Bachelor of Science in Applied Science (Chemical Engineering)

This degree serves students who wish to be exposed to key chemical engineering principles yet seek a more flexible curriculum. In addition to the general requirements for a McKelvey Applied Science Degree (http://bulletin.wustl.edu/undergrad/engineering/requirements/#ASBSdegrees), the Bachelor of Science in Applied Science (Chemical Engineering) requires 25 units of core courses as well as at least 8 units of upper-level chemical engineering courses from a list of options. Consult the EECE department website (https://eece.wustl.edu/academics/undergraduate-programs/BS-in-Applied-Science-Chemical-Engineering.html) for the specific courses that can be taken to fulfill the requirements of this degree.
