	Documentary Film and Media	3
Film 342	Introduction to Video Game Studies	3
Film 368	Contemporary Women Directors	3
Film 420	Film Theory	3
Film 423	Histories of Media Convergence	3
Film 432	Global Art Cinema	3
Film 443	Memory, Tears, and Longing: East Asian Melodrama Film	3
Film 465	Theory and Practice of Experimental Film	3
Film 478	Topics in Transmedia Franchises	3
Film 507	The 007 Saga: James Bond and The Modern Media Franchise	3

**Note:** With the permission of the director of undergraduate studies, one course (3 credits) on media/film taken in another department or program at the 300 or 400 level may count toward the global media studies minor. Students should consult with their Film and Media Studies advisor or the Film and Media Studies director of undergraduate studies before enrolling in a course offered outside of the program that they hope to count toward this minor.

A total of 6 Film & Media Studies–approved units can be applied for credit toward this program from study abroad work at the 300 level or higher, which could satisfy the national cinema advanced elective requirements.

The program allows Film & Media Studies–approved transfer credits from other universities for advanced electives.

## Additional Information

Elective courses change every academic year, so please visit the Program in Film and Media Studies website for current course listings.

A grade of C- or higher is required for a course to count toward the minor.

Internships and independent study do not count toward any Film and Media Studies minor.

Email: fms@wustl.edu  
Website: <https://fms.wustl.edu/>

## Global Studies

Students in Global Studies develop a broad understanding of the world while exploring the diversity and richness of other cultures. The complex relationship between globalization and local differences is a hallmark of the contemporary era. Globalization increases the movement of people, goods, capital, technology, and ideas throughout the globe. At the same time, strong attachments to local languages, cultures, and societies remain. Global Studies students seek to understand globalization and the relationship between the global and the local.

The Global Studies major is unique, emphasizing the interdisciplinary study of the cultural, economic, ecological, historical, social, and political processes that contribute to interdependence or globalization. Global Studies courses span the humanities and social sciences, and they encourage both contemporary and historical points of view. In addition, Global Studies challenges students to master a modern language and to understand the cultural contexts in which the language is spoken. It encourages the exploration of contemporary foreign affairs through speakers, conferences, and faculty panels, and it provides an introduction to international careers. Global Studies also provides robust support for foreign study and independent research. Through this approach, students explore the effect of global and local factors

on historical events, current affairs, and public policy. They develop analytical skills, cross-cultural awareness and sensitivity, proficiency in another language, and overall abilities to be productive and ethical global citizens.

There are six concentrations available to Global Studies majors: (1) Global Studies with a concentration in development; (2) Global Studies with a concentration in Eurasian studies; (3) Global Studies with a concentration in European studies; (4) Global Studies with a concentration in global Asia; (5) Global Studies with a concentration in global cultural studies; and (6) Global Studies with a concentration in international affairs.

#### **L97 GS 1020 Introduction to Modern European History**

The history of Europe since 1500 is a remarkable array of contradictions: freedom and fascism; democracy and imperialism; industrialization and Romanticism; international capitalism and fervent nationalism; social change and scientific racism. What produced these developments in European social, economic, and political spheres and how did these different currents diverge and converge? How did European developments affect global actors and vice versa? What are the consequences for our own time of these contradictory aspects of Europe's modernization? Class assignments include textbook and primary source reading (c. 75 pages/week), discussion participation, 2 short analytical papers, 3 in-class exams, and a final cumulative take-home essay. This course satisfies the Introductory Survey requirement for the history major and minor. DISCUSSION SECTION IS REQUIRED. Same as L22 History 102D  
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM, IS EN: H

---

#### **L97 GS 111 First-Year Seminar: The Vietnam Wars**

US-centric historical treatments of the Vietnam War tend to obscure the perspectives and lived experiences of Vietnamese and Southeast Asians. Equally problematic they tend to foster a historical interpretation that ignores the diversity of anti-colonial and anti-imperialist struggles and glosses over the wider regional dimensions of the war(s). To address these weaknesses, this course adopts a Vietnamese and Southeast Asian Studies approach. It highlights the belief systems, values, agency, and experiences of northern and southern Vietnamese, rural and urban Cambodians and Laotians, and Thais. It analyzes anti-colonial regional networks, the rise of

Indochinese nationalist and communist movements, wars for national liberation, processes of decolonization, the rise and fall of the Khmer Rouge, and memories and meanings of the Vietnam Wars for Southeast Asians. Course is for first-year, non-transfer students only.  
Credit 3 units. A&S: FYS A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA, IS EN: S

---

**L97 GS 1133 Ampersand: Legacies of the Silk Road**

Stretching from China to Europe, the Silk Road looms large in contemporary imagination, as visions of caravans, monks, and scholars still animate the deeper reaches of our minds. But what was the Silk Road, and how did it turn from a "road" that connected diverse cultures and civilizations to one that is dominated by geopolitical and national interests? This course investigates the foundations of political and religious identities across Central Eurasia from the Taliban's rise in Afghanistan to the internment camps in Xinjiang, to self-immolation protests in Tibet. Through a diverse array of religious texts, literary works, museum pieces, and state documents, this course invites students to examine the historical roots of present-day conflicts by rethinking the Silk Road. Throughout the course, we will explore how environmental conditions have shaped the rise and fall of civilizations, how technologies, people, and diseases have traveled across Eurasia, and how imperialism, capitalism, and globalization fundamentally transformed the historical landscape of the region. Ultimately, we will discuss whether the "Silk Road" may still offer us a critical framework to understand global connectivity in our current day when borders are becoming more rigid than ever. This course is restricted to first-year students in the Global Citizenship Program.

---

**L97 GS 116 Ampersand: Geographies of Globalization and Development**

This course provides an overview to the geographies of globalization and development in the world today. We begin by engaging with a variety of theoretical perspectives, definitions, and debates in order to establish the foundations upon which students can conceptualize and understand existing patterns of inequality, social injustice and environmental conflicts. In order to further highlight the different ways in which development and globalization interventions are experienced and contested, in the second half of the course we will focus our considerations towards specific contemporary issues at the forefront of globalization and development debates, including migration and refugees, urbanization, sustainable development, tourism, and alter-globalization social movements. This course is restricted to first-year students in the Global Citizenship Program.

---

**L97 GS 117 FYS: Global Population on the Move: Language & Resettlement with Law, Healthcare & Education**

Today, the number of displaced people is as its highest: one out of every 113 people on Earth. In this course, we begin with an understanding of what it means to be a refugee, and we discuss readings that lead us to an understanding of the modern refugee as we contextualize the significance of such terms as 'refugee,' 'asylum,' 'sanctuary,' 'non-refoulement,' or 'forced displacement.' With this foundation, we move to the role that language plays with resettlement into society and examine factors in the legal, healthcare and educational systems. We examine global work done through the United Nations Educational, Scientific and Cultural Organization and more, and we concentrate on the current state of refugees and New Americans in St. Louis and the USA. The course fosters critical thinking

across academic disciplines, encourages practical implications of research on resettlement and language policy, and includes invited guest lectures by local practitioners and other Washington University scholars. This course is for first-year, non-transfer students only.

---

**L97 GS 124 First-Year Sem: Bridging London: An Interdisciplinary Exploration of One of the World's Great Cities**

This course provides a multi-disciplinary perspective on the past, present, and future of London. Topics include the historic roots of the city, the development of the British urban system, transportation and the shaping of the city; social, political, and economic dynamics of the Greater London Area; urban growth, decline, and revitalization; suburbanization; and the challenges facing the city in the 21st Century.  
Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S

---

**L97 GS 127 Migration in the Global World: Stories**

The expression "Stories of Migration" has a variety of meanings. A "story" is a narrative that has a beginning, middle, and an end; an account of imaginary or real people and events told for entertainment, a report of an item of news in a newspaper, magazine, or broadcast; or an account of past events in someone's life or in the development of something. A story also can be a way to make sense of the world, and, as we will discuss throughout the semester, a tool to change the world. This course is based on the premise that in order to shape the future of migration in the global context, it is imperative to understand how stories of migration emerge, are told, passed on, shared, translated, disseminated, collected, challenged, and retold. For these purposes we will examine a wide range of stories of migration from the past decade. We will experiment with both low-tech and high-tech media in order to come up with different ways to showcase stories of migration, and to assess the actual repercussions that these stories of migration have. While we will address migration in the global context, we will focus on three regions: the US Mexican border, the Mediterranean, and St. Louis. We will study immigrant communities in these different locations and analyze a variety of narrative forms and structures in order to discern the impact that stories of migration have both locally and globally. Course materials include novels, memoirs, journalism, essays, short stories, graphic novels, radio programs, film, and performance pieces.  
Credit 3 units. A&S IQ: HUM EN: H

---

**L97 GS 135 First-Year Seminar: Chinatown: Migration, Identity, and Space**

"Chinatown," as a cultural symbol and a spatial entity, links various topics and studies in this course. Our survey starts with a historical and geographical glimpse of Chinatowns and ethnoburbs in the U.S. through real-life stories of their residents. We then expand our horizon to global Chinatowns with selected case studies of Chinatowns in Japan, Southeast Asia, Europe, and Australia. Our historical and ethnographic inquiries also investigate the ways in which Chinese food has been adapted to each local culture and society. Through the lens of Chinatown, this seminar looks into migration and settlement while tackling questions about representations of identity and culture as well as spatial constructions by immigrant communities. In doing so, we reconsider popular narratives about Chinatowns or ethnic enclaves in general. The assignments include ethnographic surveys of Chinese businesses.  
Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

---

### L97 GS 140 East Asia in the World

This course covers the geopolitical history of twentieth-century East Asia, from its colonial constellation through its transformation into cold war nation-states. We then use an interdisciplinary approach to investigate contemporary problems accompanying the emergence of regional economies and institutions. We grapple with the question of when people in East Asia -- China, Taiwan, the Koreas, and Japan -- act as members of a transnational region and when they act in ideological, national, or local terms. We evaluate different disciplinary approaches in order to understand the combination of knowledge and skills necessary for drawing meaningful research conclusions. In reading articles produced by a range of scholars and institutions, the course is also an introduction to the politics of the production of knowledge about East Asia. We then apply our knowledge to a real-world conflict and give team presentations on our proposed solutions. This course is restricted to first-year students in the Global Citizenship Program.

Credit 3 units. A&S: FYS A&S IQ: HUM EN: H

---

### L97 GS 144 FYS: Collecting Art/Excluding People: The

#### Contradictions of Chinese Art in U.S. Museums

Tomb raiders, curators, archaeologists, politicians, dealers, and collectors all contributed to the arrival of Chinese art in the United States since the late nineteenth century. But at the same time as Chinese objects arrived in great quantities, Chinese people were actively excluded from the U.S. In this course we consider the contradiction between U.S. enthusiasm for collecting Chinese art and negative U.S. responses to Chinese immigrants, from the 1882 Chinese Exclusion Act to contemporary anti-Asian racism. Through the lens of museums, private collections, and public exhibitions, we study what the movement of Chinese art into the United States says about changes in U.S.-China relations from the nineteenth century through today. No prerequisite: enrollment limited to first-year students.

---

### L97 GS 1500 Silver, Slaves, and the State: Globalization in the 18th Century

In this course, students will look at how silver, and also porcelain, tobacco and salt, shaped the early modern world. The course will look at how merchants and adventurers, as well as pilgrims, pirates, migrants, and captives, encountered very different facets of that world, and tried to make sense of it. Students will also study how these attempts at exchange, how that process of "making sense," transformed how men and women of the 18th century, around the globe, saw their territories and their fellow humans. This is a world history class.

