Mathematics or Applied Mathematics

**Note:** As of August 1, 2021, we are no longer accepting students into this program.

A degree in mathematics is useful for those seeking careers in teaching, research, the sciences, or business and government. The traditional **mathematics major** is particularly appropriate if students plan to teach or enter professional school, or if they seek an interesting major within the liberal arts. The **applied mathematics major** is suggested if a student plans a career in actuarial work, industrial mathematics or statistics.

The **minor in mathematics** consists of 21 units of required course work. Please refer to the Degree Requirements section (p. ____ ) for more information.
