

# Majors Across Schools

Students may earn an AB degree with a first major in the College of Arts & Sciences and a second major in art and design, business, or engineering by fulfilling all the distribution requirements for the AB degree and completing the requirements both for the first major in Arts & Sciences and for the second major in art and design, business, or engineering. With careful planning, meeting these requirements can be accomplished within the 120 units required for the AB degree; students should keep careful count to ensure that they complete at least 90 units of credit in the College of Arts & Sciences. For further information about second majors in art and design, visit the College of Art *Bulletin* page; for further information about second majors in business, visit the Olin Business School website; and for further information about second majors in engineering, visit the McKelvey School of Engineering website.