Same as L22 History 1500

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

---

### L97 GS 1503 Workshop for the Global Citizenship Program

This yearlong workshop, which is restricted to and required of participants in the Global Citizenship Program (GCP), is a companion to the core GCP fall course. The first semester of the workshop asks students to reflect critically on their own relationship to the concept of Global Citizenship. Through popular education and creative-based methods, students will explore their situated knowledges, worldviews, positionalities, and biases. The course engages with social, environmental, and epistemic justice themes through a decolonizing lens to question and reimagine how to embody critical global citizenship. By the end of the workshop, students will have tools to support their analysis and intentional engagement with the global-local community.

Same as L61 FYP 1503

Credit 1 unit. A&S: AMP

---

### L97 GS 1504 Workshop for the Global Citizenship Program

This workshop, which is restricted to and required of participants in the Global Citizenship Program, is a continuation of the Fall L61 FYP 1503 workshop. The spring Global Citizenship Workshop is praxis-oriented and asks students to apply and further reflect on the concepts learned during the Fall. Students are required to volunteer in the community for at least 10 hours per month. Each workshop session will provide a space for collective sharing about our experiences in the community and offer tools for meaningful engagement, social change, community building, and collective care. Towards end of this journey, students will have gained important frameworks to understand the global and its relationship to our local realities, meaningful life experiences collaborating across differences, and powerful tools for future community engagement. An optional trip at the end of the semester, after exams, will provide further opportunities for hands-on learning and interaction with organizations and people involved in the themes of the course.

Credit 1 unit. A&S: AMP

---

### L97 GS 155 First-Year Seminar: Mapping the World: Introduction to Human Geography

What is human geography and why is it important? This course addresses these questions by introducing students to the fundamentals of the discipline of human geography. A geographic perspective emphasizes the spatial aspects of a variety of human and natural phenomena. This course first provides a broad understanding of the major concepts of human geography, including place, space, scale and landscape. It then utilizes these concepts to explore the distribution, diffusion and interaction of social and cultural processes across local, regional, national and global scales. Topics include language, religion, migration, population, natural resources, economic development, agriculture, and urbanization. In addition to providing a general understanding of geographic concepts, this course seeks to engender a greater appreciation of the importance of geographic perspectives in an increasingly interconnected and globalized world. No prerequisites. NOT AVAILABLE TO STUDENTS WHO ARE ENROLLED IN OR WHO HAVE TAKEN L61 116. Course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: IS, SCI EN: S

### L97 GS 160 World Politics and the Global Economy

Globalization, the accelerating rate of interaction between people of different countries, creates a qualitative shift in the relationship between nations, communities and economies. Conflict and war is one form of international interaction. Movement of capital, goods, services, production, information, disease, environmental degradation, and people across national boundaries are other forms of international interactions. This course introduces major approaches, questions, and controversies in the study of global political-economic relations. In a small group seminar we will examine the building blocks of world politics, the sources of international conflict and cooperation, and the globalization of material and social relations. This course is restricted to first-year students in the Global Citizenship Program.

### L97 GS 164 Introduction to World History: The Second World War in World History

This course introduction to World History uses World War II as a lens to examine the methodologies, approaches and sources historians employ to understand and analyze historical periods. The class will explore the global connections and interactions which characterize World History. The emphasis of this course will be on digging into topics traditionally neglected: the impact of the war on race, gender, family and children; daily life; and daily ethical decision making. ### **L97 GS 1640 Health and Disease in World History**

Health and disease are universal human experiences, yet vary profoundly across time and place. Extending from ancient times to the present, this course surveys that variety from a global perspective. We will explore medical traditions from around the world, then examine how these responded to major epidemic diseases such as the Black Death. We will study the globalization of disease and the emergence of scientific medicine after 1450, then turn to the interrelated histories of health and disease in the modern era. Throughout, we will attend carefully to how the biological aspects of health and disease have shaped world history, while at the same time exploring the powerful mediating role of social, cultural, economic, and political factors--from religious beliefs and dietary practices to inequality, poverty, empire, and war--in determining the myriad ways in which health and disease have been experienced and understood. Introductory course to the major and minor.

### **L97 GS 165D Latin America: Nation, Ethnicity and Social Conflict**

This class is an interdisciplinary introduction to the academic study of modern and contemporary Latin America. The course focuses on main issues in Latin American politics, history and culture, both in the continent at large and in the specific regions and sub-regions within it. The class will particularly explore topics such as nation creation, national identity, modes of citizenry, the role of race, ethnicity, gender and class in the region's historical development, as well as social and political conflicts, which have defined the region over the centuries. This course is suggested before taking any other upper-level courses on Latin America or going abroad to other countries, and required for all Latin American Studies majors and minors. Through the course, students gain basic bibliographic knowledge and experience with research tools for a comparative study of Latin American politics society and culture. Prereq. None.

### **L97 GS 174 Medicine East and West: Comparing Healthcare in the US and China**

This course provides a foundational introduction to comparative health studies by examining the health care systems of the United States and China. Using the tools and interpretive frameworks of the field of medical anthropology, students in this course will be exposed to a broad range of topics dealing with health and healthcare in Eastern and Western contexts. These include the study of medical pluralism, meaning of illness, health care financing, preventive care, political-economic perspectives, and sociobehavioral perspectives on health and wellness. Students taking this class will be better prepared to understand and address on-going health care concerns affecting U.S. and Chinese society.

### **L97 GS 207 Crossing Borders: An Introduction to Institutions and Concepts in Global Studies**

This course provides an overview of the emergence of international governing institutions, the ideologies that shaped them, and concepts helpful for understanding them. Identifying the systems that have emerged to govern modern human societies at the national and international levels provides the means to consider how human beings are categorized within those systems, as citizens, subjects, asylum seekers, refugees, and the stateless. We engage a few classic works --

including "The Communist Manifesto," "Imagined Communities," and "Orientalism" -- and consider how they have transformed knowledge. The goal is for students to gain an empirical grasp of world institutions and a critical vocabulary that will provide the means for an informed engagement with international issues across different world regions and academic approaches.

### **L97 GS 208 Introduction to Jewish Civilization: History and Identity**

The anthropologist Clifford Geertz once famously invoked Max Weber in writing that "man is an animal suspended in webs of significance he himself has spun. I take culture to be those webs." The main goal of this course--designed as an introduction to Jewish history, culture, and society--will be to investigate the "webs of significance" produced by Jewish societies and individuals, in a select number of historical periods, both as responses to historical circumstances and as expressions of Jewish identity. Over the course of the semester we will focus on the following historical settings: 7th century BCE Judah and the Babylonian exile; pre-Islamic Palestine and Babylonia (the period of the Mishnah and the Talmud); Europe in the period of the Crusades; Islamic and Christian Spain; Europe in the 18th and 19th centuries; North America in the 20th century; and the modern State of Israel. For each period we will investigate the social and political conditions of Jewish life; identify the major texts that Jews possessed, studied, and produced; determine the non-Jewish influences on their attitudes and aspirations; and explore the efforts that Jews made to define what it meant to be part of a Jewish collective.

### **L97 GS 223 Korean Civilization**

This course introduces Korean civilization from earliest times to the present. While a broad survey, the course emphasizes cultural themes and social institutions, and explores the Korean past in East Asian and global perspectives. To help with building this comprehensive view, the class follows a chronological progression of history using a textbook. But throughout, students also learn from diverse media--including film, drama, music, games, and primary historical sources--to make their own sense of Korea and Korean culture. In terms of methodology, the class adopts various approaches, from source criticism and material

studies to critically engaging modern-day representations of Korea in print and new media. Some of the topics covered include: foundation myths, ancient literature, colonialism, civil war, authoritarianism, rapid industrialization, and democratization in Korea.

### **L97 GS 2242 Ampersand: Comparative Refugee Resettlement and Integration**

This Course will continue our investigation of the Dynamics of Migration in the MENA and African countries primarily and re-orient the discussions towards a/the much-overlooked cause of migration: Colonialism. To achieve genuine refugee/ Migrant oriented reform policies, the Global North needs to reconcile with its colonial past. Towards this end, we will highlight how the history of Migration is deeply entangled with colonialism. Our readings-based discussions will focus on analyzing how colonial logics continue to shape the dynamics of migration as well as fuel the growing Xenophobia and Anti-migration rhetoric in the Global North towards intercontinental human mobility. To understand the enduring legacies of colonialism on the contemporary politics of migration, our discussions will argue the premise that colonial histories should be central to migration studies today for there to be real reform in refugee, asylum, and migrant policies. We will explore a wide range of inspiring and challenging perspectives on migration and learn what postcolonial and decolonial scholarships can offer us studying international migration today. We will address these areas through our weekly readings of Migration Studies and Colonialism as a primary source; we will also survey a selection of articles as a secondary source. To supplement the readings, we will watch short documentaries addressing the topic as well as hear from activists, journalists, and specialists in the field. Course is for first-year, non-transfer students only.

### **L97 GS 226C Japanese Civilization**

This course will present a comprehensive overview of Japan, its history, its institutions and cultural products, and its society and people. The first half of the course will comprise a survey of Japanese history, with an emphasis on its social and cultural aspects, from the earliest period to the present day. Having established the historical framework with its interweave of native and foreign elements, Kyoto-based imperial aristocracy, the samurai class and their crucial role, Zen-inspired meditative arts, and exquisitely diverse cultural products—the class will move on, in the second half, to an examination of recent and contemporary trends and issues. These will center on Japanese education, social and family structures, urban centers and the rural periphery, economic and socio-political trends, Japan's distinctive and vibrant popular culture, contemporary problems and challenges, and the nation's dramatically shifting position in East Asia and in the 21st-century global order.

### **L97 GS 229 Modern European History: Migrations, Nation States, Identities**

Politicians in several European countries recently declared the failure of multiculturalism, emphasizing immigration as the cause of social and political conflict. These statements deny that the European continent as a whole has been shaped by various forms of migration, ranging from Teutonic and Slavic settlement migration in the first ten centuries A.D., and rural-to-urban migration and religious expulsions in the Middle Ages, to recent guest worker programs and immigration from former colonies. Encounters between different cultures, religions, and forms of social organization are a staple of European societies' development. The course will begin with a brief overview of significant population movements since the Early Modern Era and then focus on important mass movements since the French Revolution. Course units study the nexus between migration and modernization, people's movement and the nation-state, empire and citizenship, and economic and social development. The class also poses the questions: Why are some migrations remembered and others not? Why do we know what we know about migration and migrant experiences? How do notions of 'otherness' and 'diversity' come to be central points of contention within current discourses in Europe? How do race, class, and gender interact in shaping the experience and perception of immigrants? Primary sources, autobiographical narratives, scholarly analyses and a range of visual material including films and maps are the basis for class lectures and individual and group work assignments, helping students to develop critical thinking and effective oral and written communication skills.

---

### **L97 GS 244 Introduction to European Studies**

This course provides an introduction to the study of contemporary Europe through an historical examination of the moments of crisis, and their political and cultural aftermath, that shaped modern Europe and continue to define it today. These crises will include: the revolutions of 1848, the advent of 19th-century nationalisms, the Great War, the Spanish Civil War, the rise and defeat of state fascism, the Cold War, the formation of the EEC and Union, May 1968, and the return of right-wing politics. After the study of these traditions, the final portion of the semester will consider contemporary Europe since 1991, considering such subjects as Green politics, internal migration and immigration, and the culture of the European Union.

