U25 PolSci 101 American Politics
This course provides an overview of the politics of American government. The topics covered are the historical developments of American politics, federalism, political participation (e.g., voting), institutions (e.g., Congress), and public opinion. That political actors are strategic in their pursuit of objectives is a theme underlying our examination of these topics. Accordingly, we explore the many ways in which strategic political behavior impacts institutions and the interactions between political actors in the U.S.

U25 PolSci 102 Comparative Politics
This course introduces the student to the fundamentals of cross-national research, study, and understanding. Comparative politics is the study of the domestic politics of other countries. Comparative political study is important because domestic politics shapes what goes on within a given country and shapes how that country’s citizens and leaders interact with other countries. Comparative study is challenging because it requires both factual and theoretical knowledge about the world’s political systems and how and why they function. Without a strong background in the factual information and the theoretical frameworks around which we can begin to explain and predict political decisions, we cannot understand the world. This lack of understanding impedes effective decision making at the local, regional, national and international scales. In this course, we will study the dominant structures within which politics occurs and examine how those structures shape political choices.

U25 PolSci 103 Introduction to International Politics
Why do countries fight wars? When do states decide to trade? How can countries address global challenges such as climate change? This course introduces students to the tools needed to answer those and other questions related to interactions between states. First, we cover the theoretical and empirical basics required to analyze international politics in major policy areas such as conflict, trade, development, and the environment. Second, we explore the role of international organizations and how international interactions are connected to domestic politics.

U25 PolSci 230 U.S. Presidential Campaigning
With the 2016 Presidential race as our backdrop, this course will explore the road to the White House, from early primaries and caucuses through the general election. We will study the role and impact of the media, political parties, and interest groups. We will discuss campaign strategy and organization and the importance of fundraising, debates, polling, social media, and national conventions. We will assess the strengths and weaknesses of current presidential campaigns in real time. Students will select a candidate to “manage” throughout the course and develop themes, speeches, and a general election strategy for their candidate. We will not debate which candidate is the best, but we will discuss who has the best message, organization, and overall campaign.

U25 PolSci 3032 Global Energy Policy: From Israel to Iran
This course examines how the global energy markets operate and how energy policy is formulated, with a special focus on the Middle East. Students interested in working in the energy and/or policy world will gain a deeper understanding of the complexities involved in energy policy formulation and its profound impact on national security, the economy, and foreign policy. Students will deal with issues such as securing energy markets and suppliers, managing oil revenue, deciding on the country’s fuel mix for electricity, promoting nuclear energy in the Middle East, engaging with environmental concerns, using energy resources as a “weapon” in foreign policy, subsidizing renewable energy, and the role of energy in war. After learning the basics of the energy market, students will focus on the major players in the Middle East and examine their energy markets -- from Israel to Saudi Arabia and Iran -- including the involvement of foreign actors such as the United States and Russia. They will then be tasked with writing their own op-eds and policy papers to try and influence the process of energy policymaking and to gain experience writing for different audiences. The course will include a guest lecture by an executive from a major coal producer operating in St. Louis (depending on availability) and an optional class visit to a renewable energy project near St. Louis.

U25 PolSci 3305 Topics in Political Science: Theoretical Foundations of the Movement for Black Lives
This course explores the theoretical underpinnings of the Black Lives Matter (BLM) movement and the Movement for Black Lives (M4BL) policy platform. Since its emergence, BLM has articulated an intersectional critique of anti-black violence in the United States (and, to a certain extent, globally). BLM and the larger M4BL coalition provide an in-depth analysis of the specific ways structures of oppression such as white supremacy, patriarchy, and racial capitalism affect Black populations. By historically, theoretically, and politically situating BLM and the M4BL policy platform in the context of Black radical thought, including but not limited to abolitionist thought, intersectionality, and conceptualizations of racial capitalism, we will trace the ways BLM and M4BL adopt and build on various lineages of critique to diagnose contemporary forms of anti-black violence.

U25 PolSci 364 The New Space Rush
This course will introduce students to new activities regarding outer space. New types of spaceships and space hotels are being designed. Vast quantities of natural resources such as gold, platinum, iridium, osmium, helium 3 and water were recently discovered in outer space. These new advances in space exploration, science, technology and architecture can be analyzed through the lens of political science. Across various disciplines, these accomplishments in physics, biology, chemistry, engineering, medicine and computer science, along with the likely economic implications, can be explained by political science concepts, theories and analytical tools. Students from many disciplines can learn more by understanding the big picture of patterned activities relevant to outer space. Newly emerging industries such as space tourism, space mining, commercial space settlements and outer space colonization will be discussed.

U25 PolSci 375 Topics in International Politics: International Organizations and Global Governance
This course surveys postwar American foreign policy in historical perspective. It begins by evaluating the rise of the United States as a world power during the 20th century, its current position of primacy and its consequences in the post-Cold War period, and the distinctive traditions and institutions shaping the making of American foreign policy. It then examines the origins of the strategy of containment during the early Cold War period before considering how these debates animated the changing course of American foreign policy through the various phases of the Cold War conflict. The course concludes by analyzing American foreign policy since the end of the Cold War, up to and including debates about the consequences of September 11, 2001, for the United States' position of primacy, the Bush Doctrine, and the American-led intervention in and subsequent occupation of Iraq.

U25 PolSci 4013 Negotiating Major Legislation in Congress
This course examines the outcomes of the legislative process in the United States. The first third of the course will examine key concepts and major determinants of the negotiation process: majority rule instability, agenda control, political parties, the amendment process, and the uncovered set. The rest of the course will examine the negotiations that led to some of the most significant legislation in the past 100 years, from the Federal Reserve Act of 1913 through the Voting Rights Act of 1965 to the immigration bill of 2006. Along with other assignments, each student will write several drafts of a major research project on a major piece of legislation. Each research project will examine the amendments offered, the strategic intentions of the amendments’ sponsors, the agenda process, and the role of party. Prerequisite: PolSci 101B.

U25 PolSci 4080 Voting Rights and Election Law
This course will study legal concepts of voting rights and election law that impact the ability of citizens participate in the democratic process. What is the nature of the right to vote? Who gets to participate and on what terms? This question has been an ongoing source of debate and controversy since the founding of our nation, and remains so today, as the vote is symbolic of voice, presence and power in a democracy. As debates of race, class, citizenship, power and the role of government play out in how we exercise our political voice, this course will look at the timely and dynamic debates on voting and the underlying legal, historic, policy and political movements surrounding them. Many find it hard to believe that there is no explicit “right to vote” in the U.S. Constitution - part of a compromise inextricably tied to the history of race in America. Yet there are more constitutional amendments governing the right to vote than any other, prohibiting the abridgment of voting based on race, gender, property ownership, age and other qualifications. Legislative enactments have also established rights with respect to voting. Each extension of voting rights has been a product of and brought about, social and political change. Today there are more laws conditioning access to the ballot than at any other time since the post-reconstruction era, and many states will be facing new rules heading into upcoming mid-term elections and in anticipation of redistricting following the 2020 census. This course will examine the interplay of law and politics, history and political movements in the right to vote. The course will begin with a historical look at the development of voting rights from the founding of our country to the present. What factors have caused us to redefine who gets to participate in the electoral process and how? We will then apply these principles to current controversies in voting rights, through examination of current litigation and policy debates, and by assessing proposed solutions for voting rights going forward. The course involves study of fundamental court cases, interactive discussion of contemporary debates, and review of current litigation and legislative proposals. The course will be supplemented by occasional media and guest visits by election officials, lawyers, lawmakers, advocates or others.
