

Post-Baccalaureate Pre-Medical Program

The **Post-Baccalaureate Pre-Medical program** at Washington University enables qualified college graduates to take core and elective science and math courses that satisfy medical school admission requirements. Students also may take approved elective courses in the natural sciences, social sciences, and humanities that provide a broad context and skill set for the practice of medicine today. The program is flexible to accommodate individuals changing careers, including those without a science background. For students who enter the program with most pre-medical course requirements complete, the program offers numerous upper-level biology courses to enhance a previous academic record and demonstrate science mastery. Courses are typically taken during the evening and are available during the fall, spring and summer terms. Day courses are also available to students, although tuition rates are higher.

Students earning at least 30 units of credit — 24 units of which must be completed at Washington University, with a cumulative grade-point average of 3.2 or higher — will be awarded a Certificate of Post-Baccalaureate Pre-Medical Study.

Students wishing to complete fewer than 24 units of course work are not eligible for admission to the program, but they are welcome to register for courses at Washington University on a non-degree basis. Some courses may require instructor or program director approval.