### **L97 GS 263 Democracies & Dictatorships in the Middle East**

What makes a country a democracy? A dictatorship? How do we know? In this course, we take a comparative approach toward the regimes of the Middle East and North Africa in order to critically examine the history, politics, religions, demographics, and economies of different case studies. Students will learn to identify key characteristics of contemporary governments of prominent Middle Eastern countries, the extent to which they can be called democratic, and the different degrees and nuances of authoritarianism. With the 2011 Arab Spring and its aftermath in mind, students will also explore academic debates over why regimes do, or do not, respond to popular pressure for change as they continually adapt and upgrade their capacities to remain in power.

### **L97 GS 2700 Sophomore Seminar: U.S.-China Relations: Perceptions and Realities**

The United States and China are the two most important global powers today, and the bilateral relationship is one of the most comprehensive, complex, consequential, and competitive major-power relations in the world. The course aims to examine the attitudes, ideas, and values that

have shaped the relationship, from the era of colonial expansion in the 1800s to the rise of China as a major political and economic power in the 21st century. Drawing upon visual images, literature, films, policy statements, and other materials, the course will analyze the patterns of perceptions that have informed and shaped the understanding of realities. This course, which uses an interdisciplinary approach, will include discussions and debates from both American and Chinese perspectives. Prerequisite: sophomore level only.

**L97 GS 280 Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film**

This course is an examination of key turning points in Japan from the mid-19th century to the present. It focuses on the important role that bureaucracies, staffed by public servants, have played in shaping the political and social life on the archipelago and in the region. We will engage representations of political and social life in Japan by making use of its rich visual culture by viewing and discussing Japanese films. The assigned films, which will be screened in Japanese with English subtitles, will likely include "The Twilight Samurai," "To Live," and "Shin Godzilla," among others. These films provide representations of how people in Japan have responded to crises, including revolution, war, and natural disasters. Through written and visual materials, students will gain a better understanding of history in Japan, public service, and the utility of film for engaging the past. Film screenings are mandatory.

**L97 GS 3005 Research Design in Global Studies**

How does one develop a research project? From developing questions to laying the framework for the project, the goal of this course is for students to understand key conceptual foundations of research design. This course explores conceptualization, theory, research design, and strategies for framing questions and understanding the tools needed to build a project. This is neither a statistics course nor a qualitative methods course, although students are highly encouraged to take disciplinary-based methods courses. This course will help students navigate the path from academic curiosities to research design. Good research questions are important to academics, of course, but this course will help students develop skills that are useful in settings beyond the academy. This course has as its aim that, upon completion, students will have a better understanding of the skill set needed to answer the kinds of questions that are most interesting to them and to prepare them for future projects, whether these will be answered in a thesis or in a future professional career. Along the way, we will explore some basic techniques for collecting, interpreting, and analyzing data. We will pay attention to both the theoretical approaches to different types of research and focus on some practical techniques of data collection, such as identifying key informants, selecting respondents, developing field notes, conducting interviews, analyzing data, writing, and presenting findings.

**L97 GS 3006 Global Health and Language**

Long before COVID-19, scholars across the globe postulated that language in health care is one of the most significant, and yet underexplored, social determinants of health in underserved linguistic diverse communities. This new course attempts to harmonize work across the disciplines of Global Public Health and Applied Linguistics by analyzing studies that examine language acquisition and language use across contexts with populations that experience serious health disparities- immigrants, refugees, indigenous peoples, racial and ethnic minority groups- and the course offers corresponding implications for health equity. Broadly speaking, this course addresses global health literacy issues, in both spoken and written communications, and its

relationship to public health. As part of the seminar, students will apply the theory and research they learn to help meet the local language health needs of a changing population of refugees and immigrants in St. Louis community.

**L97 GS 3010 Microhistories: Sacle and Narrative in Historical Research and Writing**

Historical Methods (Transregional): How much can we learn about the past through the story of a single person, place, object, or event? Since the 1970s, historians have attempted to show that 'microhistories' can powerfully illuminate the grand sweep of history. By narrowing their focus to magnify the small, the particular, and the local, 'microhistorians' have argued that studies of apparently inconsequential subjects can have a major impact on our understanding of the past. This course is based on the intensive reading and discussion of several outstanding examples of the 'micro-historical' study of individuals, families, communities, events, and social interactions. These will be primarily drawn from the literature on early modern Europe, which has a long and continuing tradition of work of this kind. Some, however, are taken from the historiography of Early America and recent approaches to 'Global' history. Particular attention will be paid to questions of evidence and of its potential in the hands of imaginative historians; and to the deployment of particular analytical and narrative techniques in the construction of history. We will often be less concerned with whether the historians we study are 'right' in their arguments than with how they develop and present them.

**L97 GS 3020 Global Futures**

In this core Global Studies (GS) course, students will develop a broad understanding of our interconnected world by exploring a series of global issues that may include but are not limited to: border crossing and forced migration, climate change, human rights, inequality, or war and conflict. We will study these issues and their interrelated qualities from a variety of perspectives and intellectual frameworks. Students

will situate major developments in a historical and cultural perspective and identify and understand discipline-specific methodologies as well as the benefits and challenges of a transdisciplinary approach. Throughout the semester students will attain a shared, critical vocabulary and theoretical expertise that will enable them to bring together the range of approaches -quantitative, qualitative, mixed, - used in other GS courses. Students will also hone argumentation and communication skills for their post-graduation careers, and different forms of community engagement in global contexts. This course is required for all GS majors matriculating in Fall 2023.

#### **L97 GS 3024 International Institutions**

This course surveys in an historically and theoretically informed fashion the role of various international institutions in international relations. It addresses the fundamental question of the contribution of international institutions to world order. The course first traces the historical evolution of international organizations before turning to international institutions since World War II. It then focuses on the following: the most important regional international organization, the European Union; the most important international organizations dealing with the issues of peace and security, the United Nations and NATO; and the major international economic institutions, the WTO, the IMF, and the World Bank. Prerequisite: L32 103B.

#### **L97 GS 3030 Daoist Traditions**

This course offers an introduction to the history, practices, and worldviews that define the Daoist traditions. Through both secondary scholarship and primary texts, we consider the history of Daoism in reference to the continuities and discontinuities of formative concepts, social norms, and religious practices. Our inquiry into this history centers on consideration of the social forces that have driven the development of Daoism from the 2nd century to the modern day. Special consideration is given to specific Daoist groups and their textual and practical traditions: the Celestial Masters (Tianshi), Great Clarity (Taiqing), Upper Clarity (Shangqing), Numinous Treasure (Lingbao), and Complete Perfection (Quanzhen). Throughout the semester we also reflect on certain topics and themes concerning Daoist traditions. These include constructions of identity and community, material culture, the construction of sacred space, and cultivation techniques.

#### **L97 GS 3043 Survey of Brazilian Culture: Race, Nation and Society**

This course will introduce students to Brazilian culture from the colonial period to the present through literature, art, music, film and other cultural forms. The course gives a historical overview of Brazilian culture and society, exploring major sociohistorical and artistic moments from the colonial, imperial, and republican periods, and their "legacies" or influences on Brazilian society. Students will learn about the Amerindian, European, and African influences of Brazilian culture through the study of representative texts and cultural practices. The course also illustrates Brazil's place within Latin America and the world. The course will seek to deconstruct and expand preconceived notions of Brazil, such as Lusotropicalism and racial democracy. Classes will combine lectures by the instructor, student presentations, collective debates and cooperative learning, and will entail the use of required bibliography and audiovisual materials. Prereq. None.

#### **L97 GS 3045 Hot Peace: U.S.-Russia Relations Since the Cold War**

This course is an historical analysis of U.S.-Russia relations since the end of the Cold War. Focusing on "reset" diplomacy during the terms of five American and three Russian presidents since 1990, it reveals a familiar historical pattern that begins with high hopes, dialogue, and optimism only to be followed by vast disappointment, standoffs, and pessimism. Despite this dynamic, the course shows how and why the two countries have been able to cooperate at times to make substantial headway on critical issues such as arms control, nonproliferation of WMD, NATO expansion, counterterrorism, and economic and energy development, whereas at other times they have run afoul of major obstacles such as further NATO expansion, missile defense, and democracy and human rights in Russia. The course also examines how many political events created substantial challenges to U.S.-Russia relations, including the Balkan Wars; U.S. wars in Iraq and Afghanistan; Russia's wars in Chechnya, Georgia and Ukraine/Crimea; the "Color Revolutions"; the Arab Spring and subsequent civil wars in Iraq, Syria, Yemen and Libya; the fight against ISIS and other militant Islamists; the threats posed by Iran and North Korea; the rise of China; espionage crises; hybrid wars; cyberattacks; and disinformation campaigns. Two vital questions frame the analysis: (1) Why has it been so difficult for these two great powers to develop a mutually beneficial relationship? (2) What would be required to move beyond the limited partnership to something more productive and sustaining? The course concludes by evaluating "reset" diplomacy and the ongoing attempts to move U.S.-Russia relations beyond a Hot Peace.

**L97 GS 3055 Contemporary Chinese Culture and Society**

This course provides an introduction to emerging trends in Chinese culture and society. We will explore processes of change and continuity in the People's Republic, examining the complexity of social issues and the dynamics of cultural unity and diversity. While we will focus on the post-Mao reform era (1978 to the present), we will consider how contemporary developments draw upon the legacies of the Maoist revolution as well as the pre-socialist past. The course provides an overview of anthropological approaches to the study of contemporary China, introducing students to key concepts, theories, and frameworks integral to the analysis of Chinese culture and society. Readings, lectures, and discussions will highlight not only macro-level processes of social change and continuity but also the everyday experiences of individuals involved in these processes. We will pay particular attention to issues of family life, institutional culture, migration, religion, ethnicity, gender, consumption, and globalization.

**L97 GS 305M Survey of Mexican Cultures**

This course provides an interdisciplinary introduction to the study of Mexico, with a particular focus on the 20th and the 21st century. The class will cover the main historical and cultural processes of Mexico in this period: The Mexican Revolution; the consolidation of a one-party political system; the construction of Mexican national identity and the arrival of neoliberalism. The course also focuses on the main aspects of Mexico's relationship to the United States: the Free Trade Agreement, the history of Mexican migration and the Drug War. From this framework, the course touches upon questions of race (particularly the politics of racial mixture), modernization, construction of social identities and the unique nature of governance in Mexico, due to the single-party regime. It also touches on Mexico's specificities and particularities due to the uniqueness of situation as the southern neighbor of the United States. PreReq. None.

**L97 GS 3064 Survey of Southern Cone Cultures: Argentina, Chile, and Uruguay**

The purpose of this course is to analyze the process of nation formation in Latin America, since the imaginaries of the "Creole nation" to the first half of the 20th century. Class discussion will encompass the study of theories on nation formation and nationalism as well as

textual representations of national projects, such as Simon Bolivar's letters and discourses, selections from Facundo, Civilization and Barbarism by Domingo F. Sarmiento, selected texts by Andres Bello, Alfonso Reyes, et al, Ariel, by J. E. Rodo, Pedro Henriquez Urena's Seis ensayos en busca de nuestra expresion, Jose Vasconcelos' La raza cosmica, Jose Carlos Mariategui, Siete ensayos de interpretacion de la realidad peruana, Jose Marti's Nuestra America and other essays. Some of the main topics to be discussed are the leading role of Creole elites in the consolidation of national cultures, the marginalization of women as well as indigenous and Afro-Hispanic populations, and the role of nationalism in the shaping of modern societies. Colonialism, Occidentalism, liberalism, positivism, nationalism and modernity are some of the concepts that will be explored both theoretically and in their particular discursive usages. Finally, the concept of nation(alism) will be studied as a political/rhetorical device and as the resulting expression of agency, interest, and desire, in peripheral societies.

