

# Business

The **Certificate in Business** (15 units) provides the information, skills and resources needed to function effectively in a business setting. The course work addresses core competencies including accounting, marketing and management as well as in-demand skills such as budgeting, business analysis, business process, procurement and operations management.

The Certificate in Business is a strong complement to any undergraduate degree program in University College, emphasizing the applied value of a liberal arts education. The Certificate in Business may also be pursued on a stand-alone basis for individuals seeking professional development.
