

Global Leadership and Management

This program will officially come to a close by spring of 2026. Explore CAPS's exciting, new undergraduate offerings, including the reimagined Integrated Studies undergraduate degree programs.

The **Bachelor of Science in Global Leadership and Management** prepares students for leadership and management positions in a variety of private, public, domestic and international organizational settings. The program provides an alternative path of study for the liberally educated business professional seeking practical skills and strategies for successful management in a global business environment.

The program also provides critical analysis of historical and social forces that influence leadership and organizations, and it addresses complex questions from different intellectual perspectives in order to broaden business education. In addition, the program enables students to examine the dynamic between culture and successful business practice, both at home and abroad, and it provides the opportunity to study in greater depth the culture of a particular geographic area associated with a student's personal and professional interests.