**L97 GS 307 The Writing of the Indian Subcontinent**

The Indian Sub-continent has in recent years yielded a number of writers, expatriate or otherwise, whose works articulate the postcolonial experience in the "foreign" English tongue. This course is designed to be an introductory survey of such writing, drawing on select sub-continental writers. Covering both fiction and non-fiction by several authors including R. K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatje and Romesh Gunesequera, we will discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity and the constraints of gender roles.

**L97 GS 3073 The Global War on Terrorism**

This course presents an historical assessment of the Global War on Terrorism (GWOT) from the perspective of its major participants: militant Sunni Islamist jihadists, especially the Al-Qaeda network, and the nation states that oppose them, particularly the United States and its allies. The course then concludes by analyzing the current state and future of Islamist jihad and the GWOT.

**L97 GS 3074 Hinduism & the Hindu Right**

We are witnessing a global rise in rightwing politics, and India is no exception. In May 2019, Narendra Modi and his "Hindu Nationalist" party were elected to power for a second term. Observers in the United States and Europe may be stunned by what seems to be a new development, but observers in India have been following the rise of the Hindu Right since the early 1990s. In its wake, the Hindu Right has brought violence against minorities; curbs on free speech; and moves toward second-class citizenship for Indian Muslims. This course will track the history of the Hindu Right in India from its 19th-century roots to the present. The struggle to come to grips with the Hindu Right is of immediate political relevance. It also raises big questions about the history of religion and the politics of secularism.

**L97 GS 3092 Indigenous Peoples and Movements in Latin America**

This course focuses on the contemporary lives and political struggles of Indigenous Peoples in Latin America, with specific focus on Ecuador, Peru, and Bolivia. Through course lectures, ethnographic texts, and four in-depth case studies, we explore how the politics of Indigeneity articulate with political and economic processes including

(neo)colonialism, global capitalism, state transformation and social movement struggle. Themes include: demands for territory and autonomy; environmentalism and natural resource exploitation; gender and economic inequality; race, racism and political violence; language and education; and the complexities of building multicultural or "plurinational" democracies.

### **L97 GS 3093 Anthropology of Modern Latin America**

A survey of current issues in the anthropological study of culture, politics, and change across contemporary Latin American and the Caribbean. Topics include machismo and feminismo, the drug war, race and mestizaje, yuppies and revolutionaries, ethnic movements, pop culture, violence, multinational business, and the cultural politics of U.S.-Latin American relations. Attention will be given to the ways that anthropology is used to understand complex cultural and social processes in a region thoroughly shaped by globalization.

### **L97 GS 3098 African Art in Context: Patronage, Globalisms and Inventiveness**

This course offers an introduction to principal visual arts from Africa, pre-historic to contemporary. It explores traditions-based and contemporary arts made by African artists from across the continent in conjunction with their various contexts of creation, use, understanding, and social history. Theoretical perspectives on the collection, appropriation, and exhibition of African arts in Europe and North America will be examined. Coursework will be complemented by visits as a group or independent assignments at the Saint Louis Museum, the Pulitzer Arts Foundation, and possibly a local private collection.

### **L97 GS 311 Buddhist Traditions**

This course examines the historical development of Buddhism from its origins in South Asia in the 6th to 5th century BCE, through the transmission of the teachings and practices to East Asia, Southeast Asia, and Tibet, to contemporary transformations of the tradition in the modern West. In the first third of the course, we focus on the biographical and ritual expressions of the historical Buddha's life story, the foundational teachings attributed to the Buddha, and the formation and development of the Buddhist community. In the second third, we examine the rise of the Mahayana, the development of the Mahayana pantheon and rituals, and the spread of Mahayana in East Asia. In the final third, we explore the Theravada tradition in Sri Lanka and Thailand, then Tantric Buddhism in India, Tibet, and East Asia. We close the course with an overview of Buddhism in the modern West.

### **L97 GS 3117 Capitalism, Socialism and Labor: The Political Economy of 20th Century Africa**

This course surveys the integration of African individuals and communities into the global economy. We will, however, pay equal attention to their efforts to resist integration, or at least have a greater say in how it would take place. This social history of the political economy of sub-Saharan Africa in the "long" 20th century critiques theories of imperialism, capitalism, socialism, development and underdevelopment from the perspective of ordinary people. The essay-based course work is focused on making original arguments using primary historical sources as evidence.

### **L97 GS 3120 South Asian Religious Traditions**

In this course we will learn the basic vocabulary (conceptual, ritual, visual) needed to become conversant with the various religious traditions that are important to personal, social, and political life on the Indian subcontinent and beyond. We will first encounter each tradition through narrative, with the support of visual media. We will then explore how contemporary adherents make these traditions meaningful for themselves -- in their everyday lives, in their struggles for social change, and in their political statements and contestations. Students will also become familiar with the analytical categories and methodologies that make up the basic toolkit of the religion scholar. Prior knowledge of India or Pakistan is not required. First year students are welcome to enroll in this course.

### **L97 GS 3130 Topics in English and American Literature**

Called the "Age of Revolution," the Romantic Age of British literature, 1770-1830, witnessed the birth of new lyric forms, the effacement of traditional strictures on style and taste, and produced through poetic voice (and its quaverings and multiplications) what might be called, over simply, the modern subject. Within a developing discourse of human rights and personal freedom, this growing assertion through poetry of individual expressivity allowed William Blake to construct in a single work a visual and verbal "Jerusalem." It encouraged William Wordsworth to write a pathbreaking investigation of the sources of his own creativity that challenged conventional restraints on what topics can, and cannot, be confessed in poetry. Beginning with these two poets, we will consider the historical contexts, and the sometimes competing histories of ideas, that shaped the five major British Romantic poets: Blake, Wordsworth, Samuel Taylor Coleridge, Lord Byron, and John Keats. We will follow an anthology for much of the poetry, including the poems and prose of influential contemporaries (female as well as male) who included the political philosopher Edmund Burke and Mary Wollstonecraft. Texts also to be assigned will include Mary Shelley's *Frankenstein* and Byron's *Don Juan*.

**L97 GS 3133 Hello, Hello Brazil! Popular Culture, Media, and the Making of a Nation**

Our image of Brazil has been deeply shaped by its cultural production, from Tom Jobim and Vinicius de Moraes' ever-popular "Girl from Ipanema" to the spectacular mega-production of Carnival in Rio and from the Afro-Brazilian martial art of capoeira to the international stardom of pop artists like Anitta. This course is an introduction to popular culture in contemporary Brazil. Students will approach the theme through theoretical works that seek to define popular culture, understanding it as a hybrid form of expression that troubles the line between the "traditional" and the mass-produced. This course will examine how the circulation of sounds and images manifests and shapes Brazilian culture historically and in the present. We will also interrogate the different ways in which culture is produced and received, how it circulates in symbolic markets, and how it comes to be both consumed by diverse audiences and utilized in often unexpected ways. The course will cover topics such as the Tropicalia movement, Afro-centric Carnival blocos, street art such as graffiti, baile funk, forro, favela protest theater, telenovelas (soap operas), the popularization of samba, soccer and the World Cup, and Carnival. Students will use an interdisciplinary lens to approach popular culture in Brazil through music lyrics, TV and film, cultural performances, and graphic novels. These materials will form the basis of our class discussions and written assignments. The course will be taught in English. Prerequisite: L45 165D, L45 304, or another course on Latin America suggested. Same as L45 LatAm 313

**L97 GS 3149 The Late Ottoman Middle East**

This course surveys the Middle East in the late Ottoman period (essentially the 18th and 19th centuries, up to the First World War). It examines the central Ottoman state and the Ottoman provinces as they were incorporated into the world economy, and how they responded to their peripheralization in that process. Students will focus on how everyday people's lived experiences were affected by the increased monetarization of social and economic relations; changes in patterns of land tenure and agriculture; the rise of colonialism; state efforts at modernization and reform; shifts in gender relations; and debates over the relationship of religion to community and political identity.

**L97 GS 314B International Politics**

Globalization, the accelerating rate of interaction between people of different countries, creates a qualitative shift in the relationship between nation-states and national economies. Conflict and war is one form of international interaction. Movement of capital, goods, services, production, information, disease, environmental degradation, and people across national boundaries are other forms of international interactions. This course introduces major approaches, questions, and controversies in the study of global political-economic relations. In a small group seminar we will examine the building blocks of world politics, the sources of international conflict and cooperation, and the globalization of material and social relations.

**L97 GS 3163 Early Modern China**

This course examines political, socio-economic, and intellectual-cultural developments in Chinese society from the middle of the fourteenth century to 1800. This chronological focus largely corresponds to the last two imperial dynasties, the Ming (1368-1644) and Qing (1644-1911). Thematically, the course emphasizes such early modern indigenous developments as increasing commercialization, social mobility, and questioning of received cultural values.

**L97 GS 3165 Chinese Diasporas**

Five hundred years ago, the Chinese population was concentrated in core areas of China proper. Beginning in the 16th century, significant numbers of Chinese people moved to the frontiers of an expanding China and across its borders: to Japan and Southeast Asia, to the Americas and Australia, and to Africa and Europe. Although Chinese migration certainly existed beforehand, the period from the 16th century to the present day is marked by the emergence of sustained movement of non-state actors and the development of institutions -- ranging from native-place associations to tourist agents' websites -- that supported this vast circulation of people. Likewise, in many emigrant communities and host societies, Chinese diasporic families adapted to migration as a way of life. This course traces this worldwide circulation of Chinese people over these five centuries.

**L97 GS 3168 Historical Landscape and National Identity in Modern China**

This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campus, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens, and churches. Using methods of historical and cultural anthropological analysis, the course invests the places where we see with historical meaning. Through exploring the ritual, political, and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local, and personal identity. The historical events

and processes we examine along the way through the sites include the changing notion of rulership, national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory, and changing over time are an important concern of this course.

### **L97 GS 3169 A History of Modern China**

This course explores the 19th- and 20th-century history of China. Its purpose is to provide students with a historical foundation to understand the momentous changes the country underwent during its traumatic transition from an empire to a nation-state. We start the course at the height of the empire's power in the late 18th century, when the Qing dynasty (1637-1912) conquered vast swathes of lands and people in Inner Asia. We then move on to the Qing's troubled relationship with Western capitalism and imperialism in the 19th century, which challenged the economic, social, and ideological structures of the imperial regime, culminating in the emergence of "China" as a nation-state. By situating China's national history within a global context, the course outlines in detail the transformations that took place in the 20th century, from the rise of communism and fascism to the Second World War to Maoism and cultural revolution. We end the semester with yet another major change that took place in the 1980s, when a revolutionary Maoist ideology was replaced with a technocratic regime, the legacies of which are still with us today.

### **L97 GS 316K Cyborgs in History: From Cybernetics to Artificial Intelligence**

Who coined the word "cyborg," and why? How did cyborgs become so integral to our imaginative worlds and daily existence? In this course, we will contemplate the intersection between technologies and societies through the lens of cyborgs, a term that is shorthand for "cybernetic organisms." Defying the separation between humans and machines, cyborgs have been critical to sciences, humanities, pop culture, feminism, afrofuturism, and queer studies, among many other fields of inquiry. This course will take a deep dive into the worlds of scientists, scholars, artists, and ordinary people to discover the cultural meanings of cyborgs across time and space. Along the way, we will meet Norbert Wiener, who coined the term "cybernetics"; Donna Haraway, for whom the cyborgs were a revolutionary species; and John C. Lilly, who thought he could speak with dolphins. We will also travel to the USSR to read about a failed internet; to Chile, where cybernetics was a socialist project; and to Japan, to learn about gender and technology in non-Western spaces. By the end of the course, students will have a strong theoretical and historical grasp on the social worlds of cybernetic technologies.

### **L97 GS 316R Economic History of China: From the Silver Age to Reform and Opening, 1500-1990**

This seminar explores the economic history of China from the 16th to the 20th century; this time period is the half a millennium during which China became part of the world economy and defined its development in major ways. Over the course of the semester, students will be exposed to the main debates in the field of Chinese economic history while acquiring a strong grasp of the nuts and bolts of how economy functioned and changed from the imperial to the modern times. Situating China within a comparative perspective, we will examine a multitude of debates ranging from the global silver age of the 16th century to the birth of capitalism, the socialist economy, and the PRC's recent involvement in Africa. We will in particular discuss

the contradictions that arose out of China's integration into the world economy and the different kinds of economic regimes that existed and continue to exist within China. While this course assumes a basic familiarity with Asian history, students with backgrounds in other world histories and/or social science disciplines should feel comfortable with the course material.

### **L97 GS 3176 Chinese Economy in World History**

From the Belt and Road Initiative to high-tech surveillance, China is at the center of contemporary discussions about the future of the global economy. This course will expose students to a historical understanding of how China not only became part of the world economy, but in fact defined its development in major ways. Over the course of the semester, students will explore a variety of subjects, from the Great Divergence between Europe and China in the eighteenth century to the rise of Maoist socialism in mid-twentieth century, to China's transition to capitalism and involvement in Africa in the twenty-first century. Examining the past two hundred fifty years of Chinese and global economic history, the students will gain a deep understanding of how China became the world's second largest economy, and what that means for the future.

### **L97 GS 318 Learning to Use GIS in Development, Area Studies and International Affairs**

In this course you will be introduced to the concept of spatial thinking, which will help you determine why and when to use GIS to address a spatial problem relevant to Global Studies. The course will be organized into four sections based on 1) area studies, focused on demographic inquiry; 2) development, focused on site selection; 3) global cultural studies, focused on data creation and editing; and 4) international affairs, focused on digital elevation, density and basic spatial statistics. The class will explore some tools available for visualizing and analyzing data, but our main tool will be ArcGIS. The aim of this course is that you learn concepts and develop a skillset that you can apply to other projects.

### **L97 GS 3181 Gender, Sexuality and Power in Brazil**

This course examines the nexus of gender, sexuality, and power in Brazil through an interdisciplinary lens. We will aim to understand how varying understandings of gender and sexuality have impacted the development of Brazilian society in history and continue to shape contemporary society and politics. We will pay special attention to the ways in which the intersections of race, gender, sexuality, class, ethnicity, and so on impact people's lived experiences and how heteronormativity and homophobia shape current politics. We will take an intersectional feminist approach to analyze topics such as slavery in colonial Brazil, national aspirations to modernity, authoritarian repression and "moral panics," domestic labor, motherhood, sex tourism, Brazilian feminisms, and LGBTQ+ activism. Scholarly work from various fields of study -- with an emphasis on gender studies, history, and anthropology -- will be supplemented by documentaries, film, podcasts, and other media. This is a Writing Intensive and a Social Contrasts class in the IQ curriculum. Prerequisite: L45 165D, or two courses on Latin American or Women and Gender Studies, or permission of instructor.

**L97 GS 3184 A Rainbow Thread: A History of Queer Identities in Judaism and Islam**

The notion that gender and sexuality minorities are forbidden or simply do not exist within traditional Judaism and Islamic traditions is an assumption that has been questioned in recent years. For these scholars and activists, it is not up for debate whether someone can be queer and Jewish or queer and Muslim. Therefore, what follows is an exploration of how to resurrect gender non-conforming interpretations of religious texts and rediscover the spectrum of gender and sexual identities that have always existed within Judaism and Islam. The course is divided into three parts. First, we will examine the religious textual traditions of both faiths to establish the space for queer identities in both the Qur'an and Torah as well as the traditions of Hadith and Talmud. Second, we will study key communities such as medieval Iberia, the Ottoman Mediterranean, Hasidic communities in Eastern Europe, Qajar Iran, and the colonial empires of the Middle East. This survey will show the influence European Christian dominance had (or did not have) on the evolution of Jewish and Islamic gender and sexual norms from pre-modern times through the 20th century. Finally, we will examine the 21st century by reading the memoirs of trans Muslims and trans Jews in order to analyze the ways in which contemporary queer Jewish and Islamic individuals frame their experiences and tell their stories of faith with agency, in their own words.

---

**L97 GS 3194 Environment and Empire**

In this course we study British imperialism from the ground up. At bottom, the British empire was about extracting the wealth contained in the labour and the natural resources of the colonized. How did imperial efforts to maximize productivity and profits impact the ecological balance of forests, pastures, and farm lands, rivers and rainfall, animals and humans? We'll ask, with environmental historians of the U.S., how colonialism marked a watershed of radical ecological change. The course will cover examples from Asia to Africa, with a focus on the "jewel in the crown" of the British empire: the Indian subcontinent. We'll learn how the colonized contributed to the science of environmentalism, and how they forged a distinctive politics of environmentalism built upon local resistance and global vision, inspired by religious traditions and formative thinkers, not least Mahatma Gandhi.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

---

**L97 GS 320 British Cinema: A History**

British cinema has gotten a bad rap. French film director François Truffaut once declared that cinema and Britain were incompatible terms since "the English countryside, the subdued way of life, the stolid routine-are anti-dramatic... [even] the weather itself is anti-cinematic." Yet British films proudly rank among some of the most acclaimed and beloved in film history: Monty Python and the Holy Grail, A Hard Day's Night, Lawrence of Arabia, The Third Man, Zulu, The Ladykillers, A Night to Remember, Trainspotting, The King's Speech, and the James Bond franchise. Admittedly, British cinema has had its ups and downs, never quite knowing whether to position

itself as a distinctive national cinema or as a rival to Hollywood. This uncertainty has fostered a rich diversity and complexity that this course will emphasize in a survey approach. We will give equal attention to the work of high-profile directors like Alfred Hitchcock and Michael Powell and to important "genres" in which the British seem to excel--like black comedy, imperialist adventure, "kitchen sink" drama, documentary, and the so-called "heritage" films that paved the way for television's Downton Abbey. Required Screenings.

**L97 GS 3214 Contemporary Chinese Popular Culture**

With the rise of the Chinese economy and global capitalism, popular culture has proliferated in mainland China in recent years. This course traces the development of Chinese popular and youth culture and society from the 1990s to the present. It also refers back to modern times and ancient Chinese Confucian philosophy for historical background information. The course covers various forms of Chinese popular culture, such as movies, music, television programs, Internet literature, religion, sports, and food. Students observe primary resources and read academic articles to engage in a multiperspective and multimedia view of present-day China in the age of globalization and East Asian regionalization.

**L97 GS 3215 Food, Culture and Power**

What should I eat today? This seemingly simple question transects the fields of health, environmental studies, economics, history, anthropology, religion, and many others. The foods we eat, the way we get them, the way we produce them, and the way in which we eat them speak volumes about our beliefs, our technology, our understanding of how the world works, and our ability to function within it. That is, food is an excellent way to explore culture. No actions are more deserving of critical attention than those that we do regularly, without much critical thought, and most of eat at least two or three times a day. In this class we'll explore how this food came to be here, why we like it, and what that says about us. This class will be reading and discussion heavy, with a midterm paper based on the readings and a final paper based on a topic of the students' choosing.

Same as L48 Anthro 3215

**L97 GS 321C Introduction to Colonial Latin America until 1825**

This course surveys the history of Latin America from the pre-Columbian civilizations through the Iberian exploration and conquest of the Americas until the Wars of Independence (roughly 1400-1815). Stressing the experiences and cultural contributions of Americans, Europeans, and Africans, we consider the following topics through primary written documents, first-hand accounts, and excellent secondary scholarship, as well as through art, music, and architecture: Aztec, Maya, Inca, and Iberian civilizations; models of conquest in comparative perspective (Spanish, Portuguese, and Amerindian);

environmental histories; consolidation of colonialism in labor, tributary, and judicial systems; race, ethnicity, slavery, caste, and class; religion and the Catholic Church and Inquisition; sugar and mining industries, trade, and global economies; urban and rural life; the roles of women, gender, and sexuality in the colonies. Geographically, we will cover Mexico, the Andes, and to a lesser extent, Brazil, the Southwest, Cuba, and the Southern Cone. Pre-modern, Latin America.

### L97 GS 3224 Topics in Italian: Basilisks to Botticelli: The Birth, Development and Politics of Museums in Italy

This course investigates the rise and cultural authority of museums in Italy from the Renaissance to the twentieth century. The course unfolds chronologically, beginning with the distant precursors and etymological roots of the museum in ancient Alexandria and Rome. We trace the origins of the museum in the art collection and patronage that surged during the Renaissance, including the sixteenth- and seventeenth-century Curiosity Cabinet with its fossils, mythical basilisks, gems and weapons and church displays of religious and classical art. We will study the establishment during the Enlightenment in Italy of the first public art museums epitomized by the Vatican Museums, the Uffizi Gallery and the Capitoline Museums. We will conclude by examining the impact on national and cultural identity of Fascist propaganda museums instituted under Mussolini's regime. No prerequisites.

### L97 GS 322C Modern Latin America

This course aims to present a survey of Latin American history from Independence to the present. Topics to be covered include the Wars of Independence; caudillismo; nationalism; liberalism; slavery and indigenous peoples; urbanization, industrialization and populism; ideas of race & ethnicity; the Mexican and Cuban Revolutions; US intervention; modernity, modernism and modernization; motherhood and citizenship; the Cold War; terror and violence under military dictatorships and popular resistance movements. While the course aims to provide students with an understanding of the region, it will focus primarily on the experiences of Mexico, Cuba, Brazil, Argentina and Central America.

### L97 GS 3230 Sex Trafficking

Sex trafficking is a complex social problem with multiple contributing factors largely rooted in intersecting inequalities. Both in the United States and on a global level, interrelated inequities in gender, sex, sexual orientation, gender identity, power, class, opportunity, education, culture, politics, and race are among the social phenomena that contribute to sex trafficking/CSE victimization. In this course, we will examine the dynamics of sex trafficking on a local and global level from various feminist and political perspectives, with particular attention given to the sexed and gendered social and structural conditions that impact sex trafficking. This course will cover the

extent and nature of the problem, as well as current debates in the field, including demand, prevalence, experiences of survivors, types of sex trafficking, methods of traffickers, the role of weak social institutions, cultural dynamics, and global power dynamics. The course will also examine international, federal, and state legislation as well as organizational and grassroots efforts to prevent and respond to sex trafficking victimization. The aim of this course is to provide students with a holistic understanding of sex trafficking drawing from interdisciplinary sources and presenting a variety of perspectives.

### L97 GS 3243 A User's Guide to Japanese Poetry

This course introduces the art and craft of Japanese poetry, one of the world's great literary traditions. Exploring the many styles of traditional verse—the poetic diary, linked verse, haiku, and others—and their historical contexts, students gain insights into Japanese aesthetics and study the unique conventions of Japanese poetic production that have evolved over a span of some 1500 years. The course also incorporates a "haiku workshop," where we engage in group-centered poetry writing and critiquing. No prior knowledge of Japanese is required.

### L97 GS 3248 Intercultural Communication

"Intercultural communication" and "cross-cultural communication" are interchangeable terms in referring to the field of studies covered in this course. We will start with a critical examination of Geert Hofstede's cultural dimensions theory and then explore theories of verbal and non-verbal cues, space and time, tastes and smells, and shame and politeness from multidisciplinary angles and by using varied case studies in intercultural settings. Finally, we will tackle intercultural dynamics through the lens of foods as well as the people who produce and consume them. The readings cover case studies of different world regions across various cultural, linguistic, and ethnic groups. This course aims to provide analytical tools to understand and navigate cultural difference and to develop critical skills of intercultural competence.

### L97 GS 324C Japan Since 1868

For some, the word Japan evokes Hello Kitty, animated films, cartoons, and sushi. For others, it makes them think of the Nanjing Atrocity, "comfort women," the Bataan Death March, and problematic textbooks. Still others will think of woodblock prints, tea ceremonies, and cherry blossoms or perhaps of Sony Walkmans and Toyota automobiles. At the same time, still others may have no image of Japan at all. Tracing the story of Japan's transformations - from a preindustrial peasant society managed by samurai-bureaucrats into an expansionist nation-state and then into its current paradoxical guise of a peaceful nation of culture led by conservative nationalists - provides the means for deepening our understandings of historical change in one region and grappling with the methods and aims of the discipline of history.

### L97 GS 3250 French Film Culture

Called "the seventh art," film has a long tradition of serious popular appreciation and academic study in France. This course will offer an overview of French cinema, including the origins of film (Lumière brothers, Méliès), the inventive silent period (which created such avant-garde classics as *Un chien andalou*), the poetic realism of the 30s, the difficulties of the war years, the post-war emphasis on historical/nationalist themes in the "tradition of quality" films, the French New Wave's attempt to create a more "cinematic" style, the effects of the

political turmoil of May '68 on film culture, the "art house" reception of French films in the US, and the broader appeal of recent hyper-visual ("cinéma du look") films, such as *La Femme Nikita* and *Amélie*. While the primary focus of the course will be on French cinema, we will also discuss the reciprocal influences between American and French film culture, both in terms of formal influences on filmmaking and theoretical approaches to film studies. French film terms will be introduced but no prior knowledge of the language is expected. REQUIRED SCREENING: [day, time].

**L97 GS 3258 Cultures of Health in Latin America**

This course is a survey of the cultural and political-economic aspects of health, illness, and embodied difference in Latin America. We will approach these themes from an interdisciplinary perspective with an emphasis on anthropology and history, exploring how local, national, regional, and global factors affect health and healthcare and how people experience and respond to them. Topics will include interactions between traditional healing practices and biomedicine; the lasting impacts of eugenic sciences on contemporary ideas about race and disability; the unequal impacts of epidemic disease; Indigenous cosmologies and healing systems; the politics of access to healthcare; the cultural and political specificities of reproductive health; and the intersections of race, gender, ethnicity, class, and bodily capacities in the pursuit of well-being. This course is designed for students of all levels interested in health and/or Latin American cultures. It will be taught in English.

**L97 GS 3265 Samurai, Rebels, and Bandits: The Japanese Period Film**

Tales of heroism, crime, revolt, and political intrigue. Bloody battles, betrayal, madness, and flashing swords. This is the world of jidaigeki eiga, the Japanese period film. In this course, we will analyze the complex (and often flamboyant) narrative, visual, and thematic structures of films about the age of the samurai. We will discuss jidaigeki representations of violence and masculinity, self-sacrifice and rebellion, and the invention of tradition as well as critical uses of history. In addition to the historical content of the films, we will study the historical contexts that shaped jidaigeki film production and discuss relevant transformations in Japanese cinema and society. Period films have been shaped by and exert strong influences on Japanese theater, oral storytelling, popular literature, comics, and international film culture, all of which are helpful for understanding the films. As we track changes in jidaigeki style and subject matter, the course will introduce theories for interpreting narrative structure, genre repetition and innovation, intertextuality, and representations of "the past." All readings will be in English. No knowledge of Japanese required. No prerequisites. Required Screenings Tuesdays @ 7 pm.

---

**L97 GS 3270 Humans and Others in Latin America: Natures, Cultures, Environments**

What does it mean to inhabit the world with other beings? How are we to cultivate life -- both human and nonhuman -- in toxic environments? What does it mean to be human, and what would it mean to decenter humanity? This course addresses these questions through an exploration of "more-than-human" worlds in Latin America. Students will examine a variety of Latin American thought and practices through the interdisciplinary lens of environmental humanities and social sciences, unsettling presumed boundaries between human and nonhuman, real and imaginary, native and culture. We will engage primarily with ethnographic and other scholarly texts, which will be supplemented by short works of fiction, documentary film, podcasts, and works of art. In the first part of this course, students will be challenged to think about what defines the limits of the human and engage with the concept of "more-than-human" worlds. We will then examine the dark side of such worlds, namely, the ways in which extractive capitalism and environmental destruction demonstrate the permeability of bodies and comprise a kind of "slow violence" against the most vulnerable communities. In the next unit, students will consider Black and Indigenous ecological knowledge and these communities' struggles to care for their lifeways and the environments that sustain them. In our final section, we will explore multispecies entanglements through Indigenous cosmologies and the nexus of science, history, and art. Students will complete several assignments throughout the semester that have been designed to make them think imaginatively and critically about the course themes, including weekly reading responses and in-class discussion facilitation. The final assignment for this course is a creative independent research project where students will synthesize what they learned over the course of the semester and extend it through independent research. Prerequisite: L45 165D or permission of instructor.

**L97 GS 3283 Introduction to Global Health**

This course provides a general introduction to the field of public health. It examines the philosophy, history, organization, functions, activities, and results of public health research and practice. Case studies include infectious and chronic diseases, mental health, maternal and reproductive health, food safety and nutrition, environmental health, and global public health. Students are encouraged to look

at health issues from a systemic and population level perspective, and to think critically about health systems and problems, especially health disparities and health care delivery to diverse populations. No background in anthropology or public health is required.

### L97 GS 3291 History of German Cinema

This course explores the major developments of German cinema throughout the twentieth century. More specifically, this course will engage with issues relating to German film culture's negotiation of popular filmmaking and art cinema, of Hollywood conventions and European avant-garde sensibilities. Topics will include the political functions of German film during the Weimar, the Nazi, the postwar, and the postwall eras; the influence of American mass culture on German film; the role of German émigrés in the classical Hollywood studio system; and the place of German cinema in present-day Europe and in our contemporary age of globalization. Special attention will be given to the role of German cinema in building and questioning national identity, to the ways in which German feature films over the past hundred years have used or challenged mainstream conventions to recall the national past and envision alternative futures. Films by directors such as Murnau, Lang, Fassbinder, Herzog, Tykwer and many others. All readings and discussions in English. May not be taken for German major or minor credit. Required screenings. This course is appropriate for first year students.

### L97 GS 3318 Topics in Holocaust Studies: Children in the Shadow of the Swastika

This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period-the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children-both those they considered "Aryan" and those they designated "enemies" of the German people, such as Jewish children - an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. OPEN TO FRESHMEN. STUDENTS MUST ENROLL IN BOTH MAIN SECTION AND A DISCUSSION SECTION.

### L97 GS 3324 Russian Theater, Drama and Performance: From Swan Lake to Punk Prayer

This course explores performance in Russia from the wandering minstrels of medieval times to protest art of the present day. Genres include tragedy and comedy (Griboedov, Pushkin Gogol), drama (Ostrovsky, Turgenev, Chekhov), experimental theater (Stanislavsky, Evreinov, Meyerhold), ballet (Imperial, Soviet, Ballets Russes), opera (Tchaikovsky, Mussorgsky, Shostakovich), and performance art (Futurists, Pussy Riot, Pavlensky). We also consider performativity in rituals, public events, and everyday life. Our discussions center

on the analysis of short and full-length plays, critical theory, specific productions and performers, and the role that performance has played in shaping Russian culture. All readings are in English translation. No prerequisites.

### L97 GS 3350 Becoming "Modern": Emancipation, Antisemitism and Nationalism in Modern Jewish History

This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be-or to become-modern. To answer this question, we look at two broad trends that took shape toward the end of the eighteenth century--the Enlightenment and the formation of the modern state--and we track changes and developments in Jewish life down to the close of the twentieth century with analyses of the (very different) American and Israeli settings. The cultural, social, and political lives of Jews have undergone major transformations and dislocations over this time--from innovation to revolution, exclusion to integration, calamity to triumphs. The themes that we will be exploring in depth include the campaigns for and against Jewish "emancipation;" acculturation and religious reform; traditionalism and modernism in Eastern Europe; the rise of political and racial antisemitism; mass migration and the formation of American Jewry; varieties of Jewish national politics; Jewish-Gentile relations between the World Wars; the destruction of European Jewry; the emergence of a Jewish nation-state; and Jewish culture and identity since 1945.

### L97 GS 3354 The Ancient Maya: Archaeology and History

This course focuses on the ancient Maya civilization because there are many exciting new breakthroughs in the study of the Maya. The Olmec civilization and the civilization of Teotihuacan in the Valley of Mexico will be considered as they related to the rise and development of the Maya civilization. The ancient Maya were the only Pre-Columbian civilization to leave us a written record that we can use to understand their politics, religion, and history. This course is about Maya ancient history and Maya glyphic texts, combined with the images of Maya life from their many forms of art. The combination of glyphic texts, art, and archaeology now can provide a uniquely detailed reconstruction of ancient history in a New World civilization.

### L97 GS 3357 China's Urban Experience: Shanghai and Beyond

The course studies the history of Chinese cities from the mid-19th century to the late 20th century. It situates the investigation of urban transformation in two contexts: the domestic context of modern China's reform and revolution and the global context of the international flow of people, products, capitals, and ideas. It chooses a local narrative approach and situates the investigation in one of China's largest, complex, and most dynamic and globalized cities - Shanghai. The experience of the city and its people reveals the creative and controversial ways people redefined, reconfigured, and reshaped forces such as imperialism, nationalism, consumerism, authoritarianism, liberalism, communism, and capitalism. The course also seeks to go beyond the "Shanghai model" by comparing Shanghai with other Chinese cities. It presents a range of the urban experience in modern China.

### L97 GS 3358 Vienna, Prague, Budapest: Politics, Culture, and Identity in Central Europe

The term Central Europe evokes the names of Freud and Mahler; Kafka and Kundera; Herzl, Lukács, and Konrad. In politics, it evokes images of revolution and counter-revolution, ethnic nationalism, fascism, and communism. Both culture and politics, in fact, were deeply embedded in the structures of empire (in our case, the Habsburg Monarchy)--structures which both balanced and exacerbated ethnic, religious, and social struggles--in modern state formation, and in the emergence of creative and dynamic urban centers, of which Vienna, Budapest, and Prague were the most visible. This course seeks to put all of these elements into play--empire, nation, urban space, religion, and ethnicity--in order to illustrate what it has meant to be modern, creative, European, nationalist, or cosmopolitan since the 19th century. It engages current debates on nationalism and national identity; the viability of empires as supra-national constructs; urbanism and modern culture; the place of Jews in the social and cultural fabric of Central Europe; migration; and authoritarian and violent responses to modernity.

### L97 GS 3373 Law and Culture

We live in an age when social policy is increasingly displaced into the realm of law, when justice and equality are matters of courtroom debate rather than public discussion. Legal language has become a key resource in all kinds of struggles over livelihood and ways of life. In this course, we study the cultural dimensions of law and law's changing relationship to state power, the global economy, social movements, and everyday life. We approach law as a system of rules, obligations, and procedures, but also a cultural practice, moral regime, and disciplinary technique. How are relationships between legal, political, and economic realms structured and with what consequences? How does law provide tools for both social struggle and social control? What does anthropology contribute to research on these issues? In exploring these questions, we combine readings from classical legal anthropology with recent ethnographic work from around the globe.

### L97 GS 3400 History of World Cinema

The course surveys the history of cinema as it developed in nations other than the United States. Beginning with the initially dominant film producing nations of Western Europe, this course will consider the development of various national cinemas in Europe, Asia, and third world countries. The course will seek to develop an understanding of each individual film both as an expression of a national culture as well as a possible response to international movements in other art forms. Throughout, the course will consider how various national cinemas sought ways of dealing with the pervasiveness of Hollywood films, developing their own distinctive styles, which could in turn influence American cinema itself. Priority given to majors. REQUIRED SCREENING: [day, time].

### L97 GS 3402 German Literature and the Modern Era

Introduction in English to German writers from 1750 to the present. Discussion focuses on questions like the role of outsiders in society, the human psyche, technology, war, gender, the individual and mass culture, modern and postmodern sensibilities as they are posed in predominantly literary texts and in relation to the changing political and cultural faces of Germany over the past 250 years. Readings include works in translation by some of the most influential figures of the German tradition, such as Goethe, Nietzsche, Freud, Kafka, Thomas Mann, Brecht, and Christa Wolf. Open to first-year students, non-majors and majors. Admission to 400-level courses (except 402, 403D, 404, and 408D) is contingent on completion of this course or 341/341D. The main course is conducted in English, so this will only qualify for major or minor credit when taken in conjunction with one-hour discussion section in German (L21 340D).

### L97 GS 3404 The Creation of Capitalism

Capitalism is now the dominant form of economic organization around the world. This course traces the rise of capitalism from its beginnings in late medieval Europe, through its development in the global trade connecting Europe to Africa, Asia, and the Americas, to its formative role in the Industrial Revolution of the early nineteenth century. How and why did capitalism emerge and expand to a position of such importance? Who profited from it and who resisted it? And how did numerous elites become convinced that capitalism was necessary and moral? Students will engage these questions through lectures and class discussions based on primary source readings such as merchant letters, economic legislation, and Adam Smith's *The Wealth of Nations*, as well as key works of historical scholarship on topics such as piracy, the Dutch tulipmania, and the Atlantic plantation economy. Assignments include weekly readings, short response assignments, open-note exams, and researching and developing a time-appropriate business plan.

### L97 GS 3405 Writing New Horizons: Explorers, Envoys, and Other Encounters in Korean Travel Narratives

Whether physical or imagined, travel evokes notions of center, periphery, boundary and identity that shape the world we live in. This seminar course uses travelogues as well as literary, visual and cinematic representations of travels relating to Korea to explore how travel, art and imagination together help constitute one's sense of place. The course approaches travel from three angles. First, it examines writings by Korean authors on domestic, interregional, and international travels from premodern to modern times. Such

works offer a frame for tracing conceptualizations of self and other through topics including diaspora, refugee crisis, migrant workers, political exile, prisoners of war, and others. The course also looks at stories of travel to Korea by non-Korean authors in order to see how "Korea" was perceived in various times by people outside the country. Lastly, through imagined journeys typically labeled as "sci-fi" or "fantasy", it examines notions of "truthful" and "realistic," and considers the function of the fantastic and storytelling and their relation to the world we live in. For their final project, students will create a map of real or fictional travels based on material covered in class. Using Digital Humanities tools such as StoryMaps (ArcGIS), Carto, or MyMaps (Google), they will also produce itineraries and narratives to accompany the maps, and present these results online. Necessary technical assistance will be provided by the GIS team at Olin Library throughout the semester. All reading in English. Prior knowledge of Korean language or culture may be helpful but is not required.

### L97 GS 3414 Transnational Cinema(s): Film Flows in a Changing World

Across a century of extreme nationalism, Cold War imperialism, and increased globalization, moving image culture remains deeply tied to the evolution of global economics, shifting notions of local identity, and human migration. Recent changes in the dynamic of international economics and cultural flow have led to new critical approaches that reassess international cinema as being constructed by relationships that transcend national borders. This course examines multiple ways in which cinema works "transnationally", focusing on recent theories of modernism, globalization, and borderless cultures. Exploring a range of contexts from American domination of the early international market, to the recent evolution of Chinese blockbuster action films, to contemporary Palestinian video art, this course looks at the way in which material developments, narrative and aesthetic conventions, and film professionals have circulated over the past century. We will also look at how new technologies of production, distribution, and exhibition challenge traditional notions of cultural borders. Required screenings and in-class textual analysis will be used to complement industrial studies of how transnational flows have come to define contemporary audio-visual media practices. Required Screenings.

**L97 GS 3415 Early Chinese Art: From Human Sacrifice to the Silk Road**

How does ancient and medieval Chinese art inspire contemporary artists? This course examines Chinese art, architecture, and material culture from the prehistoric period through the end of the medieval Tang dynasty to demonstrate how the past continues to affect contemporary Chinese art and the art of its future. Topics covered include Neolithic ceramics and jades, the early bronzecasting tradition, the Terracotta Army and its predecessors, early brush arts and Buddhist sites, and the varied exotica of the Silk Road. Each class teaches early and contemporary works side by side to demonstrate how artists today continue to look to the past as they create the art of the future. Prerequisite: One course in Art History at the 100 or 200 level or permission of instructor.

**L97 GS 3416 German Thought and the Modern Era**

In this introduction to the intellectual history of the German-speaking world from roughly 1750 to the present, we will read English translations of works by some of the most influential figures in the German tradition, including Kant, Hegel, Marx, Nietzsche, Freud, Adorno, Heidegger, Arendt, Habermas, and others. Our discussions will focus on topics such as secularization, what it means to be modern, the possibility of progress, the role of art and culture in social life, the critique of mass society, and the interpretation of the Nazi past. We will consider the arguments of these thinkers both on their own terms and against the backdrop of the historical contexts in which they were written. Open to first-year students, non-majors and majors. Admission to 400-level courses (except 402, 403D, 404, and 408D) is contingent on completion of this course or 340C/340D. The main course is conducted in English, so this will only qualify for major or minor credit when taken in conjunction with one-hour discussion section in German (L21 341D). Same as L21 German 341

**L97 GS 3417 Literary and Cultural Studies in Spanish**

This course is an introduction to cultural and literary analysis within Iberian and Latin American cultures. The course will be covering a wide variety of materials that span different countries, historical periods, and various cultural and literary forms. The main objective of the course is to introduce students to key historical, geographical and political aspects of these cultures, while at the same time applying different approaches of cultural analysis. The course is structured upon key central concepts as they are particularly related to the cultures of the Iberian Peninsula and Latin America, such as Nation, Colonialism / Postcolonialism; Modernity and Postmodernity; Popular & Visual Media; Gender, Race, Migration and Social Class. The course combines the reading of literary texts, films and other cultural forms, with the examination of introductory critical works related to the key concepts that will be explored throughout the semester. Prereq: Spanish 308E or concurrent enrollment in 303. Taught in Spanish.

**L97 GS 3418 War, Genocide and Gender in Modern Europe**

This course explores the way in which gender and gender relations shaped and were shaped by war and genocide in 20th century Europe. The course approaches the subject from various vantage points, including economic, social and cultural history, and draws on comparisons between different regions. Topics covered will include: new wartime tasks for women; soldier's treatment of civilians under occupation, including sexual violence; how combatants dealt with fear, injury and the loss of comrades; masculine attributes of soldiers

and officers of different nations and in different wartime roles; survival strategies and the relation to expectations with regard to people's (perceived) gender identity; the meanings of patriotism for women and men during war; and gender specific experiences of genocide.

**L97 GS 3421 Iberian Literatures and Cultures**

Which are the cultures that shape what Spain is today? This course explores the diversity of the Iberian Peninsula through its literatures and cultures. As part of both the Mediterranean and Western Europe, the Iberian Peninsula has been shaped through a dynamic of conflict and negotiation between various cultures, languages, and religions. Students will engage themes such as internal colonization, imperialism, multiculturalism, regional identities, nation formation, migration, media and popular culture, modernization, and gender and race relations, as they relate to our understanding of the country today. Focuses may include but are not limited to the following: multiculturalism of the Middle Ages, the Muslim and Jewish presence in Spain, identity narratives and power relations, stage and performance traditions, as well as authors and artists like Cervantes, Galdós, García Lorca, Picasso, Almodóvar. Prereq: Spanish 308E or concurrent enrollment in 303. Taught in Spanish.

**L97 GS 3424 The World Is Not Enough: Europe's Global Empires, 1400-1750**

"Non sufficit orbis" (the world is not enough) became the motto for King Philip II of Spain, whose empire touched nearly every part of the globe. Europe's expansion to Africa, Asia, and the Americas was a transforming event for world history and for its willing and unwilling participants. This course examines the religious, political, and economic forces driving the overseas expansion of Europe, compares the experience of European sailors, soldiers, and merchants in different parts of the world, and analyzes the effect of empire on the colonizers, the colonized, and the balance of world power. Topics covered include:

Portuguese and Spanish conquests in the East and West Indies, religious conversion and resistance, trade routes and rivalries, colonial practices and indigenous influence, the establishment of Atlantic slavery, and the rise of the Dutch and English empires.

---

#### **L97 GS 3455 Cultural Encounters: China and Eurasia Since the Middle Ages**

Eschewing traditional narratives of Chinese civilization, which imply a society closed to the outside world, this course follows current scholarship in situating Chinese history within a broader spatial context. In particular, this course explores cultural encounters between China and other subregions of the Eurasian continent to the north and west of China, from the Tang Dynasty (618-907) to the present. The course begins by analyzing the relationship between nomadic societies on the steppe (and, more generally, "non-state spaces") and settled

agricultural societies such as China. We then turn to the influence of two religions imported from central Eurasia: Buddhism and Islam. A related theme is the relationship, in the early modern era, between trade, which tended to erode boundaries, and states, which sought to create boundaries. We will then trace the changing dynamics among commerce, religion, and nation-states in the 20th century. Finally, we return to the role of Buddhism and Islam in the contemporary relationship between China and the various peoples and states across its western frontier.

Same as L22 History 3455

#### **L97 GS 3465 Japanese Literature in Translation II**

In this course students explore the tantalizing, thrilling, and sometimes macabre genre of mystery fiction in Japan. Emerging in the late 19th century, largely in response to the disruptions of industrialization, the mystery genre offered writers a way to make sense of a chaotic, unfamiliar world. The genre has also allowed a means of social critique and radical experimentation. The class considers the works of Edogawa Rampo, Matsumoto Seicho, Miyabe Miyuki, Kirino Natsuo, and others. All readings in English. No prior knowledge of Japanese required.

---

#### **L97 GS 3500 The 19th-Century Russian Novel (WI)**

The 19th-century "realistic" novel elevated Russian literature to world literary significance. In this course we do close readings of three major Russian novels: Nikolai Gogol's *Dead Souls*, Ivan Turgenev's *Fathers and Sons*, and Leo Tolstoy's *Anna Karenina*. While we consider a variety of formal and thematic concerns, special emphasis is placed on the social context and on questions of Russian cultural identity. Readings and discussions are supplemented by critical articles and film. This is a Writing Intensive course: workshops are required. All readings are in English translation. No prerequisites.

#### **L97 GS 3502 Special Topics in Italian Literature and Culture**

Traditionally represented as a land of emigrants and exiles from the south, 21st-century Italy has become the destination of many immigrants and a place of encounter of different cultures and races. In "Cara Italia" [Dear Italy], a rap hymn by the famous artist Ghali, Italy is both a dear and a contested space of belonging where many children of migrants feel both at home and out of place. Exploring the cultural and historical roots of this feeling, the course asks the following: What does it mean to culturally belong? Why are certain people denied the status of Italian citizens? What does it mean to be Black in Italy? How are interracial younger generations reshaping Italy and Italian-ness? This course is an introduction to cultural productions at the intersection of migration, race, gender, and citizenship in contemporary Italy. In the course, students will critically engage a variety of issues such as the relation between Italian colonialism and recent migration,

border politics and civic mobilization, gender struggles and networking, xenophobia and racism, and social protests and activism. Although African migration and Italians of Afro-descent are at the core of the course, students will also explore representations by/of other migrant communities such as the Asian and the Albanian ones. The course will be conducted in English, and screenings will be in the original language with English subtitles.

### L97 GS 3503 U.S.-China Relations from 1949 to the Present

The United States and China are the two most important global powers today, and the relationship between them is one of the most comprehensive, complex, and consequential major-power relations in the world. The tangled relationship is at times turbulent, and its future remains uncertain. This course studies the bilateral relationship from the Chinese Civil War to the rise of China as a major political and economic power in the 21st century. It invites students to explore the following questions: What have China and the U.S. done to confront or accommodate each other in global politics? How has foreign policy in both countries balanced the often competing goals of state security, economic stability, domestic political order, and international influence? What are the impacts of a rising China on geopolitics in the Asia-Pacific region and on the U.S.'s global leadership in the 21st century? By drawing on scholarship in political and social history and area studies, this course helps students better understand both the historical context and current developments of U.S.-China relations. Fulfills modern elective for EALC major.

### L97 GS 3510 Muhammad: His Life and Legacy

This course intends to examine the life and representations of the Prophet Muhammad from the perspective of multiple spiritual sensibilities as articulated in various literary genres from medieval to modern periods. The course is divided roughly into two parts. One part deals with the history of Muhammad and the related historiographical questions. The second part deals with the representations of Muhammad in juristic, theological, Sufi, etc. literature. Because of the availability of primary sources in English translation, there will be a healthy dose of primary source reading and analysis throughout the semester. Those students with advanced Arabic (and Persian and Turkish) skills will be encouraged to engage sources in their original language.

Same as L75 JIMES 351

Credit 3 units. A&S IQ: HUM, LCD, SC BU: ETH EN: H

---

### L97 GS 3511 Global Surveillance Culture

Surveillance in its most basic definition is often understood as watching someone from above and has proven to be one of the most effective ways of exercising power in political communities since the Middle Ages. If it is true, as the surveillance scholar David Lyon writes, that cultures of surveillance develop differently depending on their political economies and post-authoritarian or colonial past, a focus on the global circulation of surveillance imaginaries then raises the question of how such local differences are narrated, visualized or imagined. In this course, we will focus on the narrated differences within artistic and cultural expressions from Europe, Asia, Africa, North and South America to explore how local surveillance practices shape, disrupt or create global imaginaries. Surveillance and the linkages between its diverging cultures, as one might argue, then become a part of the globalization processes themselves. Against this backdrop, a focus on the global imaginaries of surveillance promises a unique inquiry into how local attitudes towards information collection, beliefs in (mass) monitoring, or values and desires associated with social media

surveillance translate, shape, and intervene with the global. In final projects students will have the opportunity to work on a (digital) humanities project that explores the themes of "Sharing is Caring," "Counter-Surveillance," and "(In)Visibility in Surveillance Capitalism." Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

### L97 GS 3512 "Model Minority": The Asian American Experience

Through multidisciplinary inquiries, this course provides a lens into the complexity and heterogeneity among Asian Americans. It situates Asian American experiences in the broader American ethno-racial and social-political contexts as well as considering transnational dimensions. From a brief historical survey of Asian immigration and exclusion to analysis of the contemporary landscape of Asian America, this course explores Asian American cultures and identities, intermarriage and religious practices, and Asian Americans in popular culture, higher education, and professional fields while facilitating discussion of new forms of invisibility and marginalization in the contemporary era.

### L97 GS 3513 Pleasure, Amusement, and Play: Entertainment Culture in Premodern China

How do people in premodern China talk and write about pleasure? What can be learned about Chinese culture and society through pleasure, amusement, and play? This course explores the entertainment culture in premodern China, mainly from the 16th to the 18th century—an important historical moment of technological, economical, and political transformations. Throughout the semester, students will follow the scholar-officials, urban nouveau riche, courtesans, and entertainers in their travel through city spaces into gardens and pleasure quarters. Students will witness how they seek and take pleasure through reading a wide range of primary texts, including short stories, novels, essays, scholars' notation books, entertainment manuals, and philosophical writings. Students may have the opportunity to join and/or have conversations with them through in-class activities like role-play games and a mid-term creative adaptation assignment. By exploring the entertainment culture in premodern China, this course pays attention to the distinctive aspects in Chinese cultures such as gender dynamics, construction of public and private spaces, the promotion of personal emotions, as well as memories and nostalgia. All readings are in English. Prerequisites: None.

### L97 GS 3520 Literature of Modern and Contemporary Korea

This undergraduate course surveys the major writers and works of 20th century Korean literature. During the 20th century Korea went through a radical process of modernization. From its colonization by Japan, to its suffering of a civil war within the cold war order, to its growth into a cultural and economic powerhouse, Korea's historical experience is at once unique and typical of that of a third-world nation. By immersing themselves in the most distinctive literary voices from Korea, students examine how the Korean experience of modernization was filtered through its cultural production. The course pays special attention to the writers' construction of the self and the nation. How do social categories such as ethnicity, class, gender, and race figure in the varying images of the self? And how do these images relate to the literary vision of the nation? Along the way, students observe the prominent ideas, themes, and genres of Korean literature. This class combines lecture with discussion, in which students are strongly encouraged to participate. All literary texts are in English translation and no previous knowledge of Korean is required. Fulfills modern literature requirement for EALC degrees.

### L97 GS 3521 Introduction to Postcolonial Literature

At its zenith, the British Empire encompassed almost a quarter of the globe, allowing the diminutive island nation unprecedented economic, military, and political influence upon the rest of the world. This course will introduce some of the foundational responses to this dominance, both literary and theoretical, by the colonized and their descendants. We will examine important critiques of colonialism by theorists such as Frantz Fanon, Aimé Césaire, Edward Said, Homi Bhabha, and Gayatri Spivak, as well as literary works that reflect a postcolonial critique by authors such as V.S. Naipaul, George Lamming, Doris Lessing, and N'gugi wa Thiong'o. The course will interrogate how literature could be said to help consolidate Empire as well as ways in which it might function as rebellion against imperial power, with a view toward teasing out the problematics of race, gender, language, nationalism, and identity that postcolonial texts so urgently confront. This course may fulfill the global or minority literatures requirement for students who declare an English major in the fall 2021 semester and beyond.

### L97 GS 3527 Fantasy, Sci-Fi, and Horror: Genre-Fiction in Arabic Literature

Genre is a category, or to use Aristotle's term, a species. It is a category of literature, arts, music, and other forms of composition, to classify works of shared conventions, practices, and aesthetics. A typical example would be poetry. Subgenre is a single division of a given genre. In this example, epic poetry, the sonnet, haiku are subgenres of poetry. But who gets to decide what is genre, subgenre, and how? These would be some of the main questions we will address in this course. Genre theory can teach us a fascinating history of how various cultures imagine their forms of creative expression. The development of genres and subgenres reveal complex histories on who has the power to define and redefine creative expression. For example, the novel, now a dominant and prestigious global literary genre, was once considered an inferior and working-class genre in Europe over a century ago. The novel genre then developed into numerous subgenres, which are today placed under one large umbrella that is "genre-fiction," such as sci-fi, fantasy, horror, gothic, mystery etc.. However, the borders between these subgenres and the larger genre itself are always contested and reformulated. Through the history of genre and subgenre, we get to learn about literary taste and literary criticism, and whose definitions and conventions have changed the course of literature and the arts, and for what reason. The dominance of the historical novel today, for example, is attributed to larger phenomenon such as decolonization, feminism, and anti-racism. The sociopolitical urge to utilize fiction to address larger issues has not only boosted the impact of the historical novel but "elevated" it to become a common form of the genre itself. Within this grand history, Arabic literature has a complex and rich story to tell about genre and subgenre. The most obvious example here, which will be our entry point in this course, is 1001 Nights (also known as The Nights, or The Arabian Nights). This multi-volumed masterpiece has influenced fiction writers across the globe, especially in the past three centuries as the novel began to formulate into a modern genre. It is an exceptional work where we see a cosmology of subgenres of storytelling, narrative, but also of poetry, and in some editions, illustration and drawing, as well as translation. The Nights is often seen

as the first hybrid work of literature where subgenres and forms co-exist but also blur and converge. This dynamic, revolutionary, and mobile nature of The Nights expresses the meeting of various cultures, experiences, and traditions of storytelling during the Abbasid empire. Today, it remains ever more relevant and inspiring in a cosmopolitan world. The question and history of sub/genre, however, will guide us through an exploration of modern and contemporary Arabic literature. We will get to engage with these texts thematically, stylistically, and intellectually. The aesthetic choices made in literature are never isolated from the intellectual, political, and sociohistorical contexts of a given text. Through the assigned texts and artworks, we will also learn about colonization, gender, imperialism, class, migration, ecology, among other pressing topics. No knowledge of Arabic is necessary; all readings in English translation.

### L97 GS 353 Global Energy and the American Dream

This lecture course explores the historical, cultural, and political relationship between America and global energy, focusing on oil, coal, natural gas, biofuels, and alternatives. Through case studies at home and abroad, we examine how cultural, environmental, economic, and geopolitical processes are entangled with changing patterns of energy-related resource extraction, production, distribution, and use. America's changing position as global consumer and dreamer is linked to increasingly violent contests over energy abroad while our fuel-dependent dreams of boundless (oil) power give way to uncertainties and new possibilities of nation, nature, and the future. Assuming that technology and markets alone will not save us, what might a culturally, politically, and socially-minded inquiry contribute to understanding the past and future of global energy and the American dream?

### L97 GS 3530 Understanding Indian Literature Through Visual Media

This course focuses on the films and cultural traditions of South Asia in general and of India in particular. Students will be introduced to a variety of contemporary literary genres through visuals. Readings and class discussions will be followed by film screenings from the popular Hindi cinema (known as the Bollywood industry in India) to demonstrate how images and visuals influence modern-day cultural traditions. Students will also get a chance to work on films based on literary texts by well-known writers of the subcontinent. These readings and films focus on various social, cultural, political and historical aspects of Indian society. Students will be encouraged to explore these issues in their written assignments as well as in their class discussions.

### L97 GS 3544 The Anthropological and Sociological Study of Muslim Societies

This course introduces students to anthropological and sociological scholarship on Muslim societies. Attention will be given to the broad theoretical and methodological issues which orient such scholarship. These issues include the nature of Muslim religious and cultural traditions, the nature of modernization and rationalization in Muslim societies, and the nature of sociopolitical relations between "Islam" and the "West." The course explores the preceding issues through a series of ethnographic and historical case studies, with a special focus on Muslim communities in the Middle East, Southeast Asia, and Europe. Case studies address a range of specific topics, including religious

knowledge and authority, capitalism and economic modernization, religion and politics, gender and sexuality, as well as migration and globalization. Please note: L75 554 is intended for graduate students only.

**L97 GS 3548 Gender, Sexuality and Communism in 20th-Century Europe**

This upper-division course examines the role of gender and sexuality for the establishment of communist societies in Europe in 20th century. We will explore to what extent societies built on the communist model succeeded with the achievement of gender equality and allowed for sexual relations liberated from religious or economic constraints.
